The expenditure on the Agricultural School and Experimental Station amounted to £907 19*s*. 6*d*., but against this expenditure has to be placed the receipts from the sale of live stock, plants, and produce to the value of £81, in addition to which ground provisions were supplied to the Royal Gaol and the Victoria Hospital to the value of £105.

During 1908 the applications for grants of Crown land numbered 126 for a total acreage of 1,323 acres; this shows an increase of 31 in applications and 328 acres over 1907. The revenue derived from sale of Crown lands amounted to £817 10*s*. 9*d*.

Of surveys 77 were executed through the department, 65 of which were for Crown lands allotments.

Forty Crown grants were issued, and 63 fully completed; one remained unissued.

The acreage alienated was 252 acres 2 roods and 19 perches.

Under escheat proceedings Government resumed 793 acres 2 roods and 16 perches. Of this area 627 acres had already been applied for, and applications lodged for 75 acres.

A system of Crown traces was commenced, which are intended to serve primarily, and in an inexpensive manner, those lands which have been disposed of by the Crown, and to assist private proprietors in obtaining readier access to their properties. These traces are so selected and graded that at any future date they may be developed into byways or main roads.

The Land Sales Fund was closed as on 31st March, 1909, and the credit balance, amounting to £1,753, carried to general revenue.

Cocoa, coffee, and other plants were distributed free to purchasers of Crown lands..

III.—LEGISLATION.

Eleven ordinances were passed during the year.

IV.—EDUCATION.

The number of primary schools increased from 46 in 1907 to 51 open at the end of 1908.

In these 51 schools there was a total number of 7,018 pupils on the roll, being an increase of 302 over the previous year. Of the 51 schools open at the end of 1908 there were 46 Roman Catholic

with 6,141 pupils on the roll, an average attendance of 3,871, and 5,290 examined.

The three Anglican schools had 599 on the roll, an average attendance of 134, and 190 examined. The East Indian Mission school, with 37 on the roll, and an average attendance of 28, had 33 examined.

The amount of Government Grant-in-Aid of primary education was £3,648, of which sum £3,171 was paid to the Roman Catholic schools, £329 to the Anglican schools, £93 to the Wesleyan school, and £55 to the East Indian Mission.

During the year the Grant-in-Aid was increased from £3,400 to £4,000, and a change was made in the system of its distribution.

The teaching of elementary tropical hygiene was continued with fairly satisfactory results.

The Agricultural Department conducted an examination in agriculture, both practical and theoretical, in 19 schools.

Progress is undoubtedly being made in the learning of English. The importance of this to the children of St. Lucia can hardly be exaggerated, and special stress is being laid on this point by the Inspector of Schools. The introduction of hygiene and agriculture into the syllabus will also help on this most desirable object.

The two secondary schools continued during the year.

V.—GOVERNMENT INSTITUTIONS.

Thirteen inmates remained in the lunatic asylum at the end of 1907.

Seventeen were admitted during 1908, making a total of 30 patients treated.

In addition there were 33 lunatics under treatment in the Grenada Lunatic Asylum at the end of the year.

At the end of 1907 there were housed in the Poor Asylum 60 people; during the year 40 were admitted, making a total of 100 treated.

Deaths numbered 20.

During the year 151 persons were under treatment in the Yaws Hospital. There were four deaths—three from yaws and one from leprosy.

The Poor Asylum and the Yaws Hospital are airy and fairly commodious buildings, pleasantly situated on the sea beach, picturesquely overshadowed by the Lesser Piton. A more ideal place could hardly have been selected for those poor and afflicted people to spend what must be to many of them the sunset of their days.

The number of patients treated at dispensaries during 1907 and 1908 were as follows:—

	1907.	1908.
Castries	8,947 ...	9,099
Babonneau	132 ...	30
Gros-Islet	570 ...	610
Paix Bouche	— ...	80
Dennery	562 ...	577
Mabouya Valley	385 ...	807
Anse la Raye	379 ...	624
Soufriere	585 ...	749
Choiseul	200 ...	382
Vieux-Fort	863 ...	590
Laborie	723 ...	495
Micoud	532 ...	492
	13,878 ...	14,535

The Babonneau Dispensary was closed on the 4th September, and a new one opened at Paix Bouche on the 18th September.

The expenditure from general revenue on out-door relief and burial of paupers amounted to £524 2*s.* 2*d.*; and the number receiving relief on 31st December, 1908, was 197, an increase of 12 over same date of previous year.

260 pauper burials took place during the year, the cost of these is also defrayed from general revenue.

There were 14 new accounts opened at the Savings Bank during the year, and the amount due to depositors on 31st December, 1908, was £19,074 19*s.* 7*d.*, being an increase of £1,383 2*s.* 1*d.*, or only 7·90 per cent. since 31st December, 1907; the increase for the latter year having been 20 per cent.

The total number of open accounts at the end of the year was 1,653. The face value of securities held on account of deposits was £18,502 19*s.* 3*d.*

The following statement gives the transactions of the Savings Bank for the last five years:—

Year.	Number of accounts open 31st December.	Total deposits inclusive of interest.	Total withdrawals.	Amount on deposit on 31st December.
		£ *s.* *d.*	£ *s.* *d.*	£ *s.* *d.*
1904... ...	1,642	18,990 15 5	20,568 7 1	15,633 17 3
1905... ...	1,231	15,025 16 3	16,285 13 7	14,373 19 11
1906... ...	1,584	13,750 12 6	13,397 7 1	14,727 5 4
1907... ...	1,639	15,526 2 0	12,561 9 10	17,691 17 6
1908... ...	1,653	15,411 9 0	14,028 6 11	19,074 19 7

The working account shows that £580 14*s.* 4*d.* was earned on investments (including refund of Income Tax). A sum of £490 7*s.* 4*d.* was paid to depositors as interest and a balance of £90 7*s.* 4*d.* was carried to general revenue.

The number of registered Friendly Societies as on 31st December, 1908, was 16, with a membership of 1,526, or an increase of 299 members during the year.

	£	s.	d.
The aggregate receipts during the year amounted to	1,797	13	0
which, added to balance on 31st December, 1907 ...	1,578	2	6
made a total of	3,375	15	6
The disbursements amounted to	1,668	7	8
leaving a balance on 31st December, 1908, of ...	1,707	7	10

or an increase of £129 5*s*. 4*d*.

The working expenses of the societies collectively amounted to £540, or a little over 7*s*. per capita, and varied from 27*s*. 7*d*. in one society to 2*s*. 3*d*. in another.

There were 602 male members and 924 female members on 31st December, 1908.

VI.—JUDICIAL STATISTICS.

During the year the number of prosecutions instituted by the police was 29 for indictable offences and 1,625 for summary offences. Of the former 25 were returned for trial and 4 were withdrawn. Of the prosecutions in summary offences convictions were obtained in 1,278 cases.

The criminal class is not as large as might appear from the number of prosecutions; the same offenders were convicted over and over again. These incorrigibles, most of whom belong to the class inseparable from a large shipping and coaling port, are really not many, but their repeated convictions help to swell the police records.

Two convictions were obtained against persons practising "obeah," in other words, sorcery. In many characteristics this form of fraudulent pretension to supernatural powers resembles that practised in some of the islands of the Western Pacific, and is there known as "drau-ni-Kau" (literally "leaf of a tree").

Sanitation is one of the multifarious duties the police perform, and during the year constant attention was exercised over tanks and other receptacles for water to prevent the breeding of mosquitoes. In many cases summonses were issued after repeated warnings.

The daily average of prisoners in the Royal Gaol was 58·49 males, 18·92 females, and ·38 juveniles. At Grenada and St. Vincent the daily average was 34·4 and 15·82, respectively, making a total daily average of all St. Lucia prisoners of 128·01.

The natives of St. Lucia only provided 57 per cent. of the convicted prisoners.

A serious epidemic of pneumonia occurred in the latter part of the year resulting in 10 deaths. Both strong and weak were attacked, and those within the prison as well as those employed on labour outside. The disease was confined to one building in which the male prisoners slept and did not reach the female division, separated only by a boundary wall; nor did it touch the police barracks to leeward of the prison. In order to thoroughly fumigate the building it was temporarily vacated and the male prisoners were transferred to a military building at La Toc on 19th September, where they remained till 12th October.

The daily average on the sick list was 2·1. There were three deaths in the prison, all from pneumonia; and eight in Victoria Hospital, seven of which were due to same disease.

The average cost of a prisoner for the year was £19 15*s*. 1*d*., in which is included pay of staff, dietary, clothing, and other charges.

The following figures summarise the criminal statistics for the last five years:--

—	1904.	1905	1906.	1907.	1908.
Offences reported	2,032	1,595	1,706	2,059	1,962
Summary Convictions—					
For offences against the person	355	405	220	380	405
„ prædial larceny	29	60	37	37	35
„ offences against property	124	226	77	138	106
„ other offences	1,059	904	1,126	950	1,134
Convictions in Superior Court—					
Child murder	—	1	—	—	—
For offences against the person	17	3	2	10	2
„ offences against property	13	23	14	27	13
„ other offences	2	5	1	110	—

In 1908 there were 1,695 convictions as against 1,642 in 1907; but of the latter, 184 were for offences connected with the disturbances of April in that year. Excluding this number for the sake of comparison would leave 1,458 convictions in 1907, or 237 less than in 1908. The increase in 1908 is due largely to the more vigorous enforcement of sanitary regulations and towns and villages by-laws.

VII.—VITAL STATISTICS.

Population.

The population on 31st December, 1908, was estimated by the Registrar of Civil Status to have been 55,095 (26,547 males, 28,548 females), or an increase of 496 during the year.

The birth-rate of the Colony was 29·8 per mille, exactly the same as in the previous year.

The death-rate was 20·7 per mille against 20 per mille for 1907. Of infants under one year 275·5 of every thousand died; this is an improvement over 1907, when the rate was 312·5 per mille.

There were 241 marriages as against 277 in 1907.

The population of the various districts into which the Colony is divided was estimated as under on the 31st December, 1908:—

Castries	20,831
Anse la Raye	3,125
Soufriere	6,234
Choiseul	4,900
Laborie	3,658
Vieuxfort	3,873
Micoud	3,492
Dennery	4,598
Gros-Islet	4,414

Considerable emigration to Colon and Cayenne continued during the year.

Public Health.

There was no case of quarantinable disease during the year. Considering that such diseases existed at one or other of the surrounding islands nearly the whole year the Colony may congratulate itself on its immunity.

The Health Officer visited 241 vessels, and 22 were fumigated with sulphur dioxide gas before being granted pratique. The existing system of fumigation by "dutch ovens" (*i.e.*, open fire pots) is not an ideal one, as it is impossible to satisfactorily treat even an empty ship, less so one with cargo, and the purchase of a Clayton disinfector was under consideration.

Attempts were made during the year to reduce the number of rats. Poisons, bacillary and inorganic, were distributed and rewards given for dead rats.

In Castries the campaign against "Stegomyia fasciata" was continued, and many hitherto unsuspected permanent breeding-places were discovered.

The Medical Officer, First Castries District, reports that his district was fairly healthy, but pneumonia was more or less prevalent throughout the year. The principal diseases treated were malaria and intestinal parasites. The malaria was, as a rule, of a mild type, and most of the cases yielded quickly to quinine.

The Medical Officer, Second Castries District, says the usual amount of malaria occurred during the year. The severer cases generally come from the country where they had had no treatment. Owing to the intense objection of the labouring class to quinine, death from malaria sometimes occurs simply because the patient refuses to take it. Ankylostomiasis showed no decrease.

In the Second District the Medical Officer states a wave of pneumonia spread over the entire district during the second quarter of the year, assuming an epidemic form and causing many deaths. Intestinal parasites (chiefly among children under 10 years) and malarial fevers head the list as usual.

The Medical Officer of the Third District reports that fevers at the beginning of the year were prevalent, but abated during the latter part of it, when influenza, accompanied by pleuro-pneumonia of a virulent type, became rife and caused several deaths.

In the Fourth Medical District the Medical Officer has a very similar tale to tell as to the prevalence of fevers and intestinal parasites. There, also, a sharp outbreak of pneumonia occurred in November and December.

It is evident that the epidemic of pneumonia took a very similar course as in 1907, when appearing first at Vieuxfort, it spread to Castries and Dennery quarters. The contributory causes assigned by the medical officers generally to the disease are bad ventilation, drink, insufficient feeding, and overcrowding. The fact that this form of disease is peculiarly fatal to the coloured race hardly needs corroboration.

Climate.

For a tropical place St. Lucia is, for most months of the year, not oppressively hot. At an elevation of even 200 feet the days and nights are comparatively cool. The prevailing wind, N.E., blows almost constantly with a force of from one to three, and it is only when this fails that the oppressiveness so typical of the tropics is felt.

The rainfall of the year varied from 48·24 inches at Rivière Dorée (situate in the south-west corner of the island) to 96·92 at Guesneau (in the north central).

The average for the whole island from observations taken at 18 stations was 76 inches, or 7 inches more than in 1907. There was a heavy rainfall in December, in which month 28 inches were registered at one station (Soucis). The mean monthly temperature was 78·5°, the mean maximum and minimum being 85·5° and 71·5° respectively, and the highest and lowest reading actual 91·5° (in August) and 63° (in January and February). The mean barometric pressure at 10 feet above sea level was 30·12. There is a remarkable steadiness in the barometric readings, the greatest difference throughout the monthly mean being only ·116 of an inch.

The climate generally is equable and, with very ordinary precautions, healthy.

VIII.—POSTAL AND TELEPHONE SERVICES.

Although the total receipts of the Post Office for the year, which amounted to £1,521 16*s.* 10*d.*, was £162 16*s.* in excess of 1907, the expenditure, £1,711 5*s.* 4*d.*, was £633 9*s.* 2*d.* over that of the previous year, leaving a net deficit of £189 8*s.* 6*d.* This is due to the fact that during the year the accrued payments for the new mail contract were made.

The British postal order system proved a success and was largely availed of by the public. There were 3,579 postal orders sold. The £1 orders were purchased to the number of 951.

The number of parcels received from abroad increased by 400.

The money orders issued were to the value of £4,811, and of those paid, £4,435. By far the largest amount of orders paid is from the Canal Zone Government, being remittances made by emigrants from this Colony to their relatives and families here.

There is regular and frequent postal communications between Castries and the coastal towns and villages, and the number of letters and postcards exchanged between the central and branch offices showed a considerable expansion.

The total number of letters and postcards dealt with was:—

Foreign, sent	102,463	
,, received	91,734	
		194,197
Inland		92,889
		287,086

The Royal Mail Steam Packet Company's intercolonial steamers carried out the fortnightly service under the new contract without a break during the year. The ocean steamers leave Southampton every alternate Wednesday, reaching Barbados on the Monday week following; here mails and passengers are transshipped into one of the intercolonial vessels which leave Barbados on the Tuesday, arriving at St. Lucia on Thursday morning.

The total mileage of the telephone system is 190 miles, consisting of 111 miles trunk lines and 79 miles of branch lines.

The necessary works of maintenance and reconstruction were carried out.

The revenue for the year was £749 6*s.* 3*d.*; and the expenditure, exclusive of interest and sinking fund charges on loan, was £457 3*s.* 7*d.*

IX.—GENERAL REMARKS.

There was no public work of great importance carried out or commenced during the year, but a good deal of solid work was done by the Public Works Department in the way of improving and perfecting inland communications. Five bridges of concrete and steel were constructed, and a start made with another over the Piail River. On main roads 99 culverts, formed with concrete pipes, were put in, and 137 open cross-drains were filled up. The cost of maintenance per mile for main roads was £22.

The usual repairs and minor alterations to public buildings were executed. "Ruberoid" as a material for roofing was tried, and proved satisfactory. The work of converting the Royal Engineers' yard into offices for the Public Works Department was practically completed.

Ordnance Survey, Southampton, 1909.

There was no great fluctuation of trade during the year, nor any disturbing factor to the shipping, such as plague or yellow fever. For some months special precautions had to be taken, as the latter disease was prevalent in Martinique, almost at our doors.

Although fewer ships called than in 1907, this was due to the widespread depression in shipping, and not to any local circumstances. With such an excellent harbour and wharf accommodation as St. Lucia can boast of, we may confidently look forward to holding our own against other coaling ports in the West Indies, and when the Panama Canal is open to traffic, St. Lucia will undoubtedly receive a fair share of the increased trade that is bound to ensue. Ships drawing up to 30 feet can be coaled alongside more expeditiously than in any other West Indian port; they can procure excellent water, and all ships' stores can be obtained at prices that compare most favourably with those charged elsewhere. Pilotage is not obligatory; the harbour can rightly lay claim to its being "Statio haud malefida carinis," the motto of Castries.

Persistent efforts in the direction of destruction of mosquitoes continued during the whole year with fairly good results. Regulations as to screening of tanks and the keeping of receptacles for water were enforced. The people generally, however, show a strong aversion to quinine; were this to be overcome, it would be time to consider the question of free supply of that drug in order to stay the insidious march of the malarial fiend.

The future prospects of the Colony are good. There are not wanting signs of more attention being paid to the cultivation of other than the staple products, and cotton and limes are being tried seriously. The soil is rich and easily cultivable; land is cheap, and drought unknown. The climate is quite tolerable, and, with ordinary precautions necessary for all tropical places, healthy for everybody. Communications with England, Canada, and the United States are regular by comfortable and well-found vessels. Roads and byways traverse the country, and inland traffic is being steadily improved. Donkeys are being imported, and it may be hoped that gradually the human porters—in most cases women and children staggering along with heavy loads on their heads—will disappear, and be replaced by willing quadrupeds.

Mr. P. C. Cork administered the Government of the Windward Islands from the 28th July to the end of the year, during which time Mr. H. A. Smallwood acted as Colonial Secretary.

Mr. De Freitas acted as Chief Justice in St. Vincent from 4th October to the end of the year; Mr. Douglass acted as Attorney-General for the same period.

A sketch map of St. Lucia is appended.

H. A. SMALLWOOD,

Acting Colonial Secretary.

Government Office,

30th August, 1909.

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

ST. VINCENT.

(For Report for 1907–8, *see* No. 577.)

THE ADMINISTRATOR TO THE GOVERNOR.

Government House,
St. Vincent,
13th October, 1909.

SIR,

I HAVE the honour to forward herewith, for transmission to the Secretary of State, my report on the Blue Book of the Colony of St. Vincent for the year 1908-9. There has been some delay this year in the compilation of the Customs statistics, and, consequently, of this report, owing to the adoption of the calendar year for these statistics instead of, as hitherto, the financial year.

I have, &c.,

C. GIDEON MURRAY,
Administrator.

His Excellency
Sir James Hayes Sadler, K.C.M.G.,
&c., &c., &c.,
Governor of the Windward Islands,
Grenada.

(14752—2.) Wt. 26122—322. 1125. 11/09. D & S.

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1908-9.

I.—FINANCIAL.

General Revenue and Expenditure.

The following comparative statements and tables give the heads of revenue and expenditure, and the amounts received under those heads for the years 1907-8 and 1908-9, as well as the total revenue and expenditure for each of the last five years, 1904-5 to 1908-9:—

(Table 1.)

Comparative Yearly Statement of the Revenue.

Heads of Revenue.	Amount collected in the Year 1907–1908.	Amount collected in the Year 1908–1909.	Increase.	Decrease.
	£	£	£	£
1. Customs :—				
Import	12,167	13,645	1,478	—
Export	682	736	54	—
2. Port and Harbour Dues :—

(Table 2.)

Total Revenue and Expenditure for Five Years, 1904-5 *to* 1908-9.

Year.	Revenue.		Expenditure.	
	—	Total.	—	Total.
	£	£	£	£
1904–5	Local ... ... 22,448 Imperial Grant 5,818	28,266	Local ... ... 25,228 Imperial Grant 1,287	26,515
1905–6	Local ... ... 24,928 Imperial Grant 1,972	26,900	Local ... ... 24,625 Imperial Grant 1,286	25,911
1906–7	Local ... ... 24,723 Imperial Grant 1,308	26,031	Local ... ... 23,503 Imperial Grant 1,146	24,649
1907–8	Local ... ... 27,543 Imperial Grant 913	28,456	Local ... ... 23,508 Imperial Grant 1,145	24,653
1908–9	Local ... ... 30,810 Imperial Grant 585	31,395	Local ... ... 26,647° Imperial Grant 553	27,200

° In addition to this total local expenditure, a sum of £700 was paid back to the Imperial Treasury, being the final instalment of £1,441 Deficit Grant received in previous years in excess of actual deficit.

The Colony has made a distinct advance along the road of greater prosperity, showing a clear profit on the year's working of £4,163, and this notwithstanding the fact that the expenditure exceeded that of 1907-8 by £3,139.

The figures for 1908-9 are:—Total local revenue, £30,810, being £3,362 more than the Estimate and £3,267 more than the receipts for the year 1907-8. The total local expenditure was £26,647, which exceeded the Estimate by £344.

In addition, during the year it is pleasing to be able to record the repayment to the Imperial Treasury of the final instalment of £700 of the £1,441 Deficit Grant received in previous years in excess of actual deficit.

The revival by Messrs. D. K. Porter and Company of active operations in the Carib country resulted in a somewhat abnormal expenditure and a consequent increase of collection in import duties, and this increase, therefore, cannot be regarded as permanent. Nevertheless, signs are not wanting that with the maintenance of the cotton industry on its present paying basis and a more certain market for arrowroot, towards which end efforts are being directed, the average annual revenue of the Colony may not fall far short of this year's collection.

No changes in taxation took place during the year under review.

Assets and Liabilities.

The excess of assets on the 31st March, 1909, was £9,721.

On the 31st March, 1908, the account showed an excess of £6,258. From this last sum, however, £700 is to be deducted, which amount, as has already been stated, was paid back to the Imperial Treasury. The remainder, £5,558, together with the profit, £4,163, on the year added, gives a surplus of £9,721.

In addition to the above surplus, the sum of £25,000, the unexpended remainder of a fund contributed by private subscription at the time of the eruptions of the volcano, Soufrière, in 1902-3, is invested in Trust Securities.

There are also other funds of lesser importance showing assets to the Colony, some of which are extinguishable by time, while others, like the Graham Fund, the Alexander Fund, and the Thompson Home Fund, are used only in respect to the interest they bear.

Public Debt.

The public debt of the Colony stood on the 31st March, 1909, at £2,750 as against £3,550 at the end of the previous financial year. The Colonial revenue is, however, only directly responsible for £400 of that sum (which is extinguishable in 1910). The remainder is repayable from the municipal funds of the towns of Kingstown and Georgetown, the Colony only being responsible in case of default—an extremely remote contingency.

The Colony is similarly responsible for the unpaid balance of the Hurricane Loan to planters from the Imperial Treasury which

was at the 31st March, 1909, £12,058. This is being steadily redeemed by borrowers at the rate of about £750 per annum to the Local Government, by whom annual payments are in turn made to the Imperial Treasury.

Currency.

Gold, British and American, notes of the Colonial Bank, and British silver and copper constitute the currency of the Island.

The Government accounts are kept in sterling and commercial accounts in dollars and cents.

Finances of Municipalities.

The management of the affairs of Kingstown are vested in a Board, one-half of the members of which are elected by the rate-payers and the other half nominated by the Government.

The Chairman of the Board is annually elected by the members forming that body, but cannot in any circumstances be elected for more than two years in succession.

The small towns of the Colony, of which there are six, are controlled by wardens appointed annually by the Government.

The following comparative statements give the total revenue and expenditure of these towns during the last five years:—

Revenue.

Town.	1904.	1905.	1906.	1907.	1908.
	£	£	£	£	£
Kingstown	1,657	1,664	1,708	1,706	1,695
Georgetown	164	137	105	108	118
Chateaubelair	23	32	34	34	35
Calliaqua	31	38	35	31	32
Barrouallie	29	33	40	45	38
Layou	16	19	18	19	20
Bequia	15	11	10	9	9

Expenditure.

Town.	1904.	1905.	1906.	1907.	1908.
	£	£	£	£	£
Kingstown	1,650	1,472	1,698	1,758	1,790
Georgetown	120	103	102	108	109
Chateaubelair	26	24	28	28	27
Calliaqua	40	24	52	30	32
Barrouallie	27	20	34	31	41
Layou	34	19	12	9	24
Bequia	4	10	27	2	4

Debts of Towns.

The debts of the towns at the 31st December, 1908, were as follows:—

	£	£
Kingstown water supply	2,000	
Kingstown town improvement ...	200	
		2,200
Georgetown water supply		250
		£2,450

Provision for repayment of these loans is made by rates levied annually on the townspeople and the debts are secured on the general revenue of the Colony. They will be extinguished in 1912 and 1913.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

It has hitherto been the custom in St. Vincent to compile the statistics of imports and exports for the financial year, *i.e.*, from the 1st April of one year to the 31st March of the following year, but owing to certain representations which have been made by the Board of Trade, whereby it was desired that this Colony should fall into line with the United Kingdom and other British Possessions who have adopted the calendar year for trade statistics, it is not possible this year to give a true comparative table of either imports or exports. Appended, however, is a statement showing the main articles imported in 1908 and in the previous financial year 1907-8:—

Imports.

Chief Articles.	Value.	
	1907–8.	1908.
Class I.—	£	£
Beef, salted or cured	545	485
Biscuits	2,548	3,104
Butter	1,711	1,789
Coffee	392	360
Fish, salted, &c.	5,911	6,604
Flour, wheaten	10,400	10,572
Flour, other kinds	708	636
Oilmeal and cake	435	444
Pork, salted or cured	2,129	2,213
Rice	2,702	2,604

Chief Articles.	Value. 1907-8.	Value. 1908.
	£	£
Class I.—*cont.*		
Salt	320	377
Spirits	981	962
Sugar, muscovado	139	105
Sugar, refined	633	842
Sugar, crystallized	202	461
Wine	785	829
Food and drink supplies, unenumerated	1,262	1,581
Tobacco, cigars, &c.	1,038	1,166
Class II.—		
Manure	822	1,024
Petroleum oil	1,400	1,658
Timber and shingles	7,270	7,138
Class III.—		
Textile manufactures, other than rope, cordage, and canvas.	22,021	27,821
Metal, manufactured	10,089	13,419
Boots and shoes	1,001	1,308
Cement	571	970
Rope, cordage, and canvas	1,540	1,261
Soap	1,747	1,378
Articles unenumerated, other than textiles or metal manufactures.	3,979	4,651

These figures, so far as they may be taken as evidence, are an indication of growing prosperity, and in this connection notice is especially drawn to the substantial advances in the consumption of articles of luxury, such as "Food and drink, unenumerated," tobacco, cigars, &c.

The large increase, £3,300, in the item "Metal, manufactured," may probably to a large extent be accounted for by the resuscitation of the Carib country.

The annual report of the Supervisor of Customs shows an increase in value of imports of £17,159 compared with the figures of 1907-8, the distribution being as follows:—

	£
Increase from the United Kingdom ...	8,980
,, ,, British Colonies	5,954
,, ,, Foreign Countries	2,225
	£17,159

The direct import trade from Canada and the United States of America was £7,183 and £18,433, respectively, as against £8,273 and £16,686 in 1907-8. The increase from the British West Indies is £7,032, made up chiefly of merchandize of United States origin obtained at Barbados.

The value of the principal exports is given in the annexed table. As in the case of imports the table is drawn up for the calendar year 1908, the comparison being with the exportations for the financial year 1907-8:—

Exports.

Articles.	1907–8.	1908.
	£	£
Cassava starch	1,296	1,352
Whale oil	446	645
Turtle shell	449	387
Firewood	742	493
Cotton and cotton seed	33,133	31,903
Vegetables	2,213	2,593
Syrup	550	336
Sugar, crystallized	2,280	1,561
Sugar, muscovado	893	948
Pease	504	498
Molasses	889	400
Rum	99	515
Ground-nuts	1,589	1,740
Live stock	4,781	3,933
Fresh fruit	65	60
Farine	174	328
Arrowroot	25,555	27,713
Cocoa	4,960	4,989

The reduction in the value of the exports in cotton is to be accounted for by the lower prices received for this article in comparison, for instance, with those received in 1906-7, when as much as 1*s.* 11*d.* to 2*s.* 5*d.* was paid per lb. of lint, an abnormal price and unlikely to occur again. In support of this contention it may be stated that whereas in the financial year 1907-8, 388,833 lbs. of Sea Island cotton lint were exported, in the financial year under review 432,091 lbs. were exported.

While in 1907-8 the estimated value was £29,162, in 1908-9, notwithstanding the fact that 43,000 lbs. more were exported than in the previous financial year, the estimated value was only £28,971. The figures just given are exclusive of Marie Galante cotton which is grown in, and exported from, the St. Vincent Grenadines.

Arrowroot shows an appreciable advance, but as this is, unfortunately, to-day a variable market, too much stress cannot be laid upon the increase.

The total imports and exports for the five years, 1904-5 to 1908, are given below:—

Imports.

Classes.	1904–5.	1905–6.	1906–7.	1907–8.	1908.
	£	£	£	£	£
I. Live animals, food, drink, &c	32,534	31,575	32,000	38,864	41,484
II. Raw materials	8,628	6,566	12,268	11,175	14,168
III. Manufactured articles ...	33,076	30,956	33,740	46,515	58,061
Total	74,238	69,097	78,008	96,554	113,713

Exports.

Classes.	1904–5.	1905–6.	1906–7.	1907–8.	1908.
	£	£	£	£	£
I. Live animals, food, drink, &c	43,374	40,935	46,393	45,972	46,433
II. Raw materials	6,648	10,289	21,899	36,120	33,060
III. Manufactured articles ...	1,880	1,854	15,463*	12,173†	15,246‡
Total	51,902	53,078	83,755	94,265	94,739

* Includes £13,200 specie. † Includes £10,000 specie.
‡ Includes £12,855 specie.

The volume and direction of the Colony's trade in the five years, 1904-5 to 1908, are shown in the following tables:—

Imports.

—	1904–5.	1905–6.	1906–7.	1907–8.	1908.
	£	£	£	£	£
United Kingdom	26,816	25,471	27,126	36,280	45,260
British Colonies	29,562	30,691	32,870	42,436	48,388
Foreign Countries	15,860	12,935	18,012	17,839	20,065
Total	74,238	69,097	78,008	96,554	113,713

Exports.

—	1904–5.	1905–6.	1906–7.	1907–8.	1908.
	£	£	£	£	£
United Kingdom	22,192	24,405	39,878	52,718	54,444
British Colonies	26,881	27,920	43,184	40,535	37,758
Foreign Countries	2,829	753	693	1,012	2,537
Total	51,902	53,078	83,755	94,265	94,739

Manufactures and Fisheries.

The Government cotton ginnery, which was erected in 1903-4, and which is under the management of the Officers of the Imperial Department of Agriculture, continues to gin cotton for the planters and peasants at a charge of 1*d*. per lb. for ginning and baling. The profit made during the year amounted to £365, some £200 less than last year. The reason for this substantial decrease is to be found in the increased amount of cotton sent for ginning to the private ginneries.

There are two private ginneries in the Colony, one in Kingstown with three gins, and one with two gins on the Leeward side of the island.

About 33 tons of cotton seed were crushed by the disintegrator at the Government ginnery for the purpose of manuring the cotton lands.

The price of lint varied during the year from 1*s.* 3*d.* to 1*s.* 8*d.* a lb., this being the best price paid in the English market for the class of cotton known as Sea Island.

It is pleasing to be able again to record an increase in the export of whale oil, which rose to 13,434 gallons, valued at £645, as against 9,632 gallons in 1907-8, valued at £446. This industry was in former years of importance to the islanders of the Grenadines, the export figures, for instance, in 1903-4 showing 29,994 gallons, valued at £1,550.

The decline in this industry is said to be due to the smaller number of whales that to-day make their appearance in these waters. On the other hand, it is alleged that the sperm whale, which as an oil giver is superior to the hump-back whale, is to be seen more frequently to-day. This is encouraging, but at the same time the sperm whale being of a more determined nature than the other, the islanders have still a good deal to learn in the art of successful attack.

Agricultural Industries and Agricultural Department.

The cotton industry continues to grow and develop, and has, from the point of view of value, become the most important industry in the Colony. The following figures are interesting and instructive:—

Table showing the Quantity and Value of Cotton exported during the Period from 1903-4 *to* 1908-9.

Year.	Sea Island Cotton.		All Cotton.	
	Weight.	Estimated Value.	Weight.	Estimated Value.
	Lbs.	£	Lbs.	£
1903–4...	Not known.	—	43,392	794
1904–5...	77,814	3,890	126,178	4,494
1905–6...	121,174	6,059	138,150	7,674
1906–7...	225,632	16,922	263,036	18,169
1907–8...	388,833	29,162	427,819	30,787
1908–9...	432,091	28,971	459,303	29,878

These figures speak for themselves. The area, however, in which cotton can be cultivated is one limited, practically, to the coast lands. In these circumstances it is not to be expected that there can be much further expansion of the industry. So

long as prices range from 1*s*. 3*d*. to 1*s*. 8*d*. per lb. of lint, it will pay planters to grow cotton, and if planters are careful in cotton-plant selection and in cultivation, there is apparently no reason why those prices should not be maintained.

In regard to cultivation of cotton a good deal more might be done. There has been a tendency in the past to underrate the value of organic manures. Every effort is being made by the Agricultural Department to induce planters to devote more attention to crop rotations, to grow larger areas of leguminous plants for green dressing purposes, and to utilise all available manure, bush, grass, &c., and cotton seed. It has been clearly demonstrated that unless lands for cotton are well cultivated and manured, poor yields and deterioration of the class of cotton grown result.

In the St. Vincent Grenadines, notably Union, Canouan, and Mayreau, the common " Marie Galante " type is still cultivated. It is grown as a perennial, and produces a short coarse lint, valued at from 6*d*. to 8*d*. per lb. The exports of this cotton during the past five years amounted to 168,942 lbs., valued at £5,998. In several of the other islets—*i.e.*, Bequia, Mustique, Battowia, and Balliceaux—the cultivation of Sea Island cotton has been taken up exclusively, and with very satisfactory results. In time no doubt the other islets will fall into line.

Arrowroot still tops the list in regard to area under cultivation, while the export value increased over £2,000 during the year. The market was a fair one, but with a tendency to drop. Although occasional individual attempts have at various times been made to advertise this product of the Colony, no combined efforts of exporters have been directed to this end. The result is that notwithstanding the unrivalled excellence of the St. Vincent arrowroot, both as an article of diet for children and sick persons and also in the manufacture of chocolate and for general starch purposes, the consumption has hardly increased, while the wholesale value is declining to a basis when it will not pay to grow it. St. Vincent grows practically the whole of the arrowroot produced in the West Indies, soil and climate being apparently more suited to this cultivation than in any other of the islands, except, perhaps, Bermuda. Arrowroot is exported from here to nearly all the other West Indian islands.

An increased area in sugar was put under cultivation in the Carib estates, probably about 400 acres, but in the rest of the island the growth of sugar, except for the purposes of making rum, has practically ceased. The export figures in this article show a decrease of about £500—*i.e.*, from £3,172 to £2,509.

During the year the water supply canal in the Carib estates, referred to in last year's annual report, was completed, and, as arranged, the sum of £1,600, from the balance of the Eruption Fund, was handed to the proprietor as the Government's contribution towards the work of restoration of the estates. A small area of the estates was planted in cotton with good results. This is satisfactory as showing that the land is gradually returning to the ante-eruption state, and that the fine ash which was thickly

deposited during the eruptions is being absorbed into the original soil.

The cultivation of cocoa begins to be more favourably regarded by planters and peasants. It is, however, uphill work. They have much to learn yet in regard to the art of preparation for market, while a number of the diseases which attack the trees, or the remedies, are not yet familiar to them. Every endeavour is being made by the Agricultural Department to give assistance in these respects.

Vaccination has proved a great success in decreasing the death rate in stock owing to anthrax. There are many persons yet who do not take advantage of this remedy, with the result that there was still an appreciable and widespread loss from the effects of this disease.

Land Settlement and Crown Lands.

The sales during the year under the Land Settlement Scheme were 26 in all:—Rural lots of about 5 acres, 19; acre or small lots, 2; and township lots, 5. Altogether 5,671 trees were distributed to allottees, of which 4,034 were cocoa. In addition, 94 acres of Crown land was sold out in small lots. Available Crown land consists of mountain lands, which are only suitable for small holdings for growing provisions and native produce.

The revenue from sales and rental of Crown lands, not including Eruption Estates, was £465, as against £460 in the previous year, while the revenue from Eruption Lands aggregated £98, as against £167 in 1907-8.

Shipping.

A table of the entries and clearances of steamers and sailing vessels during the years 1907-8, and 1908, is appended, as also a comparative statement of the total shipping during the last five years. These figures do not include ships of war, of which one British visited the Colony during 1908:—

Sailing Vessels.

III.—LEGISLATION.

Twelve Ordinances were passed during the year 1908, of which the most important were an Ordinance to regulate the sale of poisons and an Ordinance to provide for the establishment and maintenance of a free public library in the town of Kingstown.

IV.—EDUCATION.

The results of primary education in 1907-8 and 1908-9 are as follows:—

—	1907–8.	1908–9.
Number of Schools	27	27
Number on roll	4,578*	4,862†
Average attendance	2,265	2,258
	£	£
Government Grant-in-aid	1,357	1,438

* During the March quarter of the year.
† At 31st March, 1909.

In September, 1908, the secondary school was reopened with a resident master, who is also inspector of primary schools of the Colony. The necessity for this school was at once apparent by the manner in which the places for pupils were filled. The fees charged are £2 per term for each scholar, except those under ten years of age in the lowest form, for whom the fees are £1 6*s*. 8*d*. per term. But when two or more brothers in forms above the lowest attend there is a reduction made of 6*s*. 8*d*. for the second and 13*s*. 4*d*. for the third.

The attendance at the primary schools continues about the same. Greater efficiency in teaching and otherwise is to be expected in the future as the result of the appointment of the inspector. Such close supervision of the working of these schools as will now be possible was unavoidably absent in the past.

The Agricultural School maintained an average of 21·6 pupils during the year. Special effort is being made to instruct pupils in the cultivation of cotton and in its diseases—very few of the overseers on estates to-day having any technical or expert knowledge of this subject beyond what they have gained by practical experience since the introduction of the Sea Island plant into St. Vincent only five years ago.

The small stock farm which continued to be worked as an adjunct to the school affords a valuable practical illustration of how stock should be kept and fed.

V.—GOVERNMENT INSTITUTIONS.

During the year there were 696 admissions to the Colonial Hospital, making, with those remaining from the previous year, 735 cases treated, as against a total of 656 in 1907-8.

The daily average was 60·7, as against 55, 52·4, and 55·8 in the previous three years.

The death rate was 5·3 of the total cases.

Operations numbered 194, as against 153 in 1907-8.

The Medical Officer is greatly assisted in his work by the presence of an efficient European nurse-matron selected by the Colonial Nursing Association.

A portion of the old military citadel at Fort Charlotte is set aside for detention of male lunatics who are violent or manifest destructive tendencies. Other males, as to whom it is judged that they may be so treated with safety, are kept under supervision in the Pauper Asylum, and female lunatics are also detained there. A portion of the wards is partitioned off into cells to provide further and more suitable accommodation for these female cases, some of which are occasionally acute.

As soon as practicable any violent or difficult case is, by arrangement with that Government, sent to Grenada, but sometimes the

asylum there has not got the requisite accommodation and the transfer is delayed.

There were 19 cases under treatment during the year (12 being new admissions), of whom 4 were discharged cured, 2 died, and 5 were transferred to the Grenada Asylum.

The total number of St. Vincent lunatics under care there was 32, at a cost of £471 to the Colony.

The number of inmates of the Leper Asylum on the 31st March, 1908, was 6; during the year there was 1 admission and 1 death, leaving the same number (6) in the asylum at the end of the year.

There is no compulsory segregation.

The Colony's paupers are housed in the old military buildings at Fort Charlotte at a considerable elevation overlooking the town of Kingstown.

At the commencement of the year under review there were 96 inmates of the asylum, and the admissions and discharges during the year were:—

	Male.	Female.	Total.
Admissions	33	31	64
Discharged	8	16	24
Died	18	19	37
	26	35	61

leaving 99 on the 31st March, 1909.

The total expenditure in 1908-9 was £966 on the Pauper and Leper Asylums including the cost of lunatics kept locally, as against £919 in 1907-8.

Chronic tertiary syphilis accounts for the vast majority of cases to whom this institution offers asylum for the closing stages of their lives.

Appended is a statement of the working of the Savings Bank for the last five years:—

Year.	Number of Depositors at 31st December.	Amount of Deposits.	Amount of Withdrawals.	Balance at credit of Depositors at 31st December (including Interest Capitalized).
		£	£	£
1904...	976	5,012	5,467	12,465
1905...	933	4,883	5,276	12,232
1906...	907	5,282	5,687	12,095
1907...	1,010	7,629	6,757	13,247
1908...	1,121	6,693	5,929	14,313

The amount due to depositors was distributed thus:—

	At 31st December, 1907.	At 31st December, 1908.
Kingstown	£11,837 ...	£12,845
Georgetown	828 ...	766
Chateaubelair ...	582 ...	702
Totals	£13,247 ...	£14,313

The Government made a profit on the working of the bank of £24.

There was invested of Savings Bank funds at 31st December, 1908, the sum of £13,005.

VI.—JUDICIAL.

The St. Vincent Police Force consists of a chief, a sergeant-major of European birth, and 50 West Indian non-commissioned officers and privates.

They are drilled and have some training in the use of arms and are supplied with Martini-Enfield rifles.

In addition to ordinary police work they perform duties in connection with excise supervision, district post office work, births and deaths registration, poor relief, and the management of district telephone exchanges. The prison is worked entirely by the police save for the assistance of one warder in charge of gangs outside.

In Kingstown a select number of the force form a fire brigade for the town, receiving supplementary pay for this service from the funds of the Town Board.

Two hundred and eighteen persons were committed to prison in the year, of whom 123 were men, 80 women, and 15 juveniles. The daily average was 45·1, as against 34·7 in 1907-8.

The total number of offences reported to the police or to the magistrates in 1908-9 was 1,038, as against 1,015 in 1907-8.

Of the offences reported in 1908-9, 250 were for offences against the person, 65 for prædial larceny, 173 for offences against property other than prædial larceny, and 550 for other offences.

The total number of convictions in the Inferior Courts was 684, as against 676 in 1907-8.

These convictions are classed as follows:—

For offences against the person...	135
,, malicious injury to property	6
,, prædial larceny	52
,, other offences against property	89
,, offences against Revenue Acts	148
,, other offences	254
Total	684

The convictions in the Supreme Court were 7 for offences against property and 8 for other offences.

The acquittals were as follows:—

In the Inferior Courts	119
In the Supreme Court	2

VII.—VITAL STATISTICS.

The population at the 1891 census was 41,054. No census was taken in 1901 on account of the expense involved, which the Colony was not in the position to afford. By the estimate of the Registrar-General, the population at 31st March, 1909, was 52,592. This figure is probably over-estimated, as it takes no account of the flow of emigration, which in recent years has taken place, to Panama.

The births registered in 1908-9 were 1,778 (921 males and 857 females), as against 1,668 in 1907-8; of these 1,006 or 56·58 per cent. were illegitimate.

Still births were 98, 32 legitimate and 66 illegitimate, the figures for the previous year having been 37 and 75 respectively.

Marriages were 205, an increase of 26 on last year's figures. The figures are given in the following comparative table of marriages:—

Denomination.	1906–7.	1907–8.	1908–9.
Church of England	64	78	105
Roman Catholic	23	22	18
Wesleyan	46	68	68
Church of Scotland	6	11	14
Plymouth Brethren...	2	—	—

The total registered deaths were 965, as against 898 in 1907-8, being 18·34 per 1,000 of the estimated population. The infant mortality (infants under one year, exclusive of still births) was 220, being 22·79 of the estimated population. The similar figure in 1907-8 was 230, or 25·61 per cent.

The public health has been passably good during the year, except in Bequia, one of the islands of the Grenadine group, where a serious epidemic of enteric fever broke out. The source of the infection was traced to the water supply, when steps were at once taken to eliminate the danger by thoroughly cleaning the well from which the supply was obtained. The water supply in the Grenadines is in all cases from wells; there must, consequently, be a possibility of recurrent epidemics of enteric until such time as all the public wells of these islands are cleansed, covered in,

and provided with pumps. This matter is engaging the attention of the Government, and a small start has been made to achieve this somewhat expensive undertaking.

Appended is a table of the causes of death:—

General diseases (includes syphilis, 113; tubercle, 64; tetanus, 35; malarial fevers, 26; dysentery, amœbic, 22)	359
Diseases of nervous system	28
,, ,, circulatory system	27
,, ,, respiratory system	15
,, ,, digestive system	234
Parasites	45
Age	98
Still-born	98
Other diseases	61
Total	965

In the towns the authorities are realising more and more the importance of stricter sanitation, and are taking steps accordingly. In the villages, however, sanitary matters are still on a most primitive basis, although the Government, through their District Officers, spare no pains to impress upon the population generally the necessity for care in this direction.

The rainfall for the year 1908-9 was 101·42 inches, as against 93·17 inches in 1907-8.

Rain fell on 269 days throughout the year.

The maximum fall in 24 hours was 5·79 inches on the 24th December.

December was the wettest month, with 21·81 inches. A good deal of damage was done to the roads during that month owing to the heavy rain, while the effect on the cotton crop was also somewhat disastrous.

March was the driest month, with 3·58 inches.

The mean monthly temperature was 77·1° F. Maximum for the year was 88°, in June to November, and the minimum, 62° F., which was experienced in December.

Except in August and September, when the atmosphere is uncomfortably hot, although not even in those months unsalubrious, the climate may be regarded as most healthy for both Europeans and coloured persons. Malaria is hardly known, while yellow fever has proved itself to be a disease of the past.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The fortnightly mail service from and to England continued to be performed by the Royal Mail Steam Packet Company. At Barbados the mails are transferred into the inter-Colonial ships,

which call weekly at St. Vincent on regular days—one week with outward mails on the way round the islands, and the following week on the way to Barbados with homeward mails. The service was carried on in a satisfactory manner, although much dissatisfaction is felt by the whole community at the lateness of the hour (after dark) at which the steamer is scheduled to, and does, call at Kingstown. Representations were made to the Colonial Office and Company to have this defect remedied. It is hoped that they will be successful.

The steamers of the Pickford and Black Line, from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued to run as usual, while occasional calls were made by the steamers of the Direct and Quebec Steamship Lines. The East Asiatic Line of steamers, from Copenhagen viâ London, and the Danish West Indies, also made occasional calls.

There is an inland postal system by which the Windward District of the Colony is served three times a week, the Leeward District daily, and the Grenadines once a week.

The postal order system continues to grow in popularity, and its extension to the district towns will soon be necessary.

The volume of work in the Post Office also continues to expand, which is a sure sign of the upward march of the Colony.

The revenue of the Telephone Department was £482, including £198 transferred to that head on account of the Government installations. The expenditure, £355. The main installation is in Kingstown with branch lines all over the island. The service is a most useful one.

IX.—GENERAL OBSERVATIONS.

Sir Ralph Williams, K.C.M.G., Governor-in-Chief of the Windward Islands, visited the Colony in May, 1908, for a period of 12 days. During the absence on leave, from 24th January, 1909, to the 6th February, 1909, of the Administrator, Mr. E. J. Cameron, C.M.G., the Government was administered by Mr. Anthony De Freitas, Acting Chief Justice.

The Free Public Library, the funds for the erection of which were so generously given by Mr. Andrew Carnegie, was completed and opened in February, 1909. The building is of stone, obtained locally, and very substantial. In addition to the large room set aside for the library and reading room, there is a fine, airy chamber upstairs, in which lectures or other entertainments of the like nature may be given. Some of the leading daily newspapers of the United Kingdom and monthly magazines and periodicals are to be found in the reading room, and, while the number of books at present is not large, there is the nucleus of an excellent collection. Every effort is being made to add to the supply.

As I did not take over the administration of the Colony until the 26th May of this year, this report has naturally been written solely upon the information supplied in the annual reports and otherwise by the local officers. The deduction to be made from that information is in accord with the prophecy of continuance of quiet prosperity contained in the Annual Report for 1907-8. In fact, the year under review may be said to be a bumper year in the modern annals of St. Vincent.

The total revenue collection of £30,810, showing a surplus revenue, after the year's expenditure, of £4,163, and the excess of assets of £9,721 on the 31st March, 1909, are all signs of the returning stability of the Colony's finances. Granting that cotton maintains its present value, that the arrowroot market expands, and that the elements are kind, all of which it is not unreasonable to believe may happen, St. Vincent has not an unhappy nor adverse future in front of her.

The resuscitation of the Carib estates has had much to do with the pronounced augmentation of the local revenues, the larger amount spent in wages for labourers, and the consequent increase of the spending power in the neighbourhood of Georgetown, inducing merchants of that district to largely replenish their stock in trade. There is no doubt, though, that a proportion of the revenue-producing expenditure has been abnormal and of a non-recurring nature, and that allowance must be made for this next year and until such time as the Carib country is in full working swing again, when the difference may be made good from natural causes.

St. Vincent is a beautiful island, with lovely scenery, charming rides and drives, magnificent tropical vegetation, a good main road all round the island, and passable bridle paths in the interior, excellent sea fishing and sea bathing, and a salubrious and pleasant climate. In addition, a nine-holed golf course on good natural ground will very shortly be added to the list of amusements.

Tourists and others who do not regard a first-class hotel as a first necessity in life, but are content with a clean room and plain food, may find much to interest them. The more active can scale the volcano, Soufrière, not difficult of ascent, and, on reaching the top will be rewarded by a sight of the crater which was in eruption only seven years ago.

A sketch map is attached to this report, which will serve to give an idea of the size, configuration, and settlement of the island.

C. Gideon Murray,

Administrator.

Ordnance Survey Office, South

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

GRENADA.

(For Report for 1907, *see* No. 590.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Grenada,
26th October, 1909.

MY LORD,

I HAVE the honour to transmit herewith the Annual Report on the Blue Book of the Colony of Grenada for the year 1908.

I have, &c.,

J. HAYES SADLER,
Governor.

The Right Honourable
The Earl of Crewe, K.G ,
&c., &c., &c.

(14848—2) Wt. 26122—322. 1125. 12/09. D & S.

BLUE BOOK REPORT FOR THE YEAR 1908.

FINANCIAL.

The revenue of the year ended 31st March, 1909, £73,182, although less by £6,689 than that of the preceding year, which was abnormal, exceeded that of all other previous years. The shrinkage as compared with 1907-8 was due to the Colony's staple crop, cocoa, returning to normal prices during 1908.

2. Classified as usual, the revenue was as follows:—

	£
Customs	38,883
Licences, Excise, and internal revenue	26,120
Fees of office, &c.	2,214
Post Office	2,270
Telephones	1,578
Water supply, Richmond Hill, &c.	300
Rent of Government property	530
Refunds of interest and sinking funds	850
Miscellaneous receipts	127
Land sales	60
Total local revenue	72,932
Imperial Grant for Agricultural Department ...	250
Total revenue	73,182

3. Compared with the revenue of 1907-8 Customs receipts were less by £6,078, for the cause above indicated, and internal revenue less by £1,511. In the latter case the falling off is chiefly under excise duty on rum manufactured, and points to the presence of determined smuggling, the existence of which is evidenced by occasional seizures by the police of illicit stills. The other heads all show increases on the previous year, that under Post Office, £708, being due to large sales of new issues of stamps.

4. The expenditure, £72,661, is the highest recorded, a result chiefly attributable to outlay on the erection of a large quarantine observation station, the purchase of a Clayton disinfector, to large expenditure on quarantine measures, caused by the presence of plague in Trinidad and Venezuela, and of yellow fever in Martinique and Barbados, and the unexpected expense of repairing damages done to roads by abnormal rainfall in December, 1908. It is satisfactory to note that the first two items, although permission was actually obtained for them to be charged to surplus funds, were paid for from current revenue, which proved more than adequate to cover the year's expenditure.

5. The details of the expenditure are as follows:—

	£
Charges on account of debt	6,197
Pensions	2,441
The Governor	2,172
Colonial Secretary	1,651
Colonial Treasury, Customs, &c.	4,122
Inland Revenue Department	1,382
Post Office	2,863
Audit	656
Port and marine	372
Legal Departments	4,215
Police	4,956
Prisons	533
Medical Department	4,466
Hospitals and asylums	6,119
Education	5,919
Ecclesiastical	444
Charitable	576
Telephones	1,418
Carriacou District	925
Water supply, Richmond Hill, &c.	233
Miscellaneous	4,824
Agricultural Department	626
Public Works Department	1,360
Public Works Recurrent	10,742
Public Works Extraordinary	3,199
Total expenditure from Colonial funds ...	72,411
Expenditure on Agricultural Department from Imperial funds	250
Total expenditure	72,661

6. The principal increases, compared with 1907-8, appear under Post Office, £540, due to payment of mail subsidy; Medical Department, £879, chiefly due to quarantine and sanitary expenses; hospitals and asylums, £571, caused by increased number of patients in the institutions; Public Works Recurrent, £770, following on necessary expenditure on roads, storm damages, &c.; and Public Works Extraordinary, £2,115, arising from a larger programme of public works, including the quarantine station referred to above.

7. The revenue and expenditure in the last five financial years were:—

	Revenue.	Expenditure.
	£	£
1904-5	69,993	69,510
1905-6	69,954	71,968
1906-7	71,786	70,379
1907-8	79,871	68,383
1908-9	73,182	72,661

8. At 31st March, 1909, the pecuniary assets were £61,432, and the liabilities £26,238, leaving a surplus of assets amounting to £35,194, as compared with £33,928 at the commencement of the financial year. Of this surplus £15,546 was invested by way of reserve fund, and the following assets were also in effect local investments of a portion of the surplus:—

	£
St. George's water supply extension	5,000
Sauteurs water supply extension	3,247
Gouyave water supply extension	351
Carriacou Land Settlement Fund	3,499
Carriacou jetty advance	1,155
Gouyave jetty advance	300
	13,552

9. The loan debt of the Colony is £123,670, in 4 per cent. inscribed stock, and the sinking fund in the hands of the Crown Agents for the Colonies for its redemption in due course amounted, at the end of the financial year, to £23,786.

10. The revenue and expenditure of the District Boards in the financial year ended 31st March, 1909, were as under:—

	Revenue.	Expenditure.
	£	£
St. George's	4,308	3,840
St. Andrew's	2,539	2,516
St. Patrick's	1,583	1,437
St. John's	2,080	1,648
St. Mark's	696	603
St. David's	743	743
Totals	11,949	10,787

11. The revenue of the town of Hillsborough, in Carriacou, which is administered by Town Wardens and not by a Board, was £90, and its expenditure £94.

12. The loan debts of the District Boards, all borrowed from Government and repayable either by sinking fund contributions or annual instalments, amounted at 31st March, 1909, to £17,060, and were as shown below:—

	£
St. George's	10,981
St. Andrew's	1,010
St. John's	3,550
St. Mark's	1,439
St. Patrick's	80

13. On 1st August, 1908, the doubloon (value £3 4*s*.) ceased by Royal Proclamation dated 4th June, 1908, to be current or legal tender in the British West Indies and British Guiana.

TRADE, AGRICULTURE, AND INDUSTRIES.

14. The total values of imports and exports in the last five years are as follows:—

	Imports.	Exports.
	£	£
1904	256,269	321,766
1905	237,256	283,955
1906	233,448	210,149
1907	288,665	417,299
1908	303,783	359,245

The improved conditions of trade, arising from the high price of the Colony's staple product, cocoa, were continued for a part of 1908, and were nourished, notwithstanding a gradual fall in those prices, by a larger crop being reaped than in 1907. The drop in value both of cocoa and nutmegs during the year is evidenced by the value of the exports being less by £58,054 than in 1907.

15. The value of the principal articles imported in the two years is given hereunder:—

	1907.	1908.
Class I.—	£	£
Bread of all kinds (biscuits)	4,446	4,373
Butter	2,559	2,357
Fish (dried or preserved)	14,146	12,761
Flour (wheaten)	33,998	38,438
Meat (salted and preserved)	10,747	9,446
Medicinal extracts and preparations ...	3,215	3,319
Oats	5,107	4,421
Oil (olive and other for cooking) ...	4,291	4,176
Oleomargarine and butterine	4,246	3,445
Rice	7,078	7,373
Spirits	4,369	5,104
Sugar:—		
Refined	2,725	2,694
Muscovado	8,355	7,786
Tobacco, cigars, and cigarettes ...	3,662	3,099
Class II.—		
Coal	2,480	3,216
Manures	3,167	5,762
Petroleum oil	3,728	3,385
Timber and shingles	8,719	20,484
Class III.—		
Wearing apparel and haberdashery ...	11,229	11,447
Textiles	51,150	73,466
Metal manufactures	15,290	17,579
Earthen and glassware	3,078	3,371
Furniture	3,310	3,718
Leather (manufactured):—		
Boots and shoes	5,407	5,889
Other	2,727	2,706
Soap	3,914	5,060
Class IV.—		
Silver coin	16,600	400
Bank notes	—	4,681

16. Two marked features present themselves in these figures, both evidencing the increased spending power conferred by the enhanced value of exports in the two years, and both showing the tendencies of the mass of the people under present conditions. These are the steady increase in the importation of wheaten flour and the quantity of house-building materials (timber and shingles) introduced in 1908. The latter item indicates the deep-rooted desire among the better type of peasant for improved dwellings, shown by their expenditure in that direction as soon as they have the money for it; while the former, taken with a steady increase in the quantity of "ground provisions" and corn imported, shows only too clearly that with the gradual absorption of the cultivable land by permanent cultivation, such as cocoa and nutmegs, the peasant is losing the source of his natural food, and is finding the conditions of his life more arduous than in bygone days, when the presence of abundance of native food made the pauper dependent on public support a rarity in Grenada.

17. Imports from the United Kingdom formed 45 per cent. of the total, indicating a steady increase, the proportions in 1907 and 1906 being 43 and 39. They may be classified, in value, as follows:—

	£
Live animals, food, drink, &c.	26,627
Raw materials	4,616
Manufactured articles (including textiles £64,135)	104,998
Coin, bullion, &c.	400
Total	136,641

18. Of the balance, British Colonies contributed 26 per cent. and foreign countries 29 per cent., the latter having fallen from 31 per cent. in 1906. The United States of America is, of course, Grenada's principal foreign customer, 95 per cent. of the total foreign imports being from that source, representing an increase from 90 per cent. in 1906. A small portion of this is, however, undoubtedly of Canadian origin, and reaches the Colony in the absence of a direct steamer service with Canada, through New York.

19. The discontinuance in 1906 of the subsidised steamer service with the Dominion, even such as it was, has proved a serious obstacle to the growth of trade with Canada. Until proper facilities are provided for transport there can be no real progress in this direction, even if preferential treatment of Canadian imports were conceded, as is the desire of some Colonies in the West Indies. The total value of imports from Canada in 1908 was, according to the returns, £20,907, of which £14,482 was timber, for house-building, imported direct in sailing vessels; the statistics relating to other articles cannot be taken as representing the correct importation.

20. Exports in 1908 fell in value by £58,054, as compared with 1907, the cause being a steady descent of cocoa from the

abnormally high price it had reached in 1907, and a serious fall in the price of nutmegs. A comparison of the principal articles of Colonial produce exported in the two years is here given:—

	1907.	1908.
	£	£
Cocoa	361,128	311,519
Spices (nutmegs and mace) ...	39,954	19,970
Cotton and cotton seed ...	7,731	12,756
Live animals	1,289	1,995

21. £1,620 in gold coin was exported to the United States of America, this being the second consecutive year in which this unusual item occurs. £2,556 was the amount sent in 1907.

22. On account of the unreliability of the export returns relating to cocoa shipped to Havre, optional for London, it is not possible to give exact figures showing the direction of the Colony's export trade; it may safely, however, be stated that the bulk of it is now, as in the past, with the mother country. There was a marked diminution in the volume of exports to the United States of America, the value being £32,172, as compared with £95,063 in 1907, when cocoa to the value of £85,470 was sent there. This is probably attributable to nervousness of shippers on account of the revision of the United States tariff, and to doubt as to its effect on the consumption of cocoa there. It is noteworthy that the consumption of this article in the States in 1908 fell off by about 1,700 tons as compared with 1907.

Agricultural Industries.

23. *Cocoa.*—The crop for the year ended 30th September, 1908, 64,398 bags, was in excess of that for the preceding year and all previous years, with the exception of 1904 (67,225 bags), and was just about three times the quantity produced thirty years ago 21,864 bags). If the exceptional prices of 1907 had continued, this would have, indeed, been a record year for the planters, but it opened with a fall of about 10*s*. per cwt. in the London market, and this downward course continued almost progresively to the end of the year, when values showed a reduction of over 40*s*. per cwt. on the record of 1907, the highest quotation for Grenada cocoa being then 56*s*. per cwt., which is about normal.

24. *Spices.*—The year was unsatisfactory for this product. Not only did the crop for the year ended 30th September fall off in quantity, only 6,867 barrels and 514 half-barrels being exported as compared with 7,284 barrels and 735 half-barrels in 1907, but prices were so low as to be almost unremunerative. Mace fortunately retained its value, but only 400 cases were shipped as against 876 in the preceding year.

25. The decline in price of nutmegs is said to be largely due to the substitution of some other lubricant for delicate machinery in place of the oil extracted from this nut. As the spice industry is the second in value in the Colony to cocoa, and has reached £36,000 in amount in one year, the drop in prices is a matter for serious concern, and it is hoped that it will not be permanent.

26. *Cotton.*—The result of attention to Sea Island cotton in Carriacou, the seat of this industry, appears in this year's returns, for although the quantity of all kinds shipped, about 740 bales with 4,298 bags of seed, was less than in 1907 (934 bales and 4,742 bags), the value largely increased, as will be seen on reference to paragraph 20 of this report. Much improvement remains to be effected by the peasants in their methods of reaping and sorting, and many complaints were made by London merchants as to the lower prices resulting from carelessness in these respects. A leaflet with advice has been issued by the Government this year in the hope of remedying this in some measure. A feature of the cotton industry in 1908 was the extraordinary delay in obtaining sale for the product in London.

27. *Limes.*—It is satisfactory to record that in 1908 the commencement of a new agricultural industry was made in Carriacou. Following upon the advice of the Commissioner of the district, Mr. Whitfield Smith, who has repeatedly urged the introduction of lime cultivation into the dependency, where conditions are eminently suitable to it, and encouraged by the marked success of the experimental plot which he planted as an object lesson, Mr. Tom Archer, the leading planter of that island, established 50,000 young trees during the year under review, and proposes to extend the cultivation to 100,000 trees. His example will doubtless be followed by many with advantage to themselves and to the Colony.

28. The Carriacou Land Settlement Scheme had been in working for five years in 1908, and the following brief statement of its money transactions is evidence of its continued success:—

		£
Total expenditure on the scheme to 31st December, 1908		8,448
Received in cash to that date		4,735
Balance due to Colonial Treasury		3,713
		£
Total value of lots (368) surveyed for sale		7,466
	£	
Cash received for lots sold (364)	3,571	
Balance due by allottees, payable by instalments bearing interest at 5 per cent. ...	3,789	
Value of unsold lots (4)	106	
		7,466
		£
Approximate value of reserves and other property resulting from purchase of the estates		3,679

29. In his Annual Report the Commissioner of the District states in regard to the scheme: "It is my pleasing duty again to record steady progressive and most satisfactory work along the lines indicated in previous reports. . . . Owing to a

most unusual delay in receiving account sales for cotton, shipped to England since May of the year under review, several of the allottees are slightly in arrears with regard to payment of their yearly interest and instalments. This, however, is a matter which will right itself as soon as cotton sales reopen in the northern markets."

30. A noteworthy feature of the general effect of the scheme on the prosperity of the island is the fact that the leading dry goods and grocery merchants of the Colony, The Stores (Grenada), Limited, found it desirable to open a branch of their business in Carriacou during 1908, to the mutual advantage, it is understood, of the people of the Dependency, and of their shareholders.

31. 52,948 gallons of rum were manufactured during the year at the thirteen distilleries licensed, representing an increase of 6,273 gallons on the results of 1907, and of 16,970 gallons on those of 1906. The bulk of this was, however, warehoused, and only 6,620 gallons were duty paid for consumption, yielding a revenue of only £9,884, or a decrease of £1,122 on that of the preceding year. When it is remembered that so far back as 1892 the excise revenue on rum was, by active exertions, brought up to £11,775, and that the population of the Colony has increased from 55,333 in that year to 72,988, some estimate of the probable extent to which the revenue is being defrauded by smuggling can be formed. If fully realised, the revenue from excise duty on rum under present conditions should be at least £15,000 a year.

32. One hundred and eighty-five dealers were licensed to sell intoxicating liquors, 4 being wholesale and 181 retail licences; the revenue was £3,724 from this source.

33. There is an ice factory in St. George's, but no returns of the amount manufactured are available. In addition to the quantity made for home consumption in 1908 there were exported 378 tons, valued at £577.

Shipping.

34. The total tonnage inwards and outwards of the shipping in the last five years was:—

	Tons.
1904	632,291
1905	639,348
1906	595,534
1907	513,902
1908	566,245

35. 555,919 tons of the total in 1908 was British shipping, as usual. The slight falling off in volume of late years is attributable to the Canadian subsidised steamers being withdrawn in 1906 from their former bi-monthly call at Grenada.

LEGISLATION.

36. Twenty-eight Ordinances were passed by the Legislative Council during the year, but of these only 25 were brought into operation in 1908. Of those which became law the most important were Ordinances (1) relating to the sale of poisons, (2) providing for dealing with unseaworthy vessels and with the equipment of the small craft engaged in inter-colonial trade, (3) vesting real estate in the personal representatives of a deceased person, (4) making special provision in respect of certain contracts entered into by peasant proprietors, and (5) amending the law relating to quarantine.

37. The third Ordinance mentioned above was a preliminary step towards the levying of duty on the estates of deceased persons, a measure providing for which was also passed, and has become law in the current year. The fourth arose from the evidence taken before the Peasant Proprietary Commission in 1907, and secures that contracts between a peasant proprietor and a dealer in local produce shall be in writing, and attested before a Magistrate or the Supreme Court Registrar, who are required to explain the contract to the peasant, and to certify that he understands and agrees to it; it is further provided that a duplicate of each such contract shall be filed for record in the office of the Magistrate or the Registrar. Power is given to the Courts to reopen "harsh and unconscionable" contracts, and to set aside or revise them. The effect of this law should be far-reaching and beneficial.

38. The Quarantine Amendment Ordinance gives effect to certain recommendations of the Central Quarantine Authority at its meeting in June, 1907, which had been adopted by the Colonies signatory to the Convention of 1904.

EDUCATION.

39. *Primary.*—The new Primary Education Ordinance and Code thereunder were brought into operation on the 1st of April, 1908, inaugurating a complete change from previous systems in force in the Colony. Payment by results was abolished, and schools of primary education are classed as (*a*) infant schools, (*b*) lower division schools, (*c*) combined schools, and (*d*) industrial schools. To class (*a*) only children under the age of six are to be admitted; (*b*) is a school wherein reading, writing, and arithmetic are to be thoroughly and exclusively taught within certain limitations of standards and ages of pupils; (*c*) is a school in an important centre of population whereat, in addition to a lower division, as above, an upper division of pupils is to be maintained, and taught exclusively within the higher standards; and (*d*) is a school to be established in an important centre of population, at which practical instruction in agriculture or

industrial occupations is to be given. Combined schools are of two grades, the object being to establish a high type of school upon which pattern those of lower type may endeavour to model themselves, and into which it is possible for them to evolve by proper effort of the teaching staff. The staff of all schools and their pay are definitely fixed, better pay being provided for teachers with higher certificates; and the head teachers of combined schools are made eligible under certain conditions for pensionable allowances upon retirement.

40. As the new system was only in operation for nine months of the year, it is too early to comment upon its working. It may be remarked, however, that the Ordinance creating it provides for such flexibility in arrangement of details by the Governor, acting with consent of the Legislative Council, that both expansion and improvement may be effected, as occasion requires, with comparative ease, and without the disturbing effect of the enactment of a fresh law for each change.

41. The grant in aid from public revenue in 1908 was £5,038, as compared with £5,215 in 1907, and with an average of £5,715 in the three years 1905-7. Forty-five schools were in existence (21 Roman Catholic, 9 Anglican, 4 Wesleyan, 2 Church of Scotland, and 9 Government schools); the total expenditure so far as it is returned was £5,192, the number on roll 9,048, and the average attendance 4,518. The attendance and number on roll are below the normal rates, having been continuously affected by the conditions of uncertainty and transition which have operated since 1905.

42. *Secondary.*—Important progress was made with this question, which has also been in an unsettled state since 1905. An Ordinance was passed in 1906 to settle it on lines recommended by a Special Committee of the Legislative Council, but it did not come into operation, as it was found impracticable to provide funds for the construction and equipment of a proper boys' school, and the Board of Management created was considered to be too elaborate and unwieldy. In the result the Secretary of State, on the Governor's recommendation, sanctioned an outlay of £4,000 from surplus assets of the Colony for providing a boys' school, which was voted by the Legislative Council in November, and a fresh Ordinance was passed in December creating a smaller and more effective Board of Directors, and simplifying the procedure generally. This Ordinance has not yet commenced to operate, as it was not finally dealt with by the Council until May, 1909, but meanwhile work on the road to the site of the new boys' school is proceeding.

43. The Government grants to the existing boys' and girls' schools were continued as a temporary measure in 1908, the schools being carried on by the present governing bodies with an acting staff; the attendance at the boys' school averaged 29, and at the girls' school 25.

44. The St. Joseph's Convent School, which is not affected by the difficulties connected with the other two, continued the

even tenor of its way. It receives a Government grant of £100 a year, for the conditions of which it regularly and satisfactorily qualifies. The average attendance in 1908 was 64, and the expenditure £327.

GOVERNMENT INSTITUTIONS.

45. *Colony Hospital.*—Nine hundred and eighty-six patients were treated during the year, of whom 649 were discharged cured, 197 relieved, and 48 died. The daily average was 96, and the cost of each patient for the year was £21 7*s*. Thirty-nine of the patients paid for their treatment, £59 being received under this head. In the out-patient department there were 2,744 attendances, as compared with 1,953 in the previous year.

46. *Yaws Hospital.*—The number treated, 266, was in excess of previous years, and so were the admissions, 207. The daily average was 72, and the cost per patient for the year £13 17*s*. 6*d*. Two hundred and sixteen cases were discharged cured, and three died (two from heart failure, and one from asthenia).

47. *St. Andrew's District Hospital.*—One hundred and seventy-six cases were under treatment, of whom 123 were discharged cured, 39 relieved, and 4 died. The daily average was 11, and the cost of a patient in the year £33 10*s*. 2*d*. Receipts at the dispensary amounted to £183 15*s*., 9,782 prescriptions being compounded, of which 3,675 were paid for. It is worthy of note that the number of free prescriptions, *i.e.*, to paupers, labourers' children, and aged labourers, has increased from 1,857 in 1902 to 5,102, while the patients admitted to the hospital in 1902 numbered 92, as against 166 in the year under review.

48. *Carriacou District Hospital.*—One hundred and forty-seven cases were under treatment, of whom 90 were discharged cured, 32 relieved, and 4 died. The daily average was 15, and the cost per patient £33 5*s*. The receipts from dispensary sales were £60 7*s*. 10*d*., but no return has been made by the District Medical Officer of the number of prescriptions compounded, and other details.

49. *Lunatic Asylum.*—The number under treatment was 179, 36 cases being admitted during the year (6 from St. Vincent and 30 from Grenada), and of these 24 were discharged as cured, and 4 as relieved. The daily average was 145, and the number of deaths 16. The cost per patient per annum was £18 18*s*. 1*d*. Two cases of typhoid fever occurred at the institution, one being an inmate and the other an officer; every effort was made to trace the source of infection, but without result, and the precautions taken proved adequate to prevent its spread.

50. *Poor Asylum.*—This asylum can accommodate 58 paupers, and the daily average in 1908 was 55. There were 23 admissions, 18 deaths, and 11 inmates who left of their own accord.

The cost of each inmate for the year was £10 9*s.* 1*d.* The institution has been much improved of late years under Dr. E. F. Hatton's administration.

51. *Savings Bank.*—As forecast in the Annual Report for 1905, the Savings Bank is being steadily utilised more and more by the people, as the difficulty of investing savings in real property increases. At 31st December, 1908, the balance at credit of depositors amounted to £18,443, as compared with £15,419 at end of 1907, and with £8,451 at end of 1898. £16,000 of this was invested in Colonial securities, and £2,000 held on deposit by the Colonial Bank. The number of depositors was 1,728, as against 1,638 in 1907 and 1,053 in 1898.

JUDICIAL STATISTICS.

52. *Police.*—The Chief of Police reports of the force in 1908 that "conduct and discipline were satisfactory." The men were put through the trained men's course, militia, at rifle practice, and the result showed considerable improvement. The force was inspected in July by Brigadier-General Marshall, C.B., who expressed his satisfaction.

53. *Prisons.*—The committals were 228 in number, all from Grenada, and the daily average was 75, of which only 36 were Grenada prisoners—35 being from St. Lucia, and 4 from St. Vincent. The cost of a prisoner for the year was certified to be £18 17*s.* 3*d.*

54. Mr. C. Riggs, Keeper of the Royal Gaol, St. Lucia, assumed the duties of Superintendent of Prisons on 26th October, *vice* Mr. Heels, retired on pension at 31st March; Mr. S. Buckland acted *ad interim.* A water sewerage system was introduced during the year, and the water supply was increased by means of larger pipes from the main.

55. *Criminal Statistics.*—A feature of the statistics is the increase in convictions for prædial larceny, the result of an effort made by the Governor to deal thoroughly with this growing class of offence; the number of convictions has in consequence risen from 79 in 1905 to 139 in 1908. Of the figures relating to crime as a whole, the Attorney-General reports that they may be "accepted as affording striking testimony to that high reputation for peaceful and law-abiding qualities which has always attached to the people of Grenada."

VITAL STATISTICS.

56. The estimated population at 31st December, 1908, was 72,988; males 34,883, females 38,105. The movement of the people to and from the Canal Zone of Panama has become normal and does not seriously affect the estimate, which is based on the natural increase since the last census. There are, of course, many Grenadians still on the Isthmus, but now that health conditions there are satisfactory they will most of them return in due course.

57. According to this estimate the population has increased by 9,550 since the census of 1901, the increase being most marked in the districts of Carriacou and St. David's, where it amounts to about 18 per cent.; in St. George's the increase has been only about 11 per cent.

58. The birth-rate per thousand of the mean estimated population was 39·22, as compared with an average in the preceding decennial period of 41·09; and the death-rate was 21·19, against an average of 21·49. Although no disease was epidemic in the year, it was by no means as healthy as 1907, and the number of deaths was 1,533, against 1,386 in that year. Typhoid fever, from which the Colony has hitherto been almost exempt, made its appearance in St. George's, being doubtless imported from a neighbouring Colony where it was epidemic. Twenty-two cases occurred, with five deaths, but it was held in check by the opening of an isolation hospital for cases which could not be properly treated, and with due regard for sanitary precautions in their own houses.

59. The distribution of the rainfall over the year was abnormal, only 39·28 inches out of a total of 68·44 being recorded at Richmond Hill in the first three quarters of the year. The average at that station for 18 years has been 77 inches, and only 59 inches were recorded in 1907, which was accordingly an exceptionally healthy year. There were floods in St. John's and St. Mark's Districts in December, 1908. At Plaisance, in St. John's, five inches were recorded on Christmas Day in two hours, the total record for the month there being no less than 40 inches.

60. The principal meteorological statistics of the year are:—

Rainfall:—	Inches.
North of the Island	52·81
Centre of the Island	160·17
*South of the Island	68·44
Carriacou	55·70
*Mean relative humidity, 6 p.m.	73·11
*Maximum temperature (8th September) ...	89·0°
*Minimum temperature (20th March) ...	68·2°
*Mean pressure	29·994 ins.
*Days of rain	242

* At the Richmond Hill Station.

POSTAL AND TELEPHONE SERVICES.

61. A slight decrease in the number of ordinary letters, &c., dealt with is shown in the post office statistics for 1908, as compared with 1907, but the number of registered articles and insured letters increased. There was also a satisfactory increase in the money order transactions, the total issued and paid amounting to £26,642, as against £24,807 in 1907 and £20,287 in 1906; while the British postal orders issued and paid increased in amount to £3,522, as against £2,856 in 1907 and £2,442 in 1906.

62. Remittances through the post office from Grenadians on the Canal Zone of the Isthmus of Panama amounted to £7,475, as compared with £6,235 in the preceding year.

63. There was no change or development of the telephone service in the year worthy of special notice. The service was maintained in the face of difficulties arising from a vacancy in the office of Supervisor during the year, which it took some time to fill satisfactorily.

GENERAL REMARKS.

64. The Governor was absent on leave from the 27th of July to the end of the year, the Government of the Windward Islands being administered from St. Lucia by Mr. P. C. Cork, C.M.G., and the local Government by the Colonial Secretary.

65. The Colony was represented by the Colonial Secretary at the Canadian Trade Conference, held in Barbados in January.

66. The important extensions and improvement of the water supply to the principal town, commenced in the preceding year, were completed under the supervision of the Public Works Department, the cost being provided by a loan of £5,000 from Colonial funds to the District Board of St. George's. The construction of waterworks for the town of Sauteurs from a similar loan of £4,236 to the St. Patrick's District Board was commenced by the Department in the second half of the year, and vigorously pushed forward.

EDWARD DRAYTON,
Colonial Secretary.

Grenada,
21st October, 1909.

GRENADA.

(For Report for 1908, *see* No. 628.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Grenada,
15th September, 1910.

MY LORD,

I HAVE the honour to transmit herewith the Annual Report on the Blue Book of the Colony of Grenada for the year 1909.

I have, &c.,

J. HAYES SADLER,
Governor.

The Right Honourable
Earl of Crewe, K.G.,
&c., &c., &c.

BLUE BOOK REPORT FOR THE YEAR 1909.

FINANCIAL.

The financial year 1909-10 opened with a balance of surplus assets of £35,195 and closed with one of £33,240, so that there was a loss of £1,955 on the year's transactions. The cause of this was the failure of the revenue from Customs and Excise duties to reach the estimate, while at the same time necessary expenditure under Public Works Extraordinary, amounting to £3,531, had to be disbursed during the year.

2. The shrinkage of imports, which brought about the reduced revenue from Customs, appears chiefly under foodstuffs (such as wheaten flour and rice), and under house-building materials (timber and shingles), and clothing (textiles). The latter indicates that the purchasing power of the people was affected by the fall in prices of the staple product, and the former is probably due in some measure to temporary favourable conditions inducing a larger production of "ground provisions" for use as food in place of imported articles.

3. All reasonable economy was exercised in expenditure, and as soon as it was clear that the loss to the revenue, unless arrested, would seriously affect the year's work, an Ordinance was passed (January, 1910) fortifying the Customs revenue by the addition of 10 per cent. on all import duties in force, which had the effect of checking the fall in receipts.

4. The loss under Excise duty on spirits is due, as stated in last year's report, to extensive smuggling. A determined effort has been made in the current year to deal with this, and numerous seizures have been made and illicit transactions detected, which cannot fail to have an effect in the right direction. Even in the financial year under review that effect showed itself, as the revenue from this source increased from £9,884 in the preceding year to £10,126.

5. A new source of revenue was tapped in 1909 in the shape of estate duties, which are estimated to bring in about £1,500 per annum. As the law permits of the duty being paid in five annual instalments the full benefit will not be derived until 1914, and as it only commenced to operate on 15th July, 1909, only £88 was received in 1909-10.

6. A change was made in the export duties during the year. At the request of the agricultural community the duty on cocoa was raised 2½*d.* per cwt. to 7½*d.*, so as to provide funds for the administration of the re-organised local Agricultural Department. At the same time, in view of the low prices now realised by nutmegs, the duty on them was reduced by one-half, that on mace remaining unaltered; and the duty on logwood, which has practically ceased to be exported, was removed.

7. The revenue for the year ended 31st March, 1910, was £71,224, as follows:—

	£
Customs	36,864
Licences, Excise, and internal revenue	27,738
Fees of office, &c.	1,834
Post Office	1,395
Telephones	1,683
Water supply, Richmond Hill, &c.	237
Revenue from Government property	1,030
Interest and Sinking Funds	1,013
Miscellaneous receipts	162
Land sales	18
Total local revenue	70,974
Imperial grant in aid of Agricultural Department ...	250
Total revenue	£71,224

As compared with the preceding year a net decrease of £1,958 is shown, and this has been explained above.

8. The expenditure was £73,282, the highest recorded, and its details are as follows:—

	£
Charges on account of debt	6,196
Pensions	2,636
The Governor	2,227
Colonial Secretary	1,774
Treasury Department	5,630
Post Office	2,548
Audit	641
Port and marine	541
Legal Departments	4,780
Police	5,366
Prisons	1,125
Medical Department	3,671
Hospitals and asylums	5,654
Education	5,986
Ecclesiastical	444
Charitable	603
Telephones	1,553
Carriacou District	936
Water supply, Richmond Hill, &c.	240
Miscellaneous	4,687
Agricultural Department	641
Public Works Department	1,397
Public Works Recurrent	10,306
Public Works Extraordinary	3,531
Total expenditure from Colonial Funds ...	73,113
Expenditure on Agricultural Department from Imperial Funds	169
	£73,282

9. The net increase on the preceding year was £620, chiefly due to heavy expenditure under Public Works Extraordinary. Details under this head may be classified under "roads and bridges" (chiefly in repair of storm damages in 1908, and including the new road to the proposed site of the Secondary School for boys), £1,150; buildings (principally reconstruction of officers' quarters), £995; and other works (swamp drainage, water supplies, and jetties), £1,386.

10. The total revenue and expenditure in the last five financial years were as follows:—

	Revenue.	Expenditure.
	£	£
1905-6	69,954	71,968
1906-7	71,786	70,379
1907-8	79,871	68,383
1908-9	73,182	72,661
1909-10	71,224	73,282

11. The most important assets in the surplus at 31st March, 1910, which was, as has been already stated, £33,240, were:—

	£
Reserve Fund, invested	12,730
St. George's Board Water Supply Loan... ...	5,827
St. Patrick's Board Water Supply Loan... ...	4,150
Carriacou Land Settlement Advance	2,639
Carriacou Jetty Advance	855
Gouyave Jetty Advance	200

12. The loan debt of the Colony remains at £123,670, in 4 per cent. inscribed stock, redeemable between 1917 and 1942 by means of a sinking fund which at 31st March, 1910, amounted to £25,827. The Colony is now also liable for repayment of a loan of £550 borrowed, at 6 per cent. interest, by the late Governing Body of the Girls' High School to repair the school premises.

13. The accounts of the several District Boards, except St. David's which is entirely dependent upon grants from Colonial revenue, closed at 31st March, 1910, with balances of surplus assets. Their revenue and expenditure were as follows:—

	Revenue.	Expenditure.
	£	£
St. George's	3,918	4,059
St. Andrew's	2,565	2,585
St. Patrick's	1,616	1,775
St. John's	1,529	1,838
St. Mark's	679	620
St. David's	764	764
Totals	£11,071	£11,641

The town of Hillsborough, in Carriacou, is administered by Town Wardens. Its revenue for the financial year was £85 and its expenditure £79.

14. The loan debts of the District Boards at 31st March, 1910, amounted to £16,328, as under; they are all due to the Government, and are repayable by instalments or sinking fund contributions:—

	£
St. George's	11,808
St. John's	3,450
St. Andrew's	990
St. Patrick's	40
St. Mark's	40

At the close of the financial year the loan to St. Mark's District for a jetty at Victoria was written off and the liability assumed by the Government, the jetty having been completely destroyed by high seas and there being no possibility of replacing it effectually at reasonable cost.

TRADE, AGRICULTURE, AND INDUSTRIES.

15. The imports and exports of the Colony in the last five years are valued as follows:—

	Imports.	Exports.
	£	£
1905	237,256	283,955
1906	233,448	210,149
1907	288,665	417,299
1908	303,783	359,245
1909	268,236	284,846

As will be seen there was a marked fall in value in 1909 from the results of the two preceding years both in regard to imports and exports. The fall in price of both cocoa and nutmegs, evidenced by the shrinkage of the exports in value, is the principal cause of the corresponding shrinkage of the imports.

16. From the subjoined statement of the value of the principal articles imported in 1908 and 1909, it will be noted that the falling off in the latter year chiefly appears under wheaten flour, rice, timber and shingles, textiles, and soap. The last item was possibly affected in some measure by the appearance of a local soap factory:—

	1908.	1909.
	£	£
Class I.—		
Bread of all kinds	4,373	5,042
Butter	2,357	2,500
Fish (dried and preserved)	12,761	13,561
Flour (wheaten)	38,438	34,046
Meat (salted and preserved)	9,446	9,341
Medical extracts and preparations ...	3,319	2,905
Oats	4,421	5,637
Oil (olive and others for cooking) ...	4,176	3,702
Oleomargarine and butterine	3,445	3,824
Rice	7,373	5,875

	1908. £	1909. £
Class I.—		
Spirits	5,104	5,248
Sugar:—		
Refined	2,694	4,078
Muscovado	7,786	7,748
Tobacco, cigars, and cigarettes	3,099	4,423
Class II.—		
Coal	3,216	1,957
Manures	5,762	8,014
Petroleum oil	3,385	4,478
Timber and shingles	20,484	8,133
Class III.—		
Wearing apparel and haberdashery ...	13,810	13,450
Textiles	57,982	39,156
Metal manufactures	17,579	16,715
Earthen and glassware	3,371	3,142
Furniture	3,718	3,231
Leather (manufactured):—		
Boots and shoes	5,889	5,343
Other	2,706	2,294
Soap	5,060	3,866
Class IV.—		
Silver coin	400	1,150
Bank notes...	4,681	8,807

17. 42 per cent. of the imports were from the United Kingdom (45 per cent. in 1908 and 43 per cent. in 1907), 26 per cent. (the same as in the preceding year) from British Possessions, and 32 per cent. from foreign countries (29 per cent. in 1908). The imports from the United Kingdom may be classified as under:—

	£
Live animals, food, drink, &c.	27,411
Manufactured articles (including textiles, £44,286)	78,605
Raw materials	4,900
Coin, bullion, &c.	150
Total	£111,066

The corresponding total for 1908 was £136,641, the falling off being under manufactured articles, which (including textiles, £64,135) amounted to £104,998 in that year.

18. The exports of the Colony were valued at £74,399 less than in 1908, a further fall in price of the staple product, cocoa, having taken place, and the price of nutmegs and of cotton being unsatisfactory. The values of the principal articles of local produce exported in the two years compare as follows:—

	1908. £	1909. £
Cocoa	311,519	248,398
Nutmegs and mace	19,970	18,135
Cotton and cotton seed	12,756	8,971
Live animals	1,995	1,922

19. The exports to the United States of America continued to diminish in value in the year under review, when the total of such exports only amounted to £29,847 (of which £26,420 was cocoa), as against £32,172 in 1908 and £95,063 in 1907.

20. The cocoa crop for the year ended 30th September, 1909, 67,329 bags, was the largest recorded at that date, the nearest approach to it being the similar year in 1904, when 67,225 bags were reaped; it exceeded that of the preceding year by 2,931 bags. This satisfactory output was unfortunately accompanied by a further decline in prices, till 54*s*. 6*d*. per cwt. was reached at the end of 1909. An examination of the world's statistics of the trade in this article shows that consumption is not at present keeping pace with production, but that at the same time consumption is steadily on the increase in all the great cocoa-consuming countries, especially in the United States of America, where its use, as compared with tea and coffee, is evidently becoming more popular.

21. With the growth of competition, far greater attention is now paid to both cultivation and curing of cocoa in Grenada than in byegone years, and improvement both in quantity and quality of the crops is resulting. In 1909 a cocoa polisher was invented and placed on the market by a prominent local planter, Mr. W. M. Malins-Smith, both simplifying and improving on prevailing methods in that direction.

22. The crop of nutmegs was unsatisfactory both in quantity and in prices. 6,740 barrels and 346 half-barrels were reaped, as compared with 6,867 barrels and 514 half-barrels in the preceding year ended 30th September, 1908; while only 306 cases of mace were received, as against 400 the year before.

23. A radical change in the administration of the Agricultural Department was effected in June, 1909. Following upon the final withdrawal of the Imperial grant-in-aid, which had been notified, the agricultural community offered to pay an increased export duty of 2½*d*. per cwt. on cocoa towards the support of the local department, on the understanding that it was controlled by a Board with a strong unofficial element. This was adopted by the Government; and the Agricultural Board, having the same control (except disciplinary) over the local department as that ordinarily vested in the head of a Government Department, was appointed, with the Colonial Secretary as Chairman, and consisting of one official member and six unofficials, to be selected biennially by the Governor from the members of the Agricultural and Commercial Society. The local department is affiliated to the Imperial Department of Agriculture for the West Indies, and the Commissioner of that Department is entitled to sit as a member of the Board whenever he is present in the Colony. He is also closely associated with the general working of the department, and kept in touch with it by regular correspondence. A Superintendent of Agriculture was then appointed, Mr. G. G. Auchinleck, B.Sc., being selected for the office, and assumed his duties at the end of the year.

24. These important changes coincided with the appointment of Dr. Francis Watts, C.M.G., to be Commissioner of the Imperial

Department of Agriculture in the West Indies. On his first visit to the Colony, in February, 1909, they were discussed by the Agricultural and Commercial Society with the Governor and himself, and agreed to by that body.

25. The Agricultural and Commercial Society's scheme of giving prizes to peasants for the best kept and cultivated cocoa holdings, which was referred to in the report for 1907, has been extended to the whole island, with the most happy results. Arrangements were made by the new Board to initiate a similar scheme in Carriacou in 1910.

26. Of the Carriacou Land Settlement Scheme, the Commissioner of the District states in his report for 1909:—

> "A few allottees have forfeited their lands for non-compliance with the residential clause of the Land Regulations, otherwise, I have again to record progressive work along the lines indicated in former reports."

The Treasury returns show that of the total amount advanced on the scheme from Colonial Funds, viz., £8,450, only £2,901 remained unpaid at 31st December, 1909, and this is amply secured on the land. The great success of the scheme has enabled proposals to be made for a similar venture in Grenada itself, action on which is being taken in the current year.

27. 40,773 gallons of rum were made in 1909, being 12,175 gallons less than in 1908. The large output of the latter year, combined with the serious failure in the consumption of duty-paid rum, due, as has been already noted, to smuggling, caused a restriction of manufacture. It is hoped that the measures now in progress will place this industry upon a more secure footing.

28. 167 liquor licences were issued during the year, as compared with 185 in 1908, and the revenue derived from this source was £3,635, as compared with £3,724 in that year.

29. The ice factory in St. George's exported 339 tons of ice, valued at £537, in addition to supplying the quantity used for home consumption. As has been mentioned above, a soap factory was started in 1909, and a very satisfactory quality of common soap appears to be produced thereat.

SHIPPING.

30. In the last five years the total tonnage of shipping inwards and outwards was:—

	Tons.
1905	639,348
1906	595,534
1907	513,902
1908	566,245
1909	586,074

568,112 tons of the total in 1909 was steam tonnage, and of both sailing and steam tonnage 551,738 tons was British. The falling off in volume since 1905 is due to the Canadian subsidised line of steamers ceasing in 1906 to call at Grenada under their present contract.

LEGISLATION.

31. Sixteen Ordinances became law during the year. The most important were those relating to (1) Secondary Education, which will be dealt with in the next section; (2) the Agricultural Board, which has been referred to in paragraph 23; (3) Export Duties; and (4) Estate Duty, explained in paragraphs 5 and 6; and (5) Medical Practitioners and Dentists, which provides more fully for registration of such practitioners, and, in the case of medical men, requires them in future to be exclusively persons who are registered under the provisions of the Medical Acts of the Imperial Parliament. A simple measure was also enacted, authorising the framing of regulations for guarding the Colony against infection by rats and other vermin, which, now that bubonic plague has made its appearance in this part of the world, should prove useful.

EDUCATION.

32. *Primary.*—Forty-six schools of primary education were on the legal list at the end of 1909, an infant school of the Anglican Denomination having been added during the year. Nine of these schools were Government schools, 21 Roman Catholic, 10 Anglican, 4 Wesleyan, and 2 of the Church of Scotland; and they were classified as 30 Combined, 10 Lower Division, and 6 Infant Schools. To the Infant Schools only children under the age of six are admitted; at Lower Division Schools reading, writing, and arithmetic are exclusively taught within certain limitations of standards and ages of pupils; and a Combined School is one in an important centre of population, whereat, in addition to a lower division of pupils, as above, an upper division is taught exclusively within the higher standards.

33. The grant-in-aid of these schools from Colonial funds in 1909 was £4,725, as compared with £5,038 in 1908; the number on the roll was 9,356, and the average attendance was 4,538, the corresponding figures in 1908 being 9,048 and 4,518.

34. *Secondary.*—On 31st December, 1909, an Ordinance became law, abolishing the Governing Bodies of the Boys' and Girls' Schools then in existence, and creating a Board of Secondary Education, consisting of the Governor, the members of the Executive Council (which includes two unofficials), and two unofficial members of the Legislative Council to be appointed every two years by the Governor. It enables the Governor, acting with the consent of the Legislative Council, to establish schools of secondary education, to be provided and maintained either from public funds, or partly from public funds and partly from donations from private individuals or grants from local bodies, and from the school fees. This is the first definite and necessary step towards a new system of secondary education in Grenada, and in the current year provision is being made for the requisite buildings and staff for a boys' school, a temporary

school having meanwhile been established under the law; when this is well in hand a girls' school will also be dealt with.

35. In the year under review the boys' and girls' schools then in existence were continued. The average attendance at the boys' school was 29·5, and the expenditure £400, of which £380 was the Government grant; at the girls' school the average attendance was 25, and the expenditure £119, of which £51 was the Government grant. The expenditure of the St. Joseph's Convent Secondary School was £325, of which £100 was Government grant, and the daily average attendance was 63.

GOVERNMENT INSTITUTIONS.

36. *Colony Hospital.*—872 patients were treated during the year (114 less than in 1908), of whom 495 were discharged cured, 247 relieved, and 44 died. The daily average was 84, and the cost per patient £23 11*s.* 5*d.* £85 was received from paying patients, of whom there were 48. In the out-patient department there were 1,575 attendances given, as compared with 2,744 in 1908.

37. *Yaws Hospital.*—The number treated again this year showed a marked increase, being 420, as compared with 266 in 1908, and the admissions were 361 as against 207. Of these, 339 were discharged cured. The daily average was 55, and the cost per patient £11 17*s.* 3*d.* There was one death, its cause being general tuberculosis.

38. *St. Andrew's District Hospital.*—159 patients were treated, 128 discharged cured, and 10 relieved; the daily average was 9·25, and the cost per patient £33 10*s.* 2*d.* The receipts at the District Dispensary, which is attached to this institution, amounted to £180, and 9,951 prescriptions were compounded, of which 3,549 were paid for. In this connection the District Medical Officer remarks: "The free prescriptions have increased from 1,857 in 1902 to 6,402 in 1909, an increase of charitable relief of 4,545. The payment prescriptions in the same period are 2,970 in 1902 and 3,549 in 1909, a difference of 579 only."

39. *Carriacou District Hospital.*—278 patients were under treatment, of whom 203 were discharged as cured, 35 as relieved, 5 as not improved, and 12 died; while the daily average was 23. These figures represent a large increase on those for the preceding year, as an outbreak of enteric fever in the Dependency necessitated the treatment in the hospital of 64 cases of that disease. The cost per patient is stated to have been less than in 1908, but the Medical Officer does not give the necessary data, inclusive of all expenditure, in his report.

40. *Lunatic Asylum.*—The admissions to the asylum were 52 in number (35 from Grenada, 15 from St. Lucia, and 2 from St. Vincent), and the daily average was 141, which is more than the buildings can properly accommodate. 35 were discharged and 13 died. The cost per patient was £18 18*s.* 3*d.*

41. *Poor Asylum.*—This is practically an asylum for incurables, and contains accommodation for 58 inmates. During the year 31 were admitted, 23 died, and 7 left the institution. The daily average was 48, and the cost per patient £11.

42. *Savings Bank.*—The balance at credit of depositors at the end of 1909 amounted to £20,673, as compared with £18,443 at end of 1908. At the close of the financial year (31st March, 1909) this had increased to £21,058, and £21,000 of it was invested.

JUDICIAL STATISTICS.

43. *Police.*—The police duties were on the whole satisfactorily performed during the year under review. At rifle practice the militia course of 1905 for trained men was carried out, and the average was 121·55. Brigadier-General Marshall, C.B., inspected the force in July.

44. *Prison.*—The committals numbered 270, all from Grenada, and the daily average was 55, of which 43 were from Grenada. The remaining 31 St. Lucia convicts were sent back there early in the year, as the prison of that Colony was then able to accommodate them, and the St. Vincent convicts were discharged in the ordinary course, so that only Grenada prisoners remained. The lowest number on record* was reached in November, when there were but 27 males in custody, and the Female Prison was empty on three occasions during the year. These small numbers caused a marked increase in the cost per prisoner, as it is not possible to largely reduce the staff, and the certified cost was accordingly £23 12*s.* 3*d.*, as against £18 17*s.* 3*d.* in 1908.

45. *Criminal Statistics.*—The Acting Attorney-General reports that the statistics for the year "indicate an increase of crime, which, however, is slight, except in the case of prædial larceny. The increase in the number of convictions for this offence is partly due to the fact that special efforts are being made to stamp out the evil, but I regret to say that at present it shows no signs of diminution."

VITAL STATISTICS.

46. The population of the Colony at the end of 1909 was estimated to be 74,160 (males 35,463, females 38,697), being an increase of 10,722 since the Census of 1901. It should be borne in mind that this estimate is liable to be affected by any emigration and return of the labouring class, of which no reliable returns are available. In 1909, however, the incoming and outgoing are believed to have been normal.

---

* The highest is 84 in 1894.

47. The birth-rate per thousand of the mean estimated population was 34·76, a very low figure for Grenada, and the death-rate was 18·82, also very low. Although the health of parts of the Colony was disturbed by outbreaks of enteric fever and influenza, the death roll of the year was small. The first-mentioned disease was practically confined to the Carriacou and St. George's Districts, 66 cases with 9 deaths occurring in the former, and 14 cases with 1 death in the latter. In the past Grenada has been little troubled with this disease. Influenza was epidemic towards the end of the year, and its effects seem to have been most felt in St. Andrew's, where 26 of the 39 deaths attributed to it were recorded.

48. The rainfall was heavy, but was fairly evenly distributed over the year, in marked contrast to the preceding year. At the Richmond Hill Observation Station, in the south of the island, 80·54 inches were received, as compared with 68·44 in 1908, while at Plaisance, an estate in the mountains to the leeward of Mt. St. Catherine, no less than 212 inches are returned as having been recorded. In Carriacou 67 inches were registered, and on three occasions there was an abnormal downpour. On 22nd April, in the "dry season," 3½ inches fell there; on 21st August 5 inches fell in three hours; and on 16th September 3 inches in less than an hour.

49. The principal meteorological statistics of the year are:—

Rainfall:—	
North of Grenada (Sauteurs)	70·01 inches.
Centre of Grenada (Grand Etang) ...	170·09 ,,
South of Grenada (Richmond Hill) ...	80·54 ,,
Carriacou	67·07 ,,
At Richmond Hill Station:—	
Mean pressure	29·979 ,,
Maximum temperature (20th September)	90·8° F.
Minimum temperature (1st April) ...	68·6 ,,
Relative humidity, 6 p.m.	77·1
Days of rain	273

POSTAL AND TELEPHONE SERVICES.

50. The business transacted at the Post Office may be stated as follows:—

Letters and post cards dealt with	509,510
Newspapers, books, &c., dealt with	201,721
Parcels dealt with	7,702
Registered and insured letters, &c.	12,130
Money and postal orders issued and paid ...	£27,960

The amount of British postal orders issued and paid has increased from £1,250 in 1905 to £4,018 in the year under review.

51. The remittances through the Post Office by Grenadian emigrants on the Panama Canal Zone amounted in 1909 to £6,191, as against £7,475 in 1908 and £6,235 in 1907.

Ordnance Survey, Southampton, '10.

Ordnance Survey, Southampton.'10

52. The revenue of the Telephone Department in the financial year was £1,683, and the expenditure, including loan charges, £1,553. Twenty-seven new installations were connected up, and 299 instruments were in use. During a severe thunderstorm on 15th September, 80 fuses were burnt out at the principal exchange, and several instruments were damaged.

GENERAL REMARKS.

53. The appointment of the Governor, Sir Ralph Williams, K.C.M.G., to be Governor of Newfoundland was announced on 27th March, and His Excellency left the Colony on the 14th June to proceed to his new command. His Excellency Sir James Hayes Sadler, K.C.M.G., C.B., who succeeded him, arrived at Grenada and assumed the Government of the Windward Islands on 13th October; in the interval the general government was administered from St. Lucia by Mr. E. J. Cameron, C.M.G., by virtue of his dormant commission to that effect, and the local government by the Colonial Secretary.

54. In November, Mr. R. S. Johnstone was appointed to be Chief Justice in succession to Mr. J. B. Walker, who retired on pension; and Mr. Herbert Ferguson, the first holder of the newly combined offices of Treasurer and Supervisor of Inland Revenue, arrived and assumed their duties.

55. The Colony was visited in April by Sir Rubert Boyce, Professor of Pathology in the Liverpool University, to investigate local conditions as regards yellow fever, which was prevalent during the year at Barbados and had been engaging his close attention there.

56. A large quarantine observation station was erected, and an additional ward added to the Isolation Hospital at Morne Rouge, while a fumigator for the disinfection, when necessary, of passengers' luggage was constructed at a suitable spot on the wharf in St. George's.

EDWARD DRAYTON,

Colonial Secretary.

Grenada,

12th September, 1910.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial possessions have been issued, and may be obtained from the sources indicated on the title page :—

ST. VINCENT.

(For Report for 1908–9, *see* No. 625.)

THE ADMINISTRATOR TO THE GOVERNOR.

Government House,
St. Vincent,
15th November, 1910.

SIR,

I HAVE the honour to forward, herewith, for transmission to the Secretary of State for the Colonies, my report on the Blue Book of the Colony of St. Vincent for the year 1909-10.

I have, &c.,

C. GIDEON MURRAY,
Administrator.

His Excellency
Lieut.-Colonel Sir James Hayes Sadler, K.C.M.G., C.B.,
&c., &c., &c.,
Governor of the Windward Islands,
Grenada.

(18367—2.) Wt. 31959—459. 1125 & 85. 1/11. D & S. A 2

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1909-10.

I.—FINANCIAL.

The following comparative statements and tables give the heads of revenue and expenditure and the amounts received under those heads for the years 1908-9 and 1909-10, as well as the total revenue and expenditure for each of the last five years 1905-6 to 1909-10:—

(Table 1.)

Comparative Yearly Statement of the Revenue.

Heads of Revenue.	Amount collected in the year 1908–9.	Amount collected in the year 1909–10.	Increase.	Decrease.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1. Customs:				
Import	13,644 19 8	10,767 2 1	—	2,877 17 7

In the Annual Report for 1908-9 mention was made of the revival of active operations in the Carib country by Messrs. D. K. Porter and Company, the general revival of trade throughout the Colony, the consequent increase in spending power on the part of the community generally, and the distinct advance in Customs and other receipts. At the same time a note of warning was sounded that a proportion of the revenue-producing expenditure of 1908-9 had been abnormal and of a non-recurring nature, and that allowance would have to be made for this during the financial year under review.

The early part of the year saw a heavy blow inflicted upon the Colony financially and industrially in the sudden departure of the firm of D. K. Porter and Company and in the disposal of all their business and property in the Island. This in the case of the Carib estates signified the total cessation of work for nearly three months, the throwing out of employ of a large number of labourers, a decrease in the spending power of the community, and a desertion of growing crops. The general effect was a temporary loss of confidence upon the part of all business men, the diminution of merchants' stocks, and a tendency to save rather than spend until the fate of the estates in question had been settled. This spirit permeated all classes of the community and when considering this statement of the operations of the financial year 1909-10 it must be borne in mind throughout. Since the acquisition of the Carib estates by Mr. W. H. Barnard of St. Lucia in September, 1909, and the evident intention of that gentleman and those others who purchased Messrs. Porter and Company's other estates to work them to the fullest extent they can, confidence has been greatly restored. The effect of this restoration of confidence did not, however, begin to be felt until the close of the financial year under review, with the unfortunate result that the receipts for the year, especially in import duties, fell considerably below the amount estimated.

The total local revenue for the year was £27,854 13*s.* 1*d.*, exclusive of the Imperial grant-in-aid to the Agricultural Department which was £585. The revenue fell short of anticipations by £893, and considering that owing to the causes already stated there was a drop on the estimated receipts for the year in import duties of £2,082 17*s.* 11*d.* (£2,877 17*s.* 7*d.* less than actually received in 1908-9) and in excise duties of £274, this is a shortage not to be regarded as altogether unsatisfactory. Under nearly every other head of revenue the estimate of receipts was exceeded. This applies especially to the Post Office, which shows the substantial excess over estimate of £421, an excess of over 33 per cent. While there is little doubt that the greater part of this increase was due to an abnormal sale of new issues of stamps to philatelists, nevertheless the standard of the prosperous year 1908-9 has been more than maintained, and granting that Post Office receipts may be regarded as a barometer of trade, this is gratifying as proving that the volume of business is not stationary.

The total local expenditure for the year under review was £30,732 4*s.* 4*d.*, being £181 in excess of the Estimates and

£4,085 in excess of 1908-9. With few exceptions the expenditure was kept within the Estimates and in a number of instances savings were effected. Included in the expenditure for Public Works Recurrent was a sum of £400 for extensive repairs to the Government Office, which are being continued in the present financial year. In addition to the setting aside of £250 towards the repair of the Colonarie Bridge (to take place in 1911-12), the following important works were undertaken and brought to a satisfactory conclusion during the year:—construction of new Kingstown Jetty at a cost of £2,100; construction of new Police Station at Mesopotamia, £850; enlargement of the Post Office at a cost of £75. The following works unestimated for were also carried out; repairs and painting and refurnishing Government House, £474; and repairs and painting of the Medical Officer's quarters at the Cedars, £85.

No changes in taxation took place during the year under review.

The excess of assets on the 31st March, 1910, was £6,843. On the 31st March, 1909, the account showed an excess of £9,721. The estimated deficit for the year 1909-10, on account of the number of Extraordinary Public Works to be undertaken, was £1,803. This deficit actually became £2,891, namely, £1,088 more than estimated. When, however, it is considered that in addition to an over-estimation of £2,356 in Customs and Excise duties there was unforeseen expenditure amounting to £1,013, making a total of £3,369, and showing a possible deficit of £2,281 over and above estimated deficit as against an actual deficit of £1,088 over and above estimated deficit, then the Colony is to be congratulated in having emerged in such a creditable manner, without cutting down of estimates, from the difficult industrial and financial situation created by Messrs. Porter and Company's withdrawal.

In addition to the surplus of £6,843, the sum of £25,000, the unexpended remainder of a fund contributed by private subscription at the time of the eruption of the Soufrière volcano in 1902-3, is invested in Trust Securities, and held as a Reserve or Insurance Fund against any possible future disaster which may result from the violence of the elements.

There are also other funds of lesser importance showing assets to the Colony, some of which are extinguishable by time, while others, like the Graham Fund, the Alexander Fund, and the Thompson Home Fund, are used only in respect of the interest they bear.

The public debt stood on the 31st March, 1910, at £2,050, as against £2,750 at the end of the previous financial year. The Colonial revenue was, however, only directly responsible for £200 of that sum, which debt has been extinguished at date of writing this report, leaving the Colony with no direct public debt, a most satisfactory state of affairs. The remainder, £1,850, is repayable from the municipal funds of the towns of Kingstown and Georgetown, the Colony only being responsible in case of default, an

extremely remote contingency. This will all be redeemed by the year 1913.

The Colony is similarly responsible for the unpaid balance of the Hurricane Loan to planters from the Imperial Treasury, which was at 31st March, 1910, £11,254, but against which amount, however, there is a Sinking Fund of £2,406. This loan is being steadily redeemed by borrowers at the rate of £750 per annum to the local Government, by whom annual payments are in turn made to the Imperial Treasury.

Gold, British and American, notes of the Colonial Bank, and British silver and copper constitute the currency of the Island.

The Government accounts are kept in sterling, and commercial accounts in dollars and cents.

The management of the affairs of Kingstown are vested in a Board, one-half of the members of which are elected by the ratepayers and the other half nominated by the Government.

The Chairman of the Board is annually elected by the members forming that body, but cannot in any circumstances be elected for more than two years in succession.

The small towns of the Colony, of which there are six, are controlled by wardens appointed annually by the Government.

The following comparative statements give the total revenue and expenditure of these towns during the last five years:—

REVENUE.

Town.	1905.	1906.	1907.	1908.	1909.
	£	£	£	£	£
Kingstown	1,664	1,708	1,706	1,695	1,736
Georgetown	137	105	108	118	143
Chateaubelair	32	34	34	35	33
Calliaqua	38	35	31	32	32
Barrouallie	33	40	45	38	37
Layou	19	18	19	20	26
Bequia	11	10	9	9	9

Credit balance on 1st January, 1909, £6.

EXPENDITURE.

Town.	1905.	1906.	1907.	1908.	1909.
	£	£	£	£	£
Kingstown	1,472	1,698	1,758	1,790	1,778
Georgetown	103	102	108	109	126
Chateaubelair	24	28	28	27	21
Calliaqua	24	52	30	32	27
Barrouallie	20	34	31	41	20
Layou	19	12	9	24	17
Bequia	10	27	2	4	17

The debts of the towns at the 31st December, 1909, were as follows:—

	£	£
Kingstown water supply	1,600	
Kingstown town improvement	150	
		1,750
Georgetown water supply		200
		£1,950

Provision for repayment of these loans is made by rates levied annually on the townspeople and the debts are secured on the general revenue of the Colony. They will be extinguished in 1912 and 1913.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports.

Chief Articles	Value. 1908.	Value. 1909.
Class I:—	£	£
Beef, salted or cured	485	381
Biscuits	3,104	3,467
Butter	1,789	1,745
Coffee	360	309
Fish, salted, &c.	6,604	6,347
Flour, wheaten	10,572	9,487
Flour, other kinds	636	559
Oilmeal and cake	444	466
Pork, salted or cured	2,213	2,132
Rice	2,604	1,969
Salt	377	203
Spirits	962	937
Sugar, muscovado	105	378
Sugar, refined	842	667
Sugar, crystallized	461	877
Wine	829	700
Food and drink supplies, unenumerated ...	1,581	1,259
Tobacco, cirgars, &c.	1,166	1,186
Class II.:—		
Manure	1,024	1,059
Petroleum oil	1,658	2,018
Timber and shingles	7,138	3,507
Class III.:—		
Textile manufactures, other than rope, cordage, and canvas	27,821	16,931
Metal, manufactured	13,419	7,454
Boots and shoes	1,308	1,582
Cement	970	1,119
Rope, cordage, and canvas	1,261	739
Soap	1,378	1,551
Articles, unenumerated, other than textiles or metal manufactures	4,651	3,400

In the course of his Annual Report the Supervisor of Customs states as follows:—

"Of the total imports into the Colony, 34 per cent. (£30,232) came from the United Kingdom, 49 per cent. (£43,026 from British Colonies, and 17 per cent. (£14,551) from foreign countries.

"Imports from the United Kingdom have decreased to the extent of £15,028, from British Colonies they have decreased £5,362, while from foreign countries the decrease has been £5,514 in value.

"The decrease under the head 'British Colonies' has been from British West Indies, principally Barbados, the value of imports from British North America being about £400 in excess of that for 1908.

"Under 'Foreign Countries' the decrease has been in goods imported from the United States of America.

"The following is the classification of imports showing values:—

	£
"Class I.—Live animals, food and drink supplies, &c.	37,999
"Class II.—Raw materials	9,807
"Class III.—Manufactured articles	40,003

"Under Class I. there has been a decrease in value of £3,485, under Class II. a decrease of £4,360, and under Class III. a decrease of £18,058 in value. Nearly 70 per cent. therefore of the decrease has taken place under the head 'Manufactured articles,' and this is principally under 'Textiles.'

"The decrease in importation under Class I., in the shape of 'Food Supplies,' and the decrease in Class III., under 'Textile Manufactures, other than Wearing Apparel,' can be with reason attributed to a diminution in the purchasing power of the people, consequent on the sudden check in the circulation of money caused by the closing up of Messrs. D. K. Porter and Company's business and the sale of all the firm's property."

The values of the principal exports are shown in the annexed table:—

EXPORTS.

Articles.	1908. £	1909. £
Cassava starch	1,352	1,109
Whale oil	645	272
Turtle shell	387	515
Firewood	493	472
Cotton and cotton seed	31,903	23,218
Vegetables	2,593	2,485
Syrup	336	1,139
Sugar, crystallized	1,561	455
Sugar, muscovado	948	3,717
Pease	498	289
Molasses	400	656
Rum	515	160

Articles.	1908.	1909.
	£	£
Ground-nuts	1,740	1,480
Live stock	4,144	4,870
Fresh fruit	60	48
Farine	328	229
Arrowroot	27,713	31,792
Cocoa	4,989	4,088

The total value of exports for the calendar year 1909 was £88,697 as against £94,740 in 1908, a decrease of £6,043. As, however, the value of specie exported in 1908 was £12,855 as against £9,462 in 1909, £3,393 was represented by a decrease in the value of specie. The decrease in the value of cotton may be regarded as a nominal one. Anticipating a rise in the price, owners of cotton held back, until the early part of 1910, cotton which would, under ordinary circumstances have been exported in December, 1909. Another factor in the decrease is to be found in the lower prices paid as compared with the previous year. The exportation of arrowroot in 1909 shows an increase of £4,078 over that of 1908. This is accounted for to some extent by the forced shipments of arrowroot to England which took place at the time of Messrs. Porter and Company's withdrawal.

The total imports and exports for the five years 1905-6 to 1909 were as follows:—

IMPORTS.

Classes.	1905–6.	1906–7.	1907–8.	1908.	1909.
	£	£	£	£	£
I. Live animals, food, drink, &c.	31,575	32,000	38,864	41,484	37,999
II. Raw materials	6,566	12,268	11,175	14,168	9,807
III. Manufactured articles ...	30,956	33,740	46,515	58,061	40,004
Total	69,097	78,008	96,554	113,713	87,810

Exports.

Classes.	1905–6.	1906–7.	1907–8.	1908.	1909.
	£	£	£	£	£
I. Live animals, food, drink, &c.	40,935	46,393	45,972	46,433	52,213

Total	53,078	83,755	94,265	94,739	88,698

Manufactures and Fisheries.

The Central Cotton Ginnery was established by the Government in the year 1903-4, and is under the management of the Officers of the Imperial Department of Agriculture. This ginnery has been of great assistance in the development of the cotton industry. It is extremely improbable that the industry would without it have reached its present successful state. Owing to private ginneries being erected and entering into competition with it, the profits are gradually and annually decreasing. With a charge of 1*d*. per lb. for ginning and baling in 1907-8, the accounts showed a balance in favour of the Ginnery of about £600, in 1908-9 this had decreased to £365, while during the year under review the profits amount to only about £240. The Government is at a grave disadvantage with the private ginner, who, not unnaturally, makes it part of his business to "tout" for cotton to be brought to his ginnery. The Government cannot, or rather does not, do this, and so there appears on the horizon the possibility of having to shut down and lose a large part of the outlay on a factory which has been of the greatest use to the planting community, and could still continue to be so if it were allowed to live.

An important development of the uses of the Government Cotton Ginnery occurred during the year by the passing of the Agri-

cultural Products Protection Ordinance of 1909. This Ordinance aims at the suppression of cotton theft from the fields. Bound up in the general scheme of suppression contained in the Ordinance is the compulsory sale of small lots of seed cotton of anything less than 100 lbs. weight to the Government Central Ginnery. Any amounts up to 4,000 lbs. weight of seed cotton, in the aggregate during one season, may also be sold by anyone to the Government Ginnery. This cotton is bought on a profit-sharing basis, laid down by Regulations made by the Governor in Council. The law, which came into force on the 1st January, 1910, is most popular amongst the small growers of cotton, and has given a tremendous impetus to cultivation of this product by peasants. Owing to its late promulgation the full effect of the law was not felt during the last season, but it is pleasing to record that as a start £980 worth of cotton was purchased in this manner from peasants. The coming season should show a large augmentation in this account. There are three private ginneries in the Colony, the largest of which is situated in Kingstown and is fitted up with three gins.

About 33 tons of cotton seed were crushed by the disintegrator at the Government Ginnery for the purpose of manuring cotton lands. The price of lint during the year was extremely good, reaching as high for some special bales as 26*d*. per pound. The average sale price was, however, from 19*d*. to 23*d*. for Sea Island cotton, while Marie Galante sold from 10*d*. to 1*s*. a pound, the highest price that has ever been known.

The export in whale oil, after an increase last year, has again fallen to low figures, the export value being only £272, as against £645 in 1908-9. This would seem to be a dying industry, owing, it is said, to the gradual reduction in the number of whales appearing in these waters. This is much to be deplored, as the islanders who carry on this industry can ill-afford to lose what has been at a certain season of the year one of their most remunerative employments.

Enquiries are at present being conducted into the possibility of creating a sponge industry in the Grenadines. Numerous species of sponges are to be found there, some of which are said to be of a commercial value. If such an industry could be established the loss of the whaling industry would in a great degree be compensated for.

The turtling industry accounts for an export value of £515, as against £387 in 1908-9 and £449 in 1907-8.

Agricultural Industries and Agricultural Department.

Owing to the comparatively low prices received for cotton in 1908 the area under this crop in 1909 was reduced. According to a rough estimate prepared by the Cotton Inspector, in the early part of 1910 not more than 2,000 acres were put under that cultivation, as compared with an estimated area of nearly 3,000 acres in 1908.

The following figures are interesting and instructive:—

Table showing the Quantity and Value of Cotton exported during the period from 1903-4 *to* 1909.

Year.	Sea Island Cotton.		All Cotton.	
	Weight.	Estimated Value.	Weight.	Estimated Value.
	Lbs.	£	Lbs.	£
1903–4	Not known	—	43,392	794
1904–5	77,814	3,890	126,178	4,494
1905–6	121,174	6,059	138,150	7,674
1906–7	225,632	16,922	263,036	18,169
1907–8	388,833	29,162	427,819	30,787
1908–9	432,091	28,971	459,303	29,878
1909	330,936	20,684	350,186	21,325

The area in which cotton can be cultivated is one limited, practically, to the coastal lands. So long as prices do not fall below from 1*s*. 3*d*. to 1*s*. 6*d*. per lb of lint, it will pay planters to grow cotton. It is highly important, however, that careful seed selection and cultivation be carried out. Every effort is being made by the Agricultural Department to induce planters and small growers to devote more attention to burning of old cotton stalks, to crop rotations, to grow larger areas of leguminous plants for green-dressing purposes, and to utilise all available manure bush, grass, &c., and cotton seed. It has been clearly demonstrated that unless lands for cotton are well cultivated and manured, poor yields and deterioration of the class of cotton grown result. It is satisfactory to note the annual improvement in cultivation and the evident desire on the part of the growers to assimilate and utilise all the scientific and expert information that can be afforded them by the Department.

In the St. Vincent Grenadines, notably Union, Canouan, and Mayreau, the common Marie Galante type of cotton, is grown. It is cultivated as a perennial, and produces a short, coarse lint valued usually at from 8*d*. to 9*d*. per lb. During the past year this class of cotton has fetched as much as 1*s*. a lb. The exports of this cotton during the past five years amounted in the aggregate to 139,828 lbs. weight, valued at £6,036. In several of the other islets, Bequia, Mustique, Battowia, and Balliceaux, the cultivation of Sea Island cotton has been taken up exclusively, and with very satisfactory results.

Arrowroot again tops the list in regard to area under cultivation and also in regard to export value, which showed an increase of £4,000 over 1908. For reasons already stated, the market was pecuniarily a particularly disappointing one during 1909-10. Successful efforts have been made to combine locally in order to attempt to resuscitate the demand and improve the price for this article, for which St. Vincent is so famous, and which has for nearly 100 years formed an important and prominent item on the export list of the Colony. The St. Vincent Arrowroot Growers' and

Exporters' Association has been formed, with headquarters in Kingstown. The objects of this Association are threefold:—

(*a*) to promote and encourage the arrowroot industry in St. Vincent generally;

(*b*) to administer an Advertisement Fund to be created by means of a small tax of 6*d*. on every barrel of arrowroot exported from the Colony after the 1st December, 1910;

(*c*) to fix a moderate and reasonable minimum gross price, under which no arrowroot will be sold in the United Kingdom.

It is believed that the operations of this Association, on which is represented the interests of practically all the growers and exporters of any importance in the Colony, will have a beneficial influence upon the industry and render it once more a source of profit to the community. St. Vincent arrowroot is unrivalled not only as an article of diet for invalids and children, but also in the manufacture of chocolate and for general starch purposes. The soil and climate of the Colony are apparently more suited to this cultivation than that of any of the other islands except, perhaps, Bermuda.

Apart from that point of view, however, it is evident that the market for arrowroot is of such a limited nature that St. Vincent will by herself for many years to come be able to fully satisfy all the requirements of it.

The export figures in sugar show an increase of about £1,663. As the total value exported only reached £4,172, it will be seen that this is no longer an important industry. Most of the sugar grown is on the Carib estates. Elsewhere in the Colony it is only cultivated in small quantities for the purpose of making rum. The soil and climate of St. Vincent are no doubt as suitable for the growth of sugar as any other of the West Indian Islands, and there is no reason why, if that crop again becomes profitable, it should not rank as one of the Colony's foremost exports. Annual and not permanent crops must be the soundest and safest cultivation in these parts of the West Indies, which are yearly exposed to the danger of hurricanes. A hurricane to the cotton or sugar planter means a year lost, to the cocoa planter seven years. The annual-crop policy speaks for itself. The cultivation of cocoa has never been taken up very heartily since the hurricane of 1898, when a large number of trees were destroyed. Except in selected parts of the Colony the soil does not generally appear to be well suited for its growth. The export figures for 1909 are only £4,088, as compared with £4,989 for 1908, a drop of £901. Since the inauguration of the Land Settlement Scheme in 1900, many trees have from time to time been distributed to peasants by the Agricultural Department. The results have been disappointing. They will not pay sufficient attention either to cultivation or diseases, or to the preparation of the beans for market. Some very good cocoa, nevertheless, is exported from three or four of the large estates, which holds its own, it is alleged, with some of the best Trinidad.

Vaccination has proved a great success in decreasing the death-rate in stock owing to anthrax. There are many persons yet

who do not take advantage of this remedy, with the result that there was still an appreciable loss from the effects of this disease.

In August, 1909, the Agricultural Instructor, accompanied by one skilled labourer, was sent to Antigua to study the form of improved implemental tillage employed in that Colony, with a view to its introduction into St. Vincent. On his return a set of implements was ordered from the United States of America for experimental purposes. Mr. G. R. Corea, of the Arnos Vale Estate, kindly put ten acres of that estate at the disposal of the Government, in order that the experiment might be conducted on a practical scale. These efforts to demonstrate the working of implemental tillage have been so successful that planters, benefiting by the knowledge obtained, are now systematically importing and using implements in their general agricultural practice. It is extremely gratifying that there should have been such a successful issue to this experiment, for it is calculated to have a lasting and beneficial effect on local agriculture.

Land Settlement and Crown Lands.

The sales during the year under the Land Settlement Scheme were 10 in all:—Rural lots of about 6 acres, 1; 4-acre lots, 4; acre or small lots, 1; and township lots, 4. Altogether 3,504 trees were distributed to allottees, of which 3,272 were cocoa. In addition, 74 acres of Crown land was sold out in small lots. Available Crown land consists of mountain lands, which are only suitable for small holdings for growing provisions and native produce.

The revenue from sales and rental of Crown lands was £633, as against £465 in the previous year. During the year certain estates, acquired at the time of the Eruption, were, with the consent of the Secretary of State for the Colonies, created Crown lands pure and simple.

Shipping.

A table of the entries and clearances of steamers and sailing vessels during the years 1908 and 1909, is appended, as also a comparative statement of the total shipping during the last five years. These figures do not include ships of war, of which two British visited the Colony during 1909:—

III.—LEGISLATION.

Sixteen Ordinances were passed during the year 1909, of which perhaps the most important was The Agricultural Protection Ordinance (1906) Amendment Ordinance, 1910. This Ordinance has already been referred to in detail under the head "Manufactures and Fisheries" of this report.

Other Ordinances passed were:—

Magistrates.
Appropriation.
Marriage.
Registration of Births and Deaths.
Explosives and Petroleum.
Quarantine.
Offences against the Person (Amendment).
Registry Ordinance (1883) Amendment.
Supplementary Appropriation.
Licences Ordinance (1896) Amendment.
Income Tax Ordinance (1904) Amendment.
Stock Trespass Ordinance (1880) Amendment.
Companies Act (1874) Amending.
Summary Offences Ordinance (1880) Amendment.
Customs Duties.

IV.—EDUCATION.

The results of primary education in 1908-9 and 1909-10 are as follows:—

	1908-9.	1909-10.
Number of schools	27	27
Number on roll	4,862	4,620*
Average attendance	2,258	2,222
	£	£
Government Grant-in-aid ...	1,428	1,466

In September, 1908, the secondary school was re-opened with a resident master, who is also inspector of primary schools of the Colony. The necessity for this school was at once apparent by the manner in which the places for pupils were filled. The fees charged are £2 per term for each scholar, except those under ten years of age in the lowest form, for whom the fees are £1 6*s*. 8*d*. per term. But when two or more brothers in forms above the lowest attend there is a reduction made of 6*s*. 8*d*. for the second and 13*s*. 4*d*. for the third.

The attendance at the primary schools continues about the same. Greater efficiency in teaching and otherwise is to be expected in the future as the result of the appointment of the inspector. Such close supervision of the working of these schools as will now be possible was unavoidably absent in the past.

During the year the Code of Regulations for primary schools was thoroughly revised. The most important alteration effected was that appertaining to the salaries of teachers. These, with the consent of the Legislative Council, have been placed on a higher and more equitable scale than has hitherto been possible with the funds at the disposal of the Board of Education, while such improvements have been made through this increase in the grading and certificating of teachers as should lead to greater efforts on their part to attain a higher standard of teaching. Generally the Code as now passed should prove of material benefit to the cause of primary education in the Colony.

The Agricultural School maintained an average of nineteen pupils during the year. Special effort is being made to instruct pupils in the cultivation of cotton and in its diseases—very few of the overseers on estates to-day having any technical or expert knowledge of this subject beyond what they have gained by practical experience since the introduction of the Sea Island plant into St. Vincent only six years ago.

It is pleasing to record that several planters have during the past year engaged as overseers on their estates pupils who have finished their course of instruction at this school. They find that the expert and scientific knowledge in the cultivation of cotton and its diseases, gained by these boys at the school is of great assistance to them in the propagation of this plant. At the same time it must be noted that a good deal more could be done by planters in the direction of employment of these boys than is done to-day, both with advantage to themeslves and to the boys. It

* At 31st March, 1910.

is perhaps not realised by those planters who appear apathetic in the matter that the boys undergo a good sound practical grounding in agriculture as well as a scientific one. The fifteen acres of land attached to the school is all fully worked up in various products such as cotton, sugar, &c., by the boys themselves, while each pupil is allowed a small piece of ground as a vegetable garden, the produce of which may be disposed of for his own benefit.

The small stock farm, which continued to be worked as an adjunct to the school, affords a valuable practical illustration of how stock should be kept and fed.

V.—GOVERNMENT INSTITUTIONS.

During the year there were 703 admissions to the Colonial Hospital, making, with those remaining from the previous year, 760 cases treated, as against a total of 735 in 1908-9.

The daily average was 55, as against 52·4, 55·8, and 60·7 in the previous three years.

The death rate was 6·8 of the total cases.

Operations numbered 203, as against 194 in 1908-9.

The Medical Officer is greatly assisted in his work by the presence of an efficient European nurse-matron selected by the Colonial Nursing Association.

A portion of the old military citadel at Fort Charlotte is set aside for the detention of male lunatics who are violent or manifest destructive tendencies. Other males, as to whom it is judged that they may be so treated with safety, are kept under supervision in the Pauper Asylum, and female lunatics are also detained there. A portion of the wards is partitioned off into cells to provide further and more suitable accommodation for these female cases, some of which are occasionally acute.

As soon as practicable any violent or difficult case is, by arrangement with that Government, sent to Grenada, but sometimes the asylum there has not got the requisite accommodation, and the transfer is delayed.

There were 17 cases under treatment during the year (10 being new admissions), of whom 2 were discharged cured, 1 died, and 1 was transferred to the Grenada Asylum.

The total number of St. Vincent lunatics under care there was 32 at a cost of £510 to the Colony.

The number of inmates of the Leper Asylum on the 31st March, 1910, was 6; during the year there were 2 admissions and 2 deaths, leaving the same number (6) in the asylum at the end of the year.

Under a new Public Health Ordinance which has just been passed compulsory segregation of pauper lepers is now provided for.

The Colony's paupers are housed in the old military buildings at Fort Charlotte at a considerable elevation, over-looking the town of Kingstown.

At the commencement of the year under review there were 100 inmates of the asylum, and the admissions and discharges during the year were:—

—	Male.	Female.	Total.
Admissions	28	34	62
Discharged	19	17	36
Died	20	17	37
Total	39	34	73

leaving 89 on the 31st March, 1910.

The total expenditure in 1909-10 was £953 on the pauper and leper asylums, including the cost of lunatics kept locally, as against £966 in 1908-9.

Chronic tertiary syphilis accounts for the vast majority of cases to whom this institution offers asylum for the closing stages of their lives.

Appended is a statement of the working of the Savings Bank for the last five years:—

Year.	Number of Depositors at 31st December.	Amount of Deposits.	Amount of Withdrawals.	Balance at credit of Depositors at 31st December (including Interest capitalized).
		£	£	£
1905	933	4,883	5,276	12,232
1906	907	5,282	5,687	12,005
1907	1,010	7,629	6,757	13,247
1908	1,121	6,693	5,929	14,313
1909	1,063	6,624	7,371	13,869

The amount due to depositors was distributed thus:—

	At 31st December, 1908.	At 31st December, 1909.
	£	£
Kingstown	12,845	12,770
Georgetown	766	437
Chateaubelair ...	702	662
Totals ...	£14,313	£13,869

The Government made a profit on the working of the bank of £150.

There was invested of Savings Bank funds at 31st December, 1909, the sum of £13,654.

VI.—JUDICIAL.

The Saint Vincent Police Force consists of a chief, a sergeant-major of European birth, and 50 West Indian non-commissioned officers and privates.

They are drilled, and have some training in the use of arms, and are supplied with Martini-Enfield rifles.

In addition to ordinary police work they perform duties in connection with excise supervision, district post office work, births and deaths registration, poor relief, and the management of district telephone exchanges. The prison is worked entirely by the police save for the assistance of one warder in charge of gangs outside.

In Kingstown a select number of the force form a fire brigade for the town, receiving supplementary pay for this service from the funds of the Town Board.

Three hundred and four persons were committed to prison in the year, of whom 200 were men, 91 women, and 13 juveniles. The daily average was 38·36, as against 45·1 in 1908-9.

The number of cases reported to the police in 1909-10 was 551; of these 87 were for offences against the person, 27 for prædial larceny, 111 for other offences against property, and 326 for other offences. Only 463 of the above cases were brought before a magisterial court.

The total number of persons brought before the magisterial courts was 945; of these 237 were for offences against the person, 74 for prædial larceny, 183 for other offences against property, 103 for offences against revenue laws, municipal, road, and other laws relating to the social economy of the Colony, and 348 for other offences. These figures are inclusive of the cases reported by the police.

The total number of convictions in the inferior courts was 653, as against 684 in 1908-9.

These convictions are classed as follows:—

For offences against the person	152
,, malicious injury to property	8
,, prædial larceny	53
,, other offences against property	112
,, offences against Revenue Acts	81
,, other offences	247
Total	653

The convictions in the Supreme Court were 9 for offences against property and 4 for other offences.

The acquittals were as follows:—

In the Inferior Courts	105
In the Supreme Court	2

VII.—VITAL STATISTICS.

The population at the 1891 census was 41,054. No census was taken in 1901 on account of the expense involved, which the Colony was not in the position to afford. By the estimate of the Registrar-General, the population at 31st March, 1910, was 53,448. This figure is probably over-estimated, as it takes no account of the flow of emigration which, in recent years, has taken place to Panama and Brazil.

The births registered in 1909-10 were 1,687 (859 males and 828 females), as against 1,778 in 1908-9; of these 951 or 56·37 per cent. were illegitimate.

Still births were 88—32 legitimate and 56 illegitimate; the figures for the previous year being 32 and 66 respectively.

Marriages were 161—a decrease of 44 on last year's figures. The figures are given in the following comparative table of marriages:—

Denomination.	1907–8.	1908–9.	1909–10.
Church of England	78	105	64
Church of Scotland	11	14	11
Wesleyan	68	68	65
Roman Catholic	22	18	21
Plymouth Brethren	—	—	—

The total registered deaths were 831, as against 965 in 1908-9, being 15·54 per 1,000 of the estimated population. The infant mortality (infants under one year, exclusive of still-births) was 191, being 22·98 of the estimated population. The similar figure in 1908-9 was 220 or 22·79 per cent.

Public health has generally been good during the year. In Union and Mayreau Islands, however, two of the Grenadine Group, an epidemic of enteric broke out. Fourteen cases occurred, each of which was removed to the Carriacou Hospital to be treated there. Efficient disinfective and other precautionary measures were at once adopted, with satisfactory results. It appears that the infection was introduced from Carriacou, the largest of the group of Grenadines attached to the Grenada Government, where an epidemic prevailed almost throughout the year.

The water supply in the Grenadines is in all cases from wells or tanks. There must consequently always be a possibility of recurrent epidemics of enteric until such time as all the public wells of these Islands are cleansed, covered in, and provided with pumps. Since last year a good deal has been accomplished by the Government in this direction.

Appended is a table of the causes of death:—

General diseases (includes syphilis, 48; tubercle, 60; tetanus, 38; malarial fevers, 10; dysentery, 24) ...	240
Diseases of nervous system	32

In the towns the authorities are realising more and more the importance of stricter sanitation, and are taking steps accordingly. In the villages, however, sanitary matters are still on a most primitive basis, although the Government, through their District Officers, spare no pains to impress upon the population generally the necessity for care in this direction.

The rainfall for the year 1909-10 was 106·77 inches, as against 101·42 inches in 1908-9.

Rain fell on 286 days during the year.

The maximum fall in 24 hours was 3·43 inches on the 19th June.

June was the wettest month, with 20·12 inches. A good deal of damage was done to the roads during that month owing to the heavy rain, while the effect on the cotton crop was also somewhat disastrous.

December was the driest month, with 2·91 inches.

The mean monthly temperature was 77·2° F. Maximum for the year was 80·4° (in December), and the minimum 74·6° F., which was experienced in January.

Except in August and September, when the atmosphere is uncomfortably hot, although not even in those months insalubrious, the climate may be regarded as most healthy for both Europeans and coloured persons. Malaria is hardly known, while yellow fever has proved itself to be a disease of the past. During the year there was a complete absence of all diseases notifiable under the Intercolonial Sanitary Convention.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The fortnightly mail service from and to England continued to be performed by the Royal Mail Steam Packet Company. At Barbados the mails are transferred into the inter-Colonial ships, which call weekly at St. Vincent on regular days—one week with outward mails on the way round the islands, and the following

blishing company, inc.

week on the way to Barbados with homeward mails. The service was carried on in a satisfactory manner. A great improvement to be recorded is that the steamers now arrive in daylight instead of at night as hitherto.

The steamers of the Pickford and Black Line, from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued to run as usual, while occasional calls were made by the steamers of the Direct and Quebec Steamship lines. The East Asiatic line of steamers from Copenhagen viâ London and the Danish West Indies also made occasional calls.

There is an inland postal system by which the Windward District of the Colony is served three times a week, the Leeward District daily, and the Grenadines once a week.

The postal order system continues to grow in popularity, and its extension to the district towns has during the year been accomplished.

The volume of work in the Post Office also continues to expand, which is a sure sign of the upward march of the Colony.

The revenue of the Telephone Department was £484, including £227 transferred to that head on account of the Government installations. The expenditure was £453. The main installation is in Kingstown with branch lines all over the Island. The service is a most useful one.

IX.—GENERAL OBSERVATIONS.

During the year Sir Ralph Williams, K.C.M.G., Governor-in-Chief of the Windward Islands was transferred as Governor and Commander-in-Chief of the Colony of Newfoundland. He departed from the Windward Islands on the 15th June, 1909, to take up his new post. On the 13th October, 1909, Lieut-Colonel Sir James Hayes Sadler, K.C.M.G., C.B., arrived in the Windward Islands as successor to Sir Ralph Williams. In May, 1909, Mr. E. J. Cameron, C.M.G., was transferred to St. Lucia as Administrator. The Honourable C. Gideon Murray, his successor, arrived in the Colony on the 26th May, 1909. From the 18th December until the 27th December, 1909, Mr. Murray was absent in Grenada on duty, during which time His Honour W. S. Shaw, Chief Justice, acted as Administrator.

The most important event during the year affecting this Colony and the West Indies generally was the appointment by His Majesty's Government of the Royal Commission on nearer trade relationship between Canada and the West Indies. Their report is awaited with much anxiety, for upon it and its recommendations great issues in the development of this and the other Colonies may depend. The most weighty matters laid before the Commission by the St. Vincent representatives included the improvement of steamship communication with Canada, the lowering of cable rates generally, and a desire to give reciprocal

treatment to produce of Canada on condition that arrowroot be given greater preferential advantages than afforded to that article to-day. The present rate of duty on arrowroot imported into Canada, even with the preferential rebate of 25 per cent., is prohibitive and acts as an effectual barrier against an increase in trade in that staple product of St. Vincent. As St. Vincent produces so little sugar the preference given by Canada in that article is of no practical value to her. As was very properly pointed out to the Commission, if St. Vincent is to give preferential treatment to Canadian goods she should receive some tangible return for such consideration. The only way that Canada can do this is by remitting the duty on arrowroot altogether or lowering it to such an extent as to allow a trade in that product to grow up between the two places. In this event St. Vincent would be most happy to reciprocate and would welcome the opportunity for closer trade relationship with Canada.

It is clear that the sudden departure of Messrs. D. K. Porter and Company from the Colony has, as was stated in the commencement of this Report, affected the whole history of the year's proceedings. Had no such unfortunate incident occurred there is every reason believe that the tendency, financially and industrially, would have again been upwards and that the Treasury receipts would have, if not exceeded, certainly equalled those of 1908-9. As it is the Report for 1909-10 is one of a suspension of progress, which, however, all present signs point to as temporary, if not past. Much has been done during the year to improve and to put the cotton industry upon a more stable basis. The Agricultural Department are especially to be commended for their untiring and strenuous efforts in this direction. The formation of the St. Vincent Arrowroot Growers and Exporters Association is an equally important step in the consolidation and promotion of that industry. If planters can find a third staple annual crop industry to supplement the two first mentioned their conditions should compare favourably with any in the West Indies. In addition, it is pleasing to note that during the year a number of estates' buildings have been repaired, while new ones have been erected, and that gradually the extraordinary ravages of the hurricane of 1898 and the eruption of 1902-3 are disappearing.

Some good recuperative work has been accomplished by the new proprietor on the Carib estates, but there is still much hard uphill work to be completed before these estates can be restored to their former prosperous state.

An attempt was made during the year to promote a Company for the erection of a really good hotel in the chief port of Kingstown. For the moment the matter is in abeyance, but so soon as the question of steamship communication is settled it will be taken up again. St. Vincent is without good hotel accommodation, which is highly essential if she is to become a resort for health seekers and travellers, the qualifications for which she possesses in a large degree. The scenery is beautiful, the views are magnificent, the climate, moreover, is one of the

healthiest in the West Indies, and from December to April compares favourably with the French or Italian Riviera. There are charming walks, rides, and drives and many objects of historic interest may be seen. A fair main road runs all round the Island, and there are good bridle paths in the interior. The sea fishing and sea bathing are excellent, while a picturesque natural nine holed golf course has just been established in one of the prettiest situations in the Island. The more actively inclined will be rewarded by climbing the quiescent volcano Soufrière, which is not difficult of ascent. This volcano has erupted only three times in the last 300 years, namely, in 1718, 1812, and 1902.

A sketch map is attached to this Report, which will serve to give an idea of the size, configuration, and settlement of the Island.

C. Gideon Murray,
Administrator.

REPORT ON THE ST. LUCIA BLUE BOOK FOR 1909.

I.—FINANCIAL.

The revenue for the financial year ended the 31st March, 1910, including £500, the Imperial Grant-in-Aid of Agriculture, amounted to £65,739 18*s.* 11*d.*, an increase of £45 18*s.* 4*d.*, as compared with the revenue for the preceding year, and £1,254 0*s.* 7*d.* above the Estimate.

The following statement gives the details of the revenue for 1909-10, as compared with that for 1908-9:—

Heads of Revenue.	1909-10.			1908-9.		
	£	*s.*	*d.*	£	*s.*	*d.*
1. Customs	31,644	1	3	31,289	18	10
2. Port, Harbour, &c., Dues	5,005	0	3	5,185	8	11
3. Licences, Excise, &c.:						
(*a.*) Licences—						
Retail Spirit, &c.	1,648	0	0	1,624	0	0
Distillery	100	0	0	100	0	0
Carts, Carriages, Animals, and Guns	579	17	6	613	2	6
Petroleum, Cocoa, Boat, &c. ...	535	14	7	555	4	0
(*b.*) Excise—						
Duty on Rum ...	12,293	7	11	13,053	2	9
(*c.*) Taxes—						
Road Tax	2,003	5	8	1,894	15	4
(*d.*) Stamp Duty—						
Sale of Revenue Stamps	441	7	5	418	18	0
4. Fees of Court or Office, &c.	4,158	13	1	3,399	12	11
5. Post Office	1,195	8	5	969	11	10
6. Telephone	784	18	1	755	4	0
7. Rent of Government Property	797	12	0	786	5	6
8. Miscellaneous	1,008	13	1	1,039	4	0
9. Interest	1,399	16	5	1,414	5	0
10. Repayment of Loans ...	175	10	0	175	10	0
	63,771	5	8	63,274	3	7
11. Part proceeds of Sales of Reclaimed Lands ...	119	18	2	167	11	1
12. Land Sales	1,348	15	1	1,752	5	11
Total Local Revenue	65,239	18	11	65,194	0	7
13. Imperial Department of Agriculture—						
Grant-in-aid ...	500	0	0	500	0	0
Total Revenue ...	£65,739	18	11	£65,694	0	7

The increase of £759 under Head 4, is due to larger receipts of fees by the Legal Departments and on account of pilotage; the decrease of an almost identical amount, under Excise—duty on rum—is attributable in part to the higher price for the commodity which obtained during the year and to some extent to greater sobriety of the people. The other increases and decreases disclosed by the statement are due to the ordinary fluctuations of business and call for no special comment.

The following are the figures of the revenue for the last completed five years, distinguishing the receipts from local sources from those from the Imperial Grant-in-Aid of Agriculture:—

		£	s.	d.	£	s.	d.
1905-6.	Local	60,649	16	10			
	Imperial Grant	1,227	8	1			
					61,877	4	11
1906-7.	Local	59,169	1	7			
	Imperial Grant	843	0	0			
					60,012	1	7
1907-8.	Local	66,636	1	1			
	Imperial Grant	715	0	0			
					67,351	1	1
1908-9.	Local	65,194	0	7			
	Imperial Grant	500	0	0			
					65,694	0	7
1909-10.	Local	65,239	18	11			
	Imperial Grant	500	0	0			
					65,739	18	11

The number of licences for the sale of intoxicating liquor, issued during the year ended the 31st March, 1910, as well as the revenue derived therefrom, is shown below:—

Description of Licence.	No. issued during quarter ended on				Revenue		
	30th June, 1909.	30th September, 1909.	31st December, 1909.	31st March, 1910.	£	s.	d.
Wholesale Liquor ...	3	3	3	3	60	0	0
Retail Spirit	44	46	46	44	1,448	0	0
Bottle	2	2	2	2	80	0	0
Refreshment House ...	2	2	2	2	60	0	0
Hotel	1	1	1	1	6	0	0
Occasional	4	—	—	3	2	12	6
					1,656	12	6

The expenditure was £64,446 5*s.* 8*d.*, which included £398 3*s.* 11*d.* paid out of the Imperial Grant-in-Aid of Agriculture. The local expenditure was therefore £64,048 1*s.* 9*d.*, which was £1,792 18*s.* 6*d.* less than the Estimate, and £385 12*s.* 7*d.* below the expenditure of the previous year.

	£	s.	d.
The local revenue was	65,239	18	11
and the local expenditure	64,048	1	9
leaving a net gain on the year's transactions of	£1,191	17	2

The following statement details the expenditure for 1909-10, as compared with that for 1908-9:—

Heads of Expenditure.	1909-10. £	s.	d.	1908-9. £	s.	d.
1. Charges on account of Public Debt	9,390	12	6	9,446	3	8
2. Pensions	2,059	4	5	1,848	5	1
3. The Governor and Legislature	3,137	5	10	3,055	19	2
4. Treasury, Customs, and Inland Revenue Department	4,636	10	8	4,878	12	2
5. Post Office	1,955	0	0	2,056	4	3
6. Port and Marine Department	1,028	12	9	1,029	17	9
7. Audit Department ...	561	9	5	543	19	1
8. Legal Departments ...	4,218	17	2	3,974	15	6
9. Local Forces	820	1	4	719	7	4
10. Police	4,396	14	1	4,470	13	2
11. Prisons	1,541	2	5	2,506	13	11
12. Medical Department ...	3,505	17	11	3,065	13	2
13. Hospitals and Asylums ...	3,437	18	4	3,299	1	2
14. Charitable	572	12	10	533	2	7
15. Education	5,094	10	6	4,698	17	0
16. Ecclesiastical	1,600	0	0	1,600	0	0
17. Agriculture (from local funds)	1,114	0	9	1,188	15	7
18. Miscellaneous Services ...	2,416	12	9	2,403	8	8
19. Colonial Engineer's Department	3,001	10	2	2,557	15	8
20. Public Works Recurrent	7,237	1	11	6,563	15	3
	61,725	15	9	60,441	0	2
21. Public Works Extraordinary	2,322	6	0	3,992	14	2
Total Local Expenditure	64,048	1	9	64,433	14	4
17a. Agriculture (from Imperial funds)	398	3	11	604	3	10
Total Expenditure ...	£64,446	5	8	£65,037	18	2

The following figures show the expenditure of the Colony for the last completed five years, both on account of local expenditure and from the Imperial Grant-in-Aid of Agriculture:—

		£	s.	d.	£	s.	d.
1905-6.	Local	61,323	10	5			
	Imperial Grant	1,197	17	11			
					62,521	8	4
1906-7.	Local	59,567	15	6			
	Imperial Grant	726	3	4			
					60,293	18	10
1907-8.	Local	64,152	3	11			
	Imperial Grant	687	11	7			
					64,839	15	6
1908-9.	Local	64,433	14	4			
	Imperial Grant	604	3	10			
					65,037	18	2
1909-10.	Local	64,048	1	9			
	Imperial Grant	398	3	11			
					64,446	5	8

As a result of the year's transactions, a sum of £1,191 17*s.* 2*d.* was added to the Colony's surplus, making it, on the 31st March, 1910, £27,351 17*s.* 1*d.* At the same date, the amount to the credit of the Public Buildings Insurance Fund was £3,478 4*s.* 7*d.*, making a total surplus of £30,830 1*s.* 8*d.*, of which £24,268 15*s.* 3*d.* is invested in securities in England, £1,500 is on deposit locally at the Colonial Bank, and £1,235 14*s.* 5*d.* is loaned to the Castries Town Board.

The public debt at the 31st March, 1910, amounted to £149,029 11*s.* 0*d.*, apportioned as follows:—

	£	s.	d.	£	s.	d.
Colony's share—						
Castries Harbour Loan	52,350	0	0			
Central Factory ...	8,200	0	0			
Public Works	50,579	11	0			
Water-works	12,000	0	0			
Immigration	8,900	0	0			
				132,029	11	0
Castries Town Board's share				17,000	0	0
				£149,029	11	0

In addition to the £17,000, the Castries Town Board is also responsible for a further sum of £550, being a portion of the £50,579 11*s.* 0*d.* loan for Public Works which was allotted to it.

The invested accumulated sinking fund for the redemption of the loans amounts to £16,296 12*s.* 3*d.*, making the net liability £132,732 18*s.* 9*d.*

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper.

Accounts are kept in sterling by the Government, and in dollars and cents in commercial accounts, the dollar being equal to 4*s.* 2*d.*

Finances of Municipalities.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates and dues, market dues and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

The following statement shows the revenue and expenditure for the last five years of the towns and villages, the amount of their indebtedness at the 31st March, 1910, and the balance standing to their credit at the same date:—

Town or Village.	1905–6.		1906–7.		1907–8.		1908–9.		1909–10.		Indebtedness at 31st March, 1910.	Credit Balance at 31st March, 1910.

Horses	729	468

The total value of the imports was £266,228, a decrease of £23,547 as compared with 1908. Commenting in his annual report on the decreases thus shown, the Treasurer states "that, apparently, stocks were allowed to go down slightly," and he adds that there was also a tendency to restrict expenditure.

Excluding the importations by parcel post, the value of which was £2,890, the following figures indicate the proportions of the total imports contributed by the

	Per cent.
United Kingdom	32·4
British Possessions	12·6
Foreign Countries (of which more than one-half consists of bunker coal)	55·0

In 1908 the proportions were, respectively:—

	Per cent.
United Kingdom	31·0
British Possessions	10·0
Foreign Countries	59·0

The following table gives the total value of the imports for the last five years:—

	£
1905	285,987
1906	242,470
1907	310,309
1908	289,775
1909	266,228

The declared value of the total exports during 1909 was £250,674, made up of:—Domestic produce, to the value of £124,901; bunker coal, to the value of £115,754; and the produce and manufactures of other countries, to the value of £11,258. The total value of the exports was less by £1,994 than the value of the exports of 1908, but the latter included Ordnance stores, to the value of £50,000, which were removed from the Colony during that year. Eliminating this item, the value of the exports during the year under review shows a substantial increase.

The chief articles of export show the following variations:—

Articles.	1909. £	1908. £
Class I.—		
Cocoa	54,275	30,487
Fruit, all kinds	1,151	1,034
Honey	479	356
Lime juice	297	126

Articles.	1909.	1908.
	£	£
Class I.—*continued.*		
Rum	2,324	1,367
Sugar:		
Usine	59,628	53,691
Muscovado	1,140	707
Molasses	1,104	90
Class II.—		
Cotton, raw	432	11
Fuel, wood	651	566
Hides and skins	962	811
Logwood	384	998
Pimento logs, &c.	489	636

As regards cocoa, it should be noted that the figures for 1909 include a considerable amount of the crop of the previous year.

The distribution of the exports, exclusive of bunker coal, was as follows:—

	1909. Per cent.	1908. Per cent.
To United Kingdom	66·4	62·4
British Colonies	10·4	12·1
Foreign Countries	23·2	25·5

The figures given below show the total value of the exports for the last five years:—

	£
1905	211,653
1906	220,313
1907	264,401
1908	252,668
1909	250,674

Trade with Canada showed a slight improvement, as evidenced by the figures hereunder, which also show the total trade with that country for the five years commencing with 1905:—

Year.	Imports.	Domestic Exports.	Total.
	£	£	£
1905	10,261	5,678	15,943
1906	7,730	9,755	17,536
1907	6,818	8,556	15,404
1908	6,077	8,318	14,395
1909	6,321	9,062	15,449

Neither in 1909, however, nor in previous years, was Canada credited with all goods that originated there, and as steps have now been taken to ascertain more correctly the country of origin of goods imported, it is anticipated that from 1910 onwards it will be possible to determine with greater accuracy not only the value of the trade with Canada, but also of that with all other countries.

Coaling Trade.

The year 1909 was, on the whole, a good one for the coaling business. The figures hereunder give the quantity and value of the coal shipped during the last five years:—

Year.	Tons.	£
1905	81,320	102,626
1906	86,733	105,696
1907	118,503	142,381
1908	85,460	102,288
1909	96,462	115,754

This business affords steady and remunerative employment to some 500 carriers, male and female, by whom the ships are discharged and loaded, and it is a matter of great importance to the island to preserve and foster it.

Mines, Manufactures, and Fisheries.

The sulphur deposits at Ventine, in the Soufrière District, continued to be worked during the year, and 29½ tons of sulphur, valued at £120, were shipped, as compared with 25 tons, valued at £75, shipped in the previous year. There are, however, no signs at present of the industry attaining dimensions of any importance.

The sugar factories working during 1909 were the same as in previous years, namely, Cul-de-Sac, Vieux Fort, Roseau, and Dennery; the same remark applies to the distilleries at Cul-de-Sac and Troumassee, where 72,633 gallons of rum were produced. The export of rum again shows an increase, as evidenced by the figures appended:—

Year.	Distilled.	Consumed.	Exported.
	Gallons.	Gallons.	Gallons.
1905	56,150	50,337	8,655
1906	49,553	46,950	6,319
1907	57,213	51,453	3,652
1908	83,532	51,216	23,440
1909	72,633	46,949	27,883

The manufacture of molascuit, the production of which was commented on in the report for 1908, was displaced in 1909 by molasses, the higher prices obtainable for the latter commodity stimulating the resumption of its manufacture, while the quantity manufactured of molascuit dropped to a negligible amount.

Fishing around the coasts of the island is carried on entirely for the supply of the local market, and no attempt at preserving for export is made. The scarcity of fish, and also of turtle, has formed the subject of complaint for some time past, it being stated that the fishermen employ dynamite for the capture of fish, which is having the effect of driving them from the sur-

rounding waters, and that both fish and turtle are caught in an immature state. Remedial measures are at present under consideration.

Agricultural Industries.

Sugar and cocoa are the principal products of the Colony, but no reliable statistics are available of the area of each under cultivation, and the value of the industries can be estimated at present only by the quantities exported.

Besides the sugar exported in 1909, 5,360 tons, valued at £59,623, all the usine sugar consumed locally is the produce of the factories.

The cultivation of cocoa is extending gradually, but the annexed export figures for the last five years do not show any very marked increase in production:—

	Bags of 200 lb.
1905	9,468
1906	7,896
1907	8,598
1908	6,775
1909	10,850

In regard to what may be termed the minor industries, namely, honey, limes, and cotton, the year under review was encouraging. The values of these products for 1909 and 1908 were as follows:—

	1909.	1908.
	£	£
Honey	479	356
Lime juice	297	126
Cotton, raw...	432	11

The expenditure in connection with the Botanic Station and special agricultural services amounted to £723 14*s.* 5*d.*, of which £398 3*s.* 11*d.* was paid from the Imperial grant in aid. Receipts from the sale of plants, seeds, &c., amounted to £30 11*s.*

During the year, plants to the number of 4,204 were distributed from the nurseries at the station.

The average number of pupils maintained at the Agricultural School during 1909 was 18. Three new boys were admitted, ten pupils were discharged after completing their course of training, and two on proving to be physically unfit.

The medical officer reports that there was no serious case of illness among the boys during the year, and that sanitary details were carefully attended to.

Half-yearly examinations were held in June and December, the papers being set and examined under the direction of the Imperial Commissioner of Agriculture. The examiner's reports, in both instances, were satisfactory.

The expenditure on the school in 1909-10, exclusive of the emoluments of the Officer-in-Charge, which appear in the expenditure on the Botanic Station, amounted to £688 10*s.* 3*d.* The

receipts derived from the sale of plants, produce, and livestock, were £78 0*s.* 7*d.*; provisions supplied to the Victoria Hospital and the Royal Gaol were valued at £35 16*s.*, and those used as food at the school at £44 10*s.* 8*d.*—an aggregate of £158 7*s.* 3*d.*

The plants, mostly lime plants, distributed from the nurseries number 73,358.

The applications during the year for the purchase of Crown Lands numbered 121 in respect of an aggregate area of 1,609 acres. The same figures in 1908 were, respectively, 126 and 1,323.

Forty-nine surveys for grants in respect of an aggregate area of 1,145 acres were completed during the year; 20 grants were issued, and 56 were unissued at the close of the year.

Fifty-three surveys were executed through the Crown Lands and Survey Department, one of which was a survey for a private person.

The system of tracks styled Crown Traces, commenced in 1908 for the purpose, primarily, of giving purchasers of Crown Lands ready means of getting to and from their properties, was continued during the year by the opening of a Trace at Colombette on the high road between Soufrière and Canaries and going across country in such a direction as to admit of it being extended, if necessary in future, to the Canaries River. The expenditure on the work was £32 7*s.* 5*d.*, and the cost of maintenance of the four Traces previously opened, £48 17*s.* 4*d.*

The revenue derived from the sale of lands was £1,059 7*s.* 4*d.*, the expenditure being £1,367 2*s.* 7*d.*

The Land Sales Fund was closed as on the 31st March, 1909, and the balance to its credit carried to general revenue. From that date, the revenue and expenditure of the Department appear in the Colony's annual Estimates.

Economic plants, comprising cocoa, coffee, nutmegs, and limes, to the number of 2,124, were distributed free of cost to purchasers of Crown Lands.

Shipping.

The number of sailing vessels that entered at Castries, the only port of entry, was 246, with a tonnage of 3,734, an increase of 5 in number, but a decrease of 873 in tonnage. 82 per cent. of the number, and 68 per cent. of the tonnage was British, as against 84 per cent. and 77 per cent. respectively, in 1908.

The number of steam vessels entered was 645, with a tonnage of 1,248,798—an increase of 68 in number and of 164,595 in tonnage. 80 per cent. of the number, and 83 per cent. of the tonnage, was British, against 84 per cent. and 88 per cent. respectively, in 1908. The total tonnage of steam shipping entered and cleared was 2,498,944, which is the highest on record with the exception of that of the year 1907, when it was 2,627,218.

The above figures do not include ships of war and yachts, of which 12 of the former and 3 of the latter called at the port during 1909.

The tables hereunder summarize the statistics relating to shipping for the last five years:—

VESSELS ENTERED.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.

1906 ...	534	931,449	252	7,541	84	125,965	37	3,696
1907 ...	614	1,166,991	216	7,606	100	134,803	30	2,089
1908 ...	487	958,607	201	7,387	89	124,520	38	2,267
1909 ...	517	1,025,251	197	5,574	129	224,895	44	2,662

Castries is also a port of registry, and at the close of the year there were 13 vessels, with a tonnage of 616, on the register.

III.—LEGISLATION.

During the year twelve Ordinances were passed.

IV.—EDUCATION.

The results of primary education in 1909 and 1908 compared as follows:—

	1909.	1908.
Number of schools	57	51
Number on rolls	7,674	7,018
Average attendance	4,866	4,447
Number examined	6,629	6,071
Government Grant-in-Aid ...	£3,862	£3,648

Of the total number of schools open at the close of 1909, 50 were Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 of the East Indian Mission.

The Inspector of Schools, in a special report on the teaching of hygiene in the schools, states: "The teaching of tropical hygiene has been taken up in all the juvenile schools of the Colony. The new code makes it obligatory in every class from Standard II. upwards. Everything possible has been done to make the teaching of the subject intelligent and practical, and to impress upon the children the necessity of observing in their home life the rules they learn in school. There the action of the school needs must cease. I am glad to be able to report that I am extremely pleased with the 1909 results, as far as the school work is concerned. The subject matter taught was, in general, well chosen, and the answering of the children, especially if the language difficulty be taken into account, very satisfactory."

A series of lectures in elementary agricultural science were delivered in April, 1909, by the Agricultural Superintendent to the Teachers of the Primary Schools, the course being the fifth of its kind which has been held. The teachers were assembled at the Agricultural School at Union for the purpose of the lectures, and during their residence there, Dr. L. Nicholls delivered to them a lecture on "Sanitation and Hygiene."

During the year, the schools were examined by an officer of the Agricultural Department on the teaching of agriculture, the results of which were encouraging.

There are two schools of secondary education: the St. Mary's College for boys, receiving a Government Grant of £400 per annum, and the St. Joseph's Convent School for girls, receiving a Grant of £150 per annum. At the Cambridge Local Examination held in December, 1909, out of 15 candidates from St. Mary's College 14 satisfied the examiners, three passing with honours. As regards the St. Joseph's Convent School, 12 candidates were presented at the same date for examination by the College of Preceptors, all of whom passed.

V.—GOVERNMENT INSTITUTIONS.

The following statement tabulates the principal statistics for the year 1909 relating to the hospitals and asylums:—

Institution.	No. of patients at beginning of year.	No. admitted during the year.	Daily average.	Patients discharged.			No. of deaths.
				Cured.	Relieved.	Not improved.	
Victoria Hospital, Castries.	62	1,255	70·72	626	462	40	120
Soufrière Hospital ...	1	65	2·8	57	6	—	2
Vieux Fort Hospital ...	1	33	3	12	11	—	7
Dennery " ...	2	25	1	21	3	—	—
Yaws " ...	66	65	48·54	68	6	—	6
Poor Asylum	57	73	62·04	—	—	—	29
Lunatic Asylum ...	—	38	15·9	1	—	3	8

There were 98 operations performed at the Victoria Hospital; and the death-rate, calculated on the number of cases admitted and treated, exclusive of premature and still-births, was 9·11 per cent. The total cost of the Institution, including personal emoluments, was £1,466 5*s*. 5*d*., exclusive of the cost of medicines.

In addition to the lunatics under treatment at the Soufrière Lunatic Asylum, 15 were transferred to the central asylum at Grenada, the number of St. Lucia lunatics confined in that institution at the end of the year being 40. As the Grenada Asylum can no longer provide accommodation for the lunatics of St. Lucia and St. Vincent in addition to those of Grenada, the provision of a separate asylum to house the whole of the St. Lucia lunatics was sanctioned during the year, and the work of converting into an asylum certain of the military buildings at La Toc, which have been transferred to the Colonial Government, is now in active progress.

In each town and village and at certain populous centres there is a dispensary for out-door patients, and during 1909, 13,716 persons received attention at these dispensaries, more than half the attendances being for the purpose of having ulcers dressed. The number is lower than the same number for each of the two preceding years.

Out-door relief of paupers is administered through the agency of the Police Department under a system which is simple but effective in ensuring that only those properly entitled to relief obtain it, and that recipients who are subsequently proved to be able to maintain themselves promptly disappear from the poor relief list.

The number of persons receiving relief on the 31st December, 1909, was 209, a slight increase as compared with the previous year. The expenditure, including gratuities and allowances to officers, £8 3*s*. 11*d*., and the burials of paupers, £163 13*s*. 11*d*., amounted to £560 9*s*. 10*d*.

A considerable amount of useful work for the improvement of the sanitation of the towns and villages was carried out during the year. The Chief of Police, whose department is charged with the duty of enforcing the sanitary regulations of the Board of Health, reports as follows:—

"Continuous attention was paid to sanitary work. Dr. Nicholls gave a useful course of lectures, with microscopical illustrations, for instructing the men on the subject of malaria and other prevalent diseases, and for disinfecting premises by spraying process in cases of pneumonia. The constables appointed as sanitary officers were detailed for such work whenever available, and during the year paid 3,647 visits to yards in the town, besides many visits to premises on the Chaussée, Waterworks Road, Barnardville, Hospital Road, and other places in the neighbourhood of Castries.

"A record is kept of such work, showing the dates of each visit and the condition of the premises, and of any further action taken. It is only by frequent inspection that the yards in the poorer quarters of the town are kept clean, and that the practice

of storing water in open barrels or other vessels can be prevented. Any relaxation of attention in this direction is immediately followed by the reappearance of such receptacles in which mosquitoes breed, so that a constant and permanent system of supervision is absolutely necessary.

"There were 96 prosecutions in Castries for infringements of the Board of Health Regulations, and 43 other cases, brought on evidence of the police, under town by-laws.

"In the towns and villages, sanitation received careful attention. The non-commissioned officer in charge at each station inspected at intervals and communicated with the medical officer and furnished a monthly report for submission to the Administrator."

The principal office of the Savings Bank is at the Treasury in Castries, with five district offices in different parts of the Island.

The following statement summarizes the transactions of the bank for the last five years:—

Year.	Number of accounts open 31st December.	Total deposits inclusive of interest.			Total withdrawals.			Amount on deposit on 31st December.		
		£	s.	d.	£	s.	d.	£	s.	d.
1905... ...	1,231	15,025	16	3	16,285	13	7	14,373	19	11
1906... ...	1,584	13,750	12	6	13,397	7	1	14,727	5	4
1907... ...	1,639	15,526	2	0	12,561	9	10	17,691	17	6
1908... ...	1,653	15,411	9	0	14,028	6	11	19,074	19	7
1909... ...	1,685	13,411	12	0	14,902	6	3	17,584	5	4

As will be seen, the amount due to depositors on 31st December, 1909, was £1,490 14*s.* 3*d.* less than the same amount on the same date in the previous year. The decrease is believed to be due to the fact that opportunities for temporary investment of savings outside at a higher rate of interest than the savings bank offers are being taken advantage of.

The working account of the bank showed a profit, at the close of the calendar year, of £103 12*s.* 3*d.*, which was carried to general revenue; and the amount of the investments on account of the bank, at the same date, amounted to £17,202 19*s.* 3*d.*

The number of Friendly Societies increased during the year by one, the number on the register at 31st December being 17. The number of members at the same date was 1,827—768 males and 1,059 females—an increase of 301 for the year.

The total receipts of the societies amounted to £2,233 17*s.* 8*d.*, and the disbursements to £1,870 5*s.*, the balance at the close of the year being £2,071 0*s.* 6*d.* The balance at the 31st December, 1908, was £1,707 7*s.* 10*d.*

The working expenses of the societies amounted to £764 8*s.* 1*d.*, or 40·9 per cent. of the total disbursements.

VI.—JUDICIAL STATISTICS.

The Police Force consisted of a Chief, a Sergeant-Major of European birth, formerly of the Royal Irish Constabulary, and 70 West Indian Non-Commissioned Officers and men. The post of Staff-Sergeant, which is usually filled by a European officer, remained vacant throughout the year. The force is drilled and trained under the supervision of the Staff Officer of the Windward Islands by a European Musketry and Drill Instructor. In August, the force underwent inspection by Brigadier-General Marshall, C.B., Commanding the troops at Jamaica.

In addition to ordinary police duties, the police carry out a considerable amount of work in connection with the details of administration, such as enforcement of sanitary regulations, distribution of poor relief, registration of births and deaths, and collection of road tax from defaulters. They also take charge of certain of the district post offices and telephone exchanges.

The single rate of pay, namely £42, which was established for all constables in 1902, was changed in October for a system which is gradually being brought into effect, of graded pay on a triple scale of £38, £45, and £50, and a constable on joining the force has now some improvement in his position in this respect to which to look forward, while the new system possesses the additional merit of providing an incentive to good conduct and the effective discharge of duty.

The total number of persons committed to the Royal Gaol in 1909 was 474, made up of 269 men, 212 women, and 13 juveniles. The daily average was 62·13, as compared with 58·49 in the previous year. At the commencement of the year, besides 10 in the St. Vincent Prison, 31 St. Lucia prisoners were serving their sentences in the Grenada Prison. The daily average of the prisoners in Grenada was 10·65, and of those in St. Vincent 6·92, making a total of 79·70 as the daily average of all the St. Lucia prisoners. The minimum number in custody at one time was 34, and the maximum 87.

The medical officer states in his report on the gaol, that nothing occurred during the year calling for special comment. The daily average on the sick list was 1·78; in 1908 it was 2·1.

The St. Lucia prisoners undergoing confinement in the prisons in Grenada and St. Vincent were principally men convicted for participation in the riots of 1907, for whom accommodation could not be provided in the Royal Gaol. Those then in Grenada were all brought back to St. Lucia in May, the five remaining in St. Vincent following in November, from which date, for the first time since 1901, all the prisoners belonging to the Colony have been accommodated here.

Revised rules and regulations for the Royal Gaol were brought into force on the 1st October. The greatest change they make is the introduction of a system under which long-term prisoners, by earning marks entitling them to be placed in certain classes, are able to earn gratuities, at fixed rates, payable to them on discharge.

The following table summarises the criminal statistics for the last five years:—

—	1905.	1906.	1907.	1908.	1909.
Offences reported	1,595	1,706	2,059	1,962	1,675
Summary Convictions—					
For offences against the person	405	220	380	405	263
„ prædial larceny	60	37	37	35	130
„ offences against property	226	77	138	106	
„ other offences	904	1,126	950	1,134	1,352
Convictions in Superior Court—					
Child murder	1	—	—	—	—
For offences against the person	3	2	10	2	1
„ offences against property	23	14	27	13	11
„ other offences	5	1	110	—	—

The figures for 1909 are not characterised by any special feature calling for comment; but it should be noted that the 1,352 summary convictions classed as "Other offences" include a large number of cases of default in payment of Road Tax, and also cases of non-payment of instalments of Crown land purchase money and of offences against town and village by-laws.

VII.—VITAL STATISTICS.

The population on the 31st December, 1909, is estimated to have been 55,835, made up of 26,933 males and 28,902 females. The natural increase during the year was 740. In the estimate of population, no regard is paid to emigration or immigration, while it is known, although no record is made, that there is a considerable efflux of able-bodied labourers to the Canal Zone of Panama and to the goldfields at Cayenne. Notwithstanding this emigration, the birth-rate for the year shows, contrary to what might be expected, an increase of 1·1 per thousand, the rate for 1909 being 30·9, as compared with 29·8 in 1908. On the other hand, the death-rate for the year, 17·5 per thousand, shows a decrease of 3·2 per thousand as compared with that for 1908, when the rate was 20·7 per thousand. The death-rate of infants under one year, however, was 332·4 per thousand, as against 275·5 in the previous year.

There were 241 marriages in the course of the year, an increase of 23 on the number in 1908.

No epidemic or quarantinable disease occurred, and on the whole the health of the Colony during the year may be said to have been satisfactory.

The rainfall over the whole island was considerably in excess of that of the previous year, and approached the average more closely than has been the case for a number of years past. At the Botanic Station, in Castries, 85·43 inches were registered, which was 5·45 inches above the fall of 1908.

At the same Station, the mean monthly temperature in the shade was 78·5° F. The maximum temperature of 92° was recorded in August, and the minimum of 62° in March.

The corrected readings of the barometer—height, 10 feet above M.S.L.—ranged from 29·873 inches, in November, to 30·048 inches, in February. The mean annual pressure was 29·981 inches.

VIII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly intercolonial mail service, performed under contract by the Royal Mail Steam Packet Company's steamers, was regularly carried out during the year; and the steamers of the Pickford and Black Line from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued to run as usual; as did the intercolonial steamers of the Compagnie Générale Transatlantique, which call at Castries on their voyage between the French Colonies and those of the Danish East Asiatic Company. The steamers of the Quebec Steamship Company, from New York, also call regularly on the outward voyage fortnightly.

There was an increase in the business of the Post Office, as the subjoined figures show:—

	1909.	1908.
Letters and postcards—		
Sent	100,213	102,463
Received	103,020	91,734
Inland	96,958	92,889

The number of parcels sent was 429, and the number received, 2,495.

4,243 British postal orders, to the value of £2,521 5*s.* 9*d.*, were issued, and 679, to the value of £294 12*s.* 3*d.*, were paid.

Money orders to the value of £4,626 16*s.* 2*d.* were issued, and the value of those paid was £3,902 18*s.* 10*d.*

The revenue of the Post Office was £1,598 2*s.* 8*d.*, and the expenditure, £1,685 14*s.* 2*d.*

There is regular and daily postal communication, under local contract, between Castries and the leeward coastal towns and villages by the Royal Mail coasting steamer. On the windward side of the island communication by post is overland, and twice a week only. The number of transactions at the district offices tends to increase.

All the towns and villages of the Colony are connected by telephone with Castries. During the year there were 212 miles of line open for traffic, and the number of subscribers was 121—an increase of 5 over 1908. There were 179 messages transmitted, and 394 sixpenny tickets were sold to non-subscribers using public telephones.

The total receipts for the year amounted to £772 15*s.* 3*d.*, the expenditure being £975 17*s.* 2*d.*

IX.—GENERAL REMARKS.

Mr. P. C. Cork, C.M.G., who had held the post of Administrator since 15th November, 1905, left the island in April on promotion to the Colonial Secretaryship of Jamaica, and was succeeded by Mr. Edward J. Cameron, C.M.G., Administrator of St. Vincent.

Sir R. Williams, Governor of the Windward Iislands, proceeded early in June to take up the post of Governor of Newfoundland, and the general Government was administered by Mr. Cameron until October, when the new Governor, Sir James Hayes Sadler, K.C.M.G., C.B., arrived in the Colony. During the above interregnum, Mr. H. A. Smallwood acted as Colonial Secretary of St. Lucia.

The year was a fairly satisfactory one as regards trade and business conditions generally. The prices of sugar and cocoa were moderately remunerative, and the coaling industry did well.

There was a small surplus of revenue over expenditure, in spite of a comparatively generous outlay on public works, and the outlook is, on the whole, encouraging.

The question of the provision of a proper lunatic asylum in the island and of the housing of the different Departments of Government in suitable public buildings, questions which have been many years under discussion, were actively taken up, and a general scheme, involving an expenditure of £8,000 spread over several years, was put forward and approved by the Secretary of State, which scheme has now been embarked upon.

A Property Tax Bill, imposing taxes on lands and house property, which was introduced early in the year but which met with considerable popular opposition, was not proceeded with, and the old Road Tax Ordinance, which the new taxation was intended to replace, continued in force throughout the year.

The appointment at the close of the year of a Royal Commission to enquire into the question of Trade Relations between Canada and the West Indies is to be noted, as likely to exercise an important bearing on the future fortunes of the West Indies.

A sketch map of the island with recent revisions is appended.

EDWARD J. CAMERON,
Administrator.

Ordnance Survey, Southampton, 1901

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

GRENADA.

(For Report for 1909, *see* No. 658.)

THE ACTING GOVERNOR to THE SECRETARY OF STATE.

Governor's Office, St. Lucia,
10th November, 1911.

SIR,

I HAVE the honour to forward the Annual Report on the Blue Book of the Colony of Grenada for the year 1910, prepared by Mr. E. Drayton, C.M.G., the Colonial Secretary, now administering the Government.

I have, &c.,
EDWARD J. CAMERON,
Acting Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

(22243—2.) Wt. 31959—459. 1125 & 85. 12/11. D & S. A 2

BLUE BOOK REPORT FOR THE YEAR 1910.

FINANCIAL.

The financial results of the year ended 31st March, 1911, were excellent, the revenue reaching the record figures of £81,413, while the expenditure was only £75,561, the excess of revenue going to swell the Colonial assets by £5,852.

2. The satisfactory revenue was due primarily to a bumper crop of the Colony's staple, cocoa, which brought money into circulation locally; but the high figures actually realised were derived from,—(1) an additional ten per cent. on all import duties levied during the year; (2) improvement of the receipts from Excise duty on rum; and (3) unexpected returns from duties on estates of deceased persons.

3. Under this last mentioned head no less than £2,443 was received against an estimate of £300. The law provides for payment by instalments, but it appears that in practice full payments are going to be made. The improved Excise revenue is due to the active measures taken by the present Colonial Treasurer for the suppression of smuggling and the supervision of his department. £12,060 was received, being £1,935 more than in the preceding year, and £2,202 more than in the year before that. The ten per cent. additional import duty was imposed because it was impossible when the Estimates were framed to foresee the special causes which, later in the year, brought about the large revenue actually received, and there had been a deficit on the last year's transactions.

4. The revenue under its proper heads was as follows:—

	£
Customs	42,373
Licences, Excise, and internal revenue... ...	30,566
Fees of office, &c.	1,931
Post Office	1,519
Telephones	1,800
Water supply, Richmond Hill, &c.	236
Revenue from Government property	1,790
Interest and Sinking Funds	1,072
Miscellaneous receipts	119
Land sales	7
Total revenue	£81,413

A net increase of £10,189, as compared with the preceding financial year, is shown.

5. The expenditure for the year, including £137 from an outstanding balance of the former Imperial grant-in-aid of the Agricultural Department, was £75,561, as follows:—

	£
Charges on account of debt	6,196
Pensions	2,794
The Governor	2,331
Colonial Secretary	1,785
Treasury Department	5,780
Post Office	2,858
Audit	703
Port and marine	548
Legal Departments	4,322
Police	5,210
Prisons	1,190
Medical Department	3,766
Hospitals and asylums	5,805
Education	6,035
Ecclesiastical	444
Charitable	619
Telephones	1,694
Carriacou District	876
Water supply, Richmond Hill, &c.	237
Miscellaneous	4,899
Agricultural Department	1,332
Public Works Department	1,808
Public Works Recurrent	10,206
Public Works Extraordinary	3,985
Total expenditure from Colonial Funds ...	75,424
Expenditure on Agricultural Department from balance of Imperial grant	137
Total expenditure	£75,561

The excess of £2,279 over the preceding financial year is chiefly attributable to the importation of a motor road-roller and to a larger programme of public works; also to the cost of the new Agricultural Department (*see* last year's report, paragraph 23) coming on charge for the first time, the comparative excess under this head alone being £691.

6. The total revenue and expenditure in the last five financial years were as follows:—

	Revenue.	Expenditure.
	£	£
1906-7	71,786	70,379
1907-8	79,871	68,383
1908-9	73,182	72,661
1909-10	71,224	73,282
1910-11	81,413	75,561

7. The surplus of assets at 31st March, 1911, was £38,742, and the more important items were:—

	£
Reserve Fund, invested	13,040
Loans to District Boards	10,681
Carriacou Land Settlement Advance ...	1,768
Grenada Land Settlement Advance ...	301
Carriacou Jetty Advance	555

8. The public debt was £123,670, as before, and the accumulated sinking fund for its redemption between 1917 and 1942 amounted to £27,937, duly invested by its trustees, the Crown Agents for the Colonies. The Colony is also responsible for a loan of £550 taken over from the late governing body of the girls' school; this will soon be repaid.

9. The revenue and expenditure of the six District Boards of Grenada in the financial year ended 31st March, 1911, were as follows:—

	Revenue.	Expenditure.
	£	£
St. George's	4,246	3,947
St. Andrew's	2,512	2,586
St. Patrick's	2,029	1,651
St. John's	1,539	1,759
St. Mark's	692	627
St. David's	711	711
Totals	£11,729	£11,281

The revenue of the town of Hillsborough, in Carriacou, which is administered by town wardens, was £86, and its expenditure the same amount.

10. The loan debts of the Boards at the same date were £20,681, as under:—

	£
St. George's	12,181
St. John's	3,450
St. Patrick's	4,236
St. Andrew's	970
St. Mark's	25
Total	£20,862

These are all owed to the Government, and are repayable (with interest) either by instalments or by sinking fund contributions, which are regularly paid up.

TRADE, AGRICULTURE, AND INDUSTRIES.

11. The import and export trade of the Colony in the last five calendar years is valued as under:—

	Imports.	Exports.
	£	£
1906	233,448	210,149
1907	288,665	417,299
1908	303,783	359,245
1909	268,236	284,846
1910	279,368	291,760

A revival in 1910 from the conditions of 1909 is shown on both sides, but the figures are still below the satisfactory results of 1907 and 1908.

12. The following comparative statement of the values of the principal articles of import in the last two years shows that increases occurred chiefly under fish (dried or preserved), oils for cooking, timber and shingles, wearing apparel, and textiles; while decreases appear under bread, oats, Muscovado sugar, tobacco, cigars and cigarettes, manures, and manufactured metal.

	1909.	1910.
Class I.—	£	£
Bread of all kinds	5,042	3,774
Butter	2,500	2,881
Fish, dried and preserved... ...	13,561	17,036
Flour (wheaten)	34,046	34,227
Meat, salted and preserved ...	9,341	9,855
Medicinal extracts and preparations	2,905	2,528
Oats	5,637	4,802
Oil (olive and others for cooking)...	3,702	5,820
Oleomargarine and butterine ...	3,824	3,916
Rice	5,875	6,188
Spirits	5,248	5,185
Sugar:—		
Refined	4,078	4,126
Muscovado	7,748	5,490
Tobacco, cigars, and cigarettes ...	4,423	3,153
Class II.—		
Coal	1,957	1,897
Manures	8,018	5,773
Petroleum oil	4,478	3,852
Timber and shingles	8,133	15,640
Class III.—		
Wearing apparel and haberdashery	13,450	16,037
Textiles	39,156	44,017
Metal manufactures	16,715	14,194
Earthern and glassware	3,142	3,619
Furniture	3,231	2,869
Leather (manufactured):—		
Boots and shoes	5,343	6,246
Other	2,294	2,580
Soap	3,866	4,041
Class IV.—		
Silver and bronze coins	1,150	5,700
Bank notes	8,807	3,559

13. No attempt can successfully be made this year to indicate the quantities imported from the several countries with which the Colony trades, for the reasons set forth in the following paragraph from the annual report of the Comptroller of Customs:—

Although the trade of the colony, taken as a whole, shows only a moderate variation from last year, the alteration in the Bills of Entry, adopted on 1st January, 1910, providing for recording the country of consignment, has resulted in surprising changes in the detailed imports from various countries. The returns classified under British West Indies and United States of America

suffer in comparison with former years, while a corresponding increase is shown in Canadian and European returns. The total value of the trade from Canada is now shown as £22,722 as compared with £7,943 in 1909, and in general the changes may be said to justify the figures placed before the Canada-West Indies Royal Commission in respect to Canadian trade with the Colony. Thus the quantities of the commodities imported from Canada now appear as follows:—

Butter, 5,900 lbs. as against 3,800 lbs. in 1909;
Dried Fish, 1,035,062 lbs. as against 224,800 lbs.;
Flour, 1,789 barrels as against 600 barrels;
Pease, 1,833 bushels as against 400 bushels; and
Oats, 3,277 bushels as against 700 bushels.

Details of the last-mentioned article may be given as an illustration of the effect of more accurate classification:—

Oats.	1909. Bushels.	1910. Bushels.
United Kingdom	17,501	11,218
Holland	1,225	4,775
Russia	Nil	4,191
British West Indies	2,612	Nil
United States, America...	1,893	392
Canada	700	3,277

Imports of *Gin* from Holland now appear as 6,062 gallons as compared with 2,825 gallons in 1909, the figures relating to the United Kingdom being reduced from 2,884 gallons to 146. India replaced the United Kingdom as the country of consignment in the case of *Rice*, and France is credited with 18,062 lbs. of *Butter* in place of 1,000 lbs. in 1909.

14. The value of the three principal products of the Colony exported in 1909 and 1910 is given hereunder:—

	1909. £	1910. £
Cocoa	248,398	259,365
Nutmegs and mace ...	18,135	17,872
Cotton and cotton seed ...	8,971	8,019

15. The export trade with the United States of America, which had fallen to £29,847 in 1909, revived in 1910, and amounted to £42,817, of which £39,742 was cocoa. This product, to the value of £48,365, is also shown as exported to France, but, as has been remarked in previous reports, the statistics are not reliable, bills of lading being to Havre, *optional*, and the final destination of shipments is not known.

16. The record cocoa crop of the Colony, 73,863 bags, was reaped in the year ended 30th September, 1910, being 6,534 bags in excess of 1909, which was the largest reaped at that date. Prices, however, remained pretty much the same as in the previous year, viz., about 51*s*. to 54*s*. 6*d*. per cwt., so that the fullest advantage was not realised from this fine output. The heavy exports of cocoa from Guayaquil and Africa affect the market prices considerably nowadays.

17. The nutmeg crop again fell off this year, only 6,229 barrels and 306 half-barrels being exported in the year ended 30th September, as compared with 6,740 barrels and 346 half-barrels in the preceding year; prices also continued unsatisfactory.

18. The cotton crop of Carriacou was less than in 1909, 2,370 cwt. being exported in the calendar year 1910, as compared with 2,888 cwt. in the preceding year. All of this went to the United

Kingdom, but the direction of the cotton seed exported underwent a change in the year under review, £1,440 of the total of £2,221, in value, going to Barbados, where it was purchased by the Cotton Company of that Island; the balance went to the United Kingdom.

19. The dependency of Carriacou continues to flourish under the stimulus applied to it since 1903 by the Land Settlement Scheme, and the concomitant improved administration. Those who visit the place after an interval of years are surprised to notice the immense change for the better which has taken place. In his latest annual report the Commissioner of the district writes as follows:—

> In past reports comment has been frequently made on the remarkable transformation which has taken place within a few years in the general tone and prosperity of this interesting dependency. This happy result is so entirely the outcome of the Land Scheme that it may not be out of place my again drawing attention to the fact.

Of the amount originally advanced from Colonial Funds to finance the scheme, viz., £8,450, all but £1,768 had been repaid at 31st March, 1911.

20. A commencement was made in the Island of Grenada with a similar scheme in 1910. An estate called Morne Rouge, in the south of the Island, near to the principal town, which had been escheated to the Crown some time ago, was surveyed into lots, and preliminary details settled, but the actual allotment to purchasers was not made until 1911. Beyond mentioning that at date of this report the lots have all been taken up and that the scheme is making satisfactory progress, other details must be left to the report for the current year.

21. The attention of progressive agriculturists in the Colony is being more and more directed to the exploitation of other staple products than those now existing. In Carriacou, as was pointed out in the Annual Report for 1908,* an important lime industry is being established, and in the current year the first shipment of juice has been made. In Grenada, rubber cultivation is extending. At first *Castilloa elastica* was introduced, but of late years *Hevea* has taken its place; and in the current year a large importation of seeds from Ceylon has been undertaken by the Board of Agriculture.

22. This Board, which was inaugurated in 1909 (*see* Report for that year†) did excellent work in 1910, both of an active nature and as preparatory to further expansion in the future. The local Department of Agriculture, under its control, and in close association with the Imperial Department of Agriculture, gives promise of fulfilling the object for which it was designed. Its affiliation with the Imperial department is proving to be of the greatest assistance in its practical work, and the ready and courteous co-operation of the present head of that department is an asset of much value to its existence and usefulness.

23. That the peasant proprietary of the Colony, which has been its special feature for so many years, is holding its own, notwithstanding many adverse conditions of environment, is shown

* No. 628 of this Series: [Cd. 4964-2].
† No. 658 of this Series: [Cd. 4964-32].

by an analysis of the tax rolls for 1910, from which it appears that there were 8,217 holdings of land in the Colony under ten acres, divided as follows among the districts:—

St. George's	1,329
St. David's	1,160
St. Andrew's	2,292
St. Patrick's	1,069
St. Mark's	298
St. John's	810
Carriacou	1,259

24. 41,418 gallons of rum were manufactured in 1910, being 745 gallons more than in 1909. During the year the Excise Ordinance passed in 1908, on the lines indicated by Mr. J. M. Adams, the special officer sent out from England for that purpose, was brought into operation. The greatly improved system secured by that measure, together with the active measures taken by the present Colonial Treasurer, are producing satisfactory results on the revenue, as has been already mentioned in this report.

25. 157 liquor licences were issued in the year, as compared with 167 in 1909, the revenue from them being £3,182 as against £3,635 in that year. A radical change in the licensing system came into operation on 1st January, 1911, but comment upon it must be reserved for the current year's report.

26. 417 tons of ice were exported by the ice factory in addition to the local consumption; the export is valued at £531. The soap factory continued in active operation, but no return of the amount manufactured is available.

Shipping.

27. The total tonnage inwards and outwards of shipping in the last five years was as follows:—

	Tons.
1906	595,534
1907	513,902
1908	566,245
1909	586,074
1910	590,451

As will be seen, it varies little in volume from year to year. The bulk of it is steam tonnage, 568,902 of the total in 1910 being steamers. The number of small vessels on the local register at end of the year was 85, with 1,217 tons.

LEGISLATION.

28. Nineteen Ordinances were enacted in 1910, the most important of them being, (1) to control more fully the importation and use of firearms, (2) to provide against the spreading of the disease called ankylostomiasis, (3) to make better provision for the sale of intoxicating liquors, and (4) to regulate and control

bakehouses, slaughter-houses, and aërated water factories. The Liquor Licences Ordinance did not commence to operate until 1st January, 1911.

EDUCATION.

29. *Primary.*—The Primary Education law recognises four classes of schools, Industrial, Combined, Lower Division, and Infant. There are as yet no schools of the first class, and the existing schools are 30 Combined, 10 Lower Division, and 6 Infant. Nine of these 46 schools are owned and maintained entirely by the Government; the remainder are Grant-in-Aid Schools, 21 being Roman Catholic, 10 Anglican, 4 Wesleyan, and 2 Church of Scotland. The total expenditure in 1910, was £4,968, of which the Government contribution amounted to £4,920, as the Government practically support the schools. The number on the roll was 9,724, and the average attendance, 4,594.

30. *Secondary.*—A temporary boys' school was maintained during 1910 by the Board of Secondary Education, and a further step towards the new school was taken by the purchase by Government of suitable premises in St. George's, the reconstruction and outfit of which were at once put in hand, and the school has been opened under most favourable conditions in the current year. The girls' school buildings were put into thorough repair, and in the present year arrangements are being completed for its opening in January, 1912.

31. The St. Joseph's Convent School, which receives a Government grant of £100 per annum, continued its satisfactory work in 1910. The daily average attendance was 63, and the total expenditure, £327. The daily average at the temporary boys' school was 25·6.

GOVERNMENT INSTITUTIONS.

32. *Colony Hospital.*—1,031 patients were treated in 1910, as compared with 843 in 1909. Of these 627 were cured, 298 relieved, and 37 died. The daily average was 85, and the cost per patient £19 6*s.* 7*d.* 1,917 patients were attended to in the out-patient department, as compared with 1,575 in 1909.

33. *Yaws Hospital.*—431 cases were treated, as against 421 in 1909, and 360 were discharged cured. The daily average was 70, and the cost per head was £11 8*s.* 1*d.*

34. *St. Andrew's District Hospital.*—The number treated was 174, of whom 144 were cured, and 16 relieved. The daily average was 10·4, and the cost per patient £36 1*s.*, which is nearly twice as much as at the Colony Hospital and about £11 more than at the Carriacou Hospital. 10,326 prescriptions were compounded at the dispensary, and the receipts thereat amounted to £161.

35. *Carriacou District Hospital.*—282 patients were treated, of whom 230 were cured and 28 relieved. The daily average was 23·4, and the cost per patient was £25 1*s.* 9*d.* 4,778 prescriptions were compounded at the dispensary.

36. *Lunatic Asylum.*—The number under treatment during 1910 was 170,—males 85, females 85; and the daily average was 135·23. 31 cases were admitted, all from Grenada, and 11 died; 25 were discharged. The cost per patient was £18 13*s.* 3*d.*

37. *Poor Asylum.*—There is accommodation for 58 inmates, and the daily average in 1910 was 54. There were 30 admissions, 19 deaths, and 12 who left of their own accord; the cost per patient was £10 2*s.* 2¼*d.*

38. *Savings Bank.*—£22,962 was at credit of 1,809 depositors at the end of the year, being an average of £12 13*s.* 10*d.* apiece; ten years ago this average was £8 5*s.* 5*d.* £20,000 of the funds were invested, and this has been increased by £2,000 since the end of the year.

JUDICIAL STATISTICS.

39. *Police.*—Mr. P. A. Ongley, the Chief of Police, retired on pension in March, 1910, and his successor, Major A. E. Capell, D.S.O., assumed his duties in October. The discipline of the force was fairly well maintained, and the 1909 musketry regulations were adopted.

40. *Prisons.*—No convicts were received from St. Lucia or St. Vincent, and there were 306 committals from Grenada, giving a daily average of 49·40, the lowest for eight years. The cost per prisoner was £31 13*s.* 10*d.*, the increase since 1908 being due to the small number in prison; in that year the cost per head was only £19 12*s.* 6*d.* The prison administration is very satisfactory, and discipline well maintained.

41. *Criminal Statistics.*—The Acting Attorney-General reports that "there has been an increase of crime during the year 1910, except in the case of prædial larceny. I am aware, however, of no special cause for this increase, and am of opinion that it indicates no change in the character of the inhabitants of the Colony as a law-abiding people. There were two cases of homicide. One was a murder of a concubine, attended with brutal circumstances. In the other case a woman was convicted of the offence of causing the death of her child by negligence. There were no other cases of importance."

VITAL STATISTICS.

42. According to the usual estimate, based on the natural increase only, the population of the Colony at 31st December, 1910, was 75,254. At the Census taken in the current year the population enumerated was 66,750, so that the loss by emigration, of which no reliable returns have hitherto been available, is very

marked. Steps have been taken to secure adequate returns of the movement of the people in future dating from the Census day in 1911.

43. The birth-rate in 1910 was 34·93 per thousand of the mean estimated population, and the death-rate was 20·02. The death-rate increased from 18·82 in 1909 chiefly on account of an epidemic of whooping-cough, which was responsible for 91 deaths among children.

44. The rainfall for the year was above the average, 94·15 inches being recorded at Richmond Hill, in the south of the Island—the highest previous record there being in 1896, when 99·94 inches were recorded. The principal meteorological statistics for the year are as follows:—

	Inches.
Rainfall:—	
North of Grenada (Sauteurs)	70·14
Centre of Grenada (Grand Etang)... ...	186·88
South of Grenada (Richmond Hill) ...	94·15
Carriacou (for ten months only)	49·89
At Richmond Hill Station:—	
Mean pressure	29·962
Maximum temperature (October)	90°
Minimum temperature (February to April)	69°
Relative humidity, 6 p.m.	77·4
Days of rain	268

POSTAL AND TELEPHONE SERVICES.

44. The Post Office business in 1910 may be summarised as follows:—

Letters and post-cards	551,800
Newspapers, books, &c.	193,085
Parcels	7,802
Registered and insured letters...	12,364
Money and postal orders issued and paid ...	£27,878

45. The use of British postal orders steadily increases, the amount issued and paid in 1910 being £4,627. The "cash on delivery" service with the United Kingdom is also being more and more used.

46. The Grenada emigrants on the Panama Canal Zone remitted through the Post Office £5,932 to the Colony—the returns of the three preceding years being:—

	£
1907	6,235
1908	7,475
1909	6,191

47. The telephone system worked satisfactorily in 1910, and the number of subscribers increased. The revenue of the department was £1,800, and its expenditure (including charges on the loan for the initial cost) was £1,694.

GENERAL REMARKS.

48. The feelings of the loyal inhabitants of the Colony were deeply stirred by the death of His Majesty King Edward VII; and the regret and sorrow displayed by all classes were tempered only by the knowledge that in our present Gracious Sovereign the lamented Monarch had a worthy successor, one too in whom the West Indies take a personal interest, arising from His Majesty's visits to these colonies in his earlier years.

49. Mr. Douglass Alexander, who for more than 18 years had been an honoured unofficial member of the Legislative Council, died in January, and the Council placed on record a suitable expression of the Colony's loss.

50. The Island was visited in March by the Royal Commissioners on Trade Relations between the West Indies and Canada, who duly held their inquiry in public.

51. In July, a committee, under the presidency of Chief Justice Johnstone, was appointed by the Governor to inquire into certain matters connected with the food supply and employment in the Colony. This committee has reported in the current year, and its recommendations are likely to prove of great use to the Government in the future development of the resources of the Colony.

52. At a public meeting on 26th September, presided over by the Governor, it was decided to take steps for the formation of a volunteer force, and the movement has in the current year taken definite shape by the enrolment of a corps in St. George's, which is rapidly improving in efficiency.

53. There is a distinct and wholesome tendency in the Grenada of the present day to take up other lines of industry than cocoa and nutmegs, the exclusive devotion to which in years gone by the writer has constantly inveighed against as opposed to the best interests of the community. It is hoped, by means of the Land Settlement Scheme and other procedure now being initiated, that a large portion of the agricultural lands may be diverted to annual crops and provisions, which are an absolute necessity if the ever-growing population is to be retained in comfort on the soil.

EDWARD DRAYTON,
Colonial Secretary,
Administering the Government.

Grenada,
31st October, 1911.

Ordnance Survey, Southampton, 1911.

ST. VINCENT.

(For Report for 1909–10, *see* No. 668.)

THE ADMINISTRATOR TO THE GOVERNOR.

Government House,
St. Vincent,
31st January, 1912.

SIR,

I HAVE the honour to forward, herewith, for transmission to the Right Honourable the Secretary of State for the Colonies, my report on the Blue Book of the Colony of St. Vincent for the year 1910-11.

2. I regret the delay which has occurred in completing and forwarding this Report, but the reason is to be found in my absence from the Colony on leave (from which I returned this month) and the fact that His Honour the Chief Justice, who acted for me during that period, was, in addition to his other duties, so busy with the revision of the laws of the Colony that he was unable to undertake the compilation of the Annual Report.

I have, &c.,

C. GIDEON MURRAY,
Administrator.

His Excellency
Lieutenant-Colonel Sir James Hayes Sadler, K.C.M.G., C.B.,
&c., &c., &c.,
Grenada.

1910–11	Local ... ... 29,540 Imperial Grant 585	30,125	Local ... ... 29,759 Imperial Grant 584	30,343

The financial year under discussion has in all respects been a more satisfactory one than the previous financial year, 1909-10. Whilst the estimated revenual receipts from local sources when framing the budget for 1910-11 were placed at £28,895, the actual revenue collected was £29,540, showing a surplus on Estimates of £645. The estimated expenditure of £28,878 was, from various causes, increased during the year to £29,759, showing an actual deficit on the year's working of £219. During the year defalcations to the amount of £682 were discovered in the Savings Bank accounts of the Revenue Officer of Georgetown District. As only £100 of this amount was covered by insurance against dishonesty, the Government were compelled to make good the difference, namely, £582. If it had not been for this unfortunate occurrence, instead of a deficit of £219 a surplus of £363 would have been shown. With few exceptions the expenditure was kept within the Estimates and in a number of instances savings were effected. During the year the following were some of the public works undertaken and brought to conclusion:—the construction of landing stages at the small towns of Barrouallie, Bequia, and Calliaqua; the reconstruction of the Police Station and the building of a Rest-Room at Bequia; the construction of a new kitchen to the Agricultural Superintendent's quarters. In addition the construction of a causeway over the Argyle River was commenced and also the reconstruction of the Georgetown Jetty, the latter at a total cost of £1,000, including charges for acquisition of the old remains from the Georgetown Wharf Company.

No changes in taxation took place during the year.

Assets and Liabilities.

The excess of assets on the 31st March, 1910, was £6,843. On the 31st March, 1911, the account showed an excess of £6,524.

In addition to the surplus of £6,524, the sum of £25,000, the unexpended remainder of a fund contributed by private subscription at the time of the eruption of the Soufriere volcano in 1902-3, is invested in Trust Securities, and held as a reserve or insurance fund against any possible future disaster which may result from the violence of the elements.

There are also other funds of lesser importance showing assets to the Colony, some of which are extinguishable by time, while others, like the Graham Bequest Fund, the Alexander Fund, and the Thompson Home Fund are used only in respect of the interest they bear.

Public Debt.

There is no public debt—the last loan instalment having been repaid in May, 1910. There are municipal debts, extinguishable in 1913, amounting in the aggregate to £900 at date of writing, for which, in case of default, the Colony is ultimately responsible, and which constitute a first charge upon its revenues. There is little likelihood, however, of the Colony being called upon to pay any of this sum as the municipalities concerned are well able to bear the interest and repayments involved.

The Colony is similarly responsible for the unpaid balance of the Hurricane Loan to planters from the Imperial Treasury, which was at 31st March, 1911, £10,450, but against which amount, however, there is a Sinking Fund of £2,335. This loan is being steadily redeemed by borrowers at the rate of £750 per annum to the local Government, by whom annual payments are in turn made to the Imperial Treasury.

Currency.

Gold, British and American, notes of the Colonial Bank, and British silver and copper constitute the currency of the Island.

The Government accounts are kept in sterling, and commercial accounts in dollars and cents.

Finances of Municipalities.

The management of the affairs of Kingstown are vested in a Board one-half of the members of which are elected by the rate-payers and the other half nominated by the Government.

The Chairman of the Board is annually elected by the members forming that body, but cannot in any circumstances be elected for more than two years in succession.

The small towns of the Colony, of which there are six, are controlled by wardens appointed annually by the Government.

The following comparative statements give the total revenue and expenditure of these towns during the last five years:—

REVENUE.

Town.	1906.	1907.	1908.	1909.	1910.
	£	£	£	£	£
Kingstown	1,708	1,706	1,695	1,736	1,711
Georgetown	105	108	118	113	142
Chateaubelair	34	34	35	33	35
Calliaqua	35	31	32	32	35
Barrouallie	40	45	38	37	41
Layou	18	19	20	26	21
Bequia	10	9	9	9	10

EXPENDITURE.

Town.	1906.	1907.	1908.	1909.	1910.
	£	£	£	£	£
Kingstown	1,698	1,758	1,790	1,778	1,813
Georgetown	102	108	109	126	151
Chateaubelair	28	28	27	21	31
Calliaqua	52	30	32	27	25
Barrouallie	34	31	41	20	27
Layou	12	9	24	17	13
Bequia	27	2	4	17	1

Debts of Towns.

The debts of the towns at the 31st December, 1910, were as follows:—

	£	£
Kingstown water supply	1,200	
Kingstown town improvement	100	
		1,300
Georgetown water supply		150
		£1,450

Provision for repayment of these loans is made by rates levied annually on the townspeople and the debts are secured on the general revenue of the Colony. They will be extinguished in 1912 and 1913.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports.

Chief Articles.	Value. 1909.	Value. 1910.
Class I.:—	£	£
Beef, salted or cured	381	331
Biscuits	3,467	3,912
Butter	1,745	1,880
Coffee	309	399
Fish, salted, &c.	6,347	5,282
Flour, wheaten	9,487	8,934
Flour, other kinds	559	861
Oilmeal and cake	466	479
Pork, salted or cured	2,132	1,595
Rice	1,969	2,645
Salt	203	296
Spirits	937	972
Sugar, muscovado	378	287
Sugar, refined	667	768
Sugar, crystallized	877	327
Wine	700	750
Food and drink supplies, unenumerated ...	1,259	1,404
Tobacco, cigars, &c.	1,186	1,089
Class II.:—		
Manure	1,059	628
Petroleum oil	2,018	1,834
Timber and shingles	3,507	4,992
Class III.:—		
Textile manufactures, other than rope, cordage, and canvas	16,931	20,832
Metal, manufactured	7,454	6,977
Boots and shoes	1,582	1,215
Cement	1,119	1,134
Rope, cordage, and canvas	739	1,131
Soap	1,551	1,744
Articles unenumerated, other than textiles or metal manufactures	3,400	3,688

EXPORTS.

The values of the principal exports are shown in the annexed table:—

Article.	1909. £	1910. £
Cassava starch	1,109	781
Whale oil	272	164
Turtle shell	515	176
Firewood	472	318
Cotton and cotton seed	23,218	42,094
Vegetables	2,485	1,756
Syrup	1,139	246
Sugar, crystallized	455	2,289
Sugar, muscovado	3,717	1,272
Pease	289	310
Molasses	656	2,076
Rum	160	nil
Ground-nuts	1,480	1,743
Live stock	4,870	5,034
Fresh fruit	48	40
Farine	229	100
Arrowroot	31,792	30,089
Cocoa	4,088	4,132

In the course of his annual report the Supervisor of Customs states as follows:—

"The total value of the imports amounted to £97,737 and the value of exports to £101,180, making the total trade of the Colony for the year £198,917.

"This is a decided increase on the figures for the previous year, imports being £9,927 and exports £12,482 more than for 1909, the total increase being £22,409.

"The import duty collected amounted to £11,955 2*s.* 10*d.*, and the export duty to £766 5*s.* 4*d.*, the total Customs duties for the year being £12,721 8*s.* 2*d.*, as compared with £11,859 received in 1909.

Imports.

"Imports from the United Kingdom amount to £43,254 and are £13,021 in excess of the figures for 1909.

"The value of the imports from British Colonies amounts to £31,688, being £11,338 less than for the previous year.

"Imports from foreign countries amounted to £22,794 in value, or £8,243 more than for 1909. £5,165 of this increase represents increased importations from the United States of America.

"The fact that the values of imports from the United Kingdom and from the United States of America have increased, while those from British Colonies have decreased to almost the same extent is easily accounted for, the explanation being that from 1st January, 1910, the 'country of origin' of goods imported has been furnished when passing goods through the Customs. Prior to that date goods imported from British Colonies were

shown as coming from those Colonies regardless of the 'country of origin.' Under the system now in force the direction of trade is being more accurately shown.

"The following table shows the increases under the various classes, as compared with last year:—

Year.	Class I. Live Animals, Food, &c.	Class II. Raw Materials.	Class III. Manufactured Articles.
	£	£	£
1910	39,916	11,651	46,171
1909	37,999	9,807	40,004
Increase ...	1,917	1,844	6,167

"Under Classes I. and II. the increases have been insignificant.

"Under Class III. Manufactured Articles, the increase has been under 'a. Textile' and 'c. Other Articles.' Under 'b. Metal' there has been a small decrease.

"The following is a list of articles the values of which have increased to an appreciable extent:—

Article.	Increase.
	£
Horses	562
Bread	445
Fish, pickled	621
Flour, other	301
Rice	676
Lumber, white pine	1,874
Shooks, &c.	651
Baling cloth	365
Textiles	3,773
Bank Notes	3,253

"The values of the following articles imported show a decrease during the year:—

Article.	Decrease.
	£
Flour, wheaten	553
Pork, salted	537
Sugar, crystallized	550
Manure	432
Lumber, pitch pine	659
Metal manufactures, unenumerated ...	871
Boots and shoes	367
Furniture	710

"Few of these items call for any comment.

"The increase in value of textiles points to increased circulation of money and a consequent greater purchasing power among all classes.

"Bank notes were principally new notes brought in to replace old ones withdrawn from circulation, and this increase may, therefore, be regarded as a fictitious one to a certain extent.

Exports.

"Exports to the United Kingdom amounted to £63,981, being £17,653 in excess of the figures for 1909.

"To British Colonies, the value of exports amounted to £35,306, or £5,080 less than for the previous year, while the value of exports to foreign countries was £1,893, as compared with £1,980 in 1909.

"The decrease in trade with British Colonies was principally with the West Indies.

"The following table shows the exports for 1909 and 1910 according to Classses:—

Year.	Class I. Live Animals, Food Supplies, &c.	Class II. Raw Materials.	Class III. Manufactured Articles.
	£	£	£
1909	52,212	24,760	11,725
1910	50,063	43,060	8,057

"From the above it will be seen that whilst there have been slight decreases under Classes I. and III. the increase in value of raw materials exported (Class II.) has been considerable

"The principal articles exported under Class I. were:—

	Value. £
Arrowroot	30,089
Cocoa	4,131
Live stock	5,424
Sugar, syrup, and molasses	5,883

"Under Class II. the principal articles of export were:—

	Value. £
Cotton, raw, Sea Island	37,237
Cotton, other	1,171
Cotton seed	3,684

"The values of these articles exported in 1909 were:—

	Value. £
Cotton, raw, Sea Island	20,684
Cotton, other	642
Cotton seed	1,893

"Of a total of £8,057, the value of exports under Class III., £6,530, represents specie sent away from the Colony. £5,930 of this was sent to other West Indian Colonies and £600 to the United Kingdom."

The total imports and exports for the five years 1906-7 to 1910 were:—

Imports.

Classes.	1906–7.	1907–8.	1908.	1909.	1910.
	£	£	£	£	£
I. Live animals, food, drink, &c.	32,000	38,864	41,484	37,999	39,916
II. Raw materials	12,268	11,175	14,168	9,807	11,650
III. Manufactured articles ...	33,740	46,515	58,061	40,004	46,171
Total	78,008	96,554	113,713	87,810	97,737

Exports.

Foreign Countries	695	1,012	2,537	1,984	1,893
Total	83,755	94,265	94,739	88,698	101,180

MANUFACTURES AND FISHERIES.

The Central Cotton Ginnery was established by the Government in the year 1903-4, and is under the management of the Officers of the Imperial Department of Agriculture. This ginnery has been of great assistance in the development of the cotton industry. It is extremely improbable that the industry would without it have reached its present successful state. With a charge of 1*d.* per pound for ginning and baling in 1907-8, the accounts showed a balance in favour of the ginnery of about £600, in 1908-9 this had decreased to £365, while during the year under review the profits amounted to about £480.

The general revenue of the Colony benefits to the extent of £400 per annum from the profits of this institution.

The Agricultural Products Protection Ordinance of 1909, referred to in the Annual Report of last year, is successfully attaining the objects for which it was passed. This Ordinance aims at the suppression of cotton theft from the fields. Bound up in the general scheme of suppression contained in the Ordinance is the compulsory sale of small lots of seed cotton of anything less than 100 lbs. in weight to the Government Central Ginnery. Any amounts up to 4,000 lbs. weight of seed cotton, in the aggregate during one season, may also be sold by anyone to the Government Ginnery. This cotton is bought on a profit-sharing basis, laid down by Regulations made by the Governor in Council. The law, which came into force on the 1st January, 1910, is most popular amongst the small growers of cotton, and has given a tremendous impetus to cultivation of this product by peasants. Owing to its late promulgation the full effect of the law was not felt during the 1909-10 season, but it is pleasing to record that as a start £980 worth of cotton was purchased in this manner from peasants. The season under review showed a large augmentation in this account, slightly over £3,500 worth of cotton being purchased from peasants alone. There are three private ginneries in the Colony, the largest of which is situated in Kingstown and is fitted up with three gins.

About 13 tons of cotton seed were crushed by the disintegrator at the Government Ginnery for the purpose of manuring cotton lands. The price of lint during the year was good, reaching as high for some special bales as 26*d.* per pound. The average sale price was, however, from 17*d.* to 20*d.* for Sea Island cotton, while Marie Galante sold from 6*d.* to 10*d.* a pound.

The export in whale oil has again fallen to low figures, the export value being only £164, as against £272 in 1909-10, and £645 in 1908-9. This would seem to be a dying industry, owing, it is said, to the gradual reduction in the number of whales appearing in these waters. This is much to be deplored, as the islanders who carry on this industry can ill-afford to lose what has been at a certain season of the year one of their most remunerative employments.

Enquiries are at present being conducted into the possibility of creating a sponge industry in the Grenadines. Numerous species

of sponges are to be found there, some of which are said to be of a commercial value. If such an industry could be established the loss of the whaling industry would in a great degree be compensated for.

The turtling industry accounts for an export value of £176 as against £515 in 1909-10 and of £387 in 1908-9.

Agricultural Industries and Agricultural Department.

It is pleasing to record a further increase in the amount of land under cultivation in cotton, as also a slightly improved yield of lint as compared with the two preceding years. So long as the average value of this product remains at 18*d*. per pound of lint it must constitute the staple crop of the Colony, although arrowroot at its present minimum price of 3*d*. per pound should prove a stout competitor for the honourable place. While arrowroot can be grown on any land where cotton is cultivable, on the contrary cotton cannot be raised on all lands where arrowroot can be cultivated, in fact its area of production is limited to the coastal lands. Thus it is unlikely that the one crop will ever be entirely forsaken for the other.

In the St. Vincent Grenadines, notably Union, Canouan, and Mayreau, the common Marie Galante type of cotton is grown. It is cultivated as a perennial, and produces a short, coarse lint valued usually at from 8*d*. to 9*d*. per pound. The exports of this cotton during the past six years amounted in the aggregate to 166,576 lbs. weight, valued at £7,039. In several of the other islets, Bequia, Mustique, Battowia, and Balliceaux, the cultivation of Sea Island cotton has been taken up exclusively, and with very satisfactory results.

The table given below shows the acreage planted in Sea Island cotton together with the yield of lint and the average yield per acre during the past six years.

Crop Year.	Acreage Planted.	Weight of Lint in pounds.	Yield of Lint per acre in pounds.
1905–6	790	137,460	174
1906–7	1,533	286,275	175
1907–8	3,250	432,000	135
1908–9	3,000	372,000	124
1909–10	2,528	356,139	141
1910–11	3,587	561,526	156

The following figures are also interesting and instructive:—

Table showing the Quantity and Value of Cotton exported during the period from 1903-4 *to* 1910.

Year.	Sea Island Cotton.		All Cotton.	
	Weight.	Estimated Value.	Weight.	Estimated Value.
	Lbs.	£	Lbs.	£
1903–4...	Not known	—	43,392	794
1904–5...	77,814	3,890	126,178	4,494
1905–6...	121,174	6,059	138,150	7,674
1906–7...	225,632	16,922	263,036	18,169
1907–8...	388,833	29,162	427,819	30,787
1908	387,178	28,426	420,830	30,048
1909	330,936	20,684	350,186	21,325
1910	493,494	37,238	521,956	38,409

Arrowroot in export value reached a figure of £30,089 as compared with £31,792 in the preceding year. This crop is again becoming a source of attention to growers inside the Colony and of commercial attraction to buyers outside the Colony. The Arrowroot Growers and Exporters Association commenced their operations on the 1st December, 1910, and their method of working would indicate great beneficial results to the industry. In support of this it may be stated that whilst on the 1st December, 1910, the price of ordinary manufacturing arrowroot stood at $1\frac{7}{8}d.$ to $1\frac{15}{16}d.$ per pound, at date of writing the quotation for that article is $3\frac{1}{4}d.$ to $3\frac{1}{2}d.$ per pound. It is also to be noted that stocks on hand are considerably lower than for a number of years gone by. It will be useful here to set out the objects of the Association. They are:—

(*a*) to promote and encourage the arrowroot industry in St. Vincent generally;

(*b*) to administer an Advertisement Fund to be created by means of a small tax of 6*d.* on every barrel of arrowroot exported from the Colony after the 1st December, 1910;

(*c*) to fix a moderate and reasonable minimum gross price, under which no arrowroot will be sold in the United Kingdom.

St. Vincent arrowroot is unrivalled in the manufacture of chocolate and for general starch purposes. The soil and climate of the Colony are apparently more suited to this cultivation than that of any of the other islands except, perhaps, Bermuda. That Colony's production, however, does not exceed one ton per annum.

Apart from that point of view, it is evident that the market for arrowroot is of such a limited nature that St. Vincent will by herself for many years to come be able to fully satisfy all the requirements of it.

Sugar continues to be grown chiefly in the Carib country estates, but the exportation figures indicate no increase in quantity. The only noticeable feature with regard to this crop is the increase in the amount of export of crystallized sugar showing a corresponding decrease in the export of muscovado sugar.

The cultivation of cocoa raises no enthusiasm in St. Vincent, and it seems conclusive that only certain favoured localities and spots are suitable for its growth. The export value figures are practically the same as last year, £4,132 for the year under review as compared with £4,088 in 1909-10.

During the last four months of the year under review there was a marked decrease in the number of deaths amongst stock from anthrax. This is due to the stringent and efficient measures of vaccination and burial of carcases which have been continuously carried out since that disease evinced its presence in the Colony in malignant form. Since the 1st April, 1911, up to the time of writing (ten months) only one case of death from anthrax has been discovered by the Government Veterinary Surgeon and that death took place in July. Thus seven months have elapsed without a single death amongst stock from the dread disease. Human anthrax has been unknown in the Colony for seven years. The time has come when the neighbouring colonies may well agree to recognise St. Vincent as free from the disease and accept stock from here, under certificate from the Government Veterinary Surgeon that they have been exported from a locality non-infected with anthrax and that the forage accompanying such stock has likewise come from a non-infected area. During the year an Ordinance has been passed making provision for compulsory vaccination of stock in areas where the disease may become epizootic.

In the course of his annual report the Agricultural Superintendent remarks as follows:—

"In last year's report it was mentioned that a set of modern agricultural implements had been obtained, and that an experiment had been started with them at Arnos Vale Estate in co-operation with Mr. G. R. Corea. The owner of the estate was so satisfied with the result of the experiment that he obtained a similar set of implements and worked them successfully in his cane and other fields.

"Seven other estates worked one or more modern implements, and an order for a comprehensive set was placed by the owners of another large group of estates. Where the implements were given a fair trial on a proper system the work performed was considered better than that obtained by manual labour, the cost was less, the labour saved.

"There appears no reason why modern implemental tillage should not be generally adopted on estates having suitable land. This would lead to at least a partial solution of the somewhat difficult labour problem."

Land Settlement and Crown Lands.

The sales during the year under the Land Settlement Scheme were 25 in all:—Rural lots, 10; house-spots, 10; and township lots, 5. In addition 51 acres of Crown land were sold out in small lots. Available Crown land consists of mountain lands, which are only suitable for small holdings for growing provisions and native produce.

The revenue from sales and rental of Crown lands was £601, as against £633 in the previous year.

During the year, Union Island, slightly over 2,000 acres, one of the Grenadine Islands, was purchased from the owners for land settlement purposes for a sum of £5,000, defrayed from the Roads and Land Settlement Fund. Survey commenced in June, 1910, and at date of writing has been completed and allotment has commenced. During the year under review, pending survey, the peasants were allowed to rent such lands as they required. The Marie Galante cotton crop obtained was not up to the average owing to adverse weather conditions. Under the able and experienced guidance of Mr. Whitfield Smith, this scheme bids fair to rival in success the Carriacou Land Settlement Scheme (in the neighbouring Colony of Grenada), with which that same officer has been officially connected since its inception.

SHIPPING.

A table of the entries and clearances of steamers and sailing vessels during the years 1909 and 1910, is appended, as also a comparative statement of the total shipping during the last five years. These figures do not include ships of war, of which four British visited the Colony during 1910:—

Sailing Vessels.

III.—LEGISLATION.

Thirteen Ordinances were passed during the year 1910, of which the most important were The Public Health Ordinance and The Arrowroot (New Market Fund) Ordinance. The former is a comprehensive measure making better provision for the safeguarding of the public health than formerly existed, and was much needed. The latter provides for the collection of the small additional tax of 6*d*. per barrel of arrowroot exported from the Colony, which I have referred to above. Unless renewed, and there is every likelihood that it will be, this Ordinance will cease to be in effect on the 1st December, 1912.

Other Ordinances were:—

Explosives and Petroleum.
Telephone.
Appropriation.
Quarantine.
Cruelty to Animals.
Kingstown Board (Amendment).
Land and House Tax (Grenadines).
Census.
Supplementary Appropriation.
Bank Holidays.
Customs Duties.

IV.—EDUCATION.

The results of primary education in 1909-10 and 1910-11 are as follows:—

	1909-10.	1910-11.
Number of schools	27	28
Number on roll	4,620	4,552
Average attendance	2,222	2,260
	£	£
Government Grant-in-aid ...	1,466	1,635

In September, 1908, the secondary school was reopened with a resident master, who is also inspector of primary schools of the

Colony. The necessity for this school was at once apparent by the manner in which the places for pupils were filled. The fees charged are £2 per term for each scholar, except those under ten years of age in the lowest form, for whom the fees are £1 6*s*. 8*d*. per term. But when two or more brothers in forms above the lowest attend there is a reduction made of 6*s*. 8*d*. for the second and 13*s*. 4*d*. for the third.

The attendance at the primary schools continues about the same.

The Agricultural School maintained an average of 15 pupils during the year. Special effort is being made to instruct pupils in the cultivation of cotton and its diseases—very few of the overseers on estates to-day having any technical or expert knowledge of this subject beyond what they have gained by practical experience since the introduction of the Sea Island plant into St. Vincent only seven years ago.

The 15 acres of land attached to the school is all fully worked up in various products, such as cotton, sugar, &c., by the boys themselves, while each pupil is allowed a small piece of ground as a vegetable garden, the produce of which may be disposed for his own benefit.

The small stock farm, which continued to be worked as an adjunct to the school, affords a valuable practical illustration of how stock should be kept and fed.

7.—GOVERNMENT INSTITUTIONS.

During the year there were 761 admissions to the Colonial Hospital, making, with those remaining from the previous year, 820 cases treated, as against a total of 760 in 1909-10.

The daily average was 57, as against 55·8, 60·7, and 55 in the previous three years.

The death-rate was 4·3 of the total cases.

Operations numbered 126 as against 203 in 1909-10.

The Medical Officer is greatly assisted in his work by the presence of an efficient European nurse-matron, selected by the Colonial Nursing Association.

A portion of the old military citadel at Fort Charlotte is set aside for the detention of male lunatics who are violent or manifest destructive tendencies. Other males, as to whom it is judged that they may be so treated with safety, are kept under supervision in the Pauper Asylum, and female lunatics are also detained there. A portion of the wards is partitioned off into cells to provide further and more suitable accommodation for these female cases, some of which are occasionally acute.

As soon as practicable any violent or difficult case is, by arrangement with that Government, sent to Grenada, but sometimes the asylum there has not got the requisite accommodation, and the transfer is delayed.

There were 19 cases under treatment during the year (6 being new admissions), of whom 6 were discharged cured and 1 died.

The total number of St. Vincent lunatics under care in the Grenada Asylum was 25, at a cost of £454 to the Colony.

The number of inmates of the Leper Asylum on the 31st of March, 1910, was 6; during the year there was 1 admission, leaving 7 inmates in the asylum at the end of the year.

Under a new Public Health Ordinance which was passed in 1910, compulsory segregation of pauper lepers is now provided for.

The Colony's paupers are housed in the old military buildings at Fort Charlotte, at a considerable elevation, overlooking the town of Kingstown.

At the commencement of the year under review there were 89 inmates of the asylum, and the admissions and discharges during the year were:—

—	Male.	Female.	Total.
Admissions	22	20	42
Discharged	8	9	17
Died	12	11	23
Total	20	20	40

leaving 91 on the 31st March, 1911.

The total expenditure in 1910-11 was £994 on the pauper and leper asylums, including the cost of lunatics kept locally, as against £953 in 1909-10.

Chronic tertiary syphilis accounts for the vast majority of cases to whom this institution offers asylum for the closing stages of their lives.

Savings Bank.

Appended is a statement of the working of the Savings Bank for the last five years:—

Year.	Number of Depositors at 31st December.	Amount of Deposits.	Amount of Withdrawals.	Balance at credit of Depositors at 31st December (including Interest capitalised).
		£	£	£
1906	907	5,282	5,687	12,095
1907	1,010	7,629	6,757	13,247
1908	1,121	6,693	5,929	14,313
1909	1,063	6,624	7,371	13,869
1910	1,095	8,686	6,877	15,994

The amount due to depositors was distributed thus:—

	At 31st December, 1909.	At 31st December, 1910.
	£	£
Kingstown	12,770	14,152
Georgetown	437	1,121
Chateaubelair ...	662	721
Total ...	£13,869	£15,994

The Government made a profit on the working of the Bank of £127 14*s*.

There was invested of Savings Bank funds at 31st December, 1910, the sum of £13,654.

VI.—JUDICIAL.

The St. Vincent Police Force consists of a chief, a sergeant-major of European birth, and 50 West Indian non-commissioned officers and privates.

They are drilled and have some training in the use of arms, and are supplied with Martini-Enfield rifles.

In addition to ordinary police work they perform duties in connection with excise supervision, district post office work, births and deaths registration, poor relief, and the management of district telephone exchanges. The prison is worked entirely by the police save for the assistance of one warder in charge of gangs outside.

In Kingstown a select number of the force form a fire brigade for the town, receiving supplementary pay for this service from the funds of the Kingstown Board.

Two hundred and eighty-nine persons were committed to prison in the year, of whom 177 were men, 96 women, and 16 juveniles. The daily average was 35·53, as against 38·36 in 1909-10.

The number of cases reported to the police in 1910-11 was 758; of these 77 were for offences against the person, 21 for prædial larceny, 123 for other offences against property, and 537 for other offences. Only 667 of the above cases were brought before a magisterial court.

The total number of persons brought before the magisterial courts was 1,265; of these 356 were for offences against the person, 95 for prædial larceny, 204 for other offences against property, 6 for offences against the Masters and Servants Act, 152 for offences against revenue laws, municipal, road, and other laws relating to the social economy of the Colony, and 452 for other offences. These figures are inclusive of the cases reported by the police.

The total number of convictions in the inferior courts was 865, as against 653 in 1909-10.

These convictions are classed as follows:—

For offences against the person	209
,, malicious injury to property	5
,, prædial larceny	72
,, other offences against property	134
,, offences against Revenue Acts	131
,, offences against the Masters and Servants Acts	1
,, other offences	313
Total	865

The convictions in the Supreme Court were 9 for offences against property and 6 for other offences.

The acquittals were as follows:—

In the Inferior Courts	166
In the Supreme Court	6

VII.—VITAL STATISTICS.

The population at the 1891 census was 41,054. No census was taken in 1901 on account of the expense involved, which the Colony was not in a position to afford. The population on 2nd April, 1911, was 41,877.

The births registered in 1910-11 were 1,661 (831 males and 830 females), as against 1,687 in 1909-10; of these 967, or 58·21 per cent., were illegitimate.

Still-births were 87—32 legitimate and 55 illegitimate, the figures for the previous year being 32 and 56 respectively.

Marriages were 127—a decrease of 34 on last year's figures. The figures are given in the following comparative table of marriages:—

Denomination.	1908–9.	1909–10.	1910–11.
Church of England	105	64	50
Church of Scotland	14	11	9
Wesleyan	68	65	60
Roman Catholic	18	21	7
Plymouth Brethren	—	—	1

The total registered deaths were 835, as against 831 in 1909-10, being 19·93 per 1,000 of the estimated population. The infant mortality (infants under one year, exclusive of still-births) was 208, being 24·91 per cent. of the estimated population. The similar figure in 1909-10 was 191, or 22·98 per cent.

Appended is a table of the causes of death:—

General diseases (includes syphilis, 66, tubercle, 43; tetanus, 19; malarial fevers, 6; dysentery, 19)	197
Diseases of nervous system	23
,, circulatory system	71
,, respiratory system	47
,, digestive system	184
Parasites	54
Age	95
Still-born	87
Other diseases	77
Total	835

In the towns the authorities are realising more and more the importance of stricter sanitation, and are taking steps accordingly. In the villages, however, sanitary matters are still on a most primitive basis, although the Government, through their District Medical Officers, spare no pains to impress upon the population generally the necessity for care in this direction.

The rainfall for the year 1910-11 was 103·22 inches, as against 106·77 inches in 1909-10.

Rain fell on 264 days during the year.

The maximum fall in 24 hours was 4·81 inches on the 5th February.

May was the wettest month, with 15·33 inches. A good deal of damage was done to the roads during that month owing to the heavy rain, while the effect on the cotton crop was also somewhat disastrous.

March was the driest month, with 3·60 inches.

The mean monthly temperature was 77° F. Maximum for the year was 79° F. (in October) and the minimum 75·8° F., which was experienced in April.

Except in August and September, when the atmosphere is uncomfortably hot, although not even in those months insalubrious, the climate may be regarded as most healthy for both Europeans and coloured persons. Malaria is hardly known, while yellow fever has proved itself to be a disease of the past. During the year there was a complete absence of all disease notifiable under the Inter-Colonial Sanitary Convention.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The fortnightly mail service from and to England continued to be performed by the Royal Mail Steam Packet Company. At Trinidad the mails are transferred into the inter-colonial ships, which call weekly at St. Vincent on regular days—one week with outward mails on the way round the islands, and the following week on the way to Trinidad with homeward mails. The service was carried on in a satisfactory manner.

The steamers of the Pickford and Black Line, from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued to run as usual, while occasional calls were made by the steamers of the Direct and Quebec Steamship lines. The East Asiatic line of steamers from Copenhagen viâ London and the Danish West Indies also made occasional calls.

There is an inland postal system by which the Windward District of the Colony is served three times a week, the Leeward District daily, and the Grenadines once a week.

The postal order system continues to grow in popularity, and its extension to the district towns has been accomplished.

The volume of work in the Post Office also continues to expand, which is a sure sign of the upward march of the Colony.

The revenue of the Telephone Department was £523, including £265 transferred to that head on account of the Government installations. The expenditure was £439. The main installation is in Kingstown with branch lines all over the Island. The service is a most useful one.

IX.—GENERAL OBSERVATIONS.

During the year there has been no change in the Administrative Heads of Departments. The Administrator on two occasions paid visits to Grenada to consult the Governor-in-Chief on affairs of the Colony and was absent each time for about seven days. During his absence His Honour W. S. Shaw, Chief Justice, administered the Government.

The Colony's trade continues to expand and evidences of increasing prosperity are visible on every side. In this beautiful island —as in all the other West Indian Islands—material prosperity is dependent solely upon good crops, good prices, and good weather.

There are no manufacturing industries to compensate for any backsliding in any of those important economic constituents. St. Vincent has especially been unfortunate in recent years in finding disfavour with the elements. That she has strong recuperative power is, however, evident, and in this regard and in every sense her soil and climate cannot be too greatly praised.

The inhabitants of an island which produces the best cotton in the world and an unrivalled class of arrowroot can reasonably hope to attain a standard of comfort and prosperity comparable with that obtaining in any other British tropical possession.

A sketch map of the Colony is attached to this Report.

C. GIDEON MURRAY,
Administrator.

31st January, 1912.

Ordnance Survey Office, Soutl

(For Report for 1909, *see* No. 672.)

THE ADMINISTRATOR TO THE GOVERNOR.

Government House,
St. Lucia,
10th February, 1912.

SIR,

I HAVE the honour to forward to Your Excellency, for transmission to the Secretary of State for the Colonies, the Annual Report on the Blue Book of the Colony of St. Lucia for the year 1910.

2. I regret that the preparation of this Report has been somewhat delayed, due to my having been administering the general Government of the Windward Islands during the latter half of last year and to great pressure of work since.

I have, &c.,

EDWARD J. CAMERON,
Administrator.

His Excellency
Lieutenant-Colonel Sir James Hayes Sadler, K.C.M.G., C.B.,
&c., &c., &c.,
Grenada.

(23681—2.) Wt. 29478—571. 1125 & 85. 4/12. D & S. A 2

ANNUAL REPORT FOR THE YEAR 1910.

I.—FINANCIAL.

The following statement gives the details of the revenue for the financial year 1910-11 as compared with the revenue for the preceding year:—

Heads of Revenue.	1910-11. £	s.	d.	1909-10. £	s.	d.
1. Customs	32,162	11	9	31,644	1	3
2. Port, Harbour, &c., Dues	6,171	8	8	5,005	0	3
3. Licences, Excise, &c.—						
(*a*.) Licences—						
Retail Spirit, &c.	1,563	0	0	1,648	0	0
Distillery ...	100	0	0	100	0	0
Animals, Vehicles, and Guns ...	607	0	0	579	17	6
Petroleum, Cocoa, Boat, &c. ...	532	15	11	535	14	7
(*b*.) Excise—						
Duty on Rum ...	11,589	19	7	12,293	7	11
(*c*.) Road Tax	867	10	2	2,003	5	8
(*d*.) Stamp Duty—						
Various Revenue Services ...	480	13	7	441	7	5
(*e*.) Fines and forfeitures of Courts	356	9	6	—		
(*f*.) Revenue seizures and penalties ...	10	15	8	—		
(*g*.) Income Tax ...	832	9	2	—		
4. Fees of Court or Office, &c.	3,941	15	8	4,158	13	1
5. Post Office	1,304	7	0	1,195	8	5
6. Telephone	787	5	4	784	18	1
7. Rent of Government Property	810	9	6	797	12	0
8. Miscellaneous	115	5	6	1,008	13	1
9. Interest	1,411	15	2	1,399	16	5
10. Repayment of Loans ...	175	10	0	175	10	0
	£63,821	2	2	63,771	5	8
11. Part proceeds of Sales of Reclaimed Lands ...	—			119	18	2
12. Land Sales	745	0	3	1,348	15	1
Total Local Revenue	£64,566	2	5	65,239	18	11
13. Imperial Dept. of Agriculture—						
Grant-in-aid ...	500	0	0	500	0	0
Total Revenue	£65,066	2	5	65,739	18	11

The revenue for 1910-11 was less by £673 16*s*. 6*d*. than that for 1909-10, and was also £321 15*s* 2*d*. below the Estimate for the

year. The principal decreases occurred under Head 3, where the receipts from Excise—Duty on Rum, were £703 less than in the previous year, and those from Road Tax £1,136 less; under Head 8, where the decrease was £893; and under Head 12, where the decrease amounted to £604. As regards the decrease in the revenue from the duty on rum, a decrease which has continued during the past three years, the Treasurer states in his annual report that "besides an increase of the local price of rum in 1908 there is the fall in price of local products, and to these two contributory causes may be added emigration: in fact, there is less money to buy rum and fewer people to drink it."

The reduction in the revenue from Road Tax is due to the fact that the law imposing it was repealed by the Income Tax Ordinance No. 9 of 1910, and only one half-yearly payment was made instead of two as usual. Under the new Income Tax law the receipts within the year were £832, and if, for purpose of comparison, this sum be added to the amount received on account of Road Tax, the net decrease is shown to be only £304.

Under Head 8, Miscellaneous, the reduction in revenue is only apparent, and is due, partly, to rearrangement of the revenue estimate and partly to the fact that the value of certain public works stores was credited to this head in the previous year on the opening of an Unallocated Stores Account.

It may be useful to point out that the decrease, under Head 4, of Fees of Court, &c., is also only an apparent decrease and due, in a large measure, to the readjusting of the revenue heads of duties and fees received in stamps or cash by the Registrar, Sheriff, &c., the difference being accounted for under the sub-head Fines and Forfeitures of Courts.

The increases shown by the table call for no special comment, but it may be remarked that those under Head 2, Port, Harbour, &c., were due to continued activity in the coaling trade, while the increase under Head 5, Post Office, is accounted for by larger general sale of stamps.

The total revenue for the last five years, distinguishing the receipts from local sources from those from the Imperial Grant-in-Aid of Agriculture, has been as shown below:—

		£	s.	d.	£	s.	d.
1906-7.	Local	59,169	1	7			
	Imperial Grant ...	843	0	0			
					60,012	1	7
1907-8.	Local	66,636	1	1			
	Imperial Grant ...	715	0	0			
					67,351	1	1
1908-9.	Local	65,194	0	7			
	Imperial Grant ...	500	0	0			
					65,694	0	7
1909-10.	Local	65,239	18	11			
	Imperial Grant ...	500	0	0			
					65,739	18	11
1910-11.	Local	64,566	2	5			
	Imperial Grant ...	500	0	0			
					65,066	2	5

The number of licences for the sale of intoxicating liquor, issued during the year ended the 31st March, 1911, as well as the revenue derived therefrom, is shown below:—

Description of Licence.	No. issued during quarter ended on				Revenue.		
	30th June, 1910.	30th September, 1910.	31st December, 1910.	31st March, 1911.	£	s.	d.
Wholesale Liquor ...	3	2	2	2	45	0	0
Retail Spirit	42	42	41	41	1,378	0	0
Bottle	2	2	2	2	80	0	0
Refreshment House ...	2	2	2	2	60	0	0
Hotel	1	1	1	1	6	0	0
Occasional	1	—	—	1	1	5	0
					1,570	5	0

The expenditure of the year 1910-11, under the Heads of the Estimates, compared with that of the preceding year, was as follows:—

Heads of Expenditure.	1910-11. £	s.	d.	1909-10. £	s.	d.
1. Charges on account of Public Debt	9,398	15	2	9,390	12	6
2. Pensions	2,249	10	3	2,059	4	5
3. The Governor	2,276	5	7	3,137	5	10
4. Government Office ...	1,061	15	3			
5. Treasury, Customs, and Inland Revenue Department	4,803	18	9	4,636	10	8
6. Post Office	1,976	13	10	1,955	0	0

13. Medical Department ...	3,203	15	6	3,505	17	11
14. Sanitation and Hygiene...	137	9	1	—		
15. Hospitals and Asylums ...	3,301	2	2	3,437	18	4
16. Charitable	514	3	7	572	12	10
17. Education	5,042	17	7	5,094	10	6
18. Ecclesiastical	1,600	0	0	1,600	0	0
19. Agriculture	861	1	5	1,114	0	9
20. Miscellaneous Services ...	2,650	3	0	2,416	12	9
21. Colonial Engineer's Department	3,025	4	8	3,001	10	2

Heads of Expenditure.	1910-11. £	s.	d.	1909-10. £	s.	d.
22. Public Works Recurrent	7,529	6	6	7,237	1	11
23. Public Works Extraordinary	5,030	15	3	2,322	6	0
Total Local Expenditure	66,903	2	9	64,048	1	9
19a. Agriculture (from Imperial funds)	385	1	11	398	3	11
Total Expenditure ...	£67,288	4	8	64,446	5	8

The Estimates of 1911-12 contemplated an excess, to be met from the surplus funds of the Colony, of expenditure over revenue of £2,254 9*s.* 3*d.*, the excess being accounted for, chiefly, by the provision of £1,800 towards the cost of the new lunatic asylum at La Toc, and the provision of an instalment of the estimated cost of £800 of the bridge over the Troumassee River. During the course of the year, however, it was found necessary to proceed more rapidly with the construction of the lunatic asylum and the expenditure on the work amounted to £2,492. In addition, a further sum of £482 had to be spent on the repair of roads which were damaged by the excessive rains in February, 1911.

The actual excess of expenditure over revenue came to £2,222, but would have been much greater were it not that it was found possible to effect savings on other services for which provision had been made under the heads of Public Works.

As a result of the year's transactions the Colony's surplus was reduced by £2,337 0*s.* 4*d.* to £25,014 16*s.* 9*d.* at the 31st March, 1911. The Public Buildings Insurance Fund at the same date stood at £3,895 1*s.* 4*d.*, making a total surplus of £28,909 18*s.* 1*d.*, of which £24,685 12*s* 0*d.* is invested in securities in England, and £1,500 is on deposit in the local branch of the Colonial Bank.

The following figures show the expenditure of the Colony for the last completed five years, both on account of local expenditure and from the Imperial Grant-in-Aid of Agriculture:—

		£	s.	d.	£	s.	d.
1906-7.	Local	59,567	15	6			
	Imperial Grant ...	726	3	4			
					60,293	18	10
1907-8.	Local	64,152	3	11			
	Imperial Grant ...	687	11	7			
					64,839	15	6
1908-9.	Local	64,433	14	4			
	Imperial Grant ...	604	3	10			
					65,037	18	2
1909-10.	Local	64,048	1	9			
	Imperial Grant ...	398	3	11			
					64,446	5	8

		£	s.	d.	£	s.	d.
1910-11.	Local	66,903	2	9			
	Imperial Grant ...	385	1	11			
					67,288	4	8

The Public Debt at the 31st March, 1911, amounted to £146,929 11*s.* 0*d.*, apportioned as follows:—

	£	s.	d.	£	s.	d.
Colony's share—						
Castries Harbour Loan	50,850	0	0			
Central Factory ...	8,000	0	0			
Public Works	50,579	11	0			
Water-Works	12,000	0	0			
Immigration	8,500	0	0	129,929	11	0
Castries Town Board's share				17,000	0	0
				£146,929	11	0

In addition to the £17,000, the Castries Town Board is also responsible for a further sum of £550, being a portion of the £50,579 11*s.* 0*d.* loan for public works which was allotted to it.

The invested accumulated sinking fund for the redemption of the loans amounts to £17,718 0*s.* 10*d.*, making the net liability £129,211 10*s.* 2*d.*

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper.

Accounts are kept in sterling by the Government, and in dollars and cents. in commercial accounts, the dollar being equal to 4*s.* 2*d.*

Finances of Municipalities.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates and dues, market dues and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

The following statement shows the revenue and expenditure for the last five years of the towns and villages, the amount of their indebtedness at the 31st March, 1911, and the balance standing to their credit at the same date:—

Town or Village.	1906-7.		1907-8.		1908-9.		1909-10.		1910-11.		Indebtedness at 31st March, 1911.	Credit Balance at 31st March, 1911.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports.

The following statement shows the value of the principal items of import during the years 1910 and 1909:—

	1910.	1909.
Class I.—	£	£
Ale and beer	962	1,019
Bacon and hams	640	736
Beans and pease	1,062	1,155
Biscuits, common and fancy... ...	1,548	1,444
Butter	1,934	2,057
Cattle	1,698	2,162
Cheese	546	700
Coffee	1,748	1,474
Confectionery	640	971
Corn, maize, and cornmeal	956	930
Fish, all kinds	11,799	8,823
Flour, wheaten	20,638	19,657
Fruit and vegetables	1,359	1,513
Lard and its compounds	1,580	1,308
Meat: salted, pickled, and preserved	3,128	3,180
Oats	1,000	1,500
Oleomargarine	2,419	2,478
Oils:		
Cotton Seed	5,089	3,832
Lard	773	1,018
Preserves	805	769
Rice	3,009	2,479
Sugar	545	489
Tobacco:		
Cigars and cigarettes	897	731
Manufactured	1,470	1,576
Unmanufactured	1,074	1,239

	1910.	1909.
Class I.—	£	£
Whisky	1,383	1,295
Wines, all kinds	2,138	2,766
Class II.—		
Coal	100,168	100,112
Oil, petroleum	1,784	1,971
Oil, paint and engine	525	366
Patent Fuel	1,145	408
Pitch Pine	2,863	1,546
White Pine	1,065	748
Class III.—		
Bags	1,347	1,376
Boots and shoes	4,789	4,783
Candles, tallow and sperm	529	763
Cement	1,321	687
Chemicals and acids	672	1,064
Chinaware, earthenware, &c. ...	847	856
Clothing	1,742	568
Cottons and woollens	24,668	26,497
Furniture	1,171	2,415
Glassware and glass bottles	1,221	1,399
Haberdashery	5,342	6,395
Hardware	4,032	4,302
Hats and bonnets	1,708	2,241
Implements, agricultural	367	1,472
Iron, galvanised	1,196	2,118
Machinery	10,545	2,100
Manure	6,634	4,807
Medicines	2,137	2,125
Paints, dyes and varnishes	709	660
Paper, all kinds	788	530
Perfumery, &c.	699	849
Rope and cordage, including twine...	856	975
Saddlery and harness	508	595
Silks and satins	723	538
Soap, common	2,624	2,330
Stationery	925	1,013
Tinware	698	303

The total value of the imports in 1910 was £277,208, an increase of £10,980 as compared with the previous year. There were no such changes or variations as to call for special comment.

From the 1st January, 1910, importers were required to state on the bills of entry the country of origin of goods imported. While the statements thus obtained cannot be regarded as absolutely correct, they nevertheless enable the value of the Colony's trade with other places to be more accurately gauged than has been possible in the past. The following comparative table of the imports, arranged by classes, may therefore be of interest:—

Class I.—Food, Drink, Tobacco, and Live Animals for Food.

		1909. £	1910. £
United Kingdom ...	...	9,491	6,897
British Possessions	...	20,926	22,863
Foreign Countries	...	40,620	44,428
		£71,037	£74,188

Class II.—Raw Materials and Articles mainly Unmanufactured

		1909. £	1910. £
United Kingdom ...	...	17,080	1,650
British Possessions	...	1,099	607
Foreign Countries	...	87,831	106,008
		£106,010	£108,265

Class III.—Articles wholly or mainly Manufactured.

		1909. £	1910. £
United Kingdom ...	...	57,915	68,201
British Possessions	...	7,062	4,059
Foreign Countries	...	16,388	15,803
		£81,365	£88,063

Class IV.—Miscellaneous and Unclassified (including Parcel Post).

		1909. £	1910. £
United Kingdom ...	...	305	—
British Possessions	...	453	470
Foreign Countries	...	668	447
Parcel Post ...	...	2,890	2,977
		£4,316	£3,894

Class V.—Bullion and Specie.

		1909. £	1910. £
United Kingdom ...	...	300	2,800
British Possessions	...	3,200	—
		£3,500	£2,800

The differences between the years 1909 and 1910 in the imports from the United Kingdom, shown under Class II.—Raw Materials, are explained by the fact that in the former year 11,570 tons of coal, valued at £16,291, were included. The increase under this head of £18,177 in 1910 of imports from Foreign Countries, is also due to coal, more of that commodity having been imported from the United States of America.

The increase under Class III.—Articles wholly or mainly manufactured, shown in the imports from the United Kingdom, is partly due to the new form of entry, but principally to increased importations of machinery (£8,592), woollens (£600), boots and shoes (£300), and clothing (£1,074). Decreases occurred, however, in haberdashery (£735), and in hats and bonnets (£378).

Excluding importations by parcel post in both years, the following figures give the proportion, compared with 1909, of the total imports from the—

	1910. Percentage.	1909. Percentage.
United Kingdom ...	... 29·99	32·4
British Possessions	... 10·26	12·6
Foreign Countries	... 59·75	55·0

In both years bunker coal accounted for 69 per cent. of the importations from foreign countries.

The following table exhibits the value of the imports of the Colony for the last five calendar years:—

	£
1906	242,470
1907	310,309
1908	289,775
1909	266,228
1910	277,208

EXPORTS.

The value of the exports during 1910 was £238,955. Of this amount, £116,307 was the value of domestic produce; £116,861 that of bunker coal; and the balance, £5,987, represented the value of exports which were the produce or manufactures of other places than St. Lucia.

Of the domestic products exported, 92 per cent. is represented by sugar and cocoa, valued respectively at £65,747 and £40,935. The principal articles of export in 1910, compared with those of 1909, were as follows:—

	1910. £	1909. £
Class I.—		
Cocoa	40,937	54,275
Fruit, all kinds	800	1,151
Honey	402	479
Lime juice	320	297
Rum	391	2,324
Sugar:		
Usine	64,988	59,628
Muscovado	760	1,140
Molasses	1,914	1,104

Class II.—	1910. £	1909. £
Cotton, raw	1,302	432
Fuel, wood	682	651
Hides and skins	926	962
Logwood	926	384
Pimento logs, &c.	546	489

The decrease in the export of cocoa is more apparent than real, the fact being that the figures for 1909 included a considerable amount of the crop of the previous year.

As regards the decrease in the value of the export of rum, it has to be noted that in 1909 the experiment was tried of shipping rum to Canada, and that in 1910 this was found unprofitable owing to the low prices obtainable; less rum has since been manufactured both for this and other reasons.

The direction of the export trade in domestic products during the last two years is shown below:—

	1910. Percentage.	1909. Percentage.
To United Kingdom	69·0	66·4
British Colonies	12·0	10·4
Foreign Countries ...	19·0	23·2

The value of the total exports of the Colony during the last five years was as follows:

	£
1906	220,313
1907	264,401
1908	252,668
1909	250,674
1910	238,955

One of the outstanding results of requiring importers to state on bills of entry the country in which goods originated is the large apparent increase in the value of imports from Canada, which totalled £14,798 as compared with £6,321 in the previous year. And the value of the total trade, *i.e.*, the value of domestic products interchanged between Canada and St. Lucia, showed a corresponding increase, the figures for 1909 being £15,449, rising in 1910 to £26,258.

Coaling Trade.

The satisfactory conditions which characterized the coaling business in 1909 were maintained in 1910, as shown by the figures hereunder of the quantity and value of the coal shipped during the last five years:—

Year.	Tons.	£
1906	86,733	105,696
1907	118,503	142,381
1908	85,460	102,288
1909	96,462	115,754
1910	97,384	116,861

This business affords steady and remunerative employment to a large number of carriers, both male and female, by whom the ships are discharged and loaded.

Mines, Manufactures, and Fisheries.

The sulphur deposits at Ventine, in the Soufrière District, were worked, but the quantity obtained was so small that none was exported during the year. In 1909 29½ tons were exported, the largest amount for some years. As has been stated in previous reports, it is very improbable that the industry will ever become important.

The sugar factories at Cul-de-Sac, Roseau, Vieux Fort, and Dennery, and the distilleries at Cul-de-Sac and Troumassee were all working during the year. The following figures show the quantities of rum distilled, consumed, and exported during the last five years:—

Year.	Distilled.	Consumed.	Exported.
	Galls.	Galls.	Galls.
1906	49,553	46,950	6,319
1907	57,213	51,453	3,652
1908	83,532	51,216	23,440
1909	72,633	46,949	27,883
1910	49,256	42,456	4,692

Reference has already been made to the cause which led to the decrease in the export of rum during the year under review.

Fishing is carried on around the coasts of the island, but the quantity caught is not more than sufficient to supply the local demand; hence, there is little scope for the establishment of an industry in canning and preserving.

Agricultural Industries.

The principal products of the Colony are sugar and cocoa, but as there are no reliable statistics available of the area of each under cultivation, the value of the industries can be estimated only by the quantities exported. The quantity and value of these exports during the last five years were as follows:—

Year.	Cocoa.		Sugar: Usine.		Other sugar, Muscovado, and products thereof.
	Quantity.	Value.	Quantity.	Value.	
	Bags of 200 lb.	£	Tons.	£	£
1906	7,896	41,538	5,441	51,690	1,444
1907	8,598	47,292	5,302	53,020	1,432
1908	6,775	30,488	4,881	53,691	2,813
1909	10,850	54,275	5,360	59,623	2,265
1910	8,187	40,935	5,199	64,988	2,674

The quantity of cocoa produced from year to year does not exhibit that rapidity of increase that might be reasonably expected from the area of land to be seen employed in its cultivation, and it is more than probable that this is owing to the lack of attention bestowed by the small growers on their cocoa plots and to their ignorance, despite the efforts made by the officers of the Agricultural Department to teach them, of proper cultural methods. The following summary of figures recently prepared by the Agricultural Superintendent shows that it has taken twenty years for the quantity of cocoa exported to double itself.

Quinquennial periods.	Annual average export. (Bags of 200 lb.)
1891-1895	4,581
1896-1900	5,070
1901-1905	7,094
1906-1910	9,434

The production of lime juice is steadily increasing, the value of the export in 1910 being £320, the value in 1909 and 1908 being, respectively, £297 and £126. Honey did not do quite so well, the figures being, for 1910 £402, and for 1909 £479. Cotton, on the contrary, showed a remarkable increase, the value of the output being declared at £1,302, as compared with £432 in the year previous. The cotton industry is one, however, which, for various reasons, does not find favour in the planting community, and that this is so is borne out by the fact that cotton cultivation is being largely given up by those who were engaged in it during the year under report.

The expenditure in connection with the Botanic Station and special agricultural services amounted to £638 15*s.* 1*d.*, of which £385 1*s.* 11*d.* was paid from the Imperial grant-in-aid. Receipts from the sale of plants, seeds, &c., amounted to £30 18*s.* 3*d.*

The number of plants distributed by the Agricultural Department during the year amounted to 54,929, the major portion consisting of limes and canes, being raised in the nurseries at the Union Experimental Station.

The average number of pupils maintained at the Agricultural School at Union during 1910-11 was 8·5, the same average for the previous year being 18. The decrease is due to the discontinuance of the system, commenced in 1901, of boarding and lodging pupils at the station; a more detailed account of this change will be given in the next annual report. The expenditure on the school in 1910-11, exclusive of the emoluments of the officer-in-charge, which appear under the expenditure on the Botanic Station, was £507 8*s.* 3*d.* The receipts from the sale of plants, produce, and live-stock were £148 11*s.* 11*d.*, and the value of the ground provisions, &c., used at the school was £25 11*s.* 3*d.*

The number of applications for the purchase of Crown Lands, received in 1910, numbered 72, the acreage of which was 692, as compared with 121 applications for 1,609 acres in 1909. But the applications in the latter year included two applications in

respect of 407 acres, and three in respect of 200 acres. Surveys to the number of 87 were executed during the year, of which 55 were re-surveys, and the total alienations amounted to 1,042 acres; 24 Crown grants were issued, and 57 remained unissued at the close of the year. Economic plants, comprising coffee, cocoa, limes, nutmegs, cinnamon, &c., were distributed to Crown Lands purchasers, free of cost, to the number of 5,406, more than double the number issued in the year previous.

The Crown traces, Colombette to Canaries, Esperance to La Borne, and Ravine Soufre were completed during the year; the Raillon trace, which leaves the main road between Dennery and Micoud at the crossing of the Praslin River and extends upwards and along the southern side of the valley of that name for a distance of nearly $4\frac{3}{4}$ miles, was begun, and considerable progress made with its construction.

Shipping.

The number of steam and sailing vessels that entered and cleared at Port Castries was precisely the same as in 1907, which was the highest ever recorded in the Colony. The number of steam vessels entered and cleared in the latter year was 45 above the number in 1910, but the tonnage in 1910 was 165,414 in excess of 1907, and is the highest on record. The port was also visited by seven ships of war and two yachts.

A new lighthouse with a powerful light is being erected at Moule-a-Chique, the southerly extremity of the island, for the greater convenience of shipping coming from that direction.

The outlook in regard to the trade of the port generally is encouraging. Notwithstanding the increasing competition in the neighbouring Colonies the coaling trade is gradually extending, owing to the facilities afforded by the wharves for rapid bunkering and watering.

The tables hereunder summarise the statistics relating to shipping for the last five years:—

Vessels Entered.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
1906 ...	534	931,449	246	7,310	83	124,024	38	3,749
1907 ...	615	1,169,037	215	7,683	101	136,920	30	2,089
1908 ...	487	957,866	203	7,340	90	126,337	38	2 267
1909 ...	518	1,027,837	201	6,003	127	220,961	45	2,731
1910 ...	557	1,143,092	228	7,437	135	241,808	40	2,712

VESSELS CLEARED.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
1906 ...	534	931,449	252	7,541	84	125,965	37	3,696
1907 ...	614	1,166,991	216	7,606	100	134,803	30	2,089
1908 ...	487	958,607	201	7,387	89	124,520	38	2,267
1909 ...	517	1,025,251	197	5,574	129	224,895	44	2,662
1910 ...	559	1,146,983	228	7,928	134	239,687	40	2,712

Castries is also a port of registry, and at the close of the year there were 13 vessels, with a tonnage of 616, on the register.

III.—LEGISLATION.

During the year 1910 eleven Ordinances were passed, the most important measure being the Income Tax Ordinance.

IV.—EDUCATION.

The following figures relating to primary education in 1909 and 1910 have been furnished by the Inspector of Schools:—

	1909.	1910.
Number of Schools	57	53
Number on Rolls	7,674	7,259
Average attendance	4,866	4,625
Number examined	6,629	6,745
Government Grant-in-Aid ...	£3,862	£3,942

The number of schools open at the close of the year was 53 (as compared with 57 in 1909), of which 50 were Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 of the East Indian Mission. In connection with the decreases shown by the figures, it may be well that it should be pointed out that there is no relation between the decrease in the number of schools and the decrease in average attendance. The districts in which the number of schools has been reduced through the amalgamation of boys' and girls' schools, or by the absorbing of small country schools into their neighbours, are among those in which the attendance has kept up best. The heaviest losses occurred in those districts where large numbers of children have to go to school from scattered hamlets with, very often, several unbridged rivers to cross. The exceptionally heavy and prolonged rains of 1910 ending, as they did, with floods, in

which ten persons, among whom were five school children, lost their lives, account chiefly for the decrease in the attendance.

During the year the third annual examination in agriculture of those schools possessing school-gardens was carried out by the schoolmaster attached to the Agricultural School at Union. The schools so examined numbered eighteen, and the Agricultural Superintendent, in forwarding the examiner's report, states:—"Although there is ample room for improvement in the methods now adopted for training the children to acquire a taste for nature-study in relation to plants and the soil, the work of the past three years is distinctly encouraging, and the results of the year's work under review indicate that some advancement has been made, and that the managers and teachers are taking an interest in this important branch of work in the juvenile schools."

There are two schools of secondary education—the St. Mary's College for boys, which receives a Government grant of £400 per annum, and the St. Joseph's Convent School for girls, which receives a grant of £150. At the Cambridge Local Examination held in December, 1910, all of the 18 candidates presented by the College succeeded in passing. From the St. Joseph's Convent School 13 candidates were presented for the examination of the College of Preceptors held in December and all passed.

V.—GOVERNMENT INSTITUTIONS.

The following statement tabulates, in respect of the year 1910, the principal statistics relating to the hospitals and asylums:—

Institution.	No. of patients at beginning of year.	No. admitted during the year.	Daily average.	Patients discharged.			No. of deaths.
				Cured.	Relieved.	Not improved.	
Victoria Hospital, Castries.	69	1,107	68·66	576	413	24	103
Soufrière Hospital ...	4	56	3·4	36	16	—	5
Vieux Fort " ...	2	16	3·0	9	2	—	4
Dennery " ...	3	37	2·0	32	3	1	4
Yaws " ...	51	85	49·55	86	5	—	5
Poor Asylum	65	74	63·28	—	48	—	29
Lunatic Asylum ...	11	20	16·16	2	—	—	5

There were 126 operations performed at the Victoria Hospital; the death-rate, calculated on the number of cases admitted and treated and exclusive of still- and premature-births, was 8·75 per cent. The total cost of the institution, exclusive of the cost of medicines, was £1,453; and receipts for treatment of paying patients totalled £116 17*s*.

The construction of the new lunatic asylum at La Toc, in the Castries district, was not completed during the year and, in

addition to the lunatics in the asylum at Soufrière, there were at the end of the year 33 lunatics from this Colony confined in the Grenada Asylum.

At the dispensaries, of which there is one in each town and village and at certain populous centres, 10,843 persons received attention from the visiting medical officers. The number of persons treated in 1909 was 13,716, and the marked decrease in 1910 may, to some extent, reasonably be put down to the anti-malarial measures adopted in the year under report, to which reference is made below.

Anti-Malarial Measures.

The year 1910 witnessed the first comprehensive attempt in the Colony to combat the malaria problem by means of the free distribution of quinine by the Government.

From time to time, commencing in 1902, the Government had made and enforced regulations having for their object the suppression of the breeding-places of mosquitoes, and special instructions with this view were issued to the Medical Officers and Inspectors of Nuisances throughout the Colony. The regulations required, *inter alia*, that all tanks, jars, or other water receptacles should be screened to prevent access thereto by mosquitoes; the filling up of wells; the removal of broken articles likely to form receptacles for water; and the filling up of depressions in the grounds attached to houses, so as to prevent the collection of water. House-to-house visits were paid by the Inspectors, and persons found contravening the regulations were first warned, and if the nuisances were not abated they were summoned before the Courts.

In March, 1910, a circular was issued to all employers of labour and to the clergy inviting their assistance in an anti-malaria campaign by distributing the quinine which would be furnished by the Government, and stating the lines upon which it was proposed to work; the response to the circular showed that those addressed were alive to the necessity of the measures proposed and their readiness to give the required assistance. A sum of £100 having been placed on the Estimates for 1910-11 for "Quinine prophylaxis," a large quantity of quinine was imported from England, as well as a quantity of chocolate tablets containing tannate of quinine for distribution to the schools.

Dr. L. Nicholls, the Medical Officer of the No. 1 B. District, was placed in charge of the details of the scheme, and in May he engaged a native as a "moustiquier" and quinine distributor. On the arrival of the quinine, stock-bottles of the crude solution were prepared and labelled with printed, concise, and clear directions as to dosage, &c. These bottles were then distributed throughout the Colony—to employers of labour, the clergy, the police stations, and to all persons who would undertake to give out the medicine. The quinine tabloids were distributed to the schools in the Castries and Anse la Raye districts, the latter district being probably the greatest "fever" hotbed in the Colony, simple directions being issued to the school teachers with regard to the manner in which the tabloids were to be given.

Dr. Nicholls states that "judging by the continual return to him of the bottles to be refilled, it (the quinine distribution) has been a marked success"; and he also states that he finds in many cases that the parents of school children send requests for tabloids when the children have "fever." It is, perhaps, too soon to gauge accurately the effect of the quinine distribution, but the medical officers are almost unanimous in stating that they have noticed an appreciable decrease in the number of cases of malaria presenting themselves for treatment.

In the meantime Dr. Nicholls had been at work in searching for anopheline breeding-places, and supervising the distribution and establishment of the fish known as "Millions," the natural enemies of the mosquito larvæ, and the cleaning of rivers and ravines. The moustiquier was shown the distinguishing features of the anopheline and other mosquito larvæ, and was then sent round the country to search for them; notes were kept of the places in which they were found, and these were then sent to Dr. Nicholls, who afterwards visited all the principal places. The moustiquier would then go round and stock each place with the "Millions" fish, which were carried in an ordinary live-bait can, all the more accessible places being revisited at intervals of a fortnight. In many places throughout the island these little fish are now permanently established, and it is hoped by their means to appreciably reduce the number of malaria-carrying mosquitoes.

Out-door relief of paupers is administered through the agency of the Police Department, the police officer in charge of each district being the relieving officer. The number of persons receiving relief at the close of the year was 197, a slight decrease on the number of the previous year. The total expenditure on relief, including the burial of paupers, amounted to £543 16*s.* 1*d.*

The Police Department is also charged with the duty of enforcing the regulations of the Board of Health, and the officers assigned to this duty were regularly engaged on inspection work throughout the year. House-to-house visits were periodically made, a record of the inspections being kept at headquarters and a monthly report from all stations submitted for the information of the Government. For breaches of the sanitary regulations, 37 persons were prosecuted in the First district, 15 in the Second district, and 11 in the Third District.

The principal office of the Savings Bank is at the Treasury, in Castries, with five district banks in different parts of the island. The following statement summarises the transactions of the bank for the last five years:—

Year.	Number of accounts open 31st December.	Total deposits inclusive of interest.			Total withdrawals.			Amount on deposit on 31st December.		
		£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
1906	1,584	13,750	12	6	13,397	7	1	14,727	5	4
1907	1,639	15,526	2	0	12,561	9	10	17,691	17	6
1908	1,653	15,411	9	0	14,028	6	11	19,074	19	7
1909	1,685	13,411	12	0	14,902	6	3	17,584	5	4
1910	1,693	12,742	7	8	11,538	18	0	18,787	15	0

The amount due to depositors on 31st December, 1910, was, as shown by the table, £18,787, an increase of £1,203, as compared with the same figures for 1909, and represents an increase of 6·8 per cent., as compared with a decrease of 7·8 per cent. in the previous year. The Working Account of the Bank showed a profit on the year's transactions of £92 17*s.* 6*d.*, after the sum of £474 12*s.* 10*d.* on account of interest had been placed to the credit of the depositors. The face value of the investments on account of the Bank was £18,203.

There was a further increase in the number of registered Friendly Societies, the total being 21 on the 31st December, as compared with 17 on the same date in the previous year. The consequent increase in membership was 24, the numbers at the close of 1910 and 1909 being, respectively, 2,340 and 2,316; the former total was made up of 1,033 males and 1,307 females.

The total receipts of the Societies amounted to £2,684 2*s.* 2*d.*, and the disbursements to £2,423 16*s.*, the balance at the close of the year being £2,468 10*s.* 1*d.*, a considerable increase on the balance remaining at the end of the year 1909, which figured as £2,071 0*s.* 6*d.* The working expenses amounted to £1,012 5*s.*, equal to 41·8 per cent. of the total disbursements.

During the year differences arose in regard to the appointment by the Societies of persons to audit their accounts, and on the Government being appealed to in the matter, the Governor, acting under the authority of section 60 of the Friendly Societies Ordinance, 1896, nominated two persons to be public auditors for the Societies. The Registrar reports that advantage of the services of these auditors was taken by the Societies during the year.

VI.—JUDICIAL STATISTICS.

Police.—The Police Force consisted of a Chief, a Sergeant-Major of European birth, formerly of the Royal Irish Constabulary, and 69 West Indian non-commissioned officers and men. The post of Staff-Sergeant, which is usually held by a European officer, remained vacant throughout the year. The Force is drilled and trained under the supervision of the Staff Officer of the Windward Islands by a European musketry and drill instructor.

In addition to their ordinary duties the Police carry out a considerable amount of work in connection with the details of administration, such as enforcement of sanitary regulations, distribution of poor and medical relief, registration of births and deaths, and the collection of Road Tax from defaulters. They also have the charge of certain of the District Post Offices and Telephone Exchanges.

The total expendiure on the Police Department amounted to £4,543, of which £3,875 was for personal emoluments, and £670 for clothing, equipment, &c.

Prisons.—The total number of persons committed to the Royal Gaol was 448, 52 being persons under remand, and 396 for imprisonment on conviction. The daily average number in gaol

was 70·05, males 58·6, females 10·75, and juveniles 0·7. The highest number of prisoners in confinement at any one time was 82, and the lowest 56.

The Medical Officer's report on the gaol states that there was no such frequency of any one disease as to call for comment, but that there was one case of typhoid in which the infection must have been contracted while in prison, although the source of the disease could not be discovered. The daily average number on the sick list was 1·75; it was 1·78 in 1909, and 2·1 in 1908. The expenditure on the establishment amounted to £1,498, and the average cost of a prisoner was 1*s.* 2*d.* a day, or £21 8*s.* per annum. The total estimated value of prison labour was £864.

Criminal Statistics.

The following table summarises the criminal statistics for the last five years:—

—	1906.	1907.	1908.	1909.	1910.
Offences reported	1,706	2,059	1,962	1,675	1,650
Summary Convictions—					
For offences against the person	220	380	405	263	334
„ prædial larceny	37	37	35	130	124
„ offences against property	77	138	106		
„ other offences	1,126	950	1,134	1,352	1,128
Convictions in Superior Court—					
Homicide	—	—	—	—	1
For offences against the person	2	10	2	1	8
„ offences against property	14	27	13	11	20
„ other offences	1	110	—	—	—

The Colony's record for absence from serious crime was broken in 1910 by the conviction for murder against an East Indian agricultural labourer, who drowned the son, aged six years, of a woman with whom the accused had formerly cohabited. The death sentence was duly carried out. The last previous case of murder in the Colony occurred in 1904, when a woman was found guilty of infanticide.

Apart from this case the statistics present no unusual features calling for explanation.

VII.—VITAL STATISTICS.

The estimated population of the Colony on the 31st December, 1910, was 56,588, of whom 27,336 were males and 29,252 were females. These figures are arrived at by adding the natural increase of the population to the figures of the population as ascertained by the census of 1901, and take no account of emigration or immigration. The birth-rate for the year was 30·1 per thousand, as compared with 30·9 in 1909. The death-rate was

16·6 per thousand; in 1909 it was recorded as 17·5. Both rates are so low as to raise suspicion as to their correctness, and that this suspicion is well-founded is proved by the result of the census taken in April, 1911, the results of which will be reviewed in the next annual report. There were 252 marriages during the year, an increase of 34 on the number in the previous year.

Generally speaking, it may be said that the year 1910 was a healthy one, and the statistics, although open to question, may be taken as fairly well reflecting that condition.

The average rainfall at eighteen stations distributed throughout the island was recorded as 100·20 inches, and was 12·04 inches higher than the average of the same stations for the year 1909. The station with the lowest rainfall was, as usual, Riviere Doree, in the Choiseul district, where only 69·94 inches were recorded. But at Warwick Estate, in the heights of the same district, the fall was 152·36 inches, the highest over the whole Colony. At the Botanic Station in Castries, 107·01 inches were registered, this being 21·58 inches more than the record for 1909. At the latter station, the mean monthly temperature taken in the shade was 78·4°; the maximum temperature recorded was 92·5° on September 9th, and the minimum 62° on February 2nd. The corrected readings of the barometer—taken at a height of 10 feet above M.S.L.—ranged from 29·904 in October to 30·053 in February; and the mean annual pressure was 29·985 inches.

In the month of May the island was visited by abnormal rains. At the Botanic Station 21·95 inches were recorded, the highest monthly fall noted there during the last twenty years, with the exception of that during the hurricane of September, 1898, when 25·28 inches were registered.

VIII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly inter-colonial mail service, performed under contract by the Royal Mail Steam Packet Company's Steamers, was regularly carried out during the year, and the steamers of the Pickford and Black Line from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued their visits as usual; as did the inter-colonial steamers of the Compagnie Générale Transatlantique (which call at Castries on their voyage between the French Colonies), and those of the Danish East Asiatic Company. The steamers of the Quebec Steamship Company also called regularly on their outward fortnightly voyage from New York.

As in the previous year, there was an increase in the business of the Post Office, details of which are given hereunder:—

	1910.	1909.
Letters and postcards—		
Sent	103,304	100,213
Received	104,893	103,020
Inland	95,577	96,958

The number of parcels despatched from the Colony was 350, and the number received, 2,662.

British postal orders to the number of 4,602 and to the value of £2,643 3*s.* 11*d.* were issued, and 829 to the value of £352 12*s.* 6*d.* were paid, the amounts in each case being in excess of those of the year 1909. Money orders to the value of £4,425 17*s.* 3*d.* were issued, the value of those paid being £4,216 1*s.* 10*d.*

The revenue of the Post Office amounted to £1,594 12*s.* 2*d.*, and the expenditure to £1,621 14*s.* 6*d.*

There is regular and daily postal communication, under local contract, between Castries and the leeward coastal towns and villages, the service being carried out by the Royal Mail Company's coasting steamer. On the windward side of the island, communication by post is overland and is made twice a week only.

All the towns and villages of the Colony are connected by telephone with Castries. During the year there were 207 miles of line open for traffic, and the number of subscribers was 128, an increase of 7 over 1909. There were 170 messages transmitted, and 329 sixpenny tickets were sold to non-subscribers using public telephones. The total receipts for the year amounted to £788 9*s.* 7*d.*, and the expenditure to £911 11*s.* 3*d.*

GENERAL REMARKS.

The death of His Majesty King Edward VII. was nowhere more sincerely mourned than in St. Lucia, and this sincerity was strikingly manifested by the demeanour and dress of all classes, even of those in the humblest station in life, at the Funeral Services which were held throughout the Colony.

The Accession of His Majesty King George the Fifth, whose visits to the Colony in 1884 and 1891 are still remembered, was duly proclaimed on the 9th of May.

The Royal Commission on Trade Relations between Canada and the West Indies arrived in the Colony on the 12th February, and held a sitting the same day for the purpose of taking the evidence of those interested in the object of its mission. On the receipt of the Commission's Report* later in the year, it was considered by the Legislature, and a Resolution in favour of the conclusion of an Agreement providing for the establishment of a system of trade reciprocity between the Dominion and the Colony, on the lines indicated on pages 52 and 54 of the Report, was adopted by that body on the 3rd December.

One of the most important matters that engaged the attention of the Government, and one affecting very nearly the poorer classes of the population, was the repeal of the Road Tax Ordinance of 1905, and the substitution therefor of an income tax levied on a graduated scale on incomes of £30 and upwards. With various modifications, the Road Tax had been in force since 1872. It was a direct tax, and had formed the subject of adverse criticism for a great number of years. The chief objections against it were: the difficulty of its collection and, at times, the impossibility of satis-

* [Cd. 5369.]

Ordnance Survey, Southampton, 1912.

factorily enforcing it; the ease with which it could be evaded; its tendency to discourage labour from coming to the Colony and to cause many people to emigrate; the unfairness of its incidence; and the expense attending its collection. If any further evidence were required of its unsuitability to such a community as that of St. Lucia, it can be found in the Reports of the Royal Commissions that visited the West Indies in 1884 and 1897.*

Reviewed as a whole, it may be said that the year was one of steady progress. The prices of the staple products were fairly well maintained, and the coaling business of the port was satisfactory.

The Administrator, Mr. E. J. Cameron, C.M.G., was on leave from the 30th May to the 11th October, the Government being administered in the interval by Mr. Anthony De Freitas, the Attorney-General.

A sketch map of the island is appended.

EDWARD J. CAMERON,
Administrator.

GRENADA.

(For Report for 1910, *see* No. 701.)

THE ACTING GOVERNOR to THE SECRETARY OF STATE.

Governor's Office, St. Lucia,
12th October, 1912.

SIR,

I HAVE the honour to transmit the Annual Report on the Blue Book of the Colony of Grenada for the year 1911, prepared by Mr. E. Drayton, C.M.G., the Colonial Secretary, at present administering the Government of the Colony.

I have, &c.,

EDWARD J. CAMERON,
Acting Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

(27168—2.) Wt. 29478—571. 1125 & 90. 12/12 D & S.

BLUE BOOK REPORT FOR THE YEAR 1911.

FINANCIAL.

The revenue for the year ended 31st March, 1912, reached the unusual amount of £98,645. This abnormal result is chiefly attributable to large receipts from Estate Duties, £13,935 being received, against an estimate of £1,500 for the year. Other heads of revenue at the same time gave large returns, Customs Duties exceeding the preceding year by £3,848, and Licences, Excise Duty, &c., by £1,827.

2. This excellent revenue was all the more satisfying because, during 1911, taxation to the extent of £600, payable by the labouring class, was remitted. Houses of £5 per annum, or less, assessed annual rental, were exempted from taxation where the owner is not beneficially entitled to half an acre of land or more.

3. Another change in taxation during the financial year was a complete revision of the import tariff, which commenced to operate on the 1st January, 1912. The ten per cent. additional duty which had been levied for the last two or three years was abandoned, and a judicious general revision adopted, whereby articles of necessity used by the poorer classes were kept at the lowest possible rate of duty, while luxuries and articles used by the better classes were more heavily taxed. An *ad valorem* rate of ten per cent. on articles not specifically mentioned in the tariff was imposed in place of the former rate of 7½ per cent.

4. The revenue classified under the usual heads was as follows:—

	£
Customs	46 221
Licences, Excise, and Internal Revenue ...	29,951
Estate Duties	13,935
Fees of Office, &c.	2,243
Post Office	1,599
Telephones	1,909
Water Supplies	230
Revenue from Government Property... ...	1,245
Interest and Sinking Funds	1,103
Miscellaneous Receipts	181
Land Sales	28
Total revenue	£98,645

The net increase on the revenue of the year 1910-11 was £17,232.

5. The expenditure for the year was £81,012, and exceeded that of the preceding year by £5,451; classified under the usual heads it was as follows:—

	£
Charges on account of debt	6,196
Pensions	2,824
The Governor	2,434
Colonial Secretary	1,800
Treasury Department	5,671
Post Office	2,817
Audit	661
Port and Marine	694
Legal Departments	4,587
Police	5,290
Military Expenditure	555
Prisons	1,197
Medical Department	4,235
Hospitals and Asylums...	6,006
Education	6,590
Ecclesiastical	400
Charitable	629
Telephones	1,720
Carriacou District	871
Water Supply, St. Paul's and Richmond Hill	224
Miscellaneous	5,579
Census of 1911	760
Agricultural Department	1,193
Public Works Department	1,272
Public Works, Recurrent	10,971
Public Works, Extraordinary...	5,792
Total expenditure from Colonial Funds ...	£80,969
Expenditure on Agricultural Department from balance of Imperial Grant	43
Total expenditure	£81,012

The increase on the previous year's expenditure is due to the formation of a volunteer force, the cost of taking the census, the creation of a new medical district, and large expenditure on sanitation, the establishment of two secondary schools, and special expenditure on storm damages to roads caused by heavy rains in September.

6. The total revenue and expenditure in the last five financial years were as under:—

	Revenue.	Expenditure.
	£	£
1907-8	79,871	68,383
1908-9	73,182	72,661
1909-10	71,224	73,282
1910-11	81,413	75,561
1911-12	98,645	81,012

7. The surplus of assets at 31st March, 1912, was £56,419, as compared with £38,742 on the same date in the preceding year, being an increase of £17,677. The details of this surplus were:—

	£
Reserve Fund, invested	15,379
Loans to District Boards	10,546
Cash on deposit, &c.	25,474
Land Settlement Funds	2,871
Stores	2,149

8. The public debt was unchanged, and amounts to £123,670 in inscribed stock, the accumulated sinking fund in the hands of the Crown Agents for the Colonies being at the close of the financial year £30,270. The stock is redeemable between 1917 and 1942. The Colony was also at the date referred to responsible for repayment of a loan of £550, taken over from the governing body of the late girls' school; this has been repaid in 1912.

9. The revenue and expenditure of the District Boards of Grenada in the financial year under review were as follows:—

	Revenue.	Expenditure.
	£	£
St. George's	4,205	4,802
St. Andrew's	2,516	2,397
St. Patrick's	2,007	2,103
St. John's	1,517	1,487
St. Mark's	624	686
St. David's	778	778
Totals	£11,647	£12,253

The town of Hillsborough in Carriacou, which is administered by town wardens, had a revenue of £80 in the same period and an expenditure of £82.

10. The loan debts of the District Boards at 31st March, 1912, were as under:—

	£
St. George's	12,181
St. John's	3,350
St. Patrick's	4,236
St. Andrew's	950
St. Mark's	10
	£20,727

The interest and sinking funds (or annual instalments) on these are regularly paid to the Government, to whom the debts are owed.

TRADE, AGRICULTURE, AND INDUSTRIES.

11. The value of the imports and exports of the Colony in the last five calendar years is as follows:—

	Imports.	Exports.
	£	£
1907	288,665	417,299
1908	303,783	359,245
1909	268,236	284,846
1910	279,236	291,760
1911	309,227	264,640

12. The imports in 1911 reached the highest figures on record, £309,227, a result attributable to the bumper cocoa crop reaped in the preceding year, which brought plenty of money into local circulation. The increased importation appears chiefly under spirituous liquors and tobacco, house-building materials, clothing, boots and shoes, and manures. The subjoined table gives the principal details and compares them with the imports of the previous year.

	1910.	1911.
Class I.—	£	£
Bread of all kinds	3,744	4,329

13. The change in classification of imports to the "country of consignment" instead of the "place from which imported,"

which began in 1910, is yet of too recent date to enable any satisfactory comparison as to the sources of the Colony's import trade to be made, but it may be noted that imports from Canada maintained the figures reached in 1910, which largely exceeded those under the former system of returns. The figures for the last three years are:—

	£
1909	7,943
1910	22,722
1911	22,264

14. The marked increase in the quantity of manures imported is significant of the improvement taking place in agricultural methods. In 1901 the importation was only valued at £1,398; in 1911 it had increased to £8,410. It is also worthy of notice that the import of manures from the United States of America increased in 1911 to £1,205, as compared with £145 in 1910.

15. Another satisfactory feature is the falling off in the quantity of fresh vegetables (other than onions) imported. These were valued at £243 in 1911, as against £2,538 in 1906, and £309 in 1903, and the return to more normal figures is, it is to be hoped, evidence of larger local production of these foodstuffs, which in former years were grown in such abundance as to be an important item of export.

16. The imports for the year under review originated as follows:—

	£
United Kingdom	142,017
British possessions	60,916
Foreign countries	106,294
	£309,227

Of the foreign countries the United States of America comes first in the value of its trade with the Colony, the imports thence in 1911 being valued at £94,751, and the exports thereto at £43,717.

17. The exports from the Colony in 1911 are valued at £264,640, which is less than in either of the two preceding years. This is due to the cocoa crop being smaller than in 1910 and to variation of prices. Of the total exports 64 per cent. went to the United Kingdom, 17 per cent. to the United States of America, and 17 per cent. to France.

18. The value of the three staple products of the Colony exported in the last two years was as follows:—

	1910. £	1911. £
Cocoa	259,365	223,104
Nutmegs and mace ...	17,872	20,673
Cotton and cotton seed ...	8,019	9,003

As usual the bulk of the cocoa went to the United Kingdom (64 per cent.), the United States of America and France each

taking 17 per cent. Eighty-five per cent. of the spices went to the United Kingdom, and 13 per cent. to the United States of America. All of the cotton was sent to the United Kingdom, and about three-fifths of the cotton seed, the remainder going to Barbados. Canada took 200 bags of cocoa, valued at £758.

19. Attention must be directed to the beginnings of two future exports, coconuts and lime juice. Coconuts to the value of £242 and copra valued at £37 were exported, and 31 hogsheads of lime juice, the first output of the Carriacou lime industry, left the Colony for England.

20. The cocoa crop for the year ended 30th September, 1911, was 67,144 bags, being 6,719 bags less than the record crop of the preceding year, but only 185 less than that of 1909. Prices in the London market varied, beginning well, but falling as low as 48*s*. per cwt. in June, and rising to 62*s*. in November. There was a large increase in the world's consumption of this product in 1911, but production is keeping pace with it, and it is significant that the cocoa exported from the Gold Coast in 1911 amounted to 77,000,000 lbs., as compared with 28.906 lbs. in 1895. A similar increase is taking place in Guayaquil, where in ten years the export of cocoa has doubled itself in quantity.

21. The nutmeg crop for the year ended 30th September, 1911, was better than in the last year, 6,496 barrels and 456 half-barrels, with 292 cases and 341 bags of mace being exported, as compared with 6,229 barrels, 306 half-barrels, 325 cases, and 107 bags in 1910. Prices were also more satisfactory.

22. The cotton crop of Carriacou was abnormally short, only 892 bales and 32 half bales being shipped in the usual year of account, as against 1,206 bales and 25 half bales in the previous year. Prices were, however, good, and more cotton seed was shipped (3,731 bags as compared with 3,360), which accounts for the increased value of the total export of this product in 1911. The Government is making every effort to encourage the planting of cotton in suitable districts in Grenada itself, and with that object a ginnery has been erected in St. George's so as to remove difficulty in the way of handling the crop when reaped.

23. The Carriacou Land Settlement Scheme continues in flourishing condition, and it is not too much to say that by its operation this interesting and valuable dependency has in less than nine years been brought from desolation to comparative affluence. The total area so far dealt with is 1,510 acres, of which 1,089 acres have been allotted in 393 lots, leaving reserves (chiefly forest) of 421 acres. The total amount advanced from colonial revenue has been £8,450, of which only £950 was outstanding at the 31st of March, 1912. An earnest demand is now being made by other peasants there, willing and anxious to become land owners under similar auspices, and the extension of the scheme is receiving the careful consideration of the Government.

24. In any reference to Carriacou mention must be made of the development of other agricultural industries there by Mr. Tom Archer, who has now more than 60,000 lime trees at the

bearing stage, and is providing a properly equipped factory, while he is also making preparations to cultivate about 300 acres in coconuts. This gentleman's agricultural enterprise and activity in the dependency are worthy of praise.

25. The Land Settlement Scheme of Grenada, commenced in 1910, made satisfactory progress. The northern portion of the Morne Rouge Estate in St. George's, to which reference was made in last year's report, yielded 27 allotments of cultivable land, of which 23 were sold at the end of the year. Adjoining the south of the same estate a block of 50 acres of land of True Blue Estate was purchased, and this, taken with some adjacent cultivable land of the former estate, yielded 21 allotments, of which by the end of the year 15 had been sold. As it was found that sugar cane cultivation was the chief desire of the allottees on this settlement arrangements were made for the erection of a small factory with a 5½ horse-power oil engine and a three-roller mill, capable of handling 8 to 9 tons of cane per day. This has been completed in 1912. Negotiations for the purchase of a block of 300 acres of an estate in St. David's Parish proceeded during the year, but the purchase was not completed till 15th January, 1912; the survey into lots was, however, effected by consent in the meanwhile.

26. There was a marked increase in the quantity of rum manufactured in 1911, 63,356 gallons being distilled, as compared with 41,418 in 1910. Now that the active measures taken have got smuggling under a fair amount of control, the quantity honestly made is seen to be hardly sufficient to meet local consumption, as 62,365 gallons were duty paid for use in the Colony during the year.

27. One hundred and sixty-one liquor licences were issued in 1911, as compared with 157 in the preceding year, but the revenue actually derived from sale of these licences only amounted to £634, as against £3,182 in 1910. This is due to a complete change in the licensing system, which commenced to operate on the 1st of January, 1911, whereby the licence fee was reduced to £5 per annum, while a Trade Duty at the rate of 1*s*. per gallon was levied on all spirits imported, or purchased from a distiller, or taken out of warehouse, by any licensed dealer, or by any person intending thereafter to sell the same. This Trade Duty realised £3,665 in the financial year. The granting of certificates for licences to sell intoxicating liquors was at the same time handed over to District Licensing Boards, consisting of the police magistrate of the district and three unofficial members; these last are in practice appointed upon the nomination of the several District Boards of the Colony. These changes have got rid of several undesirable features in the former system, and so far they are working excellently.

28. The ice factory in St. George's exported 507 tons, as compared with 417 in 1910; this is in addition to the amount manufactured for local consumption, of which there is no return. The soap factory also continued in active existence, but there is no return of the amount made.

SHIPPING.

29. The shipping tonnage inwards and outwards in the last five years was as follows:—

	Tons.
1907	513,902
1908	566,245
1909	586,074
1910	590,451
1911	535,161

Of the total tonnage in 1911, steam vessels accounted for 513,460 tons. There were on the local shipping register at the end of the year 88 sailing vessels of an aggregate tonnage of 1,272.

LEGISLATION.

30 Twenty-three Ordinances became law in 1911, of which three related to the consolidation of the laws of the Colony up to the end of the year, which was entrusted to Mr. D. T. Tudor, the Attorney-General. The new edition, which comprises two volumes, was not issued until 1st of May, 1912, and takes the place of the last edition (1898), which was compiled by Sir Joseph Hutchinson, when Chief Justice of Grenada, and of all subsequent Ordinances down to the end of 1911.

31. Of the other Ordinances of the year the more important were:—No. 5, enabling convicts with sentences of twelve months and upwards to be released on licence, the previous limit having been a two years' sentence; No. 9, enabling the control and regulation of cinematograph exhibitions; No. 12, relieving certain owners of small houses from taxation for them (*see* paragraph 2); No. 16, regulating the procedure of the Supreme Court in its probate jurisdiction; and No. 20, enabling the courts in cases of money lending where the transaction is "harsh or unconscionable" to reopen them and give relief.

EDUCATION.

32. *Primary.*—Industrial, combined, lower division, and infant schools are provided for by the primary education system of the Colony, but no school of the first class has yet been established, the existing schools being 30 combined, 10 lower division, and 9 infant, three of the last-mentioned type having been added during the year. Of these 49 schools 9 are Government schools, 22 Roman Catholic, 11 Anglican, 5 Wesleyan, and 2 Church of Scotland. The total pupils on the roll was 10,905, and the average attendance 5,377 (in 1910, 9,724 and 4,594). The expenditure was £4,966, the Government contribution to which was £4,920 (in 1910, £4,968 and £4,920). The cost per pupil to the Government varied as follows among the schools:—

	s.	d.
Government	18	1
Anglican	19	0
Roman Catholic	15	9
Wesleyan	19	9
Church of Scotland	12	1

33. *Secondary.*—The Grenada Boys' Secondary School was opened on the 18th of September in premises in Melville Street, St. George's, with 38 pupils, Mr. D. Hedog Jones, B.A., B.Sc., being the new headmaster. Agricultural science forms a prominent feature of the curriculum, and by means of free scholarships to boys from the primary schools on the one hand and the cadet system of the Agricultural Department on the other it is designed to carry promising lads through a definite course of tuition and practical work in agriculture so as to fit them for a useful future in that line. It may be recorded at this date that the school has already found a firm footing in the community, as its numbers have advanced, beyond all expectation, to 72 pupils at its opening this month, and extension of the buildings is becoming a necessity.

34. It was not possible to open the Girls' Secondary School before the 29th of January, 1912, so that no comment on it can properly be made in this year's report. At the St. Joseph's Convent School, which continues its good work with a Government grant-in-aid, the number on roll was 71, the daily average, 59, and the expenditure, £321.

GOVERNMENT INSTITUTIONS.

35. *Colony Hospital.*—971 patients were treated in 1911 (1,031 in 1910), of whom 674 were cured, 169 relieved, and 36 died. The daily average was 88·6, and the cost per patient £20 19*s.* 9*d.* The receipts for paying patients were £102, and the number of attendances in the out-patient department was 1,317.

The status of the responsible medical officer in charge was changed during the year, Dr. R. P. Cockin, M.A., Cantab., being appointed Resident Surgeon and Bacteriologist on the 7th of June in place of the officer formerly styled House Surgeon. Preparations for the appointment of a European nurse-matron were also made by the construction of quarters for her in the hospital precincts, and plans and estimates were got ready for the construction of a maternity and lying-in ward, and for the extension of the dispensary, so as to enable the staff to undertake the dispensing of medicines to paupers and labourers in the three adjoining medical districts.

36. *Yaws Hospital.*—339 cases were treated, of whom 276 were discharged cured, and two died, but not from yaws, death being due to other diseases. The daily average was 75, and the cost per head £10 12*s.* 11*d.* The resident surgeon remarks that "during the year a limited number of cases have been treated

with Salvarsan and the results obtained have been such as to justify further work being carried out with this drug. Some cases are at present under treatment in the institution and are making good progress."

37. *St. Andrew's District Hospital.*—166 cases were treated, of whom 140 were discharged cured, 11 were relieved, and 6 died. The daily average was 10, and the cost per patient £39 10*s.* 10*d.*, which exceeds even the high cost per head commented on last year, viz., £36. 9,071 prescriptions were compounded at the dispensary, the receipts for which amounted to £128 12*s.*

38. *Carriacou District Hospital.*—213 patients were treated, of whom 145 were discharged cured, and 44 relieved; only 2 died. The daily average in hospital was 20·5, and the cost per patient £33 9*s.*, which is a marked increase on last year's £25. 5,478 prescriptions were compounded at the dispensary, and the receipts were £80 11*s* 5*d.*

39. *Lunatic Asylum.*—The number under treatment was 159, 76 males, 83 females. Last year the number treated was 170, and the falling off in numbers is due to the fact that the St. Lucia Government, being about to provide its own asylum, discontinued sending patients here. 25 patients were admitted, 4 of whom were from St. Vincent. The daily average was 130; 23 patients were discharged as cured, and 9 died. The cost per head was £19 9*s.* The construction of a water-borne sewage system was commenced, discharging into septic tanks outside the asylum walls. Three cases of enteric fever occurred in the institution, but all recovered.

40. *Poor Asylum.*—The buildings accommodate 58 inmates, and the daily average was 47. Twenty-five were admitted and 21 died during the year. The cost per head was £10 6*s.* 10*d.*

41. *Savings Bank.*—The amount at credit of depositors at the end of the year was £25,594, an increase of £2,632 as compared with the end of 1910. The number of depositors was 1,741, and the average credit per depositor was £14 13*s.* 6*d.*; in 1902 this average was £6 3*s.* 7*d.* £22,000 of the funds were invested at the end of the year, and shortly after its close this was increased to £24,500. A prominent feature of the Grenada Savings Bank is the existence of a flourishing branch bank in each of the six out-districts. About one-half of the total deposits belong to these branches, which are greatly appreciated and used.

JUDICIAL STATISTICS.

42. *Police.*—There was a distinct improvement in the police force in 1911 under the command of Major Capell, D.S.O. Discipline was well maintained, and the standard of efficiency in musketry advanced. Sub-Inspector Legge resigned his office in November, and it was decided to revert to the former arrangement of a European Sergeant-Major instead of a Sub-Inspector.

43. *Prisons.*—The committals were 226 in number as compared with 306 in 1910, 180 of these being males, 42 females, and 4

juveniles. The daily average was 46·10, and the cost per prisoner was £38, or about twice what it was in 1908, when, on account of the presence of prisoners from St. Lucia and St. Vincent, the daily average was 75. The prison administration is creditable to the Colony, and discipline is satisfactorily maintained. A further step in advance was made in 1911 by bringing discharge on licence within the reach of prisoners with 12 months' sentences and upwards, the previous limit having been two years.

44. *Criminal Statistics.*—The Attorney-General reports an increase in the number of summary convictions, 1,514 being recorded in 1911 as compared with an average of 1,456 in the three preceding years, but he points out that the greater part of the increase is due to convictions for offences against revenue, municipal, and other laws relating to the social economy of the Colony, the police and local authority showing greater activity in such matters. Convictions for offences against the person also increased from an average of 279 to 308 but those for praedial larceny decreased from an average of 141 to 105.

VITAL STATISTICS.

45. The population at 31st December, 1911, is estimated to have been 67,848. According to the Census returns at 2nd April, 1911, it was 66,750, and, allowing for the natural increase from that date, as well as (for the first time) for the difference between emigration and immigration, the above result is reached.

46. The difference between the Census figures and the estimated population at 2nd April, 1911, based upon natural increase alone, amounted to 8,780, and is attributable to emigration, to the Panama Canal Zone and Brazil chiefly. Returns have been required from each of the three ports of the Colony since the Census date so as to enable the incoming and outgoing of the people to be taken into account in future estimates.

47. The birth-rate per thousand was 39·92, and the death-rate 19·66. The year was a healthy one, and the deaths would have been even less in number but for the persistence of an epidemic of whooping cough which commenced in 1910, and to which 145 deaths are traceable in the two years.

48. The rainfall was moderate, only 69·83 inches being recorded at Richmond Hill, in the south of the island, as compared with 94·15 in 1910, and 80·54 in 1909. The following figures of the rainfall at this station in the last 21 years (1891-1911) are of interest:—

Average annual rainfall ...	77·60 inches.
Minimum in one month ...	·49 inches in May, 1899.
Maximum in one month ...	20·90 inches in November, 1896.
Minimum in one year ...	56·69 inches in 1891.
Maximum in one year ...	105·89 inches in 1892.

Average for each month of the year:—January, 4·27; February, 3·01; March, 2·95; April, 2·58; May, 4·91; June, 9·24; July, 9·56; August, 9·87; September, 8·18; October, 7·18; November, 8·06; December, 7·80.

POSTAL AND TELEPHONE SERVICES.

49. The following comparative statement shows that the Post Office business distinctly increased in the year:

	1910.	1911.
Letters and post cards ...	551,800	570,479
Newspapers, books, &c. ...	193,085	212,011
Parcels	7,802	9,432
Registered and insured letters	12,364	12,451
Money and postal orders issued and paid	£27,878	£31,865

50. The progress of the cash on delivery service is remarkable. In 1911 no less than 1,244 parcels were dealt with, involving the collection of £1,437 for "trade charges," against 300 parcels in the preceding year with £375 "trade charges." The amount of British postal orders issued and paid was £4,972, against £4,627 in 1910.

51. Grenadians at work in the Panama Canal Zone remitted £5,464 through the Post Office to the Colony. The similar remittances in 1907-10 were 1907, £6,235; 1908, £7,475; 1909, £6,191; 1910, £5,932: average for the five years, £6,260.

52. *Telephones.*—The revenue of the department in the financial year was £1,910 and the expenditure £1,797; this expenditure includes loan charges on the initial cost of the system. The number of instruments in use is 319, and during 1911 twenty-one new installations were effected. The principal exchange buildings in St. George's were thoroughly reconstructed, and a larger switchboard supplied, but this has not so far given satisfaction. The system in Grenada is very complete, there being an exchange in each of the six districts of the island (as well as one in Carriacou), with which all important business places and residences are connected. In view of the distances between centres and the difficulty of locomotion the telephone is indispensable and has proved to be a most important factor in the development of the Colony, both financially and socially.

MILITARY FORCES.

53. The long-discussed volunteer force, for which legislative provision has existed since 1900, became a fact in 1911. There had been a public meeting in 1910, presided over by the Governor, Sir James Hayes Sadler, and it resulted in the St. George's Corps of Volunteer Infantry being enrolled on the 7th of April, 1911. The corps is commanded by Captain D. L. Slinger, a well-known and popular citizen. He was selected, with Sergeant Walter Bertrand, to represent the Volunteers of Grenada at the King's Coronation in June.

54. The old prison premises in St. George's have been given for use as a drill yard and miniature rifle range, and every effort

is being made to bring the corps to a state of efficiency. Brigadier-General Dalrymple-Hay, commanding the forces in Jamaica inspected them in August, and expressed his satisfaction at the progress which had already been made.

GENERAL REMARKS.

55. The Coronation of Their Majesties in June was most loyally and enthusiastically observed in the Colony. Two special holidays were given, the first day being devoted to the official functions and celebration at headquarters, and the next to rejoicings in the out-districts. His Majesty's gracious action in conferring the honour of appointment as a Companion of the Order of St. Michael and St. George upon Mr. W. S. Comissiong, K.C., the Senior Unofficial Member of the Executive and Legislative Councils, at the time of the Coronation, was much appreciated locally.

56. The Colony sustained a great loss on the 9th of February in the person of the Honourable C. Macaulay Browne, C.M.G., Senior Unofficial Member of both Councils, who died on that day in England. A memorial service was held on the 13th attended by the Governor and staff of public officers, and on the 15th a special meeting of the Legislative Council was convened, when a suitable resolution was adopted by the Council at which Mr. Browne had sat for nearly thirty years.

57. His place at the Executive Council was taken in April by His Majesty's appointment to it of Mr. D. S. De Freitas, who had been an active Unofficial Member of the Legislative Council for 16 years.

58. The question of trade reciprocity with Canada was fully discussed at a meeting of the Legislative Council on the 3rd of March, and it was decided by a majority of votes that the entering into a preferential agreement with the Dominion should be deferred for consideration in the future.

59. Standard time, four hours later than Greenwich mean time, was adopted in the Colony, along with the other West Indian Islands and British Guiana, on the 1st of July.

60. The coasting steamer service by the Royal Mail Steam Packet Company was extended to Requin Bay in St. David's parish on the 4th of November, when a bi-weekly call at that harbour was commenced. St. David's was the only district of the Colony without participation in this service, and its marked increase of late in wealth and importance fully justifies the step taken. A warehouse and jetty were provided by Government and the subsidy to the Company increased, while jetty dues were imposed, as is customary at the other places of call by the steamers where jetties have been constructed.

61. On the 16th of August the appointment of Mr. D. T. Tudor, K.C., the Attorney-General (then absent in England employed on the consolidation of the laws of the Colony), to be Chief Justice of the Bahamas was announced; and at the end of the year the selection for the vacancy of Mr. N. Julian Paterson, a prominent

Ordnance Survey, Southampton, 1912.

Ordnance Survey, Southampton 1912.

member of the local bar, and for the last 15 years an Unofficial Member of the Legislative Council, was made public, the appointment dating from 1st January, 1912. Mr. Paterson had on several previous occasions acted with distinction in the office.

62. His Excellency Sir James Hayes Sadler, the Governor, was absent on leave from the 13th of July to the 6th of December; and upon his return to the Colony on the latter date he proceeded at once to the other Colonies of the Government, being absent on duty there when the year ended. During his absence from Grenada the local Government was administered by the Colonial Secretary, and during his absence on leave the Government of the Windward Islands was administered at St. Lucia by Mr. E. J. Cameron, C.M.G., the Administrator of that Colony.

E. DRAYTON,
Colonial Secretary,
Administering the Government.

Grenada,
30th September, 1912.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

ANNUAL.

No.	Colony, &c.	Year.
712	St. Vincent	1910–1911
713	St. Lucia	1910
714	St. Helena	1911
715	Weihaiwei	"
716	Ceylon	1910–1911
717	Gibraltar	1911
718	Gambia	"
719	Ashanti	"

ST. VINCENT.

(For Report for 1910–11, *see* No. 712.)

THE ADMINISTRATOR TO THE ACTING GOVERNOR.

Government House,
St. Vincent,
26th October, 1912.

SIR,

I HAVE the honour to forward to your Excellency for transmission to the Secretary of State for the Colonies, my annual report on the Blue Book of the Colony of St. Vincent for the year 1911-12.

I have, &c.,

C. GIDEON MURRAY,
Administrator.

His Excellency
Edward J. Cameron, Esq., C.M.G.,
&c., &c., &c.,
St. Lucia.

(27956—2.) Wt. 35104—688. 1125 & 90. 2/13. D & S. A 2

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1911-12.

I.—FINANCIAL.

General Revenue and Expenditure.

The following comparative statements and tables give the heads of revenue and expenditure and the amounts received under those heads for the years 1910-11 and 1911-12, as well as the total revenue and expenditure for each of the last five years, 1907-8 to 1911-12:—

(Table 1.)

Comparative Yearly Statement of the Revenue.

Heads of Revenue.	Amount collected in the Year 1910-11.	Amount collected in the Year 1911-12.
	£	£
1. Customs:		
Import	12,226	14,982
Export	703	968
2. Port and Harbour Dues:		
Tonnage	522	607
Port	95	95
3. Licences, Excise, and Internal Revenue:		
Licences—Liquor ...	500	532
Do. —Other ...	1,271	1,257
Excise	3,840	4,607
Land and House Tax ...	3,177	3,209
Income Tax	643	662
Other Internal Revenue...	911	803
4. Fees of Court or Office, Payments for Specific Services, and Reimbursements in aid	1,252	1,633
5. Post Office	1,449	2,053
6. Telephones	523	569
7. Rent of Government Property	35	34
8. Interest and Refunds of Loans	1,590	1,651
9. Miscellaneous Receipts ...	194	55
10. Sales and Leases of Crown Lands	601	541
Total Local Revenue ...	29,540	34,266
11. Parliamentary Grant:		
In aid of Agricultural Department	585	585
Total General Revenue	30,125	34,851

Comparative Yearly Statement of Expenditure.

Heads of Expenditure according to the classification employed in the Estimates.	Expenditure 1910-11. £	Expenditure 1911-12. £
1. Charge on Account of Public Debt	887	756
2. Pensions	2,154	2,042
3. The Governor	1,611	1,589
4. Government Office	655	658
5. Treasury and Customs ...	1,453	1,514
6. Audit Department ...	317	337
7. Legal Departments ...	2,100	2,406
8. Local Forces	212	291
9. Police, Prisons, Port, and Excise	3,183	3,433
10. Medical Department ...	1,943	1,880
11. Hospitals and Asylums ...	2,685	3,059
12. Poor Relief	646	672
13. Education	1,927	2,058
14. Post Office	1,212	1,370
15. Telephone Department ...	438	518
16. Miscellaneous	2,253	2,219
17. Crown Lands and Survey Department	599	496
18. Public Works Department...	610	646
19. Do. do. Recurrent ...	2,522	2,465
20. Do. do. Extraordinary	956	3,238
21. Agricultural Department ...	1,299	1,123
22. Southern Grenadines District	89	334
Total Local Expenditure ...	29,759	33,115
21A. Agricultural Department (from Imperial Funds) ...	583	618
Total General Expenditure	30,343	33,734

(Table 2.)

Total Revenue and Expenditure for Five Years 1907-08 *to* 1911-12.

Year.	Revenue.			Expenditure.		
	—		Total.	—		Total.
		£	£		£	£
1907–8	Local	27,543		Local	23,508	
	Imperial Grant	913		Imperial Grant	1,145	
			28,456			24,653
1908–9	Local	30,810		Local	26,647	
	Imperial Grant	585		Imperial Grant	553	
			31,395			27,200

Year.	Revenue.		Total.	Expenditure.		Total.
		£	£		£	£
1909–10	Local	27,855		Local	30,732	
	Imperial Grant	585		Imperial Grant	598	
			28,440			31,330
1910–11	Local	29,540		Local	29,759

			30,125			30,343
1911–12	Local	34,267		Local	33,116	
	Imperial Grant	585		Imperial Grant	619	
			34,852			33,735

It is again possible to repeat, in the words of the report for 1910-11, that the financial year under discussion has in all respects been a more satisfactory one than the previous financial year, 1910-11. Whilst the estimated revenual receipts from local sources were placed, when framing the budget for 1911-12, at £31,661, the actual revenue collected was £34,852, showing a surplus on estimates of £3,191. The estimated expenditure of £32,471 was, from various causes, increased during the year to £33,735, showing an actual surplus on the year's working of £1,117. Notwithstanding that during the year (on the 25th September, 1911) a disastrous rainstorm took place, which involved an actual storm damage expenditure all over the Colony up to the 31st March, 1912, of £2,104 5*s.* 7*d.* including the erection of new reinforced concrete causeways in the Mesopotamia Valley, and a new 60 foot span bridge (only half finished) of the same material, the financial operations for the year showed a surplus of £1,151. In addition to the aforementioned works the following Public Works Extraordinary were undertaken and carried to completion:—

	£
Construction of Landing Stage, Layou	70
Public Works, Bequia	12
Enlargement of Teacher's House, Mayreau ...	24
Water Supply to Montrose and Lodge Villages ...	26
Georgetown Jetty (not quite finished)	783
	£915

From the 1st October, 1911, the export tax on cotton was raised from 3*d.* a cwt. to 2*s.* a cwt., whilst arrowroot was reduced from 3*d.* a hundred lbs. to 3*d.* a cwt. Cocoa was increased from 3*d.* a cwt. to 6*d.* a cwt. The estimated net result of these changes was to bring in £300 a year more in export tax in 1911-12 and in subsequent years £500 a year. In extenuation of the increase in export tax on cotton, it may be pointed out that where export tax is paid on any article in St. Vincent, it takes the place of

income tax on the profit from that article. Hitherto, on a cotton exportation value of roughly £30,000 per annum, planters have returned on an average £50 per annum to the Treasury as against £500 per annum for the same exportation value in arrowroot. Cotton has been levelled up to arrowroot, and will now pay approximately the same total export duty per annum *i.e.*, £500. The following table shows a considerable progressive increase in Excise receipts during the past three years:—

	£
1909-10	3,726
1910-11	3,841
1911-12	4,608

and is an indication of more general circulation of money in the Colony.

Assets and Liabilities.

The excess of assets on the 31st March, 1911, was £6,524. On the 31st March, 1912, the account showed an excess of £7,775.

In addition to the surplus of £7,775, the sum of £25,000, the unexpended remainder of a fund contributed by private subscription at the time of the eruption of the Soufriere volcano in 1902-03, is invested in trust securities, and held as a reserve or insurance fund against any possible future disaster which may result from the violence of the elements.

There are also other funds of lesser importance showing assets to the Colony, some of which are extinguishable by time, while others, like the Graham Bequest Fund, the Alexander Fund, and the Thompson Home Fund, are used only in respect of the interest they bear.

Public Debt.

There is no public debt, the last loan instalment having been repaid in May, 1910. There are municipal debts, extinguishable in 1913, amounting in the aggregate to £550 at 31st March, 1912, for which, in case of default, the Colony is ultimately responsible, and which constitute a first charge upon its revenues. There is little likelihood, however, of the Colony being called upon to pay any of this sum, as the municipalities concerned are well able to bear the interest and repayments involved.

The Colony is similarly responsible for the unpaid balance of the hurricane loan to planters from the Imperial Treasury, which was, at 31st March, 1912, £9,646, toward the repayment of which a sum of £3,049 was in hand, invested by the Crown Agents for the Colonies at short call. This loan is being steadily redeemed by borrowers at the rate of £750 per annum to the local Government, by whom annual payments are in turn made to the Imperial Treasury.

Currency.

Gold, British and American, notes of the Colonial Bank, and British silver and copper constitute the currency of the Island.

The Government accounts are kept in sterling, and commercial accounts in dollars and cents.

Finances of Municipalities.

The management of the affairs of Kingstown are vested in a board, one-half of the members of which are elected by the ratepayers and the other half nominated by the Government.

The chairman of the board is annually elected by the members forming that body, but cannot in any circumstances be elected for more than two years in succession.

The small towns of the Colony, of which there are six, are controlled by wardens appointed annually by the Government.

The following comparative statements give the total revenue and expenditure of these towns during the last five years:—

Revenue.

Town.	1907.	1908.	1909.	1910.	1911.
	£	£	£	£	£
Kingstown	1,706	1,695	1,736	1,711	1,756
Georgetown	108	118	143	142	158
Chateaubelair	34	35	33	35	33
Calliaqua...	31	32	32	35	39
Barrouallie	45	38	37	41	251
Layou	19	20	26	21	23
Bequia	9	9	9	10	11

Expenditure

Town.	1907.	1908.	1909.	1910.	1911.
	£	£	£	£	£
Kingstown	1,758	1,790	1,778	1,813	1,697
Georgetown	108	109	126	151	153
Chateaubelair	28	27	21	31	40
Calliaqua...	30	32	27	25	30
Barrouallie	31	41	20	27	257
Layou	9	24	17	13	25
Bequia	2	4	17	1	7

Debts of Towns.

The debts of the towns at the 31st December, 1911, were as follows:—

	£	£
Kingstown water supply	800	
Kingstown town improvement	50	
Loan for repair of Rose Place Drain, Kingstown	191	
		1,041
Georgetown water supply		100
Barrouallie water supply		192
		£1,333

Provision for repayment of these loans is made by rates levied annually on the townspeople, and the debts are secured on the general revenue of the Colony.

II.—TRADE, AGRICULTURE AND INDUSTRIES.

IMPORTS.

Chief Articles.	Value. 1910 £	1911. £
Class I.		
Beef, salted or cured	331	466
Biscuits	3,912	3,263
Butter	1,880	2,101
Coffee	399	577
Fish, salted, &c.	5,282	4,973
Fish, pickled	1,469	1,707
Flour, wheaten	8,934	11,116
Flour, other kinds	861	585
Medicinal extracts and preparations	815	814
Oats	364	516
Oilmeal and cake	479	451
Oil, olive	653	587
Pork, salted or cured	1,595	1,636
Rice	2,645	2,911
Spirits	972	957
Sugar, muscovado	287	236
Sugar, refined	768	726
Sugar, crystallized	327	514
Wine	750	972
Tobacco, cigars, &c.	1,089	1,233
Class II.		
Leather, unmanufactured	211	403
Oil, cotton seed	664	587
Oil, petroleum	1,834	1,786
Timber and shingles	4,992	8,428
Shooks, staves, &c.	2,251	1,212
Class III.		
Textile manufactures, other than rope cordage, and canvas	20,832	25,946
Rope, cordage, and canvas	1,131	1,223
Hardware	2,065	2,702
Agricultural implements	610	722
Machinery	533	997
Musical instruments	424	541
Earthen and glassware	852	1,212
Furniture	918	993
Matches	489	413
Paints	383	543
Boots and shoes	1,215	1,523
Cement	1,134	940
Soap	1,744	1,515

Chief Articles.	Value. 1910.	1911.
Class IV.	£	£
Horses	748	506
Class V.		
Bank notes	4,457	2,776

EXPORTS.

The values of the principal exports are shown in the annexed table:—

Article.	1910.	1911.
	£	£
Cassava starch	781	1,269
Whale oil	164	228
Turtle shell	176	302
Firewood	318	325
Cotton and cotton seed	42,094	45,470
Vegetables	1,756	1,484
Syrup	246	338
Sugar, crystallized	2,289	2,470
Sugar, muscovado	1,272	2,935
Pease	310	396
Molasses	2,076	599
Ground-nuts	1,743	1,060
Live stock	5,034	4,685
Arrowroot	30,089	40,430
Cocoa	4,132	5,069
Hides, raw	229	379

In the course of his annual report the Supervisor of Customs states as follows:—

"Imports from the United Kingdom amounted to £50,833, as compared with £43,254 for the year 1910, an increase of £7,579.

"From British possessions the imports were £33,529, as against £31,688 in 1910, showing an increase of £1,841.

"Imports from foreign countries amounted to £26,562, as compared with £22,794 for 1910, being an increase of £3,768.

"The increase under 'British Possessions' is due to increased importations from India £1,690 (rice) and Newfoundland £2,091 (fish), while importations from British North America are £2,190 less. The increase under 'Foreign Countries' is principally in trade with the United States of America, £3,287.

"The following is the classification:—

		£
Class I.	Food, drink, and tobacco	42,406
Class II.	Raw materials and articles mainly unmanufactured	13,792
Class III.	Articles wholly or mainly manufactured	51,242
Class IV.	Miscellaneous and unclassified ...	710
Class V.	Bullion and specie	2,776
	Total Imports	£110,926

"In view of the fact that the classification in the statistical returns has been slightly varied from that of the previous year, a comparison under the various classes will not be quite accurate, but, taken as they stand, there is an increase of £2,490 under Class I, an increase of £2,141 under Class II, and an increase of £5,071 under Class III, while the figures under Classes IV and V (new) amounting to £710 and £2,776, respectively, go to make up the total increase of £13,189.

"The increase of £5,071 (38 per cent. of the total increase) being under Class III 'Articles wholly or mainly manufactured' and largely represented by 'Textiles' and 'Wearing Apparel' points strongly to greater purchasing power on the part of the lower and labouring classes and is evidence of the existence of improved economic conditions throughout the Colony.

"The following is a list of articles the values of which have increased appreciably:—

Article.	Increase.
Flour, wheaten	£2,182
Timber, pitch pine	3,002
Shingles	676
Baling cloth	303
Textile manufactures	4,459
Wearing apparel...	308
Hardware	636
Machinery	464
Metal manufactures, unenumerated	989
Boots, shoes, and slippers	308
Earthen and glassware	360
Manufactured articles other than textile or metal—unenumerated	936

"The values of the following imports show decreases:—

Article.	Decrease.
Fish, smoked, dried, or salted	£310
Manure	546
Timber, white pine	483
Shooks, staves, &c.	1,039
Bank notes	1,682

"*Exports.*

"The value of the exports to the United Kingdom amounted to £73,378 as against £63,981 for 1910, showing an increase of £9,397.

"The value of exports to British possessions was £42,166 as compared with £35,306 for the previous year, an increase of £6,860.

"Exports to foreign countries amounted in value to £3,081 as against £1,893 for the year 1910, an increase of £1,188.

"The following table shows the values of exports according to the classification recently adopted:—

		Value.
Class I.	Food, drink, and tobacco ..	£60,102
Class II.	Raw materials and articles mainly unmanufactured ...	46,764
Class III.	Articles wholly or mainly manufactured	1,582
Class IV.	Miscellaneous and unclassified ...	1,046
Class V.	Bullion and specie	9,131
		£118,625

"Under Class I. the principal article is of course arrowroot, the value of which amounts to £40,429. Cocoa is valued at £5,069, live stock at £4,671, ground nuts at £1,060, sugar and syrup at £5,743, and vegetables at £1,455. All the above are the produce or manufacture of the Colony.

"Under Class II. the principal item of export is 'cotton,' valued at £41,619. Cotton seed is valued at £3,851.

"Under Class III. the only item of any importance is cassava starch, valued at £1,268.

"Class IV. does not call for any special comment.

"Class V. is composed of:—

Bank notes	£3,932
Silver	5,198

"The following exports have increased in value to an appreciable extent:—

Article.	Increase.
Arrowroot	£10,339
Cocoa	937
Sugar and Syrup	1,936
Cotton	3,210
Cassava starch	488
Specie (including bank notes)	2,601

"In the case of arrowroot it is significant that while the exports have decreased in quantity to the extent of 1,038,595 lbs., the value is £10,339 in excess of that for 1910. This is due, as regards quantity, to the fact that exporters have held back much of the year's crop for reasons of their own, and, as regards value, to the good prices which have been ruling throughout the year 1911.

"The values of the following articles of export show decreases:—

Article.	Decrease.
Molasses	£1,482
Ground nuts	683
Vegetables	289

"In the case of each of the above articles, I believe the reason for the decrease to be the same, namely, the appropriation of larger proportions of arable land for the growing of cotton and arrowroot on account of the higher prices prevailing for these articles.

"In this connection it will also be noticed that the local consumption of wheaten flour has increased largely, as is evidenced by the considerable increase in importation of this article during the year, flour taking the place of vegetables when the supply failed to meet local demands."

The total trade of the Colony for the year was £229,551 as compared with £198,917 for 1910, being an increase of £30,634.

The total imports and exports for the five years 1907-8 to 1911 were:—

Year.	Imports.	Exports.
	£	£
1907-8 ...	96,554 ...	94,265
1908 ...	113,713 ...	94,739
1909 ...	87,810 ...	88,698
1910 ...	97,737 ...	101,180
1911 ...	110,926 ...	118,625

The volume and direction of the Colony's trade in the five years 1907-8 to 1911 are given below:—

Imports.

—	1907-8.	1908.	1909.	1910.	1911.
	£	£	£	£	£
United Kingdom	36,280	45,260	30,232	43,254	50,834
British Colonies	42,436	48,388	43,027	31,688	33,530
Foreign Countries	17,839	20,065	14,551	22,794	26,562
Total	96,554	113,713	87,810	97,736	110,926

Exports.

—	1907-8.	1908.	1909.	1910.	1911.
	£	£	£	£	£
United Kingdom	52,718	54,444	46,328	63,981	73,378
British Colonies	40,535	37,758	40,386	35,306	42,166
Foreign Countries	1,012	2,537	1,984	1,893	3,081
Total	94,265	94,739	88,698	101,180	118,625

Manufactures and Fisheries.

The Central Cotton Ginnery was established by the Government in the year 1903-4, and is under the management of the officers of the Imperial Department of Agriculture. This ginnery has been of great assistance in the development of the cotton industry. It is extremely improbable that the industry would, without it, have reached its present successful state. With a charge of 1*d.* per pound for ginning and baling, the accounts showed a balance

in favour of the ginnery of £480 9*s.* 9*d.* at the end of the 1909-10 crop year,* and during the 1910-11 crop year the profits amounted to £894 2*s.* 7*d.*

The general revenue of the Colony benefits to the extent of £400 per annum from the profits of this institution.

There are three private ginneries in the Colony, the largest of which is situated in Kingstown, and is fitted up with five gins.

The co-operative cotton-buying scheme for peasants at the Government factory, described in last year's report, continues to prosper, and is yearly increasing the cultivation of this product by small holders, and with it the circulation of ready money in the Colony. During the cotton season just closed, 1911-1912, £4,770 worth of cotton was bought at the Government ginnery from small growers. At date of writing a bonus on sales of £2,763 is being, in addition, distributed to sellers—making in all £7,533 paid during the season to small holders for cotton grown by them.

About 20 tons of cotton seed of the 1911-12 crop were crushed by the disintegrator at the Government ginnery for manurial purposes.

The price of lint during the year was good, reaching as high, for some special bales, as 26*d.* per pound. The average sale price was, however, from 17*d.* to 20*d.* for Sea Island cotton, while Marie Galante sold from 6*d.* to 10*d.* a pound.

The export of whale oil rose from £164 in 1910-11 to £228 during the year under review. This is, however, only a fluctuating rise and cannot be taken as an indication of the possibility of a revival of what is now apparently a dying industry, owing to the reduction in the number of whales visiting these waters. Efforts will, it is hoped, soon be made to determine definitely whether a sponge industry cannot be established in the Grenadines, for this, if realized, would take the place of the whaling industry, which until recent years afforded much remunerative employment to the islanders at certain seasons of the year. Numerous species of sponges are to be found there, some of which are said to be of commercial value.

The turtling industry accounts for an export value of £302 as against £176 in 1910-11 and of £515 in 1909-10.

Agricultural Industries and Agricultural Department.

It is pleasing to record again an augmentation in the land in cultivation under Sea Island cotton in the island of St. Vincent, namely, 5,068 acres as against 3,587 in 1910-11. Unfortunately, the heavy rainstorm of September, 1911, damaged the crop considerably with the result that only 487,116 lbs. of lint were reaped as against 561,526 lbs. in the former year with a much smaller acreage. Happily, however, the increased market price of arrowroot compensated in a large degree for the small yield in cotton and, on the whole, it is probable that planters and others have made a reasonably fair profit out of their holdings during the year.

* The crop year is from 1st September to 31st August of the succeeding year.

In the St. Vincent Grenadines, notably Union, Canouan, and layreau, the common Marie Galante type of cotton is grown. It s cultivated as a perennial, and produces a short, coarse lint alued usually at from 8*d*. to 9*d*. per pound. The exports of this otton during the past seven years amounted in the aggregate to 83,921 lbs. weight, valued at £7,397. In several of the other slets, Bequia, Mustique, Battowia, and Balliceaux, the cultiva-ion of Sea Island cotton has been taken up exclusively and with ery satisfactory results.

The table given below shows the acreage planted in Sea Island otton, together with the yield of lint, and the average yield per cre during the past seven years.

Crop Year.	Acreage planted.	Weight of lint in pounds.	Yield of lint per acre in pounds.
905–6	790	137,460	174
906–7	1,533	286,275	175
907–8	3,250	432,000	135
908–9	3,000	372,000	124
909–10	2,528	356,139	141
910–11	3,587	561,526	156
911–12	5,068	487,116	96

The following figures are also interesting and instructive :—

able showing the Quantity and Value of Cotton exported during the period from 1903-4 *to* 1911.

Year.	Sea Island Cotton.		All Cotton.	
	Weight.	Estimated Value.	Weight.	Estimated Value.
	Lbs.	£	Lbs.	£
03–4	Not known	—	43,392	794
04–5	77,814	3,890	126,178	4,494
05–6	121,174	6,059	138,150	7,674
06–7	225,632	16,922	263,036	18,169
07–8	388,833	29,162	427,819	30,787
08	387,178	28,426	420,830	30,048
09	330,936	20,684	350,186	21,325
10	493,494	37,238	521,956	38,409
11	511,947	40,529	538,114	41,619

Arrowroot in export value reached a figure of £40,430 as com-ared with £30,089 in the preceding year. This increase in alue was due not to an increase in production and exportation of is article, but to the enhanced price obtainable in London and her markets owing to the combination for a minimum price the growers and exporters, and to the advertising operations of e St. Vincent Arrowroot Growers' and Exporters' Association,

whose objects are described in last year's report. During the year ordinary and manufacturing quality of arrowroot fetched as high as $3\frac{3}{4}d.$ a pound. In November, 1910, its price was $1\frac{7}{8}d.$ to $1\frac{15}{16}d.$ per pound.

St. Vincent arrowroot is unrivalled in the manufacture of chocolate and for general starch purposes. The soil and climate of the Colony are apparently more suited to this cultivation than that of any of the other islands except, perhaps, Bermuda. That Colony's production, however, does not exceed 30 to 40 tons per annum.

Apart from that point of view, it is evident that the market for arrowroot is of such a limited nature that St. Vincent will, by herself, for many years to come, be able to fully satisfy all the requirements of it.

Sugar continues to be grown chiefly in the Carib country estates, but the exportation figures indicate no increase in quantity. The only noticeable feature with regard to this crop is the increase in the amount of export of crystallized sugar, showing a corresponding decrease in the export of muscovado sugar.

The cultivation of cocoa raises no enthusiasm in St. Vincent, and it seems conclusive that only certain favoured localities and spots are suitable for its growth. The export value figures have, however, increased, and show £5,069 for the year under review, as compared with £4,132 in 1910.

Anthrax has been completely stamped out of the Colony, no case having been diagnosed since July, 1911, up to the time of writing —fifteen months. Precautionary measures continue to be taken in the shape of examination of the blood of all animals dying in the Colony from any cause whatsoever. The neighbouring Colonies have now agreed, under certain relaxed restrictions, to receive stock from St. Vincent.

The officers of the Agricultural Department have continued to carry on good work in experimentation, especially in connection with cotton seed selection, and to assist planters and small growers with their advice. No Colony which, like St. Vincent, is solely dependent for its livelihood upon its agricultural resources can afford to be stingy over its expenditure in the maintenance of an Agricultural Department.

Land Settlement and Crown Lands.

The sales during the year under the Land Settlement Scheme were 96 in all—rural lots 35 and township lots 61. In addition, 24 acres of Crown land were sold out in small lots. Available Crown land consists of mountain lands, which are only suitable for small holdings for growing provisions and native produce.

The revenue from sales and rental of Crown lands was £542, as against £601 in the previous year.

Early in the year the survey of Union Island, purchased by the Government for land settlement purposes, was completed, and the allotment of land to peasants on a twelve years' purchase system was commenced. The area of the island is slightly over 2,000 acres. Over half of it has already been allotted, and it is anticipated that, with the exception of certain portions, about 500 acres,

especially and definitely reserved for forest, it will all have been disposed of within the next two years. A branch money order post office and Government savings bank were established during the year, much to the convenience of the inhabitants.

SHIPPING.

A table of the entries and clearances of steamers and sailing vessels during the years 1910 and 1911 is appended, as also a comparative statement of the total shipping during the last five years. These figures do not include ships of war, of which four such British ships visited the Colony during 1911:—

Sailing Vessels.

III.—LEGISLATION.

A very much needed and long delayed revision of the statutes up to the end of 1911 was completed by the Chief Justice, Mr. W. S. Shaw, during the year and published. This included the drafting and passing of new criminal and civil codes on modern lines. As no revision of the laws had taken place since 1884—namely, for a period of twenty-eight years—the task was a laborious one and of considerable magnitude.

The following Ordinances were added to the Statute Book during the year:—

The Export Duties.
Supreme Court of Judicature Amendment.
Cotton Diseases Prevention.
Statute Law Revision.
Georgetown Jetty.
Quarantine.
Land Settlement (Amending).
Licences, 1896, Amendment, 1911.
Appropriation.
Cinematograph.
Veterinary Surgeons.
Public Health, 1910, Amendment, 1911.
Agricultural Products Protection.
Land and House Tax, 1904, Amendment, 1911.
Excise.
Birds and Fish Protection.
Licences Amendment.
Supplementary Appropriation.
Bills of Sale.
Magistrates.
Indictable Offences (Magistrates Procedure).
Summary Conviction Offences (Procedure).
Small Debts.
Magistrates Decisions (Appeals).
Summary Conviction Offences.
Indictable Offences.
Customs Duties.
Anthrax.

IV.—EDUCATION.

The results of primary education in 1910-11 and 1911-12 are as follows:—

	1910-11.	1911-12.
Number of schools	28	26
Number on roll at 31st March ...	4,552	4,475
Average attendance	2,260	2,193
	£	£
Government Grant-in-aid	1,635	1,702

There is a boys' secondary school with headquarters in Kingstown hitherto with an average attendance of 22 pupils. At time of writing, however, this attendance has gone up to 41, due, no doubt, to a greater prosperity which is pervading all classes of the community. The fees charged are £2 per term for each scholar, except those under ten years of age in the lowest form, for whom the fees are £1 6*s*. 8*d*. per term. But when two or more brothers in forms above the lowest attend there is a reduction made of 6*s*. 8*d*. for the second and 13*s*. 4*d*. for the third.

A girls' secondary school under Government supervision, with headquarters in Kingstown, was opened during the year, the attendance at time of writing being 22. This fills a long-felt want. The fees are the same as at the boys' secondary school.

The attendance at the primary schools continues about the same.

The agricultural school maintained an average of 15 pupils during the year. Special effort is being made to instruct the pupils in the cultivation of cotton and its diseases—very few of the overseers on estates to-day having any technical or expert knowledge of this subject beyond what they have gained by practical experience since the introduction of the Sea Island plant into St. Vincent only eight years ago.

The fifteen acres of land attached to the school is all fully worked up in various products, such as cotton, sugar, &c., by the boys themselves, while each pupil is allowed a small piece of ground as a vegetable garden, the produce of which may be disposed of for his own benefit.

The small stock farm, which continued to be worked as an adjunct to the school, affords a valuable practical illustration of how stock should be kept and fed.

V.—GOVERNMENT INSTITUTIONS.

During the year there were 955 admissions to the Colonial Hospital, making, with those remaining from the previous year, 1,014 cases treated, as against a total of 820 in 1910-11.

The daily average was 60·3 as against 57, 55·8 and 60·7 in the previous three years.

The death rate was 5·5 per cent. of the total cases.

Operations numbered 128 as against 126 in 1910-11.

The medical officer is greatly assisted in his work by the presence of an efficient European nurse-matron, selected by the Colonial Nursing Association.

A portion of the old military citadel at Fort Charlotte is set aside for the detention of male lunatics who are violent, or manifest destructive tendencies. Other males, as to whom it is judged that they may be so treated with safety, are kept under supervision in the Pauper Asylum, and female lunatics are also

detained there. A portion of the wards is partitioned off into cells to provide further and more suitable accommodation for these female cases, some of which are occasionally acute.

As soon as practicable, any violent or difficult case is, by arrangement with that Government, sent to Grenada, but sometimes the asylum there has not got the requisite accommodation, and the transfer is delayed.

There were 21 cases under treatment during the year (9 being new admissions), of whom 2 were discharged cured, 2 died, and 4 were transferred to Grenada.

The total number of St. Vincent lunatics under care in the Grenada Asylum was 28, at a cost of £456 18*s*. 3*d*. to the Colony.

The number of inmates of the Leper Asylum on the 31st of March, 1911, was 7; during the year there was 1 admission, 1 died, and 1 was discharged, leaving 6 inmates in the asylum at the end of the year.

Under a new Public Health Ordinance, which was passed in 1910, compulsory segregation of pauper lepers is now provided for.

The Colony's paupers are housed in the old military buildings at Fort Charlotte at a considerable elevation overlooking the town of Kingstown.

At the commencement of the year under review there were 91 inmates of the asylum, and the admissions and discharges during the year were:—

—	Male.	Female.	Total.
Admissions	21	24	45
Discharged	7	7	14
Died	20	14	34
Total	27	21	48

leaving 88 on the 31st March, 1912.

The total expenditure in 1911-12 was £994 on the pauper and leper asylums, including the cost of lunatics kept locally—the same as last year.

Chronic tertiary syphilis accounts for the vast majority of cases to whom this institution offers asylum for the closing stages of their lives.

Early in the year the old military hospital was renovated at a cost of £250 and opened as a yaws hospital capable of holding 50 patients. The disease of yaws has long been ravaging the homes of the labouring population in the Colony, and the institution of this hospital is much appreciated by them.

Savings Bank.

Appended is a statement of the working of the savings bank for the last five years:—

Ordnance Survey Office, Southampton, 1913.

Year.	Number of Depositors at 31st December.	Amount of Deposits	Amount of Withdrawals.	Balance at credit of Depositors at 31st December (including interest capitalised).
		£	£	£
1907...	1,010	7,629	6,757	13,247
1908...	1,121	6,693	5,929	14,313
1909...	1,063	6,624	7,371	13,869
1910...	1,095	8,686	6,877	15,994
1911...	1,163	9,526	7,923	17,971

The amount due to depositors was distributed thus:—

	At 31st December, 1910.	At 31st December, 1911.
	£	£
Kingstown ...	14,152	16,115
Georgetown ...	1,121	1,107
Chateaubelair ...	721	744
Union Island ...	—	5
Total ...	£15,994	£17,971

The Government made a profit on the working of the bank of £108.

There was invested of savings bank funds at 31st December, 1911, the sum of £16,149.

VI.—JUDICIAL.

The St. Vincent police force consists of a chief, a sergeant-major of European birth, and 49 West Indian non-commissioned officers and privates.

They are drilled, and have some training in the use of arms, and are supplied with Martini-Enfield rifles.

In addition to ordinary police work they perform duties in connection with excise supervision, district post office work, births and deaths registration, poor relief, and the management of district telephone exchanges. The prison is worked entirely by the police, save for the assistance of one warder in charge of gangs outside.

In Kingstown a select number of the force form a fire brigade for the town, receiving supplementary pay for this service from the funds of the Kingstown Board.

Two hundred and thirty-six persons were committed to prison in the year, of whom 134 were men, 95 women, and 7 juveniles. The daily average was 28, as against 35·53 in 1910-11.

The number of cases reported to the police in 1911-12 was 621; of these 53 were for offences against the person, 42 for prædial larceny, 69 for other offences against property, and 457 for other offences. Only 568 of the above cases were brought before a magisterial court.

The total number of persons brought before the magisterial courts was 1,265; of these 356 were for offences against the person, 64 for prædial larceny, 156 for other offences against property, 6 for offences against the Masters and Servants Act, 262 for offences against revenue laws, municipal, road, and other laws relating to the social economy of the Colony, and 421 for other offences. These figures are inclusive of the cases reported by the police.

The total number of convictions in the inferior courts was 883 as against 865 in 1910-11.

These convictions are classed as follows:—

For offences against the person	222
,, malicious injury to property	5
,, prædial larceny	59
,, other offences against property	74
,, offences against Revenue Acts, &c.	227
,, offences against Masters and Servants Act ...	3
,, other offences	293
Total	883

The convictions in the Supreme Court were 13 for offences against property and 1 for other offences.

The acquittals were as follows:—

In the Inferior Courts	155
In the Supreme Court	7

VII.—VITAL STATISTICS.

The population at the 1891 census was 41,054. No census was taken in 1901 on account of the expense involved, which the Colony was not in a position to afford. The population by the official census of April, 1911, was 41,877, which had increased at 31st March, 1912, to 43,117.

The births registered in 1911-12 were 1,790 (926 males and 864 females), as against 1,661 in 1910-11; of these 1,037 or 57·93 per cent. were illegitimate.

Still-births were 94—36 legitimate and 58 illegitimate—the figures for the previous year being 32 and 55 respectively.

Marriages were 153—an increase of 26 on last year's figures. The figures are given in the following comparative table of marriages:—

Denomination.	1909-10.	1910-11.	1911-12.
Church of England	64	50	67
Church of Scotland	11	9	5
Wesleyan	65	60	65
Roman Catholic	21	7	13
Plymouth Brethren	—	1	3

The total registered deaths were 914 as against 835 in 1910-11, being 21·19 per 1,000 of the estimated population. The infant mortality (infants under one year, exclusive of still-births) was 183, being 20·02 per cent. of the total number of deaths. The similar figure in 1910-11 was 208 or 24·91 per cent.

Appended is a table of the causes of death:—

General diseases (includes syphilis, 68; tubercle, 24; tetanus, 25; malarial fevers, 7; dysentery, 16)	232
Diseases of nervous system	36
,, ,, circulatory system	59
,, ,, respiratory system	56
,, ,, digestive system	172
Parasites	71
Age	91
Still-born	94
Other diseases	103
Total	914

In the towns the authorities are realising more and more the importance of stricter sanitation and are taking steps accordingly. In the villages, however, sanitary matters are still on a most primitive basis, although the Government, through their District Medical Officers, spare no pains to impress upon the population generally the necessity for care in this direction.

The rainfall for the year 1911-12 (at the Botanic Station, 206 feet above the sea level) was 119·07 inches, as against 103·22 inches in 1910-11.

Rain fell on 264 days during the year.

The maximum fall in twenty-four hours was 7·97 inches on the 25th September.

September was the wettest month, with 21·81 inches. A good deal of damage was done to the roads during that month owing to the heavy rain, while the effect on the cotton crop was also somewhat disastrous.

February was the driest month, with 3·93 inches.

The mean monthly temperature was 78·4° F. Maximum for the year was 88° F. (in August, September and October) and the minimum 68° F., which was experienced in February.

Except in August and September, when the atmosphere is uncomfortably hot, although not even in those months insalubrious, the climate may be regarded as most healthy for both Europeans and coloured persons. Malaria is hardly known, while yellow fever has proved itself to be a disease of the past.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The fortnightly mail service from and to England continued to be performed by the Royal Mail Steam Packet Company. At Trinidad the mails are transferred into the inter-colonial ships, which call weekly at St. Vincent on regular days—one week with outward mails on the way round the islands, and the following week on the way to Trinidad with homeward mails. The service was carried on in a satisfactory manner.

The steamers of the Pickford and Black Line, from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued to run as usual, while occasional calls were made by the steamers of the Quebec Steamship Line. During the year an arrangement was made with Scrutton's Direct Line to call once a month outward and homeward bound. The East Asiatic Line of steamers from Copenhagen viâ London and the Danish West Indies also made occasional calls.

There is an inland postal system by which the Windward district of the Colony is served three times a week, the Leeward district daily, and the Grenadines once a week.

The postal order system continues to grow in popularity, and its extension to the district towns has been accomplished.

The volume of work in the Post Office also continues to expand, which is a sure sign of the upward march of the Colony.

The revenue of the telephone department was £569, including £281 transferred to that head on account of the Government installations. The expenditure was £518. The main installation is in Kingstown with branch lines all over the island. The service is a most useful one.

IX.—GENERAL OBSERVATIONS.

During the year there has been no change in the heads of administrative departments. The Administrator on one occasion paid a visit to Grenada to consult the Governor-in-Chief on affairs of the Colony and was absent for about 7 days. From the 26th June, 1911, to the 3rd January, 1912, the Administrator was absent on long leave. During that period His Honour W. S. Shaw, Chief Justice, administered the government.

The Royal Coronation in London of Their Majesties King George V. and Queen Mary, which took place on the 22nd June, 1911, is to be regarded as the most important event of the year

under review. This occasion was celebrated throughout the Colony with much rejoicing and will long be remembered for the many manifestations of loyalty and devotion to Their Majesties' throne and persons which it evoked. A small permanent memorial of the event, in the form of a stock drinking trough, was erected in the market place in Kingstown.

In March, 1912, St. Vincent despatched two delegates to Canada to take part in the Ottawa Conference between Canada and the West Indies convened for the purpose of arranging a preferential trading agreement between the two places. The agreement resulting from the labours of this Conference has since been adopted by the Colony and will in all probability be brought into force early in 1913.

With the help of the Treasurer of Grenada, an expert in such matters, a complete re-organization of the Excise system and Department was effected during the year.

The Colony's trade continues to expand and evidences of increasing prosperity are visible on every side. In this beautiful island material prosperity is dependent solely upon good crops, good prices, and good weather.

The inhabitants of an island which produces the best cotton in the world and an unrivalled class of arrowroot can reasonably hope to attain a standard of comfort and prosperity comparable with that obtaining in any other British tropical possession.

A sketch map of the Colony is attached to this Report.

C. GIDEON MURRAY,
Administrator.

16th October, 1912.

COLONIAL REPORTS, &c.

No. 752.

ST. LUCIA.

(For Report for 1910–11, *see* No. 713.)

THE GOVERNOR TO THE SECRETARY OF STATE.

St. Vincent,
21st January, 1913.

Submitted. The report shows a satisfactory increase in material prosperity, due principally to a marked expansion in the Colony's trade, whilst the total shipping tonnage was the highest on record in the Colony.

The recorded progress in agriculture is still slow, but a good start has been made with the lime industry, larger areas are now coming into bearing, and it is expected that the product will before long figure largely in the export list.

The new lighthouse at Moule-à-Chique is a great success, and will prove to have an important bearing on the shipping interests of the Colony.

Unfortunately the report issues late, a defect which, I trust, will be remedied next year.

J. HAYES SADLER,
Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

Government House,
Saint Lucia,
17th January, 1913.

SIR,

I HAVE the honour to transmit herewith copies of the Blue Book of this Colony for the year 1911-12, together with my report thereon.

I have, &c.,

EDWARD J. CAMERON,
Administrator.

His Excellency
Lieut.-Col. Sir J. Hayes Sadler, K.C.M.G., C.B.,
&c., &c., &c.
Grenada.

(28807—2.) Wt. 35104—688. 1125 & 90. 3/13. D & S. A 2

ANNUAL REPORT FOR THE YEAR 1911-1912.

I.—FINANCIAL.

The revenue for the financial year ended 31st March, 1912, including £300, the Imperial Grants in aid of agriculture, amounted in round figures to £71,979, an increase of £6,913 as compared with the revenue for the preceding year, and £7,127 above the Estimates.

The following statement gives the details:—

Heads of Revenue.	Actual Revenue. 1911-12. £	s.	d.	1910-11. £	s.	d.
1. Customs	35,781	13	7	32,162	11	9
2. Port, Harbour, &c., Dues	7,710	6	8	6,171	8	8
3. Licences, Excise, &c.—						
(*a.*) Licences—						
Retail Spirit, &c.	1,524	10	0	1,563	0	0
Distillery ...	100	0	0	100	0	0

	£71,031	12	3	£63,821	2	2
11. Land Sales	647	1	2	745	0	3
Total Local Revenue	£71,678	13	5	£64,566	2	5
12. Imperial Dept. of Agriculture—						
Grant-in-aid ...	300	0	0	500	0	0
Total Revenue	£71,978	13	5	65,066	2	5

Nearly every Head shows an increase, the chief items being £3,619 under Customs and £1,539 under Port and Harbour dues, both mainly due to the exceptional amount of the shipping visiting the Port for coaling purposes.

The articles contributing chiefly to the excess receipts under Customs were:—Coal, £902; Tobacco, £603; Flour, £463; Cigarettes, £254. On the other hand, however, part of these increased importations was to meet the demands of the shipping for "ship's stores," and the amount of duty refunded on such stores exported was appreciably larger than in the year previous.

Under Head 3, Excise gave an increase of £716 over the figure of the year before, and the total was the largest since 1907.

The old Road Tax was replaced in 1910 by an Income Tax, and 1911-12 was the first occasion of a full year's collection being taken. The result was a very satisfactory one, the total reaching to £1,707 against an estimate of £1,500. Deductions from salaries, fees, and pensions of public officers contributed £295 of the total.

Under the Head, Post Office, there were heavy sales of postage stamps, the demand being large in anticipation of early change of issue.

The following are the figures of the revenue for the last five years, distinguishing local receipts from those from the Imperial Grant in aid of agriculture:—

		£	s.	d.	£	s.	d.
1907-8.	Local	66,636	1	1			
	Imperial Grant ...	715	0	0			
					67,351	1	1
1908-9.	Local	65,194	0	7			
	Imperial Grant ...	500	0	0			
					65,694	0	7
1909-10.	Local	65,239	18	11			
	Imperial Grant ...	500	0	0			
					65,739	18	11
1910-11.	Local	64,566	2	5			
	Imperial Grant ...	500	0	0			
					65,066	2	5
1911-12.	Local	71,678	13	5			
	Imperial Grant ...	300	0	0			
					71,978	13	5

The number of licences for the sale of intoxicating liquor issued during the year ended the 31st March, 1912, as well as the revenue derived therefrom, is shown below:—

The similar revenue figure was, respectively, in 1909-10 and 1910-11, £1,657 and £1,570, and this gradual decrease does not seem to be quite satisfactory:

Description of Licence.	No. issued during quarter ended on				Revenue.
	30th June, 1911.	30th September, 1911.	31st December, 1911.	31st March, 1912.	£ s. d.
Wholesale	2	2	2	2	40 0 0
Retail Spirit	41	41	41	41	1,352 0 0
Bottle	2	2	2	2	80 0 0
Refreshment House ...	2	2	2	2	45 0 0
Hotel	1	1	1	1	6 0 0
Occasional	4	—	—	1	1 10 0
					1,523 10 0

The total expenditure amounted to £69,329, including £549 from the Imperial Agricultural Grant-in-Aid, £249 of which was from the unexpended balances of previous years' grants.

The expenditure from local funds was £68,780, being £537 more than estimated, and £1,877 more than in the year previous.

The following statement gives the detail:

Heads of Expenditure.	£ s. d. 1911-12.	£ s. d. 1910-11.
1. Charges on account of Public Debt	9,396 16 2	9,398 15 2
2. Pensions and Gratuities...	2,534 3 0	2,249 10 3

22. Public Works Recurrent	7,357 14 8	7,529 6 6

Heads of Expenditure.	£ s. d. 1911-12.	£ s. d. 1910-11.
23. Public Works Extraordinary	4,849 4 1	5,030 15 3
Total Local Expenditure	68,780 1 3	66,903 2 9
19a. Agriculture (from Imperial Funds)	548 17 5	385 1 11
Total Expenditure	£69,328 18 8	67,288 4 8

The large decrease under Head 5, Treasury, is mainly accountable for by the transfer of the item Drawbacks and Refunds to the Miscellaneous Head, the increase in which is correspondingly large. The amount paid out as Drawbacks and Refunds was £1,802. Other exceptional items under the last Head contributing to the large total were Expenses of Coronation Celebration, £306, and of the taking of Census, £589. Subsidy was also paid by St. Lucia for continuation of the Pickford & Black Canadian Steamer Service on expiration of the previous contract of that firm with the Canadian and Imperial Governments, the amount for the year being £279.

The following figures show the expenditure of the Colony for the last five years, distinguishing expenditure from local sources and that from the Imperial Grant in aid of agriculture:—

		£ s. d.	£ s. d.
1907-8.	Local	64,152 3 11	
	Imperial Grant ...	687 11 7	
			64,839 15 6
1908-9.	Local	64,433 14 4	
	Imperial Grant ...	604 3 10	
			65,037 18 2
1909-10.	Local	64,048 1 9	
	Imperial Grant ...	398 3 11	
			64,446 5 8
1910-11.	Local	66,903 2 9	
	Imperial Grant ...	385 1 11	
			67,288 4 8
1911-12.	Local	68,780 1 3	
	Imperial Grant ...	548 17 5	
			69,328 18 8

As a result of the transactions of 1911-12, the Colony's surplus at 31st March was increased by £2,898, and stood at £27,913, making, with the accumulated Public Building Insurance Fund, amounting to £4,350, a total surplus of £32,263. Of this amount £25,140 15*s.* 11*d.* is invested in securities by the Crown Agents in England, £1,500 is on deposit locally at the Colonial Bank, and £3,499 14*s.* 5*d.* is loaned to the Castries Town Board and Water Authority.

Public Debt.

The Public Debt of the Colony at 31st March, 1912, stood at £144,729 11*s.* 0*d.*, and the accumulated Sinking Fund towards its redemption at £19,274 4*s.* 6*d.*

The Debt is made up of the following:—

	£.	s.	d.
Castries Harbour Loan	49,950	0	0
Immigration	8,000	0	0
Central Factory	7,200	0	0
Public Works	50,579	11	0
Castries Waterworks (Colony's contribution towards cost)	12,000	0	0
For loan to Castries Town Board (for Waterworks and other purposes) ...	17,000	0	0
	£144,729	11	0

Of the above the interest and redemption charges on £17,000 are recovered from the Town Board's municipal revenues, as also on £550 of the £50,579 11*s.* 0*d.* for Public Works.

Currency.

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper. A few Bank of England notes are occasionally seen. Accounts are kept in sterling by the Government, and in dollars and cents by the Bank and mercantile firms, the dollar being equal to 4*s.* 2*d.*

Finances of Municipalities.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates and dues, market dues and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

The following statement shows the revenue and expenditure for the last five years of the towns and villages, the amount of their indebtedness at the 31st March, 1912, and the balance standing to their credit at the same date:—

Town or Village.	1907–8.		1908–9.		1909–10.		1910–11.		1911–12.		Indebtedness at 31st March, 1912.	Credit Balance at 31st March, 1912.

During the year under review the water works system of Castries was thoroughly inspected and reported on by Mr. E. V. Acton, Engineer of the Port of Spain, Trinidad, Waterworks, and as a result an Ordinance was passed and a loan from General Revenue made to the Water Authority of £2,500, to enable an improved supply to be secured.

At Soufrière some progress was made in street improvements and more efficient lighting.

The question of lighting arrangements in Canaries and Gros Islet also received attention.

A grant of £200 and a loan of £800, both from General Revenue, were made to the village of Dennery for the provision of a small water supply, the carrying out of which, however, has been delayed by various circumstances.

Speaking generally, these small towns of St. Lucia, all of them being on the coast-line, are nicely laid out and situated, and are reasonably well kept and managed, and their general standard and appearance can bear favourable comparison with those of similar sized places in other islands.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The following is taken from the Treasurer's annual report:—

Trade.

"The total value of the imports for the calendar year amounted to £318,590 19*s*. 1*d*. as compared with £277,207 14*s*. 0*d*. in 1910. The countries from which they were imported are given below with figures for the previous year for comparison:—

	1911.	1910.
	£	£
United Kingdom	75,976	79,547
British Guiana	945	1,100
British West Indies	6,714	6,992
Canada	11,630	14,798
Ceylon	287	351
India	3,870	3,077
Newfoundland	548	1,528
Other British Colonies	256	152
United States of America ...	200,286	154,123
France	7,045	5,523
Germany	2,426	2,335
Foreign West Indies	985	1,034
Other Colonies	4,595	3,670
By Parcel Post	3,027	2,977
Total	£318,590	£277,207

The imports are summarised as follows:—

	1911. £	1910. £
I. Food, drink and tobacco ...	75,971	74,188
II. Raw materials and articles mainly unmanufactured ...	152,355	108,264
III. Articles wholly or mainly manufactured	78,344	88,062
IV. Miscellaneous and unclassified, including imports by parcel post	3,840	3,893
V. Bullion and specie	8,080	2,800

The increased importation of coal, £41,583 in excess of 1910, almost accounts for the difference between the total figures of the two years. A slight drop occurred in the imports from the United Kingdom with a corresponding increase from the United States. The latter country is, of course, our best market for food supplies. We obtained from there £39,882 or just over fifty per cent. of our imports of that class. From there also came the entire supply of bunker coal for our coaling business, valued at £146,834. Other large importations were cottons £2,184, boots and shoes £2,873, gasolene and petroleum £1,637, and building pitch and white pine £1,038. The imports of other descriptions amounted only to £6,855.

Doubtless some of our imported goods from the United States might have been of Canadian origin. Flour and fish, salted and dried, are large items of Canadian produce and, of such imports valued at £20,740 and £11,370, only £2,378 and £4,940 respectively were accounted for as from Canada. Deducting coal and petroleum, as assured imports from the United States, the figures for 1911 show £51,814 of other exports from that market for which Canadian enterprise might compete. But any further diversion cannot be expected until suitable direct steam communication, and freight charges, offer advantages that can favourably compare with the existing conditions of trade with the United States. We get a reliable fortnightly service from New York by the Quebec steamers, giving the opportunity for regular importations and quick sales. Without equal facilities from the Canadian market there can be no successful competition."

Exports.

"The total exports amounted to £273,111 1*s.* 2*d.*, or £45,479 17*s.* 11*d.* less than the imports, and £34,156 2*s.* 7*d.* less than the exports in 1910.

The following is a summary:—

Exports to.	Island Produce. £	Exports, other than Island Produce. £
United Kingdom	65,440	1,134
Canada	9,678	—
British West Indies	2,780	4,780

Exports to.	Island Produce. £	Exports, other than Island Produce. £
United States	1,687	—
France	31,719	160
Other Countries	1,183	277
Foreign West Indies	1,119	191
	£113,608	6,542
Bunker Coal	—	152,951

The exports of island produce, with declared values, are given below with figures for 1910 for comparison.

—	1911.		1910.	
	Quantity.	Value. £	Quantity.	Value. £
Cocoa	2,073,600 lbs.	46,656	1,637,400 lbs.	40,935
Sugar Usine	4,288 tons	52,535	5,199 tons	64,987
„ Muscovado ...	172 „	1,555	76 „	760
Logwood	2,638 „	5,276	463 „	936
Molasses	74,306 galls.	1,400	95,220 galls.	1,914
Rum	12,410 „	1,034	4,692 „	391
Cotton	3,917 lbs.	275	17,770 lbs.	1,301
Honey	363 pkgs.	447	229 pkgs.	402
Limes, Green	234 „	129	35 „	13
Lime Juice	49 „	148	70 „	319
Firewood	1,115 cords	557	1,364 cords	682
Hides and Skins ...	151 pkgs.	820	161 pkgs.	926
Cocoanuts	19,750 (No.)	110	6,750 (No.)	119
Pimento Sticks ...	14,103 „	428	13,175 „	545
Fresh Fruit, Mangoes	36,000 „ 912 pkgs.	503	20,000 „ 1,408 pkgs.	521
Various, unspecified ...	—	1,735	—	1,551
Total	—	113,608	—	116,306

The value of the exports of ships' stores, which is probably between £8,000 and £10,000, is not included in the above figures, no proper statistical record of these having hitherto been kept. This omission will now be rectified."

Coaling Trade.

It will be seen from the figures below of shipments for the last five years, that 1911 was a bumper year for the coaling business. This is understood to have been largely due to poor crop conditions in the Plate, bringing much shipping which would usually have filled up there, north on the look out for freight.

Year.	Tons.	£
1907	118,503	142,381
1908	85,460	102,288
1909	96,462	115,754
1910	97,384	116,861
1911	130,056	152,962

This business affords steady and remunerative employment to a large number of carriers, both male and female, dwelling in and in the vicinity of Castries, by whom the vessels are discharged and loaded.

The following extract from the report of the Treasurer is of interest:

"In the coaling trade Port Castries takes first place in the British West Indies; and the business of the port in this direction is steadily increasing, the facilities for fast despatch being unrivalled. The wharfage accommodation is suitable for steamships drawing up to 27 feet. The coal supply is in close proximity to the berthing space and the delivery averages 100 tons an hour, with greater celerity when required. On 11th April the German Cruiser 'Bremen' received 550 tons in four hours, and on a more recent occasion 900 tons were delivered to H.M.S. 'Cornwall' in 5½ hours, equal to 164 tons an hour, being the quickest record for bunkering in the West Indies."

Mines, Manufactures, and Fisheries.

Work on the sulphur deposits at Ventine in the Soufriere District practically ceased and is scarcely likely to be taken up again.

The sugar factories at Cul de Sac, Roseau, Vieux Fort, and Dennery were all working during the year.

The following figures show the quantity of rum distilled, consumed, and exported during the last five years:—

Year.	Distilled.	Consumed.	Exported.
	Galls.	Galls.	Galls.
1907	57,213	51,453	3,652
1908	83,532	51,216	23,440
1909	72,633	46,949	27,883
1910	49,256	42,456	4,692
1911	63,961	44,516	12,787

Fishing is carried on all round the coast of the island and there is an ample supply, but it is only tapped sufficiently to meet the local demand.

Agricultural Industries.

The principal products of the Colony are sugar and cocoa. Lime cultivation is, however, making satisfactory progress and promises to become of very considerable importance. A fairly large area is already planted up and will soon reach the bearing stage, and cultivation is being rapidly extended. This cultivation is also attracting the attention of small growers.

The quantity and value of the export of sugar and cocoa during the past five years were as follows:—

Year.	Cocoa.		Sugar: Usine.		Other sugar, Muscovado, and products thereof.
	Quantity.	Value	Quantity.	Value.	
	Bags of 200 lb.	£	Tons.	£	£
1907	8,598	47,292	5,302	53,020	1,432
1908	6,775	30,488	4,881	53,691	2,813
1909	10,850	54,275	5,360	59,623	2,265
1910	8,187	40,935	5,199	64,988	2,674
1911	10,368	46,656	4,288	52,535	1,955

The Agricultural Superintendent reports that the smaller output of sugar is attributable to the very heavy rainfall of 1911, which caused damage by flood and also made it impossible to carry out proper tillage and weeding operations, besides waterlogging the soil and thus checking the growth of the canes.

As regards cocoa, there has been some small extension, and the methods of cultivation have received attention, but expenditure has been rather diverted to limes, in which the interest is growing.

The actual quantity of lime product exported—green limes and juice—was still quite small, but from now on, with larger areas coming into bearing and plant to deal with them being erected, we may expect to see a steady increase in the output.

The planting of cocoa-nuts is also being taken up, and there is no doubt scope in the Island for a very profitable extension of this cultivation.

Cotton planting has not proved a success in St. Lucia, and only a very negligible quantity was grown during the year.

The Agricultural School at Union, as originally conducted, was closed, and a scheme for training agricultural pupils at the Botanic Station was inaugurated, the details being fully explained and information as to them widely distributed. It cannot be said, however, that this has proved a success, only two youths having come forward so far to take advantage of the training offered.

The general activities of the department were well maintained and the staff was strengthened by the appointment of an Assistant Agricultural Superintendent, thus enabling a greater measure of time to be given than before by the officers to the country districts.

The peasant cocoa holdings have received special attention.

The Imperial Commissioner of Agriculture, Dr. Watts, C.M.G., also visited a large number of estates in the Soufrière, Vieux Fort, and Micoud Quarters during the month of March last, studying local conditions and conferring with planters and others interested in the possibility of agricultural improvement and development.

Land Grants.

Fifty-one grants for Crown Lands were issued during the year, the acreage disposed of being 421 acres. The price of such land

is at the rate of £1 per acre, payable one-fifth on application and the rest in four annual instalments.

Sixty-nine new applications for land were filed.

Shipping.

The total tonnage of shipping entered and cleared at the Port of Castries, the only port of entry in St. Lucia, amounted to 3,996,163 tons, the highest record for the Colony.

This is a higher tonnage than in Jamaica, Barbados, Trinidad and Tobago, or British Guiana, comparing it with the figures of 1910 for these places.

The number of steamers, 943, was far in excess of any previous year. Of these 817 were of British nationality.

The port was visited by seven warships and six yachts.

A summary of the statistics for the last five years is attached :—

Vessels Entered.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.

1911 ...	815	1,778,865	182	5,110	127	210,621	41	2,535

Castries is also a port of registry, and at the close of the year had twelve vessels on the register, with a tonnage of 606. All these are small sailing vessels, locally owned with one exception,

a schooner of 417 tons. Of four of the vessels on the list aggregating 93 tons, all trace has been lost, and these will not reappear, so that the total of the port is in reality a very small one.

A new scale of fees for registration and measurement, more in keeping with local requirements than the old one, was adopted during the year.

The new lighthouse at Moule-à-Chique, the southern extremity of the Island, referred to in the last report, was completed. This admirable light is greatly appreciated by the shipping having occasion to come to the Island.

III.—LEGISLATION.

Twenty-five Ordinances were passed during the year 1911. Of these the more important were "Turtle and Fish Protection," "Weights and Measures" (by which the Imperial Standard of measure is substituted for the old Winchester measure, and provision is made for due inspection of weights and measures which has not hitherto existed), "Surveyors and Boundaries Settlement" (by which the existing law is consolidated and amended), and "Money Lending."

IV.—EDUCATION.

The 1911 Annual Report of the Inspector of Schools furnished the following figures:—

	1910.	1911.
Number of Schools	53	53
Number on Rolls	7,259	7,268
Average Attendance	4,625	4,625
Number Examined	6,745	6 227
Government Grant-in-Aid ...	£3,942	£3,912

Of the 53 schools 46 are Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 East Indian Mission (Presbyterian). Of the 7,268 children on the rolls, 3,598 are boys and 3,670 girls.

The census was taken on April 1st, 1911. The following figures show the growth of school attendance during the last two decades:—

—	1891.	1901.	1911.
Population	42,220	49,883	48,637
Average attendance	1,810	3,433	4,625
Percentage	4·3	6·9	9·5

A special census taken during the course of the year showed that nearly 75 per cent. of the prisoners in the Royal Gaol were

illiterates. The examination in agriculture, theoretical and practical, was carried out by the Agricultural Department. Of the 17 schools examined, seven showed improvement on the results of the previous year, seven retained their position, and three lost marks. It may be pointed out that agriculture is only taught in schools with juvenile boys; the girls' schools and infant schools have no school gardens.

Hygiene has been taught, as during the previous year, in every school in the Colony, from Standard II. upwards. The Inspector of Schools reports that the examination results in this subject were satisfactory and that, further, progress has been made in getting the children to appreciate the practical importance to themselves and their families of observing the simple rules of hygiene explained to them in school.

Of the two schools of secondary education, St. Mary's College, for boys, receiving a government grant of £400 per annum, had, during 1911, an average attendance of 46; St. Joseph's Convent School, for girls, receiving a government grant of £150 per annum, had an average attendance of 90.

V.—GOVERNMENT INSTITUTIONS.

The only general hospital in the Colony is the Victoria Hospital, within half a mile of Castries, a large stone building with outhouses, &c., capable of accommodating 80 patients. The daily average during 1911-12 was 65, and the cost works out at £1,701, or £26 per head. Considerable outlay has been incurred latterly in connection with this institution in an attempt to improve and uplift the tone and condition generally, which is meeting with fair success.

In the town of Soufrière and at the villages of Vieux Fort and Dennery, where there are resident medical officers, small buildings are provided and fitted to serve the purposes of casualty hospitals, and as such are very useful. There are seldom more than two or three cases under treatment at a time at these places, and often they are empty.

Situated on a breezy spot near the sea beach within a mile of the town of Soufrière is the general poor asylum, which takes in and makes good and welcomed provision for the human wreckage of the Colony, the majority of which drift there only in the last stage preceding dissolution.

The daily average at this institution was 61·63. This provision for paupers of the Island is supplemented by an outdoor relief system under the supervision of the Police Department.

Lower down on the shore itself is the yaws asylum, with a daily average of about 46·42, and here also in addition to yaws patients two or three lepers are housed, for whom separate accommodation has not yet been provided.

There are visiting stations at various other points where medical officers attend regularly on fixed days, and are available to those who require their services.

At Castries the Medical Officer in charge of the Victoria Hospital dealt with a very numerous out-patient clientele from the town at the hospital dispensary, but this has now been changed, and a separate dispensary established in the town, which is a preferable arrangement.

There is no reformatory or industrial school in the Colony.

Savings Bank.

There is a Government Savings Bank, with 1,626 depositors and a total sum on deposit at 31st December, 1911, of £19,778 5*s.* 4*d.* Over £18,000 of this sum stands invested in various securities by the Crown Agents.

VI.—JUDICIAL STATISTICS.

Police.—The Police Force consisted of a chief, a sergeant-major, a staff sergeant, and 69 West Indian non-commissioned officers and men. The post of staff-sergeant, which remained vacant during the whole of the previous year, was filled by the appointment, in June, 1911, of one of the senior sergeants. The force is armed, and receives musketry and drill instructions, as part of the local forces, from a European musketry and drill instructor, under the supervision of the Staff Officer of the Windward Islands.

In addition to their ordinary duties, the police carry out a considerable amount of work in connexion with the details of administration, such as enforcement of sanitary regulations, distribution of poor and medical relief, registration of births and deaths; and in certain districts they are in charge of the post offices and the telephone exchanges.

The total expenditure on the department was £4,236, of which £3,666 was for personal emoluments and £570 for clothing, equipment, &c.

Prisons.—The total number of persons committed to the Royal Gaol was 317, of whom 66 were on remand and 250 for imprisonment on conviction. The daily average number in prison was 50·83—42·50 males, 8·29 females, and ·04 juveniles. The highest number in confinement was 73, and the lowest 31.

There was one escape during the year, a male prisoner working in a gang at the Botanical Station. He was re-captured shortly afterwards. Four prisoners were released on the occasion of His Majesty's Coronation.

The average number on the sick list was 1·95. The Medical Officer reports that on the whole the year was a healthy one so far as the prison was concerned, and there were no deaths.

The expenditure on the establishment was £1,363, and the average cost of a prisoner was 1*s.* 5½*d.* a day, or £26 14*s.* 7*d.* per annum. The total estimated value of prison labour was £615 16*s.* 2*d.*

Criminal Statistics.—The following table shows the average figures for the five years 1906 to 1910, the actual figures for the

first quarter of the year 1911, and those for the year ended the 31st March, 1912:—

—	Average 1906–10.	First Quarter of 1911.	1911–12.
Offences reported	1,810	248	1,224
Summary Convictions :—			
Offences against property ...	137	41	148
Offences against the person ...	320	52	291
Other offences	1,138	233	885
Convictions in Superior Court :			
Homicide	—	—	—
Offences against property ...	17	2	5
Offences against the person ...	5	2	6
Other offences	22	2	—

VII.—VITAL STATISTICS.

Population.—According to the census taken on the 2nd April, 1911, the population numbered 48,637, of whom 22,336 were males and 26,301 were females. Compared with the census of 1901, there was a decrease of 1,246 or 2½ per cent. The estimated population on the 2nd April, as shown by the reports of the Registrar of Civil Status, should have been 56,588, but the latter figures are based on the natural increase—the excess of births over deaths—and take no account of emigration or immigration, of which there are no records.

At the 31st March, 1912, the population is estimated to have been 49,205, made up of 22,521 males and 26,684 females. The birth-rate for the year ended on the same date was 35·5 per thousand, and the death-rate was 20·2 per thousand, still-births being excluded in each case. There were 251 marriages during the year.

Public Health and Sanitation.—All the Medical Officers report the health of the Colony during the year 1911-12 to have been generally satisfactory, with the exception that in the Castries, Soufrière, and Vieux Fort districts there were outbreaks among children of measles and whooping cough, and a sharp outbreak of influenza occurred in Castries during the month of February.

The reports of the Medical Officers are corroborated by the number of persons seeking attention at the various dispensaries throughout the Colony, the figures for the last three years being as follows:—

1909	13,716
1910	10,843
1911-12	10,587

Sanitary matters received strict attention during the year, and the reports received show that on the whole the work continues to be well carried out. The heavy rains, it was found, washed out

the " millions " fish that had been distributed in certain localities to keep down the numbers of mosquitoes. The places were at once re-stocked and the fish soon regained their former numbers.

The Chief of Police, whose department is charged with the carrying out of the sanitary regulations, reports that the usual inspections were paid by the inspectors but that there was nothing that called for special action.

Climate.—The average annual rainfall at twenty stations was 114·01 inches in the year 1911, the highest fall being at Warwick Estate in the Choiseul district, where 154·85 inches were recorded, and the lowest at Black Bay Estate, in the Vieux Fort district, which returned 73·74 inches. The rainfall in February, 1911, was 16·64, and was even more unusual than the abnormal fall in May of the previous year, as February is generally the dryest month of the year, its average over a period of twenty-one years being only 3·35 inches. The total year's rainfall at the station was 107·67 inches. The mean monthly temperature in the shade was 78·4°; the maximum shade temperature was 92° on September 16, and the minimum 60° on February 19. The corrected readings of the barometer ranged from 29·950 in October to 30·081 inches in July, the mean annual pressure being 29·993 inches.

VIII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly inter-colonial mail service, performed under contract by the Royal Mail Steam Packet Company's steamers, was regularly carried out during the period under review; and the inter-colonial steamers of the Compagnie Generale Transatlantique (which touch at Castries going and coming en route between French Guiana and the Northern French Colonies), those of the Danish East Asiatic Company, and those of the Quebec Steamship Company (which call regularly on their fortnightly voyages from and to New York) continued their services as usual.

In May, 1911, a new contract was entered into between the Government of Canada and Messrs. Pickford and Black, under which the calls of the Company's steamers at St. Lucia were omitted. As the result of negotiations entered into with the Company, an agreement was come to by which their steamers from and to Halifax, sailing from the latter port at intervals of twenty-two days, call at St. Lucia, the Colony paying an annual subsidy for the service of £500. The agreement was for one year commencing from October, 1911.

The following comparison between the post office statistics for the years 1910 and 1911-12 shows that the business of the department continues to increase:—

	1910.	1911-12.
Letters and postcards:—		
Sent	103,304	106,239
Received	104,893	105,474
Inland	95,577	94,950
Parcels despatched	350	479
,, received	2,662	3,154

	1910.	1911-12.
British Postal Orders issued	4,602	4,986
,, ,, ,, value	£2,643	£2,769
,, ,, ,, paid	829	846
,, ,, ,, value	£353	£392
Money Orders issued	4,426	4,352
,, ,, paid	£4,216	£3,355

The revenue of the Post Office amounted to £1,740, and the expenditure to £2,160.

There was also duty collected at the Post Office on parcels amounting to £428.

There is regular and daily postal communication, under local contract, between Castries and the leeward coastal towns and villages, the service being carried out by the Royal Mail Company's coasting steamer. On the windward side of the Island, communication by post is overland and is made twice a week only.

All the towns and villages of the Colony are connected by telephone with Castries. During the year 1911-12 there were 214¾ miles of line open for traffic, and the subscribers numbered 137.

There were 115 messages transmitted, and 242 sixpenny tickets were sold to non-subscribers using public telephones. The total receipts were £839, and the expenditure amounted to £668.

General Remarks.

The year 1911-12 was a fairly eventful one.

The Census was effectively taken in April disclosing a small reduction in the number of the population during the last decade. The full and interesting report by the compiler of the Census, Mr. J. E. M. Salmon, will repay perusal.*

The celebrations in June of the Coronation of Their Majesties King George V. and Queen Mary throughout the Colony were an unqualified success and carried out with a loyal heartiness and co-operation among all classes which was most gratifying.

The whole was executed as planned, and with the adjuncts of fine weather, good organization, and most hearty assistance from all concerned, the people of the Colony enjoyed a two days' festival which will remain a glowing memory to them for many years, while at the same time a full appreciation of the occasion and its significance was duly secured. The essentially British character and features of the celebration were also strongly in evidence.

Sir James Hayes Sadler, K.C.M.G., C.B., Governor of the Windward Islands, was absent on leave from 11th July to 6th December, during which period the general government was administered by Mr. E. J. Cameron, C.M.G., Administrator of St. Lucia. Mr. A. De Freitas, Attorney-General, acted as Colonial Secretary at St. Lucia.

Mr. H. A. Smallwood, the Treasurer, was promoted to the post of Treasurer of the East African Protectorate, and left the Colony on 6th August, being succeeded later by Mr. E. D. Laborde, I.S.O., Chief of Police.

On the Governor's return from leave, His Excellency paid a visit of a month to the Colony early in January, 1912. As one

* The Report may be seen in the Library of the Colonial Office.

Ordnance Survey, Southampton 1913.

of the results of such visit, the political dead-lock which had endured since 1909 was removed, and the Legislative Council reconstituted with a full complement of Unofficial Members, a condition which is more in consonance with the business needs and the dignity of the Colony, and which it is hoped may not again be disturbed.

Mr. Cameron, the Administrator, was in March, 1912, nominated by the Governor with the approval of the Legislative Council as representative of the Colony at the Trade Reciprocity Conference at Ottawa, and left the Colony on this duty on 17th March.

The gradual progress in road improvement and opening of new lines of communication was continued, and the largest bridge yet erected in the Colony, over the Troumassee River, one of the main obstacles on the Windward line of highway, was brought near to successful completion.

The new lighthouse at Moule-à-Chique was another work of public importance undertaken during the year which has since been completed and opened at a cost of £3,105.

The old Road Tax referred to in the last report finally disappeared and the first annual assessment and collection of Income Tax was inaugurated on sound lines and with successful results.

The year was an exceedingly prosperous one as far as the public finances are concerned, but this was to a very large extent the result of the exceptional activity in the coaling trade, and similar conditions cannot always be expected to obtain.

Agriculturally, however, there is some progress, and the future prospects of an extensive and profitable lime industry in St. Lucia seem to be fairly assured, and from such the Colony stands to reap lasting benefits. The scope for cocoa-nut cultivation has already been mentioned.

Attention may be directed to a small pamphlet entitled "Hints to Settlers in St. Lucia," compiled by the Administrator and issued under the auspices of the Imperial Department of Agriculture, in which information of interest as to the climate, cost of living, and possible openings for investment is given. The near-by areas suitable for cultivation of tropical products on any large scale are becoming more and more restricted, and the possibilities of St. Lucia, with its large tracts of forest and other land still undeveloped, are worth investigation. The pamphlet may be obtained from the West India Committee, 15, Seething Lane, E.C., and may also be inspected in the Colonial Office Library.

The social and general condition of the Colony remains about stationary, but with a gradual trend towards improvement and uplifting, as means of inter-communication are gradually extended, and educational influences slowly permeate.

A sketch map of the Island is annexed, on which are noted the principal physical features of the country, as well as information in regard to distances and certain administrative details.

Government House,
Saint Lucia,
14th January, 1913.

EDWARD J. CAMERON,
Administrator.

No. 792.

GRENADA.

(For Report for 1911, see No. 742.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Grenada,
5th January, 1914.

SIR,

I have the honour to submit the Blue Book Report for 1912.

I regret the delay in transmission, to which several causes contributed in 1913.

I trust you will consider that the report shows steady and satisfactory progress in the administration of the Colony during the year, and that its compilation reflects credit on the Colonial Secretary, Mr. E. R. Drayton, C.M.G.

I have, &c.,
J. HAYES SADLER,
Governor.

The Right Honourable
Lewis Harcourt, M.P.,
Secretary of State for the Colonies.

(C13.) Wt.36076/850—1.1.14.1125 & 90. 2.14. B.&F. Ltd. G.11/2. A 2

BLUE BOOK REPORT FOR THE YEAR 1912.

FINANCIAL.

The financial year ended March 31st, 1913, resulted in an addition of £2,334 to the Colonial assets, as the revenue for the year exceeded the expenditure by that amount.

2. The revenue and expenditure for the last five years were as follows:—

Year.	Revenue.	Expenditure.
	£	£
1908-9	73,182	72,661
1909-10	71,224	73,282
1910-11	81,413	75,561
1911-12	98,645	81,012
1912-13	86,393	84,059

It will be observed that the revenue for 1912-13 exceeded that of all previous years except 1911-12, when abnormal receipts from Estate Duties (£13,935) swelled the total. In 1912-13 only £2,178 was realised from that source.

3. The details of the revenue under the usual heads are as follows:—

	£
Customs	46,611
Licences, Excise, and Internal Revenue ..	26,812
Estate Duties	2,178
Fees of Office, &c.	1,939
Post Office	3,635
Telephones	1,984
Water Supplies	210
Revenue from Government Property	1,653
Interest and Sinking Funds	1,148
Miscellaneous Receipts	181
Land Sales	42
	£86,393

Customs revenue was satisfactory, yielding in fact £390 more than in the preceding year, but the revenue from Excise Duty on rum only realised £9,797 against an estimate of £12,000, in consequence of a failure of the local sugar cane crop caused by drought for a period of the year. In January, 1913 it became necessary to relieve the situation by reducing the import duty from 8/- to 6/- the proof gallon, so as to admit of more importation of rum from other Colonies.

Post Office revenue was no less than £2,036 in excess of last year's results, owing to increased business and to a new issue of stamps bearing the King's head instead of the badge of the Colony.

4. The expenditure detailed under the usual heads was as follows:—

	£
Charges on account of Public Debt	6,196
Pensions	2,815
The Governor	2,293
Colonial Secretary	1,813
Treasury Department	5,800
Post Office Do.	3,307
Audit Do.	729
Port and Marine	698
Do. (Special Expenditure) ..	86
Legal Departments	4,531
Police	5,326
Military Expenditure	567
Prisons	1,263
Sanitation	709
Medical Department	4,467
Hospitals and Asylums	6,222
Education	7,580
Do. (Special Expenditure)	722
Ecclesiastical	314
Charitable	734
Telephone Department	1,641
Carriacou District	1,050
St. Paul's and Richmond Hill Water Supply	225
Miscellaneous Services	5,543
Agricultural Department	1,382
Public Works do.	1,629
Do. do. (Special Expenditure)	377
Public Works Recurrent (*a*) Roads and Bridges	9,130
Do. (*b*) Other	1,336
Public Works Extraordinary	5,572
Total expenditure from Colonial Funds ..	£84,057
Agricultural Department (from balance of Imperial Grant)	2
	£84,059

It exceeded the expenditure of 1911-12 by £3,047, a result traceable as compared with that year, to (1) increased outlay on Sanitation, Medical Department, and Hospitals and Asylums, amounting to £1,157; (2) increased outlay on Education (chiefly on the new Secondary Schools and in repayment of a debt of £550 taken over with one of them) amounting to £1,711; (3) the cost of the new issue of stamps, £293, and the increased cost of the new mail steamer subsidy; and (4) the purchase of a second motor road roller, £378.

5. The surplus of assets at 31st March, 1913, amounted to £58,720, as compared with £56,419 at the same date in the preceding year, and with £38,742 at 31st March, 1911. The details of this surplus may be thus stated :—

	£
Reserve Fund, invested	20,256
Loans to District Boards	10,986
Advances for Land Settlement	6,207
Stores	2,289
Cash on deposit, etc.	18,982

The satisfactory revenue conditions of two succeeding years enabled the Government to increase the Reserve Fund by £4,500; to make further advances to District Boards for important parochial works; and to purchase more land, both in Grenada and in Carriacou, for purposes of the land settlement schemes in those islands.

6. The public debt is, as before, £123,670, in inscribed stock, and at 31st March, 1913, the Crown Agents held securities by way of sinking fund for its redemption in 1917-1942, amounting to £32,650. The debt of £550 on the Girls' Secondary School Buildings, taken over from the late governing body of that school, was repaid during the year.

7. The revenue and expenditure of the six District Boards of Grenada in 1912-13 were as follows —

	Revenue.	Expenditure.
	£	£
St. George's	4,069	4,197
St. Andrew's	2,623	2,860
St. Patrick's	2,050	2,440
St. Mark's	658	737
St. John's	1,502	1,516
St. David's	835	835
	£11,737	£12,585

That of the town of Hillsborough in Carriacou, which is administered by Town Wardens, was £97 revenue, and £84 expenditure.

8. The loans borrowed by the District Boards up to 31st March, 1913 (all due to the Government) were as under :—

	£
St. George's	12,181
St. John's	3,250
St. Andrew's	1,500
St. Patrick's	4,236

The St. Andrew's Board increased its debt by £600 during the year, for expenditure on an important drainage scheme for the town of Grenville, to which the Government contributed a grant-in-aid of £428. Interest and contributions to sinking funds are regularly paid annually by the boards.

TRADE, AGRICULTURE, AND INDUSTRIES.

9. Comment on the statistics of the trade of the Colony for 1912, as returned in the Blue Book, must necessarily be preceded by a

caution that comparisons with previous years' results are not unlikely to be unreliable or somewhat misleading, because of recent changes in the valuation, classification, and statement of origin of the articles dealt with. The first change took place in 1910, and by it imports are now classified according to "Country of Consignment," instead of "The Place from which Imported." On 1st January, 1912, a more sweeping change was effected by the introduction of a new Official Import List, classifying and rearranging the imports according to a new system, which is now adopted with more or less uniformity throughout the British West Indies, and at the same time changing the method of their valuation for statistical purposes. For many years (since 1895, to be exact) this value has been arrived at in Grenada by adding fixed percentages to the several classes of goods imported, to represent freight and charges. Now the importers are required to declare to the statistical value themselves when making their import entries. For two or three years yet it will not, therefore, be safe to institute comparisons too closely as to the details of the trade returns.

10. According to the returns, the Colony's trade in the last five years is valued as under :—

	Imports	Exports
	£	£
1908	303,783	359,245
1909	268,236	284,846
1910	279,236	291,760
1911	309,227	264,640
1912	279,875	285,590

11. The following statement exhibits, as best it can be made up in the circumstances, a comparison for the years 1911 and 1912 of the principal articles imported :—

	1911.	1912.
	£	£
Apparel	12,455	5,880
Biscuits, Bread, and Cakes.. ..	4,330	5,192
Boots and Shoes	8,099	5,811
Bullion and Coin	5,200	16
Banknotes	1,362	1,696
Butter	2,746	2,763
China and Earthenware	—	1,172
Coal	2,400	1,758
Cotton Goods	33,559	34,540
Cutlery	446	330
Fish of all kinds	17,357	14,705
Glass and Glassware	—	1,325
Grain—Oats	4,308	5,070
Rice	6,421	8,601
Wheaten Flour ..	33,637	40,712
Haberdashery and Millinery ..	—	5,192
Hardware	—	1,863
Hats and Bonnets	—	2,015
Lard	1,814	1,305
Leather—Dressed and Undressed ..	3,363	1,648
Machinery	920	2,251

	1911. £	1912. £
Manure—Chemical and other ..	8,410	6,829
Meat—Canned, Salted, etc. ..	8,654	7,685
Medicines and Drugs	2,831	3,466
Metals, and Manufactures of ..	—	7,669
Oils—Cotton Seed	1,589	1,911
Olive and Refined Food ..	4,852	2,341
Kerosine	3,750	3,316
Oleomargarine	4,310	3,860
Silk, Manufactures of	249	761
Soaps	4,750	4,571
Spirits (Potable)	8,110	4,250
Sugar, Unrefined	5,037	11,402
„ Refined	4,001	3,303
Tobacco (unmanufactured)	2,380	1,335
„ Manufactured, Cigars ..	187	64
„ „ Cigarettes	1,042	912
Wine	1,913	1,900
Wood and Timber	16,031	11,055
Shingles	1,003	593
Furniture	3,101	2,885
Wool, Manufactures of	1,766	2,677

The marked increase in the importation of wheaten flour and refined sugar will be noted, being attributable to the same cause—a severe drought during part of the year 1912 affecting the sugar cane and ground provision crops.

12. The origin and destination of the imports and exports of 1912 are returned as follows :—

	Imports. £	Exports. £
United Kingdom	113,910	169,762
British Possessions	61,947	12,420
Foreign Countries	104,018	103,408

The United States of America leads the foreign countries in the bulk of its trade with the Colony, imports thence being valued at £93,749, and exports thither at £54,726. Canada is returned for imports valued at £12,065, and exports valued at £36, the principal imports being Spruce and White Pine Lumber, £7,009, Salted Fish, £2,366, and Oats, £835 : the exports were 20 cwt. of Nutmegs.

13. Articles imported by parcels post appear for the first time grouped together in the returns, and show a total of £6,267, of which the United Kingdom claims £4,598, and the United States of America, £395 ; Canada only stands for £23, which is not surprising, in view of the rates and conditions imposed by the Dominion Post Office.

14. The exports of the three principal staples of the Colony in 1911 and 1912 compare as follows :—

	1911 £	1912 £
Cocoa	223,104	225,317
Nutmegs and Mace	20,673	36,779
Cotton and Cotton Seed ..	9,003	10,984

15. The average annual value of the cocoa exported in the last seven years has been £224,294. The bulk of it goes to the mother country, the percentage of the total in 1912 being 56, while the United States of America and France each received about 22 per cent.

16. Over 85 per cent. of the nutmegs and mace went to the United Kingdom, and all of the cotton (valued at £9,019) went there: but the neighbouring Colony of Barbados absorbed the bulk of the cotton seed, £1,290 out of the total export of £1,964 in value being sent there.

17. Among minor products of the Colony exported, attention may be directed to the following values in 1912: Wood and Timber, £2,303, Hides, £595, Turtle and Turtle Shell, £406, Fruit, £468, Coconuts and Copra, £241, and Lime Juice, £123. The last two items may be taken as indicating the beginnings of industries likely to assume some importance in the future. The lime juice is the product of the island of Carriacou, where large cultivation of limes is proceeding on the estates of one landowner, while preparations are being made by others for similar action. The lime tree grows readily and fruits abundantly in this dependency, while, so far, it is free there from any serious disease or troubles.

18. The local year for the cocoa crop ends on 30th September, and the results for the last four years are as follows:—

	Bags.
1909	67,329
1910	73,863
1911	67,174
1912	70,082
Average	69,605

Prices were good. In the London market the year began rather badly, but the conditions improved about April, and during the year prices ran from 62*s.* to 70*s.* In reviewing the future prospects of cocoa, it is satisfactory to note that during 1912 the consumption increased so markedly that production failed to keep pace with it, one estimate giving for the year, production, 240,000 tons, and consumption, 245,000. The increase in consumption is most marked in the United States of America, where the imports have almost trebled themselves in the last ten years, and on this already remarkable rate of progress the effect of the recent tariff concessions cannot fail to be satisfactory from the point of view of a cocoa-producing island.

19. The nutmeg crop for the year ended 30th September, 1912, was excellent, both in quantity and in prices. 8,624 barrels and 608 half-barrels of nuts, with 303 cases and 736 bags of mace were exported, as against 6,496 barrels, 456 half-barrels, 292 cases, and 341 bags in the previous year.

20. Carriacou's cotton crop was also good, 1,255 bales of lint and 4,395 bags of seed being shipped, as compared with 893 bales and 3,731 bags in 1911. There is no doubt, however, that results, both in quantity and prices, would have been better but for the deep-rooted habit of abnormally "ratooning" the Marie Galante cotton, which unfortunately prevails in the dependency. The Government are taking steps this year to deal with this practice, and, if necessary, legislation will be resorted to to secure proper conditions of cultivation.

21. No success has so far attended the effort to bring about planting of cotton in certain districts in Grenada, and the ginnery erected has had little or no work, because of the cultivation being attacked by diseases. A series of experiments are being, however, carried out by the local Agricultural Department, which may possibly eventuate in better conditions being arrived at.

22. The first chapter of the history of the Carriacou land settlement scheme may be said to have been completed in 1912, because towards the close of that year the Government, in view of the immense success which has attended the allotment of the estates bought in 1903, felt justified in making a further important purchase—the Mount Pleasant Estate of 488 acres—for sale to the peasantry. Possession of the property, which is under lease, cannot be obtained by law until 1st January, 1914, when its survey into lots will begin. As there will thus be a well marked division in time between the first section of the scheme and the one now in view, it will be of interest to place on record some facts about the first section at the end of 1912.

Area dealt with	1,510 acres
Area allotted	1,089 ,,
Area of reserves	421 ,,
Number of lots resulting	393
Total expenditure	£8,450
Cash receipts	£7,976
Balance outstanding	£474
Balance still due from allottees	£692
Value of unsold lots	£64
Value of reserves and other Government property resulting from purchase ..	£3,673

23. The transaction, therefore, from the financial point of view, has been a complete success, while the remarkable prosperity that has attended the dependency since its inauguration, of the stable continuance of which there is every prospect, would have amply justified the effort even if financial loss instead of gain had been the outlook. One problem of the future remains to be handled, and that is how best to secure the peasants in their holdings. At present they are only protected for a period of twelve years from being absorbed by land-grabbers, and it is of vital importance to the future of the little island that this absorption should not be allowed.

24. The cultivation of limes and coconuts in Carriacou is making rapid strides, and so remarkable altogether is its recent progress from poverty to comparative affluence, a result, be it remarked, largely, if not wholly, due to the sterling good qualities of its hardy peasants, that it seems not impossible that this island gem of the Carribbean will eventually earn for itself a place of distinction.

25. Steady progress was made during 1912 with the land settlement scheme in the island of Grenada, which dates from 1910. At the end of the year the position may thus be summarized :—

Area dealt with	453 acres
Area allotted	247 ,,
Number of lots resulting	152
Total expenditure	£3,015
Cash receipts	£248

Another block of land, 62 acres in extent, was actually purchased before the end of the year, but not yet surveyed; and in 1913 a large block, of 344 acres, has been bought for purposes of the scheme. The land purchased is being well taken up by the peasants, and although the same striking results as in Carriacou are hardly to be expected, there can be no doubt that much good is being done, and with the coming return of many of the Colony's labourers from the Canal Zone, seeking investment in land for their money, much activity in this direction is probable in the next few years.

26. The quantity of rum made fell off considerably in 1912, only 40,103 gallons being distilled, against 63,356 gallons in 1911. As remarked in an earlier part of this report, the cause of this was a severe drought, affecting the sugar cane crop, and shortly after the close of the year there were large importations of rum from neighbouring Colonies to make up the local deficit.

27. 196 liquor licences were issued during the year, as compared with 161 in 1911, and the revenue from this source was £768, as against £634 in the preceding year. As was remarked in last year's report, this revenue from licence fees is supplemented in Grenada by a Trade Duty, levied on actual consumption of spirits, which, in the financial year 1912–13, realized £2,979, as against £3,655 in the preceding year. The licences are granted by District Licensing Boards, and the system worked satisfactorily in 1912.

28. The local ice and soap factories continued at work during the year. The former keeps the sister Colonies of St. Vincent and St. Lucia supplied with ice, as well as providing for the local consumption.

SHIPPING.

29. The total tonnage of shipping inwards and outwards at the three ports of the Colony in the last five years was as follows :—

	Tons.
1908	566,245
1909	586,074
1910	590,451
1911	535,161
1912	565,788

Of the total in 1912, 541,070 was steam tonnage, representing 169 steamers, all British. There are 96 small sailing vessels on the local shipping register, aggregating 1,370 tons.

LEGISLATION.

30. Eighteen Ordinances were passed into law in 1912, the most important of them being (1) the Import Duties Ordinance, introducing a new tariff of import duties, which was commented upon in last year's report (Cd. 6007–42); (2) an Ordinance providing for the eradication of noxious weeds, based on similar legislation in South Africa; (3) an Ordinance improving the collection of the land and house taxes; (4) an Ordinance enlarging the membership of the

Board of Health by the addition of one delegate from each district, to be elected annually by each District Board from its members; (5) a Shipping Ordinance, prescribing better conditions for the small vessels engaged in the inter-colonial trade, and requiring certificates of moderate competency to be held by their masters and mates; and (6) extending the jurisdiction of magistrates so as to include certain offences against the person hitherto dealt with by the Supreme Court.

31. A consolidated edition of the Laws of the Colony down to the end of 1911 was issued on 1st May, 1912.

EDUCATION.

32. *Primary.*—The primary education system of the Colony is mainly denominational, there being only 11 Government schools, out of a total of 51, the remainder being styled "Grant-in-Aid Schools," and divided among the several religious denominations as follows:—

Roman Catholic	22
Anglican	11
Wesleyan Methodist	5
Church of Scotland	2

Calculated on the average attendance, and excluding school fees and caretakers' wages, the cost per head under the grant-in-aid from Colonial Revenue in 1912 was as follows:—

	£	s.	d.
Government Schools	1	0	7
Anglican	1	0	7
Wesleyan..	1	0	6
Roman Catholic..		16	6
Church of Scotland		13	6

The total expenditure of the schools, as returned for the year under review, was £5,497, the Government grant being £5,447 (in 1911, £4,966 and £4,920). The pupils on the roll were 10,372, and the average attendance was 5,261 (in 1911, 10,905 and 5,377).

33. A Ragged School was opened in St. George's, in December, as an experiment, to provide for the education of a number of children of the poorest class, who could not attend the ordinary schools for lack of decent clothing.

34. *Secondary.*—The Boys' Secondary School, opened in September, 1911, with 38 pupils, made rapid progress during the year, which ended for it with 72 pupils on the roll and an average attendance of 70. The numbers have since increased to 82, and extension of the buildings and increase of the staff have become a necessity, and have both been attended to in the current year. The total cost of the school was £953, and the school fees realised £289.

35. The Girls' Secondary School was opened in January, 1912, with Miss M. E. Martin, late headmistress of the High School, Montserrat, as the headmistress. At the end of 1912 there were 23 pupils on the roll, the average attendance being also 23. The total cost was £394, and the school fees amounted to £94.

36. The St. Joseph's Convent School (founded in 1876), keeps up its satisfactory record for good work, and its grant was increased this year by the Government from £100 to £150 in recognition of its usefulness to the community. The number on roll is 71, the daily average 59, and the total cost £321.

GOVERNMENT INSTITUTIONS.

37. *Colony Hospital.*—*1,376 patients were treated in 1912, as compared with 971 in 1911, and of these 1,090 were discharged as cured, 143 as relieved, and 46 died. The daily average was 97·4, and the cost per patient £18 8*s.* 2*d.* (£20 19*s.* 9*d.* in 1911). The receipts for paying patients were £92, and the number of attendances in the outpatient department were 1,152.

38. The hospital was much improved and its work expanded during the year. An English Nurse Matron, Miss J. S. Gardner, was appointed in January, and, on the recommendation of a Special Committee of the Legislative Council, extension of the wards was commenced towards the end of the year so as to accommodate about 36 more patients, while arrangements were made for the appointment of an Assistant Resident Surgeon to cope with the increased work. The construction of a Maternity and Lying-in Ward was almost completed, and also an extension of the Administration Buildings, so as to enable the dispensing of medicines to paupers and labourers in the three adjoining medical districts to be undertaken from the 1st January, 1913. These projects have all materialised in the current year.

39. *Yaws Hospital.*—The number of cases treated and discharged as cured was 379, and there were no deaths. The daily average was 58, and the cost per patient, £9 12*s.* 5*d.* (£10 12*s.* 11*d.* in 1911). The treatment of the disease by salvarsan was carried out with much success, and there is now good reason to hope that the disease in time may be eliminated from the Colony.

40. *St. Andrew's Hospital.*—199 patients were treated in 1912 (166 in 1911), of whom 173 were discharged as cured, 20 as relieved, and 6 died. The daily average was 12, and the cost per patient is returned as £35 13*s.* 8*d.*, but it has since been found that this cost includes the expenditure for medicines for the whole parish, and arrangements have been made in 1913 to secure a more correct statement in future. The number of prescriptions compounded at the dispensary, which deals with the whole parish, was 10,320, of which 7,205 were free of charge, and the receipts from the remainder amounted to £156.

41. *Carriacou Hospital.*—The number of patients treated was only 186, as compared with 213 in 1911 and 282 in 1910. Of these 129 were discharged as cured, and 22 as relieved, and 7 died. The daily average was 23, and the cost per patient £30 8*s.* 4*d.* The number of prescriptions compounded at the District Dispensary was 3,378, of

---

*370 were cases of ankylostomiasis.

which 1,743 were free of charge, and from the remainder, and from sale of medicines, £104 was realised.

42. *Lunatic Asylum.*—The number under treatment was 169, 75 males and 94 females. The number admitted was 42, of whom three came from St. Vincent. The St. Lucia patients (except one, who has since died), 27 in number, were removed in the first quarter of the year, that Colony having now provided its own asylum. Twenty-one patients were discharged as cured, and 9 died; the daily average was 112, and the cost per head £21 9*s.* 3*d.* (£19 9*s.* in 1911). Many improvements were effected in the buildings, and steps were taken to connect up the infirmary wards with the new water closet system, which works well.

43. *Poor Asylum.*—The accommodation at this hospital for incurables is for 58 inmates, and the daily average in 1912 was 48. Twenty-two died, and 15 were discharged during the year, and the cost per head was £10 9*s.* 1*d.* (£10 6*s.* 10*d.* in 1911).

44. *Hospital for Consumptives.*—The construction of this much needed institution was commenced in 1912, and it has been opened in the current year, providing thereby accommodation and treatment on modern lines for 24 cases, 12 of each sex. It is situated on Richmond Hill, on a cool and breezy site adjacent to the Lunatic and Poor Asylums, thus enabling the administrative staff of those institutions to be utilised to some extent for it.

45. *Savings Bank.*—Again this year the deposits in the Savings Bank increased remarkably, the amount at credit of depositors at the end of the year totalling £28,096, as compared with £25,594 in 1911 and £22,962 in 1910. £28,000 of this was invested in sundry colonial securities. The number of depositors was 1,806, and the average credit per depositor £15; in 1902 this average was £6 3*s.* 7*d.*

JUDICIAL STATISTICS.

46. *Police.*—The improvement in the Police Force commented upon last year continued in 1912. Discipline and the standard of efficiency in musketry were both well maintained. The cup presented by the Governor to the police of the Windward Islands for good rifle shooting was won this year by the Grenada force. The recently created detective branch did some good work and justified its existence. A European Sergeant-Major was appointed in December, taking the place of a Sub-Inspector, the last holder of which office retired in 1911; and an Armourer Sergeant, trained in England, was appointed for the Windward Islands in April, the workshop and apparatus being kept at Grenada and periodical visits paid by him to the other islands.

47. Communication by heliograph between Grenada and Carriacou was established in December, the signallers being policemen. Some such system was much needed, and its establishment has proved a great boom to all concerned.

48. *Prisons.*—The committals numbered 262, of which 195 were males, 62 females, and 5 juveniles. The daily average was 45·09 (males 40·21, females 4·9, and juveniles ·79), and the cost per head

per annum, £39 5*s.* 9*d.*, a remarkable increase on the cost in 1908 (£19 12*s.* 6*d.*), when the daily average was 75, owing to the presence of prisoners from St. Vincent and St. Lucia, since removed. The standard of efficiency reached in past years was well maintained, and an effort made in 1913 to secure better religious ministrations to the prisoners has proved effective in 1913.

49. *Criminal Statistics.*—The Attorney General reports that "during 1912 there was a general increase of crime as compared with the years immediately preceding. It is to be observed, however, that there has been no increase in the more serious forms of crime. There was no indictment for murder, one indictment for manslaughter of a newly-born infant by its mother, and two for attempt at murder, the defendant in one of the two last mentioned cases being acquitted by the jury. It appears to me that such increase as exists is to be found chiefly in the class of summary offences. On the whole, I have formed the opinion that the increase in crime during 1912 is probably fortuitous."

VITAL STATISTICS.

50. The estimated population at 31st December, 1912, was 68,485. At the census of 1911 it was returned as 66,750, and the present estimate takes into account the effects of emigration and immigration as well as the natural increase. The birth rate per thousand was 38·19 and the death rate 22·9. The year was not a healthy one, the death roll reaching 1,575, which is a large number for Grenada. Diarrhoea, dysentery, and gastro-enteritis were the principal causes of death, and there were no less than 76 deaths from phthisis recorded.

51. The rainfall at Richmond Hill station, 63·98 inches, was the smallest recorded since 1900, when 63·45 inches were received. The average rainfall at this station for the last twenty-two years is 76·98 inches, the maximum being 105·89, in 1892, and the minimum 56·69, in 1891.

52. A case of bubonic plague was introduced from Trinidad in May, but fortunately the subject was under suspicion from the moment he arrived, and was removed from the ship to the isolation hospital at the quarantine station, where he died.

53. A most important change affecting the health of the lower classes came into operation on 1st October, when the fees of medical officers for attending "labourers" were considerably reduced; and on the 1st January, 1913, a further improvement was effected by reducing the cost of "labourers'" medicine from one shilling to sixpence per prescription. It has thus become possible for a labourer in Grenada to go to the residence or station of a district medical officer and obtain medical advice and medicine for one shilling and six pence, while the fees for visits to houses have been correspondingly reduced.

POSTAL AND TELEPHONE SERVICES.

54. *Post Office.*—The following summary of the work done by the Post Office in the last two years shows that the remarkable increase commented upon in the report for 1911 continued:—

	1911	1912
Letters and post cards	570,479	578,021
Newspapers, books, &c.	212,011	228,985
Parcels	9,432	15,684
Registered and insured articles and letters	12,451	14,579
Money and postal orders issued and paid	£31,865	£34,875

The British postal orders included in the above totalled £6,084, as compared with £4,972 in the preceding year, and remittances from Grenadians in the Panama Canal Zone totalled £6,407, the average for the five years 1907–11 being £6,260.

55. *Telephones.*—The switchboard installed at the principal exchange in 1911 continued to give trouble, and it has been decided in 1913 to replace it by a better one; but, apart from the difficulties arising from this source, the service was well maintained in the year under review, and sixteen new house services were provided, making a total of 331 instruments in use, of which 51 are "switched" telephones. The revenue for the financial year was £1,984, and the expenditure (including loan charges, £226) was £1,641.

MILITARY FORCES.

56. St. George's Corps of Volunteer Infantry, which was enrolled on 7th April, 1911, continued in active existence during the year, and was inspected by Brigadier-General Dalrymple-Hay, Commanding the Forces in Jamaica, in the month of June. Towards the close of the year a movement was set on foot in St. Andrew's Parish for the formation of a mounted section of the Volunteer Force. The local conditions there are well suited to the establishment of such a corps, and in 1913 it has come into existence and is doing excellent work. A new Staff Officer, Captain E. F. Henderson, Leicestershire Regiment, arrived on the 23rd October and assumed his duties in the Windward Islands.

GENERAL REMARKS.

57. An important public question, dormant since 1895, again came to the front in 1912. The harbour of St. George's, admittedly an excellent one, only requires certain improvements to make it one of the best in the West Indies, and the approaching completion of the Panama Canal acted as a stimulus to a revival of the question. The Governor appointed a representative local Committee, with the Colonial Secretary as Chairman, to consider the matter in all its bearings, and on 11th June a full report was made, strongly advising that

the necessary work be undertaken. Later on in the year the Legislature provided funds for an expert investigation of the matter, and at the opening of 1913, a harbour works' engineer, Mr. I. C. Barling, arrived, and conducted a complete enquiry and survey. The report of the firm of engineers which he represented has not yet reached the Government, but it may reasonably be hoped that it will indicate that the work may be successfully and economically undertaken, and that the great natural advantages of Grenada in this respect will be made of some real use to her people.

58. Two fairly large schemes of drainage in connection with the towns were undertaken during 1912 by the District Boards of St. Andrew's and St. John's, with the assistance of grants and loans from public funds. That in the town of Grenville was not quite completed within the year, but it is proving a great benefit, and is now being extended. That in the town of Gouyave represented a second instalment of work begun in a previous year, and the Medical Officer reports that "there has been a marked decrease of the number of cases of malarial fever in the neighbourhood since the laying down of these drains." Another and minor scheme affecting a rural district in St. Andrew's, known as La Digue, was successfully carried out by the Government, and the Medical Officer reports "a most decided improvement in the general health of the people living near, especially as regards malarial fever."

59. Three important bridges over dangerous crossings of rivers were completed, viz.: the Sarah Hall Ravine, the Tempé River, and the Providence River; a most necessary diversion of the Main Road at Palmiste, St. John's, avoiding thereby the use of a long strip of sea beach for road purposes, was effected; and the conversion of a byway in St. Patrick's into a main road, with easier gradients than the existing line of road, was proceeded with. When this last piece of work is completed there will be a road fairly suitable for motor traffic from St. George's in the south to Sauteurs in the north, via the south-east, east, and north-east of the island.

60. On the 19th December the Honourable Frank Gurney, unofficial member of the Legislative Council for 23 years, died in England, greatly regretted by the whole community.

61. The Governor, Sir James Hayes Sadler, was absent on leave from the 5th August to the 20th November, and during his absence the local Government was administered by the Colonial Secretary, and the Government of the Windward Islands by Mr. E. J. Cameron, Administrator of St. Lucia, the holder of the dormant commission.

62. In the year 1912 progress was made in nearly every direction by the Colony of Grenada, and the future is full of promise. It may truthfully be said by one who has been connected with her administration from that date onwards that on the 1st June, 1885, when she became the headquarters of the Windward Islands Government, Grenada entered on a new cycle of her life. She emerged from a condition of semi-torpidity to one of active existence, and she has since then been engaged in realising her destiny. Her future rests with her sturdy sons, and when one

witnesses their zeal and activity, and recognises the whole-hearted manner in which they co-operate in details of the administration there can be little hesitation in predicting for her a leading place among her compeers in the British West Indies.

E. DRAYTON,

Colonial Secretary.

Grenada,
27th December, 1913.

C. O. Nº 20.

THE GOVERNOR TO THE SECRETARY OF STATE.

Grenada,
20th January, 1914.

Submitted.

J. HAYES SADLER,
Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

Government House,
St. Lucia,
8th January, 1914.

SIR,

I HAVE the honour to transmit herewith copies of the Blue Book of this Colony for the year 1912-13, together with my Report thereon.

I have, &c.,
EDWARD J. CAMERON,
Administrator.

His Excellency
Lieut.-Col. Sir J. Hayes Sadler, K.C.M.G., C.B.,
&c., &c., &c.
Grenada.

(C19.) Wt.36076/850—1.1.14. 1125 & 90. 3.14. B.&F. Ltd. G.11/2. A 2

ANNUAL REPORT FOR THE YEAR 1912–13.

I.—FINANCIAL.

The revenue for the financial year ended 31st March, 1913, including £150 from Imperial funds in aid of agriculture, amounted in round figures to £66,293, a decrease of £5,686 as compared with the revenue of the preceding year, but £932 only less than the estimate.

The following statement gives the detail in pounds only :—

Heads of Revenue.	1911-12. £	1912-13. £
1. Customs	35,781	32,606
2. Port, Harbour, &c., Dues ..	7,710	7,198
3. Licences, Excise, &c.—		
(*a.*) Licences—		
Retail Spirit, &c. ..	1,524	1,532
Distillery	100	100
Animals, Vehicles, and Guns	566	580
Petroleum, Cocoa, Boat, &c.	536	518
(*b.*) Excise—		
Duty on Rum ..	12,306	9,930
(*c.*) Road Tax	1	—
(*d.*) Stamp Duty—		
Various Revenue Services	677	721
(*e.*) Fines and forfeitures of Courts	307	428
(*f.*) Revenue seizures and penalties	4	2
(*g*). Income Tax	1,706	1,530
4. Fees of Court or Office, &c. ..	4,522	4,445
5. Post Office	1,740	2,557
6. Telephone	838	833
7. Rent of Government Property	804	800
8. Miscellaneous	243	65
9. Interest	1,483	1,519
10. Repayment of Loans	175	175
	£71,031	£65,548
11. Land Sales	647	594
Total Local Revenue ..	£71,678	£66,142
12. Imperial Dept. of Agriculture— Grant-in-aid	300	150
Total Revenue ..	£71,978	£66,292

It will be seen from the figures quoted in the first paragraph that it was not expected that the revenue of 1912–13 would come up to that of the year previous, which was an unusually prosperous one, but it proved a fair average year, as will be seen from the annexed table for the last quinquennial period :—

	£
1908–9	65,694
1909–10	65,739
1910–11	65,066
1911–12	71,978
1912–13	66,292

Customs and Excise duty were the heads which accounted for the chief falling off. The latter was due partly to disturbance caused by a change of law substituting Imperial for the old Winchester measure, and partly to a decrease in the drinking habits of the population.

Post Office receipts were swelled by the large demand for the new Georgian issue.

The variation in other heads was no more than usual.

The recurring decrease for some years in the number of licences for sale of intoxicating liquor referred to in the last report was arrested, £1,532 being the collection, as against £1,524 the year before. The number of licences, and the revenue derived therefrom, is shown below :

Description of Licence.	No. issued during quarter ended on				Revenue.
	30th June, 1912.	30th Sept., 1912.	31st Dec., 1912.	31st March, 1913.	
					£ s. d.
Wholesale	2	2	2	2	40 0 0
Retail Spirit.. ..	41	41	41	41	1,348 0 0
Bottle	2	2	2	2	80 0 0
Refreshment House	2	2	2	2	60 0 0
Hotel..	—	—	—	—	—
Occasional	4	2	2	2	4 2 6
					£1,532 2 6

The expenditure amounted to £67,825, including £199 from the Imperial Agricultural Grant-in-aid, £49 of which was from the unexpended balance of previous years' grants.

The expenditure from local funds was £67,626, being £771 less than estimated, and £1,154 less than in the year before.

The following statement gives the detail :—

Heads of Expenditure.	1911-12. £	1912-13. £
1. Charges on account of Public Debt	9,396	9,394
2. Pensions and Gratuities ..	2,534	2,448
3. The Governor	2,093	2,328
4. Government Office	1,060	1,071
5. Treasury, &c.	2,887	3,091
6. Post Office	2,159	2,226
7. Port and Marine Department	1,119	1,341
8. Audit Department	546	578
9. Legal Departments	3,932	3,983
10. Local Forces	579	719
11. Police	4,293	4,467
12. Prisons	1,350	1,173
13. Medical Department	2,980	3,086
14. Sanitation and Hygiene ..	156	600
15. Hospitals and Asylums ..	4,237	4,739
16. Charitable	522	531
17. Education	5,041	5,075
18. Ecclesiastical	1,600	1,600
19. Agriculture	804	1,150
20. Miscellaneous Services ..	6,226	5,306
21. Colonial Engineer's Department	3,048	2,966
22. Public Works Recurrent ..	7,357	7,293
23. Public Works Extraordinary	4,849	2,448
Total Local Expenditure ..	£68,780	£67,625
19a. Agriculture (from Imperial Funds)	548	199
Total Expenditure ..	£69,328	£67,824

The only expenditure of an unusual character was £368 odd under the head Sanitation, in connection with a campaign against rats which was started and vigorously conducted throughout the year.

In other respects it was an average year, estimated expenses being cut down here and there where possible in the endeavour to counterbalance the slight fall in the revenue below the estimated figure.

The following gives the figures of expenditure for each year of the last quinquennial period :—

	£
1908–9	65,037
1909–10	64,446
1910–11	67,288
1911–12	69,328
1912–13	67,824

As a result of the transactions of 1912–13, the Colony's surplus at 31st March was diminished by £1,483 and stood at £26,430 making with the accumulated Public Buildings Insurance Fund, amounting to £4,816, a total surplus of £31,246.

The above Insurance Fund is increased annually by a direct addition from public revenue of £300 as well as by the sum of accruing interest which is reinvested.

Of the surplus, £25,606 is invested in securities by the Crown Agents in England, £500 is on deposit locally at the Colonial Bank, and £3,282 is on loan to the Castries Town Board and Water Authority.

Public Debt.

The public debt of the Colony at 31st March, 1913, stood at £142,229 11*s.*, and the accumulated sinking fund towards its redemption at £20,670 2*s.* 9*d.* The debt is made up of the following :—

	£	s.	d.
Castries Harbour Loan	48,350	0	0
Immigration	7,400	0	0
Central Factory	6,900	0	0
Public Works	50,579	11	0
Castries Waterworks (Colony's contribution towards cost)	12,000	0	0
For loan to Castries Town Board (for Waterworks and other purposes) ..	17,000	0	0
	£142,229	11	0

Of the above the interest and redemption charges on £17,000 are recovered from the Town Board's municipal revenues, as also on £550 of the £50,579 11*s.* for Public Works.

Currency.

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper. A few Bank of England notes are occasionally seen. Accounts are kept in sterling by the Government, and in dollars and cents by the Bank and mercantile firms, the dollar being equal to 4*s.* 2*d.*

Finances of Municipalities.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates and dues, market dues and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

The following statement shows the revenue and expenditure for the last three years of the towns and villages, the amount of their indebted-

ness at the 31st March, 1913, and the balance standing to their credit at the same date :—

Town or Village.	1910-11.		1911-12.		1912-13.		Indebtedness at 31st March, 1913.	Credit Balance at 31st March, 1913.
	Revenue.	Expenditure.	Revenue.	Expenditure.	Revenue.	Expenditure.		
	£	£	£	£	£	£	£	£
Castries	6,301	5,990	6,440	5,396	5,571	8,396	20,832	—
Soufrière	527	557	544	577	523	523	1,500	117

Choiseul	43	43	42	25	45	62		35
Micoud	74	96	73	66	67	49		66

*Includes grant of £200 from General Revenue for new Waterworks not yet commenced.

During the year under review the improvement of the Castries waterworks supply referred to in the last report was completed and opened. By this Castries obtains an increased daily gallonage of 169,000 of the best possible quality from the high mountain sources far at the back of the town, and is thus placed in an enviable position both as regards water for domestic use and to meet the demand of the continually increasing volume of shipping calling at the port.

From various causes the desired Dennery water supply could not be undertaken during the year, but it has not been shelved ; a final decision as to filter beds and ways and means of meeting the increased cost has recently been come to, and the materials, etc., are at the time of writing under order.

In the other small towns there has been nothing that calls for special record ; their condition, favourably referred to last year, continues to be maintained.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The following is taken from the Treasurer's Annual Report :—

" The value of the imports was £315,361, or £3,239 less than the previous year. The countries of origin are shewn as under. The figures given are for the calendar year.

Countries whence imported.	*Value.*
	£
United Kingdom	71,495
Canada	12,294
Other British countries	13,726
United States of America	196,059
France	6,848
Germany	2,765
Denmark	1,205
Peru	2,361
Other foreign places	5,531
Parcel Post	3,077
	£315,361

"The imports from the United Kingdom apparently continue to fall. In 1910 and 1911 they were respectively £79,547 and £75,976. In 1912 they were £71,495. The imports from the United States show a slight increase, as also the imports from Canada. Probably much of the flour and possibly other articles which appear as imports from the United States were the produce of Canada. When certificates of origin come to be produced under the Customs preferential tariff the imports from Canada will show a considerable increase.

"The imports from the United States include £141,601 bunker coal.

"Goods to the value of £22,819 were entered duty free under the exemption list in the tariff, as follows :—

	£
For Agriculture and manufacturing industries	11,916
,, Government	4,749
,, Castries Town Board	2,059
,, Churches	771
,, Coasting Steamer	136
,, Governor and Administrator	94
Under General List	3,094
	£22,819."

A summary of the imports is as follows :—

	1911.	1912.
	£	£
I. Food, drink and tobacco ..	75,971	72,811
II. Raw materials and articles mainly unmanufactured ..	152,355	150,451
III. Articles wholly or mainly manufactured	78,344	88,778
IV. Miscellaneous and unclassified, including imports by parcel post	3,840	3,321
V. Bullion	8,080	—

Exports.

The total declared value of exports was £287,716, being some £14,000 in excess of the previous year's total.

The following is a summary :—

Exports to	Island Produce £	Exports other than Island Produce. £
United Kingdom	67,818	2,376
Canada	8,481	—
France	23,633	—
Holland	3,248	—
United States	2,350	18
Germany	152	1,709
Barbados	1,970	171
Other places	862	6,122
Bunker Coal	—	166,312
Ships' Stores	—	2,494
	£108,514	£179,202

The value of imported goods exported as ships' stores has been kept for the first time and works out, according to the Treasurer's report, at £2,494, which is a rather lower figure than had been supposed.

The output of usine sugar was the lowest for some years. Cocoa was slightly less than in 1912.

Lime juice has risen from £148 to £1,007, and this will probably be more than doubled in 1913.

Coaling Trade.

This important business continues to thrive. Although not quite up to the figure of the previous record year, the shipment was not far short of it, as the annexed table shows :—

Year.	Tons.	£
1908	85,460	102,288
1909	96,462	115,754
1910	97,384	116,861
1911	139,056	152,962
1912	134,783	166,312

The actual importation of coal, 129,466 tons, was the highest yet recorded.

The following paragraphs of interest are taken from the Treasurer's report :—

"Comparing these figures with the shipping statistics for 1911 of the twenty-three principal ports in the self-governing Dominions, Crown Colonies, Possessions and Protectorates, published in the Board of Trade Statistical Abstract, only twelve of those ports were ahead of St. Lucia in steam tonnage, namely, Hong Kong, Singapore, Colombo, Gibraltar, Malta, Penang, Aden, Port Natal, Cape Town, Calcutta, Victoria, B.C., and Bombay.

"Bunker coal to the amount of 134,783 tons was supplied to 585 steamers. The facilities for quick coaling at St. Lucia cannot be made too well known. Coal is delivered at the rate of 100 tons an hour, and with much greater celerity when required. On 6th February, 1913, 1,116 tons were delivered to H.M.S. "Cumberland" in 5½ hours, equal to 203 tons an hour.

"Fresh water is also delivered from alongside the wharves at the rate of 4,000 gallons an hour. The charge for water is for every 100 gallons supplied to warships 1*s.*, and 1*s.* 6*d.* to all other vessels. The quantity taken in 1912 was 3,307,804 gallons.

"Ships are coaled and watered day and night."

Mines, Manufactures, and Fisheries.

The sugar factories at Cul-de-Sac, Roseau, Vieux Fort, and Dennery were all working during the year.

The following figures show the quantity of rum distilled, consumed, and exported during the last five years :—

Year.	Distilled.	Consumed.	Exported.
	Galls.	Galls.	Galls.
1908	83,532	51,216	23,440
1909	72,633	46,949	27,883
1910	49,256	42,456	4,692
1911	63,961	44,516	12,787
1912	59,739	31,865	26,577

During the year a steam plant for concentrating lime juice was installed on one estate, and several small temporary works were put up to deal with small first crops which are now in process of being replaced by more complete and modern installations.

The question of the erection of a small central factory by the Government, with a view more particularly to stimulating lime cultivation among the peasantry, was discussed, and this has since taken satisfactory and practical shape, and bids fair to meet with a considerable measure of success.

Fishing is carried on regularly all round the coast of the Island, but only to meet local daily demand.

Agricultural Industries.

Sugar and cocoa head the list of the Colony's important products. Lime cultivation is, however, making very rapid strides, and in the course of a year or two there is likely to be a very marked development in the cropping capacity of quite a number of estates, while the area planted in limes is steadily being added to.

The quantity and value of the export of sugar and cocoa during the past five years were as follows :—

	Cocoa.		Sugar: Usine.		Other sugar, muscovado, and products thereof.
	Quantity.	Value.	Quantity.	Value.	
	Bags of 200 lb.	£	Tons.	£	£
1908 ..	6,775	30,488	4,881	53,691	2,813
1909 ..	10,850	54,275	5,360	59,623	2,265
1910 ..	8,187	40,935	5,199	64,988	2,674
1911 ..	10,368	46,656	4,288	52,535	1,955
1912 ..	9,573	43,099	4,246	48,830	2,117

Lime juice was exported to the value of £1,007, as against £148 in the year previous.

The Imperial Commissioner of Agriculture and the Entomologist and Mycologist attached to his department paid several visits to the Colony during the year.

Early in 1913 a decision was taken by the Government to acquire a property in the southern part of the island for the establishment of a new Agricultural Nursery and Experiment Station to take the place of that at Union, which has never been satisfactory; the remainder of the land not needed for the above purpose is to be disposed of on the lines of a small land settlement scheme. No such step has hitherto been taken in St. Lucia, and it remains to be seen how it will work out in practice. The progress made will be matter for record in the current year's report.

Land Grants.

Thirty-five grants for Crown lands were issued during the year, the acreage disposed of being 247 acres. The price of such land is at the rate of £1 per acre, payable one-fifth on application and the rest in four annual instalments.

Fifty-four new applications for land were filed.

Shipping.

The total tonnage of shipping entered and cleared at the port of Castries, the only port of entry in St. Lucia, amounted to 3,490,042. The steam shipping entered included 28 colliers, with 129,465 tons of coal.

The port was visited by six warships and four yachts.

A summary of the statistics for the last five years is attached :—

Vessels Entered.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
1908	487	957,866	203	7,340	90	126,337	38	2,267
1909	518	1,027,837	201	6,003	127	220,961	45	2,731
1910	557	1,143,092	228	7,437	135	241,808	40	2,712
1911	817	1,782,911	182	5,086	126	208,500	41	2,535
1912	684	1,488,397	216	5,591	106	155,205	30	1,733

Vessels Cleared.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
1908	487	958,607	201	7,387	89	124,520	38	2,267
1909	517	1,025,251	197	5,574	129	224,895	44	2,662
1910	559	1,146,983	228	7,928	134	239,687	40	2,712
1911	815	1,778,865	182	5,110	127	210,621	41	2,535
1912	686	1,492,443	216	5,572	165	248,136	30	1,733

Castries is also a port of registry, and at the close of 1912 had thirteen vessels on the register, with a tonnage of 608. All these are small sailing vessels locally owned, with one exception, a schooner of 417 tons, the register of which has since been cancelled.

Five new vessels, aggregating 95 tons, were added during the year.

New lights were projected at Tapion and Vigie, on the promontories at the entrance to Castries harbour, as also new and improved leading lights for the harbour. The projects have now taken due shape, and, when complete, will be a great addition to the safety and comfort of the port.

Public Works.

Under this head, in addition to the ordinary annual upkeep of roads and byways and maintenance of public buildings and property, which involves very considerable outlay, various extraordinary works were undertaken, and two large works of primary importance were carried to completion during this year.

These were the bridge across the Troumassee River on the windward side of the island, the total outlay on which was £1,701 4*s.* 10*d.*, and the new lighthouse and light at Moule-a-Chique, the total expenditure on this valuable installation being £3,104 15*s.* 8*d.*

The bridge is one that has long been needed, the river which it spans being about the largest and most dangerous on the line of the Colony's main highways.

The light is a third order flashing white light, and is one of the finest lights, if not the finest, at present existing in the West Indies, and can be seen at a distance of 40 miles and over.

It adds materially to the comfort and safety of the increasing run of shipping coming to the port of Castries.

III.—LEGISLATION.

Eleven Ordinances were passed during the year, but none were of particular importance. Various regulations were also made and promulgated under the authority of existing Ordinances, those for the management and control of the Victoria Hospital and the new Lunatic Asylum, and for the destruction of rats under the Public Health Ordinance being worthy of note.

IV.—EDUCATION.

The 1912 Report of the Inspector of Schools furnishes the following figures :—

	1911.	1912.
Number of Schools..	53	52
„ on rolls	7,268	7,307
Average attendance	4,625	4,814
Number examined	6,227	6,572
Government Grant-in-aid ..	£3,912	£3,925

Of the 52 schools 45 are Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 East Indian Mission (Presbyterian). Of the 7,307 children on the rolls 3,614 are boys, 3,693 girls.

The examinations in agriculture were carried out by the Agricultural Department The number of schools examined was 16, and the Superintendent of Agriculture reports that the marks obtained average nearly 7 per cent. more than those of the previous year. He also states that the Imperial Commissioner of Agriculture visited the three school-gardens in Castries and expressed his appreciation of the progress that had been made in agricultural teaching in the primary schools of St. Lucia.

Hygiene has been taught, as in previous years, in every primary school in the Colony from standard II upwards. The head teachers are also supplied by Government with quinine and ulcer remedies for free distribution. The Inspector of Schools reports that the results of this campaign against malaria and "sore-foot" have been most satisfactory, and that the diminution in the number of absentees from school from one or other of these maladies has been most marked.

St. Mary's College, the secondary school for boys, received a Government grant of £400 during 1912–13 ; the average attendance for 1912 was 45, of whom 8 were Government scholars from the primary schools and 4 scholars nominated by the Roman Catholic vestry. St. Joseph's

Convent, the secondary school for girls, received a grant of £150; the average attendance was 90.

V.—GOVERNMENT INSTITUTIONS.

The Victoria Hospital at Castries is the one general hospital of the Colony. It is a fine stone building and well situated, and has had much done for it of late years. The daily average of patients during 1912–13 was 46 males and 39 females, and the cost works out at £1,832 15*s.* 10*d.*, or 1*s.* 2*d.* per head per diem.

New rules for the institution were passed during the year.

A fine new Lunatic Asylum, capable of accommodating 80 to 100, was opened during the year. This is established in what used to be the Ordnance Store Buildings, at Toc, which were handed over to the local Government by the Imperial War Department and have been remodelled for asylum purposes at a cost of £2,496.

A European steward has been obtained, who has charge of the institution under the medical superintendence of the Victoria Hospital House Surgeon. The daily average of patients here during the year was 27·8 males and 33·7 females, and the cost £1,260, or about £20 10*s.* per head.

This establishment puts an end to the unfortunate state of affairs which existed while the only provision for dealing with lunacy was at the former very unsuitable location and premises on the edge of the town of Soufrière.

Small buildings are provided at Soufrière, and at the villages of Dennery and Vieux Fort, which are used on occasions as casualty hospitals and serve the purpose of sheltering accident and other rare emergency cases.

The general Poor-house is at Malgretoute, on the sea beach within a mile of Soufrière, and shelters a daily average of 65 patients.

The Yaws Asylum is in the same vicinity. Much improvement has taken place of late at these last two institutions under the present Medical Officer in charge, Dr. Hughes. Much work has also been done with Salvarsan, and the hospital has been kept full with cases brought to be operated on with the new remedy.

There are visiting stations at various other points where Medical Officers attend regularly on fixed days and are available to those who require their services.

At Castries the general dispensary was removed from the Victoria Hospital and established in town under the charge of the Medical Officer of the No. III or Castries and Anse-la-Raye District, by whom a very large number of cases were treated.

There is no reformatory or industrial school in the Colony.

There is a Public Library and Reading Room in Castries, receiving grants from the Government of £100 per annum and from the Municipality of £25 per annum; it leaves a good deal to be desired, but there has been some movement latterly towards better conditions.

In Soufrière there is quite a neat and useful little library, and a small grant of £20 is made by the Government towards its support.

In the village of Dennery a very modest institution of the kind also exists and receives Government aid.

Savings Bank.

There is a Government Savings Bank with 1,649 depositors, and a total sum on deposit at 31st December, 1912, of £20,150. Over £19,417 of this stands invested in various securities by the Crown Agents.

VI.—JUDICIAL STATISTICS.

The Police Force consisted of a Chief, a Sergeant-Major, a Staff Sergeant, and 69 West Indian non-commissioned officers and men. The Force is armed and receives musketry and drill instructions from its Sergeant-Major, who is a European military non-commissioned officer.

In addition to their ordinary duties, the police carry out a considerable amount of work in connection with the details of administration, such as enforcement of sanitary regulations, distribution of poor and medical relief, registration of births and deaths; and in certain districts they are in charge of the post offices and the telephone exchanges.

The total expenditure on the department was £4,510, of which £3,886 was for personal emoluments and £624 for clothing, equipment, &c.

A great addition to the comfort and contentment of the Force has been the establishment during the year of a canteen under rules duly made by and under the direct supervision of the Chief. Most things that the men need can be obtained at the canteen at very reasonable rates.

Prisons.—The total number of persons committed to the Royal Gaol was 445, of whom 86 were on remand and 359 for imprisonment on conviction. The daily average number in prison was 42·39—29·55 males, 12·69 females, and 0·15 juveniles. The highest number in confinement was 55 and the lowest 29.

The average number on the sick list was ·92. The Medical Officer reports that on the whole the year was a healthy one so far as the prison was concerned, and there were no deaths.

The expenditure on the establishment was £1,174, and the average cost of a prisoner was 1*s.* 6½*d.* a day, or £28 2*s.* 8½*d.* per annum. The total estimated value of prison labour was £427 16*s.* 9*d.*

Criminal Statistics.—The following table shows the average figures for the five years 1907 to 1911, and the actual figures for the year ended the 31st March, 1913:—

	Average 1907–11	1912–13
Offences reported	1,517	1,635
Summary Convictions:—		
Offences against property	142	156
Offences against the person	305	228
Other offences	1,011	1,249
Convictions in Superior Court:—		
Homicide	—	—
Offences against property	11	14
Offences against the person	5	8

VII.—VITAL STATISTICS.

Population.—The Registrar of Civil Status computes the population at 31st March, 1913, to have been 49,963, divided into 22,919 males and 27,044 females. Emigration and immigration are not taken into consideration in the computation, and the figures are based on the natural increase of the population, the census figures of 1911 being used as the starting point. The population at the same date in the previous year was estimated at 49,205.

The birth-rate of the year (excluding still-births) was 34·5 per thousand of the total population, compared with 35·5 per thousand in the previous year. The number of births was 1,829. The death-rate was 19·3 per thousand, as compared with 20·2 per thousand in 1911–12. There were 224 marriages during the year; in 1911–12 the number was 251.

Public Health and Sanitation.—The public health during the year was quite normal, and the medical officers agree in reporting that it presented no feature calling for special comment. This is borne out by the slight decrease which occurred in the death-rate.

Sanitary affairs received the usual strict attention, and the Chief of Police (whose department is entrusted with the carrying out of the sanitary regulations) states that in Castries there were 53 convictions and in the country districts 65 convictions for breaches of the law.

In addition an active campaign was started in Castries against rats, under the direction of the Port Health Officer, Dr. King, and much good work has been done both in reducing the numbers of the vermin, and rat-proofing, etc., the buildings which harboured them. It is rather a costly undertaking, but very expedient for the protection of this important shipping port. A visit was also paid to the Colony, more particularly in this connection, by an expert from England, whose recommendations for more up-to-date and effective sanitary control have since been under consideration. The Government's powers, however, are somewhat circumscribed by want of a sufficiency of funds to meet so wide an enlargement of sanitary energies.

Climate.—The average annual rainfall recorded at 25 stations during the year 1912 was 72·98 inches; in 1911 it amounted to 114·01 inches, recorded at 20 stations. The highest rainfall was recorded at Warwick Estate, in the Choiseul District, where 120·73 inches were received. The lowest amount, 39·12 inches, was received at Moule-a-Chique, at the south-western extremity of the island. November was the wettest month, and February the driest.

The mean monthly temperature recorded in the shade at the Botanic Station in Castries was 79° F.; the maximum recorded at the same place was 91·5° F. in September, the minimum being 64° F. in April.

The mean monthly corrected readings of the barometer ranged between 29·929 in October and 30·256 in November. The mean annual pressure was 30·039.

VIII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly intercolonial mail service performed under contract by the Royal Mail Steam Packet Company's steamers was regularly carried out during the year under review; and the intercolonial

steamers of the Compagnie Generale Transatlantique (which touch at Castries going and coming *en route* between French Guiana and the northern French Colonies) also regularly called, as did the vessels of the Quebec Steamship Company (which call on their fortnightly voyages to and from New York) and of the Danish East Asiatic Company.

The contract between the Colony and Messrs. Pickford & Black, reference to which was made in the last Report, under which the Company's steamers call at St. Lucia on their voyages to and from Halifax, was also regularly carried out during the year.

The total revenue of the Post Office was £2,557, and the expenditure £2,226, giving a balance in favour of revenue of £331.

The principal postal statistics for the last two years are as follows :—

	1911–12.	1912–13.
Letters and Postcards :—		
Sent	106,239	105,753
Received	105,474	105,422
Inland : sent and received ..	94,950	94,148
Parcels despatched	479	544
„ received	3,154	3,278
British Postal Orders issued ..	4,986	4,729
„ „ „ value ..	£2,769	£2,643
„ „ „ paid ..	846	1,097
„ „ „ value ..	£392	£536
Money Orders issued	£4,352	£4,536
„ „ paid	£3,355	£3,868

There is a regular and daily postal communication, under local contract, between Castries and the leeward coastal towns and villages, the service being carried out by the Royal Mail Company's coasting steamer. On the windward side of the island communication by post is overland and is made twice a week only.

All towns and villages of the island are connected by telephone with Castries.

The total mileage in operation during 1912–13 was 216 miles, with 140 subscribers, as compared with 137 in the previous year. The messages transmitted numbered 172, and 543 three-penny tickets were sold to non-subscribers using public telephones. The sale of tickets showed an increase of 124 per cent. on the previous year. The revenue for the year was £833, and the expenditure £442.

IX.—GENERAL REMARKS.

The year 1912–13 was one of reasonably satisfactory progress as indicated by the detail already given, but there were no especially remarkable occurrences.

Mr. E. J. Cameron, C.M.G., Administrator, who, as recorded in the last report, left the Colony on duty on 17th March, 1912, as the Colony's representative at the Trade Reciprocity Conference at Ottawa, had the honour of being elected by his colleagues Chairman of the West Indian delegates. The Conference was satisfactory and successful

C. O. Nº 21

Ordnance Survey, Southampton 1914.

and its results in improved transport and increased trade are now beginning to appear.

Mr. Cameron went on leave from Canada on 20th April until 1st August, the administration devolving on the Honourable A. DeFreitas, Attorney General, as Senior Resident Member of the Executive Council.

Sir James Hayes Sadler, K.C.M.G., C.B., Governor of the Windward Islands, proceeded on leave on the 6th August and was absent till 20th November, during which period the general government was administered by Mr. Cameron at St. Lucia, Mr. A. DeFreitas acting as Colonial Secretary.

The Governor paid a visit of five weeks to the Colony in February and March, 1913.

The bright spot on the St. Lucia horizon is the growth of the lime industry and the prospect it affords of remunerative return to the different classes of land holders, both large estate owners and the smaller men. It is in the development of its agricultural possibilities, to the attraction of capital and men, and the opening up to useful cultivation of its large areas of unused or only partially used lands, that the Colony must look for its real expansion and ascent to importance.

The establishment of a Government lime juice factory has undoubtedly done good, and should prove a potent factor in stimulating cultivation among the peasantry, especially when its full scope and the advantages it offers become more clearly understood.

In concluding the last report I shall write here, I can only express the hope that as time goes on this most beautiful and rich island may gradually come to occupy the more prominent position in West Indian affairs to which its size, soil, and material advantages give it a right to aspire, and I may express the hope that, in any summary of its history at a later date, these last five years may find a favourable mention as a period of some slight progress towards the desired end, albeit less rapid than many, myself included, could have wished to see.

A sketch map of the island is annexed, on which are noted the principal physical features of the country, as well as information in regard to distances and certain administrative details.

EDWARD J. CAMERON,
Administrator.

Government House,
Saint Lucia,
8th January, 1914.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

THE ADMINISTRATOR TO THE GOVERNOR.

Government House,
St. Vincent,
8th January, 1914.

SIR,

I HAVE the honour to forward to your Excellency, for transmission to the Secretary of State for the Colonies, my annual report on the Blue Book of the Colony of St. Vincent for the year 1912–13.

I have, &c.
C. GIDEON MURRAY,
Administrator.

His Excellency
Lt.-Col. Sir James Hayes Sadler, K.C.M.G., C.B.,
&c., &c., &c.,
Grenada.

(C23.) Wt. 36076/850.1/1/4. 1125 & 90. 3.14. B. & F. Ltd. G.11/2. A 2

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1912–13.

I.—FINANCIAL.

General Revenue and Expenditure.

The following comparative statements and tables give the heads of Revenue and Expenditure and the amounts received under those heads for the years 1911–12 and 1912–13, as well as the total Revenue and Expenditure for each of the last five years 1908–9 to 1912–13 :—

Table 1.

Comparative Yearly Statement of the Revenue.

Heads of Revenue.	Amount collected 1911–12 £	Amount collected 1912–13. £
1. Customs :		
Import	14,982	17,268
Export	968	1,043
2. Port and Harbour Dues :		
Tonnage	607	609
Port	95	109
3. Licences, Excise and Internal Revenue :		
Licences—Liquor ..	532	596
Do. —Other ..	1,257	1,313
Excise	4,607	3,453
Land and House Tax ..	3,209	3,023
Income Tax	662	691
Other Internal Revenue	803	953
4. Fees of Court or Office, Payments for Specific Services and Reimbursements in aid	1,633	1,576
5 Post Office	2,053	4,037
6. Telephones	569	625
7. Rent of Government Property	34	38
8. Interest and Refunds of Loans	1,651	1,548
9. Miscellaneous Receipts ..	55	68
10. Sales and Leases of Crown Lands	541	724
Total Local Revenue ..	£34,266	£37,674
11. Parliamentary Grant : In aid of Agricultural Department	585	414
Total General Revenue	£34,851	£38,088

The principal decrease is to be found under Head 3, Excise, and this was due to an inadequate production of rum in the local distilleries, the deficit being made up by imported spirit. Other decreases are nominal and do not call for comment. The principal increase is under Head 1, Customs, and was due to a general expansion of trade and increased circulation of money, owing to the remunerative prices obtained for the staple crops of arrowroot and cotton.

Table 2.

Comparative Yearly Statement of Expenditure.

Heads of Expenditure according to the classification employed in the Estimates	Expenditure 1911–12.	Expenditure 1912–13.
	£	£
1. Charge on Account of Public Debt	756	526
2. Pensions	2,042	2,095
3. The Governor	1,589	1,702
4. Government Office	658	690
5. Treasury and Customs	1,514	1,767

Table 3.

Total Revenue and Expenditure for Five Years 1908–09 *to* 1912–13.

Year.	Revenue.		Expenditure.	
	—	Total.	—	Total.
	£	£	£	£
1908–9	Local .. 30,810 Imperial Grant 585	31,395	Local .. 26,647 Imperial Grant 553	27,200
1909–10	Local .. 27,855 Imperial Grant 585	28,440	Local .. 30,732 Imperial Grant 598	31,330
1910–11	Local .. 29,540 Imperial Grant 585	30,125	Local .. 29,759 Imperial Grant 584	30,343
1911–12	Local .. 34,267 Imperial Grant 585	34,852	Local .. 33,116 Imperial Grant 619	33,735
1912–13	Local .. 37,674 Imperial Grant 414	38,088	Local .. 33,579 Imperial Grant 414	33,993

The operations of the financial year have again been successful. The Revenue collected has been the largest on record, namely £38,088, the actual Expenditure £33,993, was £179 short of that estimated for the year, and the Surplus on the year's working was £4,095. In view of the fact that there was no alteration in taxation, and that over £2,000 was spent during the year out of current Revenue upon extraordinary public works, the financial situation may be regarded as satisfactory.

Assets and Liabilities.

The excess of assets on the 31st March, 1912, was £7,775. On the 31st March, 1913, the account showed an excess of £11,869.

In addition to the surplus of £11,869, the sum of £25,000, the unexpended remainder of a fund contributed by private subscription at the time of the eruption of the Soufrière volcano in 1902–03, is invested in trust securities, and held as a reserve or insurance fund against any possible future disaster which may result from the violence of the elements.

There are also other funds of lesser importance showing assets to the Colony, some of which are extinguishable by time, while others, like the Graham Bequest Fund, the Alexander Fund, and the Thompson Home Fund, are used only in respect of the interest they bear.

Public Debt.

There is no public debt, the last loan instalment having been repaid in May, 1910. There is only one municipal debt, extinguishable in November, 1913, amounting to £50 at 31st March, 1913, for which, in case of default, the Colony is ultimately responsible, and which

constitutes a first charge upon its revenues. There is no likelihood, however, of the Colony being called upon to pay any of this sum, as the municipality concerned is well able to bear the interest and repayment involved.

The Colony is similarly responsible for the unpaid balance of the hurricane loan to planters from the Imperial Treasury, which was at 31st March, 1913, £8,842, towards the repayment of which a sum of £2,803 was in hand, invested by the Crown Agents for the Colonies at short call. This loan is being steadily redeemed by borrowers at the rate of £750 per annum to the local Government, by whom annual payments are in turn made to the Imperial Treasury.

Currency.

Gold, British and American, notes of the Colonial Bank, and British silver and copper constitute the currency of the Island.

The Government accounts are kept in sterling, and commercial accounts in dollars and cents.

Finances of Municipalities.

The management of the affairs of Kingstown is vested in a board, one-half of the members of which are elected by the ratepayers, and the other half nominated by the Government.

The Chairman of the board is annually elected by the members forming that body, but cannot in any circumstances be elected for more than two years in succession.

The small towns of the Colony, of which there are six, are controlled by wardens appointed annually by the Government.

The following comparative statements give the total revenue and expenditure of these towns during the last five years :—

Revenue.

Town.	1908.	1909.	1910.	1911.	1912.
	£	£	£	£	£
Kingstown	1,695	1,736	1,711	1,756	1,790
Georgetown ..	118	143	142	158	159
Chateaubelair ..	35	33	35	33	34

Layou	24	17	13	25	39
Bequia	4	17	1	7	6

Debts of Towns.

The debts of the towns at the 31st December, 1912, were as follows :—

	£	£
Kingstown Water Supply	400	
Loan for repair of Rose Place Drain, Kingstown	171	
	—	571
Georgetown Water Supply		50
Barrouallie Water Supply		184
		£805

Provision for repayment of these loans is made by rates levied annually on the townspeople, and the debts are secured on the general revenue of the Colony.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports.

Chief Articles.	Value.	
	1911.	1912.
Class I.—	£	£
Beef, salted or cured	466	434
Biscuits	3,263	5,042

Bank Notes	2,776	2,192

In the course of his Annual Report the Collector of Customs reports as follows :—

The total value of the imports for the calendar year amounted to £129,142, as compared with £110,926 in 1911. The countries from which they were imported are given below, with figures for the previous year for comparison.

	1912.	1911.
	£	£
United Kingdom	54,895	50,834
Canada	23,726	19,630
British West Indies	10,795	8,311
India	4,237	2,715
Newfoundland	3,301	2,743
Ceylon	119	128
Other British Colonies	3	1
United States of America	25,459	21,218
France	2,298	2,270
Denmark	1,810	969
Germany	878	908
Holland	507	331
Foreign West Indies	362	432
Other Countries	752	436
	£129,142	£110,926

The Imports are summarised as follows :—

	1912.	1911.
	£	£
1. Food, Drink and Tobacco	56,668	42,406
2. Raw Materials and Articles mainly unmanufactured	13,824	13,792
3. Articles wholly or mainly manufactured	55,694	51,242
4. Miscellaneous and unclassified ..	724	710
5. Bullion and Specie	2,232	2,776
	£129,142	£110,926

It will be observed that the two classes which practically account for the total increase in the value of importations in 1912, as compared with those of 1911, are 1 and 3—in the former an increase of 34 per cent., and in the latter 9 per cent.

EXPORTS.

The total Exports amounted to £111,684, or £17,458 less than the Imports, and £6,941 less than the Exports in 1911.

The following is a summary :—

Exported to	Island produce.	Exports other than Island produce.
	£	£
United Kingdom	76,310	564
Canada	3,005	8
British West Indies	21,027	7,279
Other British Possessions	—	150
United States of America	2,717	38
France	63	—
Foreign West Indies	501	13
Other Countries	4	5
	£103,627	£8,057

The exports of island produce, with declared values, are given below, with 1911 figures for comparison :—

	1912.		1911.	
	Quantity.	Value.	Quantity.	Value.
Arrowroot ..	3,948,681 lbs.	£48,854	4,264,130 lbs.	£40,430

Coffee	298 lbs.	5	178 lbs.	5
Fruit—Fresh ..	—	49	—	65
Various :—				
Unspecified ..	—	1,501	—	2,091
		£103,627		£108,956

The total trade, therefore, of the Colony for the year was £240,826, as compared with £229,551 for 1911, being an increase of £11,275.

The total imports and exports for five years 1908 to 1912 were :—

Year.	Imports.	Exports.
	£	£
1908	113,713	94,739
1909	87,810	88,698
1910	97,737	101,180
1911	110,926	118,625
1912	129,142	111,684

The volume and direction of the Colony's trade in the five years 1908 to 1912 are given below :—

Imports.

—	1908	1909	1910	1911	1912
	£	£	£	£	£
United Kingdom ..	45,260	30,232	43,254	50,834	54,895

Total ..	94,739	88,698	101,180	118,625	111,684

Manufactures and Fisheries.

The Central Cotton Ginnery was established by the Government in the year 1903–4. This ginnery has been of great assistance in the development of the cotton industry. It is extremely improbable that the industry would, without it, have reached its present successful state. With the charge of a 1d. per pound for ginning and baling, the accounts showed a balance in favour of the ginnery of £894 2*s.* 7*d.* at the end of the 1910–11 crop year,* and at the end of the 1911–12 crop year the profits amounted to £1,494 5*s.* 4*d.*

There are three private ginneries in the Colony, the largest of which is situated in Kingstown, and is fitted up with five gins.

The co-operative cotton-buying scheme for peasants at the Govern-

*The crop year is from 1st September to 31st August of the succeeding year.

ment Factory, described in the 1910–11 Report, continues to prosper, and is yearly conducing to the improvement of the cultivation of this product by small holders and also is increasing the circulation of ready money in the Colony. During the cotton season just closed, 1912–1913, £4,710 worth of cotton was bought at the Government Ginnery from small growers.

About 37 tons of cotton seed of the 1912–13 crop were crushed by the disintegrator at the Government Ginnery for manurial purposes.

The price of lint during the year was for some special bales as high as 28*d.* per pound. The average sale price was, however, from 17*d.* to 20*d.* for Sea Island cotton, while Marie Galante sold from 6*d.* to 10*d.* a pound.

The export of whale oil was £228 in 1911–12 and £340 during the year under review. This is now apparently a dying industry, owing to the reduction in the number of whales visiting these waters. Numerous species of sponges are to be found in the Grenadines, some of which are said to be of commercial value, but unfortunately it has not yet been found feasible to investigate the possibility of the establishment of a sponging industry.

The turtling industry, evidently a declining one also, accounts for an export value of £85, as against £302 in 1911–12, £176 in 1910–11, and £515 in 1909–10.

Agricultural industries and Agricultural Department.

The following extracts from the annual Report of the Agricultural Superintendent are significant of the conditions in the above connexion which existed during the year under review :—

It is with regret that another very unfavourable cotton season has to be recorded. Up to the end of October, although the rainfall was below the average, the cotton fields were full of promise, the plants were bolling heavily, and were quite healthy. From October to January the weather was very wet—rain falling almost every day. The almost ripe bolls were not able to open, and boll diseases destroyed a large proportion of the crop.

An estimate of the past season's crop and its value, compared with the crops and values of the two previous seasons is now given.

Product.	1910–11.		1911–12.		1912–13.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	lb.	£	lb.	£	lb.	£
Sea Island cotton ..	561,526	42,114	487,116	38,563	428,032	33,886
"Marie Galante" cotton	26,748	1,003	46,822	1,951	58,737	2,030
	tons.		tons.		tons.	
Cotton seed ..	787	3,935	700	3,500	640	3,200
Total ..	—	47,052	—	44,014	—	39,166

The average price of St. Vincent Sea Island cotton in 1910–11 was taken at 18*d.*, and the 1911–12 and 1912–13 crops at 19*d.* per lb. The "Marie Galante" cotton was estimated at 9*d.* per lb. in 1910–11, 10*d.* per lb. in 1911–12, and 8½*d.* in 1912–13. Cotton seed was placed at an all round value of £5 per ton.

The acreage returned as under cultivation was 4,344 acres of Sea Island cotton and 1,100 acres "Marie Galante." The total acreage was smaller by 661 acres than that of the previous season. This was due to a smaller planting of Sea Island cotton, namely 724 acres, as a result of the poor yield of the previous season. The "Marie Galante" area was, however, increased by 63 acres.

The table given below shows the acreage planted in Sea Island cotton in each of the past eight seasons; the yield of lint and the yield per acre.

Crop.	Acreage planted.	Weight of lint in pounds.	Yield of lint per acre in pounds.
1905–6	790	137,460	174
1906–7	1,533	268,275	175
1907–8	3,200	432,000	135
1908–9	3,000	372,000	124
1909–10	2,528	356,139	141
1910–11	3,587	561,526	156
1911–12	5,068	487,116	96
1912–13	4,344	428,032	98
			Average for 8 years. 136

The records for the last two seasons clearly show the disastrous effects of unseasonable weather.

The returns for "Marie Galante" cotton showed that 1,100 acres were under cultivation last crop. The season was a fairly good one in the Southern Grenadines, where this cotton is grown, and yields above the average were obtained. As mentioned in previous reports the acreage returns are not very reliable; besides, the cotton is largely intercropped with Indian corn and pigeon peas.

The following are the "Marie Galante" crop totals for the 1911–12 and 1912–13 crop seasons.

Crop.	Area planted.	Total Yield.	Yield per acre.	Estimated Value.
1911–12 ..	1,037 acres.	46,822 lb.	45 lb.	£1,951
1912-13 ..	1,100 ,,	58,737 ,,	53 ,,	£2,080

The following figures are also interesting and instructive :—

Table showing the Quantity and Value of Cotton exported during the period from 1903–4 *to* 1912.

Year.	Sea Island Cotton.		All Cotton.	
	Weight.	Estimated Value.	Weight.	Estimated Value.
	lbs.	£	lbs.	£
1903–4	Not known.	—	43,392	794
1904–5	77,814	3,890	126,178	4,494
1905–6	121,174	6,059	138,150	7,674
1906–7	225,632	16,922	263,036	18,169
1907–8	388,833	29,162	427,819	30,787
1908	387,178	28,426	420,830	30,048
1909	330,936	20,684	350,186	21,325
1910	493,494	37,238	521,956	38,409
1911	511,947	40,529	538,114	41,619
1912	405,128	46,822	451,950	34,024

In regard to the Starch Industry the Agricultural Superintendent writes :—

The minimum sale price fixed for arrowroot of good quality by the local Arrowroot Growers' Association in the European, Canadian, and United States markets was 3*d.* per lb. This price, however, induced shippers of arrowroot of low grade to export it in large quantities to the United Kingdom, where it was not wanted. It is feared that substantial monetary losses will be incurred as a result of this action. The low grades are chiefly produced by the peasantry.

The following table shows the exports and value of arrowroot and cassava starch in each of the last five years.

Year.	Arrowroot in pounds.	Value.	Cassava Starch in pounds.	Value.
		£		£
1908	4,886,379	27,713	236,502	1,352
1909	5,594,498	31,792	195,166	1,009
1910	5,302,725	30,089	138,112	781
1911	4,254,130	40,430	221,562	1,269
1912	3,948,681	48,854	177,820	1,287

St. Vincent arrowroot is unrivalled as a raw material in the manufacture of chocolate and for general starch purposes. The soil, climate, and water conditions of the Colony are apparently more suited to this cultivation than that of any of the other Islands except, perhaps, Bermuda. That Colony's production, however, does not exceed 30 to 40 tons per annum as against some 2,000 tons produced in St. Vincent. Apart from that point of view, it is evident that the market for arrowroot is of such a limited nature that St. Vincent can, by herself, for many years to come, satisfy fully, indeed more than fully, all the requirements of it.

Of the Cacao and other minor industries Mr. Sands says :—

There was little to record. Some slight extension of planting was undertaken in places where there was a good depth of soil. The exports of cured cacao in 1912 were, however, smaller than those of the three previous years.

The exports of cured cacao for the past five years are given below :—

Year.	Weight in pounds.
1908	218,664
1909	241,294
1910	235,236
1911	285,869
1912	223,373

The increased attention mentioned in last year's report as being given to the planting of coconuts was continued. Besides the importation of over 10,000 nuts for planting purposes, a large number of plants were raised from nuts produced locally. The greatest extension of planting took place on the Carib Country estates, but on several other estates in the Windward and Leeward districts plantations were extended.

Groundnuts.—These are grown on a fairly large scale, more particularly on the light sandy soils of the higher Windward district. The export of unshelled nuts to the intercolonial markets—chiefly Trinidad—which amounted to 3,638 bushels in 1911, was increased to 4,080 bushels in 1912.

It might be possible to make an extension of planting and inaugurate an export trade with Canada under the new preferential tariff should prices prove satisfactory.

Anthrax, which not so many years ago constituted such a scourge amongst stock, has been conspicuous by its entire absence during 1912–13. It is gratifying to know that the special vigorous measures taken to suppress this disease have been successful. A watchful eye, however, continues to be kept in case the disease should resuscitate, the blood spores of every animal dying being microscopically examined as soon as possible after death by the Government Veterinary Surgeon. There are stringent regulations strictly enforced providing for immediate report to the Government Veterinary Surgeon direct, or to the nearest Police Station, of any animal that dies.

During the year the Agricultural Department has undergone reorganization. The definite post of Agricultural Instructor has been abolished and there are now two officers, the Agricultural Superintendent and the Assistant Agricultural Superintendent in the Department instead of three as formerly. The establishment of an Agricultural pupil system at the Experiment Station (referred to under the head of this Report relating to Education) instead of the Agricultural Residential School has permitted of this reduction and change. Both officers are able to do more constant travelling than formerly and planters and peasants benefit appreciably in this connection by the new scheme. As usual useful experimental work in cotton, arrowroot, cassava, sugar, etc., has been carried out by the Department. It is pleasing to note that advice from the officers of the Agricultural Department is now more readily sought and taken and that agriculturists are recognizing that the best agricultural methods can only be devised and plant diseases and pests only fought and conquered by the assimilation of knowledge derived from science and practice.

Land Settlement and Crown Lands.

The sales during the year under the land settlement scheme were 144 in all—rural lots 81, township lots 61 and 2 acre lots. In addition 228 acres of Crown land were sold out in small lots. Available Crown land consists of mountain lands, which are only suitable for small holdings for growing provisions and native produce.

The revenue from sales and rental of Crown lands was £724, as against £542 in the previous year.

The allotment, under the land settlement system, of Union Island, referred to in last year's Report, has continued to make good progress, nearly two-thirds of the Island being now sold and apportioned. Cultivation has increased 50 per cent. and there is every indication that the policy of the Government in regard to this dependency is fast justifying itself. A Revenue Officer is stationed in Union Island who, amongst other duties, is in charge of a branch Money Order Post Office and Government Savings Bank established for the convenience of the Islanders.

Shipping.

A table of the entries and clearances of steamers and sailing vessels during the years 1911 and 1912 is appended, as also a comparative statement of the total shipping during the last five years. These figures do not include ships of war, of which four, all British, visited the Colony during 1912 :—

III.—LEGISLATION.

The following Ordinances, eighteen in number, were added to the Statute Book during the year 1912 :—

The Customs 1900, Amendment 1912.
Jurors and Witnesses Remuneration.
Land and House Tax 1904, Amendment 1912.
Land and House Tax 1904, Amendment 1912 (ii).
Excise.
Appropriation.
Passenger Boats (Life-Saving).
Public Officers' Guarantee Fund.
Arrowroot (New Market Fund).
Aliens.
Licences.
Summary Conviction Offences 1911, Amendment 1912.
" Shakerism " Prohibition.
Opium.
Wireless Telegraph Amendment.
Supplementary Appropriation.
Customs Duties.
Georgetown Extension.

Probably the most important of these Ordinances is the " Shakerism" Prohibition Ordinance, an Ordinance passed to render illegal practices of a degrading and demoralizing nature, indulged in under the guise of a pseudo-religion by persons who called themselves Shakers or Penitents. This custom was rapidly gaining ground in the Colony, sweeping into the vortex of its orgies the most ignorant and superstitious of the people. At the time of writing, owing to this legislation, Shakerism is practically a " dead letter " in the Colony.

IV.—EDUCATION.

The results of primary education in 1911–12 and 1912–13 are as follows :—

—	1911–12.	1912-13,
Number of schools	26	26
Number on roll at 31st March.. ..	4,475	4,537
Average attendance	2,193	2,251
	£	£
Government Grant-in-aid	1,702	1,710

There is a boys' secondary school in Kingstown, with an attendance of 40 to 50 pupils. The fees charged are £2 per term for each scholar, except those under ten years of age in the lowest form, for whom the fees are £1 6*s*. 8*d*. per term, but when two or more brothers in forms above the lowest attend, there is a reduction made of 6*s*. 8*d*. for the second and 13*s*. 4*d*. for the third. An exhibition to this school is awarded every year.

There is a girls' secondary school, under Government supervision, in Kingstown, the attendance at time of writing being 24. The fees are the same as at the boys' secondary school.

The attendance at the primary schools continues about the same.

During the year the Agricultural School referred to in former reports was closed under a scheme of reorganization, and was reopened as the Grammar School, the Girls' High School taking up its quarters at the former Grammar School Buildings. Under this reorganization scheme six pupils of the standard of the pupils formerly taught at the Agricultural School are instructed by the Assistant Agricultural Superintendent in practical agriculture at the Experiment and Botanical Stations. These pupils are apprenticed for two years and receive graded allowances in proportion to the length of their apprenticeship, coming every day to their work, and living with their parents or guardians.

The fifteen acres of land attached to the Experiment Station is all fully worked up in various products, such as cotton, arrowroot, sugar, cassava, &c., by the boys themselves, while each pupil is allowed a small piece of ground as a vegetable garden, the produce of which may be disposed of for his own benefit.

A small stock farm affords a valuable practical illustration of how stock should be kept and fed.

V.—GOVERNMENT INSTITUTIONS.

During the year there were 772 admissions to the Colonial Hospital, making with those remaining from the previous year, 816 cases treated, as against a total of 1,014 in 1911–12.

The daily average was 55, as against 60·3, 57, and 55·8 in the previous three years.

The death rate was 5·7 per cent. of the total cases.

Operations numbered 104 as against 128 in 1911–12.

The medical officer is greatly assisted in his work by the presence of an efficient European nurse-matron, selected by the Colonial Nursing Association.

A portion of the old military citadel at Fort Charlotte is set aside for the detention of male lunatics who are violent, or manifest destructive tendencies. Other males, as to whom it is judged that they may be so treated with safety, are kept under supervision in the Pauper Asylum, and female lunatics are also detained there. A portion of the wards is partitioned off into cells to provide further and more suitable accommodation for these female cases, some of which are occasionally acute.

As soon as practicable any violent or difficult case is, by arrangement with that Government, sent to Grenada, but sometimes the asylum there has not got the requisite accommodation, and the transfer is delayed.

There were 24 cases under treatment during the year (11 being new admissions), of whom 6 were discharged cured, 4 died, and 2 were transferred to Grenada.

The total number of St. Vincent lunatics under care in the Grenada asylum was 23, at a cost of £449 3*s*. 9*d*. to the Colony.

The number of inmates of the Leper Asylum on the 31st March, 1912, was 6; during the year there were 4 admissions, 1 died and 1 was discharged, leaving 8 inmates in the asylum at the end of the year.

Under a Public Health Ordinance which was passed in 1910 compulsory segregation of pauper lepers is now provided for.

The Colony's paupers are housed in the old military buildings at Fort Charlotte at a considerable elevation overlooking the town of Kingstown.

At the commencement of the year under review there were 88 inmates of the asylum, and the admissions and discharges during the year were :—

—	Male.	Female.	Total.
Admissions	20	19	39
Discharged	3	9	12
Died	18	7	25
Total	21	16	37

leaving 90 on the 31st March, 1913.

The total expenditure in 1912–13 was £1,008 on the pauper and leper asylums, including the cost of lunatics kept locally—against £994 last year.

Chronic tertiary syphilis accounts for the vast majority of cases to whom this institution offers asylum for the closing stages of their lives.

Early in the year 1911–12 the old military hospital was renovated and opened as a yaws hospital capable of holding 50 patients. The disease of yaws has long been ravaging the homes of the labouring population in the Colony, and the institution of this hospital is much appreciated by them. The introduction of Professor Ehrlich's new remedy, Salvarsan (606), has more than doubled the number of patients passing through and out of this hospital as cured during the year.

A casualty hospital with four beds was opened at Georgetown in the Windward district in August, 1912. This is meant for emergency cases, and is a great boon to the people of a district situated 24 miles by road from the Colonial Hospital at the capital town of Kingstown.

Savings Bank.

The following is a comparative statement of the operations of the Savings Bank for the past five years :—

Year.	Number of Depositors at 31st December.	Amount of Deposits.	Amount of Withdrawals.	Balance at credit of Depositors at 31st December (including interest capitalized).
		£	£	£
1908	1,121	6,693	5,929	14,313
1909	1,063	6,624	7,371	13,869
1910	1,095	8,686	6,877	15,994
1911	1,163	9,526	7,923	17,971
1912	1,194	8,657	8,083	18,935

The amount due to depositors was distributed thus :—

	At 31st Dec., 1911.	At 31st Dec., 1912.
	£	£
Kingstown	16,115	16,655
Georgetown	1,107	1,445
Barrouallie	744	799
Union Island	5	36
Total	£17,971	£18,935

The Government made a profit on the working of the bank of £166.

There was invested of savings bank funds at 31st December, 1912, the sum of £17,146.

VI.—JUDICIAL.

The St. Vincent police force consists of a chief, a sergeant-major of European birth, and 49 West Indian non-commissioned officers and privates.

They are drilled, and have some training in the use of arms, and are supplied with Martini-Enfield rifles.

In addition to ordinary police work they perform duties in connection with excise supervision, district post office work, births and deaths registration, poor relief, and the management of district telephone exchanges. The prison is worked entirely by the police, save for the assistance of one warder in charge of gangs outside.

In Kingstown a select number of the force form a fire brigade for the town, receiving supplementary pay for this service from the funds of the Kingstown Board.

Two hundred and fifty-seven persons were committed to prison in the year, of whom 158 were men, 96 women, and 3 juveniles. The daily average was 26·86, as against 28 in 1911–12.

The number of cases reported to the police in 1912–13 was 581; of these 82 were for offences against the person, 42 for praedial larceny, 39 for other offences against property, and 418 for other offences. Only 491 of the above cases were brought before a magisterial court.

The total number of persons brought before the magisterial courts was 1,249; of these 372 were for offences against the person, 122 for praedial larceny, 164 for other offences against property, 8 for offences against the Masters and Servants Act, 106 for offences against revenue laws, municipal, road, and other laws relating to the social economy of the Colony, and 477 for other offences. These figures are inclusive of the cases reported by the police.

The total number of convictions in the inferior courts was 859, as against 883 in 1911–12.

These convictions are classed as follows:—

For offences against the person	216
„ malicious injury to property..	9
„ praedial larceny	99
„ other offences against property	99
„ offences against Revenue Acts, &c. ..	85
„ offences against Masters and Servants Act	8
„ other offences	343
Total ..	859

The convictions in the Supreme Court were 5 for offences against property, 3 for offences against the person and 1 for other offences.

The acquittals were as follows:—

In the Inferior Courts	151
In the Supreme Court	2

VII.—VITAL STATISTICS.

The population at the 1891 census was 41,054. No census was taken in 1901, on account of the expense involved, which the Colony was not in a position to afford. The population by the official census of April, 1911, was 41,877, which had increased at 31st March, 1913, to 44,434.

The births registered in 1912–13 were 1,678 (849 males and 829 females), as against 1,790 in 1911–12; of these 1,004 or 59·83 per cent. were illegitimate.

Still-births were 104—32 legitimate and 72 illegitimate—the figures for the previous year being 36 and 58 respectively.

Marriages were 137—a decrease of 16 on last year's figures. The figures are given in the following comparative table of marriages:—

Denomination.	1910–11.	1911–12.	1912–13.
Church of England	50	67	62
Church of Scotland	9	5	7
Wesleyan	60	65	49
Roman Catholic	7	13	17
Plymouth Brethren	1	3	2

The total registered deaths were 878, as against 914 in 1911–12, being 19·75 per 1,000 of the estimated population. The infant mortality (infants under one year, exclusive of still-births) was 185, being 21·07 per cent. of the total number of deaths. The similar figure in 1911–12 was 183 or 20·02 per cent.

Appended is a table of the causes of death :—

General diseases (includes syphilis, 80 ; tubercle, 48, tetanus, 18 ; malarial fevers, 11 ; dysentery, 21)	221
Diseases of nervous system	34
,, ,, circulatory system	48
,, ,, respiratory system	35
,, ,, digestive system	196
Parasites	48
Age	103
Still-born	104
Other diseases	89
Total ..	878

In the towns the authorities are realizing more and more the importance of stricter sanitation and are taking steps accordingly. In the villages, however, sanitary matters are still on a primitive basis, although the Government, through their District Sanitary and Medical Officers, spare no pains to impress upon the population generally the necessity for care in this direction. The establishment of an organized Sanitary Department now under contemplation should have far reaching effect. In the meantime the provisions of the Public Health Act, 1910, are being more rigidly enforced than has hitherto been the case.

A Trained Nurses' Association has recently been formed, which has for its object the better training of nurses and midwives and the prosecution of women practising midwifery illegally. This Association has the sympathy and financial support of the Government and it is hoped will be a means of achieving something in the direction of diminution of infantile mortality.

The rainfall for the year 1912–13 (at the Botanic Station, 206 feet above the sea level) was 94·89 inches, as against, 119·07 inches in 1911–12.

Rain fell on 275 days during the year.

The maximum fall in twenty-four hours was 3·04 inches on the 8th December.

December was the wettest month, with 11·93 inches. A good deal of damage was done to the roads during that month owing to the heavy rain, while the effect on the cotton crop was disastrous.

May was the driest month, with 2·71 inches.

The mean monthly temperature was 78° F. Maximum for the year was 80·6° F. (in September) and the minimum 73·5° F., which was experienced in February.

Except in August and September, when the atmosphere is uncomfortably hot, although not even in those months insalubrious, the climate may be regarded as most healthy for both Europeans and coloured persons. Malaria is hardly known, while yellow fever has proved itself to be a disease of the past.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The fortnightly mail service from and to England continued to be performed by the Royal Mail Steam Packet Company. At Trinidad the mails are transferred into the intercolonial ships, which call weekly at St. Vincent on regular days—one week with outward mails on the way round the islands, and the following week on the way to Trinidad with homeward mails. The service was carried on in a satisfactory manner.

The steamers of the Pickford and Black Line, from Halifax, Nova Scotia, under contract with the Imperial and Canadian Governments, continued to run as usual, while occasional calls were made by the steamers of Scrutton's Direct Line and the Quebec Steamship Line. The East Asiatic Line of steamers from Copenhagen via London and the Danish West Indies also made occasional calls.

There is an inland postal system by which the Windward district of the Colony is served three times a week, the Leeward district daily, and the Grenadines once a week.

The postal order system continues to grow in popularity, and its extension to the district towns has been accomplished.

The volume of work in the Post Office also continues to expand, which is a sure sign of the upward march of the Colony.

The revenue of the Telephone Department was £625, including £304 transferred to that head on account of the Government installations. The expenditure was £528. The main installation is in Kingstown with branch lines all over the island. The service is a most useful one.

IX.—GENERAL OBSERVATIONS.

In 1913 Her Highness Princess Marie Louise of Schleswig-Holstein honoured the Colony with a visit and stayed for the month of March as a guest of the Administrator and Mrs. Gideon Murray. During this time she visited nearly every part of the Colony either on horseback or by carriage, being accorded everywhere she went a most loyal and spontaneous welcome from all sections of the community. She brought with her from England a most graciously worded message from King George to his subjects in the West Indies. This message was received in St. Vincent, as in every other portion of His Majesty's West Indian possessions, with much loyal enthusiasm and gratification.

From October, 1912, until February, 1913, the Administrator was on leave of absence in England. During Mr. Murray's absence, His Honour R. B. Roden, Chief Justice, acted as Administrator.

As already stated earlier in this Report the season for cotton was not a good one; still the remunerative prices obtained for arrowroot compensated in a degree for the disappointment over the former crop. On the whole the colonists have no reason to regard the position with a heavy heart, for cultivation, trade and revenue continue to expand. Moreover it has been possible for the Government during the past two years to undertake many public works of convenience which for lack of funds had hitherto been indefinitely delayed.

If I were asked what I regarded as the pressing point for consideration in the St. Vincent agricultural problem to-day, I should without hesitation reply 'Manure.' Any land, however fertile, which is cropped year after year with little or no application of manurial-substances will "lose heart" and in time become arid and unfertile.

The Government at the moment has under consideration a scheme for turning the cotton seed produced every year in the Colony into manure by erecting machinery for the separation of the oil from the seed, the residue being applied as manure; but pending the materialization of any action that the Government may be able to take it is important that agriculturists in their own interests should make every endeavour to obtain manures and not grudge the necessary outlay upon what for the moment appears unproductive expenditure, but which will repay itself handsomely over a series of years.

The approaching opening of the Panama Canal is already causing an influx of visitors to these Caribbean Seas, and if exquisite scenery and a healthy climate be inducements to travellers then as years speed on we may well expect to see St. Vincent one of the most favoured tourist spots amongst the many beautiful West Indian Islands.

A sketch map of the Colony is attached to this Report.

C. GIDEON MURRAY,
Administrator.

30th October, 1913.

Ordnance Survey, Southampton 1914

C. O. № 22

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

ANNUAL.

86	Southern Nigeria	Mineral Survey, 1912.
87	Ceylon	Mineral Survey.

The Public Debt at 31st December, 1938, amounted to £96,768, of which £1,400 comprises Municipal Loans to the town of Kingstown and £27,332 to the St. Vincent Co-operative Arrowroot Association for the repayment of which general revenue is only responsible in case of default. The accumulated funds towards its redemption amounted to £11,186.

The surplus assets, exclusive of Colonial Development Schemes, at 31st December, 1938, amounted to £26,404.

The main heads of taxation are:—

	Yield for 1938. £
Import Duties	40,357
Export Duties	4,217
Licences	3,744
Excise Duties	5,108
Land and House Tax	6,498
Income Tax	5,063
Stamp Duties	1,179
Estate Duties	872
Trade Duties	2,522

The Customs Tariff on the principal items of imports is as follows:—

Article.	*Preferential Tariff.*	*General Tariff.*
Boots and shoes (canvas with rubber soles).	12½ per cent. *ad valorem*.	12½ per cent. *ad valorem* and 1*s*. per pair.
Boots and shoes (where the outer part of the uppers is made of leather or leather and elastic).	12½ per cent. *ad valorem*.	12½ per cent. *ad valorem* and 3*s*. per pair.

Meats—beef and pork ...	6*s.* per 100 lb.	9*s.* per 100 lb.
Motor spirits	10½*d.* per gal.	1*s.* 6*d.* per gal.
Metals—all kinds ...	12½ per cent. *ad valorem.*	22½ per cent. *ad valorem.*
Soap, common	5*s.* per 100 lb.	7*s.* 6*d.* per 100 lb.
Manures	Free.	Free.
Butter	10*s.* 5*d.* per 100 lb.	25*s.* per 100 lb.
Butter substitutes ...	4*s.* 2*d.* per 100 lb.	6*s.* 3*d.* per 100 lb.
Cotton piece-goods (value 1*s.* and under per yard).	10 per cent. *ad valorem.*	15 per cent. *ad valorem.*
Cotton piece-goods (value over 1*s.* per yard).	12½ per cent. *ad valorem.*	18¾ per cent. *ad valorem.*

Except in a few instances the *ad valorem* duty levied is 12½ per cent. preferential tariff and 18¾ per cent. general tariff.

An excise duty of 5s. per proof gallon is levied on rum manufactured in the Colony and the amount collected in 1938 was £5,108.

A trade duty of 2s. per proof gallon is imposed on all spirits manufactured in the Colony and 2s. per liquid gallon or proof gallon (whichever quantity is mentioned in the Customs Tariff) on all imported spirits.

Stamp duties yielded £1,179 in 1938; the summary of the rates is as follows:—

	£	s.	d.
Admission to act as a barrister	26	5	0
Admission to act as a solicitor	15	15	0
Agreement under hand, when the subject matter is of the value of £5 and not exceeding £25	0	1	0
For each additional £25 or part thereof	0	1	0
Agreement for the purchase of or otherwise dealing with real estate when such purchase or dealing is to be carried out by subsequent deed	0	2	0
Agreements not otherwise charged for	0	0	6

	£	s.	d.
Appraisement of goods, chattels, etc., over the-value of £10...	0	2	0
Assignment of property where the value does not exceed £50	0	2	0
For every additional £50 or part thereof	0	2	0
Bank cheques	0	0	1
Bills of exchange and promissory notes up to three days sight	0	0	1
Bills of exchange and promissory notes—other kinds—not exceeding £1	0	0	1
Exceeding £1 and not exceeding £10	0	0	2
Exceeding £10 and not exceeding £25	0	0	3
For each additional £25 or part thereof	0	0	3
Bills of lading	0	0	3
Bills of health	0	4	0
Bills of sale absolute	0	10	0
Bills of sale by way of security	0	5	0
Bonds for any sum not exceeding £100	0	5	0
For each additional £50 or part thereof	0	2	6
Conveyance or transfer on sale of real property when the amount or value does not exceed £10	0	1	0
Exceeding £10 and not exceeding £25	0	2	6
Exceeding £25 and not exceeding £50	0	7	6
For each additional £50 or part thereof	0	7	6
Customs ships' manifests	0	1	0
Customs bills of entry inwards	0	0	3
Shipping Bill	0	0	1½
Legacies :—			
Where the legacy amounts to £50 and does not exceed £100	2	0	0
For every additional £50 or part thereof	1	0	0
Licence for marriage	1	0	0
Mortgage of real property for every £100 or fractional part...	0	10	0
Release of mortgage	0	10	0
Protest of any bill of exchange	0	2	0
Receipt for the payment of £1 and upwards	0	0	1
Probate of wills and letters of administration where the value of the property exceeds £50 and does not exceed £100	0	10	0
For every additional £50 or part thereof	0	10	0

Land and House Tax.

A tax is levied of 2s. per acre or part thereof on land in St. Vincent, and of 3d. to 1s. per acre or part thereof on land in the islands comprising the Grenadines. A tax is levied on houses in the island of St. Vincent and in Union Island at the following rates:—

Upon houses of which the assessed annual rental shall be—

Over £3 and not exceeding £5 : 2s. per house.
Over £5 and not exceeding £6 : 2s. 6d. per house.
Over £6 and not exceeding £7 10s. : 3s. 4d. per house.
Over £7 10s. and not exceeding £9 : 4s. per house.
Over £9 and not exceeding £10 : 5s. per house.
Over £10 and not exceeding £12 10s. : 6s. 8d. per house.
Over £12 10s. and not exceeding £15 : 10s. per house.
Over £15 at the rate of £5 per centum of the assessed annual rental.

No tax is levied on houses in the other islands of the Grenadines. The revenue from this source amounted to £6,498 in 1938.

These taxes are payable annually during the months of November and December. All unpaid taxes after 31st December are collected during the month of January with a fine of 3d. on amounts not exceeding £1 and of 8 per cent. on amounts exceeding £1. Any unpaid taxes after 31st January are handed over to the bailiff for collection.

Water Tax in Country Districts.

Certain districts outside of the limits of the various towns have been provided with pipe-borne water supplies. The boundaries of these districts are prescribed by Order in Council and a graduated tax was levied on all houses situated within such a district until 15th December, 1937, when the levying of this tax was discontinued for economic reasons.

A house of which the assessed annual rental did not exceed £2 10s. was taxed 6d., a house the assessed annual rental value of which exceed £2 10s. but did not exceed £5 was taxed 1s., and a house the assessed annual rental value of which exceeded £5 was taxed 2s.

XVII.—MISCELLANEOUS.

Crown Lands.—The amount of revenue collected from sales and leases of Crown Lands during 1938 was £967 0s. 8d. as compared with £793 2s. 2d. in the previous year, and the arrears were approximately £900, as compared with £1,016 19s. 2d. in the previous year.

Surveys.—Eight surveys in connection with building sites, encroachments, and purchased lands were performed by the Crown Surveyor. No surveys were undertaken by surveyors in private practice.

Three Rivers Land Settlement Scheme.—At the end of the year under review there remained one rural lot at Three Rivers Estate for sale equal in area to 12 acres 1 rood 13 poles and valued at £122 10s. 0d. The revenue collected during this year under the scheme was £957 5s. 8d. as compared with £814 16s. 8d. in 1937.

Visits of His Majesty's Ships.—His Majesty's Ship *Orion* visited the Colony in March and in August.

Official.—His Excellency Sir Henry Bradshaw Popham, K.C.M.G., M.B.E., Governor and Commander-in-Chief of the Windward Islands, visited the Colony for the following periods during the year: 5th April to 19th April; 27th December to 3rd

January, 1939. His Excellency was on short leave of absence in September, when the Government of the Windward Islands was administered by His Honour A. A. Wright, C.M.G.

His Honour A. A. Wright, Administrator of St. Vincent, was appointed to be Administrator of St. Lucia, and left this Colony to take up his new appointment on the 8th of July, 1938.

The Honourable L. P. Spence, Colonial Treasurer, administered the Government of St. Vincent from the 9th to the 12th of July, 1938, and from the 23rd of September to the 12th of October, 1938.

The Honourable W. L. Heape, Colonial Secretary, Grenada, administered the Government of the Island from the 13th of July to the 23rd of September, 1938.

His Honour Major W. Bain Gray, C.B.E., was appointed Administrator of St. Vincent, and arrived in the Colony and assumed the administration of the Government on the 12th of October, 1938.

Visit of West India Royal Commission.—The Vice-Chairman and five members of the West India Royal Commission, which has been appointed by His Majesty the King to investigate the social and economic conditions of the peoples of the British West Indies, arrived in the Colony on the 27th of December, 1938, and remained until the 5th of January, 1939. The other members of the Commission visited the Colony on the 17th of January. 1939.

Electricity.—Kingstown and environs are lighted by electricity generated by a model Diesel plant of 130 kilowatts capacity generating at 230-400 volts A.C. three-phase 50 cycles.

A refrigerating plant is also run as an adjunct to the Electricity Department.

(For Report for 1913 see No. 792.)

THE ACTING GOVERNOR TO THE SECRETARY OF STATE.

Grenada,

27th October, 1914.

SIR,

I have the honour to transmit herewith the report by Mr. F. H. Watkins, I.S.O., Colonial Secretary, on the Blue Book of the Colony of Grenada for the year 1913.

I have, etc.,

DOUGLAS YOUNG,

Acting Governor.

The Right Honourable

Lewis Harcourt, M.P.,

etc., etc., etc.

BLUE BOOK REPORT FOR THE YEAR 1913.

FINANCIAL.

1. The total revenue and expenditure in the last five financial years were as under :—

	Revenue.	Expenditure.
	£	£
1909–10	74,224	73,282
1910–11	81,413	75,561
1911–12	98,645	81,012
1912–13	86,393	84,059
1913–14	91,258	85,827

2. The total revenue, surpassing all previous records except that of 1911–12, exceeded the estimates—£81,225—by £10,033, and the revenue of the preceding year by £4,865. The receipts from customs duties, which brought in £53,900, exceeded anticipations by no less than £10,900. Excise receipts fell short of the estimate by £2,520, but the increased collections on imported rum, which produced £3,119 in 1913, as compared with £30 in 1912, account for this deficiency. The large increase of duties for unrefined muscovado sugar of the previous year was more than maintained, £4,107 being collected, as compared with £3,603 in 1912.

3. The details of revenue under the usual heads, as compared with those of the preceding year, were :—

	1912–13.	1913–14.
	£	£
Customs	46,611	53,900
Licences, Excise and Internal Revenue	26,812	26,250
Estate Duties	2,178	246
Fees of Office, etc.	1,939	2,341
Post Office	3,635	2,518
Telephones	1,984	2,243
Water Supplies	210	226
Revenue from Government Property	1,653	1,922
Interest from Sinking Fund ..	1,148	1,153
Miscellaneous Receipts ..	181	235
Land Sales	42	224
	£86,393	£91,258

4. The expenditure of £85,824, although £211 less than estimated, is the largest in the records of the island, storm damages, which were unusually heavy during the year, necessitating an expenditure of £1,055, being £855 more than anticipated.

5. The details of expenditure, as compared with those of the preceding year, were as follows:—

	1912–13.	1913–14.
	£	£
Charges on account of Debt	6,196	6,196
Pensions	2,815	2,993
The Governor	2,293	2,225
Colonial Secretary	1,813	1,826
Treasury Department	5,800	5,729
Post Office Department	3,307	3,039
Audit Department	729	726
Port and Marine	698	571
Do. Special Expenditure ..	86	—
Legal Departments	4,531	4,594
Police	5,326	5,440
Military Expenditure	567	839
Prisons	1,263	1,299
Sanitation	709	921
Medical Department	4,467	4,626
Hospitals and Asylums	6,222	7,422
Education	7,580	8,103
Do. Special Expenditure	722	293
Ecclesiastical	314	314
Charitable	734	747
Telephones	1,641	1,842
Carriacou District	1,050	927
Water Supply, Richmond Hill	225	235
Miscellaneous	5,543	5,083
Agricultural Department	1,382	1,394
Public Works Department	1,629	1,568
Do. Special Expenditure	377	—
Public Works Recurrent:—		
(a) Roads and Bridges	9,130	10,288
(b) Other	1,336	1,474
Public Works Extraordinary	5,572	5,110
Total Expenditure from Colonial Funds	84,057	85,824
Imperial Department from balance of Imperial Grant	2	3
	£84,059	£85,827

6. At the opening of the year under review the surplus stood at £58,720; at the close at £64,154, which was distributed as follows:—

	£
Reserve Fund	20,621
Loans to District Boards	13,315
Land Settlement Schemes	6,860
Balance of Stores on Hand	3,100
Current Cash	20,258
	£64,154

7. The reserve fund was increased during the year by £365, representing interest on the St. George's and Sauteurs Waterworks Loans from general revenue. The whole of the reserve stood invested at the close of the year as follows :—

Description of Stock.	Rate. per cent.	Actual. £
Gold Coast	3	2,687
Zanzibar Guaranteed Debentures ..	3	1,564
Transvaal	3	1,112
Strait Settlements	3½	3,477
Southern Nigeria	3½	4,167
Sierra Leone	3½	2,979
Queensland	3¾	4,270
Sierra Leone	4	365
		£20,621

8. The public debt was £123,670 and the sinking fund £35,069.

9. The revenue and expenditure of the District Boards in the financial year ended the 31st March, 1914, were as follows :—

	Revenue. £	Expenditure. £
St. George's	4,108	4,168
St. Andrew's	2,731	2,776
St. Patrick's	2,134	1,884
St. John's	1,693	1,588
St. Mark's	607	682
St. David's	818	818
Hillsborough	92	87
	£12,183	£12,003

10. The loan debts of the District Boards were as follows :—

	£
St. George's	13,024
St. Andrew's	1,850
St. Patrick's	4,236
St. John's	3,400
St. Mark's	987
St. David's	—
Hillsborough	—
	£23,497

against which the following amounts have been paid to the Government for the formation of sinking funds :—

	£
St. George's	1,698
St. Andrew's	199
St. Patrick's	129
St. Mark's	—
St. John's	646
	£2,672

TRADE, AGRICULTURE, AND INDUSTRIES.

11. The value of the imports and exports of the Colony in the last five years is as follows :—

	Imports. £	Exports. £
1909	268,236	284,846
1910	279,236	291,760
1911	309,227	264,640
1912	279,875	285,590
1913	282,927	367,149

12. The origin of imports was as follows :—

From	Value. £	Percentage.
United Kingdom	113,076	40
British Colonies	69,135	24
Foreign Countries	100,716	36
United States (alone) ..	88,342	31
Canada (alone)	9,214	3

while the subjoined table gives the principal details of the articles imported into Grenada :—

	£
Apparel	4,652
Biscuits, Bread and Cakes	5,289
Boots and Shoes	5,509
Bullion and Banknotes	1,621
Butter	2,696
China and Earthenware	1,064
Coal	2,260
Cotton Goods	28,984
Cutlery..	212
Fish of all kinds	15,676
Glass and Glassware	1,439
Grain :—	
Oats	4,910
Rice	8,286
Wheaten Flour	42,917

	£
Haberdashery and Millinery	5,640
Hardware	2,360
Hats and Bonnets	2,575
Lard	2,163
Leather, Dressed and Undressed	1,374
Machinery	1,904
Manures, Chemical and Other	8,958
Meats, Canned, Salted, etc.	7,669
Medicines and Drugs	3,388
Metals and Manufactures of	9,140
Oils :—	
Cotton Seed	2,381
Olive and Refined Food	2,593
Kerosine	4,103
Oleomargarine	4,347
Silk, Manufactures of	628
Soaps	4,250
Spirits (Potable)	6,556
Sugar, Unrefined	10,875
Do. Refined	2,817
Tobacco, Unmanufactured	541
Do. Manufactured, Cigars	2,376
Do. do. Cigarettes	1,113
Wine	2,529
Wood and Timber	7,716
Shingles	621
Furniture	2,637
Wool, Manufactures of	2,347

13. The trade in chemical manures has largely increased of late years, partly owing to the gradual exhaustion of the soil, and partly to more scientific methods of cultivation being adopted.

14. In consequence of the failure of the sugar crop, resulting in the distillation of rum becoming dependent on imported molasses, a marked increase in the importation of spirits took place. So depleted were the stocks of rum that a reduction of the protective duty of 8*s*. to 6*s*. a gallon was necessary to allow the importation of rum, which resulted in 11,225 gallons, as compared with 69 gallons in the previous year, being imported.

15. Importations of sugar were again above the average owing to the sugar crop having been practically destroyed by drought, the value of unrefined sugar imported being £10,875, as compared with £11,401 in 1912.

16. The exports for the year showed an increase over those of the previous year of £81,000, or 28 per cent., the total value being £367,149, as against £285,590 in 1912.

17. The distribution of the exports appears as under :—

To	Value. £	Percentage.
United Kingdom	228,232	62
British Colonies	6,496	2
Foreign Countries	132,421	36
Canada (alone)	401	—
United States (alone) ..	89,666	24

18. In quantity the exports of cocoa slightly exceeded those of 1912 —105,284 cwt. as against 101,043 cwt.; while the value rose from £225,317 to £303,073, an increase of 35 per cent.

19. The value of nutmegs and mace export rose to £25,205 and £18,939, as compared with £21,737 and £15,040 in 1912, respectively.

20. The cultivation of cotton is confined entirely to Carriacou, and the industry is steadily progressing. Marie Galante is practically the only variety planted, efforts to establish Sea Island cotton having so far proved unsuccessful. The cotton exported last year was of the value of £10,499, as compared with £9,019 in 1912, while the value of cotton seed sent away was £2,779, as against £1,964 in the previous year.

21. The other products exported included :—

	Value. £
Lime juice	240
Avocado Pears	373
Coconuts	316
Copra	255
Turtle shell	473

SHIPPING.

22. The shipping tonnage, inwards and outwards, in the last five years has been :—

Year.	Total.
1909	586,074
1910	590,451
1911	535,161
1912	565,780
1913	656,191

Of the total in 1913, 633,302 was steam tonnage, representing 172 steamers, all British.

LEGISLATION.

23. Twelve Ordinances, two of which were the annual enactments for expenditure, were passed by the Legislature in 1913, the more important being :—

No. 2, to render the police force liable to military duty in case of invasion.

No. 4, to amend the Water Supply Ordinance, by giving the water authority power to make assessment of the annual rental of all houses and buildings within its district liable to water rates which were exempt from taxation.

No. 5, to consolidate and amend the law relating to wireless telegraphy.

No. 10, to provide for the adhesion of the Colony to the Canadian West Indian Preferential Agreement signed at Ottawa on the 9th April, 1912, and to amend the Import Duties Ordinance. The duties on goods enumerated in the schedule of the Ordinance which were the produce or manufacture of the United Kingdom or Canada were fixed at four-fifths of the duty imposed on similar goods imported from elsewhere, while the duty on Canadian flour was reduced, preferentially, by at least 6*d.* on every hundred pounds weight.

No. 11, to declare the terms and conditions applicable to loans authorized by the Government and to provide for the creation of inscribed stock.

No. 12, to give power to terminate or suspend pensions when the holders became the directors or servants of companies carrying on business in the Colony.

EDUCATION.

24. The Board of Education for primary education consists of the Governor as President and of not less than ten members, of whom one-half shall be, and one-half shall not be, Roman Catholics.

25. The education staff of the Colony consists of an Inspector of Schools, who is responsible for the inspection and examination of the schools and for checking the administration of the moneys voted for primary schools, an Assistant Inspector of Schools, who is secretary of the Board of Education and who is in charge of agricultural instruction in the schools, a clerk and a copyist.

26. Schools for primary education are of two descriptions—namely, Government schools, maintained wholly from public funds, and grant-in-aid schools, maintained partly from private contributions or local

funds and partly from public funds. The number of Government and aided schools in 1913 was as follows :—

Government	11
Roman Catholic	23
Anglican	12
Wesleyan	5
Church of Scotland	2
	53

27. By the Primary Education Ordinance and Code schools for primary education are graded in four classes, namely :—(a) industrial schools, to be established in important centres of population, at which practical instruction in agriculture or industrial occupations will be given ; (b) combined schools situate in important centres of population where, in addition to the instruction prescribed in the lower division schools, the more advanced pupils are taught in higher standards prescribed in the code ; (c) lower division schools, where the three R's are thoroughly and exclusively taught within certain limitations and ages, and (d) infant schools for children under the age of seven years. Infant schools may be attached to combined or lower division schools, provided the rooms of the two departments are separated by screens or otherwise. The combined schools are divided into three grades—A, B, and C—grade A including those with average attendance exceeding 180, grade B an average attendance between 120 and 181, and C an average attendance of 120 or less, the salaries of the head teachers and the number of the staff varying according to the grade. Additional allowances according to the grade of the schools are also granted where 80 per cent. of the pupils have successfully passed in the three R's and extra subjects at the annual examination. Head teachers of combined schools are entitled to pensionable allowances under the provisions of the Ordinance on retirement from service.

28. Applications for grants in aid of the erection, extension or improvement of buildings may be considered by the Board, provided that the amount shall not exceed one-half of the sum required, or £150 for the erection of, and £100 for the extension and improvement of, schoolhouses. The sum of £75 is annually voted for the upkeep of latrines.

29. Religious instruction forms part of the daily instruction in aided schools and, so far as circumstances permit, in Government schools, for which latter the Board has the power to arrange separate days and hours.

30. On the 31st December, 1913, the number on roll in the Colony was 11,314 and the average attendance 5,695, or 50·3 per cent. of the number registered, as against 10,372, 5,268, and 50·7, respectively, on the 31st December of the previous year. At the annual examinations 4,087 were presented, of whom 486 received instruction above Standard IV b. Twenty-eight probationers, 34 first year, 12 second year and 7 third year pupil teachers, or 81 in all, were examined. At the local examination of the College of Preceptors 23 teachers were examined, as against 14 and 20 in 1912 and 1911 respectively.

31. The amount on the Estimates for grants in aid of primary schools for 1914–15 is £6,122 as against £5,600 in 1913–14, while £350 was owed for building grants.

32. *Grenada Boys' Secondary School.*—The school was reorganized and reopened in 1911 with 38 pupils, which number increased to 80 in 1913. The institution is intended to prepare boys for agricultural, professional and commercial life in the Colony and elsewhere. Among the subjects taught are the agricultural sciences, which form an important part of the curriculum, military drill, bookkeeping and hygiene. In the year under review the expenditure was £1,051, £361 being received as fees, while the estimate for 1914–15 is £1,424. The ordinary tuition fee is £2 a term, and for boys under ten years of age £1 6*s.* 8*d.*, but in the case of two or more pupils of a family a reduction of one-fourth is made for the second and third boy, and one-half for those over three. Exhibitions tenable for three years or more are offered to boys attending the primary and secondary schools in Grenada.

33. *Girls' Secondary School.*—This School was reopened by the Government in January, 1912, and is undenominational. The Board offers three exhibitions to girls attending primary and private schools and one to pupils of the school. The number of pupils in 1913 was 25, and the expenditure £416, £104 being received as fees. The estimate for 1914–15 is £462.

34. *The St. Joseph's Convent School,* which has a daily average of 75, received a Government grant of £150, while £166 was paid in fees and £70 in voluntary contributions.

MEDICAL.

35. The year under review was, on the whole, healthy, no disease being epidemic, although several small outbreaks of infectious diseases occurred in different parts of the Colony. Ten cases of smallpox and 21 of typhoid were notified, and an outbreak of measles in one of the districts near the chief town took place towards the middle of the year. It is satisfactory to note that malaria was less prevalent than in the previous year and was of a mild type, which is due to improvements in the drainage of the towns, especially of Grenville, where the energy and well directed efforts of the District Board and Medical Officer have given appreciable and beneficial results.

36. Tuberculosis was made a notifiable disease and an Anti-Tuberculosis Society was formed. One hundred and eleven cases were notified.

37. During the year great stimulus to local efforts to combat the baneful effects of ankylostomiasis was imparted by the visit of Mr. Wickliffe Rose, the Director General of the International Health Commission of Washington. The endemic disease, which is due to the presence in the upper part of the intestine of a small worm less than half-an-inch in length, produces anæmia and loss of energy, and is a considerable factor in the spread of tuberculosis. The Ankylostomiasis Ordinance of 1910 makes it plain that the importance of eradicating the disease had been recognised by the medical and sanitary authorities in Grenada. The Ordinance makes it lawful for the sanitary authority, on the report of a medical officer, to require any person suffering from ankylostomiasis to attend for treatment at a public dispensary or to remain in a public hospital and to require estates to provide suitable latrine accommodation. Provision is made for public latrines in towns, villages and schools. The General Board of Health is empowered to frame rules for enforcing the proper use of latrine accommodation and the cleansing of infected areas, and for generally carrying out the objects of the Ordinance.

38. The visit of Mr. Wickliffe Rose was followed by a generous grant of £1,856 being made by the International Health Commission, to be expended in 1914 and 1915 for the twofold purpose of suppressing and diminishing existing human infection and of preventing new infection by measures for avoiding pollution of soil and water and for guarding individuals from infection. The grant has been apportioned as follows:—

	£
Medical Officer in Charge (£550, with quarters, or £50 in lieu)	600
Travelling allowance for Medical Officer	50
Assistant Medical Officer	400
Travelling Allowance for Assistant Medical Officer ..	50
Four Microscopists, to be trained locally..	300
Rent of Quarters of Microscopists..	45
Clerk to Medical Officer in Charge..	100
Porterage	60
Contingencies	100
Two Passages	50
Microscopes	70
Lanterns	21
Microscopic Sundries	10

Much of the value of the work under the Commission will depend upon how far adequate, continuous and energetic measures are taken in the future, locally, for the improvement of sanitation and the enforcement of sanitary regulations are adopted and carried out.

39. *Colony Hospital.*—The admissions into the hospital for the year numbered 1,530, while 2,709 were prescribed for in the out-patient department, 728 prescriptions being free. The total cost per patient was £20 1*s.* 3*d.* a year. Two wards were opened for the reception of patients, and they have been a great boon to the Resident Medical Officers. On the 15th April the maternity ward

with four beds was formally opened by Her Highness Princess Marie Louise of Schleswig-Holstein, who graciously consented to the ward bearing her name.

40. *Yaws Hospital.*—The total number of cases admitted during the year was 211. Some of the patients were treated with salvarsan (606) with most encouraging results. The expenditure was £413, being £8 5*s.* 2½*d.* a year, for each patient.

41. *St. Andrew's Hospital.*—One hundred and seventy-five were treated in the wards, as compared with 199 in 1912, the average number of patients being reduced to 10. Only 24 cases of ankylostomiasis were treated in the wards, most cases being looked after in the houses of the sufferers. The number of prescriptions compounded in the dispensary was 12,675, of which 7,477 were free. The total cost of each patient was £38 8*s.* a year.

42. *Carriacou District Hospital.*—One hundred and ninety nine patients were admitted during the year, as against 186 in 1912, the cost being £30 8*s.* 4*d.* a year, while the total expenditure amounted to £649 18*s.* 8*d.* and the receipts to £90 15*s.*

43. *Consumptive Hospital.*—The inauguration ceremony of this institution was performed on the 4th April by Her Highness Princess Marie Louise of Schleswig-Holstein, who graciously permitted the hospital to bear her name. The institution consists of 2 wards, 1 male and 1 female, of 10 beds each, and is solely for tuberculous patients, who are admitted by the Medical Superintendent on the recommendation of the District Medical Officers. During the 163 days the hospital was open 16 male and 22 female patients were admitted, of whom 1 male and 5 females died, 12 being discharged as improved and 20 remaining as inmates at the end of 1913. A few selected cases were treated with Tuberculin, but sufficient time has not elapsed to judge the results. The expenditure from the 21st July to the 31st December was £435.

44. *Lunatic Asylum.*—The number under treatment was 145, of whom 112 remained in from the previous year, and 33 were admitted and 24 were discharged, while 11 died. The daily average number of inmates was 115 and the net cost to the Colony £1,954 15*s.* 9*d.*, the average cost a head, inclusive of all patients, being £21 11*s.* 9*d.* a year.

45. *Poor Asylum.*—This is practically an asylum for incurables, the accommodation being for 38 males and 20 females. During 1913 the total number admitted was 40, the daily average being 52, 32 males and 20 females, the expenditure being £626 or a cost of £11 19*s.* 11*d.* a year for each inmate.

46. During the year the fees for medical attendance and the cost of medicines for labourers were materially reduced, in compensation for which the office of Medical Officer became pensionable and the District Medical Officers were allowed forage allowances.

JUDICIAL STATISTICS.

47. The strength of the Police Force was 81 of all ranks, and comprised the Chief of Police, a sergeant major, 5 sergeants of police, of whom 3 were sanitary inspectors, an armourer sergeant, a bugler, 67 corporals and privates, and 2 clerks. The standard of efficiency in musketry was good, all the members of the force undergoing the course laid down for the Territorial Army in England. The number of rural constables was 150.

48. Two hundred and sixty-two persons were admitted to the Richmond Hill Prison in 1913, the daily average being 52, an increase of 7 on that in 1912. The males showed an average of 47, the females 5 and the juveniles ·33. The total expenditure of the prison was £1,957, against which had to be set the value of the labour of the prisoners, estimated at £631, and the sales of broken stones, realising £43, which thus gave a net expenditure of £1,283.

49. The Acting Attorney-General reports that the number of persons brought before the magisterial courts was 2,564, as against 2,592 in the previous year, which slight decrease is the more gratifying as there had been appreciable increase in 1911 and 1912. Of the 2,564, 1,852 were summarily convicted. Of 36 persons committed for trial in the Supreme Court, 22 were convicted. Despite special efforts to eradicate the crime, convictions for prædial larceny showed a marked increase, the numbers as compared with the past years being :—

1910	128
1911	105
1912	185
1913	260

VITAL STATISTICS.

50. The population of Grenada and its dependencies on the 31st December, 1913, was estimated to have been 69,307. According to the census returns on the 2nd April, 1911, it was 66,750, and on the 31st December, 1912, 68,485. Allowing for a natural increase of 1,083 and for an excess of emigration over immigration of 261 during 1913, the above result, an increase of 2,557 since the census, is reached.

51. The following table shows the population according to districts on the 31st December last, namely :—

District.	*Population.*
St. George's	16,540
St. Andrew's	17,099
St. Patrick's	10,838
St. John's	7,852
St. Mark's	3,682
St. David's	6,733
Carriacou	7,249
	*69,993

52. The number of births was 2,427, and the birth rate 34·80, as compared with 38·19 for the previous year, which decline is due to the emigration of a large number of the male population to Brazil, while 388 marriages were registered, an improvement of 49 on the total in 1912.

53. The number of deaths was 1,344, a decrease of 231 as compared with the previous year and more than 100 below the average of the past twelve years, while the rate was 19·27 as compared with 22·9 in 1912. The chief causes of death were :—

Diarrhœa	74
Dysentery	64
Enteritis	25
Gastro-enteritis	195
Fevers	106
Phthisis	67

The number of still-born children notified was 148.

METEOROLOGICAL.

54. The rainfall was 74·85 inches, 10·87 more than in 1912 and 5·53 above the average for the past three years. The average rainfall in 23 years, 1891 to 1913, was 76·90 inches, so that the precipitation for the year under review was 2·05 inches below that average. The highest annual rainfall in the period of 23 years was in 1892, when

*The district figures necessarily cannot be amended in respect of emigration.

105·89 inches were recorded, and the lowest in 1891 with 56·69. The average rainfall in each month within the period was as under :—

January	4·50
February	2·98
March..	2·93
April	2·45
May	4·69
June	9·03
July	9·47
August	9·67
September	8·13
October	7·23
November	8·07
December	7·75

In 1913 the highest maximum temperature in the shade was 88, on the 13th April, the 17th May, the 8th June and the 10th September, which is the lowest for years, while the minimum was 70, recorded on the 13th April and the 3rd November.

SAVINGS BANKS.

55. The balance to the credit of the depositors at the end of the year was £27,936, a decrease of £159 as compared with that of the previous year, but, despite the decrease in the amount of deposits, the number of depositors rose from 1,806 in 1912 to 2,356 in 1913, with an average of £11 17*s*. 1*d*. to the credit of each. The decrease in the amount of deposits was due to the establishment of a savings department in connection with the Royal Bank of Canada, which opened a branch in Grenada during the year and which offers greater freedom and simplicity in depositing and withdrawing money. The investments at the end of the year anounted to £28,500 and the profits to £176, which were carried to general revenue.

56. In the Carriacou Savings Bank the amount to the credit of depositors at the end of 1913 was £3,683 or £381 in excess of that shown at the end of 1912. There were 175 depositors, of whom 42 were creditors of over £25, while there was a surplus of £282 on the working expenses.

PUBLIC WORKS.

57. The expenditure under the Public Works Department during the financial year was £13,495, of which the following is a statement of the different sub-heads :—

	£
Personal Emoluments	1,195
Other charges	373
Public Works Recurrent :—	
Maintenance of Public Buildings	1,005
Upkeep of Bridges and Culverts	302
Storm Damages	1,055
Upkeep of Main Roads	3,210
Upkeep of Road Roller	220
Other charges	1,015
Public Works Extraordinary	5,111
	£13,495

58. The ordinary expenditure on the upkeep of main roads was apportioned as follows :—

	£
Southern District	1,254
Eastern District	1,258
Western District	698

while that on special work authorised and taken in hand was allotted as below :—

	£
Bridges and Culverts	303
Main Roads..	170
By-ways	230

59. The principal public works extraordinary undertaken were a reinforced concrete causeway over the Observatory River and foot-bridge over the Brunette River, improvements to the St. David's main road in anticipation of motor-car traffic, the enlargement of the Boys' Secondary School buildings and Quarantine Station, the purchase of "Carlton" as a residence to be rented to the Colonial Secretary, the construction of waterworks for the town of Victoria, and the establishment of rifle ranges for the Volunteer Force at St. George's and Grenville.

60. In addition to the expenditure under the Public Works Department, the following amounts were expended on by-ways and streets under the authority of the District Boards and under the Hillsborough Town Fund :—

	£
St. George's	1,319
St. Andrew's	1,110
St. Patrick's	863
St. Mark's	310
St. John's	544
St. David's	713
Hillsborough (Carriacou)	31
	£4,890

POSTAL AND TELEPHONE SERVICES.

61. The comparative statement below shows the extent of Post Office business in 1912 and 1913 :—

	1912.	1913.
Letters and Post Cards	578,021	623,515
Newspapers, Books, etc...	228,985	291,598
Parcels	15,684	12,652
Registered and Insured Letters.. ..	14,579	17,188
Money and Postal Orders issued and paid	34,875	35,447

62. Grenada is regularly visited by the following lines of steamers :—

(1) The Royal Mail Steam Packet Company, under a ten-year contract from August, 1907, the Colony paying an annual subsidy of £900 during that period. The steamers of the Company leave Southampton every alternate Wednesday for Barbados and Trinidad, connecting at the latter island with an intercolonial steamer, which sails on the same day for Grenada, arriving there on alternate Wednesdays in the morning and proceeding to the northern British West Indian Islands. The intercolonial steamer returns to Grenada from the northern islands on the afternoon of the Monday following, and connects the next day at Trinidad with the transatlantic steamer which leaves for Southampton via Barbados.

(2) The direct line of steamers between London and the West Indies and British Guiana. The steamers of this line are, at present, combined with the Royal Mail cargo service, and arrive on alternate Tuesdays with cargo and mails from London. During the cocoa crop they also return as a general rule on the homeward voyage, fortnightly, for cargo.

(3) The Royal Mail Steam Packet Company's Canadian steamers call on alternate Wednesdays from Halifax, via Bermuda, and once a month on Wednesday on their homeward passage.

(4) The steamers of the Trinidad Shipping and Trading Company leave New York for Grenada at intervals of 10 to 14 days, and after leaving the Colony call at Trinidad and British Guiana and return to Grenada en route to New York, the length of the direct passage being about eight days.

In addition to the above lines, more than 40 mails are sent or received in the year by other steamers and sailing vessels.

63. The coastal service, for which a subsidy of £1,755 a year is paid, is performed by two small steamers of the Royal Mail Company, which carry mails, passengers and cargo, and give a daily service on the leeward coast between St. George's and Sauteurs, a bi-weekly service on the windward side between St. George's and Grenville and a weekly service between Grenada and Carriacou.

64. Grenada is connected with the outside world by the cable of the West India and Panama Telegraph Company, to which is paid an annual grant of £600 a year. Since the 1st October, 1914, the rates have been sensibly reduced, those for the principal places being per word :—

United Kingdom	2*s.* 6*d.*
Canada and United States ..	1*s* 6*d.* to 1*s.* 8½*d.*

Deferred rate messages to the United Kingdom, British Colonies and other places, where applicable, are chargeable at half rates.

LAND SETTLEMENT SCHEMES IN GRENADA AND CARRIACOU.

65. In 1915 the twelfth and last instalments for the lots purchased at the initiation of the land settlement scheme in Carriacou will be due, and the allottees, on final payment, will possess titles in fee simple. The scheme was inaugurated in 1903 when the Beausejour and Harvey Vale Estates were acquired in order to establish a peasant proprietary in the island. The regulations passed on the 1st May, 1903, provide for the local administration of lands acquired for this purpose under a Land Officer. A valuation of the lots is made by assessors, whose valuation covers the cost of purchase, legal expenses and survey. In allotment preference is given to cash purchasers, and then to purchasers paying more than 25 per cent., and, in every case, to an existing tenant. In the case of those paying 25 per cent. or more of the purchase money, twelve years is allowed for payment of the balance by annual instalments payable over twelve years, interest at 5 per cent. being charged. During the twelve years no allotment may be alienated, let or encumbered without the consent of the Government.

66. The earnest demand of peasants willing and eager to become land owners made the extension of the scheme imperative, and other estates, Belair and Bellevue, were shortly afterwards acquired for the purpose of land settlement, while in 1913 the Mount Pleasant Estate was also purchased under the scheme.

67. The success of the scheme may be gauged by the figures below connected with its administration.

	Beau-sejour.	Harvey Vale.	Belair.	Belle-vue.	Total.
Acres purchased	709	384	302	115	1,510
Acres allotted	536	318	225	10	1,089
Acres reserved	173	66	77	105	421
Number of lots	223	78	87	5	393
Expenditure	£4,179	£2,501	£1,411	£358	£8,449
Receipts for lots sold	—	—	—	—	£8,543
Balance due for lots	—	—	—	—	£124
Value of unsold lots	—	—	—	—	£64
Value of reserves and other property	—	—	—	—	£3,673

68. As already mentioned, the Mount Pleasant Estate was acquired in 1913 for settlement, the Legislative Council, on the 13th October, passing a resolution approving of £3,800 being advanced from surplus funds for its purchase and for the expenses incidental to its survey for sale in small lots, which amount is to be eventually refunded by the proceeds of the sale of the lots. The estate comprises 510 acres, of which 25 were reconveyed to the former owner after possession had been obtained from the lessees, and part of it has been divided into 141 lots of 2½ to 3 acres each in the low-lying lands, and of as much as 4½ acres in the higher lands.

69. The success of the Carriacou land settlement led to a similar scheme being inaugurated in the island of Grenada in 1910, when an estate called Morne Rouge, in the south of the island, was surveyed in lots, while shortly afterwards 50 acres of land of the True Blue estate were purchased. In 1911 300 acres of land in St. David's parish were also bought for the purposes of land settlement. At present the progress of the scheme may be gauged by the statement below, giving details of the scheme to the 31st December last :—

	Morne Rouge.	Wester-hall.	Cali-vigny.	St. Cyr.	Totals.
Acres dealt with	369	296	63	297	1,025
Acres to be allotted	186	280	60	—	526
Acres of reserves	183	16	3	—	202
Number of lots	63	104	23	—	190
Area already allotted	148	239	—	—	387
Expenditure	—	—	—	—	£3,725
Revenue	—	—	—	—	£553
Amounts due by allottees ..	£388	£1,118	—	—	£1,506
Value of unsold lots	£125	£217	£440	—	£782
Value of reserves (nominal) ..	£250	£60	£10	—	£320

MILITARY FORCES.

70. At the end of 1912 a mounted section of the Volunteer Force was raised in the St. Andrew's District, and, 25 members being enrolled, Lieutenant A. W. Duncan was appointed to command that part of the force. In September the mounted infantry spent three days in camp for field training. The force of the two sections was maintained at full strength during the year. Rifle ranges were laid out at Queen's Park in St. George's and at Telescope Point in St. Andrew's, and the efficiency of the force in this as in other directions was greatly increased.

71. The details of the expenditure for the financial year were :—

	£
Staff Officer's Salary (Part payable by Grenada)	112
Do. House Allowance	14
Do. Horse Allowance	11
Do. Travelling Expenses	2
Drill Instructor	36
Maintenance of Corps	432
Outfit of Mounted Infantry	40
Maxim Gun and Ammunition	191
Telephone	1
	£839

GENERAL.

72. Her Highness Princess Marie Louise of Schleswig-Holstein arrived in Grenada on the 31st March and remained in the island until the 5th April, during which period Her Highness motored across the Grand Etang, and opened the Princess Marie Louise Maternity Ward at the Hospital and the Princess Marie Louise Hospital for Consumptives at Richmond Hill.

73. As has been mentioned in a previous paragraph, the year was memorable for the visit of Mr. Wickliffe Rose, the Director of the Rockefeller Sanitary Commission or Foundation known as the International Health Commission, with a view of securing for Grenada and other West India islands the beneficial results of the great work accomplished in the Southern States. The benefits of the eradication of ankylostomiasis, which is responsible for great suffering and loss of life, besides decrease of economic efficiency, in tropical countries, will be incalculable.

74. With regard to the approaching opening of the Panama Canal, the Secretary of State, at the close of 1912, deemed it desirable to have a careful investigation in islands where plague had not yet made its appearance, as to the conditions of the nature and distribution of rats, with the object of determining what action was necessary to safeguard these islands from the introduction of rat-borne diseases. For this purpose Dr. St. John Brooks, an expert in such matters, arrived in Grenada in May, and, after visiting the different districts of the island and Carriacou, submitted a report on the sanitary conditions, organisation, and requirements of the Colony, more especially in respect to the extermination of rats and to other measures for avoiding plague importation.

C. O. No 20.

Ordnance Survey, Southampton, 1914.

75. The Panama Canal also brought into prominence once more a subject which for many years had been under public discussion—namely, the improvement of St. George's Harbour—and the matter took concrete form in 1912 in the report of a local committee. Upon the recommendations of the report Mr. I. C. Barling, a harbour works engineer representing the firm of Messrs. Coode, Matthews, Fitzmaurice & Wilson, arrived in Grenada early in the year and remained several weeks in the island, submitting later on a full report embodying proposals and estimates for two alternate schemes for the dredging of the harbour, the construction of wharfage, moorings, etc. The first scheme, involving an expenditure of £91,000 (£70,800 for wharfage, £13,600 for dredging, buoys, etc., £5,700 for sheds and £900 for a boat harbour), provides for a wharfage front of 850 feet, sufficient to berth two steamers. The alternative scheme, the cost of which was estimated at £60,000, proposed the construction of a wharf 450 feet in length for one steamer, corresponding with the western portion of the wharfage in the larger scheme. An estimate for the establishment of a coal depôt was given at £16,000.

76. At a special meeting of the Legislative Council held on the 18th April a resolution was passed by the majority approving of the Colony entering into reciprocal trade relations with Canada under the terms and conditions of the Preferential Tariff Agreement signed at Ottawa in April, 1912, which was the outcome of the Commission under the Chairmanship of Lord Balfour of Burleigh. According to the agreement, which is to continue for ten years, the West Indian Colonies, now ten in number, which are signatories, give a preference to Canadian imports of 20 per cent. over foreign goods, and, in return, Canada gives the same, but, as she already gave a preferential tariff to all British countries with the exception of Australia, the West Indies are the gainers by about 13 per cent. The agreement will be the commencement and development, it is hoped, among the islands of a stronger patriotism, a larger outlook, and a truer Imperialism.

77. Grenada depends for its prosperity, almost for its existence at present, upon cocoa and spices, and the highly remunerative prices obtained for these staples have resulted in the neglect of other industries. Were the price of cocoa to fall below remunerative production, the Colony would be in sore straits, and the necessity for adopting a policy of broadening its productive capacity by the encouragement of minor products, such as ground provisions, for supplying local demands, which now depend on imported foodstuffs, more particularly on the land settlements, is urgent and imperative.

F. H. WATKINS,
Colonial Secretary of Grenada

22nd October, 1914.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:

ST. VINCENT.

(For Report for 1912–13 see No. 795.)

THE ADMINISTRATOR TO THE GOVERNOR.

Government House.
St. Vincent,
31st December, 1914.

SIR,

I HAVE the honour to forward to Your Excellency, for transmission to the Right Honourable the Secretary of State for the Colonies, my Annual Report on the Blue Book for the financial year 1913–1914.

2. I regret the delay that has occurred in forwarding this Report this year, but the reason is that I only returned from leave of absence on the 4th November.

I have, &c.,
GIDEON MURRAY,
Administrator.

His Excellency
G. B. Haddon-Smith, C.M.G.,
&c., &c., &c.,
Grenada.

(C130) Wt.36076/850. 1125&90. 3.15. B.&F.Ltd. Gp.11/2. B2

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1913–14.

I.—FINANCIAL.

General Revenue and Expenditure.

The following comparative statements and tables give the heads of Revenue and Expenditure and the amounts received under those heads for the years 1912–13 and 1913–14, as well as the total Revenue and Expenditure for each of the last five years 1909–10 to 1913–14 :—

(Table 1.)

Comparative Yearly Statement of the Revenue.

Heads of Revenue.	Amount collected 1912–13. £	Amount collected 1913–14. £
1. Customs :		
Import	17,268	15,219
Export	1,043	1,097
2. Port and Harbour Dues :		
Tonnage	609	650
Port	109	93
3. Licences, Excise, and Internal Revenue :		
Licences—Liquor	596	612
„ Other	1,313	1,373
Excise..	3,453	3,661
Land and House Tax ..	3,023	3,030
Income Tax	691	718
Other Internal Revenue ..	953	1,068
4. Fees of Court or Office, Payments for Specific Services, and Reimbursements in aid	1,576	1,630
5. Post Office	4,037	2,676
6. Telephones	625	671
7. Rent of Government Property..	38	75
8. Interest and Refunds of Loans..	1,548	1,030
9. Miscellaneous Receipts.. ..	68	92
10. Sales and Leases of Crown Lands	724	628
Total Local Revenue	£37,674	£34,323
11. Parliamentary Grant :		
In aid of Agricultural Department	414	—
Redemption of Public Works Loan	—	50
Total General Revenue ..	£38,088	£34,373

The principal decreases are to be found under Head 1, Import Duties, and Head 5, Post Office. The former was due chiefly to the abolition from the 1st April, 1913, of the additional one-tenth import duty which has been levied from year to year for the past 16 years. The latter decrease is to be accounted for by the smaller sale of stamps to stamp collectors, who in 1912–13 eagerly bought up quantities of the new George V. issue. There were no increases of any appreciable nature.

(TABLE 2.)

Comparative Yearly Statement of Expenditure.

Heads of Expenditure according to the classification employed in the Estimates	Expenditure. 1912–13.	Expenditure. 1913–14.

23. Government Cotton Ginnery ..	73	240
Total Local Expenditure ..	33,580	38,127
21. (*a*) Agricultural Department (from Imperial Funds) ..	413	46
Total General Expenditure	£33,993	£38,173

(TABLE 3.)

Total Revenue and Expenditure for Five Years, 1909–10 to 1913–14.

Year.	Revenue.			Expenditure.		
	—		Total.	—		Total.
		£	£		£	£
1909–10	Local	27,855		Local	30,732	
	Imperial Grant	585	28,440	Imperial Grant	598	31,330
1910–11	Local	29,540		Local	29,759	
	Imperial Grant	585	30,125	Imperial Grant	584	30,343
1911–12	Local	34,267		Local	33,116	
	Imperial Grant	585	34,852	Imperial Grant	619	33,735
1912–13	Local	37,674		Local	33,579	
	Imperial Grant	414	38,088	Imperial Grant	414	33,993
1913–14	Local	34,373		Local	38,127	
	Imperial Grant	—	34,373	Imperial Grant	46	38,173

As will be observed, the financial operations of the year under review have not been so successful as in 1912–13. Apart from the point mentioned above as to the abolition of the one-tenth additional duty, this may in the main be attributed to an unseasonable summer of heavy rains that seriously affected the cotton crop, so reacting upon the purchasing power of the people and causing merchants to be more cautious in their importations. It is of interest here to note that, whilst the difference between the local revenue collected in 1912–13 and that collected in 1913–14 is £3,401, the differences under the two heads, Customs and Post Office, for the same period is £3,400, proving that the deficit, as compared with last year's revenue, is chiefly to be found under those two heads, other sources of revenue being more or less stationary. It is important, moreover, to observe that £5,113, or £2,697 more than in 1912–13, was spent out of current revenue on Public Works Extraordinary. Consequently, though a deficit is shewn as a result on the year's operations, it has been utilized in a profitable manner and will afford permanent value.

ASSETS AND LIABILITIES.

The excess of assets on the 31st March, 1913, was £11,869. On the 31st March, 1914, the account showed an excess of £8,115.

In addition to the surplus of £8,115, the sum of £25,000, the unexpended remainder of a fund contributed by private subscription at the time of the eruption of the Soufrière volcano in 1902–3, is in-

vested in trust securities and held as a reserve or insurance fund against any possible future disaster which may result from the violence of the elements.

There are also other funds of lesser importance showing assets to the Colony, some of which are extinguishable by time, while others, like the Graham Bequest Fund, the Alexander Fund, and the Thompson Home Fund, are used only in respect of the interest they bear.

Public Debt.

During the year under review the last Debenture of £50 was redeemed, thus closing the outstanding municipal loan for the town of Georgetown, for the redemption of which the Colony's revenue was liable in case of default. The balance due by planters to the Imperial Treasury for the Hurricane Loan amounted to £8,038 10*s*. 0*d*. The Colony is responsible for this sum in case of default; towards its redemption a sum of £3,120 0*s*. 7*d*. was in hand, of which £2,847 10*s*. 7*d*. was invested at short call.

Under the authority of "The Public Works Loan Ordinance, 1913," a sum of £1,000 was raised locally by the issue of twenty Debentures of £50 each, bearing interest at the rate of four per cent. per annum. This loan is redeemable at the rate of £100 per annum, commencing after the expiration of ten years from the date of its issue.

Currency.

Gold, British, and American notes of the Colonial Bank and British silver and copper constitute the currency of the Island.

The Government accounts are kept in sterling, and commercial accounts in dollars and cents.

Finances and Municipalities.

The management of the affairs of Kingstown is vested in a Board, one-half of the members of which are elected by the ratepayers, and the other half nominated by the Government.

The Chairman of the Board is annually elected by the members forming that body, but cannot in any circumstances be elected for more than two years in succession.

The small towns of the Colony, of which there are six, are controlled by wardens appointed annually by the Government.

The following comparative statements give the total revenue and expenditure of these towns during the last five years :—

Revenue.

Town.	1909	1910	1911	1912	1913
	£	£	£	£	£
Kingstown	1,736	1,711	1,756	1,790	2,196
Georgetown	143	142	158	159	167
Chateaubelair	33	35	33	34	40
Calliaqua	32	35	39	47	48
Barrouallie	37	41	251	47	56
Layou	26	21	23	22	329
Bequia	9	10	11	12	12

Expenditure.

Town.	1909	1910	1911	1912	1913
	£	£	£	£	£
Kingstown	1,778	1,813	1,697	1,907	2,061
Georgetown	126	151	153	193	163
Chateaubelair	21	31	40	20	28
Calliaqua	27	25	30	64	42
Barrouallie	20	27	257	49	49
Layou	17	13	25	39	309
Bequia	17	1	7	6	9

Debts of Towns.

The debts of the towns at the 31st December, 1913, were as follows :

	£	£
Kingstown Water Supply	300	
Loan for repair of Rose Place Drain, Kingstown	151	451
Georgetown Water Supply		50
Barrouallie Water Supply		176
Layou Water Works		200
		£877

Provision for repayment of these loans is made by rates levied annually on the townspeople, and the debts are secured on the general revenue of the Colony.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS.*

CHIEF ARTICLES.	Value.	
	1912	1913
Class I.—	£	£

Paper, manufactures of	—	1,127
Wood and Timber, manufactured	—	1,274
Wool manufactures	—	931

*NOTE.—Owing to changes in classification and nomenclature in the 1913 returns it is not possible to show comparisons in the case of every item.

In the course of his Annual Report the Collector of Customs reports as follows :—

"IMPORTS."

"The total value of the imports for the calendar year amounted to £122,886, as compared with £129,142 for the previous year. The countries from which they were imported are given below with figures for the previous year for comparison :—

	1912. £	1913. £
United Kingdom	54,895	49,447
Canada	23,726	21,759
British West Indies	10,795	11,319
India	4,237	3,469
Newfoundland	3,301	5,862
Ceylon	119	243
Other British Colonies..	3	170
United States of America	25,459	22,903
France	2,298	2,585
Denmark	1,810	2,173
Germany	878	875
Holland	507	552
Foreign West Indies	362	435
Other Countries	752	1,094
	£129,142	£122,886

"The decrease in imports from the United Kingdom is largely due to the fact that hitherto the face value of Colonial Bank notes was shown under Class 5, Bullion and Specie, and this year it has been excluded as not properly coming under this or any other class. With reference to the apparent drop in imports from Canada and the increase from Newfoundland, it has been ascertained from the certificates of origin produced (as required by the existing regulations) that the greater part of the salted fish was hitherto reported as having come from the former instead of the latter place.

"The imports are summarised as follows :—

	1912. £	1913. £
Class 1. Food, Drink, and Tobacco ..	56,668	50,205
,, 2. Raw Materials and Articles mainly manufactured ..	13,824	14,746
,, 3. Articles wholly or mainly manufactured	55,694	53,361
,, 4. Miscellaneous and unclassified	724	4,554
,, 5. Bullion and Specie	2,232	20
	£129,142	£122,886

EXPORTS.

"The value of exports amounted to £115,200, being in excess of the previous year's by a sum of £3,516 and less than the imports by £7,686. The following is a summary :—

Exported to :—	Island Produce.	Exports other than Island produce.
	£	£
United Kingdom	83,897	302
Canada	1,118	4
British West Indies ..	20,704	6,544
United States of America ..	2,179	—
France	322	—
Other Countries	130	—
	£108,350	£6,850

"The exports of island produce, with declared values, are given below with figures for 1912 for comparison :—

	1912.		1913.	
	Quantity.	Value.	Quantity.	Value.
		£		£.
Arrowroot	3,948,681 lbs.	48,854	4,327,036 lbs.	53,607
Cassava Starch ..	177,820 ,,	1,287	227,206 ,,	1,597
Cotton—Sea Island	405,128 ,,	32,073	426,238 ,,	33,744
Marie Galante	46,822 ,,	1,951	58,737 ,,	2,447

Turtle Shell ..	106 ,,	85	404 lbs.	380
Rum	—	—	1,081½ galls.	130
Various, unspecified	—	1,416	—	1,523
		£103,627		£108,350

"The value of the exports to Canada was £1,118, as compared with a value of £3,005 for the previous year. The decrease is due to the fact that no sugar nor molasses was shipped during 1913, as a result of the abandonment of the sugar industry for that of cotton and minor products. It is pleasing to report that the arrowroot exported during the year to Canada amounted to 83,968 lbs., as against 44,133 lbs. for the previous year. The establishment of a permanent market for this product there is looked for and would mean a great deal to the Colony."

The total trade, therefore, of the Colony for the year was £238,087, as compared with £240,826 for 1912.

The total imports and exports for five years 1909 to 1913 were :—

Year.	Imports. £	Exports. £
1909	87,810	88,698
1910	97,737	101,180
1911	110,926	118,625
1912	129,142	111,684
1913	122,886	115,201

The volume and direction of the Colony's trade in the five years 1909 to 1913 are given below :—

Imports.

——	1909	1910	1911	1912	1913
	£	£	£	£	£
United Kingdom ..	30,232	43,254	50,834	54,895	49,548

MANUFACTURES AND FISHERIES.

The Central Cotton Ginnery was established by the Government in the year 1903–4. This ginnery has been of great assistance in the development of the cotton industry. It is extremely improbable that the industry would, without it, have reached its present successful state. The charge is 1*d.* per lb. for ginning and baling.

There are three private ginneries in the Colony, the largest of which is situated in Kingstown, and is fitted up with five gins.

The co-operative cotton-buying scheme for peasants at the Government factory, described in the 1910–11 Report, continues to prosper. During the cotton season just closed, 1913–14, £4,667 16*s.* 4*d.* worth of cotton was bought at the Government ginnery from small growers.

About 45 tons of cotton seed of the 1913–14 crop were crushed by the disintegrator at the Government ginnery for manurial purposes.

The price of lint during the year was for some special bales as high as 40*d.* per lb. The average sale price was, however, from 17*d.* to 20*d.* for Sea Island cotton, while Marie Galante sold from 6*d.* to 10*d.* per lb.

The export of whale oil was £340 in 1912–13 and £217 during the year under review. This, as was remarked in last year's report, is a dying industry, owing to the reduction in the number of whales visiting these waters. Numerous species of sponges are to be found in the Grenadines, some of which are said to be of commercial value, but unfortunately it has not yet been found feasible to investigate the possibility of the establishment of a sponging industry.

The turtling industry showed an export value of £380, as against £85 in 1912–13, £302 in 1911–12, and £176 in 1910–11.

AGRICULTURAL INDUSTRIES AND AGRICULTURAL DEPARTMENT.

Very heavy rains right up to the end of the year interfered with the effectual ripening of the Sea Island cotton crop and seriously affected the reapings. The Marie Galante cotton crop was, however, better than usual. This class of cotton is grown only in the southern Grenadines Islands and is of inconsiderable value.

The following comparative table indicating the quantity and value of cotton grown during the past three seasons will be of interest :—

Product.	1911–12.		1912–13.		1913–14.	
	Quantity.	Value	Quantity.	Value.	Quantity.	Value.
		£		£		£
Sea Island cotton ..	487,116 lb.	38,563	428,032 lb.	33,886	399,187 lb.	31,626
Marie Galante cotton ..	46,822 lb.	1,951	58,737 lb.	2,080	58,737 lb.	2,447
Cotton seed	700 tons	3,500	640 tons	3,200	524 tons	3,054
	—	44,014	—	39,166	—	37,127

The average price of St. Vincent Sea Island cotton in 1911–12, 1912–13, and 1913–14 crops was taken at 19*d*. per lb. The Marie Galante was estimated at 10*d*. per lb. in 1911–12, 8½*d*. in 1912–13, and 10*d*. in 1913–14. Cotton seed was placed at an all round value of £5 10*s*. 0*d*. per ton.

The acreage returned as under cultivation was 3,768 acres of Sea Island cotton and 1,238 acres Marie Galante. The total acreage was smaller by 438 acres than that of the previous season. This was due to a smaller planting of Sea Island cotton, 576 acres, as a result of the poor yield of the previous season. The Marie Galante area was, however, increased by 138 acres.

The table given below shows the acreage planted in Sea Island cotton in each of the past eight seasons; the yield of lint and the yield per acre.

Crop.	Acreage planted.	Weight of lint in pounds.	Yield of lint per acre in pounds.
1906–7 ..	1,533	268,275	175
1907–8 ..	3,200	432,000	135
1908–9 ..	3,000	372,000	124
1909–10 ..	2,528	356,139	141
1910–11 ..	3,587	561,526	156
1911–12 ..	5,068	487,116	96
1912–13 ..	4,344	428,032	98
1913–14 ..	3,768	399,187	106
		Average for eight years,	134

The returns for Marie Galante cotton showed that 1,238 acres were under cultivation last crop.

The following are the Marie Galante crop totals for the 1912–13 and 1913–14 crop seasons. This cotton is grown only in the Grenadine Islands south of St. Vincent.

Crop.	Area planted.	Total Yield.	Yield per acre.	Estimated value.
	Acres.	Lbs.	Lbs.	£
1912–13 ..	1,100	58,737	53	2,080
1913–14 ..	1,238	58,737	47	2,447

The following figures are also interesting and instructive :—

Table showing the Quantity and Value of Cotton exported during the period from 1903–4 *to* 1913.

Year.	Sea Island Cotton.		All Cotton.	
	Weight.	Estimated value.	Weight.	Estimated value.
	Lbs.	£	Lbs.	£
1903–4 ..	Not known	—	43,392	794
1904–5 ..	77,814	3,890	126,178	4,494
1905–6 ..	121,174	6,059	138,150	7,674
1906–7 ..	225,632	16,922	263,036	18,169
1907–8 ..	388,833	29,162	427,819	30,787
1908	387,178	28,426	420,830	30,048
1909	330,936	20,684	350,186	21,325
1910	493,494	37,238	521,956	38,409
1911	511,947	40,529	538,114	41,619
1912	405,128	46,822	451,950	34,024
1913	426,238	33,744	484,975	36,191

Owing to its suitability as a crop in St. Vincent, arrowroot still remains a favourite staple of both planters and peasants. Prices remained substantially firm during the year under review. The St. Vincent Arrowroot Growers' and Exporters' Association, with headquarters in St. Vincent, continued its active operations to the benefit of the industry.

The following table shows the exports and values of arrowroot and cassava starch in each of the last five years.

Year.	Arrowroot in pounds.	Value.	Cassava Starch in pounds.	Value.
		£		£
1909	5,594,498	31,792	195,166	1,009
1910	5,302,725	30,089	138,112	781
1911	4,254,130	40,430	221,562	1,269
1912	3,948,681	48,854	177,820	1,287
1913	4,327,036	53,607	227,206	1,597

St. Vincent arrowroot is unrivalled as a raw material in the manufacture of chocolate and for general starch purposes. The soil, climate, and water conditions of the Colony are apparently more suited to this cultivation than that of any of the other islands except, perhaps, Bermuda. That Colony's production, however, does not exceed 30 to 40 tons per annum, as against some 2,000 tons purchased in St. Vincent. Apart from that point of view, it is evident that the market

for arrowroot is of such a limited nature that St. Vincent can, by herself, for many years to come, satisfy fully, indeed more than fully, all the requirements of it.

The exports of cured cacao for the past five years are given below :—

Year.	*Weight in pounds.*
1909	241,294
1910	235,236
1911	285,869
1912	223,373
1913	213,684

Amongst other crops grown in the Colony in small quantities may be mentioned sugar (from which the usual by products, rum, molasses, and syrup, are manufactured) ground nuts, pigeon peas, Bengal beans, maize, and ground provisions of various kinds.

The Agricultural Department has done useful work during the year in its advisory capacity, whilst many interesting and instructive cotton and other crop experiments have been carried out at the Experiment Station.

In a Colony like St. Vincent, where the community is absolutely and wholly dependent for its sustenance on agriculture, it is essential, subject, of course, to reasonable limits, to maintain a strong and efficient Agricultural Department in order to keep abreast with the rapid advance of agricultural science and knowledge and also in order to be able to cope with the competition of other places that recognize that expenditure on such an object is not only necessary but profitable. It is on that principle that the Agricultural Department in St. Vincent is organized and its present basis could not be reduced, as has been suggested from time to time, without seriously affecting its efficiency and utility to agriculture in the community.

Land Settlement and Crown Lands.

The sales during the year under the land settlement scheme were 132 in all—rural lots 82, and house lots 50. In addition, 202 acres of Crown land were sold out in small lots. Available Crown land consists of mountain lands, which are only suitable for small holdings for growing provisions and native produce.

The revenue from sales and rental of Crown lands was £628, as against £724 in the previous year.

Belair Estate, which was acquired last year under the Land Settlement Scheme at a total cost, including survey, of £3,181 0*s*. 9*d*., has been divided into 81 rural allotments and 75 township lots. The

rural allotments vary in size from 2 acres to 6 acres each. The total area of the estate, including a detached mountain block known as Herbert's, aggregates 399 acres, 3 roods, 34 poles. All arrangements were made so that allotting could begin on the 2nd March, 1914, and by the 31st March 60 rural allotments and 30 township lots had been disposed of. The township, situate at the south-west corner of the estate adjacent to Cane Hall, will, it is hoped, become in a few years' time a prosperous settlement. The work of laying out new roads on this estate and of repairing existing ones is in progress. This work includes the construction of bridges.

Some of the Land Settlement reserves in the Cumberland and Linley Valleys have been surveyed into allotments and sold. These aggregate 27 acres, 3 roods, 22 poles, and represent a value of £56 approximately.

The allotments in the Cumberland Valley remaining on hand at 31st March, 1913, were, during the year, re-valued, as it was found that too high a value had been placed on them. As a result a large number have since been sold.

In the course of his Annual Report on the St. Vincent Southern Grenadines the Commissioner, referring especially to Union Island, which has an area of 2,100 acres and was in 1910 purchased by the Government as a Land Settlement Estate, remarks as follows :—

"It is again my pleasing duty to make mention of the satisfactory progress of the Land Scheme at Union Island and its markedly beneficial effect on all classes of the community. The people are making strenuous efforts to erect neat and, in some cases, pretentious cottages on their holdings, and before many years have passed away, the squalid and insanitary villages of Ashton and Clifton will have disappeared."

A Revenue Officer is stationed in Union Island, who, in addition to being Overseer of the Land Settlement Scheme, is in charge of a branch Money Order Post Office and Government Savings Bank established for the convenience of the islanders.

SHIPPING.

A table of entries and clearances of steamers and sailing vessels during the years 1912 and 1913 is appended, as also a comparative statement of the total shipping during the last two years. These figures do not include ships of war, of which five, four British and one Russian, visited the Colony during 1913

III.—LEGISLATION.

The following Ordinances, twenty in number, were added to the Statute Book during the year 1913 :—

The Customs Duties 1895, Amendment 1913.
Customs Preferential Duties.
Customs Duties 1895, Amendment (ii).
Summary Conviction Offences.
Anthrax Ordinance 1911, Amendment.
Customs Duties.
Collector of Customs.
Appropriation.
Agricultural Credit Societies.
Police (Liability to Military Service).
Telegraph Companies.
Capital Punishment Amending Act 1868, Amendment.
Public Works Loan.
Medical Registration 1886, Amendment.
Wireless Telegraphy.
Customs Duties (ii).
Supplementary Appropriation.
Kingstown Board 1897, Amendment.
Pensions 1902, Amendment.
General Loan and Inscribed Stock.

The most important of these Ordinances is perhaps the Agricultural Credit Societies Ordinance, providing for the formation under organized supervision of Agricultural Credit Societies under the Raiffeisen System. This Ordinance in addition gives the Governor in Council power to grant to societies formed and registered under its provisions loans up to an aggregate amount of £500. This limit was placed in the hope that private concerns would also be prepared to lend to registered societies. It is pleasing to record that up to the date of writing nine societies have been formed, with an aggregate membership of over 200 and that the Colonial Bank and other private concerns have made loans to them in supplementation of the Government advances.

IV.—EDUCATION.

The results of primary education in 1912–13 and 1913–14 are as follows :—

	1912–13.	1913–14.
Number of schools	26	26
Number on roll at 31st March ..	4,537	4,181
Average attendance	2,251	2,308
	£	£
Government Grant-in-aid ..	1,710	1,686

There is a boys' secondary school in Kingstown, with an attendance of 40 to 50 pupils. The fees charged are £2 per term for each scholar, except those under ten years of age in the lowest form, for whom the fees are £1 6*s.* 8*d.* per term, but when two or more brothers in forms above the lowest attend, there is a reduction made of 6*s.* 8*d.* for the second and 13*s.* 4*d.* for the third. An exhibition to this school is awarded every year.

Agricultural science is taught in this school by the Assistant Agricultural Superintendent. The school itself is situated in the middle of the Agricultural Experiment Station. thus affording every opportunity to the boys to keep in touch with the practical as well as the scientific side of agriculture.

There is a girls' secondary school in Kingstown maintained as a private institution but subject to Government supervision. The attendance at the time of writing is 30. The fees are the same as at the boys' secondary school.

Whilst the number on the roll of the primary schools has somewhat dreceased, the average attendance has slightly advanced. Six pupils, drawn from the peasant and mechanic classes, are instructed by the Assistant Agricultural Superintendent in practical agriculture at the Experiment and Botanical Stations. These pupils are apprenticed for two years and receive graded allowances in proportion to the length of their apprenticeship, coming every day to their work, and living with their parents or guardians.

The fifteen acres of land attached to the Experiment Station are all fully worked up in various products, such as cotton, arrowroot, sugar, cassava, etc., by the boys themselves.

A small stock farm affords a valuable practical illustration of how stock should be kept and fed.

V.—GOVERNMENT INSTITUTIONS.

During the year there were 787 admissions to the Colonial Hospital, making, with those remaining from the previous year, 842 cases treated, as against a total of 816 in 1912–13.

The daily average was 57, as against 55, 60·3, and 57 in the previous three years.

The death rate was 3·92 per cent. of the total cases.

Operations numbered 112, as against 104 in 1912–13.

The medical officer is greatly assisted in his work by the presence of an efficient European nurse-matron, selected by the Colonial Nursing Association.

A portion of the old military citadel at Fort Charlotte is set aside for the detention of male lunatics who are violent, or manifest destructive tendencies. Other males, as to whom it is judged that they may be so treated with safety, are kept under supervision in the pauper asylum, and female lunatics are also detained there. A portion of the wards is partitioned off into cells to provide further and more suitable accommodation for these female cases, some of which are occasionally acute.

As soon as practicable, any violent or difficult case is sent to Grenada by arrangement with the Government of that Colony.

There were 31 cases under treatment during the year (19 being new admissions), of whom 8 were discharged cured and 1 died.

The total number of St. Vincent lunatics under care in the Grenada asylum was 23, at a cost of £493 10*s*. 6*d*. to the Colony.

The number of inmates of the leper asylum on the 31st March, 1913, was 8; during the year there was 1 admission, leaving 9 inmates in the asylum at the end of the year.

Under "The Public Health Ordinance, 1910," provision is made for the compulsory segregation of pauper lepers.

The Colony's paupers are housed in the old military buildings at Fort Charlotte, at a considerable elevation, overlooking the town of Kingstown.

At the commencement of the year under review there were 90 inmates of the asylum, and the admissions and discharges during the year were:—

	Male.	Female.	Total.
Admissions	22	15	37
Discharged	12	13	25
Died	6	17	23
Total	18	30	48

leaving 79 on the 31st March, 1914.

The total expenditure in 1913–14 was £1,084 on the pauper and leper asylums, including the cost of lunatics kept locally, against £1,008 last year.

Chronic tertiary syphilis accounts for the vast majority of cases to whom this institution offers asylum for the closing stages of their lives.

Early in the year 1911–12 the old military hospital was renovated and opened as a yaws hospital capable of holding 50 patients. The disease of yaws has long been ravaging the homes of the labouring population in the Colony, and the institution of this hospital is much appreciated by them.

A casualty hospital with four beds was opened at Georgetown in the Windward district in August, 1912. This is meant for emergency cases and is a great boon to the people of a district situated 24 miles by road from the Colonial Hospital at the capital town of Kingstown.

Savings Bank.

The following is a comparative statement of the operations of the Savings Bank during the past five years :—

Year.	Number of Depositors at 31st December.	Amount of Deposits.	Amount of Withdrawals.	Balance at credit of Depositors at 31st December (including interest capitalized).
		£	£	£
1909 ..	1,063	6,624	7,371	13,869
1910 ..	1,095	8,686	6,877	15,994
1911 ..	1,163	9,526	7,923	17,971
1912 ..	1,194	8,657	8,083	18,935
1913 ..	1,182	9,790	9,968	19,168

The amount due to depositors was distributed thus :—

	At 31st December, 1912.	At 31st December, 1913.
	£	£
Kingstown	16,655	16,497
Georgetown	1,445	1,758
Barrouallie	799	865
Union Island	36	48
Total	£18,935	£19,168

The Government made a profit on the working of the bank of £153 6*s*. 5*d*.

There was invested of savings bank funds at 31st December, 1913, the sum of £18,143.

VI.—JUDICIAL.

The St. Vincent police force consists of a chief, a sergeant-major of European birth, and 51 West Indian non-commissioned officers and privates.

In addition to ordinary police work they perform duties in connection with district post office work, births and deaths registration, poor relief, and the management of district telephone exchanges. The prison is worked entirely by the police, save for the assistance of one warder in charge of gangs outside.

In Kingstown a select number of the force form a fire brigade for the town, receiving supplementary pay for this service from the funds of the Kingstown Board.

Two hundred and seventy-nine persons were committed to prison in the year, of whom 158 were men and 121 women. The daily average was 28·84, as against 26·86 in 1912–13.

The number of cases reported to the police in 1913–14 was 1,086; of these 319 were for offences against the person, 42 for prædial larceny, 102 for other offences against property, and 623 for other offences. Only 997 of the above cases were brought before a magisterial court.

The total number of persons brought before the magisterial courts was 1,753; of these 425 were for offences against the person, 96 for prædial larceny, 209 for other offences against property, 5 for offences against the Masters and Servants Act, 295 for offences against revenue laws, municipal, road, and other laws relating to the social economy of the Colony, and 723 for other offences. These figures are inclusive of the cases reported by the police.

The total number of convictions in the inferior courts was 1,309, as against 859 in 1912–13.

These convictions are classed as follows:—

For offences against the person..	270
,, malicious injury to property	5
,, prædial larceny	84
,, other offences against property	139
,, offences against Revenue Acts, etc.	245
,, offences against Masters and Servants Act ..	5
,, other offences	561
Total	1,309

The increase in crime during the year is to be found entirely in the class of summary offences, and is no doubt due to the enlarged scope of the Summary Conviction Offences Ordinance, 1911, and also to greater activity on the part of the police. It is to be observed, however, that there was no increase in the more serious forms of crime. There was no indictment for either murder or manslaughter and only one serious case of wounding.

The convictions in the Supreme Court were 5 for offences against property, 2 for offences against the person, and 1 for other offences.

The acquittals were as follows :—

In the Inferior Courts	211
In the Supreme Court	4

VII.—VITAL STATISTICS.

The population at the 1891 census was 41,054. No census was taken in 1901, on account of the expense involved, which the Colony was not in a position to afford. The population by the official census of April, 1911, was 41,877, which had increased at 31st March, 1914, to 45,605.

The births registered in 1913–14 were 1,766 (896 males and 870 females), as against 1,678 in 1912–13; of these 1,083, or 61·32 per cent., were illegitimate.

Still-births were 111, 39 legitimate and 72 illegitimate, the figures for the previous year being 32 and 72 respectively.

Marriages were 121—a decrease of 16 on last year's figures. The figures are given in the following comparative table of marriages :—

Denomination.	1911–12	1912–13	1913–14
Church of England	67	62	70
Church of Scotland	5	7	7
Wesleyan	65	49	33
Roman Catholic	13	17	9
Plymouth Brethren	3	2	2

The total registered deaths were 801, as against 878 in 1912–13, being 17·56 per 1,000 of the estimated population. The infant mortality

(infants under one year, exclusive of still-births) was 171, being 21·34 per cent. of the total number of deaths. The similar figure in 1912–13 was 185, or 21·07 per cent.

Appended is a table of the causes of death :—

General diseases (includes syphilis, 96 ; tubercle, 51 ; tetanus, 10 ; malarial fevers, 1 ; dysentery, 11) ..	211
Diseases of nervous system	32
,, ,, circulatory system	24
,, ,, respiratory system	51
,, ,, digestive system	156
Parasites	20
Age	88
Still-born	111
Other diseases	108
Total	801

In the towns the authorities are realizing more and more the importance of stricter sanitation, and are taking steps accordingly. In the villages, however, sanitary matters are still on a primitive basis, although the Government, through their District Sanitary and Medical Officers, spare no pains to impress upon the population generally the necessity for care in this direction. The scheme for the establishment of an organized Sanitary Department was completed during the year and will be brought into force in 1914–15. In the meantime the provisions of the Public Health Act, 1910, are being more rigidly enforced than has hitherto been the case.

A Trained Nurses' Association has the sympathy and financial support of the Government, and it is hoped will be a means of achieving something in the direction of diminution of infantile mortality. Nurses are trained in midwifery at the Colonial Hospital.

The rainfall for the year 1913–14 was 88·83 inches, as against 94·89 inches in 1912–13.

Rain fell on 247 days during the year.

The maximum fall in twenty-four hours was 3·40 inches on the 24th October.

October was the wettest month, with 18·80 inches. A good deal of damage was done to the roads during that month owing to the heavy rain, while the effect on the cotton crop was disastrous.

May was the driest month, with 2·49 inches.

The mean monthly temperature was 78·5° F. Maximum for the year was 80·5° F. (in September) and the minimum 73·3° F., which was experienced in January.

Except in August and September, when the atmosphere is uncomfortably hot, although not even in those months insalubrious, the climate may be regarded as most healthy for both Europeans and coloured persons. Malaria is hardly known, while yellow fever has proved itself to be a disease of the past.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The fortnightly mail service from and to England continued to be performed by the Royal Mail Steam Packet Company. At Trinidad the mails are transferred into the intercolonial ships, which call weekly at St. Vincent on regular days—one week with outward mails on the way round the islands, and the following week on the way to Trinidad with homeward mails. The service was carried on in a satisfactory manner.

Royal Mail Steamers from Halifax, Nova Scotia, under contract with the Canadian Government, call at all the islands. Occasional calls are made by the steamers of Scrutton's Direct Line and the Quebec Steamship Line. The East Asiatic Line of steamers from Copenhagen via London and the Danish West Indies also make occasional calls.

There is an inland postal system by which the Windward District of the Colony is served five times a week, the Leeward District daily, and the Grenadines once a week..

The postal order system continues to grow in popularity, and its extension to the district towns has been accomplished.

The volume of work in the Post Office is maintained.

The revenue of the Telephone Department was £671, including £329 transferred to that head on account of the Government installations. The expenditure was £599. The main installation is in Kingstown with branch lines all over the island. The service is a most useful one.

IX.—GENERAL OBSERVATIONS.

His Excellency the Governor, Lieutenant-Colonel Sir James Hayes Sadler, K.C.M.G., C.B., visited the Colony from the 16th to the 30th March, 1914.

On the 25th March, 1914, the Administrator, the Honourable Gideon Murray, left for England on six months leave of absence, His Honour R. B. Roden, Chief Justice, assuming the administration of the Colony.

On the 2nd June, 1913, the Canadian-West Indian Reciprocity Agreement became operative. It is at present too early to gauge the economic effect on this Colony of this very important agreement. As a start, however, the West Indies are indebted to Canada for having arranged independently at her own cost a contract with the Royal Mail Steam Packet Company for a new line of steamers to replace the Pickford and Black line. The new steamers are larger in tonnage and in many ways more suited to the traffic and should be of much assistance in encouraging trade between the Dominion and the British West Indian Colonies. Another advantage to be attributed to this agreement, which at the time of writing has materialized, is a new agreement with the West Indian and Panama Telegraph Company whereby the cable rates have in some instances been reduced by more than half.

An arrangement of local importance has been the transfer of the amalgamated offices of the Treasury and Customs Department to the sea front. This took place on the 5th November, 1913. This change is much appreciated by the public, as it affords much greater facility and convenience for the transaction of business.

Preparations were made and plans completed for the inauguration on the 1st April, 1914, of a Government motor car mail and passenger service five times a week to Georgetown and back. This fast and frequent service will greatly facilitate intercourse between the capital town and the Carib country and is much appreciated.

Amongst the important public works undertaken during the year under review may be noted the building and completion of the "Princess Marie Louise" Nurses Wing in the grounds of the Colonial Hospital, this wing being named after Her Highness by special permission. A residence for the Chief Justice is in course of erection on lands originally part of the Experiment Station, but was not completed at the close of the financial year.

The construction of the new road out of Kingstown, commenced in 1912, has been continued. A quantity of blasting, heavy cutting, and considerable grading has been necessary, and several retaining walls and culverts have been built, necessitating much greater expenditure than was originally contemplated. The work was well advanced at the close of the financial year. Ornamental trees have been planted on either side of the first section of this road (about half a mile in length) and this will in due time form a pleasant shady avenue exit from Kingstown.

The following bridges and causeways were built during the year in the Windward District :—

(1) Bridge over the Biabou river.
(2) Bridge over the Bellevue river.
(3) Bridge over the New Adelphi river.
(4) Causeway over the Grand Sable river.
(5) Causeway over the Union river.

Many other useful minor structures have been built during the year and have added to the administrative and industrial facilities of the Colony and supplied long standing needs.

The scheme mentioned in the General Observations of last year's Report for turning the cotton seed produced every year in the Colony into manure by purchasing machinery for the separation of the oil from the seed, the residue being applied as manure, has now been approved, and during the financial year 1914–15 steps will be taken to erect the requisite machinery at the Government Cotton Ginnery.

As already indicated in different portions of this Report, the year has not been so favourable as 1912–13, owing chiefly to the inclement weather conditions, but, whilst the revenue returns have not shown the same prosperity, progress nevertheless has, as will have been observed, been made in many directions, both materially and economically. In agriculture, sanitation, education, public works, and other departments much has been accomplished which will in course of time impress its worth upon the development history of the Colony.

St. Vincent is one of the beauty spots of these West Indian Islands. With its exquisite scenery, its lovely drives, rides, and walks, its healthy climate, it cannot fail, at the conclusion of the great and fearful war which at present envelopes Europe, to attract to its shores some of the numerous tourists who in winter seek warmth and sunshine and an escape from the colder northern climes.

GIDEON MURRAY,

Administrator.

Government House,
17th November, 1914.

No. 836.

ST. LUCIA.

(For Report for 1912–13 see 794).

THE ACTING GOVERNOR TO THE SECRETARY OF STATE.

Grenada,

9th December, 1914.

SIR,

I have the honour to transmit herewith a despatch from Mr. Anthony De Freitas, Acting Administrator, St. Lucia, forwarding copies of the Blue Book of the Colony for the year 1913-14, together with his report thereon.

2. The Revenue of St. Lucia for the year 1913-14 amounted to £67,490, and, when compared with the annual average of £66,954 for the previous five years, may be viewed as satisfactory.

3. The Expenditure for the year 1913-14 amounted to £68,352, a sum slightly in excess of the annual average, £66,785, for the previous five years—and left a deficit of £862 on the year's transactions, which has been met out of the surplus funds of the Colony.

4. The surplus balances of St. Lucia on the 31st March, 1914, amounted to £30,863, including a sum of £5,295, invested on account of the Public Buildings Insurance Fund of the Island.

5. The establishment during the year of the small Government lime factory in Castries has proved a boon to the small proprietor, and has already stimulated the extensionof the lime industry in the Colony. The immediate effect of the working of the factory has been

(C129). Wt. 36076/850. 1125 & 90. 3.15. B. & F., Ltd. Gp/11/2.

G.E.H. 3/11/18 S.L.

to increase the local market price of limes. Limes were being sold locally at 2*s.* a barrel, but on the factory being opened the price jumped up to as much as 5*s.* 8*d.* a barrel. The market price of lime-juice ruled high throughout the year both in England and elsewhere.

6. Although not within the year of report, I may mention that a recent shipment of lime-juice from the Government factory fetched the unprecedented price of £52 10*s.* 0*d.* a pipe in the London market.

7. After patient working, the prospects of a definite advancement may be reasonably looked for in the further development of the agricultural resources of the Island, while the facilities afforded by St. Lucia as a coaling and shipping centre of no mean importance in these waters add greatly to the prosperity of the Island and the welfare of its people.

I have the honour to be,

Sir,

Your most obedient, humble servant,

DOUGLAS YOUNG,

Acting Governor.

The Right Honourable
Lewis Harcourt, M.P.,
&c., &c., &c.

Government Office,

Saint Lucia,

28th November, 1914.

SIR,

I have the honour to transmit herewith copies of the Blue Book of this Colony for the year 1913–14, together with my Report thereon.

I have the honour to be,

Sir,

Your Excellency's most obedient servant,

ANTHONY DE FREITAS.

Acting Administrator.

His Excellency
Douglas Young, Esq., C.M.G.,
&c., &c., &c.,
Grenada.

ANNUAL REPORT FOR THE YEAR 1913–14.

I.—FINANCIAL.

The revenue for the year was estimated at £66,731. The amount actually received was £67,490, or £1,119 over the Estimates. The following figures show the receipts under the heads of the estimate, with the corresponding figures for the previous year :—

Heads of Revenue.	Actual Revenue to 31st March, 1914.	Revenue for preceding year.
	£	£
1. Customs	33,077	32,607
2. Port, Harbour, &c., Dues	7,026	7,198
3. Licences, Excise, &c.—		
(*a*) Licences—Retail Spirit, &c. ..	1,494	1,532
Distillery	100	100
Animals, Vehicles, & Guns ..	568	580
Petroleum, Cocoa, Boat, &c. ..	507	519
(*b*) Excise—Duty on Rum ..	10,465	9,930
(*c*) Stamp Duty—Various Revenue Services	709	722
(*d*) Fines & forfeitures of Courts ..	461	429
(*e*) Revenue seizures & penalties ..	10	2
(*f*) Income Tax	1,686	1,530
4. Fees of Court or Office, &c.	4,722	4,446
5. Post Office	1,939	2,557
6. Telephone	899	834
7. Rent of Government Property ..	892	801
8. Interest..	1,440	1,520
9. Repayment of Loans	176	176
10. Miscellaneous	596	65
	£66,767	£65,548
11. Land Sales	723	594
Total Local Revenue	£67,490	£66,142
12. Imperial Dept. of Agriculture .. Grant-in-aid	—	150
Total Revenue	£67,490	£66,292

The receipts from Customs were within a close margin on the right side of the estimate, notwithstanding the loss on goods admitted at the preferential rates under the Customs Preferential Tariff Ordinance, which came into operation on the 2nd June, 1913.

There was a slight loss under Port and Harbour dues owing to less shipping during the year.

Under Head 3, the receipts from retail spirit licences did not reach the estimate, nor did the receipts from licences for animals, vehicles, guns, &c., but the yield from stamp duty and from fines and forfeitures of courts was over the estimate, and there was a slight increase in income tax.

Under Head 4, the receipts from fees of office produced more than was anticipated, while the receipts from Post Office, Head 5, were in advance of expectations, as was the case in the previous year.

The reduction in the receipts on account of Interest, Head 8, was due to £1,183 of the Colony's surplus funds, having been realized by the Crown Agents to meet current requirements.

The revenue for the previous five years was as under :—

	£
1908–9	65,694
1909–10	65,739
1910–11	65,066
1911–12	71,978
1912–13	66,292
Average	66,954
1913–14	67,490

The revenue derived from licences for the sale of liquor, and the number of such licences issued during the year, is shown in the following table :—

Description of Licence.	No. issued during quarter ended on				Revenue.
	30th June. 1913.	30th Sept., 1913.	31st Dec., 1913.	31st March, 1914.	
					£
Wholesale	2	2	2	3	45
Retail	39	39	40	41	1,317
Bottle	2	2	2	1	70
Refreshment House ..	2	2	2	2	60
Hotel	—	—	—	—	—
Occasional	—	—	5	2	2
					£1,494

The expenditure of the year, classified under the heads of the estimate, with the corresponding figures for 1912–13, was as under :—

Heads of Expenditure.	Actual Expenditure to 31st March, 1914. £	Actual Expenditure for preceding year. £
1. Charges on account of Public Debt	8,968	9,395
2. Pensions and Gratuities	2,307	2,448
3. The Governor	2,330	2,328
4. Government Office	1,116	1,072
5. Treasury, Customs, and Inland Revenue	3,049	3,092
6. Post Office	2,263	2,227
7. Port and Marine Department ..	1,406	1,341
8. Audit Department	568	579
9. Legal Departments	3,920	3,984
10. Local Forces	617	719
11. Police	4,517	4,468
12. Prisons	1,144	1,174
13. Medical Department..	2,658	3,087
14. Sanitation and Hygiene	534	600
15. Hospitals and Asylums	5,131	4,740
16. Charitable	491	532
17. Education	5,086	5,075
18. Ecclesiastical	1,600	1,600
19. Agriculture	1,389	1,150
20. Miscellaneous Services	5,263	5,306
21. Colonial Engineer's Department ..	3,024	2,966
22. Public Works Recurrent	7,736	7,294
23. Public Works Extraordinary ..	3,235	2,448
Total Local Expenditure ..	£68,352	£67,625
19a. Agriculture (from Imperial Funds)	—	199
Total Expenditure	£68,352	£67,824

The actual expenditure was £4,085 less than the estimate, which totalled £72,438, savings having been effected under every head except that of Sanitation and Hygiene, which includes a charge of £153 on account of Dr. Brooks's sanitary mission in the Windward Islands, for which no provision had been made.

There was a saving under the head Legal owing to the vote of £225 for the Circuit Court of Appeal not having been spent, as is generally the case.

Under Head 10, only £20 of the £40 provided was expended for uniforms for the Cadet Corps.

Head 13 includes a new and unforseen item of £104 for Horse Allowance for Medical Officers, but this was more than covered by savings under the same head.

As regards the expenditure on the medical institutions, Head 15, there were slight excesses over the estimate for the General Dispensary in Castries, the Yaws Hospital, and the Dennery Casualty Hospital; there were slight savings in respect of the other Institutions.

But for the non-payment of the Canadian Steamship subsidy of £500, which ceased with the making of a contract between the Canadian Government and the Royal Mail Steam Packet Company, Head 20, Miscellaneous Services, would have shown an excess on Drawbacks and Refunds, which amounted to £2,153, against an estimate of £1,600. This expenditure is principally for refund of duty on goods exported as ships' stores.

There was a large saving of £1,834 under Public Works Extraordinary, due to the fact that various works included in the Estimates were not proceeded with during the year.

The expenditure in each list of the last five years was as follows :—

	£
1909–10	64,446
1910–11	67,288
1911–12	69,328
1912–13	67,824
1913–14	68,352

Nothwithstanding the increase of the revenue and the decrease in the estimated expenditure, the accounts of the year closed with a deficit of £862, resulting in the reduction of the Colony's surplus funds at 31st March, 1914, to £25,568, as compared with £26,430 with which the year opened.

Of the surplus funds, £23,316 was invested as at the 31st March, 1914, as was also £5,296 on account of the Public Buildings Insurance Fund.

Public Debt.

At the 31st March, 1914, the public debt stood at £140,130, having been reduced during the year by £2,100, and at the same date the total of the sinking funds for the redemption of the debt amounted to £22,220. The Immigration 6 per cent. Loan of 1878 was finally paid off during the year.

Currency.

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper coins. Accounts are kept in sterling by the Government, and in dollars and cents. by the bank and most of the mercantile firms, the dollar being equal to 4*s.* 2*d.*

FINANCES AND MUNICIPALITIES.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery, "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates, and dues, market dues, and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

The following statement shows the revenue and expenditure for the last three years of the towns and villages, the amount of their indebtedness at the 31st March, 1914, and the balance standing to the credit of each place at the same date.

Town or Village.	1911-12.		1912-13.		1913-14.		Indebtedness at 31st March, 1914.	Credit Balance at 31st March, 1914.
	Revenue.	Expenditure.	Revenue.	Expenditure.	Revenue.	Expenditure.		
	£	£	£	£	£	£	£	£
Castries	6,440	5,396	5,571	8,396	5,765	5,888	20,614	38
Soufrière ..	544	577	523	523	527	588	1,500	56
Vieux Fort ..	174	211	163	193	167	141	—	86
Laborie	80	67	82	105	83	43	—	139
Canaries	78	86	51	55	53	57	—	339
Dennery	338	176	159	125	144	137	—	472
Gros Islet ..	102	134	104	107	111	96	—	225

Choiseul	42	25	45	62	45	21	—	59
Micoud	73	66	67	49	69	62	—	73

The scheme for the construction of waterworks for the village of Dennery was finally settled during the year, and pipes and fittings were ordered from the United Kingdom.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The total value of the imports in the calendar year 1913 amounted to £228,405, and was £27,956 less than the previous year. Of the decrease coal accounted for £15,132, food supplies for £3,461, and manufactured goods for £8,930.

The following figures show from what countries the imports came :—

	1912.	1913.
	£	£
United Kingdom	71,495	65,269
Canada	12,294	12,150
Other British Possessions	13,726	15,294
Denmark	1,205	920
France	6,848	5,864
Germany	2,765	2,668
Holland	619	1,195
United States	196,059	174,216
Other Foreign Countries	5,531	7,155
Parcel Post	3,077	3,673

The coal imported was 114,350 tons, valued at £126,469, as compared with 129,466 tons, valued at £141,601, in 1912. The bulk of this coal is imported from the United States.

The imports of the last two years, under the main heads of the classification, were as under :—

	1912.	1913.
	£	£
I. Food, drink and tobacco ..	72,811	69,349
II. Raw materials	150,451	135,078
III. Articles, manufactured ..	88,778	79,848
IV. Miscellaneous and unclassified, including imports by parcel post	3,321	4,129

As the outcome of the Conference which took place between representatives of the Government of Canada and the Governments of certain of the West Indian Colonies, St. Lucia became a party to the Preferential Trade Agreement arrived at, and to give effect to that Agreement the Customs Preferential Tariff Ordinance was passed. The Ordinance came into operation on the 2nd June, 1913. It was anticipated that the preference granted to imports from Canada, Newfoundland, and the United Kingdom would result in a loss of revenue, and a loss of £267 occurred in the period from the 2nd June to the 31st December. The loss was distributed among the three countries as follows :—

	£
On goods from Canada	158
,, ,, Newfoundland	32
,, ,, the United Kingdom	77

This amount should not be taken as representing the full proportion of the annual loss of revenue from customs duty that may occur under the preferential arrangement.

Exports.

The declared value of the exports was £274,460, of which £117,732 was the value of produce of the Colony, and £154,144 of produce of other places, including £141,038 the value of bunker coal, and £2,615 the value of goods exported as ships' stores.

The exports of island produce in the past ten years show a gradual increase from £88,600 in 1904 to £117,700 in 1913, the exports in the latter year being the highest recorded except those of 1909, when they were valued at £124,901, which was due to the abnormally high price obtained for cocoa in that year. It may also be noted that, whilst the export of island produce has thus increased, the percentage of sugar and cocoa exports has gradually fallen from 93·3 to 87·1, indicating an extension in agriculture in other directions than those of the two principal products.

The following statement gives the direction of the exports for 1913 :—

British Countries.

Countries.	Produce of the Colony.	Total Exports.
	£	£
United Kingdom	80,377	86,026
Barbados	2,696	3,075
Canada	7,307	7,312
Dominica	78	1,943
Grenada	519	2,214
St. Vincent	280	1,155
Other British Possessions	165	1,992
	£91,392	£103,717

Foreign Countries.

France	18,292	18,292
Germany	72	175
Holland	2,818	2,818
Italy	500	500
Martinique	2,368	2,446
United States	2,207	2,297
Other Foreign Possessions	51	561
	£26,308	£27,089
Bunker Coal	—	£141,038
Ships' Stores	£31	2,615

Coaling Trade.

As will be seen from the subjoined figures, the coaling trade did not do as well in 1913 as in the previous two years, and this was due to a slight falling off in the number of steamers that called for coal :—

	Tons.	£
1909	96,462	110,754
1910	97,384	116,861
1911	139,056	152,962
1912	134,783	166,312
1913	117,532	141,038

Mines, Manufactures, and Fisheries.

The sugar factories at Cul-de-Sac, Roseau, Vieux Fort, and Dennery were all working during the year.

The following figures show the quantity of rum distilled, consumed, and exported during the last five years :—

Year.	Distilled. Galls.	Consumed. Galls.	Exported. Galls.
1909	72,633	46,949	27,883
1910	49,256	42,456	4,692
1911	63,961	44,516	12,787
1912	59,739	31,865	26,577
1913	53,084	30,655	20,120

The erection of the Government lime-juice factory, to which reference was made in the last Report, was commenced early in the year under review, but, owing to the delay in the supply of the plant by the makers in England, the factory was only opened to the public in November.

The following is taken from a report by the Agricultural Superintendent :—

"The business of the factory is conducted on a co-operative basis. In determining the profits there is deducted from the amounts realized for the sale of produce the amounts paid for the purchase of limes and lime-juice together with all expenses of working the factory and disposing of the produce, and, in addition, a sum equivalent to 10 per cent. of the amount paid for the purchase of limes and lime-juice, the remainder being regarded as gross profits to be divided, one-third being paid to the Government and two-thirds to the vendors of fruit and juice, this latter to be distributed to the vendors by way of bonus, in proportion to the amounts paid to them for limes or lime-juice.

"The sum equivalent to 10 per cent. of the value of the limes and lime-juice purchased, together with the sum representing one-third of the profits referred to in the foregoing paragraph, to be paid to the Government by way of interest and sinking fund in respect to the sum expended in erecting the factory.

"The price paid for limes and lime-juice is based on a scale of prices having a relation to the value of concentrated juice, and insuring a safety margin of profit to the factory. The seller of fruit realizes his full value when he gets his bonus derived from the share of profits.

"Owing to the unusually high prices for concentrated juice ruling at the time of opening the factory, fruit and juice were purchased on the basis of £24 per standard pipe of concentrated juice, arrangements being made to make a deferred payment to vendors in the event of the produce selling above this figure. During the short trial run of the factory, the produce dealt with was 233 barrels of fruit and 736 gallons of raw juice.

"The produce shipped was 255·75 gallons of concentrated juice, which realized £114 4*s.* 1*d.* net. The amounts to be paid to vendors as deferred payments on produce purchased, and as bonus, are respectively £20 16*s.* 8*d.* and £10 1*s.* 2*d.* The bonus is equal to nearly 12½ per cent. on the total amount paid for the purchase of produce. Taking the bonus into calculation, the total payments to vendors will be equivalent to 5*s.* 8½*d.* per barrel of limes and 8½*d.* per gallon of standard raw juice."

The object the Government had in view in establishing the factory was to obtain for the small proprietors as good a price as possible for the produce of their lime cultivation, and to encourage them in extending the cultivation. The advantage of the factory's price of 5*s.* 8½*d.* per barrel of ripe limes over the prevailing local price of 2*s.* immediately prior to the factory coming into operation is believed to have already induced peasant proprietors to plant more lime trees.

During the year two private factories for the concentration of lime-juice in steam-heated evaporators were established and two others are in source of erection. There will then be seven such factories in the Island, and similar works are likely to be established in the near future, as the lime plantations approach maturity.

Agricultural Industries.

Sugar and cocoa head the list of the Colony's important products. Lime cultivation is making rapid strides and seems likely to assume an important place in the economic life of the Island. The following figures of the export of lime-juice and lime products during the last three years are of interest :—

	1911.		1912.		1913.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Galls.	£	Galls.	£	Galls.	£
Lime-juice	—	148	5,695	1,025	7,968	2,490
Essential Oil of limes and Otto of limes ..	—	13	5	21	158	336
Green limes	—	129	—	39	—	281

The quantity and value of the export (the only available indication of the production) of sugar and cocoa during the last five years were as follows :—

	Cocoa.		Sugar : Usine.		Other sugar, muscovado, and products thereof.
	Quantity.	Value.	Quantity.	Value.	
	Bags of 200 lb.	£	Tons.	£	£
1909 ..	10,850	54,275	5,360	59,623	2,265
1910 ..	8,187	40,935	5,199	64,988	2,674
1911 ..	10,368	46,656	4,288	52,535	1,955
1912 ..	9,573	43,099	4,246	48,830	2,117
1913 ..	8,169	36,888	4,577	65,221	446

A small quantity of cotton was again produced in the Choiseul district. The export figures were 4,000 pounds of lint, valued at £200, and 102 cwt. of seed, valued at £50.

The planting of coconuts is increasing and preparations are in progress on several estates for the extension of the area under this crop. With careful selection it is possible to get local nuts of excellent quality for planting, and the demand has been so considerable that the export for the year shows but a slight increase. The quantity shipped was 80,097 nuts, valued at £234; and 69 cwt. of copra, valued at £69, also figures among the exports.

The year was a bad one for honey, the exportation being valued at only £496, which is £208 less than in the previous year.

The Imperial Commissioner of Agriculture paid several visits to the Colony, during which he inspected cultivations in the Marquis and Babonneau districts and passed through considerable areas of uncultivated land, belonging to numerous small proprietors in that part of the Island, which appeared to possess considerable possibilities for the extension of lime growing.

The Mycologist attached to the Imperial Department also visited the Island for the purpose of making a survey of local conditions in regard to plant diseases generally.

Land Grants.

Fifty-eight Crown grants were issued during the year, the acreage disposed of being 435 acres. The price of Crown land is at the rate of £1 per acre up to 50 acres, and 10*s*. per acre for each acre above that number, and is payable one-fifth on application and the balance in four annual instalments.

The applications for the purchase of land numbered 68, in respect of 628 acres.

SHIPPING.

Shipping forms a large item in the welfare of the Colony, due to Port Castries being a coaling station, the facilities afforded for bunkering and quick despatch being unequalled by any other port in the West Indies.

The following table summarizes the tonnage entered and cleared during the last five years :—

Vessels Entered.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
1909 ..	518	1,027,837	201	6,003	127	220,961	45	2,731
1910 ..	557	1,143,092	228	7,437	135	241,808	40	2,712
1911 ..	817	1,782,911	182	5,086	126	208,500	41	2,535
1912 ..	684	1,488,397	216	5,591	106	155,205	30	1,733
1913 ..	685	1,549,751	243	6,717	150	214,821	37	2,366

Vessels Cleared.

Year.	British.				Foreign.			
	Steamers.		Sailing Vessels.		Steamers.		Sailing Vessels.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
1909 ..	517	1,025,251	197	5,574	129	224,895	44	2,662
1910 ..	559	1,146,983	228	7,928	134	239,687	40	2,712
1911 ..	815	1,778,865	182	5,110	127	210,621	41	2,535
1912 ..	686	1,492,443	216	5,572	165	248,136	30	1,733
1913 ..	685	1,549,751	245	6,702	150	214,216	37	2,366

These figures, compared with the tonnage for 1912, the latest figures available for the twenty-five principal ports in the Self-Governing Dominions, Crown Colonies, Possessions, and Protectorates enumerated in the Board of Trade's Statistical Abstract, place Port Castries fourteenth in the list.

Castries is also a port of registry, and at the close of 1913 had 14 vessels on the register, with a tonnage of 614. All these are small sailing vessels locally owned, with one exception, a barquantine of 417 tons, the register of which is under question.

Public Works.

The usual work on the ordinary upkeep and maintenance of public roads and buildings was carried on during the year, but no extraordinary work of any magnitude was undertaken. The construction of a bridge over the Choiseul River was begun and was well advanced by the end of the year, the expenditure incurred being £292. A fourth order Chance port light was established on Tapion Rock at the southern entrance to Castries Harbour. The light is a white occulting one, with a period of 11 seconds light and a dark one of four seconds. The nominal radius of visibility is 12 miles. The light was brought into operation on the 19th July, 1913; and its cost, including the erection of the shelter, amounted to £166.

The old leading lights on the Western Wharf and near the Chaussée were replaced by modern port lights. Both lights are fixed and show red. They were not quite completed at the close of the year, but were nevertheless brought into operation between February and March. The amount expended on the work was £261. The masonry tower for the new lighthouse at Vigie, on the northern entrance to the harbour, was completed in readiness for the new light, its cost being £120.

During the year the Government Offices, which had occupied a rented private building since 1901, were transferred to the building in Bridge Street in Castries which had been occupied by the Colonial Engineer and his staff, the latter Department being transferred to the former Army Service Corps buildings on the harbour front. All the Government Offices, with the exception of the Education Office, are housed in buildings owned by the Government.

III.—LEGISLATION.

The legislation of 1913 comprised twenty-seven Ordinances, the principal of which were the Opium Ordinance, which gives effect on behalf of St. Lucia to the International Opium Convention of 1912; the Customs Preferential Tariff Ordinance, which gives effect on behalf of the Colony to the Canadian—West Indian Preferential Tariff Agreement of the 9th April, 1912; the Revised Edition of the Laws Ordinance, which authorises the preparation and publication of a new and revised edition of the Ordinances of the Colony; the Stamp Duty Ordinance; and the Interpretation Ordinance.

IV.—EDUCATION.

The following figures are furnished by the Inspector of Schools in his annual report for 1913:—

	1912.	1913.
Number of Schools	52	52
Number on Rolls	7,307	7,434
Average Attendance	4,814	5,121
Number examined	6,572	6,930
Government Grant-in-Aid	£3,982	£3,979

Of the 52 schools 45 are Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 East Indian Mission.

The grant in aid of primary education was, in 1913, the same as in previous years, £4,000. Of this sum the amount expended was (*a*) on teachers' salaries, £3,904; (*b*) on the salary of the Education Officer, £54; (*c*) on school gardens, £6; (*d*) special building grant, £15; making a total of £3,979.

A new Education Ordinance, the Primary Education Ordinance, 1913, was passed on the 15th July, 1913. It repeals the Education Ordinance of 1889 and the Elementary Instruction Ordinance of 1902, and reproduces most of the provisions of the former Ordinance. It is hoped that it will be more easy, under the provisions of the new law, to diminish truancy and the loitering in the streets of children of school age during school hours. Although no prosecutions were undertaken in 1913, it is believed that the knowledge of the probable coming into force of the new Ordinance was one of the causes of the increase in the attendance during the year.

Of the two schools of secondary education, St. Mary's College, for boys, receiving a Government grant of £400 per annum, had an average attendance of 55; St. Joseph's Convent School, for girls, receiving a Government grant of £150, had an average attendance of 102.

V.—GOVERNMENT INSTITUTIONS.

Hospitals, &c.

The Victoria Hospital at Castries is the one general hospital for the Colony. It is a fine stone building and well situated, and has been considerably improved of recent years. A trained Nurse-Matron from England assumed her duties in January, 1914. Besides her general duties, she systematically trains the nurses and is endeavouring to give them a sound practical knowledge of their duties. The daily average number of patients was 63; the expenditure on the institution amounted to £1,790.

The Lunatic Asylum, situated at La Toc, near the entrance to the harbour, is a good stone building capable of accommodating 80 to 100 patients. It is managed by the House Surgeon of the Victoria Hospital, who has under him a European Steward. The daily average number of patients was 68·9. The expenditure amounted to £1,235.

Small buildings are provided in the out-districts at Soufrière, Dennery, and Vieux Fort, which are used as casualty hospitals for accident and emergency cases.

The General Poor Asylum is at Malgrétoute, on the sea beach within a mile of the town of Soufrière, and the daily average number of inmates during the year was 63. This provision for paupers is supplemented by an out-door relief system under the supervision of the Police Department.

The Yaws Hospital is in the vicinity of the Poor Asylum. There was a daily average number of patients of 22, and the expenditure for upkeep amounted to £627. The voluntary influx of patients for treatment with the drug "Salvarsan" continued unabated during the year, and 147 cases were treated. The number would have been much greater but for a shortage in the supply of the drug. The Medical Officer in charge, Dr. A. F. Hughes, reports that up to the time of his report he had treated 413 cases, and that out of this number there had only been 21 cases of recurrence of the disease. In this latter connection, the Medical Officer refers to the difficulty of distinguishing between *bona fide* recurrences and cases of re-infection.

There are visiting stations at various points where Medical Officers attend regularly on fixed days for the treatment of out-door cases of sickness.

There is at present no reformatory or industrial school in the Colony.

There is a public library in Castries towards which the Government gives a grant of £125 per annum, and which receives from the municipality a contribution of £25 per annum. In Soufrière there is also a small library to which the Government grants £20 a year, and a modest institution of the same kind in Dennery also receives Government aid to the extent of £5 a year.

Savings Bank.

If the amount of money placed in the Savings Bank can be taken as an index to the condition of the people of the Colony, then they must be regarded as fairly prosperous, for the amount to the credit of depositors at the close of the year continues to mount higher and higher, as the following figures show :—

Year.	Number of Depositors at 31st December.	Aggregate Deposits.	Aggregate Withdrawals.	Remaining on deposit at 31st December.
		£	£	£
1909	1,685	13,412	14,902	17,734
1910	1,693	12,743	11,539	18,788
1911	1,626	13,530	12,539	19,778
1912	1,649	12,627	12,256	20,150
1913	1,692	13,606	12,820	20,936

The investments in England on account of the bank stood at the 31st March, 1914, at £19,967.

VI.—JUDICIAL STATISTICS.

Police.—In addition to ordinary police work, the Police Force carries out a considerable number of duties in connection with the details of administration, such as the enforcement of sanitary regulations, distribution of poor and medical relief, registration of births and deaths, and, in certain districts, is in charge of the post offices and the telephone exchanges. The total expenditure on the department was £4,517.

Prisons.—The number of persons committed to the Royal Gaol in 1913 was 325. The daily average number in confinement was 43·04, as compared with 42·39 in 1912.

The health of the institution was highly satisfactory, the average number on the sick list being only ·82, the lowest on record.

The expenditure on the establishment was £1,144, just £30 less than in the preceding year. The total estimated value of prison labour is stated to be £443.

Criminal Statistics.—The statistics for the year present no prominent feature calling for special comment, except for a case of murder by an East Indian who, when brought before the Royal Court for trial, was found by the jury to be insane and ordered to be confined in the Lunatic Asylum.

The figures for the last two years are as follows :—

	1912.	1913.
Offences reported	1,635	1,766
Summary convictions :—		
Offences against property ..	156	122
Offences against the person ..	228	280
Other offences	1,249	1,238
Convictions in Superior Court :—		
Homicide	—	—
Offences against property ..	14	13
Offences against the person ..	8	3

VII.—VITAL STATISTICS.

Population.—The Registrar of Civil Status estimates the population at the 31st March, 1914, to have been 50,809,—23,367 males, and 27,442 females ; the population at the same date in 1913 was estimated at 49,963. The figures, however, do not take account of either emigration or immigration, and are based solely on the natural increase, the census figure of 1911 being taken as the starting point.

The birth-rate of the Colony (excluding still-births) was 34·5 per thousand of the population, being identical with the rate of 1912–13. The births numbered 1,838. The death-rate was 17·4 per thousand, while in the previous year it stood at 19·3 per thousand. The number of deaths was 192. There was one death from snake-bite.

Marriages numbered 277, an increase of 53 as compared with 1912–13.

Public Health and Sanitation.—All the Medical Officers report the health conditions of the year to have been favourable, and there is nothing in the reports calling for special mention.

The campaign against rats was systematically carried out during the year, except during the month of January, 4,040 rodents being captured. A staff of labourers, under a special Sanitary Officer, was employed on this work, and their services were also utilized for cleaning streams and drains and on other sanitary measures around Port Castries; some useful anti-mosquito work was also accomplished. The use of "millions" fish was continued in practicable places, but, as a good part of the year was unusually dry, their usefulness was somewhat diminished. In the out-districts, yards and premises were frequently inspected by the police, and the Chief of Police states that there were 77 convictions for offences against the sanitary regulations.

Climate.—The average annual rainfall for the Island, recorded at 25 stations, was 83·75 inches; it was 72·98 inches in 1912. The highest recorded rainfall was at Warwick Estate, in the Choiseul District, with 106·65 inches, and the lowest was at Beausejour Estate, in the Vieux Fort District, with 48·50 inches. Abnormally dry weather was experienced throughout the Island in the month of December.

The mean monthly temperature recorded in the shade at the Botanic Station in Castries was 78·2 F. The maximum shade temperature of 89·5 F. was recorded on May 19th and September 4th, and the minimum of 62 F. on February 19th.

The mean monthly corrected readings of the barometer ranged between 29·932 inches, in November, and 30·098, in March. The mean annual pressure was 30·015 inches.

VIII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly intercolonial mail service performed under contract by the Royal Mail Steam Packet Company's steamers was regularly carried out during the year, and the steamers of the Compagnie Générale Transatlantique (which touch at Castries going and coming *en route* between French Guiana and the northern French Colonies), also paid their usual visits, as did the vessels of the Quebec Line (which call on their passage to and from New York), and of the Danish East Asiatic Company. The Royal Mail Steam Packet Company's service, under contract with the Canadian Government, between Canada and the West Indies commenced in November, 1913, and was regularly carried out from that date. This service provides for a monthly call at St. Lucia of the steamers going to and coming from Canada.

The total revenue of the Post Office was £1,939, and the total expenditure £2,263.

The principal postal statistics for the last two years are as follows :—

	1912-13.	1913-14.
Letters and Postcards :—		
Sent	105,753	109,986
Received	105,422	100,627
Inland : Sent and Received ..	94,148	92,690
Parcels despatched	544	609
,, received	3,278	3,975
British Postal Orders issued ..	4,729	5,813
,, ,, ,, value ..	£2,643	£3,013
,, ,, ,, paid ..	1,097	1,181
,, ,, ,, value ..	£536	£584
Money Orders issued	£4,536	£4,393
,, ,, paid	£3,868	£4,020

There is regular and daily postal communication under local contract between Castries and the leeward coast towns and villages, the service being carried out by the Royal Mail Company's coasting steamer. On the windward side of the Island communication by post is overland and is made twice a week only.

All towns and villages in the Island are connected by telephone with Castries. There were 212 miles of line in operation during the year, and the subscribers numbered 144 at the end of the year. The number of messages delivered was 137, and 814 threepenny tickets were sold to non-subscribers using public telephones. The revenue amounted to £899, and the expenditure to £421.

IX.—GENERAL REMARKS.

Sir James Hayes Sadler, K.C.M.G., C.B., Governor of the Windward Islands, visited the Colony from the 15th to the 19th January and again from the 26th February to the 15th March, 1914.

Mr. E. J. Cameron, C.M.G., who had been Administrator of the Colony since April, 1909, was appointed to be Governor of the Gambia, and left St. Lucia for England on the 15th February, 1914.

Mr. W. Douglas Young, C.M.G., the Administrator of Dominica, succeeded Mr. Cameron as Administrator of St. Lucia and arrived in the Colony on the 26th March, 1914.

From the date of Mr. Cameron's departure until Mr. Young's arrival I acted as Administrator, except during the period of the Governor's visit in February-March, when I acted as Colonial Secretary.

The usual sketch map of the Island is appended.

ANTHONY DE FREITAS,

Acting Administrator.

St. Lucia,

28th November, 1914.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on title page:

GRENADA.

(For Report for 1913 see No. 822.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Grenada,
Windward Islands,
9th July, 1915.

SIR,

I have the honour to transmit herewith the report by Mr. Herbert Ferguson, Colonial Secretary, on the Blue Book of the Colony of Grenada for the year 1914–15.

I have, etc.,

G. B. HADDON-SMITH,
Governor.

The Right Honourable
A. Bonar Law, M.P.,
etc., etc., etc.

I.—FINANCIAL.

Revenue.

The revenue of the year ended 31st March, 1915, amounted to £92,347. This is the second highest revenue recorded. Regard being had to the dislocation of business by the war the revenue must be regarded as satisfactory.

2. The details of revenue were as follows :—

	1913–14.	1914–15.
	£	£
Customs	53,900	45,061
Licences, Excise, and Internal Revenue	26,250	26,488
Estate Duties	246	8,936
Fees of Office, etc.	2,341	3,124
Post Office	2,518	2,658
Telephones	2,243	2,286
Water Supplies	226	216
Revenue from Government Property	1,922	1,877
Interest from Sinking Fund ..	1,153	1,291
Miscellaneous Receipts ..	235	363
Land Sales	224	47
	£91,258	£92,347

3. It will be observed that there was no substantial fall in Customs revenue, as might have been expected to result from the interruption of ordinary trade and the financial stringency created by the outbreak

of hostilities in Europe. There was reduced trade, but the leeway in Customs receipts was made up towards the end of the financial year by the increased rates of duty imposed. A fortunate increase occurred in Estate Duties, through the falling in of a large estate on which duties amounting to £8,705 were paid. There is no variation in any other head of revenue that calls for special remark.

In order to meet an expected falling off in revenue during the ensuing year, legislative action was taken on 26th February, 1915, giving effect to the following increases in taxation :—

Increases in duty on Intoxicating Liquors and Tobacco.

	Old Rate.		*New Rate.*	
	s. d.		*s. d.*	
Brandy	10 6		12 6	per gallon.
Whisky	10 6		12 6	,,
Liqueurs, &c.	10 0		12 0	,,
Gin	8 0		10 0	,,
Rum (imported) ..	6 0		8 0	,,
,, (local)	4 0		4 6	,,
Trade Duty on Spirits..	1 0		1 6	,,
Wine (non-sparkling) ..	from 30 % *ad valorem*	to	2 0	,,
,, (sparkling) ..	,,		16 0	,,
Tobacco (unmanufactured)	0 9		1 0	per lb.
,, (manufactured)	3 0		4 0	,,
Cigarettes	7 0		9 0	,,

In addition, the export duty on cocoa was increased from 7½d. to 1s. 3d. per cwt., to be operative only when the London market price of cocoa exceeds 50s. per cwt., and the duty on American flour was raised by 1s. per barrel.

4. The following statement shows the actual revenue during the last five years, with a comparison of the figures with those of a decade ago :—

	£			£
1910–11 ..	81,413 ..	1900	..	70,363
1911–12 ..	98,645 ..	1901–2	..	70,075
1912–13 ..	86,393 ..	1902–3	..	70 802
1913–14 ..	91,258 ..	1903-4	..	70,265
1914–15 ..	92,347 ..	1904-5	..	68,993

EXPENDITURE.

5. The expenditure of the year amounted to £94,457, a figure which easily surpasses any previously recorded. High as it is, it does not represent the total liability incurred in the year, as of a vote of £10,000 to the War Funds only £4,000 was actually taken over during the year by the Imperial authorities. Inclusive of the whole sum, the expenditure of the year would have amounted to £100,457. This is the amount, needless to remark, that should be taken into account in estimating the actual financial position in regard to surplus.

6. Detailed under the usual heads, the expenditure of the year was :—

	1913–14.	1914–15.
	£	£
Charges on account of Debt	6,196	6,197
Pensions	2,993	2,985
The Governor	2,224	2,250
Colonial Secretary	1,826	1,750
Treasury Department	5,729	5,654
Post Office	3,039	3,056
Do. Special Expenditure ..	—	439
Audit Department	726	734
Port and Marine	571	618
Legal Departments	4,594	4,371
Police	5,440	5,335
Military Expenditure	839	409
Prisons	1,299	1,270
Sanitation	921	917
Medical Department	4,626	5,028
Hospitals and Asylums	7,422	7,886
Education	8,103	8,718
Do. Special Expenditure	293	350
Ecclesiastical	314	61
Charitable	747	792
Telephone Department	1,842	1,833
Carriacou District..	927	832
Do. Purchase of Cruiser	—	704
St. Paul's, etc., Water Supply	235	247
Miscellaneous	5,083	9,039
Agricultural Department	1,394	1,321
Do. Land Settlement	—	1,687
Public Works Department	1,568	1,462
Do. Roads and Bridges	10,288	10,318
Do. Other Recurrent Works	1,474	1,816
Do. Extraordinary	5,111	6,378
	£80,714	£94,457

7. The expenditure may be summarised as consisting of :—

Ordinary Expenditure amounting to ..	£87,501
Expenditure for Special Purposes	6,956

the details of the latter being :—

Part Donation to War Funds..	£4,000
Amount written off as Expenditure on Land Settlement..	1,456
Queen's Park Drainage Scheme	1,500
	£6,956

Reference to the war contribution has already been made. Strictly speaking, the donation of £10,000 (of which £6,000 was to be used in purchasing cocoa for the forces, and £4,000 as a contribution to the Prince of Wales's Fund) is a charge against surplus funds.

The amount under Land Settlement is another unusual item of expenditure. It represents expenditure which was advanced from surplus funds as part of the Land Settlement Advance Account, but which, on account of not having been included in the allotment prices, will not be recouped by the repayments from settlers. It has consequently been written off by a direct vote of expenditure. It may be remarked that the expenditure was of a special nature, such as for construction of a small sugar mill for grinding the settlers' canes and for expenses of supervision, and it is doubtful whether the inclusion of the expenditure in the allotment prices would not have made the lands unremunerative to the settlers. The expenditure was essential to establish the Land Settlement Scheme on a successful footing, and is consequently regarded as a proper charge against the Colony's funds.

The drainage and improvement of the Queen's Park—a scheme under continuous consideration for many years past—was proceeded with by the present Governor as being necessary to the health and convenience of the inhabitants of St. George's.

8. A statement of the expenditure of the last five years as compared with the expenditure ten years previously is as follows :—

Year.	£	Year.	£
1910–11	75,561	1900	62,718
1911–12	81,012	1901–2	68,669
1912–13	84,059	1902–3	70,113
1913–14	85,827	1903–4	69,509
1914–15	94,457	1904–5	71,968

FINANCIAL POSITION AT 31ST MARCH, 1915.

9. Assets as at 1st April, 1914		£64,154
Expenditure 1914–15	£94,457	—
Revenue 1914–15	92,347	—
Excess of Expenditure over Revenue		2,110
Surplus Assets at 31st March, 1915		£62,044

In this amount of £62,044 is included, however, the immediate liability of £6,000, representing the balance of the donation of £10,000 to the War Funds, to which reference has already been made.

10. The surplus assets are made up as follows :—

	£
Reserve Fund	25,000
Loans to District Boards	13,790
Land Settlement Funds	8,696
Stores on Hand	3,097
Current Cash, including cash with Crown Agents	11,461
	£62,044

11. By an addition of £4,000 during the year the Reserve Fund has now approximately reached the sum of £25,000, which is the amount recommended by the Secretary of State to be set aside as a reserve fund invested outside the Colony. The fund is now invested in the following securities :—

Stock	per cent.	£	s.	d.
Gold Coast	3	3,106	4	11
Zanzibar	3	1,563	16	0
Transvaal	3	1,112	2	10
Straits Settlements	3½	3,477	0	3
Southern Nigeria	3½	4,167	1	1
Sierra Leone	3½	2,978	17	0
Do.	4	365	5	2
Queensland	3¾	4,269	10	6
South Australia	4	3,960	0	0
		£24,999	17	9

12. The Public Debt remains unchanged and amounts to £123,670 in Inscribed stock. Against this the Sinking Fund amounts to £37,587 0s. 7d. The stock is redeemable between 1917 and 1947.

FINANCES OF DISTRICT BOARDS.

13. The revenue and expenditure of the District Boards of Grenada in the financial year under review were as follows: —

	Revenue.	Expenditure.
	£	£
St. George's	4,244	4,282
St. Andrew's	3,044	2,996
St. Patrick's	2,205	2,558
St. John's	1,671	1,717
St. Mark's	706	684
St. David's	1,097	1,097
	£12,967	£13,334

The town of Hillsborough in Carriacou, which is administered by Town Wardens, had a revenue of £95 and an expenditure of £94.

14. The loan debts and relative sinking funds of the District Boards at 31st March, 1915, were as follows: —

	Loan Debts	Sinking Funds
	£	£
St. George's	13,154	1,879
St. Andrew's	2,000	209
St. Patrick's	4,236	264
St. John's	3,391	678
St. Mark's	1,200	—
St. David's	—	—
	£23,981	£3,030

CURRENCY.

15. Government accounts are kept in sterling, and those of the banks in dollars and cents.

There are two local banks, the Colonial Bank and the Royal Bank of Canada, the latter having become established in Grenada by local Ordinance in 1913.

Money in circulation consists principally of notes of five dollars denomination, and silver. The estimated note circulation of each bank is fifty thousand dollars, and about £20,000 is in circulation in silver. There is no limit to the legal tender of the latter.

Gold coins have never been plentiful, and before the war the amount of gold in the Colony was estimated at only £2,000. It has since been much reduced owing to its export by private persons and reduction in the quantity coming to the Colony through visits of tourists. The cessation of the tourist traffic since the war has also affected the number of Bank of England notes, very few of which are now in evidence.

The groat or fourpenny piece is still legal tender in Grenada, but is not in public favour, and scarcely a coin of that denomination is now to be seen.

A supply of farthings was obtained from the Mint during the year, for the accommodation of the poorer people.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

(*a*) Imports and Exports.

16. The trade of the Colony according to the returns of the Customs Department was in the last five years as follows :—

Year	Imports.	Exports.
	£	£
1910	279,236	291,760
1911	309,227	264,640
1912	278,875	285,590
1913	282,927	367,149
1914	272,126	333,374

Imports.

17. The following statement gives the value of the principal articles imported, as compared with the previous year :—

	1913	1914
	£	£
Apparel	4,652	3,662
Biscuits, Bread, and Cakes.. ..	5,289	4,247
Boots and Shoes	5,509	5,301
Butter	2,696	2,274
Cattle Foods	2,429	2,338
Cement	1,567	2,683
Cordage and Twine	1,362	2,009
Cotton Goods	28,984	26,921
Fish of all kinds	15,676	13,441
Glass and Glassware..	1,439	970
Grain :—Oats	4,910	4,901
Rice	8,286	7,488
Wheaten Flour	42,917	40,643
Haberdashery and Millinery ..	5,640	4,773
Hardware	2,360	2,242
Hats and Bonnets	2,575	1,756
Lard	2,163	1,784
Leather, dressed and undressed ..	1,374	1,482
Machinery	1,904	8,774
Manures, Chemical and other ..	8,958	9,667
Meats, Canned, Salted, &c... ..	7,669	7,005
Medicines and Drugs	3,388	2,775
Metals and Manufactures of ..	9,140	6,602
Oils :—Cotton Seed	2,381	2,172
Olive and Refined Food	2,593	2,271
Kerosine	4,103	5,152
Oleomargarine	4,374	4,120
Soaps	4,250	4,209
Spirits (potable)	6,556	4,826
Sugar, unrefined	10,875	10,641
,, refined	2,817	3,095
Tobacco, unmanufactured	1,347	1,470
,, manufactured	934	964
,, Cigars	95	53
,, Cigarettes..	1,113	1,030
Wine	2,529	1,660
Wood and Timber	7,716	11,066
Shingles	621	747
Furniture	2,637	1,494
Wool, manufactures of	2,347	2,131

18. The origin of imports was as follows :—

	1913		1914	
	Value.	Percentage.	Value.	Percentage.
	£		£	
Total	282,927	—	272,126	—
United Kingdom ..	113,076	40	109,162	40
British Colonies . ..	69,135	24	69,440	25
Foreign Countries ..	100,716	36	93,524	35
United States (alone) ..	88,343	31	81,573	30
Canada (alone)	9,215	3	23,604	9

19. From 1st January, 1914, Grenada became a party to the Reciprocity Agreement with Canada. The effect on imports from Canada is shown in the following :—

Preferential Article.	1913	1914
	£	£
Bread, Biscuits, and Cakes	20	99
Cordage	321	425
Carriages	137	205
Motor Cars	—	529
Motor Car Parts	—	8
Cattle and other Animal Foods	9	20
Fish, Dried, Salted, and Smoked	1,607	2,639
Canned	3	27
Pickled	195	291
Flour	778	7,504
Rolled Oats and Oatmeal	—	82
Oats	1,242	3,147
Beans and Peas	16	75
Hay	—	11
Iron and Steel	—	20
Wire, Barbed and Woven	—	150
Painters' Colours and Materials	15	161
Paper	50	40
Soap, Common Washing	—	9
Wood : Furniture	—	34
Spruce and White Pine	4,158	4,918
Shingles	59	205
Butter	229	80
Boots and Shoes	—	8
Brooms and Brushes	108	69

It will be observed that there has been a large increase in imports of Canadian flour and oats; a corresponding reduction in imports of American flour has taken place. Altogether, imports from Canada including non-preferential articles increased by £14,389. On the other hand, as will be seen from the export figures, the value of all exports to the Dominion increased by only £1,305.

Exports.

20. The principal articles exported were as follows :—

	1913		1914	
	Quantity.	Value.	Quantity.	Value.
	lbs.	£	lbs.	£
Cocoa	11,791,851	303,074	11,501,319	280,308
Spices :	cwt. lbs.		cwt. lbs.	
Nutmegs.. ..	14,556 103	25,205	12,655 104	21,165
Other kinds, principally Mace ..	2,478 100	19,062	2,157 62	15,727
	lbs.		lbs.	
Cotton	400,813	10,500	358,087	8,805
Seeds, Cotton ..	1,134,436	2,779	1,024,665	3,079

21. The destination and percentage of the exports are shown in the following statement :—

	1913		1914	
	Value.	Percentage	Value.	Percentage.
	£		£	
Total	367,149	—	333,374	—
United Kingdom.. ..	228,232	62	223,454	67
British Colonies	6,496	2	5,503	2
Foreign Countries ..	132,421	36	104,417	31
United States (alone) ..	89,666	24	85,167	26
Canada (alone)	402	—	1,707	½

22. Subsidiary exports of Colony's produce included :—

		£
Lime Juice..	2,375 gallons	753
Ice	—	748
Hides	6,138 lbs.	338
Copra	37,021 lbs.	336
Fruits	—	335
Coconuts	116,780	414
Shells, Turtle	266	264

SHIPPING.

23. The total tonnage entered and cleared during the past five years was :—

Year.	
1910	590,451
1911	535,161
1912	565,788
1913	656,191
1914	689,120

AGRICULTURE.

24. The principal agricultural products of the Colony are cocoa, spices, and cotton.

Cocoa.

The 1914 season was not a good one for the cocoa crop, high winds and dry weather in the early part of the year considerably curtailing the output. The large planters have been able to keep their crop up to the average principally by the very large quantities of manures they have used during the past two years, and also by improved methods of cultivation. On the other hand the crop of the peasant proprietors is reported by the Agricultural Department to have fallen off considerably, thereby affecting the output of the island. On the whole the crop for the season ended 30th September, 1914, fell short by 2,865 bags of the average of the past five years.

Spices.

25. The cultivation of spices is confined almost entirely to nutmegs, with its derivative mace. The area devoted to the cultivation of nutmegs is not increasing, and has remained stationary for years, owing to the decline in prices. Mace has of late years commanded a relatively favourable price, and has had the effect of making nutmegs a profitable crop. It is worthy of remark that, although the area devoted to the cultivation has not been extended, the output of the island has steadily increased during the past ten years, and has just doubled during the decade. This is due to the fact that the crop of a nutmeg tree tends to increase steadily with the age of a tree. The produce last season was 1,372,940 lbs., while four years ago it was 909,280 lbs.

Cotton.

26. The island of Carriacou is the only district of the Colony in which cotton is grown. Several attempts have in recent years been made to re-establish the industry in the southern part of Grenada, where the soil is not suited for cocoa, but the efforts have invariably resulted in failure. The type grown in Carriacou is Marie Galante, a short-staple cotton. The quality of the cotton shipped during the year has not shown any appreciable improvement on the poor quality which has been produced during the past few years. The deterioration is presumably largely due to the system of ratooning, which is in many cases continued up to ten years.

Subsidiary Crops.

27. The want of a substantial additional industry to cocoa and spices is greatly felt, especially on lands where these crops cannot favourably grow.

In this respect it has to be borne in mind that any additional cultivation in Grenada is faced with the initial handicap that the most

fertile and accessible land is already taken up in the cultivation of a permanent and remunerative crop, viz., cocoa. However unwise it may be for the Colony to depend so greatly on one cultivation, to have "all its eggs in one basket," it is not to be expected that planters will uproot plantations that have taken many years to establish from fear of a calamitous drop in cocoa prices. The restricted area of fertile and accessible land and the tendency to experiment with new crops on soil of inferior productive value have been the obstacles in the way of success with all recent new ventures. Dr. Francis Watts, C.M.G., Imperial Commissioner of Agriculture for the West Indies, makes pointed reference to this in a recent report on limes and coconuts in Grenada, in which he remarks: "It is essential in pushing new industries that the crops should be planted in favourable situations: this will have to be kept well in mind in Grenada, where the best lands are given up to cocoa; it is not likely that success with new crops will be obtained if they are relegated to land of little value and not particularly suitable for them."

28. *Sugar.*—An increase in cane cultivation has taken place owing to the acquisition by a new proprietor of an estate in the south of the island which was formerly a noted sugar plantation, and the establishment of a mill capable of producing a sugar equal to the better kinds of muscovado sugar imported. The development of the sugar industry is restricted to the supply of the local market, as the lack of a sufficient area of cane lands alone makes it impossible for Grenada to compete in the open market with sugar-producing Colonies; but, inasmuch as 1,963,330 lb. of muscovado sugar to the value of £10,641 were imported last year, it will be seen that there is scope for a notable development of the industry for local purposes. A protective duty of ½d. per lb. which is in force further enhances the prospects of success in this direction.

29. *Limes.*—In Carriacou the cultivation of limes has already been successfully established, and about 500 acres are approaching the full bearing stage. The concentrated juice has shown a high test, and commands a good price. While the trees are young and vigorous no set-back to the industry need be feared, and it is to be hoped that the climatic conditions of Carriacou will prove favourable to the permanent cultivation. At present the principal scale insect on limes in Carriacou is the Orange Snow Scale (*Chionaspis citri*), and this is being controlled by the use of insecticides. 2,375 gallons of concentrated lime juice, valued at £753, were exported in 1914, and for the first quarter of 1915 the exports have been 3,700 gallons, of the value of £1,265. Efforts are being made to introduce the cultivation into Grenada, and the Agricultural Department, under Mr. Moore, who has had considerable experience of the industry in St. Lucia, is establishing sufficient lime nurseries to meet the considerable demand for lime plants that is expected in 1915. The estimated area under limes in Grenada is 150 acres, and small areas are beginning to produce their first crop.

30. *Coconuts.*—Although no large tracts of land are available for establishing large coconut estates, there are in all the parishes small areas which, while unfavourable for the growing of cocoa, spices, etc.,

are suited for, and are being planted in, coconuts. On the whole these plantations have made satisfactory progress during the year, and the cultivation is being extended.

INDUSTRIES.

31. The industrial concerns of the island are confined to the manufacture of sugar, rum, ice, and soap.

Sugar Mills.

32. There are numerous small sugar mills, driven by petroleum engines, and turning out a class of "wet" sugar that is greatly in demand by the labouring class. Only two mills are fitted with machinery capable of producing muscovado sugar of the grade called grocery sugar. Reference to the newest of these mills and to the extent and prospects of manufacture in the island is made in paragraph 23 under "Agriculture."

Distilleries.

33. Fourteen distilleries were at work during the year, an increase of two over the previous year; 50,700 proof gallons of rum were made in the calendar year, of the estimated value of £9,050. The local price of rum is comparatively high, 4s. per gallon being obtained for rum straight from the still. No rum is exported as the cost of manufacture is high, and it pays the distillers better to regulate the quantity manufactured than to have surplus stocks for export at less than cost price.

Ice Factory.

34. The local ice factory receives a subsidy from the Government of £265 for the supply of ice to the various parishes. 1,200 tons were made in 1914, and about 500 tons were exported to St. Lucia, which up to the present depends on the Grenada factory for its supply.

Soap Factory.

35. This is a very small concern which has been in existence for four or five years, and which supplies a limited portion of the local market demand. It is helped by Government to the extent of a refund of duty in respect of materials imported and used in the manufacture.

III.—LEGISLATION.

36. The full list of the sixteen Ordinances passed by the Legislative Council during the year 1914 is as follows :—

No. 1 The District Boards Amendment.
2 ,, Bank Notes.
3 ,, Towns Administration.
4 ,, Pensions.
5 ,, Copyright (Importation of Copies and Penalties).
6 ,, Appropriation.
7 ,, Police Ordinance Amendment.
8 ,, Motor Car.
9 ,, Criminal Procedure Code (Liability of Guardians).
10 ,, Trading with Enemy.
11 ,, Quarantine.
12 ,, Supplementary Appropriation.
13 ,, Aerial Navigation.
14 ,, Public Lands Acquisition.
15 ,, Midwives.
16 ,, Medical Officers Amendment.

37. Of the above-mentioned the most important were No. 2, the Bank Notes Ordinance, which provides for and controls the issue of bank notes in the Colony ; No. 8, the Motor Car Ordinance, regulating the use of motor cars ; and No. 15, the Midwives Ordinance, which aims at improving the status of midwives by registration, and the granting of subsidies in the form of fees for attendance on paupers and labourers. The latter Ordinance, owing to a change in the financial position of the Colony, has not yet been brought into operation.

IV.—EDUCATION.

Primary.

38. The number of Government and aided primary schools in the Colony is fifty-seven. Of these, eleven are Government Schools, twenty-six Roman Catholic, thirteen Anglican, five Wesleyan, and two of the Church of Scotland. The total number of pupils on the roll during the year under review was 11,985, and the average attendance was 5,910. The percentage of attendance was 49·4.

39. The total expenditure of the schools was £6,647, of which £6,181 was provided by the grant from Government. Calculated on the average attendance, and excluding school fees and caretakers' wages, the cost per head under the grant-in-aid in 1914 was:—

	£	s.	d.
Government Schools		19	8
Anglican		18	0
Wesleyan	1	3	8
Roman Catholic		14	7
Church of Scotland		15	11

40. The Primary Education Ordinance provides for four classes of schools—(*a*) industrial, (*b*) combined, (*c*) lower division, and (*d*) infant schools.

Arranged under these classes the schools numbered:—

Industrial	Nil.
Combined Schools	38
Lower Division	7
Infant	11
Ragged	1

41. The Ragged School was started in December, 1912, to provide for the education of the poorest class. It has proved a success, and a second one has been recommended by the head of the Education Department. The founding of an industrial school has been under consideration for some years, but various difficulties have prevented its establishment.

Secondary.

42. The Boys' Secondary School continues to maintain its success, and the number of pupils necessitated the appointment of an additional master. Mr. D. Evans Davies, B.Sc., who was appointed to the post, arrived in the Colony on 17th June, 1914, but resigned the appointment towards the end of the year, in order to enlist for the war. The expenditure of the school during the year was £1,299, and the receipts from school fees amounted to £453. The pupils numbered 77.

43. The number of pupils at the Girls' Secondary School is 28. This small number is due greatly to the educational facilities provided by private schools for girls, and particularly by the Convent School. £113 was received as school fees, and the expenditure amounted to £433. The school is well conducted, and tuition additional to the ordinary subjects is given in music, painting, carving, and drawing.

44. The St. Joseph's Convent School receives an annual grant from the Government of £150, and an additional grant was made last year of £200 in aid of extension of the buildings rendered necessary by the increased number of pupils.

V.—GOVERNMENT INSTITUTIONS.

(*a*) Colony Hospital.

45. The number of patients treated in the hospital was 2,382, as compared with 1,530 in the previous year, and of these 1,956 were discharged as cured, 370 as relieved, and 63 died. The average stay of patients in hospital was 39·56 days, as compared with 49·50 in 1913. The revenue received amounted to £170, and the expenditure to £3,166. The total cost per patient was £21 8s. 0d. (£20 1s. 3d. in 1913). The operations performed numbered 147, as against 122 in 1913. The number of attendances in the out-patient department was 5,393, and the same number applies to the prescriptions issued, 1,076 of which were free.

(*b*) Yaws Hospital.

46. Patients treated during the year numbered 460, and 402 were discharged as cured. One death occurred; 55 patients were treated with salvarsan, with most gratifying results. The expenditure was £671, and the cost per patient £10 6s. 6d., as compared with £413 and £8 5s. 2½d. in 1913.

(*c*) St. Andrew's Hospital.

47. 232 patients were treated, as compared with 175 in the previous year; 198 were discharged as cured, and 12 as relieved; 9 deaths occurred. The expenditure amounted to £441, averaging £33 16s. 9¼d. per patient (cost per patient in previous year £38 8s. 0d.). 13,907 prescriptions were compounded at the dispensary, which supplies also the whole parish. Free prescriptions numbered 8,425, and the receipts from the remainder amounted to £192.

(*d*) Carriacou Hospital.

48. The number of patients treated was 232, and of these 175 were discharged as cured, 27 as relieved, and 3 as not improved. There were 8 deaths. The cost per patient was £33 16s. 0d. The total expenditure was £705, and the revenue was £76.

(*e*) Hospital for Consumptives.

49. The number of patients treated was 50, there having been 30 admissions during the year; 18 were discharged and 17 died, 15 remaining in hospital at the end of 1914. The total expenditure was £427, the annual cost per patient being £29 0s. 11d. The longest stay in hospital of the males was 111 days, of the females one year and three days.

(*f*) Lunatic Asylum.

50. 32 patients were admitted during the year, bringing the number under treatment up to 142; 23 were discharged and 9 died. The total remaining at the end of the year was 110, 17 belonging to St. Vincent and the rest to Grenada. The cost per patient was £21 14s. 7d.,

the expenditure in all being £2,735. Several improvements were made in the buildings, which, together with the grounds, are kept conspicuously clean.

(*g*) Poor Asylum.

51. The number of patients remaining at the end of 1913 was 55. 38 were admitted and 17 discharged during the year; 21 deaths occurred, the number of patients remaining at the end of the year being unchanged. The total expenditure was £622, and the annual cost per patient £11 14s. 1d.

(*h*) Ankylostomiasis Campaign.

52. The work of the International Health Commission in its campaign against ankylostomiasis was started in the Colony shortly after the arrival, on August 27th, of Dr. Angus Macdonald, M.D., D.P.H., D.T.M., who was selected by the Secretary of State to be the medical officer in charge. As a preliminary measure interest in the scheme was stimulated by lectures given at each school in the island, and in Carriacou, and this was followed by regular periodical visits for treatment of sufferers at centres in each part of the island. Dr. Macdonald's efforts in this direction have resulted in the hearty co-operation of the people, and their voluntary acquiescence has made it possible to get into touch with every individual in the areas under operation.

53. Dissemination of information in connection with the prevention of hookworm infection is being continued by means of printed leaflets, by lantern lectures and addresses illustrating the causes, treatment, and prevention of the disease, and by courses of instruction in general sanitation. By these means the interest and enthusiasm so necessary to the effective eradication of the disease are being kept sustained. From the fact that patients come to the head office from every parish in the island it is clear that a distinct dread of the disease has arisen amongst the people. Signs of enlightened views on sanitation are evident in the general efforts on the part of the people throughout the districts operated and in other districts to construct satisfactory closets. The following up of the work of the International Health Commission by maintaining the areas dealt with in a satisfactory sanitary state has been engaging the attention of the local advisory committee, and a report on "Sanitary Necessities" is at present under consideration by the Government.

54. On the advice of Dr. Howard, Medical Director for the West Indies, the intensive system of working is now being adopted, and the progress of the work up to 31st March, 1915, may be seen from the following figures:—

At 31st March, 1915.

Persons examined	8,770
,, infected with hookworm	4,254
,, treated	6,014
,, cured..	1,085
,, under treatment	4,929

Infection found.

Ankylostoma (hookworm)	60%
Ascaris (Round Worm)	80%
Trichurus (Whip Worm)	75%
All intestinal parasites	95%

55. The evidence obtained up to the present goes to show that all ages are infected, but that infection is uncommon under ten years and rare under five; that infection varies widely between different districts, due chiefly to differences of soil, cultivation, and perhaps of water supply; and that from casual blood examination it is discovered that malaria is widely prevalent in the island and is responsible for much morbidity. A special report on the comparative debilitating influence of the ankylostome and the malaria parasite is being prepared by the Medical Officer in Charge. As there is an entire absence of accurate statistics in regard to actual malaria infection, the report should prove of great use to the Government in their measures for improving the health conditions of the island.

(*i*) Savings Bank.

56. The business done in the Government Savings Bank was greatly reduced during the year. After the outbreak of the war the monthly totals of deposits decreased by fifty per cent., and by the end of the year the amount at credit of depositors, which in the beginning was £27,936, was reduced to £23,333, a drop of £4,603. The number of depositors fell from 2,356 to 1,714, a reduction of 642. The cause of the decline in volume of business is also partly due to the existence of a Savings Department in connection with the Royal Bank of Canada, which gives more freedom to its clients in depositing and withdrawing money than the Government Savings Bank.

57. A reduction of the investments by £4,000 was necessitated, but actual sale of the investments in a depressed market was fortunately avoided by transferring the stock to the credit of the Colony's Reserve Fund, which the Government was desirous of increasing by this amount. The investments remaining to the credit of the bank at 31st December, 1914, amounted to £23,540, a sum slightly in excess of the amount of deposits.

58. The average amount standing to the credit of depositors was £13 12s. 3d.

59. The bank has a branch in each parish of the Colony and in Carriacou.

60. The working profit during the year was £257.

VI.—JUDICIAL STATISTICS.

(*a*) Police.

61. The regular police force consists of one officer in command, a sergeant-major, and 79 N.C.Os. and men. In addition there are also 161 rural constables not on the fixed establishment. Three sergeants seconded for duty as sanitary inspectors are now placed under the charge of the Colonial Surgeon. The standard of efficiency in musketry continues to be good, and great attention has been paid to the drill and physical development of the force. The heliograph service between Grenada and Carriacou continues to be worked satisfactorily by the police.

(*b*) Prisons.

62. Committals during the year numbered 311, being 5 more than in 1913. A regrettable feature is the increase in juvenile offenders, who numbered 15, as against 8 in the previous year. The daily average in prison was 46·90, and the cost per prisoner was £38 15s. 1d. This amount is high, but is caused by the small numbers, as it is not possible to reduce the staff to any great extent. Discipline is well maintained, and the prison administration continues to be very satisfactory.

(*c*) Criminal Statistics.

63. The Attorney-General reports:—"The number of persons brought before the magistrates was 2,555, which is rather less than the numbers in the two preceding years, but slightly in excess of the average for the three preceding years. There were 1,762 summary convictions, as against an average of 1,712 for the three preceding years. There were 190 convictions for prædial larceny, which is 70 less than the number of convictions for this offence in 1913, 5 more than in 1912, and 85 more than in 1911. Thirty-three persons were indicted in the Supreme Court; 26 were convicted, 5 acquitted, and a *nolle prosequi* entered in respect of 3. Cases of the more serious forms of crime continue to be rare. There was one case of manslaughter, none of murder, rape, or offences against property with violence to the person. The figures for the year under review indicate a slight diminution of crime as compared with the previous year."

VII.—VITAL STATISTICS.

64. The population at the end of 1914 was estimated as 71,082. The natural increase in population (excess of births over deaths) was 1,273, to which must be added 502, representing the excess of immigrants over emigrants, making a total increase in population during the year of 1,775.

65. The births during the calendar year numbered 2,787, being an increase of 360 over those of the previous year. The birth-rate was 39·20, as against 34·80 in 1913. This birth-rate has been exceeded only twice in the last ten years. The marriages numbered 311.

66. The year is recorded as an unhealthy one, an epidemic of dysentery being prevalent towards the end of the year. 297 deaths were recorded from this disease, a great increase over the normal. The total deaths numbered 1,514, as against 1,344 in 1913—an increase of 170. The death-rate was 21·29, as against 19·27 in 1913.

The chief causes of death were :—

Malaria..	107
Dysentery	297
Tetanus	14
Pulmonary Tuberculosis	64
Tuberculosis of Other Organs	7
Syphilis	28
Cancer and other Malignant Tumours	20
Local Diseases of—	
Nervous System..	69
Circulatory System	74
Digestive System—	
Diarrhœa and Enteritis	298
Premature Birth and Diseases of Early Infancy ..	68
Senility	87
Heart Failure and other Ill-defined Diseases ..	137

Meteorological Observations.

67. The rainfall for the year was below the average. At Richmond Hill Station, in the south of the island, 61·87 inches were recorded, this being 12·98 less than in 1913, and 14·40 less than the average for the past twenty-four years.

At other stations the rainfall was as follows :—

	Inches.
North of Grenada (Sauteurs)	50·82
Centre of Grenada (Grand Etang)	118·03
Extreme South (Point Saline)	24·77
Carriacou	49·95

The maximum temperature in the shade was 90·0, on 27th October, while the minimum in the shade, recorded on 30th December, was 68·0.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

(a) Postal Service.

68. The Post Office business transacted during the year, as compared with 1913, is shown in the following statement :—

	1913.	1914.
Letters and Post Cards	623,515	645,214
Newspapers, Books, &c.	291,598	286,899
Parcels	12,652	11,238
Registered and Insured Letters ..	17,188	15,953
Money and Postal Orders issued and paid	£35,447	£33,092
Revenue	£2,518	£2,658
Expenditure	£3,039	£3,254

69. A contribution of £1,350 is paid towards the Imperial subsidy to the Royal Mail Steam Packet Company for the conveyance of mails by the Company's steamers. For the conveyance of inland mails a motor car service was inaugurated by the Government on 1st October, 1913. As passengers are also carried, the service is proving remunerative in addition to filling a long felt want in transportation facilities.

(b) Telegraphs.

70. The island is linked up with the lines of the West India and Panama Telegraph Company, to which a subsidy of £600 per year is paid by the Colony. There is no inland telegraph service.

(c) Telephones.

71. The telephone system continues to grow steadily, and the island may be said to be very well supplied by the service. For a rental of 12s. per month, subscribers have unlimited service throughout all the six Exchanges in the island. The number of subscribers is 369. The revenue for the year was £2,286, and the expenditure, including £226 for loan charges, amounted to £1,883. There are 159 miles of trunk lines, and in addition about 445 miles of line connecting subscribers with the Exchange.

IX.—GENERAL REMARKS.

72. Governor Lieutenant-Colonel Sir James Hayes Sadler, K.C.M.G., C.B., left the Colony on May 23rd, 1914, on leave prior to retirement, the government of the Windward Islands being assumed by His Honour

Douglas Young, C.M.G., and the local administration by the nourable H. Ferguson, acting Colonial Secretary. The new vernor, Sir George Basil Haddon-Smith, K.C.M.G., arrived in the ony on December 29th, 1914, and assumed the government of the ndward Islands the following day.

73. The Honourable Edward R. Drayton, C.M.G., Colonial Secretary, the Colony on 26th March, 1914, to take up his appointment as ministrator of Dominica, and from that date until the arrival of new Colonial Secretary, the Honourable F. H. Watkins, I.S.O., 12th August, 1914, the post was filled by the Colonial Treasurer, Honourable Herbert Ferguson, in conjunction with the duties his own office.

74. The post of Colonial Surgeon was revived after an interval hirteen years, and the Honourable E. F. Hatton, M.D., the senior dical officer, was appointed to the office as from 1st April, 1914.

75. Shortly after the outbreak of war the importation of food pplies for the island was interrupted by the temporary cessation of regular steamer service from New York, and by the difficulty in anging for remittances to other places. Through the readily-given operation of the Lieutenant-Governor of Nova Scotia supplies of nadian flour and fish were received until normal trade was resumed d confidence in the continuance of importations was restored. The vernment importation of foodstuffs had the further effect of enabling prices of the principal commodities to be kept at a low figure in schedule of prices which was enforced throughout the Colony, d by this means a great boon was conferred on the poorer people, who this island are dependent to a surprising extent on imported odstuffs.

76. It cannot be denied that the lot of the labourer becomes more duous the more the land is taken up by the cultivation of the island's rmanent crops. As the production of ground provisions diminishes, poorer people become more and more dependent on imported food-uffs. The ordinary peasant labourer has a natural inclination to ow local food crops only on soil that is easily worked, and only the creasing force of necessity drives him to cultivate ground provisions less fertile soil. On the advice of the Imperial Commissioner of griculture for the West Indies, the people were last year encouraged plant quick-growing food crops, and Government and planters ike helped by letting out garden lots free, or at nominal rents. With e additional impetus of the scare of a shortage in imported food pplies, lands long lying fallow were brought into cultivation, and the pply of ground provisions increased to a satisfactory extent, thereby eping money in circulation within the Colony that would otherwise ve gone in remittances for imported foodstuffs.

77. Another welcome feature as far as the Colony is concerned s been the great rise in the price of cocoa. This has relieved the ancial stringency which existed in the Colony, for owing to the ct that there are several thousand small peasant proprietors all

interested in and affected by the price of cocoa, the effect of good prices is soon distributed throughout the entire island. The outlook at the close of the financial year was more favourable than anticipated, and there is promise that Grenada, with reasonable economy and prudent undertakings, will experience no great set-back to her steady prosperity.

HERBERT FERGUSON,

Colonial Secretary.

Grenada,
8th July, 1915.

No. 880.

ST. LUCIA.

(For Report for 1913–14 see No. 836.)

THE ADMINISTRATOR TO THE GOVERNOR.

Government House,

Saint Lucia,

3rd February, 1916.

SIR,

I have the honour to transmit herewith copies of the Blue Book of this Colony for the year 1914–15, together with my Report thereon.

I have the honour to be,

Sir,

Your Excellency's most obedient servant,

GIDEON MURRAY,

Administrator.

His Excellency
Sir G. B. Haddon-Smith, K.C.M.G.,
&c. &c., &c.,
Grenada.

(C255) Wt. 45316/1003. 1000 & 90. 4.16. B. & F., Ltd. Gp.11/2.

ANNUAL REPORT FOR THE YEAR 1914-15.

I.—FINANCIAL.

The revenue for the year was estimated at £66,320. The amount actually received was £57,795, £8,525 below the Estimates. The average revenue for the previous five years was £67,313.

There was a considerable loss under Customs and Port and Harbour dues owing to less trade and shipping during the year consequent upon the war.

Under Head 4, the receipts from Post Office, Head 5, showed very appreciably the effects of the war, chiefly due to fall in sales to stamp dealers.

The revenue derived from licences for the sale of liquor was £1,581 10*s.* 0*d.*, and the number of such licences issued during the year was 202.

The actual expenditure for the year was £3,001 less than the estimate, which totalled £71,353, savings having been effected under nearly every head.

The accounts for the year closed with a deficit of £11,688, resulting in the reduction of the Colony's surplus funds at 31st March, 1915, to £13,880, as compared with £25,568 with which the year opened.

Public Debt.

At the 31st March, 1915, the public debt stood at £138,030, having been reduced during the year by £2,100, and at the same date the total of the sinking funds for the redemption of the debt amounted to £23,681.

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper coins. Accounts are kept in sterling by the Government, and in dollars and cents by the bank and most of the mercantile firms, the dollar being equal to 4*s.* 2*d.*

Municipalities.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery, "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates, and dues, market dues, and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The total value of the imports in the calendar year 1914 amounted to £306,152, and was £77,747 more than in the previous year. Of the increase coal accounted for £20,391.

The coal imported was 120,288 tons, valued at £146,860, as compared with 114,350 tons, valued at £126,469, in 1913.

Exports.

The declared value of the exports was £241,422, of which £99,658 was the value of produce of the Colony, and £141,764 of other places, including £128,639 the value of bunker coal, and £3,380 the value of goods exported as ships' stores.

The exports of island produce in the past ten years show a gradual increase from £88,600 in 1904 to £117,700 in 1913, the exports in the latter year being the highest recorded except those of 1909, when they were valued at £124,901, which was due to the abnormally high price obtained for cocoa in that year. It may also be noted that, whilst the export of island produce has thus increased, the percentage of sugar and cocoa exports has gradually fallen from 93·3 to 87·1, indicating an extension in agriculture in other directions than those of the two principal products.

Coaling Trade.

As will be seen from the subjoined figures, the coaling trade did not do as well in 1914 as in the previous two years, and this was due to a falling off, caused by the war, in the number of steamers that called for coal:—

	Tons.	£
1912	134,783	166,312
1913	117,532	141,038
1914	95,893	128,639

Manufactures.

The sugar factories at Cul-de-Sac, Roseau, Vieux Fort, and Dennery were all working during the year.

The erection of the Government lime-juice factory, to which reference was made in the last report, was completed and opened in the year under review.

The business of the factory is conducted on a co-operative basis. In determining the profits there is deducted from the amounts realized for the sale of produce the amounts paid for the purchase of limes and lime-juice together with all expenses of working the factory and disposing of the produce, and, in addition, a sum equivalent to 10 per cent. of the amount paid for the purchase of limes and lime-juice, the remainder being regarded as gross profits to be divided, one-third being paid to the Government and two-thirds to the vendors of fruit and juice, this latter to be distributed to the vendors by way of bonus, in proportion to the amounts paid to them for limes or lime-juice.

The sum equivalent to 10 per cent. of the value of the limes and lime-juice purchased, together with the sum representing one-third of the profits referred to in the foregoing paragraph, to be paid to the Government by way of interest and sinking fund in respect to the sum expended in erecting the factory.

The price paid for limes and lime-juice is based on a scale of prices having a relation to the value of concentrated juice, and insuring a safety margin of profit to the factory. The seller of fruit realises his full value when he gets his bonus derived from the share of profits.

Agricultural Industries.

Lime cultivation is making rapid progress and the value of the lime-juice exported during the year 1914 (£6,572) exceeded that for the preceding year by £3,082.

The value of the export (the only available indication of the production) of cocoa in 1914 was £38,846, as compared with £36,888, although the amount exported (7,971 bags) was less by 198 bags than the export in the preceding year. The value of the sugar exported in 1914 was £44,483, as compared with £65,651 in 1913.

A small quantity of cotton was again produced in the Chaisel district. The export figures were 5,100 pounds of lint, valued at £255, and 128 cwt. of seed, valued at £37.

The planting of coconuts is increasing. With careful selection it is possible to get local nuts of excellent quality for planting, and the demand has been so considerable that the export for the year shows but a slight increase. The quantity shipped was 53,638 nuts, valued at £294; and 142 cwt. of copra, valued at £176, also figures among the exports.

The year was a bad one for honey, the exportation being valued at only £370, which is £226 less than in the previous year.

The Imperial Commissioner of Agriculture visited the Colony in September, and spent from September 5th to 8th at the new Experiment Station, Reunion. During this period he visited the Land Settlement and the outlying portions of the estate. Official visits were also made to the Botanic Gardens, Castries, and the Government Lime Factory.

Land Grants.

Thirty-six Crown grants were issued during the year, the
disposed of being 290 acres. The price of Crown land is at
of £1 per acre up to 50 acres, and 10s. per acre for each acre ab
number, and is payable one-fifth on application and the ba
four annual instalments.

The applications for the purchase of land numbered 51, in
of 394 acres.

Shipping.

Shipping forms a large item in the welfare of the Colony
Port Castries being a coaling station, the facilities aff
bunkering and quick despatch being unequalled by any o
in the West Indies, or, for the matter of that, in many other
the British Empire.

During the year 1914 the tonnage of British steamers en
1,339,539, and of foreign steamers 197,725. The correspondi
for the preceding year are 1,549,751 and 214,821 respectively

Castries is also a port of registry, and at the close of 191
vessels on the register, with a tonnage of 268. All these
sailing vessels locally owned.

Public Works.

The usual work on the ordinary upkeep and maintenance
roads and buildings was carried on during the year, but
ordinary work of any magnitude was undertaken. The co
of a bridge over the Choiseul River was completed; also th
of a new powerful light at Vigie.

III.—LEGISLATION.

The legislation of 1914 comprised six Ordinances, none
importance.

IV.—EDUCATION.

The following figures are furnished by the Inspector of
his annual report for 1914:—

	1913.	1
Number of Schools	52	
Number on Rolls	7,434	
Average Attendance	5,121	
Number examined	6,930	
Government Grant-in-Aid	£3,979	£

Of the 52 schools 45 are Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 East Indian Mission.

The grant-in-aid of primary education was, in 1914, the same as in previous years, £4,000. Of this sum the amount expended was (*a*) on teachers' salaries, £3,917; (*b*) on the salary of the Education Officer, £54; (*c*) special building grant, £15; making a total of £3,986.

A new Education Ordinance, the Primary Education Ordinance, 1913, was passed on the 15th July, 1913. It repeals the Education Ordinance of 1889 and the Elementary Instruction Ordinance of 1902, and reproduces most of the provisions of the former Ordinance. It is hoped that it will be more easy, under the provisions of the new law, to diminish truancy and the loitering in the streets of children of school age during school hours. During 1914, 140 cases were brought before the magistrates of the 1st and 2nd Districts. Three parents were fined, and the rest warned.

Of the two schools of secondary education, St. Mary's College, for boys, receiving a Government grant of £400 per annum, had an average attendance of 55; St. Joseph's Convent School, for girls, receiving a Government grant of £150, had an average attendance of 102.

V.—GOVERNMENT INSTITUTIONS.

Hospitals, &c.

The Victoria Hospital at Castries is the one general hospital for the Colony. It is a fine stone building and well situated, and has been considerably improved of recent years. A trained nurse-matron from England assumed her duties in January, 1914. Besides her general duties, she systematically trains the nurses and is endeavouring to give them a sound practical knowledge of their duties. The daily average number of patients was 76; the expenditure on the institution amounted to £2,017.

The Lunatic Asylum, situated at La Toc, near the entrance to the harbour, is a good stone building capable of accommodating 80 to 100 patients. It is managed by the House Surgeon of the Victoria Hospital, who has under him a European steward. The daily average number of patients was 70·8. The expenditure amounted to £1,164.

Small buildings are provided in the out-districts at Soufrière, Dennery, and Vieux Fort, which are used as casualty hospitals for accident and emergency cases.

The General Poor Asylum is at Malgretoute, on the sea beach within a mile of the town of Soufrière, and the daily average number of inmates during the year was 68·55. The expenditure amounted to £887. This provision for paupers is supplemented by an out-door relief system under the supervision of the Police Department.

The Yaws Hospital is in the vicinity of the Poor Asylum. There was a daily average number of patients of 47·03, and the expenditure for upkeep amounted to £554. The voluntary influx of patients for treatment with the drug "Salvarsan" continued unabated during the year, and 337 cases were treated. The number would have been much greater but for a shortage in the supply of the drug. The Medical Officer in charge, Dr. A. F. Hughes, reports that up to the time of his report he had treated 745 cases, and that out of this number there had only been 32 cases of recurrence of the disease. In this latter connexion, the medical officer refers to the difficulty of his distinguishing between *bona fide* recurrences and cases of re-infection.

There are visiting stations at various points where medical officers attend regularly on fixed days for the treatment of out-door cases of sickness.

There is a public library in Castries towards which the Government gives a grant of £125 per annum, and which receives from the municipality a contribution of £25 per annum. In Soufrière there is also a small library to which the Government grants £20 a year, and a modest institution of the same kind in Dennery also receives Government aid to the extent of £5 a year. At the date of writing a small library has been opened in Vieux Fort, supplemented by a grant of £5 from town funds.

Savings Bank.

The amount to the credit of depositors at the close of the year continues to grow; the amount remaining on deposit on 31st December being £22,461 as compared with £20,936 in 1913.

The investments in England on account of the bank stood at the 31st March, 1915, at £19,867.

VI.—JUDICIAL STATISTICS.

Police.—In addition to the ordinary police work, the police force carries out a considerable number of duties in connection with the details of administration, such as the enforcement of sanitary regulations, distribution of poor and medical relief, registration of births and deaths, and in certain districts is in charge of the post offices and telephone exchanges. The total expenditure on the department was £4,464.

Prisons.—The number of persons committed to the Royal gaol in 1914 was 416. The daily average number in confinement was 34·43 as compared with 43·04 in 1913.

The health of the institution was highly satisfactory, the average number on the sick list being only ·5, the lowest on record.

ng company, inc.

The expenditure on the establishment was £1,063, £81 less than in the preceding year. The total estimated value of prison labour is stated to be £332.

Criminal Statistics.—The statistics for the year present no prominent feature calling for special comment.

VII.—VITAL STATISTICS.

Population.—The Registrar of Civil Status estimates the population at the 31st March, 1915, to have been 51,590—23,768 males, and 27,822 females; the population at the same date in 1914 was estimated at 50,809. The figures, however, do not take account of either emigration or immigration, and are based solely on the natural increase, the census figure of 1911 being taken as the starting point.

The birth-rate of the Colony (excluding still-births) was 33·9 per thousand of the population, being 34·5 in 1913–14. The births numbered 1,833. The death-rate was 18·7 per thousand, while in the previous year it stood at 17·4 per thousand. The number of deaths was 1,052. There was no death from snake-bite.

Marriages numbered 225, a decrease of 52 as compared with 1913–14.

Public Health and Sanitation.—All the medical officers report the health conditions of the year to have been favourable, and there is, generally, nothing in the reports calling for special mention.

The campaign against rats was systematically carried out during nine months of the year, 2,351 rodents being captured. A staff of labourers, under a special sanitary officer, was employed on this work, and their services were also utilized for cleaning streams and drains and on other sanitary measures around Port Castries; some useful anti-mosquito work was also accomplished. The use of "millions" fish was continued in practicable places, but, as a good part of the year was unusually dry, their usefulness was somewhat diminished. In the out-districts, yards and premises were frequently inspected by the police, and the Chief of Police states that there were 29 convictions for offences against the sanitary regulations.

During the year the hookworm campaign, inaugurated at the expense of the International Health Commission, commenced its work under the direction of Dr. Stanley Branch, a local District Medical Officer seconded for this purpose. The Colony is much indebted to the Commission for providing the necessary means to combat this devastating disease so deleterious to the health and efficiency of the labouring classes. Side by side with this campaign, the Government is considering measures for the improvement of the sanitary conditions in the Colony generally.

Climate.—The average annual rainfall for the Island, recorded at 24 stations, was 64·88 inches; it was 83·75 inches in 1913. The highest recorded rainfall was at Uplyme, with 120·15 inches, and the

lowest was at Beauséjour estate, in the Vieux Fort district, with 27·78 inches. Abnormally dry weather was experienced throughout the Island in the month of December.

The mean monthly temperature recorded in the shade at the Botanic Station in Castries was 79·2 F. The maximum shade temperature of 91·0 F. was recorded on May 3rd, and the minimum of 63 F. on March 1st.

The mean monthly corrected readings of the barometer ranged between 29·378 inches in December and 30·087 in April. The mean annual pressure was 30·026 inches.

VIII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly intercolonial mail service performed under contract by the Royal Mail Steam Packet Company's steamers was regularly carried out during the year, and the steamers of the Compagnie Générale Transatlantique (which touch at Castries going and coming en route between French Guiana and the northern French Colonies), also paid their usual visits, as did the vessels of the Quebec line (which call on their passage to and from New York), and of the Danish East Asiatic Company. The Royal Mail Steam Packet Company's service, under contract with the Canadian Government, between Canada and the West Indies commenced in November, 1912, and was regularly carried out from that date. This service provides for a monthly call at St. Lucia of the steamers going to and coming from Canada.

The total revenue of the Post Office was £1,136, and the total expenditure £2,088.

The principal postal statistics for the last two years are as follows:—

	1913–14.	1914–15.
Letters and Postcards:—		
Sent	109,986	91,062
Received	100,627	93,954
Inland: Sent and Received ..	86,392	82,766
Parcels despatched	609	430
„ received	3,975	2,637

There is regular and daily postal communication under local contract between Castries and the leeward coast towns and villages, the service being carried out by the Royal Mail Company's coasting steamer. On the windward side of the Island communication by post is overland and is made twice a week only.

All towns and villages in the Island are connected by telephone with Castries.

IX.—GENERAL REMARKS.

Sir G. B. Haddon Smith, K.C.M.G., Governor of the Bahamas, succeeded Sir J. Hayes Sadler as Governor of the Windward Islands and arrived in Grenada on the 30th December, 1914.

The Honourable Gideon Murray, Administrator of St. Vincent, was appointed Administrator of St. Lucia on the 10th December, 1914, but did not assume the administration of the Colony until the 20th May, 1915.

Owing to the war there was a general decrease of business in the shops and stores, which caused a falling off in the revenue from Customs duty. Owing to fewer merchant steamers calling here, there has likewise been a decrease in the coaling trade and in the revenue of the port. The price of peasants' cocoa was extremely low in October and November 1914, but it has since risen to a normal rate. It is hoped that the high price of sugar and the fair price of cocoa and lime-juice will have some effect in staying the drop in Customs duties.

Like other parts of the British Empire, St. Lucia has evinced her loyalty to the cause for which we are fighting by considerable money grants, both Government and private, to the objects of the war. In addition 40 of her male population engaged themselves as stokers on H.M.S. "Good Hope," as she passed through St. Lucia on her way to South America, and they, together with the many other gallant fellows, surrendered their lives for their country in the brave encounter with the German squadron, in which the "Good Hope" met her unfortunate fate.

GIDEON MURRAY,
Administrator.

Government House,
St. Lucia,
31st December, 1915.

COLONIAL REPORTS, &c.

No. 906.

GRENADA.

(For Report for 1914–15 see No. 852.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Grenada,
Windward Islands,
20th August, 1916.

SIR,

I have the honour to forward the annual report on the Blue Book of this Colony for the year 1915–16.

I have, &c.,
G. B. HADDON-SMITH,
Governor.

The Right Honourable
A. Bonar Law, M.P.,
&c., &c., &c.

(C306) Wt.45316/1003. 1,000 & 90. 11.16. B.& F.Ltd. Gp.11/2.

BLUE BOOK REPORT FOR THE YEAR 1915-16.

I.—FINANCIAL.

1. The financial year ending 31st March, 1916, is likely to be recorded as one of the most fortunate in the annals of Grenada. Climatic conditions were favourable to the island's staple products and produced a record crop of cocoa and spices. An abundant crop appears to recur in cycles of five years. The fortunate circumstance in this instance is that it has coincided with a period of exceptionally high market prices for both commodities.

2. As the result of these fortunate conditions, the exports from the Colony in the calendar year were valued at £466,318—a high water mark. Of this total cocoa alone contributed £402,394, representing an increase of £122,086 over the previous year.

The imports for the year being normal, amounting only to £260,495, a handsome surplus of £205,823 to the credit of the Colony is indicated.

3. That the imports, despite the additional cost due to increased prices and freights, have not exceeded the average is evidence both of economy on the part of the community and of greater attention to the production of foodstuffs within the Colony. The tendency to rely on importations of foreign in place of local food crops appears to have been somewhat checked. The increased production of home food supplies is a factor of great economic importance to the Colony, especially to the labouring classes and the numerous small peasant proprietors, who, as producers as well as consumers, derive the main benefit by the retention in the Colony of this money that would otherwise have gone abroad.

4. The local revenue for the year ended 31st March, 1916, amounting to £96,420, was very satisfactory, being £6,700 more than estimated. It is true that a war tax on cocoa, brought into force in November, 1915, helped to swell the receipts, but only £2,499 was realised from this source, and consequently it appears that the general revenue from other sources improved by £4,200.

The foregoing figures are exclusive of a grant of £2,607 from the International Health Commission.

5. The Expenditure (exclusive of payments from the International Health Commission Grant) for the year amounted to £103,992, and was by far the largest total ever reached in this colony, being approximately £20,000 over the average of the past five years. Exceptional items of expenditure fell to be paid in the year under review, the principal being :—

Gift of Cocoa for Imperial Forces	£6,000
Expenses of Grenada War Contingent ..	5,534
Storm damages	3,402

Excluding these items, totalling £14,936, the expenditure which may be classed as ordinary was £89,056.

6. The total revenue and expenditure in the last two financial years were as follows :—

	Revenue.	Expenditure.
	£	£
1914–15	92,347	94,457
1915–16	96,420	103,992

FINANCIAL POSITION AT 31ST MARCH, 1916.

7. Assets as at 1st April, 1915		£62,044
Expenditure 1915–16	£103,992	—
Revenue 1915–16	96,420	—
Excess of Expenditure on Revenue	———	7,572
Surplus Assets at 31st March, 1916		£54,472

8. The public debt was £123,670, as before, and the accumulated sinking fund for its redemption amounted to £40,230.

FINANCES OF DISTRICT BOARDS.

9. The revenue and expenditure of the six District Boards of Grenada in the financial year ended 31st March, 1916, were as follows :—

	Revenue.	Expenditure.
	£	£
St. George's	4,129	4,282
St. Andrew's	3,182	2,956
St. Patrick's	2,512	2,326
St. John's	1,652	1,541
St. Mark's	816	650
St. David's	888	888
	£13,179	£12,643

10. The town of Hillsborough in Carriacou, is administered by Town Wardens. Its revenue was £97 and expenditure the same.

11. The loan debts of the Boards at the same date were £24,664.

CURRENCY.

12. Money in circulation consists principally of notes of five dollars denomination, and of silver. It is estimated that about one hundred thousand notes are in circulation, and that silver is in circulation to the extent of about £20,000.

13. The island is at present almost entirely depleted of gold, and Bank of England notes are seldom seen.

14. There are two banks established in the Colony, the Colonial Bank and the Royal Bank of Canada. Their accounts are kept in dollars and cents.; those of the Government and a number of business houses are still kept in sterling.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

15. The Customs statistics are compiled for the calendar year 1915.

16. The entire trade for the year amounted to £726,813. This is an increase of £121,313 over the trade of the previous year, and by far the largest in value recorded for the Colony. The imports were valued at £260,495, and the exports at £466,318.

The statistics of the last two years have been :—

Year.	Imports.	Exports.	Total.
1914	£272,126	£333,374	£605,500
1915	260,495	466,318	726,813

17. The total imports being almost equal in value to those of the previous year, there is little variation apparent in the principal articles. There was a diminution in the quantities of foodstuffs imported, with the exception of the item classified as biscuits, bread, and cakes, which showed an increase, accounted for by large importations from Trinidad of cheap biscuits known as pilot bread.

18. The following statement shows the importation of the principal foreign foodstuffs and of muscovado sugar during the past two years :—

Year.	Flour.	Fish, Salted and Cured.	Rice.	Muscovado Sugar.
	in million lbs.			
1914	6·89	·94	1·10	1·96
1915	5·62	·85	1·08	1·81

19. The great quantity of muscovado sugar imported is a somewhat extraordinary feature in the trade returns. In value this item amounted last year to £14,342, and, placed according to value,

ranks third in the list of principal imports. The tendency to convert every available acre of fertile land into cocoa or other permanent cultivation accounts to a great extent for this peculiarity in a sugar-producing colony.

20. A decrease took place in articles of luxury, and in the quantity of wines and spirits, although, thanks to an increase in the duty, the revenue from the latter was greater than in 1914.

21. The origin of imports and percentage of total during the last two years are shown in the following table :—

	1914		1915	
	Value.	Percentage.	Value.	Percentage.
	£		£	
Total	272,126	—	260,495	—
United Kingdom ..	109,162	40	90,436	35
British Colonies . ..	69,440	25	71,161	27
Foreign Countries ..	93,524	35	98,897	38
United States (alone) ..	81,573	30	86,632	33
Canada (alone)	23,604	9	26,987	10

Exports.

22. The principal products exported from the Colony were :—

	1914.	1915.
Cocoa	£280,308	£402,394
Spices :—		
Nutmegs	25,205	25,319
Other kinds (principally mace)	19,062	17,122
Cotton	10,500	8,490
Cotton Seed	2,779	1,979

23. The destination of the exports and the percentage to total exports were as under :—

	1914		1915	
	Value.	Percentage.	Value.	Percentage.
	£		£	
Total	333,374	—	466,318	—
United Kingdom.. ..	223,454	67	300,923	64
British Colonies	5,503	2	11,995	3
Foreign Countries ..	104,417	31	153,400	33
United States (alone) ..	85,167	26	153,835	33
Canada (alone)	1,707	½	3,681	·7

24. A slight decrease, three per cent., is shown in the percentage of exports to the United Kingdom. Exports to the United States of America increased from £85,167 to £153,235, representing a percentage increase on the total exports of seven per cent.

25. *Reciprocity Agreement.*—Despite disturbed conditions, the trade with Canada increased during the year, the imports being £26,987, as against £23,604, and exports £3,681, as against £1,707 in the previous year. These increases, though small, are evidence of vitality in the business relations that are springing up between the two countries.

SHIPPING.

26. A decrease in tonnage, as was to be expected, occurred during the year. The total tonnage entered and cleared during the past two years was:—

1914	689,120
1915	425,188

AGRICULTURE.

Cocoa.

27. The crop year in Grenada runs from October 1st to September 30th. While reapings in the year ending September 30th, 1915, were below the average, the crop in the half year ended 31st March, 1916, has been the heaviest on record. Prices have ruled high for more than a year, and during the latter half of the year were over 80*s.* per cwt. The exports of cocoa in 1915 amounted in value to £402,394.

Reports from the Agricultural Department indicate that there has been little additional planting, the small increase in area under cocoa occurring mainly in peasant tenant gardens which have been taken over by estate proprietors.

Spices.

28. The past year has been a favourable one for the products of the nutmeg tree. The production of nutmegs and mace has steadily increased during the last few years, and prices during the same period have shown an upward tendency. Spices rank second among the exports of Grenada. The value of the crop exported in the calendar year 1915 was £42,441.

The following figures of export, supplied by the Agricultural Department, show the progress during the past two years:—

Nutmegs and mace exported:—

Year ending	lbs.
30th Sept. 1914	1,372,940
1915	1,674,286

Minor Agricultural Industries.

29. *Cotton.*—Cotton ranks next in importance to the two main industries of cocoa and spices. Its cultivation is confined entirely to the Island of Carriacou, and only the Marie Galante variety is grown. Efforts are being made to improve the cultivation. Exports of cotton and cotton seed in 1915 amounted in value to £10,469.

30. *Limes.*—The cultivation of limes is forging ahead, Carriacou setting a lead to the rest of the Colony, both in area under cultivation and in exports. The cultivation in Grenada is being taken up principally in the parishes of St. George, St. David, and St. Patrick. In all, it is estimated that about 850 acres are planted in limes. Over 200 acres were planted during last year, and the Agricultural Department is taking steps to meet a demand for a large increase in the coming year. The value of lime exports in 1915 was £6,401.

31. *Coconuts.*—An extension is being made also in the cultivation of coconuts, and the number of plants issued by the Agricultural Department in the year was sufficient for the planting up of 240 acres. The value of exports of copra and nuts in the year was £243.

32. *Sugar.*—Sugar is grown only for local consumption, and reliable statistics of the area under cultivation and produce reaped are not available. The good prices now being obtained should stimulate production. Attention is drawn in paragraph 19 to the quantity of muscovada sugar imported.

Land Settlement.

33. An estate, known as St. Cyr Mountain Estate, situated about ten miles from St. George's, was acquired by Government, at a cost of £2,814, the final expenditure after survey and making of roads being £3,597. The estate roads provided give access from every lot to the byeways of the district. The purchase of this estate marks a new departure in the land settlement scheme. The main object of the system is to establish peasants on unworked lands for the purpose of increasing the production of local foodstuffs, of which there is an insufficient supply in the island. A portion of the St. Cyr Estate is under cocoa, and 36 lots bearing cocoa or mixed cocoa and nutmeg trees have been allotted to peasants at prices ranging from £14 to £35 an acre. The remaining 84 lots were under bush or forest, valued at £10 to £12 per acre.

34. The whole of the estate except a small corner is fertile, and is well watered. The climate is humid, the rainfall being about 100 inches per annum.

35. The planting of cocoa by the settlers is limited to supplying vacancies in existing areas, and the main objective of encouragement in the planting of annual crops, especially beans, corn, and ground provisions, is being kept in view by the Agricultural Department.

36. As showing the demand for land, it may be stated that 291 applications for the 120 lots were received. The allottees of the higher priced lots were required to pay not less than one-third of the

value, and the balance in five annual instalments. Uncultivated lots were given on payment of one-twelfth the value, with eleven years to pay the balance. Interest at 5 per cent. is charged on unpaid instalments.

37. It may be mentioned that the land settlement scheme is of interest only to local peasants, the extent of land available for purchase and settlement being too limited to institute a scheme of settlement for others than natives or residents of the Colony.

Manufactures.

38. The only manufacture of any importance in the Colony is that of rum. Twelve distilleries were at work during the year, the production amounting to 60,639 proof gallons. 49,035 gallons were duty paid for consumption in the year.

39. A small soap factory continues to flourish in a small way, its existence being fostered by free imports.

40. An ice factory exists, and receives an annual subsidy from the Government.

III.—LEGISLATION.

41. The Ordinances passed in 1915 numbered 31, the most important being No. 3, an Ordinance vesting the Queen's Park in trustees for certain public purposes; No. 5, to restrict alienation of small allotments under the Land Settlement Scheme; No. 7, a Money Lending Ordinance fixing the maximum rate of interest at 12½ per cent.; No. 17, a Dogs' Licence Ordinance to effect better control of registration and licensing; No. 24, an amendment of the Public Health Ordinance, providing for better sanitary arrangements, and two Ordinances imposing respectively additional taxation on rum, and a war tax on cocoa.

IV.—EDUCATION.

Primary.

42. There are two classes of primary schools—Government, entirely supported from Colonial revenue, and Grant-in-Aid, receiving contributions from Colony's funds. The Government schools number 11, and Grant-in-Aid schools 46. The latter are divided among the religious denominations as follows:—

Roman Catholic	26
Anglican	13
Wesleyan	5
Church of Scotland	2

43. The grant-in-aid of primary education from Colonial revenue was £7,229, as compared with £6,333 in 1914–15.

44. The number on the rolls and average attendance at the schools were as under:—

	Number on Roll.	Average Attendance.
1915–16	12,281	5,988
1914–15	11,895	5,910

Secondary Schools.

45. The Grenada boys' school had 68 pupils on its roll at 31st March, 1916, a decrease of nine as compared with the previous year. Twenty-four of this number were exhibitioners from primary schools.

The expenditure amounted to £1,328, and the receipts from school fees to £296.

46. The pupils of the girls' school numbered 28, including five exhibitioners. £108 was received in fees, and the total expenditure was £440. The school suffers from the competition of several excellent private schools, which have been in existence for many years.

47. The St. Joseph's Convent School receives an annual Government grant of £150, and easily maintains its leading position in regard to number of pupils.

V.—GOVERNMENT INSTITUTIONS.

(*a*) Colony Hospital.

48. There are 140 beds at this hospital, and the number of patients admitted during the calendar year was 1,887, as compared with 2,382 in the previous year; 931 were discharged cured, and 857 relieved, while 99 died and 123 remained in hospital at the close of the year. The number of paying patients was 65, the revenue received from these being £95. The expenditure amounted to £3,343, the annual cost per patient being £9 2*s*. 6*d*. The daily dietary cost, including medical comforts, per patient was 6*d*.

49. The major surgical operations performed numbered 108.

50. Out-patients formerly treated at the hospital are now attended to at the Government dispensary at Melville Street, which was opened during the year.

51. There is a maternity ward attached to the hospital, to which 63 women were admitted during the year. The number of confinements was 50. Four premature births occurred, and two were still-born. There were no deaths among the mothers.

(*b*) Yaws Hospital.

52. A large increase in the number of patients took place, due to greater activity of the Sanitary Inspectors in discovering sufferers from the disease. 663 were treated as compared with 460 in 1914. Only 20 were treated with salvarsan, sufficient supplies of the drug being unobtainable. The number of beds is 70, and the total expenditure amounted to £753, as compared with £671 in the previous year. The annual cost per patient was £8 2*s*. 0½*d*., the daily cost for dietary per patient being 3¾*d*.

(*c*) St. Andrew's Hospital.

53. This hospital has 12 beds. 220 patients were treated during the year, being 12 fewer than in the preceding year. 208 were discharged cured, and 5 as improved, while 7 deaths occurred. The average number of inmates was 12. The total expenditure was £470, and the cost per patient was £34 4*s*. 4*d*. The daily cost per patient for dietary was 9½*d*.

54. A dispensary, which supplies the parish of St. Andrew, is attached to this hospital, and its cost is included in the amount given above. 1,364 prescriptions were for hospital patients, and 12,766, making a total of 14,130, were compounded for inhabitants of the parish. Free prescriptions numbered 8,674, and payment prescriptions 5,456, the receipts from the latter amounting to £168.

(*d*) Carriacou Hospital.

55. 24 beds are provided at the Carriacou Hospital. The total number of patients treated was 252, of whom 200 were cured and 21 were discharged relieved. Eight deaths occurred. The expenditure amounted to £734, and the cost per patient was £33 4*s*. The daily cost per patient for dietary alone was 6·86*d*.

56. A Government dispensary is attached to the hospital, and supplies Carriacou and the Southern Grenadine Islands. The total number of prescriptions issued was 4,179, of which 1,257 were for hospital patients. The free prescriptions numbered 1,354.

(*e*) Hospital for Consumptives.

57. This hospital provides 20 beds, and 54 patients were treated during the year, 25 being males and 29 females. There were 27 deaths, most of the cases admitted being in an advanced stage of the disease

and offering little hope of cure. 18 patients were discharged during the year. The total expenditure of £415 gives an annual cost per patient of £31 4*s*. 6*d*., the daily cost per patient for dietary alone being 10½*d*.

58. The hospital, which was erected in 1914, is situated outside the town of St. George, on a hill about 600 feet above sea level. The hospital and grounds are kept in excellent condition.

(*f*) Lunatic Asylum.

59. The lunatic asylum has 120 beds. 132 persons were treated during the year, the admissions being 22, and the number discharged 19. Six deaths occurred. The total expenditure was £2,455, and the annual cost per patient £22 9*s*. 5½*d*. The daily dietary cost per patient was 6¼*d*.

£362 was contributed by St. Vincent in refund of cost of patients from that Colony.

(*g*) Poor Asylum.

60. 58 beds are provided at this institution, 38 for males and 20 for females. The accommodation was fully occupied throughout the year. On a total expenditure of £588 the annual cost per inmate works out at £10 12*s*. 8*d*. The daily cost per patient for dietary alone was 5½*d*., and inclusive of medical comforts 6*d*.

61. The lunatic and poor asylums, situated on Richmond Hill, are under the direct charge of the Colonial Surgeon, who deserves credit for the satisfactory condition in which these institutions are invariably maintained.

(*h*) Government Dispensaries.

62. Government dispensaries are established in St. George's, St. Andrew's, St. Patrick's, St. Mark's, and in Carriacou. Medicines are supplied free of cost to paupers, labourers' children under 10 years, labourers over 60 years, police constables, and prisoners. Free medicines are also supplied to all labourers suffering from the following diseases:—Yaws, syphilis, malaria, and ankylostomiasis.

(*i*) Ankylostomiasis Campaign.

63. The operations undertaken by the local branch of the International Health Commission, under the charge of Dr. Macdonald, for the eradication of hookworm disease were vigorously carried on throughout the year.

64. On a population of 19,000 examined, it has been ascertained that hookworm infection exists to an extent of seventy-five per cent., and from the variety of this population examined it is reasonable to

assume that infection to the same extent exists throughout the Colony. Infection by intestinal parasites of one kind or another existed in ninety-nine per cent. of about 19,000 examined.

65. Thirty per cent. of the people treated during the year have been cured.

66. The educative purpose of the Commission, in addition to the investigation and treatment of cases, has been kept well in the foreground, and Dr. Macdonald reports that the sympathetic co-operation of the leading members of the agricultural community, the clergy, the press, and the medical profession, has been given readily towards that end.

67. Realising that no improvement in the health of the people as the result of treatment for hookworm can be expected to be permanent unless the sources of infection are removed, the Government have amended the Public Health Ordinance and Regulations to provide for more effective disposal of human excreta. Pit closets have also been erected at Government schools, and arrangements are being made for public latrines in villages where the conditions are unsuitable for pit closets at individual houses.

68. The details given below indicate the progress that has been made in the work of the campaign :—

Summary of operations to March 31, 1916 :—		
Population dealt with	19,456	——
Number examined	18,592	96% of population
Number infected :—		
With hookworm	13,964	75% of examined
With trichuris	14,486	78% ,, ,,
With ascaris	14,897	80% ,, ,,
With all parasites	18,316	99% ,, ,,
Number treated for hookworm infection	13,850	99% of infected
For all reasons	14,187	——
Number cured	4,183	30% of infected

(j) Savings Bank.

69. This institution has been greatly affected by the competition of savings departments started in connection with the Royal Bank of Canada and the Colonial Bank. A further decline in the number of depositors was shown in the year's returns, 1,517 being on the bank's list at 31st December, 1915, as compared with 1,714 twelve months previous.

70. Withdrawals exceeded deposits by £3,515, and the amount standing to the credit of depositors was reduced to £20,423.

The average amount per depositor is £13 9*s.* 3*d.*

71. The unfortunate position has arisen of the invested funds in the name of the Bank now standing at £2,877 in excess of the Bank's funds, the latter figure being in fact money belonging to the Colony. The difficulty of realizing the investments in the present state of the market places the colony at some disadvantage, as the Treasury is short of actual cash, and an overdraft from the Crown Agents of approximately the same amount as the overinvestment of Savings Bank moneys was necessitated at the close of the financial year.

VI.—JUDICIAL STATISTICS.

(*a*) Police.

72. The Police Force consists of one Chief of Police, one Sergeant Major (now absent on duties connected with the War), and 81 non-commissioned officers and men. In addition there are: 1 armourer sergeant (for the Windward Islands), 1 bugler, and 2 civilian clerks. About 150 rural constables are also appointed.

73. In addition to usual police duties, the administration of poor relief is carried out by the Police Department. A heliograph service between Grenada and the Island of Carriacou is also worked by selected members of the force.

(*b*) Prisons.

74. The prison at Richmond Hill is capably managed by the Superintendent, Mr. Charles Riggs, who maintains excellent disciplinary control.

75. An unusual number of admissions took place during the year, the total increase being 54 per cent. over the previous year. The factors contributing to this increase are given by the Superintendent as increased activity on the part of the police, the imposition of short sentences, and increased number of committals to prison in default of payment of fines. Juvenile offenders increased from 15 to 19, and females from 80 to 154.

76. The daily average in prison was 59, and the annual cost per head £32 3*s.* 5*d.*

(*c*) Criminal Statistics.

77. The Attorney General reports:—"The number of persons broguht before the magistrates was 3,086, an increase on the three preceding years 1912-14 of 494,522, and 531 respectively. The summary convictions numbered 2,221, as against 1,762 in 1914.

There were 283 convictions for prædial larceny. Comparing these figures with previous years, it is regrettably obvious that this form of crime is again on the increase. In 1912 the convictions numbered 185, in 1913, 260, and in 1914, 190. Thirty-one persons were indicted in the Supreme Court; 24 were convicted and 7 acquitted. There was one case of rape, none of murder or manslaughter, during the year. To sum up, on perusal of the returns, classified under heads, it appears that there have been increases under all heads in the number of convictions in respect of every form of crime. There were 246 convictions for 'offences against property' as against 208 in 1914, and 373 for 'offences against the person' as against 322 in 1914."

VII.—VITAL STATISTICS.

78. The estimated population on 31st December, 1915, was 71,567. The natural increase in population was 671, but was reduced by an excess of emigration over immigration amounting to 186, the net increase being thus 485.

79. The births during the year numbered 2,415.

80. The deaths numbered 1,744, and the death rate for the whole Colony was 24·36 per thousand. The rate varied in the different districts, ranging from 31 and 30 in St. John's and St. David's, respectively, to 22 in St. Patrick's and St. Mark's, and being only 9 in Carriacou.

81. The records show that dysenteric diseases affected a great mass of the people, and that malaria was to some extent epidemic. Of the 1,744 deaths, 689, or 40 per cent. of the total, were due to dysentery and diarrhœa and enteritis. In the parish of St. John this percentage rose to 50. Deaths from malaria numbered 147, the highest mortality from this disease occurring in the parishes of St. Andrew and St. Patrick.

82. The infantile mortality is fairly satisfactory as compared with other tropical countries. The number of deaths under one year of age gives a percentage of total deaths of 24. On the other hand, deaths between the ages of one and fifteen years are excessive, the percentage of total deaths rising to 36.

83. This excessive mortality in early age is probably due to preventible causes which may disappear with the adoption of measures for improved sanitation throughout the Colony.

Meteorological Observations.

84. The rainfall at Richmond Hill Station was 72·57 inches, 10·70 more than in 1914, and 5·67 more than the average of the preceding three years. The maximum rainfall at this station in one year was in 1892, when 105·89 inches were recorded.

85. The maximum temperature in the shade was 92·0 on 8th October, and in the sun 137·0 on several dates in the same month. The minimum in the shade was 70·0, occurring on several dates.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

(a) Postal Service.

86. The following statement shows the main business transacted by the Post Office during 1915 as compared with the previous year:—

	1914.	1915.
Letters and Post Cards	645,214	558,537
Newspapers, Books, &c.	286,899	210,582
Parcels	11,238	7,938
Registered and Insured Letters ..	15,953	10,858
Money and Postal Orders issued	£33,092	£18,751
do. paid		£11,566
Revenue	£2,658	£1,576
Expenditure	£3,254	£3,150

87. Receipts from passenger fares in connection with the Motor Mail Service are collected by the Post Office, and £519 was carried to general revenue from this source during the year. To this service the Post Office makes a contribution of £350 per annum for conveyance of mails. The demand for seats has been regularly in excess of the accommodation, and provision has been made for larger cars.

88. The contract with the Royal Mail Steam Packet Company for the conveyance of foreign mails was terminated on 27th December, 1915. Irregularity in arrival and despatch of European mails has been further increased by irregular sailings of the steamers plying between this Colony and New York. Regularity in the latter service—which places Grenada within seven days of New York—would lessen to a great extent the inconvenience caused by the uncertainty of the mails for Europe. Admiralty demands on the Company make this impossible at present. Since the termination of the mail contract, the Canadian steamers, at the instance of the Government at Ottawa, now call at all the British islands on both the up and down voyages, and communication between neighbouring colonies has in consequence been only slightly adversely affected. The expense of the Canadian service is borne entirely by Canada, and is evidence of the desire of the Dominion to assist, apart from the Reciprocity Agreement, in the development of the British West Indies.

(b) Telegraphs.

89. There is no inland telegraph service. A subsidy of £600 per annum is paid to the West India and Panama Telegraph Company, in return for which the Colony receives a daily news bulletin and participates in reduced charges for cablegrams.

(c) Telephones.

90. The telephone system gives an extensive service at moderate rental rates. A subscription of £7 [illegible]. per annum entitles the subscriber to connection with all the districts of the Colony, including five district exchanges, there being no fees for trunk calls. The system is remunerative, the revenue last year being £2,339 and the expenditure £2,269. The trunk lines have a mileage of 159, and there were about 592 miles of lines connecting subscribers with the exchanges.

IX.—GENERAL REMARKS

91. The prosperity of the Colony has not suffered by the disturbance of general trade caused by the War. On the contrary, the general wealth of the main section of the people—the planting community—has increased on account of a long continued period of high prices for cocoa and spices. A record crop of the former was produced. The Colony's good fortune extended even to adequate freight facilities, and the prolific crop of cocoa was safely brought to market, in London and New York, in time for disposal at the prevailing high quotations.

92. The past year will not only be notable for the fortuitous combination of circumstances so favourable to the Island's prosperity, but will ever be memorable to the inhabitants of the Colony from the recruiting of a native contingent for service in the War. This is an event in the Colony's history of which Grenadians have every reason to be proud. A draft for the British West Indies Regiment was raised and dispatched to England in the autumn, and a further draft was recruited early this year. In men and in financial aid to the war expenses the Colony has done well in proportion to her population, trade, and revenue. There is abundant evidence in the Colony of loyalty to the Throne and pride in the Empire.

H. Ferguson,

Colonial Secretary.

Grenada,
15th August, 1916.

THE ADMINISTRATOR TO THE GOVERNOR

Government House,
Saint Lucia,
5th January, 1917.

SIR,

I have the honour to transmit herewith copy of my Annual Report on this Colony for the year 1915–16.

I have, etc.,

GIDEON MURRAY,
Administrator.

His Excellency
Sir G. B. Haddon-Smith, K.C.M.G.,
&c., &c., &c.
Grenada.

(C351) Wt.47019/1099. 1,000 & 90. 3.17. B.&F.Ltd. Gp.11/2.

ANNUAL REPORT FOR THE YEAR 1915–16.

I.—FINANCIAL.

The financial position of the Colony at 31st March, 1916, was as under :—

	£	s.	d.
Surplus Funds at 1st April, 1915	13,879	13	4
Total Local Revenue for the year 1915–16 ..	72,642	14	2
	£86,522	7	6
Total Local Expenditure for the year 1915–16	73,956	19	9
Surplus at 31st March, 1916	£12,565	7	9

showing a deficit on the year's administration of £1,314 5*s.* 7*d.*

The total assets of the Colony at 31st March, 1916, amounted to £72,003 7*s.* 7*d.*, and the liabilities totalled £53,445 10*s.* 7*d.*, leaving a surplus of £18,557 17*s.* 0*d.*, made up as follows :—

	£	s.	d.
Surplus and Deficit Account (as above) ..	12,565	7	9
Public Buildings Insurance Fund	5,992	9	3
	£18,557	17	0

Revenue.

The following extract from the Auditor's Report is illuminating on this head :—

" The total local revenue amounted to £72,642 14*s.* 2*d.*, the largest on record, being £7,511 6*s.* 9*d.* in excess of anticipations and £15,815 15*s.* 6*d.* more than the collections for the previous year. This satisfactory result is largely attributable to the measures adopted by the Government to restore financial equilibrium in the Colony. Early in the year an Ordinance (No. 3 of 1915) was passed to increase import duties, as a temporary expedient, on luxuries (beer, ale, porter, whisky, cigars, cigarettes, other manufactured tobacco and snuff) and the *ad valorem* duties were augmented by one tenth of the existing duties on certain selected articles. Export duties were also introduced under Ordinance No. 5 of 1915 and imposed on sugar, cocoa, lime juice and extracts therefrom, pimento, and hardwood; these duties realising £2,857 17*s.* 3*d.* Import duties totalled £35,326 8*s.* 9*d.*, the highest figure touched since the record year 1911–12 when the sum of £35,781 13*s.* 7*d.* was realised for this item. The increased shipping business resulting from the temporary closing of the Panama Canal was reflected in the receipts for port and harbour dues (Head 2) which exceeded estimates by £2,225. Excise duty also gave better results for the year and passed anticipations by the substantial sum of £1,682 13*s.* 11*d.* Stamp duties contributed £290 1*s.* 9*d.* towards excesses over estimates. Income tax, underestimated at £1,650, gave £2,008 3*s.* 2*d.* Under head 4 there were unexpectedly large receipts for hospital fees from

members of the military garrison which mainly account for an excess of £236. Postal revenue fell short of anticipation by £314—a result due to decreased sales of stamps to stamp dealers, but there was a small excess as compared with the previous year. Land sales improved, giving a total of £887, the best result since 1909–10, and £437 more than anticipated."

Expenditure.

"The local expenditure for the year was £73,956 19*s.* 9*d.*, exceeding the estimates by £8,962 13*s.* 6*d.*, and being more than in the previous year by £5,441 15*s.* 7*d.*; this may be said to be mainly due to the effect of the War, which is indicated in the large disbursements occurring under the head Miscellaneous. Considerable savings, aggregating £2,069, were effected under the majority of expenditure heads. It will be seen by the following items occurring under head 20, Miscellaneous, that the War, was responsible for the greater portion of the excess of £9,901 as compared with estimates, although the £2,000 for the gift of cocoa covers expenditure incurred and properly belonging to the former year and not included in the original estimates for the year under report. The item of £985 16*s.* 2*d.* adjusts an error in the accounting operations also relating to the previous year.

"Miscellaneous expenditure not included in original estimates :—

	£	*s.*	*d.*
Gift of cocoa to His Majesty's Forces ..	2,000	0	0
Expenses of Overseas Contingent	3,719	18	11
Mobilisation, &c., Local Forces	2,028	12	3
Allowance to Military in lieu of exemption from import duties	706	9	11
Loss on Sale of Stock	985	16	2
	£9,440	17	3

Heavy rains at the end of September caused much damage to main roads and by-ways and called for additional expenditure under Public Works Recurrent."

The Auditor further reports :—

"At the 31st March, 1916, the surplus assets of the Colony stood at £12,565 7*s.* 9*d.*, a reduction of £1,314 5*s.* 7*d.* during the year, but when it is considered that larger sums of abnormal expenditure, due to the War conditions which unfortunately existed throughout the year and still continue, were incurred, the position is far from being unsatisfactory, and equilibrium between normal revenue and expenditure has been re-established with a safe margin for the future. The revenue was the largest yet recorded and the expenditure has been charged with large advances, part of which were incurred in the former year and are unlikely to recur to a similar extent in the future. Altogether the year has been one of sound financial recovery from the apparently hopeless position recorded at the close of the former financial period."

The revenue derived from licences for the sale of liquor was £1,733 12*s.* 6*d.*, and the number of such licences issued during the year was 229.

Public Debt.

The public debt at the close of the year stood at £155,879 11*s.* 0*d.*, as against £138,030 in 1914–15. This increase is due to the issue of £20,000 local debentures during the year raised under Ordinance No. 19 of 1915 for extension and improvement of roads in the Colony. Debentures amounting to £2,150 were redeemed in the year under report. The accumulated sinking funds towards the redemption of the public debt stood at £25,453 6*s.* 4*d.* at the close of the year under review.

Currency.

The currency consists of British and American gold, notes of the local branch of the Colonial Bank, and British silver and copper coins. Accounts are kept in sterling by the Government, and in dollars and cents. by the bank and most of the mercantile firms, the dollar being equal to 4*s.* 2*d.* The War has had no effect on the currency.

Municipalities.

The management of the affairs of Castries, the chief town in the Colony, is vested in a Board elected by the ratepayers. The small towns and villages of the Colony are controlled by wardens appointed by the Governor in Council. In the case, however, of the towns of Soufrière and Vieux Fort and the village of Dennery, "Improvement Committees" have been appointed to advise generally on matters relating to those places.

The revenue of the towns and villages consists, principally, in Castries, of receipts from the house tax, water rates and dues, market dues, and licences, and in the other towns and villages of receipts from house tax, supplemented in the case of Soufrière by water rates and dues.

II.—TRADE, AGRICULTURE AND INDUSTRIES.

Imports.

The total value of the imports amounted to £265,932 18*s.* 6*d.*, and was £40,219 less than in the calendar year 1914.

Exports.

The total value of the exports amounted to £401,915 14*s.* 10*d.*, of which £153,540 12*s.* 8*d.* represented the value of the produce of the Colony, £235,992 10*s.* 0*d.* bunker coal, £2,586 5*s.* 10*d.* ships' stores, and £9,796 6*s.* 4*d.* other exports.

The exports for 1915 exceeded the previous year by £160,493. Of this sum £53,883 represents an increase in the value of the produce and manufacture of the Colony; the value of bunker coal increased from £128,638 in 1914 to £235,992 in 1915.

Reciprocity Agreement with Canada.

The following are the imports under the general and preferential tariffs from the United Kingdom, Canada, Newfoundland, and British Possessions, with the loss of revenue under the preferential tariff :—

	Under General Tariff.	Under Preferential Tariff.	Total.	Loss of revenue under Preferential Tariff.
	£	£	£	£
United Kingdom ..	66,482	6,244	72,726	155
Canada	1,566	18,919	20,485	470
Newfoundland ..	243	2,846	3,089	38
British Possessions ..	2,633	1,941	4,574	29
	£70,924	£29,950	£100,874	£692

The Preferential Agreement was extended to British Possessions, parties to the Agreement, in December, 1914. The loss of Revenue for the year was £692, as against £711 in 1914.

Of the total imports of flour in 1915, amounting to £17,191, £8,585 came from Canada as against £8,097 in 1914. It will thus be seen that the importations of this article from the United States of America and Canada in 1915 were about equal, which signifies a development of trade in favour of Canada, which in 1914 supplied us with two-fifths of the total as against three-fifths by the United States.

The total value of imports from Canada for the last two years is appended :—

	£
1914	17,892
1915	20,485

There was a falling off of £7,450 in the value of the exports to Canada, due to non-shipment thereto during the year by the Cul-de-Sac Company of any portion of their sugar. The Company sold their crop in the United Kingdom, where better prices obtained, and so made no shipment to Canada.

Coaling Trade.

The coaling trade did not do as well in 1915 as in the two years previous to the War, and this was due to a falling off, owing to the War, in the number of steamers that called for coal.

	Tons.	£
1912	134,783	166,312
1913	117,532	141,038
1914	95,893	128,639
1915	90,939	96,445

Mines, Manufactures and Fisheries.

There are no mines in the Colony. Apart from the fish caught and consumed locally, fisheries are confined to spasmodic catches of turtle both shell and green, but chiefly the latter.

The sugar factories at Cul-de-Sac, Roseau, Vieux-Fort, and Dennery were all working during the year.

The Government Lime Juice Factory has continued its operations with increasing success. During the year under review the factory has been placed on a business basis and the management has been transferred to an Advisory Committee subject to direction by the Administrator. It was also decided to double the manufacturing capacity of the factory and for this purpose the Government loaned to the management £700 on the security of the buildings and plant. On account of the War there has been considerable delay in procuring the necessary machinery, and for this reason at the time of writing the enlargements have not been completed.

A bay oil factory capable of dealing with a large quantity of oil per annum has been established by private enterprise. It is anticipated that this will expand into a bay rum industry of appreciable dimensions. As bay trees are numerous in the Island and rum is also manufactured locally, the two main ingredients for the manufacture of bay rum will be procurable on the spot, and this should enable successful competition with any other place producing the same article from imported ingredients.

There are two rum distilleries in the Island at Cul-de-Sac on the Leeward, and Troumassee on the Windward coast.

Agricultural Industries.

Lime cultivation is making rapid progress and the value of the lime-juice exported during the year 1915 (£7,312) exceeded that for the preceding year by £1,740.

The value of the export (the only available indication of the production) of cocoa in 1915 was £51,495, as compared with £38,846; the amount exported (10,347 bags) was more by 2,377 bags than the export in the preceding year. The value of sugar exported in 1915 was £89,466, as compared with £46,279 in 1914.

A small quantity of cotton was again produced in the Choiseul district. The export figures were 3,200 pounds of lint, valued at £160, and 80 cwt. of seed, valued at £23. This is an industry which will not repay attention in this Colony.

The planting of coconuts is increasing. The quantity shipped was 67,206 nuts, valued at £204; and 137 cwt. of copra, valued at £121, also figures among the exports.

The year was a better one for honey, the exportation being valued at £401, which is £131 more than in the previous year.

Considerable activity on the part of the Agricultural Department and better prices for produce brought about by the war have proved a great incentive to local agriculture. Throughout the Colony increasing interest is being evinced and more intelligent and more modern methods are gradually but surely being introduced. Fresh lands are being opened up, especially for lime cultivation; whilst the growth of ground provisions is being stimulated, every effort is being

put forth by the Government to assist planters and peasants. A road scheme has been launched which, amongst other road improvements, will connect the capital town of Castries with Dennery on the Windward coast by a good motoring road.

Under the terms of Ordinance No. 14 of 1915, the machinery was created for inaugurating Agricultural Credit Societies in the Colony for providing members with financial assistance for agricultural purposes under the Raiffeisen system, the Registrar of the Royal Court being appointed the Registrar of the Societies under the Ordinance.

Land Grants.

Forty-eight Crown Grants were issued during the year, the acreage disposed of being 669 acres, as compared with 290 acres in 1914–15. The price of Crown land is at the rate of £1 per acre up to 50 acres and 10*s*. per acre for each acre above that number, and is payable one-fifth on application, and the balance in four annual instalments. The applications for the purchase of land numbered 62 in respect of 1,249 acres. During the year regulations were passed by the Government dealing specially with land settlement of persons possessing capital of £2,000 to £3,000, who have served with His Majesty's Oversea Forces or come from without the Colony.

Shipping.

The following figures give the number and tonnage of steam vessels entered and cleared during the last four years :—

	Number.	Tons.
1912	1,699	3,475,413
1913	1,670	3,528,539
1914	1,482	3,176,747
1915	1,103	2,373,709

In 1915, 573 sailing vessels, aggregating 18,763 tons, entered and cleared.

Owing to conditions due to the War, there has been a cessation of the large trade hitherto carried on with South American ports, and the falling off in tonnage was to be expected under the circumstances. Trade revived somewhat in the latter part of the year as a result of the silting up and consequent closing of the Panama Canal, which caused the diversion to St. Lucia of many steamers that otherwise would have gone through the Canal.

Of 551 steamers that entered the port during the year, 383 bunkered and took 94,397 tons of coal. These figures do not include coal taken by warships.

Public Works.

A fairly comprehensive scheme for road construction was adopted by the Legislative Council and a loan of £20,000 was floated locally to provide for its cost.

The work on improving the roads between Castries and Dennery was begun so as to establish a main artery for traffic.

Work was begun in connection with the extension of Choiseul village.

The waterworks for Dennery Village were completed and formally opened by the Administrator on the 25th June, 1915.

III.—EDUCATION.

The following figures are furnished in the annual report of the Inspector of Schools :—

	1914.	1915.
Number of Schools	52	52
,, on rolls	7,493	7,359
Average attendance	5,319	4,970
Number examined	6,439	6,438
Government Grant in Aid ..	£3,985	£3,988

Of the 52 schools 45 are Roman Catholic, 4 Anglican, 2 Wesleyan, and 1 East Indian Mission.

The grant-in-aid of primary education was, in 1915, the same as in previous years, £4,000. Of this sum the amount expended was (*a*) on teachers' salaries, £3,929 ; (*b*) on the salary of the Education Officer, £54 ; (*c*) special grants for purchase of garden tools, £5 ; making a total of £3,988.

Of the two schools of secondary education, St. Mary's College, for boys, receiving a Government grant of £400 per annum, had an average attendance of 63 ; St. Joseph's Convent School, for girls, receiving a Government grant of £150, had an average attendance of 107.

During 1915, 208 cases were brought before the Magistrate of the 1st and 2nd Districts under the Primary Education Ordinance, 1913, for non-attendance at school. Convictions were made in 46 instances, the remaining cases being withdrawn by order of the Court with a warning to the parents to send their children to school more regularly.

IV.—GOVERNMENT INSTITUTIONS.

Hospitals, &c.

The Victoria Hospital at Castries is the one general hospital for the Colony. The daily average number of patients was 70 ; the expenditure on the institution amounted to £2,038. A scheme for the construction of a wing for private paying patients has now been approved and commenced.

The Lunatic Asylum, situated at La Toc, near the entrance of the harbour, is a good stone building capable of accommodating 80 to 100 patients. It is managed by the house surgeon of the Victoria Hospital. The daily average number of patients was 76. The expenditure amounted to £1,271.

Small buildings are provided in the out-districts at Soufrière, Dennery, and Vieux Fort, which are used as casualty hospitals for accident and emergency cases.

The General Poor Asylum is at Malgretoute, on the sea beach within a mile of the town of Soufrière, and the daily average number of inmates during the year was 68·7. The expenditure amounted to £930. This provision for paupers is supplemented by an out-door relief system under the supervision of the Police Department.

During the year an old military building adjacent to the Lunatic Asylum has been converted into an alms house capable of housing nine persons.

The Yaws Hospital is in the vicinity of the Poor Asylum. There was a daily average number of patients of 43·2, and the expenditure for upkeep amounted to £585. The voluntary influx of patients for treatment with the drug "Arseno-benzol" continued unabated during the year, and 443 cases were treated. The Medical Officer in Charge, Dr. A. F. Hughes, reports that up to the time of his report he had treated 1,188 cases, and that out of this number there had been 63 cases of recurrence of the disease. In this latter connexion, the medical officer refers to the difficulty of his distinguishing between *bona fide* recurrences and cases of re-infection.

There are visiting stations at various points where medical officers attend regularly on fixed days for the treatment of out-door cases of sickness.

There is a public library in Castries towards which the Government gives a grant of £150 per annum, and which receives from the municipality a contribution of £25 per annum. In Soufrière there is also a small library to which the Government grants £20 a year, and a modest institution of the same kind in Dennery also receives Government aid to the extent of £5 a year. At the date of writing a small library has been opened in Vieux Fort, supplemented by a grant of £5 from town funds.

Savings Bank.

The amount to the credit of depositors at the close of the year showed a slight decrease; the amount remaining on deposit on 31st December being £21,993 as compared with £22,461 in 1914.

The investments in England on account of the bank stood at the 31st March, 1916 at £15,916.

V.—JUDICIAL STATISTICS.

Police.—In addition to the ordinary police work, the police force carries out a considerable number of duties in connection with the details of administration, such as the enforcement of sanitary regulations, distribution of poor and medical relief, registration of births and deaths, and in certain districts is in charge of the post offices and telephone exchanges. The total expenditure on the department was £4,052.

Prisons.—The number of persons committed to the Royal gaol in 1915 was 518. The daily average number in confinement was 39·35 as compared with 34·43 in 1914.

The health of the institution was highly satisfactory, the average number on the sick list being only 0·46, the lowest on record.

The expenditure on the establishment was £1,062, approximately the same as last year. The total estimated value of prison labour is stated to be £402.

Criminal Statistics.—The statistics for the year present no prominent feature calling for special comment.

VI.—VITAL STATISTICS.

Population.—The Registrar of Civil Status estimates the population at the 31st March, 1916, to have been 52,282—24,115 males, and 28,167 females; the population at the same date in 1915 was estimated at 51,590. The figures, however, do not take account of either emigration or immigration, and are based solely on the natural increase, the census figure of 1911 being taken as the starting point.

The birth-rate of the Colony (excluding still-births) was 33 per thousand of the population, being 33.9 in 1914–15. The births numbered 1,821. The death-rate was 19·7 per thousand, while in the previous year it stood at 18·7 per thousand. The number of deaths was 1,129. There were two deaths from snake-bite, and one from scorpion bite.

Marriages numbered 217, a decrease of 8 as compared with 1914–15.

Public Health and Sanitation.—All the medical officers report the health conditions of the year to have been favourable, and there is, generally, nothing in the reports calling for special mention.

The campaign against rats was systematically carried out during eleven months of the year, 2,022 rodents being captured. A staff of labourers, under a special sanitary officer, was employed on this work, and their services were also utilised for cleaning streams and drains and on other sanitary measures around Port Castries; some useful anti-mosquito work was also accomplished. The use of "millions" fish was continued in practicable places, but, as a good part of the year was unusually dry, their usefulness was somewhat diminished. In the out-districts, yards and premises were frequently inspected by the police, and the Chief of Police states that there were 78 convictions for offences against the sanitary regulations, as against 29 in 1914–15.

During the year the hookworm campaign, inaugurated at the expense of the International Health Commission, continued its work under the direction of Dr. Stanley Branch, a local District Medical Officer seconded for this purpose. The Colony is much indebted to the Commission for providing the necessary means to combat this devastating disease so deleterious to the health and efficiency of the labouring classes. Side by side with this campaign, the Government is adopting measures for the improvement of the sanitary conditions in the Colony generally.

Climate.—The average annual rainfall for the Island, recorded at 33 stations, was 95·16 inches; it was 64·88 inches in 1914. The highest recorded rainfall was at Uplyme, with 148.09 inches, and the lowest was at Black Bay estate, in the Vieux Fort district, with 68·67 inches. The year was the wettest recorded for the last twenty years.

VII.—POSTAL AND TELEPHONE SERVICES.

The fortnightly intercolonial mail service performed under contract by the Royal Mail Steam Packet Company's steamers was terminated at the end of 1915. The steamers of the Compagnie Generale Transatlantique (which touch at Castries going and coming *en route* between French Guiana and the northern French Colonies) paid their usual visits, as did the vessels of the Quebec line (which call on their passage to and from New York). The Royal Mail Steam Packet Company's service, under contract with the Canadian Government, between Canada and the West Indies, commenced in November, 1913, and has been regularly carried out from that date. This service provides for a fortnightly call at St. Lucia of the steamers going to and from Canada.

The total revenue of the Post Office was £1,154, and the total expenditure £2,145.

The principal postal statistics for the last two years are as follows:—

	1914–15.	1915–16.
Letters and Postcards:—		
Sent	91,062	94,494
Received	93,954	95,761
Inland: Sent and received ..	82,766	85,269
Parcels despatched	430	649
,, received	2,637	3,082

There is a regular and daily postal communication under local contract between Castries and the leeward coast towns and villages, the service being carried out by the Royal Mail Company's coasting steamer. On the windward side of the island communication by post is overland and is made twice a week only.

All towns and villages in the Island are connected by telephone with Castries. There were 238 miles of line in operation during the year, and the subscribers numbered 162 at the end of the year. The number of messages delivered was 92, and 568 threepenny tickets were sold to non-subscribers using public telephones. The revenue amounted to £993, and the expenditure to £370.

VIII.—GENERAL.

St. Lucia has escaped much of the distress, sufferings, and hardships of this War period. Although food is dear and sometimes difficult to procure, work is plentiful and always obtainable by the honest labourer.

The Colony's financial position is sound and there is an appreciable balance in the Treasury. The prices of agricultural products are booming, though freight rates are high. The Colony is evincing her gratitude for these benefits by considerable private contributions to War charities. Contingents have been raised locally at the Colony's expense for overseas service. In every way open to them the people of St. Lucia are loyally and patriotically doing their best to assist the Empire in the great crisis that has arisen.

GIDEON MURRAY,

Administrator.

Government House,
St. Lucia,
8th December, 1916.

GRENADA.

(For Report for 1915–16 see No. 906.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Grenada,
Windward Islands,
29th August, 1917.

SIR,

I have the honour to transmit the annual report on the Blue Book of this Colony for the year 1916–17.

I have, &c.,

G. B. HADDON-SMITH,
Governor.

The Right Honourable
Walter H. Long, M.P.,
&c., &c., &c.

(C412) Wt.47019/1099. 1,000 & 90. 11.17. B.& F.Ltd. Gp.11/2.

REPORT ON THE GRENADA BLUE BOOK FOR 1916–1917.

I.—FINANCIAL.

Revenue.

The revenue for the year ended 31st March, 1917, amounting to £112,759 is by far the highest yet recorded. It is the first time it has exceeded £100,000.

2. The increase is mainly attributable to improved returns from Customs duties, the revenue of £46,842 from imports having exceeded the estimate by £6,242. Export duties brought in £14,382, of which £5,339 was on account of the War Tax on cocoa. Excise duties and internal revenue, owing chiefly to an increase in duty of 6*d.* per proof gallon on rum, produced £33,574, the increase over the estimate being £5,129.

3. The improvement in Customs receipts and Excise is an indication of better trade and prosperous financial conditions, a result which was expected from the record cocoa crop and good markets of the preceding year. It is generally in the year subsequent to that of a good cocoa crop that any effect appears on the revenue returns, and the year just ended has been no exception to the rule. War conditions do not seem to have prejudicially affected the inclinations of the community towards a higher standard of living with its accompanying expenditure on luxuries, from which the revenue has correspondingly benefited.

4. It was expected that an overdue collection of estate duty estimated to amount to over £8,000 would have been received in the past year, but the sum has not yet been paid.

Expenditure.

5. The expenditure, amounting to £106,603, exceeds the record expenditure of last year. It includes a sum of £11,641 expended on the maintenance throughout almost the whole of the financial year of the third contingent, together with the cost of separation allowances and other expenses incidental to the drafts that had already left the Colony.

6. The revenue and expenditure in the last two years have been as follows :—

	Revenue.	*Expenditure.*
1915–16	£96,420	£103,992
1916–17	112,759	106,603

Financial Position.

7. The surplus assets at 31st March, 1917, amounted to £60,628, having been augmented during the year by £6,156.

The Public Debt at the same date was £123,670, the amount being unchanged. The accumulated sinking fund for its redemption amounted at 31st March, 1917, to £42,984, as against £40,230 at the same date in 1916, £1,237 having been contributed from general revenue and £1,517 being the interest on the invested sinking fund.

Finances of District Boards.

8. The revenue and expenditure of the six district Boards of Grenada in the financial year ended 31st March, 1917, were as follows :

	Revenue.	Expenditure.
	£	£
St. George's	4,278	4,171
St. Andrew's	2,950	3,099
St. Patrick's	2,201	2,513
St. John's	1,632	1,666
St. Mark's	963	690
St. David's	921	921

The total loan debts of the Boards at the same date were £24,610. These loans are being repaid either by sinking funds or by annual instalments towards redemption.

CURRENCY.

9. Gold, silver, and bronze coins are in circulation, and are legal tender to any amount. Gold is extremely scarce; notes of five dollars denomination and silver are the mainstay of monetary exchange in the Colony.

There are two banks established in the Colony, the Colonial Bank and the Royal Bank of Canada.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS.

10. The total value of imports during 1916 was £343,437, an increase of £82,942, or over twenty-four per cent. as compared with 1915.

11. The principal increases were in articles of apparel and imported foodstuffs. Cotton piece goods and cotton manufactures increased by £15,678, apparel by £2,036, and boots and shoes by £2,100. Imported foodstuffs increased in the case of butter by £1,016; biscuits, bread, and cakes by £831; confectionery, by £736; salted meat, by £2,370; salt fish, by £3,074; and flour, by £5,670; all these representing increased quantities as well as increased values. Imports of articles that may be classed as luxuries also increased, such as beer and ale by £1,091 (from 9,770 gallons to 15,127 gallons); wine, by £1,056 (from 5,570 gallons to 7,877 gallons); and motor cars, by £2,413, or including parts, £3,853. As previously remarked, these increases are indicative of an increase in the standard of living.

12. The origin of imports and percentage of total trade during the last two years were as follows:—

	191		1916	
	Value.	Percentage.	Value.	Percentage
	£		£	
Total	260,495	—	343,437	—
United Kingdom.. ..	90,436	35	120,880	35
British Colonies	71,161	27	79,034	23
Foreign Countries ..	98,897	38	143,522	42
United States (alone) ..	86,632	33	128,882	37
Canada (alone)	26,987	10	27,697	8

13. The exports amounted in value to £534,233. Compared with the previous year the main products exported were as follows:—

	1915.	1916.
	£	£
Cocoa	402,394	449,944
Spices:		
Nutmegs	25,319	31,947
Other kinds (principally mace)	17,122	17,145
Cotton	8,490	14,543
Cotton seed	1,979	1,545

14. The destination of the exports and the percentage to total exports are shown in the following statement:—

	1915		1916	
	Value.	Percentage.	Value.	Percentage.
	£		£	
Total	466,318	—	534,233	—
United Kingdom ..	300,923	64	347,280	65
British Colonies . ..	11,995	3	19,953	4
Foreign Countries ..	153,400	33	166,999	31
United States (alone) ..	153,235	33	166,706	31
Canada (alone)	3,681	·7	11,517	2

Total Trade.

15. The total trade, represented by combined imports and exports, during 1916 amounted to £877,670, as compared with £726,813 in 1915.

Agriculture.

16. *Cocoa.* The crop exported in the last completed crop year ended 30th September, 1916, amounted to 80,034 bags of 180 lbs. each, a record which exceeds by 6,171 bags the highest previously recorded. This quantity is equivalent to 128,626 cwts. or 14,406,120 lbs.

17. Thrips disease was reported as being very prevalent towards the end of 1916, and several planters complained of serious loss of crops. Steps are being taken to prevent the spread of the disease. In view of the reported loss from thrips, the returns of the current crop are somewhat astonishing, as there is every indication that the present year's crop will be the second highest on record, and will approach very closely the record of last year. It is probable that the total crop will not fall short of 77,000 bags.

18. The value of cocoa exported in the calendar year 1916 was £449,944, equal to 84 per cent. of the total exports of the Colony.

19. *Spices.*—Nutmegs and its by-product mace are the principal spice products exported. There has been a steady upward tendency in production for the past six years. Last year's crop was very satisfactory, amounting to 1,940,965 lbs. and good prices were realised.

20. The value of spice exports in 1916 was £49,092, representing nine per cent. of the total exports.

21. Cocoa and spices together account for 93 per cent. of the total value of the Colony's exports.

22. *Limes.* A large increase in production took place during the past year. The progress made by this recently introduced industry may be seen from the following statement of crops, expressed in terms of barrels of fruit.

	Barrels of fruit.
1914	2,684
1915	8,396
1916	27,265

23. The exports in 1916 were 150,525 gallons of raw juice and 7,500 of concentrated juice, of a total value of £14,486.

24. *Cotton.*—The crop produced was less than in 1915, being 3,116 cwts., as against 3,293, but owing to high market prices the value rose to £14,543 from £8,490 in the previous year.

25. The value of the cotton-seed exported was £1,545, as compared with £1,979 in 1915.

26. *Subsidiary crops.*—Sugar-cane cultivation, despite high sugar prices, shows little sign of extension, and there is not enough grown to meet local consumption. The position may be realised by the fact that muscovado sugar amounting to 1,278,338 lbs. in weight and £11,021 in value was imported last year, principally from Barbados, Trinidad, and St. Vincent. Encouragement has been steadily given by various means to the production of foodcrops known generally as ground provisions, but although there is a large peasant and agricultural labourer class there is less produced than is required. Imports from Barbados and St. Vincent supply the deficiency. A stirring campaign that has recently been inaugurated should have the effect of greatly increasing the output in the coming year.

INDUSTRIES.

27. Rum is manufactured at fourteen distilleries. The quantity produced in 1916 was 62,992 proof gallons. No rum is exported, as the local consumption is sufficient to meet all that can be produced.

28. An ice factory is established in St. George's, and, under subsidy by the Government, maintains a constant supply of ice in each parish of the island and Carriacou, for sale at moderate prices.

SHIPPING.

29. The tonnage of vessels entered at Grenada during the last three years was as follows :—

1914	689,120
1915	425,188
1916	361,302

The steamer tonnage included in the above in 1916 amounted to 351,388. Steamers calling at Grenada seldom remain longer than a day or two, so that for all practical purposes the tonnage of vessels entered may be taken as the tonnage cleared.

III.—EDUCATION.

Primary.

30. Two new schools were placed on the list of grant-in-aid schools at the end of the financial year, and these, together with Government schools (the latter supported entirely from Colonial revenue) now number fifty-nine. Roughly speaking, there is now a school for every two square miles of the Colony.

31. The grant-in-aid of primary education was £6,573, as compared with £7,229 in 1915–1916.

32. The denominational schools are divided as follows:—Roman Catholic, 27; Anglican, 14; Wesleyan, 5; Church of Scotland, 2. The remaining 11 primary schools are under direct Government control.

33. The number on the rolls and average attendance at all schools were 11,755 and 6,488 respectively.

Secondary.

34. The Grenada boys' school, established by Government as a secondary school five years ago, was under the charge during that time of Mr. D. Hedog Jones, M.A., who resigned in July last on the expiration of his engagement. He was succeeded in January by Mr. H. W. McCowan, M.A., under whose control the school is well maintaining its position. Seventy-three pupils were on the roll at 31st March, 1917, as compared with 68 a year earlier.

35. The Girls' School was brought to a close during the year, as the small number of pupils, owing to the existence of other well managed girls' schools, rendered its continuance unjustifiable. On its cessation an Anglican Girls' High School was started under assistance of a grant of £150 from the Government.

36. The St. Joseph's Convent School receives a similar grant, and has a roll of 72.

IV.—GOVERNMENT INSTITUTIONS.

(a) Hospitals.

37. The Colony Hospital in St. George's has 140 beds; 1,855 patients were treated during the year, and the daily average in hospital was 120. Attached to the hospital are a private ward and a maternity ward. There were 18 admissions to the former and 118 to the latter.

38. There are district hospitals in St. Andrew's parish, and in the island of Carriacou, containing 12 and 24 beds respectively.

39. The Yaws Hospital in St. George's has accommodation for 70 patients. 318 cases were treated as against 663 during the previous year. Despite the lower number received into hospital, there is no evidence, according to the Colonial Surgeon's report, that the number of cases of yaws in the districts is decreasing. Other causes, such as difficulty of transport, have contributed to the decline in numbers at the Yaws Hospital.

40. A hospital for consumptives, opened in 1913, provides 20 beds, and occupies a favourable site on a hill about 600 feet above sea level. Thirty-nine patients were treated during the year, of whom six were discharged, and thirteen remained at the end of the year.

(b) Asylums.

41. The Lunatic Asylum, with 120 beds, accommodates patients from St. Vincent as well as Grenada. The number remaining at the end of the year was 112, of whom 15 belonged to St. Vincent.

42. The Poor Asylum provides for fifty-eight persons, thirty-eight male and twenty females. The great majority of the inmates are advanced in age.

(c) Government Dispensaries.

43. A new Government Dispensary was opened in St. David's at the end of the financial year, and with the exception of St. John's—where there is a subsidised dispensary—Government dispensaries are now established in each parish of the Colony and in Carriacou. They supply medicine free of cost to certain people, and at a reduced rate of payment to the labouring class.

(d) Ankylostomiasis Campaign.

44. The operations against hookworm disease have been conducted by the International Health Board since 1914, and about half of the Colony has been overtaken in that period. During the last year 7,218 persons were examined, of whom 5,449 or 75 per cent. were found to be infected. The cures numbered 1,661, a rate of 28·6 per cent.

45. Dr. Angus Macdonald, the former medical officer in charge, resigned in August, and was succeeded by Dr. Howard S. Colwell. Improvement in sanitation, which is necessary to prevent areas from becoming reinfected, is proceeding slowly, and there are now signs of re-awakened interest on the part of the Local Sanitary Authorities, in whose hands the effective administration of sanitary matters really rests.

(e) Savings Banks.

46. The number of Savings Bank depositors decreased during the year from 1517 to 1,483, the latter being the number on the register at 31st December, 1916.

47. The amounts deposited during the year were less than the withdrawals, and the sum standing at the credit of depositors was reduced from £20,423 to £19,613.

V.—JUDICIAL STATISTICS.

(a) Police.

48. There has been no change in the personnel of the Police Force.

(b) Prisons.

49. A large decrease in the number of admissions took place during last year, the admissions being 255 as against 480 in the previous year, or 46·8 per cent. decrease. There was, however, little difference in the case of juveniles, of whom 16 were admitted as compared with 19 in the year 1915.

50. The number of convictions per thousand of the population was 2·8, the lowest rate that has been recorded for several years.

51. The daily average in prison was 44; owing to the fixed establishment charges having to be distributed over a smaller number of inmates, the annual cost per prisoner rose from £32 3*s.* 5*d.* in 1915 to £40 2*s.* 7*d.* The total cost, however, was £1,765, or £132 less than in 1915.

52. The prison is healthily situated at a fair altitude above sea level. The discipline maintained was entirely satisfactory.

(*c*) Criminal Statistics.

53. There was a marked decrease in the number of summary convictions in the year under review, 1,786 as against 2,221 in the previous year. Praedial larceny convictions showed the same substantial decrease, being 153 as compared with 283.

54. In the Supreme Court 37 persons were tried, as against an average of 33 for the three previous years, and 31 in 1915. The convictions numbered 24. There was one case of murder, in which the defendant was found guilty and executed in due course.

VI.—VITAL STATISTICS.

55. The population of the Colony, as estimated at 31st December, 1916, was 73,056.

56. Births during the year numbered 2,602 (1,298 boys, 1,304 girls), the birth rate being 35·60.

57. The deaths were 1,280, giving a death-rate of 17·50 per thousand. This is the lowest rate for the Colony on record. The rate varied in the different registration districts, ranging from 20·8 down to 9·7. The latter rate is that of the dependency of Carriacou, which in the previous year had a death-rate of only 9·0. The average death-rate in Carriacou for the past sixteen years has been 13·1.

58. Excepting enteritis-diarrhoea, which exacts a great toll on infant life, malaria was the cause of the greatest number of deaths, although there were fewer fatalities from this disease (103) than in the previous year (147). The medical reports state that the detachment of the West Indian Contingent stationed at Quarantine Station suffered considerably from this complaint during the months of the wet season.

Meteorological Observations.

59. The mean minimum shade temperature at Richmond Hill Station (St. George's) was 73·5, and the mean maximum 84·5. The highest temperature in the shade was 91·0 on August 28th, and the minimum 70·0 on several dates.

60. The rainfall during the year at this station was 66·96 inches.

VII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

(*a*) Postal.

61. British and foreign mails are conveyed by the Canada-West Indies Service (fortnightly), the Trinidad Shipping Company, trading between New York, Grenada, and Trinidad (at frequent but irregular intervals), and by the Scrutton line from Great Britain (monthly).

Occasionally overseas mails are brought from Barbados by sloop or schooner.

62. Mails are conveyed to the districts by local coasting steamer and by a motor car mail service.

63. The postal business transacted is shown in the following statement:—

	1915.	1916.
Letters and postcards	558,537	505,934
Newspapers, books, etc.	210,582	206,973
Parcels	7,938	9,880
Registered and insured letters ..	10,858	12,214
Money Orders issued	..	£14,032
do. paid	..	£10,102
Revenue	£1,576	2,058
Expenditure	£3,150	1,954

(*b*) Telegraphs.

64. Cable communication is maintained by the lines of the West India and Panama Telegraph Company, which receives a subsidy from the Government of £600 annually. A daily bulletin of press news is issued by the Company. There are no inland telegraphs.

(*c*) Telephones.

65. The telephone service, established more than a quarter of a century ago, has an extensive system throughout all the Colony. There are five district exchanges. A moderate annual rental entitles the subscriber to free calls to any part, there being no trunk line fees. The mileage of trunk lines is 159, and there are about 664 miles of subscribers' lines.

VIII.—GENERAL.

66. In spite of the dislocation of trade by the War, Grenada has not been adversely affected to any appreciable extent, and is practically in a stronger financial and economic position than ever before. In the past calendar year the total trade of the Colony, represented by the combined imports and exports, reached a figure greatly in excess of anything previously recorded, and registered a thirty-five per cent. increase over the trade in the year immediately preceding the war. The succeeding months of the financial year saw this condition of things maintained, and the fiscal period, although the expenditure was extraordinarily and unexpectedly large, ended with a surplus of revenue.

67. The extent to which the Colony is dependent on imported foodstuffs, owing to so much of the land being under permanent cultivation—such as cocoa, nutmegs, and limes—has been drawn attention to in past reports. Any extensive development of this feature, which without exaggeration may be stated to have already reached an acute stage and which is receiving the attention of the Government, will injuriously affect the condition of the general community, by restricting the natural source of their food supply.

The problem of the future will be to preserve the balance between an increase of cultivation under permanent crops for export, and preservation of sufficient suitable land for local food crops and meat and milk supplies.

68. A further draft was despatched during the year to the British West Indies Regiment. Most of the last draft had, from unavoidable causes, been maintained in camp for nearly a year, entailing unforeseen expenditure amounting to over £10,000, a relatively heavy item in proportion to the Colony's revenue. By a resolution of the Legislative Council the Colony has accepted liability for allowances, gratuities, and pensions in respect of its recruits up to a maximum of £2,700 annually. In addition to these Government measures in aid of the mother country, the public have subscribed generously to various patriotic funds, especially that of the Red Cross Society, to which a sum of over £3,000 in private subscriptions was remitted during the year. There is no reason to doubt that Grenada will respond readily to any further demands that may be made on her patriotism and loyalty.

HERBERT FERGUSON,

Colonial Secretary.

Grenada,

28th August, 1917.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title-page :—

ANNUAL.

No.	Colony, &c.	Year.

No. 953.

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1916–17.

I.—FINANCIAL.

General Revenue and Expenditure.

1. The financial position of the Colony on the 31st of March, 1917, was :—

Deficit at 1st April, 1916		£184 5 3
Expenditure in 1916–17 ..	£34,844 3 7	
Revenue in 1916–17	34,669 3 7	
		175 0 0
Deficit at 31st March, 1917		£359 5 3

2. These figures are exclusive of £1,289 10*s.* 4*d.* from the funds of the Rockefeller International Health Board expended for the purposes of a campaign against the ankylostomiasis, or hookworm, disease; and also of the sum of £5 5*s.* 6*d.* spent by the Agricultural Department from Imperial funds.

3. The total revenue and expenditure from all sources in the last two financial years were :—

	Revenue.	Expenditure.
1915–16	£34,844 ..	£35,783
1916–17	35,242 ..	36,139

4. The net local revenue and expenditure in the same two years were :—

	Local Revenue.	Expenditure against Local Revenue.
1915–16	£30,415 ..	£33,499
1916–17	32,444 ..	32,437

5. The principal items of revenue in the last two years were :—

Customs—	1915–16.	1916–17.
Import duties	£12,187 ..	£12,810
Export duties	1,133 ..	1,094
Excise duty on rum	3,933 ..	5,122
Land and House Tax.. ..	3,228 ..	3,185
Income Tax	730 ..	702

6. In respect to four of these items, exclusive of excise duty, the total amount received was less than the estimate by £1,108 18*s.* 5*d.*, and more by £512 13*s.* 5*d.*, than the amount collected in 1915-16. Revenue was obtained for the first time from the exportation of animals, in consequence of the passing of the Export Duties (Animals) Ordinance, No. 2 of 1916, which came into force on the 21st March, 1916.

(C439) Wt. 11/42. 1,000 & 90. 2.18. B.&F.Ltd.. G.11/2.

7. The amount of excise duty on rum received in 1916–17 was £122 2*s.* 5*d.* more than the estimate, and it was £1,188 16*s.* 11*d.* more than was received in 1915–16. The Excise Ordinance, No. 1 of 1916, which came into force on the 21st of March, 1916, increased to five shillings the previous duty on rum of four shillings per gallon.

8. In respect to import duties, £990 less than was estimated was received, though £623 more was received than in 1915–16; and this was the result notwithstanding that an Order-in-Council was brought into force on the 21st of March, 1916, whereby the existing duties were increased by 25 per cent. on tobacco, wine, and spirits, and by 10 per cent. on all other dutiable articles.

9. The increase of £623 on the previous year's revenue from import duties is accounted for by the receipt of about £1,000 in March, 1917, paid upon goods withdrawn from warehouse and entered for home consumption in anticipation of a general increase of 25 per cent. of all import duties which the Legislative Council in that month had publicly resolved to impose for the year 1917–18. Legislation has since been enacted with a view to preventing such abnormal transactions.

10. In Post Office revenue there was an increase of £91 on the estimate and of £603 on the receipts in 1915–16. This was the result of the War Stamp Ordinances, Nos. 13 and 20 of 1916, which required a war stamp of one penny to be affixed to every letter and postal package transmitted to British countries.

11. On the expenditure side there was a saving of £823 19*s.* 10*d.* on the total amount voted from local revenue. No provision was made for extraordinary public works and no expenditure was incurred. In 1916–17, from the balance of the Public Purposes Loan of £2,000 raised in 1915, the sum of £789 17*s.* 3*d.* was spent, leaving a balance of £224 2*s.* 9*d.* to be spent in 1917–18; and from the 1916 War Loan of £2,000 for war purposes, £1,617 16*s.* 2*d.* was spent, leaving a balance of £382 3*s.* 10*d.*

Assets and Liabilities.

12. On the 31st of March, 1916, the Colony's accounts showed an excess of liabilities of £184 5*s.* 3*d.*, and at the close of the year there was a similar excess of £359 5*s.* 3*d.*

13. The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to general revenue, under Head 8, and is applied to the relief of the poor.

14. There are also other funds of less importance forming assets of the Colony, which were not derived from taxation. Some of these are extinguishable in time, but others, such as the Graham Bequest Fund and the Thompson Home Fund, are available only to the extent of the annual interest obtained from them.

15. In 1916–17 interest from the Eruption Relief Fund amounting £750 was spent on poor relief, and interest amounting to £182 from the Graham Bequest Fund was spent for medical purposes. During the

same period £533 from the Land Settlement Fund, which is derived from an Imperial Grant-in-aid in 1898, was spent on the maintenance of roads.

Public Debt.

16. The public debt at the close of the year stood at £8,700, as against £6,700 in 1915–16. This increase is due to a War Loan of £2,000 raised under the authority of Ordinance No. 28 of 1916 by the local issue of eight debentures of £250 each, at 5 per cent. interest, to meet the cost of the St. Vincent contingent of the British West Indies Regiment. Included in the debt is a loan of £1,500 raised by the Kingstown Board in 1914, for which the Colony is responsible in case of default.

17. The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to Planters made from funds supplied by the Imperial Treasury, which was £5,626 19*s.* on the 31st of March, 1917. On that date there had been received from planters towards the repayment of this balance the sum of £3,994 6*s.* 1*d.*, of which £3,734 3*s.* 1*d.* was invested through the Crown Agents for the Colonies.

18. The accumulated sinking funds provided for the redemption of the public debt of £8,700 stood at £675 on the 31st of March, 1917.

Currency.

19. British and American gold, five-dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling and commercial and banking accounts in dollars and cents.

Finances of Municipalities.

20. The total revenue and expenditure of the towns during the last two years was :—

Town.	Revenue. 1915.	Revenue. 1916.	Expenditure. 1915.	Expenditure. 1916.
Kingstown	£1,982	£1,809	£1,860	£1,776
Georgetown	160	158	364	146
Calliaqua	67	64	101	72
Layou	55	66	61	35
Barrouallie	82	75	116	77
Chateaubelair	40	40	42	47
Bequia	17	20	35	4

Debts of Towns.

21. At the 31st of March, 1917, the towns were indebted to the Government for the following balances of loans made to them :—

			£	s.	d.
Kingstown Board—					
For repairs to Rose Place drain	£90 15 1				
Improvement Loan	222 0 0				
			312	15	1
Georgetown, Improvement Loan			276	0	0
Calliaqua, Water Supply Loan			332	10	0
Layou " " "			176	0	0
Barrouallie " " "			152	0	0
			£1,249	5	1

Provision for repayment of these loans is made by rates. As mentioned under "Public Debt" earlier in this report, Kingstown is also indebted in a further sum of £1,500 in respect of a loan in 1914 for which debentures were issued to the public, and for which the Colony is responsible in case of default.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

22. The total values of imports and exports in 1915 and 1916 were:—

Year.	Imports.	Exports.
1915	£90,892 ..	£98,545
1916	92,331 ..	97,860

Of the £97,860, produce of the Colony was exported in 1916 of the value of £91,665.

23. The places whence the imports came and the values for the last two years are:—

	1915.	1916.
United Kingdom	£33,825 ..	£36,619
Canada..	15,490 ..	19,812
British West Indies	7,531 ..	7,551
India	864 ..	830
Newfoundland..	5,592 ..	2,326
Other British Colonies ..	423 ..	314
United States of America ..	21,464 ..	21,005
France	1,874 ..	1,764
Denmark	1,068 ..	345
Germany	5 ..	—
Holland	636 ..	355
Foreign West Indies	352 ..	328
Other Countries	1,768 ..	1,082
	£90,892 ..	£92,331

24. From the foregoing figures it appears that imports were principally derived in 1916 from the United Kingdom, the United States, and Canada, and in percentages of 39·66, 22·75 and 21·46; and that the value of imports from all other countries was only 16·13 per cent. of the total.

25. Of the £92,331 of imports, £37,347 was the value of articles classified under "Food, Drink, and Tobacco," and £43,647 the value of manufactured articles.

Exports.

26. The destinations of the exports of the produce of the Colony in 1915 and 1916 were as follows:—

	1915.	1916.
United Kingdom	£63,925	£46,648
Canada	3,595	10,801
United States of America	1,203	2,931
British West Indies	23,655	27,434
Other Countries	109	3,851
	£92,487	£91,665

The increase in the value of exports to "Other Countries" is mainly due to the export of cattle to Martinique.

27. The principal products of the Colony exported were:—

	1915.	1916.
Arrowroot	£44,689	£37,619
Cotton—		
Sea Island	20,604	13,893
Marie Galante	1,521	1,368
Cocoa	7,005	5,214
Sugar—		
Crystallised	—	2,541
Muscovado	3,253	6,979
Syrup and Molasses	503	1,475
Animals	5,054	8,332

28. The reduction in the exports of arrowroot was due to shortage of tonnage, and in the case of cotton the reduction was due to both shortage of tonnage and a decreased output.

Manufactures and Fisheries.

29. The Government Cotton Ginnery continued to buy seed-cotton from peasant growers under the profit-sharing scheme described in the Blue Book Report for 1910–11. Of the Sea Island variety, 132,239 lb. of seed-cotton was bought in 1916–17, and 164,784 lb. of Marie Galante. Some of the ginned cotton is still awaiting shipment so soon as the exigencies of the War will permit of the Controller of Shipping providing tonnage for the purpose. The profits cannot therefore be ascertained, and there has consequently been no distribution of bonuses yet among the sellers.

Agricultural Industries and the Agricultural Department.

30. The adverse effects on the Sea Island cotton industry of successive seasons of unfavourable weather conditions and also of severe attacks of the cotton stainer and internal boll diseases caused a further diminution of the area cultivated. Only 2,401 acres were planted for the 1916–17 crop, as against 2,622 acres in 1915–16 and an annual average of 4,200 acres in 1910–14. The crop was 160,168 lb. of lint, and it was 295,411 lb. in 1915–16.

31. The yield of lint per acre was 66 lb., the lowest recorded. The average annual yield since 1905 is 118·7 lb.

32. Notwithstanding past unsatisfactory results planters have increased the cultivation of Sea Island cotton in the hope of obtaining high prices in 1917–18.

33. In 1897 the quantity of sugar exported was 6,411,564 lb. Since then the decrease in the output was continuous in successive years down to 1913, when the quantity exported was only 250 lb. The history of the Colony shows that the soil of St. Vincent is eminently capable of producing sugar-canes. Of late years plantations with muscovado sugar works were principally cultivated in cotton and arrowroot, but the high war prices of sugar and the fluctuations in the cotton crops during the last few years have stimulated planters to put their sugar works in order and to plant a considerable area of sugar-cane.

34. The following table shows the exports of muscovado sugar, syrup, and molasses in the last four years :—

Year.	Sugar. lb.	Value. £	Syrup and Molasses. gals.	Value. £	Total Value. £
1913 ..	250 ..	2 ..	3,252 ..	171 ..	173
1914 ..	281,990 ..	1,586 ..	8,904 ..	252 ..	1,838
1915 ..	505,232 ..	3,253 ..	10,079 ..	503 ..	3,756
1916 ..	1,198,314 ..	9,520 ..	33,771 ..	1,475 ..	10,995

35. The price of arrowroot was maintained at a remunerative figure. The crop was 4,441,242 lb. in 1916, as against 5,290,781 lb. in 1915.

36. There were 15 Agricultural Co-operative Credit Societies, with 578 members. Interest in the system is being well maintained by the peasant proprietors who form these societies.

37. Cotton-breeding, the improvement of Indian corn, manurial experiments, and entomological investigations continued to be the principal subjects of the work done at the Experiment Station of the Agricultural Department.

38. The cotton stainer bug proved to be the most injurious pest of cultivated cotton, not only because of the staining of lint but also from its association with certain destructive internal boll diseases. In consequence of examinations and tests having shown that the stainers feed and breed on the silk-cotton tree (*eriodendron anfractuosum*) and the John Bull tree (*thespesia populnea*), the Cotton Stainer Ordinance was brought into force on the 25th of July, 1916, to make provision for the destruction of trees upon which the cotton stainer is accustomed to feed. In the campaign carried out by the Agricultural Department under this Ordinance from August, 1916, to the end of June, 1917, silk-cotton trees to the number of 1,552 and 11,570 John Bull trees, as well as many thousand seedlings, were destroyed, at a total cost of £295.

39. Of land under the Land Settlement Scheme in St. Vincent, 25 allotments containing 39 acres were sold for £128 12*s.* 3*d.*, and of Crown lands, 14 allotments containing 234 acres were sold for £166 6*s.*

SHIPPING.

40. The number of vessels entered was 323, of 171,078 tons; and 327 cleared, of 169,843 tons. One vessel, of 12 tons, was registered in 1916.

III.—EDUCATION.

42. The following comparative table gives particulars in regard to primary education during the years 1915–16 and 1916–17 :—

	1915–16.	1916–17.
Number of schools	27 ..	27
Number of pupils on Roll at 31st March	4,060 ..	4,173
Average attendance	1,973 ..	2,037
Government grant-in-aid ..	£1,637 ..	£1,753
Cost per head in average attendance	16*s.* 7*d.* ..	17*s.* 2*d.*

43. Eight of the 27 regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other 19 schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

44. In 1915–16 there were nine other small schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants. In 1916–17 the number was reduced to eight.

45. The Government maintains in Kingstown a secondary school for the education of boys—the Grammar School, and one for girls—the Girls' High School. The average attendance in 1915–16 and 1916–17 was 43 and 41 boys and 26 and 21 girls. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

46. At the Agricultural Experiment Station six lads of the peasant and mechanic class are instructed by the Assistant Agricultural Superintendent in practical agriculture. These pupils are apprenticed for two years and they receive graded allowances in proportion to the length of their apprenticeship. They live with their parents or guardians and come to the Station every day to their work. The land attached to the Station is planted by the pupils in various products, such as cotton, arrowroot, sugar-cane, cassava, etc.

IV.—GOVERNMENT INSTITUTIONS.

47. During 1916–17 there were 1,049 admissions to the Colonial Hospital, making, with those remaining from the previous year, 1,105 cases treated. In 1915–16 the number of cases treated was 901. The daily average was 55 in 1916–17. It was 57 in the previous year. The death rate was 4·3 per cent. of the 1,105 cases treated. The number of operations performed was 187, a decrease of one as compared with the number in 1915–16.

48. There were 49 lunatics under detention and treatment at Fort Charlotte, of whom 10 were new admissions ; 2 were discharged cured and 3 died.

49. In the Leper Asylum 11 patients were maintained.

50. The number of inmates of the Pauper Asylum on the 31st of March, 1916, was 62. During 1916–17 there were 32 new admissions.

51. At the Yaws Hospital 97 cases were treated in 1916–17, and 73 of these were discharged cured. At the usual district dispensaries and

at special travelling dispensaries 1,621 other yaws patients were treated during the year, 616 of whom were cured.

52. The Casualty Hospital at Georgetown, with four beds, continued to fulfil its purpose of providing the means of treating emergency cases.

Savings Bank.

53. The following is a comparative statement of the operations of the Savings Bank during the past two years :—

Year.	Number of depositors at 31st December.	Amount of deposits.	Amount of withdrawals.	Balance at credit of depositors at 31st December, including interest capitalised.
		£	£	£
1915	1,130	5,210	6,743	17,223
1916	1,072	5,111	5,724	17,058

The Savings Bank funds invested at the 31st of December, 1916, amounted to £18,143 2*s.* 5*d.*

V.—JUDICIAL.

54. The police force consisted of a Chief and 48 West Indian non-commissioned officers and privates. In addition to ordinary police work they perform duties as sanitary inspectors and, in connection with district post offices, births and deaths registration, poor relief, and the operation of district telephone exchanges ; and the warders of the Kingstown Prison, except one, are members of the police force. The fire brigade of Kingstown consists of police constables, who receive supplementary pay for this service from the funds of the Kingstown Board.

55. The total number of convicted persons committed to prison in 1916–17 was 207, of whom 100 were men and 107 women. There were also 46 juveniles who were whipped by order of magistrates, but not detained in custody. The average number of prisoners in the Kingstown Prison was 24·24, as compared with 25·37 in 1915–16.

56. The number of cases reported to the police during the year was 438. The number of persons brought before the magistrates was 1,571. The number of summary convictions was 869, and the number of convictions in the Supreme Court was 5, as compared with 973 and 13 in 1915–16. In the Magistrates Courts 442 persons were discharged for want of prosecution and 260 were acquitted on the merits of the case. In the Supreme Court the jury returned verdicts of not guilty in three cases.

57. On charges of praedial larceny 113 persons were convicted. The number in 1915–16 was 97.

VI.—VITAL STATISTICS.

58. The population of the Colony in 1911 was 41,877, according to the census taken in that year. The Registrar-General's estimate of the population on the 31st March, 1917, is 49,422. This estimate is based on the census return for 1911 with corrections for births, deaths, immigration, and emigration.

59. The following table gives the births, deaths, and marriages in the past two years :—

	1915–16.	1916–17.
Births	1,724	1,731
Males	896	875
Females	834	856
Birth-rate per 1,000 of the estimated population	35·7	37·4
Deaths	885	961
Death-rate per 1,000	18·3	19·4
Marriages	111	84
Marriage rate per 1,000	2·3	1·6

60. Illegitimate births numbered 1,175, or 67·87 per cent. of the total number of all births. The percentage in 1915–16 was 62.

61. The campaign undertaken by the International Health Board for the eradication of the ankylostomiasis, or hookworm, disease, was carried on throughout the year by Dr. P. B. Gardner. Of 8,834 persons examined, 4,894 were found to be infected with hookworm. The number treated was 3,918, and of these, 3,335 were cured. In connection with the campaign, measures for faecal sanitation under Public Health Regulations were carried out for preventing soil pollution so as to avoid re-infection and new infection. New latrines to the number of 459 were erected at homes located within the area in which the campaign was conducted during the year.

62. The rainfall at the Agricultural Experiment Station in Kingstown, 80 feet above sea level, was 115·25 inches in 1916–17, as against 114·99 in 1915–16 and 72·67 in 1914–15. The average rainfall in the Island of St. Vincent, as recorded at the Experiment Station and other places, for the year 1916 was 120·84 inches, as against 111·60 in 1915 and 86·71 in 1914. For 1916 the highest recorded rainfall was 150·23 inches at Bellewood, and the lowest was 76·87 at Georgetown. The figures for the past 18 years show that June to November are the months in which most rain falls.

63. Rain fell on 284 days in 1916–17, and the greatest fall for one day was 6·88 inches on the 3rd of November, 1916.

64. An extraordinary rainfall was experienced in all districts during the 23 days from the 21st of October to the 12th of November, 1916, and much damage was done to lands, crops, and roads. The total rainfall in that period, measured at the Botanic Gardens near Kingstown, was 36·17 inches. Of this, 10·57 inches were recorded in the last 11 days of October and 25·60 inches in the first 12 days of November.

65. The reading of the barometer corrected for instrumental error, elevation, and temperature, ranged from 30·153 inches on the 6th of February to 29·814 on the 7th of October, 1916.

66. The mean monthly temperature in 1916–17 was 79° F. The highest was 80·8° F. in September, 1916, and the lowest was 75·6° in February, 1917.

67. The highest temperature recorded was 89° F. on the 15th of September, 1916, and the lowest was 66° F. on the 3rd and 8th of February, 1917.

VII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

68. Steamships of the Royal Mail Steam Packet Company, under contract with the Canadian Government, continued to call at St. Vincent once a fortnight on their outward voyages to British Guiana and on their homeward voyages to Canada; and during the year seven steamers of the Direct Line also brought and took cargo and mails. Mails were also sent and received by sailing vessels to and from Barbados and Grenada, where there is direct communication by steamer with the United Kingdom and the United States.

69. The Postal Department, with headquarters in Kingstown and 17 district post offices, continued to provide facilities for the transaction of postal business. Mails were sent to the Windward side of the island by motor-car and by boat to the Leeward side and to the Grenadines.

70. There is no inland telegraph service. A subsidy of £300 a year is paid to the West India and Panama Telegraph Company in return for which the Colony receives daily news bulletins and participates in a system of reduced charges for cablegrams.

71. The Government maintains a telephone system which connects Kingstown with all the police stations in the small towns and villages and with the places of residence and business of renters. Payment of ten shillings a month entitles a renter to be put in communication with all the districts of the Colony. There were 78 telephones rented by the general public, while 74 were attached to Government Departments for official use. A small charge is made for messages sent by persons who are not renters of telephones. There were 77 miles of trunk lines and 76 miles of lines connecting renters with the exchanges. The revenue in 1916–17 was £684 18*s.* 3*d.* and the expenditure was £603 16*s.* 3*d.*

VIII.—GENERAL OBSERVATIONS.

72. The general dislocation of trade and the shortage of ships due to war conditions continued to have a detrimental effect throughout the year. There were successive increases in the prices of foodstuffs and other imported articles, and there was some difficulty in obtaining ships for exporting the products of the Colony.

73. Though the usual sources of revenue were supplemented by an increase in the import, excise, and export duties, and by a War Stamp for postal purposes, the year's transactions resulted in a deficit of £359 5*s.* 3*d.*, notwithstanding every effort to reduce expenditure.

74. Loyalty and patriotism continued to be displayed by those who volunteered to join the contingents for the British West Indies Regiment for war service abroad.

75. The Administrator, Mr. R. P. Lobb, C.M.G., left St. Vincent on the 20th of March, 1917, for St. Lucia to take up the appointment of Acting Administrator of that Colony.

ANTHONY DE FREITAS,
Acting Administrator.

Government House, St. Vincent,
10th October, 1917.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

No. 968.

GRENADA.

REPORT ON THE GRENADA BLUE BOOK FOR 1917–1918.*

I.—FINANCIAL.

The financial year 1917–18 was much less satisfactory in its results than any of its immediate predecessors, and it became necessary to defray part of the current expenditure of the year by utilising £3,252 of the surplus assets; at 31st March, 1918, the surplus was £57,376, as compared with £60,628 a year earlier. This result is due to the failure of revenue from imports to reach expectations, the actual receipts from this source being £6,028 less than the estimate. To a great extent the decline was caused by the restriction towards the end of the year of exports from the United States of America, with which country a large amount of increased trade had arisen in consequence of the prohibition at an earlier stage of the War of exports from the United Kingdom. As the stocks of local merchants have become depleted, it is probable, if prices of the Colony's staple exports keep up, that an abnormal boom in imports may later on replace some of the deficiency in revenue that has occurred.

2. The revenue and expenditure of the past two years have been as follows:—

	Revenue.	*Expenditure.*
1916–17	£112,759	£106,603
1917–18	105,540	108,792

3. It will be seen from the foregoing statement that the Colony has enjoyed several years of good revenue, a fortunate circumstance in view of the yearly increasing expenditure, part of which is due to the War. The present taxation includes rates specially enforced for the period of the War, and intended specially to meet War expenditure. The revenue from this source last year more than covered the special War expenditure, and the deficit in the year just closed is therefore an unexpected check. It is the more unsatisfactory from the fact that an additional aid to the revenue was given by a large sum from Estate Duties represented by the balance of duty on a large personal estate that has now passed from the Colony. There is a discomforting indication, apart from the question of temporarily reduced imports, that recurrent expenditure unconnected with the War has reached a point much in excess of ordinary revenue. An additional disquieting feature is the future prospect revealed by the budget of 1918–19, in which a further heavy deficit of £13,751 was intimated.

4. Owing to the relatively high figure to which the surplus assets had attained at the close of the previous year, the deficit in the current year causes little present inconvenience, although the assets themselves are to a large extent locked up in long-period investments or advances, and are not readily realisable.

* A Map will be found in the Report for 1914–15 No. 852: [Cd. 7622-43].

(C495) Wt.11/42. 1,000 & 90. 10.18 B.& F.Ltd. Gp.11/2.

Surplus Assets.

5. The principal items of the surplus balance of £57,376 at 31st March, 1918, are :—

Invested in Stocks and War Loans ..	£33,188
Loans to District Boards	14,177
Advances under Land Settlement Scheme	5,310
Stores on hand	4,701
	£57,376

New Local Loan.

6. A Loan of £100,000 bearing interest at five per cent. was issued during the year, for various public works including improvement of roads and water services, construction of an esplanade, and purchase of a dredger. Subscriptions amounting to £59,790 were received by 31st March, 1918. The Loan is free from income tax in the Colony, present or future. The debentures are redeemable in 1947, although the Government has the right to begin their redemption by annual drawings at any time after ten years from the date of issue. Provision towards repayment is made by a sinking fund, the rate for the current year being placed at one per cent., a higher rate not being considered necessary in view of the Colony's assets, which will be liquefiable before the date of compulsory repayment of debentures.

Proposed Additional Taxation.

7. To meet the annual charges for interest and sinking fund on the new Local Loan previously referred to, an Income Tax Ordinance was introduced and passed by the Legislative Council in November, 1917, but has not yet been brought into force.

Public Debt.

8. The Public Debt, which had stood at £123,670 for more than two decades, was increased by the new loan referred to in paragraph 6, and now amounts to £183,460. The sinking fund for redemption of the old loan amounts to £45,746, having been increased during the year by £2,761. Sinking fund contributions in respect of the new loan will commence from 1st April, 1918.

Finances of District Boards.

9. The revenue and expenditure of the six District Boards of the Colony during the past year, and their loan debts at the 31st March, 1918, were as follows :—

	Revenue.	*Expenditure.*	*Loan Debts.*
St. George's ..	£3,916	£3,919	£13,256
St. Andrew's ..	2,841	3,057	1,970
St. Patrick's ..	1,903	2,092	4,632
St. John's ..	1,551	1,570	3,300
St. Mark's ..	852	696	1,200
St. David's ..	934	934	—

The debts are being repaid partly by sinking funds and partly by direct annual repayments.

Currency.

10. Gold, silver, and bronze coins are in circulation, the two former being legal tender without restriction. An erroneous statement was made in last year's report in regard to the legal tender of bronze coins; these are legal tender up to the same amount as in the United Kingdom.

11. The two banks established in the Colony are the Colonial Bank and the Royal Bank of Canada; each has about 50,000 notes of five dollars denomination in circulation in Grenada, and these notes and silver are the common means of monetary exchange. There is scarcely any gold now in the Colony.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

Total Trade.

12. The total trade, represented by the combined value of imports (£353,978) and exports (£480,553), amounted in 1917 to £834,531.

Imports.

13. The principal articles imported (exceeding £5,000 in value) are given below, the increase or decrease as compared with the previous year being indicated:—

Commodity.	Value.	Increase.	Decrease.
	£	£	£
Apparel	5,264	—	563
Bags and Sacks	8,728	2,365	—
Biscuits, Bread, and Cakes ..	7,554	—	393
Boots and Shoes	7,661	446	—
Motor Cars, including parts ..	12,699	5,504	—
Cement	5,870	3,173	—
Cotton Manufactures	38,519	—	3,914
Fish, dried and salted	18,850	3,502	—
Rice	10,494	1,278	—
Flour	53,146	12,955	—
Haberdashery and Millinery ..	7,161	1,338	—
Hardware	5,468	1,052	—
Meat, salted and cured.. ..	7,242	583	—
Soap, common	5,584	593	—
Sugar	20,449	4,875	—
Spirits and Wines	6,111	—	2,798

14. With the exception of motor cars, bags and sacks, and sugar, the increased values of imports are the result of higher prices and not of increased quantities imported; on the contrary, with th exceptions mentioned, the quantities have decreased.

15. The greatly increased importation of motor cars and acces sories is somewhat striking. It is the result of the distribution of wealth among a numerous body of landed proprietors, small and large, owing to the high prices obtained for the Colony's exports of cocoa and spices. The trade in motor cars has sprung up since the War, and its value, including parts, was last year £12,699. Almost without exception the cars are imported from the United States of America.

EXPORTS.

16. The exports in the calendar year 1917 were as follows:—

	Quantity.	Value.	Increase in value.	Decrease in value.
	Cwt.	£	£	£
Cocoa	104,520	412,260	—	37,684
Spices:				
Nutmegs ..	11,818	23,520	—	8,427
Mace	2,048	15,397	—	1,476
Lime Juice ..	—	11,184	—	3,302
Cotton	2,453	9,182	—	5,361
Cotton Seed ..	6,199	2,347	—	802

17. Cocoa shipments to the United Kingdom were valued at £254,760; to the United States of America £147,575, and to Canada £5,519.

Nutmegs were exported principally to the United States of America and Canada, the values being £11,160 and £8,200 respectively, while shipments to the United Kingdom amounted to £4,147.

Mace went principally to the United Kingdom, to the value of £9,569; the United States of America coming second with £3,689 and Canada third with £2,139.

All of the cotton and lime juice from the Colony was exported to the United Kingdom.

DIRECTION OF TRADE.

18. The direction of trade is shown in the following table:—

	Imports.		Exports.		Total Trade.	
	Value.	Per-centage.	Value.	Per-centage.	Value.	Per-centage.
	£		£		£	
U.K.	95,681	27·0	289,293	60·2	384,974	46·1
U.S.A.	157,758	44·6	162,643	33·8	320,401	38·4
Brit. Colonies ..	88,399	25·0	27,409	5·7	115,808	13·9
Other Places ..	12,140	3·4	1,208	0·3	13,348	1·6
Total Value ..	£353,978	—	£480,553	—	£834,531	—

19. The import trade from the United Kingdom decreased by 8 per cent., and the trade from the United States of America increased by almost a similar percentage (actual, 7·6 per cent.). The destination of exports did not vary to quite the same extent; the percentage to the United Kingdom fell by 4·8 and that to the United States of America gained by 2·8.

On the combined trade of imports and exports, the United Kingdom still leads with 46·1 per cent. of the total, followed by the United States of America with 38·4.

Trade with Canada.

20. The progress of trade to and from Canada is shown in the following statement:—

	1914.	1915.	1916.	1917.
Exports to Canada ..	£1,708	£3,681	£11,518	£15,858
Imports from Canada	23,604	26,986	25,680	25,914

21. According to value, the import trade has remained almost stationary, which indicates, as prices are so much higher, that the actual volume of imports has decreased.

22. The growth of the export trade from £1,708 to £15,858 in the course of four years has exceeded expectations. The exports in 1917 consisted of spices valued at £10,339 and cocoa valued at £5,519. This development of a new market for the Colony's products removes any ground for objection from Grenada to the Tariff Recriprocity Agreement on the plea that it is one-sided. Over and above the equality in actual tariff concessions that has now arisen, the Colony, in common with other West Indian Islands, enjoys the great benefit of the regular Canadian Steamship Service which is subsidised entirely by Canada. The contract for the steamer service expires this year.

Agriculture.

23. *Cocoa.*—It appears that the export of cocoa in the crop year ended 30th September, 1917, amounting to 78,535 bags, was only 1,499 bags short of the record crop of 80,034 bags for the year ended 30th September, 1916. The value of the crop as exported was £486,519.

The thrips disease reported as being prevalent in the preceding year is not yet eradicated, but the attacks are stated to be much less severe. The services of Mr. F. W. Urich, Entomologist of the Trinidad Board of Agriculture, were requisitioned for investigation of the disease, and measures recommended by him to exterminate the pest are being undertaken.

24. *Spices.*—The upward tendency in production that had continued for six years was not maintained, the exports in the crop year ended 30th September, 1917, showing a decrease of 402,079 lbs. in quantity and £16,901 in value. The prices in the current year, it may be mentioned, have increased enormously, promising a very satisfactory monetary return.

25. *Cotton.*—The Marie Galante cotton crop, which is grown wholly in Carriacou, again showed a considerable reduction, the lint produced being 2,453 cwt. as compared with 3,116 cwt. in the preceding year. The high market prices continued throughout the year.

Efforts are being made to grow Sea Island cotton, the cultivation of which in Grenada has not hitherto been successful.

26. *Limes.*—This cultivation is being further extended, and it is reported that between forty and fifty estates and holdings are extending the cultivation. Only very small shipments of juice have so far been made from Grenada plantations. The main cultivation is confined at present to Carriacou, in which dependency a decrease in production occurred during last year. The Superintendent of

Agriculture furnishes the following statement showing the progress of the lime industry :—

	Raw Juice.	Concentrated Juice.	Green Limes.	Otto of Limes.	Total Value.
	Galls.	Galls.	Bbls.	lbs.	£
1914	nil.	2,375	6	nil.	1,375
1915	31,615	3,950	nil.	12	6,407
1916	150,525	7,500	nil.	nil.	14,486
1917	104,617	5,650	nil.	nil.	11,184

27. *Subsidiary Crops.*—Sugar cultivation shows no tendency to expand, although high prices continue to prevail. The value of sugar imported last year was £20,449 ; in point of value it ranks third in the list of imports. The real fact is that with so much of the fertile land being under permanent cultivation of cocoa and spices, there is insufficient fertile land left for any other industry that requires for its success cultivation on a large scale, as does sugar. The tendency is more and more to go in for other permanent crops such as limes and coconuts. Efforts to stimulate production of ground provisions are being vigorously undertaken, with the object of making the poorer classes more independent of imported foodstuffs, which are still imported to too great an extent.

Industries.

28. The manufacture of ice, a necessity for comfort and health in the tropics, is carried on at a factory in St. George's. The Government, by the grant of subsidies, makes the sale of ice possible in all the towns of the island and in Carriacou at reasonable prices, and at specially reduced rates to sick persons.

29. A small amount of sugar of the muscovado grade is manufactured at two sugar mills, while numerous smaller mills make what is locally known as " wet " sugar.

30. Fourteen distilleries were at work during the year, the output of rum being 60,041 proof gallons. None of it was exported ; on the contrary, 1,288 proof gallons of rum were imported from Barbados.

Shipping.

31. The tonnage of vessels entered at Grenada during the last three years was as follows :—

1915	425,188
1915	361,302
1917	375,440

The steamer tonnage entered in 1917 was 365,146, and sailing tonnage 10,294. The same steamer tonnage cleared in the year.

All the steamer tonnage was British ; seven Dutch and eleven Venezuelan sailing vessels of small tonnage entered and cleared during the year.

III.—LEGISLATION.

32. The Ordinances passed in 1917 numbered twenty-one, the most important being the Local Loan Ordinance for raising £100,000 for Public Works, a Venereal Diseases Ordinance, and an Income Tax Ordinance. The last mentioned has not yet been brought into force.

IV.—EDUCATION.

Primary.

33. Primary instruction is given in 59 schools, 2 having been added during the past year. Eleven of the schools are Government Schools, and 48 are denominational schools which are almost entirely financed by the Government Grant in Aid.

34. At the 31st December, 1917, the number of children on the roll was 10,103, a decrease of 1,652 and the average attendance was 5,918, a decrease of 570 as compared with the returns of a year ago.

35. The Government expenditure on Primary Education in 1917 amounted to £8,378, as against £6,061 in 1916, an addition of £2,317, the increase arising from increased remuneration to teachers.

Secondary.

36. Secondary education is maintained by a Government Boys' School and by grants of one hundred and fifty pounds (£150) per annum to each of two girls' schools belonging to the Roman Catholic and Anglican denominations respectively.

37. An external scholarship, instituted by Government in 1916, of the value of £875, was won last year by a pupil of the Government Boys' School.

38. Of 129 candidates entered for the Cambridge Local Examination, 6 passed in the Senior, 18 in the Junior, and 19 in the Preliminary. Most of the successes were gained by pupils of the Government Boys' School. Three of the candidates in the Senior gained Honours, one of these being a pupil of the Anglican Girls' High School.

V.—GOVERNMENT INSTITUTIONS.

(*a*) Hospitals.

39. The Colony Hospital in St. George's has 140 beds, the Carriacou Hospital 24, and the Hospital in St. Andrew's parish 12 beds. In addition, there is in St. George's a Yaws Hospital with accommodation for 70 patients and a Consumptive Hospital with 20 beds.

(*b*) Asylums.

40. The Lunatic Asylum, which receives patients also from St. Vincent, has 120 beds. It is pleasantly situated on Richmond Hill, St. George's, about 600 feet above sea level.

41. The Poor Asylum, with 38 beds for males and 20 for females, is on a site adjacent to the Lunatic Asylum. Most of the patients are of advanced age, and it is practically a hospital for incurables.

(c) Other Institutions.

42. Government Dispensaries are established in each parish, except St. John's and in Carriacou. In St. John's a private dispensary receives a Government subsidy. The cost of free medicines exceeds £1,000 annually.

43. The Ankylostomiasis Campaign, conducted from funds supplied by the Rockefeller Foundation, was temporarily suspended from the end of November, 1917, owing to the resignation of Dr. Colwell for War service. The difficulty of obtaining another medical officer on account of the United States participation in the War has prevented a resumption of work up to the present.

(d) Savings Bank.

44. A further decrease in Savings Bank business occurred during the year, the number of depositors at the 31st December, 1917, being 1,451 and the amount at credit of depositors £17,660, as compared with 1,483 and £19,613 a year earlier. The rate of interest given on deposits is 3 per cent. The issue by Government of a Local Loan bearing interest at 5 per cent. may have had an effect on withdrawals, but part of the decrease in deposits is due to financial stress among a certain section of the community.

VI.—JUDICIAL STATISTICS.

(a) Police.

45. The Police Force consists of one officer in command, a sergeant-major, and eighty-one non-commissioned officers and men, in addition to one armourer sergeant (for the Windward Islands), one bugler and two civilian clerks. A large number of rural constables are enrolled and are employed on special occasions. Five of the non-commissioned officers and men are on active service with the British West Indies Regiment.

(b) Prisons.

46. The number of admissions during the year was 362, as compared with 255 in 1916. 296 were convicted, 120 of these being old offenders. The convictions included 107 females. The majority of the sentences of the latter were for periods not exceeding one month.

47. The expenditure on the prisons amounted to £1,998 as against £1,765 in 1916, the increase of £233 being due partly to the greater number of prisoners and partly to the higher cost of articles supplied The annual cost per prisoner was £15 3*s.* 0¾*d.*

(c) Criminal Statistics.

48. An appreciable increase of summary convictions occurred in the year under review. The number of such convictions for 1917 was 2,293, an increase of 370 over the average of the previous three years and of 507 over the number in 1916. 178 of the increase was, however, in respect of revenue, municipal and other laws relating to the social economy of the Colony, there being a slight decrease, as compared with the average of the three previous years, of offences against the person. There was one case of rape, no case of homicide, and no case of offence against property with violence.

VII.—VITAL STATISTICS.

49. The population at the end of the year 1917 was estimated to be 73,373.

50. The birth-rate was 34·9, as against 35·6 in 1916. The births numbered 2,561.

51. The death-rate per 1,000 was 20·06, as compared with 17·5 in 1916. The death-rate varied according to parish from 22·8 to 15·6. The number of deaths was 1,472.

52. The cause of the higher death-rate appears to be mainly economic. The high cost of food has resulted in great hardship to the labourers, and the results of deficient and improper food are particularly noticeable in the case of children and those of advanced age.

53. The percentage of deaths under five years of age as compared with other West Indian Colonies is as follows :—

Year.	Colony.	Percentage of deaths under five years.
1916	Trinidad	31·6
1916	Jamaica	41·9
1915	Bahamas	36·8
1917	Grenada	51·0

On this point the report of the Registrar General states :—

" Once the tender years of childhood are past, the mortality becomes very low, the rates from youth to advanced age being much below those of other West Indian Colonies. The deduction to be drawn is that, apart from morbidity due to insufficient or unsuitable food and want of care in the case of the young, the climate of Grenada is extremely healthy."

54. The cause of the greatest number of deaths was Diarrhoea and Enteritis, from which 322 deaths ensued, Malaria, which caused 88 deaths, being far behind as second on the list.

METEOROLOGICAL OBSERVATIONS.

55. The temperature in the shade ranged from a minimum of 68·0 on several dates to a maximum of 91·0 which occurred on the 20th September. The maximum temperature in the sun was 139.

56. The rainfall, which varies from 30 to nearly 200 inches according to district, was 74·5 inches at Richmond Hill Station (St. George's), at which station the statistics for the annual meteorological return are recorded.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

(*a*) Postal.

57. Postal business is transacted at the Post Office in St. George's, and at the Revenue Offices in the other towns of the Colony. There are, in addition, several small sub-offices for the receipt and despatch of letters and the sale of postage stamps.

Foreign mails were received more irregularly than usual during the past year, owing to alterations in shipping services occasioned by the War.

Inland mails continue to be well served by the local coasting steamer and a motor car service.

(*b*) TELEGRAPHS.

58. There is no inland telegraph service.

The Colony is linked up with other places by the cables of the West India and Panama Telegraph Company. A Government subsidy of £600 per annum is given for the service, which *inter alia* supplies a daily bulletin of press news.

(*c*) TELEPHONES.

59. The Colony is well supplied by telephone, the mileage of trunk lines being 159, with about 700 miles of subscribers' lines. The charges are extremely moderate, and give an inclusive service to any part of the Island. There are five district exchanges.

GENERAL.

60. Two further drafts, numbering 244 men, were despatched to the British West Indies Regiment during 1917, bringing the total from Grenada up to 446.

61. The appointment of an Imperial Trade Commissioner for the West Indies, to reside in Trinidad, as announced by the Board of Trade, may prove of great service in the re-introduction of British trade, which has gradually lost ground in favour of trade with the United States of America. The decrease of business with the United Kingdom was almost inevitable owing to the earlier restriction of exports from the home country, and the greater delay and irregularity in executing orders on account of transport difficulties. Other causes, however, have contributed to the transference of trade, a striking instance being that of the motor car industry. Motor transport was introduced into the Colony in 1914, and although among the first half dozen cars one or two were of British make not one of the succeeding cars, numbering about 150, is of British manufacture. The value of the trade last year was £12,699. The greater degree of standardisation and the readiness with which renewals and spare parts can be obtained are factors favouring the American trade.

62. Some part of the transferred trade should naturally revert to the United Kingdom after the War is over. It has to be borne in mind, nevertheless, that it is more difficult to recover a trade that has been lost than to keep it, and that, moreover, steamship communication with the United States of America is speedier and more frequent. It appears evident that a further reduction in cable rates, and improvement of the steamship services to and from the United Kingdom, may have to be considered in any endeavour to re-establish the trade.

HERBERT FERGUSON,
Colonial Secretary.

Grenada,
16th July, 1918.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

ANNUAL.

No.	Colony, &c.	Year
935	Malta	1916–1917

No. 977.

ST. VINCENT.

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1917–18.

I.—FINANCIAL.

General Revenue and Expenditure.

1. The financial position of the Colony on the 31st of March, 1918, was :—

Deficit at 1st April, 1917 ..				£359	5	3
Revenue in 1917–18	£35,777	7	4			
Expenditure in 1917–18	33,957	5	6			
				1,820	1	10
Surplus at 1st April, 1918 ..				£1,460	16	7

2. These figures are exclusive of £595 0*s.* 4*d.* expended from the funds of the Rockefeller International Health Board for the purposes of a campaign against the ankylostomiasis (hookworm) disease, and of the sum of £2 17*s.* 10*d.* spent by the Agricultural Department from Imperial funds ; and also of the sum of £850, being the accumulated contributions at the close of the year towards the redemption of loans, which have been credited to Revenue and form part of the Colony's gross surplus.

3. In the last two financial years the total gross revenue and expenditure amounted to :—

	Revenue.	Expenditure.
1916–17 ..	£35,242 ..	£36,139
1917–18	37,535 ..	34,555

4. The net local revenue and expenditure in the same years amounted to :—

	Local Revenue.	Expenditure against Local Revenue.
1916–17	£32,444	£32,437
1917–18	35,102 ..	32,706

5. The principal items of revenue in the last two years were :—

	1916–17.	1917–18.
Import duties	£12,810	£13,438
Export duties	1,094	1,682
Excise duty on rum	5,122	5,938
Land and house tax	3,185	3,206
Income tax	702	722

(C513) Wt. 1/155. 1000-90. 2.19. B.&F.Ltd. G.11/2

6. The sums received for customs duties and for export duties in 1917–18 were respectively less than the estimates by £1,562 or 10·4 per cent. and £283 or 14·4 per cent. The decrease in import duties may be ascribed to the shortage of ships, the difficulty of obtaining goods and the higher cost of them. Shortage of tonnage will also account for the decrease in export duties; a large part of the 1917 arrowroot crop could not be shipped before the end of March, 1918.

7. The Excise Ordinance, 1916, which came into force on the 21st of March, 1916, increased to five shillings the previous duty on rum of four shillings per gallon. The revenue from this source in 1915–16 was £3,933. After the rate of duty was raised by 25 per cent. in 1916 the 1915–16 revenue was exceeded in 1916–17 by £1,189 or 30·2 per cent. and by £2,005 or 50·9 per cent. in 1917–18. The 1917–18 increase was due to a diminution in the quantity of cheap spirits imported and also to more money being in circulation, derived from higher prices for cotton and other agricultural products.

8. In Post Office revenue there was an increase of £143 on the estimate for 1917–18 and an increase of £91 on the receipts in 1916–17. This increase was in the main due to purchases by local and foreign stamp-dealers of an unusually large number of penny War Stamps.

9. Though the year's local revenue was short of the estimate, on the expenditure side there was a saving of £1,726 of the total amount estimated to be spent from local revenue. The surplus of £1,460 16*s.* 7*d.* at the close of the year, shown in the first paragraph of this report, was the result of the exercise of economical control of expenditure.

10. The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions of the Soufriere volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this Fund, amounting to £750, is put to general revenue.

11. There are other funds not derived from taxation, such as the Graham Bequest Fund and the Land Settlement Fund. From the Graham Fund contributions are provided to meet certain expenditure in connection with the Colonial Hospital, and from the other Fund, which is derived from an Imperial grant-in-aid in 1898, roads to the settlers' allotments are maintained.

Public Debt.

12. On the 1st of April, 1917, the public debt of the Colony was £8,700. During the year £1,200 was raised by the issue of debentures under the authority of Ordinance 9 of 1917, to be applied towards the cost of reconstruction of the Windward Highway. At the close of the year the debt amounted to £9,900, including a loan of £1,500 raised by the Kingstown Board in 1914, for which the Colony is responsible in case of default.

13. The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to Planters made from funds supplied by the Imperial Treasury, which was £4,823 2*s.* on the 31st of March, 1918, and towards the repayment of which £3,672 2*s.* 9*d.* has been received from planters.

Currency.

14. British and American gold, five-dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

Finances of Municipalities.

15. The total revenue and expenditure of the chief towns during the last two years were :—

Town.	Revenue. 1916.	Revenue. 1917.	Expenditure. 1916.	Expenditure. 1917.
Kingstown ..	£1,809	£1,952	£1,776	£1,749
Georgetown ..	158	181	146	195
Calliaqua ..	64	59	72	46
Layou.. ..	66	75	35	73
Barrouallie ..	75	76	77	58

16. On the 31st March, 1918, the towns were indebted to the Government for the following balances of loans made to them :—

Kingstown Board—		
For repairs to Rose Place drain ..	£50 15 1	
Improvement Loan	175 0 0	
		£225 15 1
Georgetown Improvement Loan ..		264 0 0
Calliaqua Water Supply Loan ..		323 15 0
Layou ,, ,, ,, ..		160 0 0
Barrouallie ,, ,, ,, ..		144 0 0
		£1,117 10 1

Provision for repayment of these loans is made by rates. Kingstown is also indebted in the further sum of £1,500, referred to above.

II.—TRADE AND AGRICULTURAL INDUSTRIES.

Imports and Exports.

17. The total values of imports and exports in the last two years were :—

Year.	Imports.	Exports.	Total Trade.
1916	£92,331	£97,860	£190,191
1917	122,114	104,397	226,511

18. The chief places whence the imports came and the values for the last two years were :—

	1916.	1917.
United Kingdom	£36,619	£36,492
Canada	19,812	27,950
British West Indies	7,551	11,143
India	830	330
Newfoundland	2,326	2,028
Other British Colonies ..	314	1,685
United States of America ..	21,005	38,512
France	1,764	1,476
Other Countries	2,110	2,498
	£92,331	£122,114

19. In consequence of the prices of all goods being higher than in previous years there was an increase in the total value of imports, notwithstanding a decrease in the quantity of certain articles imported, such as flour, fish, beef, pork, tea, butter, lard, whisky, and gin.

20. 1917–18 was the first year, so far as can be ascertained, in which the United Kingdom has failed to supply the Colony with a larger percentage of its total imports than any other country. This failure is due to the exigencies of the War. The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1916.	1917.
United Kingdom	39·66	29·88
United States of America ..	22·75	31·54
Canada	21·46	22·89
All other Countries	16·13	15·69

21. Of the £122,114 of imports, £47,985 was the value of articles classified under "Food, Drink, and Tobacco," and £50,828 was the value of manufactured articles.

Exports.

22. The destinations of the exports of the produce of the Colony in 1916 and 1917 were as follows :—

	1916.	1917.
United Kingdom	£46,648	£58,276
Canada	10,801	4,764
United States of America ..	2,931	3,709
British West Indies	27,434	28,896
British Guiana	—	1,114
Other Countries	3,851	2,975
	£91,665	£99,734

23. The principal products of the Colony exported were :—

	1916.	1917.
Arrowroot	£37,619	£40,296
Cotton—		
Sea Island	13,893	16,934
Marie Galante	1,368	1,848
Cocoa	5,214	3,911
Sugar—		
Crystallised	2,541	5,335
Muscovado	6,979	6,249
Syrup and molasses ..	1,475	3,102
Animals	8,332	3,762

Agricultural Industries.

24. The Government Cotton Ginnery and Granary continued to buy seed cotton and corn (maize) on profit-sharing terms. The following quantities were dealt with during the season :—Sea Island seed cotton 218,169 lb., Marie Galante seed cotton 134,130 lb., corn on cob 79,174 lb., grain corn 78,923 lb. The corn was kiln-dried and stored in bins to provide a reserve of cereal food for the drier months of 1918. The total quantity reserved was 131,409 lb.

The co-operative enterprises continued to receive the support of the small growers, and they have had a beneficial influence on both cotton and corn-growing in the Colony. The number of passbooks issued to growers was 1,427.

25. Since October, 1917, the local Government, on behalf of the Imperial Government, have bought all the Sea Island cotton produced in the Colony. Growers thereby receive remunerative prices for ginned cotton delivered in Kingstown on the scale of 3*s.* per lb. for ordinary quality, 3*s.* 4*d.* for good ordinary and 3*s.* 9*d.* to 4*s.* 7*d.* for superfine. This ready and remunerative market, as well as the increased confidence placed in the cotton industry as a result of the work of the Agricultural Department in connection with the control of the cotton stainer pest, led to the planting of 1,057 acres more than in the preceding year. The area planted in the 1917–18 season was 3,458 acres, as against 2,401 in 1916–17. The output in 1917–18 was 329,115 lb., an increase of 105 per cent. on the 160,168 lb. produced in 1916–17.

26. Satisfactory progress was made in the cultivation of corn (maize). Besides the quantity purchased by the Government Granary and that used for domestic consumption soon after it was reaped, there was exported to the United Kingdom and to West Indian Colonies 2,885 bushels, or 159,880 lb. The progressive increase in exports is shown below :—

1914	.. .. ..	761 bushels.
1915	.. .. ..	1,518 ,,
1916	.. .. ..	1,652 ,,
1917	.. .. ..	2,855 ,,

27. The sugar and syrup industries showed a satisfactory increased output, but it is doubtful whether this will be maintained, owing to the attention being given to Sea Island cotton. The following table gives the exports for the last five years :—

Year.	Sugar. lb.	Value. £	Syrup and Molasses. gals.	Value. £	Total Value. £
1913 ..	250	2	3,252	171	173
1914 ..	281,990	1,586	8,904	252	1,838
1915 ..	505,232	3,253	10,079	503	3,756
1916 ..	1,198,314	9,520	33,771	1,475	10,995
1917 ..	1,264,201	11,584	81,144	3,102	14,686

In 1916 there was manufactured 36,451 proof gallons of rum, of which 12,230 were exported in the same year; the corresponding figures in 1917 were 34,129 and 8,038.

28. The price of arrowroot was maintained at a remunerative figure. In the calendar year 1917, the exports amounted to 4,737,548 lb., as compared with 4,441,242 lb. in 1916.

29. The pea-nut was a minor crop of increasing importance, as was indicated by the export of 14,424 bushels of the value of £6,380, against 14,641 bushels in 1916, of the value of £3,660.

30. The Agricultural Co-operative Credit Societies continued to make progress, and all loans had been repaid when due. The total number of Societies was 21 with 925 members.

31. The Agricultural Department was occupied with cotton-breeding experiments and the production of supplies of pedigree Sea Island cotton seed of good ordinary grade for planting. Manurial and planting experiments with cotton and arrowroot were conducted. The maintenance of a supply of improved seed corn (maize) and trials of a large number of varieties of peas and beans were other features of the work undertaken. Entomological investigations connected with the life histories and control of the cotton stainer and bush bugs attacking cotton plants were continued. A gratifying degree of success had already attended the measures adopted for the destruction of the cotton stainer.

32. Of land under the Land Settlement Scheme in the Island of St. Vincent 17 allotments containing 28 acres were sold for £173 15*s.*, and of Crown Lands 6 allotments containing 106 acres were sold for £222 10*s.*

SHIPPING.

33. The number of vessels entered in 1917 was 306, of 167,949 tons; and 308 cleared, of 167,982 tons. One vessel was registered, of 61 tons.

IV.—EDUCATION.

34. The following table gives particulars in regard to primary education during the years 1916–17 and 1917–18:—

	1916–17.	1917–18.
Number of schools	27	27
Number of pupils on roll at 31st March	4,173	3,931
Number of pupils in average attendance..	2,037	1,945
Government grant	£1,753	£1,851
Cost per head in average attendance..	17*s.* 2*d.*	19*s.*

35. Eight of the 27 primary schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other 19 schools. The salaries of the teachers, however, and the greater part of the other expenses of these 19 schools are paid from public funds.

36. There were 8 other schools of a primary education standard, known as "Aided Schools," which were assisted by small grants from the Government.

37. For the secondary education of boys and girls the Government maintains in Kingstown a Grammar School and a Girl's High School. The average attendance in 1916–17 and 1917–18 was 41 and 40 boys and 21 and 20 girls.

38. To pupils of Primary Schools the Government offers annually an exhibition to the Grammar School tenable for four years with free tuition; and, biennially, a scholarship tenable for four years with free tuition and a grant of £2 a term towards the cost of the pupil's board and lodging in Kingstown. This scholarship can be won only by a pupil who resides not less than a mile beyond the boundaries of Kingstown. There are always four exhibitioners and two scholars in attendance at the Grammar School.

39. The Board of Education has also established a student-teachership by which certain Pupil Teachers of the third year are given two years at the Grammar School at the expense of the Primary Education Vote. The pupil continues to draw his pay while in attendance at the Grammar School.

40. Ordinances No. 20 and No. 21, of 1917, empower the Town Board of Kingstown and the Town Wardens of Georgetown to spend certain sums from Town Funds towards scholarships and exhibitions on lines similar to the Government Exhibitions.

V.—GOVERNMENT INSTITUTIONS.

Hospitals.

41. During 1917–18 there were 1,055 admissions to the Colonial Hospital, making, with those remaining from the previous year, 1,100 cases treated, as compared with 1,105 in 1916–17. The daily average number of patients was 55 in 1916–17 and 66 in 1917–18. The death-rate was 6·3 per cent. of the 1,100 cases treated; in 1916–17 it was 4·3 per cent. The number of operations performed was 168, being 19 less than in 1916–17.

42. The Casualty Hospital at Georgetown, with four beds, continued to fulfil its purpose of providing the means of treating emergency cases; 23 cases were treated in 1917–18.

43. At the Yaws Hospital 99 cases were treated in 1917–18, and 57 of these were discharged cured. At the usual District dispensaries and at special travelling dispensaries 1,178 other yaws patients were treated during the year. During 1916–17 and 1917–18 a campaign against yaws has been maintained at these dispensaries with the following results:—

Cases treated..	2,308
„ cured	1,152
„ still under treatment.. ..	619

Asylums.

44. There were 54 lunatics under detention and treatment at the Fort Charlotte Lunatic Asylum, of whom 10 were new admissions. Five were discharged cured and six died.

45. In the Leper Asylum 8 patients were maintained. None died.

46. The number of inmates of the Pauper Asylum on the 31st of March, 1917, was 58. During 1917–18 there were 22 new admissions. Six were discharged and 12 died.

Ankylostomiasis Campaign.

47. The campaign undertaken by the Rockefeller International Health Board for the eradication of the ankylostomiasis, or hookworm disease, was carried on by Dr. P. B. Gardner for nine months in 1917. Of 6,295 persons examined in that period 4,118 were found to be infected with hookworm; the number treated was 4,453, of whom 4,159 were cured. In connection with the campaign measures for faecal sanitation under Public Health regulations were carried out for preventing soil pollution so as to avoid re-infection and new infection. New latrines to the number of 414 were erected at homes

located within the area in which the campaign was conducted during the nine months.

Savings Bank.

48. The following is a comparative statement of the operations of the Savings Bank during the past two years :—

Year.	Number of depositors at 31st December.	Amount of deposits.	Amount of withdrawals.	Balance at credit of depositors at 31st December, including interest capitalised.
1916 ..	1,072	£5,111	£5,724	£17,058
1917 ..	1,006	4,365	6,420	15,437

The Savings Bank funds invested at the 31st of December, 1917, amounted to £18,143 2*s.* 5*d.*

VI.—JUDICIAL.

49. The police force consisted of a Chief and 48 West Indian non-commissioned officers and privates. In addition to ordinary police work they perform duties as sanitary inspectors, and in connection with district post offices, births and deaths registration, poor relief, and the operation of district telephone exchanges. The warders of the Kingstown Prison, except one, are members of the police force. The fire brigade of Kingstown consists of police constables, who receive supplementary pay for this service from the funds of the Kingstown Board.

50. The number of convicted persons committed to prison in 1917–18 was 271, of whom 123 were men and 148 women. There were also 44 juveniles who were whipped by order of Magistrates, but not detained in custody. The average number of prisoners in the Kingstown Prison was 34·56, as compared with 24·24 in 1916–17.

51. The number of cases reported to the police was 586, and 394 of these were brought before Magistrates. The number of summary convictions was 916 and the number of convictions in the Supreme Court was 13, as compared with 869 and 5 in 1916–17. In the Magistrates Courts 535 persons were discharged for want of prosecution and 248 were acquitted on the merits.

52. On charges of praedial larceny 233 persons were convicted. The number in 1916–17 was 113.

VII.—VITAL STATISTICS.

53. The population of the Colony in 1911 was 41,877, according to the census taken in that year. The Registrar-General's estimate of the population on the 31st of March 1918 is 50,669. This estimate is based on the census return for 1911 with corrections for births, deaths, immigration, and emigration.

54. Illegitimate births numbered 1,224 or 65·91 per cent. of the total number of all births. The percentage in 1916–17 was 67·87.

55. The following table gives the births, deaths, and marriages in the past two years :—

	1916–17.	1917–18.
Births	1,731	1,857
Males	875	948
Females	856	909
Birth-rate per 1,000 of the estimated population	37·04	36·64
Deaths	961	1,064
Death-rate per 1,000	19·44	20·99
Marriages	84	102
Marriage-rate per 1,000	1·6	2·01

56. The rainfall at the Agricultural Experiment Station in Kingstown, 80 feet above sea level, was 92·96 inches in 1917–18, 115·25 in 1916–17, 114·99 in 1915–16, and 72·67 in 1914–15. The figures for the past 19 years show that June to November are the months in which most rain falls.

57. Rain fell on 260 days in 1917–18, and the greatest fall for one day was 2·17 inches, on the 18th of April, 1917. The greatest fall for one day in the previous year was 6·88 inches, on the 3rd of November, 1916.

58. The reading of the barometer, corrected for instrumental error, elevation, and temperature, ranged from 30·142 inches on the 3rd of February, 1918, to 29·810 on the 14th of September, 1917.

59. The mean monthly temperature was 79° F. The highest was 80·1° F. in September, 1917, and the lowest was 76·9° F. in February, 1918. The highest temperature recorded was 88° F. on the 6th of July, 1917, and the lowest was 67°F. on the 13th and 14th December, 1917, and the 22nd, 23rd, and 24th of February 1918.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

60. Steamships of the Royal Mail Steam Packet Company, under contract with the Canadian Government, called at irregular intervals on their outward voyages to British Guiana and less frequently on their homeward voyages; and during the year nine steamers of the Direct Line also brought and took cargo and mails. Mails were also sent and received by occasional sailing vessels to and from Barbados and Grenada, with which Colonies there is direct communication by steamer with the United Kingdom and the United States.

61. The Postal Department, with headquarters in Kingstown and 17 district post offices, continued to provide facilities for the transaction of postal business. Mails were sent to the Windward side of the Island by motor-car and by rowing boat to the Leeward side, and by sailing vessel to the Grenadines.

62. There is no inland telegraph service. A subsidy of £300 a year is paid by the St. Vincent Government to the West India and Panama Telegraph Company in return for which the Colony receives daily news bulletins and participates in a system of reduced charges for cablegrams.

63. The Government maintains a telephone system which connects Kingstown with all the police stations in the small towns and villages

and with the places of residence and business of renters. Payment of ten shillings a month entitles a renter to be put in communication with all the districts of the Colony. There were 82 telephones rented by the general public in 1917–18, and 69 were attached to Government departments for official use. A small charge is made for messages sent by persons who are not renters of telephones. There are 77 miles of trunk lines and 80 miles of lines connecting renters with the exchanges. The revenue in 1917–18 was £708 13*s.* 4*d.* and the expenditure was £568 9*s.* 8*d.*

IX.—GENERAL OBSERVATIONS.

64. In consequence of war conditions there was a shortage of shipping for exports and imports and there were successive increases in the prices of foodstuffs and other imported articles.

65. The young men of the Colony continued to show their loyalty and patriotism by readily volunteering for war service with the British West Indies Regiment. Two detachments of recruits left the Colony in 1917–18.

66. In a despatch published in the Gazette and in the local press the Right Honourable the Secretary of State for the Colonies expressed his regret at the loss suffered by the Colony through the death of the Honourable Duncan Alexander MacDonald, whose long and valuable public services had been well known to successive Secretaries of State. Mr. MacDonald died on the 15th of January, 1918. He had served as a member of the Executive Council for 12 years and as a member of the Legislative Council for 21 years.

ANTHONY DE FREITAS,
Acting Administrator.

Government House, St. Vincent,
9th August, 1918.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

COLONIAL REPORTS—ANNUAL.

No. 1023.

GRENADA.

REPORT FOR 1918-19.

(For Report for 1917–18 see No. 968.)

Presented to Parliament by Command of His Majesty.

February, 1920.

LONDON:

No. 1023.

GRENADA.

ANNUAL GENERAL REPORT FOR 1918–19.*

GENERAL REMARKS.

Grenada is a rich and prosperous Colony. It is the most developed in permanent economic cultivation of all the small islands of the British West Indies. The staple products are cacao and spice. Muscovado sugar and rum are produced, but solely for local consumption. Although the island is extensively cultivated, there is yet room for further agricultural development and, where practicable, lands that are unsuitable for cacao are being utilised for other cultivation, especially coconuts, which in time may develop into a substantial auxiliary product. In the Southern part of the island there are good sugar cane lands that afford possibilities for the establishment of a central sugar factory well adapted for rail transport and within close and easy communication with the principal shipping port. There are, however, no tracts of virgin cultivable lands. The ridges and mountain slopes in the centre of the island are wooded and have already been disafforested as far in elevation as is prudent without encroachment on the reserve necessary for the protection of the water supply. The island offers therefore no opportunities for pioneer settlement. Its length is 21 miles and its greatest breadth does not exceed 12 miles and is about the size of the Isle of Wight. This small Colony exported in 1918 produce to the value of £699,096. It is prosperous for the reason that, unlike other small Colonies in which the plantations are usually held by a few proprietors, the lands in Grenada are divided into a large number of separate holdings. The population at 31st December, 1918, was estimated at 73,881, and there were 13,391 freehold owners, representing a much larger proprietary body in proportion to the population than will be found in any other British West Indian Colony. In paragraph 22 details are given of the number and areas of the holdings. These landowners form the backbone of the Colony's prosperity as the great majority live in the island and possess the wealth they produce. To illustrate the prosperity in another way, the value of the exports in the past five years reached the sum of £2,517,275 while the value of the imports in the same period was £1,607,368, or an excess of exports amounting to £909,907. These figures speak for themselves.

* A Map will be found in the Report for 1914–15 No. 852: [Cd. 7622–43].

There are 444 miles of public roads affording communication in all directions. Most of these roads are suitable for motor car traffic, and those needing improvement are receiving attention. Motor cars have been largely substituted for horses and carriages and even on plantations carts drawn by mules and oxen are giving place to motor vehicles for agricultural transport.

The Colony is supplied with a telephone service in all directions, and there is a daily post, except on Sundays and holidays, to and from every settlement in the island.

THE WAR.

2. Now that the War has ended, the extent to which Grenada participated may be here briefly stated. Far from the scene of strife, the Colony was spared the terrible realities of the struggle, and had only to endure, in common with other remote parts, the privations that resulted from the shortage of necessaries and the consequent high cost of living. In the earlier moments when enemy cruisers were at large, the presence of the "Karlsruhe" in Caribbean waters caused some anxiety, and it is of interest to record that the first indication of the destruction of this ship was traced by parts of the wreckage that floated ashore on the coasts of this Colony.

3. The call to arms found a ready response and many young men volunteered for service. Fifteen enlisted on their own account in various units of the British Army and 446 joined the Grenada Contingent to the British West Indies Regiment. Of these 7 were killed in action or died from wounds, and 30 died from disease on active service.

The distinctions earned were 2 Military Crosses, 1 Distinguished Flying Cross, 1 Distinguished Conduct Medal, 1 Meritorious Service Medal.

4. The Colony's expenditure on War services for the period of the War to 31st March, 1919, from public funds was as follows :—

For purchase of gift of cacao for Army and Navy	£6,000
Contribution to the Prince of Wales National Relief Fund	4,000
Expended on various services on account of the Grenada Contingent..	33,635
	£43,635

The contributions from private sources were :—

Subscriptions to the—	
British Red Cross Fund	£6,070
Prince of Wales National Relief Fund	1,250
West Indies Contingent Fund	228
Belgian Relief Fund	139
	£7,687

Besides these many sums were privately remitted by religious bodies and others.

Valuable donations of local produce were given for sale by many agriculturists and the proceeds paid to the British Red Cross Fund. A considerable quantity of clothing was made by women in the Colony and sent to the United Kingdom for distribution.

(628) Wt.32795/354. 1,250 & 90. 1.20. P.&F.,Ltd. G./11.

5. When notification of the Armistice was received an outburst of public rejoicing took place such as had never before been known within living memory. The enthusiasm was spontaneous and genuine, not alone because it was felt that the end of all danger and suffering was in view, but also from a sense of pride that the Colony had in its small way contributed to the enemy's downfall.

FINANCIAL.

6. The total revenue for the financial year to the 31st March, 1919, was £110,386, and the expenditure for the same period, £108,251. The surplus assets amounted to £59,511 including £39,154 surplus funds invested at interest. The public debt was £192,180, and the accumulated sinking fund in repayment £49,381, showing a very satisfactory financial condition.

The principal sources of revenue were :—

Customs duties	£55,325
Licences, excise duty, and internal revenue ..	35,757
Other sources	19,304
	£110,386

7. Specific Customs duties are imposed on the principal foodstuffs and drinks, and on a few other articles including arms, ammunition, and explosives, cement, matches, oil of all kinds, and tobacco. The duties are fixed on a moderate scale and at low rates on articles of common consumption. On all other goods not included in the free list, an ad valorem duty of 10 per cent. is payable.

8. A graduated export duty is levied on cacao, the Colony's principal product, on the following scale :—

When the price according to the London Market at the time of export to Europe, or according to the New York Market at the time of export to any place elsewhere than to Europe, does not exceed 50*s*. per cwt.	7½*d*. per cwt.
When the price exceeds 50*s*. per cwt. ..	1*s*. 3*d*. per cwt.

An additional export duty on cacao was also payable during the War.

Other export duties are :—

On Raw Cotton per cwt. or fractional part..	4*d*. per cwt.
Cotton Seed ,, ,, ,, ..	2*d*. ,,
Nutmegs ,, ,, ,, ..	6*d*. ,,
Mace ,, ,, ,, ..	1*s*. ,,

The receipts from export duties realised £6,251 and the War tax on cacao amounted to £3,255, making a total of £9,506. The declared value of the products subject to export duty were :—

Cacao	£519,365
Cotton	23,156
Cotton Seed	2,309
Nutmegs	103,417
Mace	31,691
	£679,938

The total export duty therefore represented only 1·39 per cent. of the value.

The War tax on cacao and the penny surcharge postage on letters to places within the British Empire were the only extra taxes imposed for providing additional revenue to meet expenses due to the War. The War tax postage for the financial year amounted to £455.

The excise duty on rum and trade duty on spirits sold contributed a seventh part of the revenue.

9. The internal taxes include a rate on houses and lands outside the boundaries of towns. On houses a graduated scale is payable on the assessed annual rental, from 4*s*. on a house of the rental value of £5 up to £1 8*s*. on houses of rental value up to £20, and a rate of 7 per cent. on a rental value above £20. Houses assessed at a less rental than £5 are exempt, unless the owner is beneficially possessed of half an acre or more of land.

The tax on land is 1*s*. an acre and 3*d*. an acre on lands on the islets around the Colony.

Houses within the towns are rated by District Boards for municipal purposes.

10. The following figures give the revenue and expenditure of the Colony for the past five years :—

	Revenue.	*Expenditure.*
1914–15	£93,198	£95,660
1915–16	99,027	106,144
1916–17	114,525	108,077
1917–18	106,138	109,390
1918–19	110,386	108,251

11. In September the liquor and cacao dealers' licences were increased, not alone for revenue purposes but to reduce the number, which had become too numerous owing to the low rates payable. Simultaneously the import duties on beer, wines, spirits, and tobacco, and the trade duty on spirits sold in the Colony, were increased. With these additional rates it was anticipated that the revenue in 1918–19 would easily have exceeded £114,000, but in the last months of the year, contrary to expectations from averages in the previous years, a disappointing shrinkage occurred in imports that affected the year's revenue.

12. The Colony is progressing with upward strides in its atmosphere of prosperity and demands for improved conditions and conveniences of life that a few years back were considered beyond the means of the Colony are now regarded as necessities. An increased revenue to meet all needs can easily be raised without hardship by an income tax, and as the wealth of the Colony is obtained entirely from the soil, by an increased land tax.

Local Loan.

13. In July, 1917, an Ordinance was passed to authorise a loan of £100,000 for certain public works, mainly for the improvement of roads and bridges, and the provision of water supplies, and for other requirements of minor importance. In September of that year a prospectus was issued inviting applications for debentures

of £20, £50, £100, £500, and £1,000 for a period of thirty years at 5 per cent. interest, the Government reserving the right of redemption by annual drawings after the expiration of ten years. The response at 31st March, 1919, reached the sum of £68,510, which included contributions from subscribers in Grenada amounting to £45,150, and from neighbouring Colonies to £23,360. Of the sum raised, £27,300 was invested in the Imperial War Loan, and £32,000 was retained to meet the cost of the works to be undertaken in 1918 and 1919.

So far the loan has not been taken up in Grenada to the extent that was anticipated. Provision was made for the issue of debentures at low rates in the belief that residents with small savings would welcome the opportunity for such investment, but this has not proved to be the case. Very few debentures at the small figures have been called for and £46,000 of the total amount was paid up in £1,000 shares. It seems that better terms than the loan offers are obtainable in the Colony on the security of valuable land.

Municipal Bodies.

14. The island is divided into six parishes or districts, and a District Board in each has the management of local affairs. The Boards are composed of elected and nominated members. Half are elected by voters registered in the district and half are nominated by the Governor. The life of each Board runs for two years. The Boards have the power to impose local rates in towns, and represent in their respective districts the local authority in regard to water and sanitation, and are charged with the upkeep of public roads, other than main roads, for which purpose they receive an annual grant from general revenue.

TRADE, INDUSTRIES, AND SHIPPING.

Imports.

15. The value of the imports and exports representing the trade of the Colony amounted to £1,080,109.

The value of the imports was £377,332. The United Kingdom supplied £76,691, Canada £51,827, Newfoundland £13,829, the neighbouring Colonies of Barbados, Trinidad, and British Guiana £55,895, and other places £14,873, making a total from British countries of £213,115. The United States supplied £151,980, and other foreign places £12,237, making a total of £377,332.

Food and drink supplies and tobacco amounted to £186,095, and manufactured and other goods to £191,237. Of foodstuffs, the United Kingdom supplied £6,315, as against £60,847 from the United States, and of manufactured and other goods the United Kingdom supplied £67,473, and the United States £91,133.

16. Owing to dislocation of trade due to the War, it is useless to go into figures for purposes of comparison. The restricted exports from the United Kingdom and other places, and the high cost of goods, caused a reduced consumption, and many classes of goods, although showing higher values, were imported in less quantity.

17. The Colony had to look to the United States for many supplies that before the War were almost exclusively ordered from Great Britain. But a diversion of trade in this direction was already taking place even prior to any of the disturbing influences in recent years. Because of its proximity, New York is the natural market for the West Indies, and if the United States can compete in supplying goods required, trade in that direction is bound to expand. A few examples are given as follows :—

	1910.	1915.	1918.
	£	£	£
Boots and shoes, U.K. ..	4,126	1,637	530
,, ,, U.S.A. ..	1,460	3,153	6,048
Cement, U.K.	1,056	1,786	250
,, U.S.A.	—	508	3,924
Cordage, U.K.	985	1,061	668
,, U.S.A.	161	200	1,084
Cottons, U.K.	21,161	18,480	25,572
,, U.S.A.	447	3,918	14,014
Hardwood, U.K.	6,256	4,013	2,558
,, U.S.A.	1,438	2,226	5,817
Paper, U.K.	501	1,038	1,187
,, U.S.A.	152	378	1,701
Soap, U.K.	1,861	3,419	4,749
,, U.S.A.	507	698	4,540

EXPORTS.

18. The value of the exports amounted to £702,777, of which £699,096 represented the produce of the Colony.

The direction of the exports was as follows :—

Great Britain	£386,348
Other parts of British Empire	26,226
United States	290,039
Other foreign Countries	164
	£702,777

The principal products exported were :—

	Quantity.	Value.
Cacao	135,572 cwts.	£519,365
Cotton, raw	2,168 ,,	23,156
Lime Juice, raw	172,725 gallons	12,108
,, ,, concentrated	5,810 ,,	2,147
Cotton Seed	5,479 cwts.	2,309
Nutmegs	23,053 ,,	103,417
Mace	3,420 ,,	31,691

Of the cacao, 41 per cent. went to Great Britain, 56 per cent. to the United States, and 2 per cent. to Canada. Of the nutmegs, 54 per cent. was exported to Great Britain, 39 per cent. to the United States, and 4 per cent. to Canada. Great Britain received 95 per cent. of the mace and all the lime juice and raw cotton.

Shipping.

19. The shipping entered and cleared is shown in the following table :—

	Entered.		Cleared.	
	No.	Tonnage.	No.	Tonnage.
Sailing vessels	468	10,736	466	10,745
Steam vessels	94	249,522	94	249,522

Of the sailing vessels entered, 434 were British, 3 Dutch, 1 American, and 30 Venezuelan. These sailing vessels are for the most part small sloops owned in the Colony, that trade with the neighbouring islands.

Of the steam vessels entered 92 were British, 1 American, and 1 Venezuelan.

Steamship Services.

20. The steamships that call regularly at Grenada are vessels of the Trinidad Shipping and Trading Company, the Royal Mail steamers subsidised by Canada for a service between Canada and the West Indies and British Guiana, and steamers belonging to Scruttons, Sons & Co. The first named ply between New York and the West Indies, and provide an approximate fortnightly service. Grenada is the first and last port of call on the outward and homeward voyages.

The Royal Mail steamers, besides bringing Canada into close touch with the West Indies, were the only means of communication by steamer between the Northern and Southern Colonies, and the service was a great boon to the West Indian community.

The Scruttons line of steamers called at intervals, bringing all freight that offered from the United Kingdom and conveyed all the Colony's produce exported to Europe.

Productions and Natural Resources.

21. Grenada is exclusively an agricultural Colony. If any wealth lies beneath the soil, its existence has not yet been ascertained, but it is said that there are indications that point to the presence of oil, bauxite, and copper. It is not unreasonable to believe that such mineral deposits exist, as the island is within sixty miles of Trinidad, where oil in large quantities is obtained. Geological and scientific investigation might result in valuable discoveries that would not only be an asset to the Colony, but might prove a useful addition to the mineral resources within the Empire.

22. The area of the Colony is estimated at 76,548 acres, of which about 27,550 are in permanent cultivation, not including numerous vegetable gardens and pasture lands. The area assessed for taxes was 74,296 acres. There are 143 estates of 100 acres and over, and 13,248 small holdings, the areas of which are given in the following table :—

2½ acres and under	10,482
Over 2½ ,, to 5 acres	1,762
,, 5 ,, to 7 ,, ...	348
,, 7 ,, to 10 ,, ...	243
,, 10 ,, and under 100 acres	413

Houses to the number of 6,543 outside of towns were included in the assessment list for taxes.

The area of Carriacou is estimated at 8,467 acres, of which 3,189 are in cultivation. Almost the whole of the lime juice and raw cotton exported comes from that dependency.

23. The lands in Grenada are exceptionally favourable for cacao. This cultivation forms a belt round the greater part of the island from the sea coast extending inland in the valleys and up the slopes to the ridges in the interior to the elevation of about 700 ft. Above that height the trees do not bear well.

Nutmegs during the War were in great demand, and the price in 1918 rose to figures that gave unprecedented returns to those who fortunately owned such produce.

The price of raw cotton also exceeded previous records. The cotton produced is almost entirely Marie Galante, and the cultivation is in the hands of small growers, chiefly in Carriacou. Their feeling of lively satisfaction in getting such unusual rewards for their industry was in many instances manifested by generous subscriptions to the Red Cross Fund.

Lime cultivation has been tried to some extent in Grenada, but not with promising results. All citrus plants seem not to fare well and are subject to attacks of black blight, which is prevalent and difficult to eradicate.

Coconuts are being extensively planted and in time to come will probably add largely to the Colony's economic production.

Owing to the restricted supply of imported foodstuffs, and to high prices prevailing owing to the War, every encouragement was given to the growing of ground provisions. The results have been a useful object lesson to the people as the advantages to be gained by helping themselves have been proved to their knowledge. In previous years they depended largely on imported wheaten flour from the United States and ground provisions from the neighbouring Colonies, but are able now to rely more on their own produce. As an illustration, twenty years ago when the population was considerably less than at present, 30,037 barrels of flour were imported, as against 23,066 in 1918.

24. Apart from the manufacture of sugar and rum, there are no industries of any appreciable consequence. Soap-making has been attempted, and there is a tannery that produces a small amount of leather, and an ice factory supplies this tropical necessity.

Twelve rum distilleries were in operation. The stock in hand at the commencement of the year was in proof gallons 14,008; the quantity made 49,934, and the amount duty paid for consumption 54,221. Added to this 2,370 proof gallons were imported from Barbados.

The sugar estates are small concerns that cannot supply local needs. As many as 125 sugar works actually exist, but of these 69 operate in the most primitive way with cattle mills; 20 use water power, 10 steam, and 26 have small oil engines. A few of the larger estates make centrifugal sugar, but all the others produce what is called "wet sugar." The total output is not known, and has to be largely supplemented from the neighbouring sugar colonies. The imported quantity in 1918 amounted to 22,821 cwts. of the value of £27,058, not including refined sugar.

Although the local production might be increased in most localities, only in the Southern part of the island is there any extensive area available that could be adapted by enterprise for the manufacture on a large scale. Within this area two of the best equipped sugar works exist at present.

Forestry.

25. There is a forest reserve of Crown Lands on the hills in the centre of the island extending North and South about 4½ miles, and covering an area of about 2,550 acres. This reserve is necessary for the protection of the water supply. Valuable woods exist, such as mahogany and white cedar, but not in quantity that would be available for any commercial enterprise.

Cost of Living and Wages.

26. The cost of living has greatly increased as it has everywhere else. The price of imported foodstuffs has in the case of many commodities increased by 100 per cent., and other necessities of life even of the cheapest description have risen over 200 per cent. The ordinary wages for able-bodied labourers were for men 1*s.* to 1*s.* 4*d.*, and for women 10*d.* to 1*s.* Long after all rates of pay ceased to have their former value, the same scale was maintained in the hope that after the termination of the War prices would fall, but this has not happened, and a higher grade of pay in all classes of employment has become obligatory. Recently rates of pay to labourers were increased to a minimum of 1*s.* 4*d.* for men and 1*s.* 2*d.* for women, but a satisfactory scale cannot be fixed until conditions return to a settled stage.

There was no dearth of labour. It is estimated that about 18,000 persons are employed in agriculture. Unlike sugar cane cultivation which demands a large labour supply, in the case of established cacao and nutmegs the requirements are comparatively small.

Currency, Banking, Weights, and Measures.

27. The currency is the coinage of Great Britain, and silver is principally in circulation. Gold and notes of the United States also pass current.

Branches of the Colonial Bank and Royal Bank of Canada are established, and have a note circulation.

Imperial weights and measures are in use.

POPULATION AND VITAL STATISTICS.

28. The estimated population at 31st December, 1918, was 73,881.

The immigration and emigration returns record 3,752 arrivals and 4,333 departures from the Colony.

The births, deaths, and marriages registered were respectively 2,449, 1,312, and 301.

The birth-rate was 34·66, and the death-rate 17·08 per 1,000.

The infant mortality among children under two years, though less than in the preceding year, was considerable, the death-rate being 38·4 per cent. of the total of all deaths, as against 42·9 in 1917. This large death-rate among young children is often the result of improper feeding, due perhaps to ignorance and neglect, and no doubt in many

cases to the poverty of parents. To succour young children in their early stages of life is a social problem that exists everywhere. The Legislature made a grant from public funds to provide a supply of milk in all districts to infants of poor parents, and to this help may be ascribed the reduction in the death-rate below the preceding year. Apart from this infant mortality among the poorer classes, the death-rate was very low. The Colony can be described as an extremely healthy one, for Europeans as well as for those born and bred in these parts.

CLIMATE AND METEOROLOGICAL.

29. The climate is mild and in the dry season is salubrious and pleasant. This period usually lasts from January to the end of May, when the rains commence. The latter part of the year is sometimes damp and as a rule hot. Daylight never exceeds thirteen hours and there is not more than an hour's difference between the longest and the shortest day. The island is south of the hurricane zone, and has been fortunately free from any cataclysm or seismic disturbance. The last earthquake of any severity occurred in 1888.

30. The meteorological records are taken at the Government Station at Richmond Hill, at an elevation of 509 feet overlooking the town of St. George. The maximum temperature in the sun was 138 degrees, and in the shade 90 on the 4th September. The temperature in the shade varied in the year from 69 to 90 degrees. The rainfall was 81·40 inches, 3·77 more than the average in the three preceding years. The minimum for a month was 1·60 inches in April, and the maximum 11·76 inches in October. The greatest fall at any one time was 3·50 inches on 29th May. The rainfall, of course, varied considerably in different parts of the island.

EDUCATION, NEWSPAPERS, AND PUBLICATIONS.

Primary Education.

31. Elementary education is controlled by a Board of Education comprised, by law, of the Governor as President and of not less than ten members, of whom one half shall be and one half shall not be Roman Catholics. The members are appointed by the Governor and hold office for two years.

There are 59 primary schools, of which 11 are Government schools, and 48 denominational grant-in-aid schools, namely, 27 Roman Catholic, 14 Anglican, 5 Wesleyan, and 2 Presbyterian. The number of pupils on the rolls at 31st December, 1918, was 9,845. The average attendance was 5,645. The Government grant for primary education was £7,331, and the voluntary contributions £779.

Elementary education is compulsory between the ages of six and twelve years, but existing circumstances do not warrant stringent enforcement.

Secondary Education.

32. Secondary education is provided by a Government Boys' School, and by two schools for girls, maintained by the Roman Catholic and Anglican denominations, assisted by a Government

grant of £150 to each school. 127 candidates went up for the Cambridge Local Examination. The Government Boys' School contributed 13 out of 15 for the senior examination of whom 9 passed, including 5 with honours.

33. The Grenada external scholarship established by law in 1916 is open to public competition each year to candidates with certain local qualifications. It is awarded on the results of the Cambridge Local Examination to the competitor who is reported by the Examiners to have the best claim. The annual value is £175, and offers opportunities to take up a university career in any selected professional branch in the United Kingdom, Canada, or the United States. Two candidates have been successful in obtaining this scholarship since it was established in 1916.

Newspapers and Government Publications.

34. There are two newspapers—The West Indian, published daily, and the Grenada People, published bi-weekly.

The Government publishes a Gazette on the 1st and 15th of each month, and other special issues at other times when necessary. The Gazette is exclusively limited to Government notices and publications.

A useful handbook is published by the Government, and can be purchased on application. Besides the up-to-date information it gives on all matters of public concern, it contains an interesting history of the Colony.

LOCAL FORCES AND POLICE.

Volunteers.

35. A small volunteer corps is maintained for local defence, which includes a maxim gun section. The men were kept in training under the supervision of a Staff Officer appointed from the Regular Forces.

Police.

36. The Police Force is composed of one Officer and 83 N.C.O.'s and Constables, including an Armourer and European Sergeant Major. The force is armed and trained as a semi-military body.

A number of Rural Constables are also enrolled to assist the police when their services are needed.

POSTS, TELEGRAPHS, AND TELEPHONES.

39. Steamers of the Trinidad Shipping and Trading Company provided a fairly regular fortnightly mail and cargo service between New York and Grenada, and a similar service was maintained between Canada and the West Indies by steamers of the Royal Mail Company. There was no regular service to and from Europe. Mails and parcels post were dispatched as opportunities offered. After the termination of the War, these opportunities became more frequent. Parcels post from the United Kingdom were usually conveyed by the Scruttons steamers.

The want of a regular mail and an efficient passenger service between the United Kingdom and the West Indies, with steamers calling at each Colony, is a convenience that is urgently desired.

There is an inland daily post to all district towns and principal centres.

40. The cables of the West India and Panama Telegraph Co. connect the Colony with the neighbouring islands and with the outer world.

There are no inland telegraphs.

41. The Government provides a telephone system extending to all parts of the island. At the close of the financial year, the service included 523 connexions.

ROADS AND COMMUNICATIONS.

42. Grenada is especially well favoured with roads that intersect the Colony in all directions. Although there is not much level ground and there are no straight runs for any distance, the configuration of the island affords easy gradients, that render the roads suitable for motor car traffic. There are nearly 200 motor cars owned in the Colony. 444 miles of roads are maintained at public expense.

The Government runs a daily motor car passenger service to and from St. George's round the eastern side of the island to Sauteurs at the North end.

A coastal service performed by two small steamers of the Royal Mail Company supplied a passenger and cargo service round the island, with a weekly connexion with Carriacou. The Company has, however, lately withdrawn these steamers on the termination of their contract. Tenders have been invited for a new service, which it is hoped will soon be obtained.

HOSPITALS AND ASYLUMS.

A house-surgeon is in charge of the Colony Hospital, and the staff includes a European nurse matron.

Provision has been made for the erection of a suitable building as a private ward for a better class of paying patients, which, when completed, will supply a much felt want.

The other institutions in St. George are supervised by the Colonial Surgeon assisted by the District Medical Officer.

Dispensaries are established in all the districts at which the medical officers attend for the purpose of treating patients.

MEDICAL.

45. The public health of the Colony was reported by the Colonial Surgeon as on the whole satisfactory. The death-rate per thousand was 17·08, as compared with 20 in the preceding year, and 20·50 in the past decade.

The year was marked in the medical history of the Colony by the adoption of vigorous measures for the eradication of the loathsome diseases of syphilis and yaws.

With regard to the former, the Colonial Surgeon writes: " The year 1918 will be memorable as one in which an Ordinance, introduced in the previous year, was put into practice for the compulsory treatment of venereal diseases. Complete regulations for carrying out its provisions were duly drawn up and operations commenced on 1st June."

In this respect Grenada has been the pioneer Colony in the West Indies in starting a crusade against this terrible scourge. The Medical Officers displayed energy and enthusiasm, and the results up to the end of the financial year are described as "eminently satisfactory." It is reported in connexion with the treatment by injections of Novarsenobillon that patients submitted willingly, and latterly came forward voluntarily asking for injections. The cases of venereal disease and syphilis treated amounted to 1,579, of which 220 were discharged as cured.

There seems to be every prospect that this work, if continued with the same energy and care, will soon produce a check on infection that will be a lasting benefit to the people.

46. The kindred disease of yaws was also attacked by an intensive treatment with Novarsenobillon. It is said the disease in its worst forms succumbs in a short time to the effects of this drug. The results are reported to be so encouraging as to hold out every hope that in a comparatively short period the disease will practically cease to exist in Grenada.

CONCLUDING REMARKS.

47. The past year that will ever be remembered as the year of the glorious triumph of the Allies will also be recalled in the Colony as one of unexampled prosperity. Looking back on the protracted period of the War, the enormous sacrifice of material wealth, the appalling loss of life and suffering, and the immense strain imposed on the Mother Country and on other parts of the Empire, the inhabitants of this Colony have to be more than thankful that they had to bear no greater trials than were caused by a limited deprivation of the necessities of life, and that their island home has been fortunately able to emerge from the trying times in a state of financial prosperity, and with an outlook full of promise for the future.

E. D. LABORDE,
Acting Colonial Secretary.

Grenada,
25th September, 1919.

COLONIAL REPORTS, &c.

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:

No. 1037.

ST. VINCENT.

REPORT ON THE BLUE BOOK OF ST. VINCENT FOR THE YEAR 1918–19.*

I.—FINANCIAL.

General Revenue and Expenditure.

1. The financial position of the Colony on the 31st of March, 1919, was :—

Surplus at 1st April, 1918		£1,460 16 7
Revenue in 1918–19..	£41,503 3 10	
Expenditure in 1918–19	36,356 5 6	
		5,146 18 4
Surplus at 1st April, 1919 ..		£6,607 14 11

2. These figures are exclusive of £599 6*s.* 8*d.* received from the funds of the Rockefeller International Health Board, of which £240 18*s.* 5*d.* was expended for the purposes of a campaign against the ankylostomiasis (hookworm) disease, the remainder, £358 8*s.* 3*d.*, having been refunded to the Board at the close of the campaign in September, 1918 ; and also of the sum of £1,235, being the accumulated contributions at the close of the year towards the redemption of loans, which have been credited to Revenue and form part of the Colony's gross surplus.

3. In the last two financial years the total gross revenue and expenditure amounted to :—

	Revenue.	Expenditure.
1917–18	£37,535 ..	£34,555
1918–19	42,488 ..	36,597

4. The net local revenue and expenditure in the same years amounted to :—

	Local Revenue.	Expenditure against Local Revenue.
1917–18	£35,102 ..	£32,706
1918–19	41,503 ..	35,105

*A Sketch Map will be found in the Report for 1914–15, No. 858 [Cd. 7622–49.]

5. The principal items of revenue in the last two years were :—

	1917–18.	1918–19.
Import duties	£13,438	£17,620
Export duties	1,682	2,520
Excise duty on rum	5,938	6,723
Land and House tax	3,206	3,282
Income tax	722	798

6. The sums received for Customs duties and for Export duties in 1918–19 were respectively more than the Estimates by £3,620 or 25·9 per cent. and £145 or 6·1 per cent. The large increase under Import duties was due principally to the extension, by Ordinance No. 7 of 1918, of the period for the collection of additional duties to include the year under review.

7. The revenue from Excise during the year was £6,723, showing an increase of £1,523 over the estimate and £785 in excess of the receipts of the previous year.

8. In Post Office revenue there was a decrease of £146 on the estimate for 1918–19 due to the non-realization of the estimate for sale of War stamps.

9. The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions of the Soufrière volcano in 1902–3, is invested, and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this Fund, amounting to £750, is put to general revenue.

10. There are other funds not derived from taxation, such as the Graham Bequest Fund and the Land Settlement Fund. From the Graham Fund, contributions are provided to meet certain expenditure in connection with the Colonial Hospital, and from the other Fund, which is derived from an Imperial grant-in-aid in 1898, roads to the settlers' allotments are maintained.

Public Debt.

11. On the 1st of April, 1918, the public debt of the Colony was £9,900. During the year £700 was paid for the Post Office premises, leaving the public debt at £9,200, which includes a loan of £1,500 raised by the Kingstown Board in 1914, for which the Colony is responsible in case of default.

12. The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to Planters made from funds supplied by the Imperial Treasury, which was £4,019 5*s.* 0*d.* on the 31st of March, 1919, and towards the repayment of which £3,317 14*s.* 5*d.* has been received from planters.

Currency.

13. British and American gold, five-dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling and commercial and banking accounts in dollars and cents.

(679) Wt.32796/354. 1,250 & 90. 7.20. G.11/14.

Finances of Municipalities.

14. The total revenue and expenditure of the chief towns during the last two years were :—

Town.	Revenue. 1917	Revenue. 1918	Expenditure. 1917	Expenditure. 1918.
Kingstown ..	£1,952	£2,061	£1,749	£1,903
Georgetown ..	181	172	195	156
Calliaqua ..	59	55	46	45
Layou.. ..	75	65	73	53
Barrouallie ..	76	78	58	48
Chateaubelair	35	44	26	37

II.—TRADE AND AGRICULTURAL INDUSTRIES.

Imports and Exports.

15. The total values of imports and exports in the last two years were :—

Year.	Imports.	Exports.	Total Trade.
1917 ..	£122,114	£104,397	£226,511
1918 ..	134,699	195,205	329,904

16. The chief places whence the imports came and the values for the last two years were :—

	1917.	1918.
United Kingdom	£36,492	£53,114
Canada	27,950	27,387
British West Indies ..	11,143	9,984
India	330	145
Newfoundland	2,028	1,664
Other British Colonies ..	1,685	290
United States of America	38,512	38,604
France	1,476	992
Other Countries	2,498	2,519
	£122,114	£134,699

17. The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1917.	1918.
United Kingdom	29·88	39·43
United States of America	31·54	28·66
Canada	22·89	20·33
All other Countries ..	15·69	11·50

18. Of the £134,699 of imports, £43,711 was the value of articles classified under "Food, Drink, and Tobacco," and £74,712 was the value of manufactured articles.

EXPORTS.

19. The destinations of the exports of the produce of the Colony in 1917 and 1918 were as follows :—

	1917.	1918.
United Kingdom	£58,276 ..	£144,618
Canada	4,764 ..	11,751
United States of America	3,709 ..	4,122
British West Indies	28,896 ..	29,171
British Guiana	1,114 ..	3,394
Other Countries	2,975 ..	722
	£99,734	£193,778

20. The principal products of the Colony exported were :—

	1917.	1918.
Arrowroot	£40,296 ..	£95,828
Cotton—		
Sea Island	16,934 ..	58,119
Marie Galante	1,848 ..	2,803
Cocoa	3,911 ..	6,021
Sugar		
Muscovado	6,249 ..	5,296
Syrup and Molasses ..	3,102 ..	4,796
Animals	3,762 ..	2,356
Cassava starch	1,420 ..	3,831
Pea Nuts	380 ..	6,046

AGRICULTURAL INDUSTRIES.

21. The Government Cotton Ginnery and Granary continued to buy seed-cotton and corn (maize) on profit-sharing terms. The following quantities were dealt with during the season :—Sea Island seed-cotton 386,431 lb., Marie Galante seed-cotton 117,588 lb., corn on cob 71,883 lb., grain corn 54,335 lb. The corn when kiln-dried amounted to 104,899 lb., and was stored in bins to provide a reserve of cereal food for the drier months of 1919.

The co-operative enterprises continued to receive the support of the small growers, and they have had a beneficial influence on both cotton and corn-growing in the Colony. The number of pass books issued to growers was 2,375.

22. Since October 1917, the local Government, on behalf of the Imperial Government, have bought all the Sea Island cotton produced in the Colony. Growers thereby received remunerative prices for ginned cotton delivered in Kingstown on the scale of 3*s.* per lb. for ordinary quality, 3*s.* 4*d.* for good ordinary and 4*s.* 2*d.* to 4*s.* 7*d.* for superfine. This ready and remunerative market, as well as the increased confidence placed in the cotton industry as a result of the work of the Agricultural Department in connection with the control of the cotton stainer pest, led to the planting of 1,125 acres more than in the preceding year. The area planted in the 1917–18 season was 3,458 acres as against 4,583 acres in 1918–19. The output in 1918–19 was 437,273 lb. or 95·4 lb. per acre, as against 329,115 lb. in 1917–18.

23. Satisfactory progress was made in the cultivation of corn (maize). Besides the quantity purchased by the Government Granary and that used for domestic consumption soon after it was reaped, 170,079 lb. was exported as against 159,880 lb. in 1917–18. The progressive increase in exports is shown below :—

1914	761 bushels.
1915	1,518 „
1916	1,652 „
1917	2,855 „
1918	3,037 „

24. The sugar and syrup industries were well maintained, although the exports during the year were not as large as in the two previous years. The following table gives the exports for the last five years :—

Year.	Sugar. lb.	Value. £	Syrup and Molasses. gals.	Value. £	Total Value. £
1914	281,990	1,586	8,904	252	1,838
1915	505,232	3,253	10,079	503	3,756
1916	1,198,314	9,520	33,771	1,475	10,995
1917	1,264,201	11,584	81,144	3,102	14,686
1918	316,460	3,297	79,834	4,796	8,093

In 1916 there was manufactured 36,451 proof gallons of rum, of which 12,230 were exported in the same year ; the corresponding figures in 1917 were 34,129 and 8,038, as compared with 20,858 gallons manufactured in 1918, none of which was exported.

25. The position in regard to the arrowroot market during the year was unstable. In the calender year 1917 the exports amounted to 4,737,548 lb. as compared with 5,084,262 lb. in 1918.

26. The pea nut was a minor crop of increasing importance, as was indicated by the export of 13,489 bushels of the value of £6,046, against 14,424 bushels in 1917 of the value of £6,380.

27. The Agricultural Co-operative Credit Societies continued to make progress, and all loans had been repaid when due. The total number of Societies was 21 with 1,060 members, as compared with 925 members in the previous year.

28. The Agricultural Department continued to be occupied with cotton-breeding experiments and the production of supplies of pedigree Sea Island cotton-seed of ordinary grade for planting. Manurial and planting experiments with cotton and arrowroot were conducted. The maintenance of a supply of improved seed corn (maize) and trials of a large number of varieties of peas and beans were other features of the work undertaken. Entomological investigations connected with the life histories and control of the cotton stainer and bush bugs attacking cotton plants were continued. The measures adopted for the destruction of the cotton stainer have proved efficacious.

29. Of land under the Land Settlement Scheme in the Island of St. Vincent, 8 allotments containing 22 acres were sold for £129 10*s.* 6*d.*, and of Crown Lands 927 acres were sold for £481 8*s.* 4*d.*

SHIPPING.

30. The number of vessels entered in 1918 was 287, of 104,548 tons; and 284 cleared, of 107,369 tons. Six vessels were registered, of 111 tons total.

III.—EDUCATION.

31. The following table gives particulars in regard to primary education during the years 1917–18 and 1918–19:—

	1917–18.	1918–19.
Number of Schools	27	27
Number of pupils on roll at 31st March	3,931	3,914
Number of pupils in average attendance	1,945	1,861
Government Grant	£1,851	£1,724
Cost per head in average attendance	19*s.*	18*s.* 7*d.*

32. Eight of the 27 primary schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other 19 schools. The salaries of the teachers, however, and the greater part of the other expenses of these 19 schools are paid from public funds.

33. There were 9 other schools of a primary education standard, known as "Aided Schools", which were assisted by small grants from the Government.

34. For the secondary education of boys and girls the Government maintains in Kingstown a Grammar School and a Girls' High School. The average attendance in 1917–18 and 1918–19 was 40 boys and 21 and 20 girls.

35. To pupils of Primary Schools the Government offers annually an exhibition to the Grammar School tenable for four years with free tuition; and, biennially, a scholarship tenable for four years with free tuition and a grant of £2 a term towards the cost of the pupil's board and lodging in Kingstown. This scholarship can be won only by a pupil who resides not less than a mile beyond the boundaries of Kingstown. There are always four exhibitioners and two scholars in attendance at the Grammar School.

36. The Board of Education has also established a student-teachership by which certain pupil teachers of the third year are given two years at the Grammar School at the expense of the Primary Education Vote. The pupil continues to draw his pay while in attendance at the Grammar School.

37. Ordinances No. 20 and No. 21 of 1917 empower the Town Board of Kingstown and the Town Wardens of Georgetown to spend certain sums from Town Funds towards scholarships and exhibitions on lines similar to the Government Exhibitions.

IV.—GOVERNMENT INSTITUTIONS.

Hospitals.

38. During 1918–19 there were 982 admissions to the Colonial Hospital, making, with those remaining from the previous year, 1,049 cases treated, as compared with 1,100 in 1917–18. The daily average number of patients was 86 in 1918–19. The death rate was 5·7 per cent. of the 1,049 cases treated; in 1917–18 it was 6·3 per cent. The number of operations performed was 352, being 184 more than in 1917–18.

39. The Casualty Hospital at Georgetown, with four beds, continued to fulfil its purpose of providing the means of treating emergency cases; 32 cases were treated as against 23 in 1917–18.

40. At the Yaws Hospital 80 cases were treated in 1918–19 and 49 of these were discharged cured. At the usual District Dispensaries and at special Travelling Dispensaries 999 other yaws patients were treated during the year. The number under treatment at the close of 1917–18 was 619.

Cases admitted	380
„ discharged cured	299
„ still under treatment	324
„ unaccounted for	376

From the inception of this campaign on 1st April, 1916, to 31st March, 1919, the following results have been obtained:—

Total cases treated	2,688
„ „ discharged cured	1,451
„ „ under treatment	324

Asylums.

41. There were 46 lunatics under detention and treatment at the Fort Charlotte Lunatic Asylum, of whom 12 were new admissions. Four were discharged cured and five died.

42. In the Leper Asylum there were 8 patients on the 31st March, 1918. Four were admitted during the year and two died.

43. The number of inmates of the Pauper Asylum on the 31st March, 1918, was 62. During 1918–19 there were 26 new admissions. Six were discharged and fourteen died.

Ankylostomiasis Campaign.

44. The campaign undertaken by the Rockefeller International Health Board for the eradication of the ankylostomiasis, or hookworm disease, was carried on by Dr. P. B. Gardner to 9th September, 1918. Of 21,430 persons examined, 12,395 were found to be infected with hookworm; the number treated was 11,577, of whom 10,279 were cured. In addition the sanitary preventive work of providing fly-proof latrines and closets of an approved pattern has proceeded uninterruptedly throughout the year, notwithstanding the closing down of the campaign by the Rockefeller International Health Board on the 9th September, 1918. New latrines to the number of 450 were erected at homes located within the area in which the campaign was conducted.

Savings Bank.

45. The following is a comparative statement of the operations of the Savings Bank during the past two years :—

Year.	Number of depositors at 31st December.	Amount of deposits.	Amount of withdrawals.	Balance at credit of depositors at 31st December, including interest capitalised.
1917	1,006	£4,365	£6,420	£15,437
1918	993	5,004	4,697	16,167

The Savings Bank funds invested at the 31st of December, 1918, amounted to £18,143 2*s.* 5*d.*

V.—JUDICIAL.

46. The police force consisted of a Chief and 48 West Indian non-commissioned officers and privates. In addition to ordinary police work they perform duties as sanitary inspectors, and in connection with district post offices, births and deaths registration, poor relief, and the operation of district telephone exchanges. The warders of the Kingstown Prison are members of the Police force. The fire brigade of Kingstown consists of police constables, who receive supplementary pay for this service from the funds of the Kingstown Board.

47. The numbers of convicted persons committed to prison in 1918–19 was 220, of whom 141 were men and 79 women. There were also 26 juveniles who were whipped by order of Magistrates, but not detained in custody. The daily average number of prisoners in the Kingstown Prison was 30·09, as compared with 34·56 in 1917–18.

48. The number of cases reported to the police was 566, and 336 of these were brought before Magistrates. The number of summary convictions was 869, and the number of convictions in the Supreme Court was 12, as compared with 916 and 13 in 1917–18. In the Magistrates Courts 541 persons were discharged for want of prosecution, and 215 were acquitted on the merits.

49. On charges of praedial larceny 133 persons were convicted. The number in 1917–18 was 233.

VI.—VITAL STATISTICS.

50. The population of the Colony in 1911 was 41,877, according to the census taken in that year. The Registrar-General's estimate of the population on the 31st March, 1919, is 51,990. This estimate is based on the census return for 1911 with corrections for births, deaths, immigration and emigration.

51. Illegitimate births numbered 1,193 or 66·46 per cent. of the total numbers of all births. The percentage in 1917–18 was 65·91.

52. The following table gives the births, deaths, and marriages in the past two years :—

	1917–18.	1918–19.
Births	1,857	1,795
Males	948	951
Females	909	844
Birth-rate per 1,000 of the estimated population	36·64	34·52
Deaths	1,064	1,113
Death-rate per 1,000	20·99	21·47
Marriages	102	134
Marriage-rate per 1,000	2·01	2·57

53. The rainfall at the Agricultural Experiment Station in Kingstown, 80 feet above sea level, was 99·36 inches in 1918–19, 92·96 inches in 1917–18, 115·25 in 1916–17, 114·99 in 1915–16 and 72·67 in 1914–15. The figures for the past 18 years show that June to November are the months in which most rain falls.

54. Rain fell on 253 days in 1918–19, and the greatest fall for one day was 4·42 inches, on the 17th of September, 1918. The greatest fall for one day in the previous year was 2·17 inches on the 18th April, 1917.

55. The reading of the barometer, corrected for instrumental error, elevation, and temperature, ranged from 30·129 inches on the 11th of July, 1918, to 29·739 on the 22nd August, 1918.

56. The mean monthly temperature was 78·9° F. The highest was 80·8° F. in September, 1918, and the lowest was 76·8° F. in March, 1919.

VII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

57. Steamships of the Royal Mail Steam Packet Company, under contract with the Canadian Government, called at irregular intervals on their outward voyages to British Guiana and less frequently on their homeward voyages ; and during the year nine steamers of the Direct Line also brought, and took, cargo and mails. Mails were also sent, and received, by occasional sailing vessels to and from Barbados and Grenada, with which Colonies there is direct communication by steamer with the United Kingdom and the United States.

58. The Postal Department, with headquarters in Kingstown and 17 district post offices, continued to provide facilities for the transaction of postal business. Mails were sent to the Windward side of the Island by motor-car and by rowing boat to the Leeward side, and by sailing vessel to the Grenadines.

59. There is no inland telegraph service. A subsidy of £300 a year is paid by the St. Vincent Government to the West India and Panama Telegraph Company, in return for which the Colony receives daily news bulletins, and participates in a system of reduced charges for cablegrams.

60. The Government maintains a telephone system which connects Kingstown with all the police stations in the small towns and villages, and with the places of residence, and business of renters. Payment of ten shillings a month entitles a renter to be put in communication with

all the districts of the Colony. There were 91 telephones rented by the general public in 1918–19, and 66 were attached to Government departments for official use. A small charge is made for messages sent by persons who are not renters of telephones. There are 77 miles of trunk lines and 86 miles of lines connecting renters with the exchanges. The revenue in 1918–19 was £769 7*s.* 9*d.*, and the expenditure was £563 13*s.* 8*d.*

VIII.—GENERAL OBSERVATIONS.

61. The glad tidings on the 11th November, 1918, of the cessation of hostilities with Germany and her Allies, was received with great rejoicing. The telegram announcing the welcome news was proclaimed throughout the Island by the several ministers of religion at the annual Thanksgiving services which by a coincidence, had been appointed to be held on that day.

62. In order to ameliorate the hardship caused to the poorer classes by the continued high cost of living, an Ordinance removing the 10 per cent. additional duty on the necessary commodities of life was passed by the Legislative Council on the 31st March, 1919.

63. His Honour Anthony DeFreitas continued to administer the Government until the return on the 16th December, 1918, of His Honour R. Popham Lobb, who had been acting Administrator of the Government of St. Lucia since the 20th March, 1917.

S. J. THOMAS.
Acting Administrator.

Government House, St. Vincent,
25th March, 1920.

COLONIAL REPORTS, &c.

GRENADA.

REPORT ON THE BLUE BOOK FOR 1919.*

I.—FINANCIAL.

1. The financial year has been changed to correspond with the calendar year. The advantage of the change is that the annual statistics and returns, the majority of which were already rendered in respect of the calendar year, will now relate to the same period. It happens, also, that the passing of the annual budget as from the 1st of January in each year will facilitate the execution of public works, and of projects that require to await approval of the Estimates, as such will now be undertaken from the commencement of the dry season, which sets in at the beginning of the year and continues until May.

2. The financial period under review is from 1st April to 31st December, 1919, and it would serve no useful purpose to compare the results with any full year, nor, on account of the unsettled and changed conditions that have prevailed, with a corresponding nine months' period in previous years. It will be sufficient to offer a remark or two on the differences between the estimated and actual revenue and expenditure.

3. With regard to revenue, the estimated amount was £81,068, while the amount actually received during the period reached £87,295. The increase of £6,399 is attributable to an increase of £2,820 under the head of Licences, Excise and Internal Revenue, chiefly arising from the increased duty on rum, and the greater consumption of that article owing to the cost of imported spirits. Post Office receipts were higher than estimated for by £544, on account of higher commission rates on money orders, which were raised to meet advanced bank rates. A sum of £1,537 was transferred to revenue in the period, being three years' profit on the Government Drug Store. Against these increased receipts, there was a slight drop in Customs Revenue of £375, caused by fewer steamers arriving in consequence of strikes in the United States of America.

4. The expenditure during the period amounted to £107,011, being £20,750 over the estimate of £87,491. This considerable excess was caused chiefly by the following unforeseen expenditure:

* A map will be found in the Report for 1914–15, No. 852 [Cd. 7622–43].

	£
Payments to returned Grenada Contingent ..	10,220
Refund of Voluntary Allotments	905
Extra Ration Allowance	588
Peace Celebrations	1,090
Other War Expenses	1,844
Medicines and Disinfectants	2,312

In other respects the expenditure varied but slightly from the amounts placed on the Estimates.

Surplus Assets.

5. The net result of the financial operations of the period being that actual expenditure exceeded receipts by £19,716, the surplus assets have been reduced by that sum. The assets amounted on 31st December, 1919, to £39,795.

Public Debt.

6. The Public Debt was increased by £82,400, in consequence of further subscriptions to the local loan which was floated in 1917. The debt now amounts to £206,070, against which the Sinking Fund has reached the sum of £52,974.

Finances of District Boards.

7. Six District Boards manage the municipal affairs of the towns, and have charge of water supplies, sanitary arrangements and upkeep of byeways. Their revenue and expenditure for the period and their loan debts at 31st December, 1919, were as under :

	Revenue	*Expenditure*	*Loan Debts*
St. George's	£4,003	£3,759	£13,347
St. Andrew's	2,556	2,525	2,240
St. Patrick's	1,834	1,745	4,528
St. John's	1,301	1,181	3,250
St. Mark's	685	629	1,200
St. David's	825	825	—

Some of the debts are being reduced by annual repayments, and against others sinking funds have been established.

II.—TRADE, INDUSTRIES, AND SHIPPING.

Imports.

8. The imports during the calendar year 1919 amounted in value to £438,110. Nearly half, actually £214,743, came from foreign countries, chiefly the United States, the imports from which were of the value of £202,465. The imports from the United Kingdom amounted to £94,237, from Canada £60,882, Newfoundland £17,293. The joint total from the United Kingdom and all other parts of the British Empire was £223,367.

(706) Wt.32596/354, 1,250 & 90. 10.20. B.&F.,Ltd. G.11/14.

9. Food and drink supplies and tobacco amounted to £201,371, the principal sources of supply being the United States (£80,046), Canada (£45,642), Newfoundland (£17,293), Trinidad (£19,645) and United Kingdom (£12,374).

10. The value of imports of articles wholly or mainly manufactured was £148,722, of which the United States accounted for £68,886 and the United Kingdom for £59,241.

11. The change in the sources of supply of imports may be seen from the following table :—

Imports.

	1913.		1919.	
	Value.	Percentage.	Value.	Percentage
U.K.	£113,076	40	£94,237	21·5
U.S.A.	88,343	31·2	202,465	46·2
British Dominions and Colonies ..	69,136	24·4	129,130	29·5
Other Places ..	12,372	4·4	12,278	2·8
Total Value ..	£282,927	—	£438,110	—

12. The principal articles of import were :—

Apparel	£6,245
Bags and sacks	4,660
Biscuits, bread and cakes	4,943
Boots and shoes	9,721
Butter	4,312
Motor cars and parts	9,832
Cement	3,694
Cotton piece goods	38,733
Other cotton manufactures	11,639
Fish, dried and salted	20,896
Flour	75,195
Rice	11,502
Corn (maize)	3,363
Haberdashery and millinery	4,791
Hardware	5,649
Manure, chemical	3,628
Meat, salted and cured	7,497
Medicines and drugs	10,082
Iron and steel manufactures	5,085
Kerosene oil	7,291
Gasoline	6,065
Oleomargarine	7,036
Soap, common	7,618
Sugar	14,353

The importations of flour, fish, sugar and rice, amounting in value to £121,946, show the extent to which the Colony is dependent on outside sources for its food supplies.

Exports.

13. The value of the exports amounted to £637,369, the principal products exported being :—

	Quantity.	*Value.*
Cocoa	99,368 cwts.	£539,740
Spices : Nutmegs ..	15,354 ,,	54,281
Mace	2,193 ,,	14,218
Lime juice, raw	17,000 gallons	3,042
,, ,, concen. ..	300 ,,	113
Cotton, raw	2,748 cwts.	11,908
Cotton seed	7,067 ,,	2,855

14. Of cocoa, 46·9 per cent. went to the United Kingdom, 15·4 per cent. to the United States, 23·0 per cent. to France and 14·7 per cent. to Trinidad. The United Kingdom took 31·6 per cent. of the nutmegs, the United States of America 49·6 per cent., and Canada 16·9 per cent. 42·1 per cent. of the mace went to the United Kingdom, 42·0 per cent. to the United States of America, and 14·2 per cent. to Canada. All the lime juice and raw cotton went to the United Kingdom.

15. The direction of trade in exports may be seen from the following table :—

Exports.

	1913.		1919.	
	Value.	Percentage.	Value.	Percentage
U.K.	£228,232	62·2	£328,642	51·6
U.S.A.	89,666	24·4	107,867	16·9
British Dominions and Colonies ..	6,497	1·8	98,626	15·5
Other Places ..	42,755	11·6	102,224	16·0
Total Value ..	367,150	—	£637,359	—

The exports to "Other Places," amounting in value to £102,224 and consisting solely of cocoa, went to France.

Total Trade.

16. The value of the total trade of the Colony, represented by imports and exports, was £1,075,479

Shipping.

17. The following table shows the shipping which entered and cleared in 1919 :—

	Entered.		*Cleared.*	
	No.	*Tonnage.*	*No.*	*Tonnage.*
Sailing Vessels	483	10,978	505	11,530
Steam Vessels	131	357,483	132	357,569

The sailing vessels are principally small sloops owned locally. Fourteen of the sailing vessels entered came from Venezuela.

Of the steam vessels, 128 were British.

18. The steamship companies that provide regular services to and from Grenada are the Trinidad Shipping and Trading Company, plying between New York, Grenada, and Trinidad every ten to fourteen days ; the Royal Mail Steam Packet Company with a fortnightly service to and from Canada ; and Scrutton, Sons, and Company to and from London fortnightly. The steamer service to New York occupies only seven days, that to Canada by the existing itinerary fifteen days, and to the United Kingdom sixteen days. The excellence of the service to New York materially assists the trade between Grenada and the United States.

III. PRODUCTIONS AND NATURAL RESOURCES.

19. The sole industries of Grenada are those directly connected with cultivation of the soil. The greater part of the most fertile soil is under permanent crops, such as cocoa, nutmegs (with its derivate mace), limes, and coconuts. Almost all the cotton produced, which is of the Marie Galante variety, is grown in Carriacou, an island dependency lying to the north of Grenada and containing about 8,467 acres.

20. When sugar prices declined in the latter part of last century, many of the sugar estates in Grenada were abandoned, or sold out in small lots to new proprietors, who began to cultivate cocoa, for which the soil proved highly suitable. At first lands of a medium elevation above sea level were cultivated, there being an opinion that cocoa would not thrive on the low lands, but the cultivation has now extended to most of the lands formerly under sugar canes. The Governments of past years initiated and carried through a far-sighted policy of road and bridge construction, resulting in the bringing into profitable cultivation of nearly all the cultivable lands in the island. The island, which is very mountainous, is probably better supplied with good roads than any similar extent of hilly country in the world. Peasant settlements have been established by Government and there are now over 13,000 individual land owners, chiefly of lots under 5 acres in extent Estates over 100 acres in area number 143. Land now commands a high price

and can scarcely be obtained by persons not resident in the Colony, owing to keen local competition. It should be added that allotments under the Land Settlement Schemes of the Government are readily taken up by native agricultural labourers, and are not suited for settlers from a temperate zone.

21. The gradually increasing area under permanent crops has certain disadvantages. It reduces the area available for annual crops of foodstuffs and of grazing land for meat and milk supplies, with the result of increased cost of living to the general community through forced dependence on imported food. There is not enough sugar produced to meet the local demand, even with the assistance of the present high market price of sugar. A large amount of money also leaves the Colony for meat and foodstuffs of various kinds.

Cocoa.

22. The crop for the year ended 30th September 1919, was a moderate one, the produce amounting to 60,455 bags of 180 lbs. The average crop for the past 12 years has been 68,028 bags. Prices for this staple have been very good, and the value of the produce exported in 1919 was the highest on record, £539,740.

Spices.

23. The Agricultural Superintendent reports that the season was favourable for a good crop of nutmegs, which met with a good and steady market. Buyers from Canada have opened agencies here, and are obtaining a good share of the trade. Increased planting of nutmeg trees has taken place within the last five to seven years, and these areas, chiefly on the uplands, are now bringing this spice into bearing.

24. The increase in production and value of nutmegs and mace may be seen from the following table :—

		Quantity in lbs.	*Estimated Value.*
1914–15	..	1,674,276	£37,204
1915–16	..	1,940,965	51,690
1916–17	..	1,538,886	34,789
1917–18	..	1,910,147	55,505
1918–19	..	2,098,364	103,773

Cotton.

25. As previously remarked, this cultivation, of the Marie Galante type, is confined to Carriacou, and no important change is recorded in the crop, which amounted in quantity to 2,748 cwt. and in value to £11,908.

Limes.

26. Carriacou is also the principal producer of limes, and is the only place at present possessing a factory for the proper making and distilling of lime products. The cultivation there and in Grenada is hampered by the prevalence of scale insects. 17,100 gallons of raw, and 300 gallons of concentrated juice were exported during the year of a total value of £3,155. Despite efforts to encourage it, the cultivation is dwindling, the crop last year, expressed in barrels of fruit, being 2,465 barrels as compared with 21,671 barrels in 1918 and 27,253 in 1916.

Coconuts.

27. Large areas are being put into coconuts, and there will soon be an appreciable acreage under this crop, which gives promise of being a valuable industry in the near future.

Sugar.

28. The large estates in the southern portion of the island have been making efforts to increase production, but all over the island there appears to have been a shrinkage in the area under canes. In one instance it is reported that coconuts planted six to seven years ago have crowded out the cane cultivation. A few of the larger estates produce centrifugal sugar, but most of the other mills turn out what is known as "wet sugar." Despite the extraordinarily high prevailing prices, the output of sugar falls considerably below what is consumed in the colony, which imported this commodity to the value last year of £14,353.

Manufactures.

29. With the exception of the manufacture of sugar and rum, it can scarcely be said that there are any manufacturing industries in the island. Rum is made in fourteen distilleries, twelve of which were in operation during 1919, the quantity manufactured being 63,579·5 proof gallons. The stills are of the pot still type, with either one or two retorts and the largest still has no greater wash capacity than 400 gallons. The spirit is made from the drainings from muscovado sugar and in some instances from cane juice itself, and a very fine quality of rum could be produced if the manufacture were carried out on scientific lines. The quantity produced does not exceed the demand ; 54,968·5 gallons were duty paid in 1919. A profitable price is obtained for the rum, for which an increased demand has sprung up owing to the high price of imported spirits. In addition to the quantity manufactured locally, 2,314·5 gallons of rum were imported from Barbados.

30. Ice is manufactured by a local factory, which receives a subsidy from the Government. Attempts to establish a soap factory and a tanning industry have been made from time to time, but have not been successful.

31. A small whaling industry was started last year on the southern coast of Grenada, but has not yet reached a stage at which any report can be made.

Forestry.

32. An area of Crown Lands in the centre of the island, about 2,550 acres in extent, has been reserved in forest, in order to protect water supplies. Provision exists under a Forestry Ordinance for creating other Forest Areas and Rain Reserves, and a Forestry Board exists for the purpose of safeguarding the general interests in this respect. Although some valuable woods exist, the quantity is insufficient to establish any commercial enterprise in timber. A small quantity of mahogany was exported last year.

IV.—COST OF LIVING AND WAGES.

33. The cost of living, always fairly high in Grenada as compared with neighbouring Colonies, has greatly increased and is still steadily rising. Generally speaking, it may be said that wages and rates of pay have not been augmented to the extent necessary to meet the changed conditions and depreciated purchasing value of money. Owing to the large number of landowners and the increased market prices of their crops, a large section of the community are in the fortunate position of being better off than before, but for the labourer without land and the class who have fixed wages or salaries the conditions of living have become arduous in the extreme. The pay of male labourers is now 2*s*. per nominal day or task, as compared with 1*s*. in pre-war days, and increases have been given to the salaries of employés in mercantile firms, offices, and Government Departments.

V.—CURRENCY, BANKING, WEIGHTS AND MEASURES.

34. The coins in use are those of the United Kingdom. Gold has almost entirely disappeared from circulation. Silver, which is legal tender without limit, is the principal medium of ordinary monetary exchange. Supplies of silver, are, however, also becoming scarce, and it became necessary to prohibit by law the exportation of silver.

35. Branches of the Colonial Bank and the Royal Bank of Canada are established in the Colony. Both have issues of banknotes of the

denomination of five dollars. Owing to the scarcity of silver, steps are being taken by the Government for the introduction of notes of smaller value.

36. The bank exchange rate with the United States of America has been adverse, in line with the exchange rate between the United Kingdom and the United States of America. It has acted as a barrier to trade from the United States, and led to increased orders to firms in the United Kingdom.

37. The weights and measures in use are of the Imperial standard.

VI.—LEGISLATION.

38. The Ordinances passed during the year 1919 numbered 20, many of them being Ordinances repealing war legislation. An Excess Profits Ordinance was passed towards the end of the year, but has not yet come into force.

VII.—POPULATION AND VITAL STATISTICS.

39. The estimated population at the end of 1919 was 74,490.

40. The natural increase in population, i.e., the difference between births and deaths, was 1,139. The migration statistics, however, show an excess of departures over arrivals of 530. Deducting this excess of emigrants from the natural increase of population, an augmentation of population of 609 is recorded.

41. The deaths numbered 1,332, the death-rate per 1,000 being 17·9. The death rate in the previous year was 17·8, and the average for the period since 1901 has been 20·9. The death-rate among children below the age of 5 years is still high, as compared with deaths in temperate climates, but has been considerably reduced owing to preventive measures and assistance given by the Government towards supplying pure milk for the children of poor parents. The percentage of deaths under 5 years has fallen from 51·0 in 1917 to 41·3 in the past year.

42. The births numbered 2,471, of which 1,260 were boys and 1,211 girls. The birth-rate was 33·17 per 1,000, as compared with 34·66 for 1918.

43. 301 marriages were registered, being the same number as in 1918.

44. The principal causes of death are given below, with the figures for the two previous years for comparison :—

	1919	1918	1917
Diarrhoea and Enteritis ..	270	233	322
Malaria	88	105	88
Syphilis	38	80	63
Premature Birth and Diseases of Early Infancy	61	77	86
Pulmonary Tuberculosis ..	64	65	61
Dysentery	77	48	60

METEOROLOGICAL.

45. The meteorological observations are taken at the Station on Richmond Hill, St. George's, at an elevation of 509 feet above sea level. The records of this Station may be taken as representing the average meteorological conditions in Grenada.

46. The rainfall in 1919 was 73·09 inches, a decrease of 8·31 inches from the previous year, and 3·79 less than the average for the period since 1892. The rainfall varies greatly throughout the Colony, ranging from less than 20 inches in the extreme south to about 200 inches in the mountainous region of the interior. Cultivation prospers best in the regions with a rainfall between 60 and 120 inches annually.

47. The maximum temperature in the shade was 90° on the 2nd October, and the minimum 69° on the 23rd August.

The fact that it is a matter for special meteorological record whenever the thermometer in the shade reaches 90° or falls below 70° is worthy of note, as indicating a certain degree of equability in the climate. As a general rule, climatic conditions during the continuance of the trade winds, which prevail from December to June, may be said to be healthy and pleasant. The remaining months, owing to humidity and cessation of the breezes, are relaxing and enervating.

VIII.—EDUCATION.

Primary Education.

48. Primary education is free, and is provided by 11 Government and 48 grant-in-aid schools, the latter belonging to the various denominations as follows, Roman Catholic 27, Anglican 14, Wesleyan 5, and Presbyterian 2.

49. The Government grant for primary education in 1919 amounted to £7,862.

50. The number of children on the roll at 31st December, 1919, was 9,898. The average attendance was 5,622.

Secondary.

51. Secondary education is provided by a Government Boys' School, and by two Girls' Schools belonging to the Roman Catholic and Anglican denominations, each of the latter schools receiving a grant-in-aid of one hundred and fifty pounds annually.

52. An external scholarship of the annual value of £175 (increased temporarily to £210) tenable for 5 years at an approved University in the United Kingdom, Canada, or the United States, is provided by Government, and is awarded annually on the results of the Senior Cambridge Local examination.

IX.—HOSPITALS, ASYLUMS, AND OTHER INSTITUTIONS.

(*a*) *Hospitals and Dispensaries.*

53. There are three ordinary hospitals in the Colony, the central institution being in St. George's, with accommodation for 140 patients. District hospitals are provided in St. Andrew's (12 beds) and in Carriacou (24 beds).

54. Two other hospitals are situated in St. George's, one for yaws patients, with accommodation for 70, and the other a Consumptive Hospital with 20 beds. The latter institution is pleasantly situated at Richmond Hill, at an elevation of about 600 feet above sea level.

55. Government dispensaries are now established in every parish and in Carriacou. A considerable sum is expended on free medicines, principally for the relief of venereal diseases and yaws.

(*b*) *Asylums.*

56. A Lunatic Asylum and a Poor Asylum are also erected on Richmond Hill, the former having 120 beds, and the latter 58.

Savings Bank.

57. A Government Savings Bank is established in St. George's, with branches in each of the parishes and in Carriacou. The rate of interest given on deposits is 3 per cent. The number of depositors on 31st December, 1919 was 1564, with £19,383 to their credit.

Medical Service.

58. A Government Medical Service, comprising a Colonial Surgeon, a Resident Surgeon for the Hospital in St. George's and eleven District medical officers, is maintained by Government. Medical attendance is given free to paupers, and at reduced rates to labourers under an approved scale of charges.

59. Two special campaigns against venereal disease and yaws respectively have been giving satisfactory results. The Colonial Surgeon reports that the beneficial results achieved by the intensive treatment of yaws by injections of Novarsenobillon in the districts

have been almost phenomenal and beyond the most optimistic anticipations. Patients recognizing the obvious good of the treatment come readily to the Medical Officers for treatment. In the short period from May to the end of the year 5,000 cases were injected with Novarsenobillon and 808 were discharged as cured. The Medical Officers have evinced the greatest keenness in this work, which they have performed in the most efficient manner, and one of the results, in the opinion of the Colonial Surgeon, of such extensive and sustained efforts to eradicate this loathsome disease will be the possibility of closing the Yaws Hospital within a short time and its utilisation for some other purpose.

60. The campaign instituted in 1918 against venereal diseases is being steadily proceeded with, and a great deal of conscientious work is being performed by the medical staff, with gratifying results to the patients concerned and the community in general.

61. The campaign against ankylostomiasis which was discontinued in November 1916 has not been started again, but will be resumed by the International Health Board as soon as the Colony can give a certificate that the areas to be operated on have been previously brought to a sufficient standard of sanitary efficiency. This disease is still prevalent throughout the Colony. Special attention is being given to improvement of general sanitation, both in respect of the special areas which are intended to be operated under the ankylostomiasis campaign, and in the Colony generally. Several sites for the erection of public latrines have been decided upon in the districts selected for operations under the International Health Board, and one latrine (at Mount Moritz Village) has been completed. The greatest difficulty in the way is the lack of domestic latrine accommodation of the poorer classes, and although the problem is difficult of solution every effort is being made to deal with it.

X.—POSTS, TELEGRAPHS, AND TELEPHONES.

62. The Colony is well provided with postal facilities, there being branch post offices in each district in addition to numerous small sub-offices. A Government mail car service conveys mails daily from St. George's to the eastern districts, the requirements of the western side being met by a subsidised motor launch service.

63. The Colony is connected with the neighbouring islands by the cables of the West India and Panama Telegraph Company.

64. There are no inland telegraphs.

65. A telephone service is maintained by Government. There are five district exchanges in addition to the head office. The number of subscribers at the end of 1919 was 230, and there were 159 miles of trunk lines and connections.

XI.—GENERAL.

66. There is little of special interest to record in the history of the Colony in the short period under review. The official peace celebrations were carried through in July, separate public holidays being appointed for the several districts, in order to allow of the attendance of the public at the various functions. The Grenada Contingents of the British West Indies Regiment had the fortunate record of returning to the Colony with no casualties except from disease. The men were well looked after by the Returned Soldiers' Committee, and liberal grants, allowances, and refunds of voluntary allotments were paid to them from the Colony's funds. The pensions and gratuities in respect of disabled men are a charge against the Colony, which was able on that account to fix the rates on a scale that compares favourably with the rates in force in the neighbouring West Indian Colonies.

HERBERT FERGUSON.
Colonial Secretary.

Grenada.
26th July, 1920.

COLONIAL REPORTS, &c.

No. 1063.

ST. VINCENT.

ANNUAL GENERAL REPORT OF ST. VINCENT FOR APRIL TO DECEMBER, 1919.

I.—GEOGRAPHICAL AND HISTORICAL.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land, about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton ; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their sovereign.

In 1779 the island surrendered to the French and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—GENERAL OBSERVATIONS.

The general health of the inhabitants continued to be good throughout the year.

His Excellency the Governor was resident in the Colony from the 26th September to the 16th October, 1919.

The remunerative prices for cotton, syrup, and cocoa continued during the period under review.

Increases in the prices of foodstuffs continued and the purchasing power of money was in consequence reduced by over 100 per cent.

There are 284 miles of public roads affording communication in all directions. Motor cars are being gradually substituted for horses and carriages.

The postage on letters between the United States and this Colony was reduced from 2½d. to 1d. per ounce, and there was a noticeable increase in the number of letters despatched.

The telegram announcing the signing of the Peace Treaty with Germany was enthusiastically received on the 29th June, 1919. The 19th, 24th, and 25th July were the days set apart for the Peace Celebrations. Bonfires throughout the Colony were lit at eight o'clock on the evening of the 19th, and on the 24th and 25th special provision was made for the entertainment of the returned invalided members of the St. Vincent contingents of the British West Indies Regiment, the poor, the inmates of hospitals, asylums and charitable institutions, and school children. General rejoicing prevailed throughout the Colony.

III.—FINANCIAL.

General Revenue and Expenditure.

The financial position of the Colony on the 31st December, 1919, was :—

	£	s.	d.	£	s.	d.
Surplus at 1st April, 1919 ..				6,607	14	11
Expenditure in 1919	35,361	2	1			
Revenue in 1919	34,110	16	3			
				1,250	5	10
Surplus at 31st December, 1919 ..				£5,357	9	1

From this must be deducted the sum of £260, being the contribution to the Public Loans Redemption Fund for the period 1st April to 31st December, 1919, thus showing a net surplus of £5,097 9s. 1d.

The total revenue and expenditure from all sources in the last three financial periods were :—

	Revenue.	*Expenditure.*
	£	£
1917–18	37,535	34,555
1918–19	42,488	36,597
1919	34,111	35,361

The net local revenue and expenditure amounted to :—

	Local Revenue	*Expenditure against Local Revenue.*
	£	£
1917–18	35,102	32,706
1918–19	41,503	35,105
1919	32,851	33,094

The principal items of revenue in the last two financial periods were :—

	1918–19.	1919.
	£	£
Import duties	17,620	13,084
Export duties	2,520	1,512
Excise duty on rum	6,723	4,777
Land and House Tax ..	3,282	4,897
Income Tax	798	849

(1881) Wt.29921/587 1,250 & 90 2/21 Harrow (G. 75/1921)

The sum received for Import duties was £4,434 more than was estimated, due to increased importations and to the increased value of goods on which an *ad valorem* duty was leviable. The collections for Export duties realised £738 less than estimated, due mainly to restricted exportations of arrowroot in consequence of the condition of the market abroad. The value having considerably declined, the export duty on this commodity was reduced from 1s. to 3d. per cwt. from 2nd November, 1919.

The revenue from Excise duty for the nine months was £4,777, showing an increase of £877 on the estimate.

In Post Office revenue there was an increase of £815, due to large sales of postage stamps, increased receipts from commission on money orders, and premiums on remittances from the United States in settlement of money order transactions.

The War Tax Stamp, under the provisions of the War Stamp Ordinance, 1916, was discontinued from the 30th June, 1919.

Local revenue amounted to £32,851, being £7,555 in excess of the estimate.

The total expenditure of the Colony was £35,361, which included the sum of £1,118 from Loan Funds for the reconstruction of the Windward Highway, and £1,149 in connection with the return to the Colony of the St. Vincent contingents of the British West Indies Regiment.

The local expenditure, which was £33,094, showed an excess on the estimate of £4,891, due principally to the increased cost of the upkeep of Government institutions, a grant of 10 per cent. to local pensioners, the payment of War bonuses to Government officials, and the cost of the Peace Celebrations.

The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions in the Soufriere volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to general revenue and is applied to the relief of the poor.

There are also other funds of less importance forming assets of the Colony which were not derived from taxation. Some of these are extinguishable in time, but others, such as the Graham Bequest Fund and the Thompson Home Fund, are available only to the extent of the annual interest obtained from them.

Public Debt.

The public debt at the close of the year stood at £10,200, as against £9,900 in 1918–19. During the period a sum of £1,000 was raised under the authority of Ordinance No. 8 of 1917, the Windward Highway Loan Ordinance, by the issue of five debentures of £200 each bearing interest at the rate of 5 per cent. per annum. Included in the debt is a loan of £1,500 raised by the Kingstown Board in 1914, for which the Colony is responsible in case of default.

The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to Planters made from funds supplied by the Imperial Treasury, which was £3,369 5s. on the 31st of December, 1919. On that date there had been received from planters towards the repayment of this balance the sum of £2,846 18s. 9d., of which £2,839 11s. 7d. was invested through the Crown Agents for the Colonies.

The accumulated sinking funds provided for the redemption of the public debt of £10,200 stood at £1,495 on the 31st of December, 1919.

Currency.

British and American gold, five dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling and commercial and banking accounts in dollars and cents.

Finances of Municipalities.

The total revenue and expenditure of the towns during the last two years was :—

Town.	*Revenue.* 1918.	*Revenue.* 1919.	*Expenditure.* 1918.	*Expenditure.* 1919.
Kingstown	£2,061	£2,242	£1,903	£2,191
Georgetown	172	174	156	143
Calliaqua	55	57	45	68
Layou	65	67	53	73
Barrouallie	78	74	48	62
Chateaubelair	44	44	37	59
Bequia	13	13	4	5

Debts of Towns.

At the 31st December, 1919, the towns were indebted to the Government for the following balances of loans made to them :—

	£	s.	d.	£	s.	d.
Kingstown Board—						
For repairs to Rose Place drain	30	15	1			
Improvement Loan	150	0	0			
				180	15	1
Georgetown Improvement Loan				240	0	0
Calliaqua Water Supply Loan				306	5	0
Layou Water Supply Loan				152	0	0
Barrouallie Water Supply Loan				128	0	0
				£1,007	0	1

Provision for repayment of these loans is made by rates. Kingstown is also indebted in a further sum of £1,500, referred to above.

IV.—VITAL STATISTICS.

The population of the Colony in 1911 was 41,877, according to the census taken in that year. The Registrar-General's estimate of the population on the 31st December, 1919, is 53,210. This estimate is based on the census return for 1911 with corrections for births, deaths, immigration, and emigration.

The following table gives the births, deaths, and marriages in the past two years :—

	1918–19.	*April to December.* 1919.
Births	1,795	1,320
Males	951	681
Females	844	639
Birth-rate per 1,000 of the estimated population ..	34·52	24·8
Deaths	1,113	706
Death-rate per 1,000	21·47	20·67
Marriages	134	99
Marriage-rate per 1,000 ..	2·57	1·86

Illegitimate births numbered 899, or 68·1 per cent. of the total number of all births. The percentage in 1918–19 was 66·46.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 ft. above sea level, was 99·52 in. as compared with 99·36 in. in 1918–19, 92·96 in. in 1917–18 and 115·25 in. in 1916–17. The figures for the past 19 years show that June to November are the months in which most rain falls.

Rain fell on 208 days in 1919 and the greatest fall for one day was 3·61 in. on 23rd August. The greatest fall for one day in 1918–19 was 4·42 in. on the 17th September, 1918.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30·206 in. on the 19th August to 29·847 in. on the 11th November, 1919.

The mean monthly temperature was 80·3° F. The highest was 82·6° F. in April and the lowest was 78·0° F. in December, 1919.

V.—ANNUAL PROGRESS OF TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The total values of imports and exports in 1918 and 1919 were :—

Year.	*Imports.*	*Exports.*	*Total Trade.*
	£	£	£
1918 ..	134,699	195,205	329,904
1919 ..	185,128	153,892	339,020

Produce of the Colony to the value of £149,749 was exported in 1919.

The places whence the imports came and the values for the last two years are :—

	1918.	1919.
	£	£
United Kingdom	53,114	58,121
Canada	27,387	54,123
British West Indies	9,984	13,186
India	145	557
Newfoundland	1,664	971
Other British Colonies ..	290	898
United States of America ..	38,604	54,750
France	992	883
Denmark	124	72
Holland	102	137
Foreign West Indies	1,018	465
Other Countries..	1,275	965
	£134,699	£185,128

The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1918.	1919.
United Kingdom	39·43	31·40
United States of America ..	28·66	29·24
Canada	20·33	29·57
All other Countries	11·50	9·80

Of the £185,128 of imports, £66,883 was the value of articles classified under "Food, Drink, and Tobacco," and £83,730 the value of manufactured articles.

Exports.

The destinations of the exports of the produce of the Colony in 1918 and 1919 were as follows :—

	1918.	1919.
	£	£
United Kingdom	144,618	87,523
Canada	11,751	13,068
United States of America ..	4,122	3,311
British West Indies	29,171	40,498
British Guiana	3,394	4,046
Other Countries..	722	1,303
	£193,778	£149,749

The principal products of the Colony exported were :—

	1918.	1919.
	£	£
Arrowroot	95,828	42,222
Cotton—		
Sea Island	58,119	64,004
Marie Galante	2,803	2,778
Cocoa	6,021	6,385
Sugar—		
Muscovado	3,296	3
Syrup and Molasses ..	4,796	10,723
Cassava Starch	3,831	4,836
Pea Nuts	6,046	5,098
Animals	2,356	3,980

The reduction in the exports of arrowroot was due to the decline in the prices in the London market.

There was a marked improvement in the trade with Canada in fancy molasses or syrup during the year, and the high prices obtaining in that market induced planters to manufacture syrup instead of Muscovado sugar.

Agricultural Industries.

The Government Cotton Ginnery and Granary continued to buy seed cotton and corn (maize) on profit sharing terms. The following quantities were dealt with during the season :—

	lb.	lb.
Sea Island seed cotton ..		332,773
Marie Galante		288,504
Corn on cob	92,672	
Corn, grain	83,842	
		176,514

The corn when kiln dried amounted to 151,800 lb. and was stored in bins to provide a reserve of cereal food for the drier months of 1920.

The co-operative enterprises continued to receive the support of the small growers, and they have had a beneficial influence on both cotton and corn growing in the Colony. The number of pass books issued to growers was 2,611 as against 2,375 last year.

Since October, 1917, the local Government, on behalf of the Imperial Government, have bought all the Sea Island cotton produced in the Colony. Growers thereby received remunerative prices for ginned cotton delivered in Kingstown on the scale of 3s. per lb. for ordinary quality, 3s. 4d. for good ordinary, and 4s. 2d. to 4s. 7d. for superfine. This ready market as well as the increased confidence placed in the cotton industry as a result of the work of the Agricultural Department in connection with the control of the cotton stainer pest led to the planting of 6,633 acres, of which 5,079 were in Sea Island and 1,554 in Marie Galante, the largest area ever planted in cotton in St. Vincent. The output in 1919 was 475,650 lb., or 93 lb. per acre, as compared with 437,273 lb., or 95·4 lb., in 1918-19. The weather conditions in November were unfavourable and a large number of the bolls were attacked by fungus diseases, added to which the lint could not be picked and the seeds germinated in the bolls. About 25 per cent. of the crop was lost on this account.

The transactions at the Government Granary were considerably in excess of those of the previous years. The industry continued to yield satisfactory results. Besides the quantity purchased and that used for home consumption, 69,016 lb. of corn were exported as against 170,079 lb. in 1918–19.

The sugar cane industry is again becoming an important one in the Colony, and during the year the manufacture of syrup considerably increased, only a small proportion being made into sugar. The following table gives the exports for the last five years :—

Year.	*Sugar.*	*Value.*	*Syrup and Molasses.*	*Value.*	*Total Value.*
	lb.	*£*	*Galls.*	*£*	*£*
1915	505,232	3,253	10,079	503	3,756
1916	1,198,314	9,520	33,771	1,475	10,995
1917	1,264,201	11,584	81,144	3,102	14,686
1918	316,460	3,297	79,834	4,796	8,093
1919	250	3	170,842	10,722	10,725

In 1919 there was manufactured 27,211 proof gallons of rum, of which 56 gallons were exported as compared with 20,858 gallons manufactured in 1918, none of which was exported.

The position of the arrowroot market continued to be very unsatisfactory. During the year there was a decrease in the area planted, due to large stocks having accumulated in England, which caused considerable reduction in prices. In 1918, 5,084,262 lb. were exported as against 2,244,575 lb. in 1919.

The pea nut industry showed a decrease on the production of the previous year, which may be attributed to the increased area planted in other crops. 13,489 bushels were exported in 1918, as against 11,329 bushels in 1919.

The Agricultural Co-operative Credit Societies continued to make progress, and all loans have been repaid when due. The total number of Societies was 21 with 1,122 members, as compared with 1,060 members in the previous year.

The Agricultural Department continued to be occupied with cotton breeding experiments and the production of supplies of pedigree Sea Island cotton seed of good ordinary grade for planting. Manurial and planting experiments with cotton and arrowroot were conducted. Cotton seed is used extensively as a fertilizer. The maintenance of a supply of improved seed corn (maize) and trials of a large number of varieties of peas and beans were also undertaken.

Entomological investigations connected with the life histories and control of the cotton stainer and bush bugs attacking cotton plants were continued. The measures adopted for the destruction of the cotton stainer have proved efficacious and 220 John Bull trees were destroyed together with numerous seedlings of the silk cotton tree.

Of land under the Land Settlement Scheme in the Island of St. Vincent 14 allotments containing 29 acres were sold for £134 9s. and of Crown Lands 183 acres were sold for £103 5s.

Shipping.

The number of vessels entered was 328, of 156,703 tons ; and 334 cleared, of 156,896 tons. Two vessels were registered of 43 tons total.

VI.—EDUCATION.

The following comparative table gives particulars in regard to primary education during the years 1918-19 and 1919 :—

	1918–19.	1919.
Number of schools	27	27
Number of pupils on Roll at 31st December	3,914	2,481
Average attendance	1,861	1,860
Government grant-in-aid	£1,724	£1,481 3s. 9d.
Cost per head in average attendance	18s. 7d.	15s. 11d.

Eight of the 27 regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other nineteen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were nine other small schools of a primary education standard, known as " Aided Schools," which were assisted by small Government grants.

The Government maintains in Kingstown a secondary school for the education of boys, the Grammar School, and one for girls, the Girls' High School. The average attendance in 1918–19 and 1919 was 37 and 45 boys and 17 and 27 girls. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

Ordinances Nos. 20 and 21 of 1917 empower the Town Board of Kingstown and the Town Wardens of Georgetown to spend certain sums from Town Funds towards scholarships and exhibitions on lines similar to the Government exhibitions.

VII.—BANKS.

Government Savings Bank.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years :—

Year.	*Number of depositors at 31st December.*	*Amount of deposits.*	*Amount of withdrawals.*	*Balance at credit of depositors at 31st December, including interest capitalised.*
1918 ..	993	£5,004	£4,697	£16,167
1919 ..	982	5,102	6,007	15,707

The Savings Bank funds invested at the 31st of December, 1919, amounted to £18,143 2s. 5d. In consequence of the continued depreciation in values investments could not be realised with advantage.

Colonial Bank.

There is a branch of the Colonial Bank with headquarters in England with an

	£
Authorised Capital of	5,000,000
Subscribed Capital of	1,000,000
Paid-up Capital of	200,000
Reserve Fund	400,000

There is also a Savings Bank Department attached to the Branch.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

Steamships of the Royal Mail Steam Packet Company, under contract with the Canadian Government, continued to call at St. Vincent once a fortnight on their outward voyages to British Guiana and on their homeward voyages to Canada; and during the year three steamers of the Direct Line also brought and took cargo and mails. Mails were also sent and received by sailing vessels to and from Barbados and Grenada, where there is direct communication by steamer with the United Kingdom and the United States.

The Postal Department, with headquarters in Kingstown and 16 district post offices, continued to provide facilities for the transaction of postal business. Mails were sent to the windward side of the island by motor car and by boat to the leeward side and to the Grenadines.

There is no inland telegraph service. A subsidy of £300 a year is paid to the West India and Panama Telegraph Company, in return for which the Colony receives daily news bulletins and participates in a system of reduced charges for cablegrams.

The Government maintains a telephone system which connects Kingstown with all the police stations in the small towns and villages and with the places of residence and business of renters. Payment of 10s. a month entitles a renter to be put in communication with all the districts of the Colony. There were 93 telephones rented by the general public, while 71 were attached to Government departments for official use. A small charge is made for messages sent by persons who are not renters of telephones. There were 77 miles of trunk lines and 92 miles of lines connecting renters with the exchanges. The revenue was £622 6s. 2d. and the expenditure was £502 8s. 4d. In 1918–19 the revenue was £769 7s. 9d. and the expenditure was £563 13s. 8d.

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1920.

I.—INTRODUCTION.

Geographical.—Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British island to the mainland of South America with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad, and between the parallels of 12° ·30′ and 11° ·58′ North latitude and 61° ·20′ and 61° ·35′ west longitude. The island is about 21 miles in length and about 12 in its greatest breadth. Its area is 125 square miles, but including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast-line is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, landlocked and deep-watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forest to their summits, intersect the island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the island, 1,740 feet above sea level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

Climate.—The climate can be classed as excellent, especially from December to May, when it is delightful. The trade winds are steadily prevalent during this period, but occasionally fail in the autumn months, which are somewhat damp and hot.

The range of temperature is small, and tends to make the climate equable and healthy. The thermometer seldom reaches 90° in the shade, or drops below 70°, and these occasions are specially recorded in the meteorological notes of the year. The highest temperature in 1920 was 90°, on October 17 and November 27, and the lowest 69° on March 8. The average mean temperature is 79°.

LIBRARY OF CONGRESS
RECEIVED
DEC 22 1921
DOCUMENTS DIVISION

The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches; in the mountainous centre it approaches 140 inches. At St. George's, midway between the two, the rainfall in 1920 was 68·66 inches. Over the past 29 years, the average has been 76·58 inches yearly.

Historical.—Grenada was discovered by Columbus on August 15, 1498, but for more than 100 years after its discovery the island was left in the undisturbed possession of the aboriginal inhabitants, who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the island, and after being owned by French proprietors for some years it was annexed to France in 1674.

In 1795-6, influenced by the French Republic, a rebellion against the British rule broke out, and the Lieutenant-Governor and 47 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development and prosperity.

II.—GENERAL OBSERVATIONS.

The period of abnormal prosperity which the Colony had enjoyed during the past few years reached its maximum in 1920. Cocoa, which is the staple product of the Colony and accounts for from 80 to 85 per cent of the value of the exports, attained the price of 130s. per cwt. The average pre-war prices ranged from 50s. to 65s. Spices and cotton, the other main crops, also reached unprecedented prices.

Altogether the trade balance in favour of the Colony, as represented by the excess in value of exports over imports during the past five years, has amounted to £1,031,097.

Towards the end of 1920 market quotations dropped, in consequence of the financial depression throughout the world, and sales were difficult to effect at any price. The prosperity of the past few years has unfortunately not been used to the best advantage. The set-back in prices appears to have taken people by surprise, and retrenchment has been found necessary in almost every direction.

On September 24th took place the historic event of the visit of His Royal Highness the Prince of Wales. His Royal Highness arrived on board H.M.S. "Renown" at 9 a.m., and left the following morning for St. Lucia. The arrangements for his reception included the presentation of loyal addresses at a public meeting in York House, the assembling of the school children of the Colony, a drive to the Grand Etang, and a luncheon party and garden party at Government House. In the evening His

Royal Highness held a reception on board H.M.S. "Renown." The Prince's visit had been eagerly looked forward to throughout the Colony, and numbers thronged the streets of St. George's, which were gaily decorated. His Royal Highness spoke to the School children in the Market Square, and inspected the officers and men who took part in the War. With many of these the Prince entered into conversation, and the interest which His Royal Highness took in the general affairs of the Colony evoked much enthusiasm and gratification. The Prince of Wales has endeared himself to the people of the Colony, and has deepened and strengthened in Grenada, as elsewhere, the devoted loyalty of the people to the Throne.

Public Health.—Health conditions during the year were good. The death-rate, 17·5 per 1,000, is the lowest since 1901, in which year the same rate occurred. 43·9 per cent. of the total deaths were of children below the age of five years. This is a reduction on the percentage in 1917 which was 51·0, but it is still too high. Intestinal diseases, due to insufficient and improper feeding, are the cause of most of the deaths of children, and remedial measures were undertaken during the year by the Government and the District Boards to counteract the evil. Deducting infantile deaths, the adult death-rate in proportion to the population above five years of age becomes reduced to nearly 10 per 1,000, and compares favourably with the death-rate in temperate zones.

Diarrhœa and enteritis caused 304 deaths (4·0 per 1,000 of the population), dysentery 99 (1·3 per 1,000), and malaria 77 deaths (1·0 per 1,000).

Water Supplies.—There is a pipe-borne water service in all the parishes of the island except St. David's, the latter being supplied with numerous protected springs and streams. Certain lands forming the catchment area of the water supply of St. George's were acquired by the Government during the year in order to prevent pollution.

III.—GOVERNMENT FINANCE.

The revenue during 1920 amounted to £134,128 and the expenditure to £148,174, resulting in a deficit of £14,046.

The corresponding figures for previous years are as follows:—

Year.	Revenue.	Expenditure.	Surplus.	Deficit.
	£	£	£	£
1915–16	96,420	103,992	—	– 7,572
1916–17	114,525	108,078	6,447	—
1917–18	106,138	109,390	—	– 3,252
1918–19	110,387	108,252	2,135	—
1919 (nine months) ..	87,295	107,011	—	– 19,716
1920	134,128	148,174	—	– 14,056

The public debt of the Colony amounts to £223,670, against which there is an accumulated sinking fund of £57,283, while £54,535 of the latest Loan issue remains unexpended. This leaves the Colony with a net indebtedness under Loan Funds of £111,852.

The assets at 31st December stood at £105,725 and the liabilities at £79,976, showing a credit surplus of £25,749 as compared with a surplus of £39,795 at the opening of the year. No allowance for depreciation of investments has been taken into account in these figures.

Owing to the impossibility of realising the surplus investments of the Government except at a loss owing to their present depreciated market value, the Colony's current account with the Colonial Bank was overdrawn at the end of the year by £19,573, while a further sum of £17,235 was borrowed from local loan funds.

An issue of Government Currency Notes of the denominations of 2s. 6d., 5s. and 10s. was made during the year to the amount of £12,500, which had an effect equivalent to a loan of the same amount without interest for two years, owing to the fact that redemption of the notes is postponed by law until the expiration of two years from the date of issue. A reserve fund in specie to the extent of 25 per cent. of the issue will then be provided by the Government.

Banks.—Two banks are established in the Colony, the Colonial Bank and the Royal Bank of Canada. Branches of the former also exist at Grenville and Carriacou. Both Banks conduct a Savings Bank Department in addition to their other business.

The authorised note circulation in the Colony of the Colonial Bank was £25,000, and of the Royal Bank of Canada 100,000 dollars. The actual amount of paper money in circulation at the end of the year was approximately £30,000, in addition to currency notes to the amount of £12,500 issued by the Government.

Gold coins have disappeared, the principal medium of monetary exchange, in addition to notes, being silver, which is legal tender to any amount.

Savings Bank.—The Government Savings Bank continues to attract patronage, although the local branches of the Colonial Bank and the Royal Bank of Canada have established similar banks. The depositors at the end of the year numbered 1,509, and the amount at their credit was £18,636. In 1913 when only the Government Bank was in operation the depositors numbered 2,356 and the deposits amounted to £27,936.

IV.—ANNUAL PROGRESS OF TRADE, AGRICULTURE AND INDUSTRY.

Trade Agreement with Canada.—The agreement entered into by the Canada-West Indies Conference held at Ottawa in June, 1920, at which the Colony was represented, was ratified by the Legislative Council on August 31, and was followed in November by a new Customs Duties Ordinance. This Ordinance provides for a preference of 33⅓ per cent. on all goods of Empire origin or manufacture. The general *ad valorem* rate of duty is fixed at 15 per cent., the preferential rate being 10 per cent. Under the old Agreement of 1912, which is brought to an end by the present one, a fair increase of trade between the Dominion and the Colony had sprung up, and it is expected that a further growth will take place in consequence of the increased preferences now given, and of the improved steamship service which it is intended to provide.

Imports and Exports.—The total trade of the Colony during the year was £1,236,877. Imports amounted to £620,378 and exports to £616,499.

This is the high water mark of the Colony's trade, and is more than double the value recorded in any pre-war year. This is due solely to the increase in prices, as there has been no increase in volume. Owing to the extent to which the Colony is already developed there is little scope for augmentation of existing crops, or introduction of new ones.

The United States takes the leading place in regard to imports, 34·3 per cent. coming from that country as compared with 31·3 per cent. from the United Kingdom. Since 1913 the United States of America percentage has grown from 31 to 34, while that of the United Kingdom has declined from nearly 40 to 31.

This diversion of trade is still more noticeable in the case of manufactured goods, the importations from the United States of America having increased in the seven years from 13 to 54 per cent. The Collector of Customs reports that notwithstanding the high rate of exchange certain classes of goods can be obtained of as good a quality and cheaper from the United States of America than from the United Kingdom. Such articles include drills, shirtings, Oxfords, and hosiery of all kinds, also dress materials and boots and shoes in good styles and greater variety. Certain classes of hardware are also said to be as good as and cheaper than British manufactures. American medicines and drugs, perfumery, toilet soaps and common soap are also displacing importations from the United Kingdom.

Notwithstanding the substantial preference of 33⅓ per cent. on all goods of Empire manufacture provided for in the new Customs Duties Ordinance to which reference has been made, it still appears that the United States of America can compete successfully with the United Kingdom. Unless prices of goods

manufactured in the United Kingdom become considerably reduced, the diversion of trade to the nearer New York market will continue, especially when the rate of exchange falls to a normal figure.

With regard to exports, cocoa to the value of £372,135 went to the United Kingdom, and £66,284 to the United States of America, the total value of cocoa exports being £466,658.

All the cotton, to the value of £40,950 was exported as usual to the United Kingdom.

Much of the trade in spices was transferred to the United States of America and Canada, where better prices appear to have been obtained. Nutmegs to the value of £36,625 were exported to the United States of America and £11,939 to Canada, the exports to the United Kingdom being £9,969. Seven hundred and twenty-four hundredweights of mace exported to the United States of America were estimated at the value of £5,230, and 1,206 cwts. to the United Kingdom were recorded at £6,852. Ninety-nine hundredweights went to Canada at a value of £969.

The exportation of lime juice was considerably less than in 1919 and was of the value of £9,025.

Agriculture.—The crop of cocoa in the crop year ending September 30 was one of the largest on record, 76,686 bags (180 lb.) having been exported as against 77,275 in 1917, the record year. Prices were high except towards the end of the year, when they fell rapidly, the range being from a maximum of 130s. to a minimum of 50s.

The exports of spices (principally nutmegs and mace) showed some decline from the two preceding years. Prices on the whole were good, the estimated value of the export being £73,232, which was only exceeded by that of the preceding year, when it reached £103,773.

The exports of cotton (the cultivation of which is mainly confined to Carriacou) were the highest in value on record, the value being £48,679 as compared with £14,523 in the preceding crop year. The type produced is Marie Galante, only a few bales of Sea Island cotton being grown.

The cultivation of limes has not proved a permanent success, and the exportation has fallen in quantity from 178,525 gallons in 1918 to 23,310 in the past year. The main reason of its decline is that lands not already under other permanent crops are of little value and not particularly suited for new industries. The accuracy of the remarks of the Imperial Commissioner of Agriculture for the West Indies (Sir Francis Watts, K.C.M.G.), in reporting on limes and coconuts in Grenada in 1914, are now observable, and they are worthy of repetition. They were as follows: "It is essential in pushing new industries that the crops should be planted in favourable situations: this will have to be kept well in mind in Grenada, where the best lands are given

up to cocoa; it is not likely that success with new crops will be obtained if they are relegated to land of little value and not particularly suitable for them."

Land.—The number of separate lots of land may be seen from the following:—

		Number of Lots.						
Total taxable acreage.	2½ acres and under.	Over 2½ to 5 acres.	Over 5 to 7 acres.	Over 7 to10 acres.	Over 10 to 20 acres.	Over 20to100 acres.	Over 100 acres.	Total.
75,377	8,756	1,362	378	200	237	181	138	11,252

From these particulars it will be observed that Grenada is a land of small peasant owners, the majority of the holdings being under five acres. The acquisition of land by peasants began towards the end of last century, when many sugar estates were derelict, and the new industry of cocoa was being established. A few acres under the latter crop provides a comfortable living for a family of the peasant class, and the success which attended the first efforts of these small proprietors led to a great demand for small lots, which were readily granted by the proprietors of unprofitable sugar estates. The settling of small holders on their own lands was afterwards encouraged by the Land Settlement Scheme of the Government, which was first instituted in 1903. The main features of the scheme consist of the buying up of large estates, which are then divided into small lots, supplied with suitable roads and tracts connecting with the by-ways, and then sold on easy terms of payment extending over twelve years. Owing to the extent to which the Colony was given up to cocoa, the latter crop was prohibited on Government Land Settlement lots in order to encourage the growth of local food crops, the supply of which is insufficient for the demands of the ordinary people, and the dearth of which makes conditions arduous for the poorer classes.

There are no Crown Lands for sale, the lands remaining in the possession of the Crown being reserved in forest, for preservation of the rainfall. The extent of the Government Forest Reserve is 2,652 acres.

The demand for land in Grenada is so keen that persons other than natives or residents stand little chance of acquiring it. All the lots under the Government scheme are taken up. On the few occasions when large estates change hands, competition of local proprietors and residents forces the price up to a figure which makes purchase by an outsider unprofitable. Lands

under full cultivation have fetched as high as £200 an acre. Uncultivated land is scarce and comparatively poor, and hence unsuitable for profitable cultivation of any new industry.

Industries.—With the exception of the manufacture of sugar and rum there are no industries of any importance whatever in the island. Sugar is made to a very small extent, and the Colony imports most of its supplies of that commodity. Enough rum is made to supply the local market, which is protected by a heavy countervailing duty on imported rum amounting to a protection of 4s. per proof gallon. There are thirteen distilleries, the total rum made during the year being 51,907 proof gallons.

An ice factory is established in St. George's with the aid of a Government subsidy.

A small whaling industry started at Point Saline on the southern coast a year or two ago has not developed, the returns of the past year being very poor, and the industry is not likely to be proceeded with.

V.—LEGISLATION.

Sixteen Ordinances were passed by the Legislative Council during the year, the principal being the following :—

No. 3. The Profiteering Ordinance, which follows the lines of the English Imperial Act, modified to suit local conditions.

No. 4. The West Indies Court of Appeal (Local Provisions) Ordinance, to give effect to the Imperial West Indian Court of Appeal Act.

No. 6. The Seditious Publications Ordinance giving power to prohibit the importation and circulation of seditious publications.

No. 7. The Paper Currency Ordinance, providing for the issue of Government Currency Notes of the denominations of 2s. 6d., 5s. and 10s.

No. 15. The Customs Duties Ordinance, following the model agreed upon at a Trade and Customs Conference held at Trinidad in 1919, and providing for preferential rates of duties on goods of Empire origin or manufacture in consequence of the Canada-West Indies Conference held at Ottawa in 1920.

VI.—EDUCATIONAL PROGRESS.

Primary.—The number of schools, 59, was the same as at the end of 1919. Eleven are Government schools, and 48 Grant-in-aid schools. One new building was erected to form the premises of the St. George's Anglican School. The building is a large one, of pleasing architectural design, and reflects credit on the Anglican organisation.

The number of pupils on the roll was 9,437 and the average attendance was 5,847. The contribution by Government in aid of primary education amounted to £8,919, giving a cost of £1 10s. 6d. per head of average attendance.

The Education Ordinance was amended during the year to provide for the advancing of the compulsory school age from 12 to 14 years. A School Attendance Officer for St. George's Parish was appointed under the amending Ordinance.

Secondary.—Secondary education is provided for at the Government Boys' School, the St. Joseph's Convent School for Girls and the Anglican Girls' High School. Satisfactory progress was made at all these schools, the results of the Cambridge Local Examination showing an improvement over those of the previous year.

An external scholarship of the value of £175 (temporarily increased to £210) and tenable for five years at an approved university is provided annually by the Government.

Technical Education.—A technical school, attached to the new Anglican School buildings, started operations in November, 1920, the curriculum including drawing to scale, carpentry, printing, metal work, book-binding, basket work, wood turning and carving, and the art of colour mixing and painting.

One half of the cost of equipment was defrayed by the Government, and a grant-in-aid to the school of £75 per annum for three years was approved by the Legislative Council. The management of the school is under a Committee consisting of the Manager of the St. George's Anglican Boys' School, the Superintendent of Public Works and the Inspector of Schools.

VII.—COMMUNICATIONS.

The island is well supplied with main roads and by-ways, there being 146 miles of the former and 305 miles of the latter.

A Government mail and passenger motor service is run between St. George's and Sauteurs and supplies the eastern side of the island. Mails and passengers on the western side are conveyed by motor launch, to which a subsidy is given. A serviceable main road on the western side is also available for traffic.

Post Offices are established in the principal centre of each parish, and there are numerous small postal stations throughout the Colony.

The telephone service is under Government control, and is efficiently run at a very moderate cost, a payment of 12s. per month entitling the subscriber to an unlimited service throughout the entire island without payment for trunk calls. There are six telephone exchanges, 159 miles of direct wire, and 938 miles of wire connecting subscribers and exchanges.

There is no inland telegraph service, and no wireless installation. The West India and Panama Telegraph Company supplies the means of external telegraphic communication, and furnishes a daily press news bulletin.

Shipping.—The Royal Mail Steam Packet Company steamers plying between Canada and the West Indies call fortnightly on the up and down journeys. A direct service to New York is maintained, Grenada being the first and last port of call on the Furness-Withy Steamer line from New York to Grenada and Trinidad. Cargo steamers of the Harrison Line, carrying also a few passengers, and plying between the United Kingdom and the West Indies, also visit the Colony at frequent intervals.

HERBERT FERGUSON,
Colonial Secretary.

Grenada.
8th June, 1921.

COLONIAL REPORTS, ETC.

The following recent reports, etc., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

ST. VINCENT.

ANNUAL GENERAL REPORT, 1920.

I.—GEOGRAPHICAL AND HISTORICAL.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land, about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter Island. The principal is Bequia, situated at a distance of 9 miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the Island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the Island was taken in 1762 by General Monckton ; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their sovereign.

In 1779 the Island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—GENERAL OBSERVATIONS.

The prosperity of St. Vincent is wholly dependent upon agriculture. The main crops are cotton, syrup and arrowroot.

There was general depression in the Colony owing to the remunerative prices for cotton and syrup not being maintained throughout the the year, and to the continued increases in the prices of foodstuffs and clothing, which bore heavily, especially on the middle and labouring classes. The position of the arrowroot market continued to be very unsatisfactory.

LIBRARY OF CONGRESS
RECEIVED
MAR 8 1922
DOCUMENTS DIVISION

His Excellency the Governor was resident in the Colony from the 6th February to the 4th March, 1920.

His Honour R. Popham Lobb, C.M.G., Administrator, was absent from the Colony on leave from the 16th February to the 16th December, 1920. During his absence the Government was administered by His Honour S. J. Thomas, Chief Justice.

There are 284 miles of public roads affording communication in all directions. Motor cars continue to be substituted for horses and carriages.

The Flag and replica of the Shield presented to the British West Indies Regiment by the League of the Empire was placed in St. George's Cathedral on the 25th August, when a special service was held.

On the occasion of His Royal Highness the Prince of Wales's visit to Grenada in September, His Honour, the Acting Administrator, proceeded to Grenada and presented an Address of Welcome to His Royal Highness on behalf of the Colony.

III.—CLIMATE.

St. Vincent is the healthiest of all the West Indian Islands. The temperature throughout the year varied from 77·3° F. to 81·0°F. The highest was in September and the lowest in January.

Meteorological records for 1920 show that the mean monthly temperature was 79·0° F.

St. Vincent experienced no abnormal weather during the year. The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea level, was 85·51 in., as compared with 99·52 in. in 1919. The figures for the past 19 years show that June to November are the months in which most rain fell. Rain fell on 257 days and the greatest fall for one day was 5·17 in. on the 24th October.

The reading of the barometer, corrected for instrumental error, elevation, and temperature, ranged from 30·176 in. on the 8th March to 29·835 in. on the 24th October.

IV.—FINANCIAL.

General Revenue and Expenditure.

The financial position of the Colony on the 31st December, 1920, was :—

	£	s.	d.	£	s.	d.
Surplus at 1st January, 1920 ..				5,097	9	1
Revenue in 1920	59,221	8	4			
Expenditure in 1920	52,305	6	10			
				6,916	1	6
Surplus at 31st December, 1920 ..				£12,013	10	7

In this amount is included a sum of £1,042 18s. 6d., unspent balance at 31st December, 1920, of the Windward Highway Loan.

(4552) Wt.19440/726 625 10/21 Harrow G.75/2

The total revenue and expenditure from all sources in the last three financial periods were :—

	Revenue.	*Expenditure.*
	£	£
1918–19	42,488	36,597
1919	34,111	35,361
1920	59,221	52,305

The net local revenue and expenditure amounted to :—

	Local Revenue.	*Expenditure against Local Revenue.*
	£	£
1918–19	41,503	35,105
1919	32,851	33,094
1920	58,221	52,302

The principal items of revenue in the last two financial periods were :—

	1919	1920
	£	£
Import Duties	13,084	21,744
Export Duties	1,512	4,233
Excise Duty on Rum ..	4,777	4,637
Land and House Tax ..	4,897	7,697
Income Tax	849	2,630

Of the total expenditure of £52,305 the sum of £2,492 was expended on Colonial gratuities and cost of passages to Cuba of the returned soldiers of the British West Indies Regiment. The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902-3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to general revenue and is applied to the relief of the poor.

Public Debt.

The public debt on 31st December, 1920, was £11,900, of which £1,500 is a loan raised by the town of Kingstown in 1914, for which the Colony is responsible only in case of default. The accumulated sinking funds provided for its redemption stood at £2,511 on the 31st December, 1920, of which £2,035 was in respect of Government Loans other than the Kingstown Board Loan. The actual net indebtedness of the Colony was therefore £8,365, equivalent to less than one-fifth of the average annual revenue for the four years ending 31st December, 1920.

The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to planters made from funds supplied by the Imperial Treasury, which was £2,565 on the 31st of December, 1920. On that date there had been received from planters towards the repayment of this balance the sum of £2,234, of which £2,160 was invested through the Crown Agents for the Colonies.

Currency.

British and American gold, five dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

V.—VITAL STATISTICS.

The population of the Colony in 1911 was 41,877, according to the census taken in that year. The population on 31st December, 1920, was estimated by the Registrar-General at 54,014 persons.*

The following table gives the births, deaths, and marriages in the past two years :—

	April to December, 1919.	*January to December,* 1920.
Births	1,320	1,998
Males	681	1,046
Females	639	952
Birth-rate per 1,000 of the estimated population ..	24·8	36·99
Deaths	706	1,008
Death-rate per 1,000	20·67	18·66
Marriages	99	159
Marriage-rate per 1,000 ..	1·86	2·94

Illegitimate births numbered 1,401, or 70·1 per cent. of the total number of all births.

VI.—ANNUAL PROGRESS OF TRADE, AGRICULTURE, AND INDUSTRIES.

Imports and Exports.

The total values of imports and exports in 1919 and 1920 were :—

Year	*Imports* £	*Exports* £	*Total Trade* £
1919 ..	185,128	153,892	339,020
1920 ..	257,230	299,650	556,880

Produce of the Colony to the value of £299,650 was exported in 1920.

The following table shows the value of imports for the past two years :—

	1919. £	1920. £
United Kingdom	58,121	83,518
Canada	54,123	70,978
British West Indies .. .	13,186	15,764
India	557	957
Newfoundland	971	1,818
Other British Colonies ..	898	6,983
United States of America ..	54,750	72,739
France	883	560
Denmark	72	231
Holland	137	251
Foreign West Indies	465	861
Other Countries..	965	2,570
	£185,128	£257,230

*Note.—This estimate was shown by the Census of 24th April, 1921, to be over 20·5% in excess of the true figure.

The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1919.	1920.
United Kingdom	31·40	32·46
United States of America ..	29·24	28·27
Canada	29·57	27·59
All other Countries	9·80	11·66

The following is a summary of the imports for the year :—

	£
Food, Drink, and Tobacco	87,763
Articles mainly manufactured	124,433
Articles mainly unmanufactured ..	45,034
	£257,230

Exports.

The destinations of the exports of the produce of the Colony in 1919 and 1920 were as follows :—

	1919.	1920.
	£	£
United Kingdom	87,523	215,538
Canada	13,068	29,851
United States of America ..	3,311	538
British West Indies	40,498	43,984
British Guiana	4,046	4,015
Other Countries..	1,303	128
	£149,749	£294,054

The principal products of the Colony exported were :—

	1919.	1920.
	£	£
Arrowroot	42,222	52,771
Cotton—		
Sea Island	64,004	163,443
Marie Galante	2,778	15,508
Cocoa	6,385	4,956
Sugar—		
Muscovado	3	—
Syrup and Molasses ..	10,723	27,828
Cassava Starch	4,836	3,844
Pea-nuts	5,098	10,816
Animals	3,980	2,995
Cotton-seed Oil	223	2,217

Agricultural Industries.

The Government Cotton Ginnery and Granary continued to buy seed cotton and corn (maize) ofitno pr-sharing terms.

The following quantities were dealt with in the seasons 1919 and 1920:—

	1919.		1920.	
	lb.	lb.	lb.	lb.
Sea Island seed cotton ..		332,773		78,236
Marie Galante		288,504		—
Corn on cob	92,672		85,018	
Corn, grain	83,842		106,077	
		176,514		191,095

There was considerable competition with private dealers for the purchase of Sea Island cotton in 1920, and no Marie Galante was purchased by the factory, the bulk of it having been sold to dealers in Carriacou, Grenada.

The corn, when kiln dried, amounted to 165,232 lb. and was stored in bins to provide a reserve of cereal food for the drier months of 1921.

Cotton.—During the year the area planted was 7,965 acres, the largest on record, and an increase of 1,332 acres over that planted in the previous year, of which 6,453 was in Sea Island and 1,512 in Marie Galante. The total output in Sea Island cotton was 614,508 lb. or 95·5 lb. per acre. Cotton seed is used extensively as a fertilizer.

Sea Island cotton amounting to 475,650 lb., of the value of £163,443, was exported during the year, as against 410,277 lb., value £64,004, in 1919.

Marie Galante—77,540 lb., value £15,508, in 1920, as against 33,331 lb., value £2,778, in 1919.

Sugar.—The Sugar-cane industry continued to be an important one; a small quantity only was, however, made into sugar, which was used for home consumption.

Syrup and Molasses.—185,999 gallons, of the value of £27,828, were exported in 1920, as against 170,842 gallons, of £10,723 value, in the previous year.

Rum.—20,147 proof gallons were manufactured in the Colony, showing an increase of 5 gallons on the previous year.

Imported rum for local consumption amounted to 10,482 gallons, as compared with 4,470 gallons in 1919.

Arrowroot.—This article continued to be unremunerative. 2,794,532 lb., of the value of £52,771, was exported, as compared with 2,244,575 lb., valued at £42,222, in 1919.

Pea-nuts.—12,017 bushels, value £10,816, were exported, showing an increase of 688 bushels, of the value of £5,718, over the exports in 1919.

There are 21 Agricultural Co-operative Credit Societies in the Colony, and the total sum of £4,886 was loaned to the various Societies during the year. All loans were duly repaid when due.

Shipping.

The number of vessels entered was 363, of 174,812 tons; and 362 cleared, of 172,084 tons. Three vessels were registered of 81 tons total.

VII.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1919 and 1920 :—

	1919.	1920.
Number of schools	27	27
Number of pupils on roll at 31st December	2,481	3,669
Average attendance	1,860	1,912
Government grant-in-aid	£1,481 3s. 9d.	£2,069
Cost per head in average attendance	15s. 11d.	£1 1s. 8d.

Eight of the 27 regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other 19 schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were nine other small schools of a primary education standard, known as " Aided Schools," which were assisted by small Government grants.

The Government maintains in Kingstown a secondary school for the education of boys, the Grammar School, and one for girls, the Girls' High School. The average attendance in 1919 and 1920 was 45 and 49 boys and 27 and 32 girls. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

Provision has been made for the Town Boards of Kingstown and Georgetown to provide sums towards scholarships and exhibitions at the secondary schools on lines similar to the Government exhibitions.

VIII.—BANKS.

Government Savings Bank.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years :—

Year.	*Number of depositors at 31st December.*	*Amount of deposits.*	*Amount of withdrawals.*	*Balance at credit of depositors at 31st December, including interest capitalized.*
1919 ..	982	£5,102	£6,007	£15,707
1920 ..	921	5,391	4,988	16,530

The interest capitalized during the year amounted to £420.

The Savings Bank funds invested at the 31st of December, 1920, amounted to £17,944. In consequence of the continued depreciation in values investments could not be realised with advantage.

Colonial Bank.

There is a branch of the Colonial Bank with headquarters in England. There is also a Savings Bank Department attached to the branch.

IX.—COMMUNICATIONS.

External.

A regular fortnightly service is maintained by the Royal Mail Steam Packet Company calling on their outward and homeward voyages at Bermuda, St. Kitts, Antigua, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad, and British Guiana. The Harrison Line of steamers also call with and for cargo and mails. Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, where there is direct communication by steamers with the United Kingdom and United States.

Internal.

The Post Office does a considerable amount of money order and parcels business (including the Cash on Delivery system with the United Kingdom) with the United Kingdom, United States, Canada, and other countries.

The central office is in Kingstown, with 16 district offices. Mails are sent to the windward side of the Island by motor car, by motor boat to the leeward side, and to the Grenadines by sailing opportunities.

There is no inland telegraph service. There is a station of the West India and Panama Telegraph Company at St. Vincent, and a subsidy of £300 per annum is paid to the Company, in return for which daily news bulletins are furnished and the Colony participates in the system of reduced charges for cablegrams.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 173 services and 169 miles of line in use.

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1921.

FINANCIAL.

The revenue for the year 1921 amounted to £97,931, and the expenditure to £136,969, showing a deficit of £39,038.

2. This is mainly the result of the fall of the market prices for cocoa, the Colony's staple product.

3. The following comparative statement indicates the extent of this fall:—

Value of Cocoa exported from the Colony.	1917 ...	£412,261
	1918 ...	519,365
	1919 ...	539,740
	1920 ...	466,658
	1921 ...	185,193

4. The revenue during 1921 amounted to £97,931, and the expenditure to £136,969, resulting in a deficit of £39,038.

The corresponding figures for previous years are as follows:—

Year.	Revenue.	Expenditure.	Surplus.	Deficit.
	£	£	£	£
1916–17	114,525	108,078	6,447	—
1917–18	106,138	109,390	—	3,252
1918–19	110,387	108,252	2,135	—
1919 (nine months) ...	87,295	107,011	—	19,716
1920	134,128	148,174	—	14,056

5. The assets of the Colony at 31st December, 1921, stood at £97,512, and the liabilities at £110,800, showing a net deficit of £13,288.

6. The public debt at the same date was £223,670, and the sinking fund £62,427 6*s*. 2*d*.

TRADE, AGRICULTURE AND INDUSTRIES.

7. The value of the imports during the year was small as compared with those of previous years. This is shown by the following comparative statement:—

Country.	1917.	1918.	1919.	1920.	1921.
	£	£	£	£	£
United Kingdom	95,681	79,274	94,467	204,639	70,435
Trinidad	21,961	28,658	30,691	53,379	22,310
U.S. of America	157,758	151,980	202,465	212,929	63,839
Canada	26,324	51,827	60,882	90,944	54,430

(7153) Wt. 11469/572 625 8/22 Harrow G.75/2

8. The value of the exports amounted to £279,217, of which £251,486 represents the produce of the Colony, and £27,731 the value of imported goods exported.

The principal countries which received the exports of the Colony were as under:—

United Kingdom	£165,950
Trinidad	33,684
Canada	16,404
United States of America	51,069

The values of the exports for the last five years are shown in the following statement:—

Country.	1917.	1918.	1919.	1920.	1921.
	£	£	£	£	£
United Kingdom	289,292	386,348	238,642	436,531	165,950
Canada	15,858	15,056	10,902	15,527	16,404
Trinidad	6,207	6,548	78,569	32,155	33,725
U.S. of America	162,643	290,039	107,867	108,955	51,069

9. A severe storm on the 8th September caused much damage to cocoa and nutmeg plantations. Many trees were destroyed, and the crop on others seriously affected.

SHIPPING.

10. One hundred and twenty-seven steam vessels, totalling 355,044 tons, entered at the port of Saint George during the year. Of these, 125 were of British build, one Cuban, and one American. One hundred and one arrived from ports in the British West Indies, 25 from the United States of America, and one from the French West Indies.

The same number cleared during the year. One hundred and two cleared for ports of the British West Indies, 24 for the United States of America, and one to the French West Indies.

Five hundred and fifty-one sailing vessels with total tonnage of 13,898 tons entered during the year.

LEGISLATION.

11. Among the more important of the Ordinances passed during the year are the Census Ordinance, which makes provision for the taking from time to time of a census of the Colony, and the Income Tax Ordinance, under which a tax on incomes was for the first time imposed and collected.

VITAL STATISTICS.

12. The population at the 31st December, 1921, is estimated to have been 66,957. According to the Census of the 24th April, 1921, the population at that date was 66,302, and the above estimate is arrived at after taking into account the natural increase since that date, and the difference between emigration and immigration.

13. By the Census it was shown that the population was 448 less than that in April, 1911. This result is attributed to the constant stream of emigration to the Canal Zone, Cuba, the United States of America and other places.

14. The birth-rate per thousand was 34·86 and the death-rate 19·5.

15. Judging from the returns as to deaths caused by syphilis, it would appear that the operation of the Venereal Diseases Ordinance of 1917 is producing beneficial results. In 1921 the number of deaths caused by that disease was 18 as compared with 25 in 1920, and 38 in 1919.

MEDICAL.

16. A new private ward, constructed as a separate building near the Colony Hospital, was formally opened by the Governor in April. This building provides accommodation for six patients, each in a separate room affording absolute privacy. In addition, a nurses' day recreation room is provided in the basement of the building.

17. Owing to the reduction in the number of cases treated in the Yaws Hospital, the direct outcome of the success attending the prosecution of the campaign of intensive treatment of yaws in the districts, that institution was closed on the last day of the year.

18. The general health of the Colony was on the whole satisfactory, for, in spite of an epidemic of dysentery in St. John's, which accounted for 61 deaths out of a total of 182 for that parish, the total number of deaths recorded was 1,309, and the death-rate per 1,000, 19·5 as compared with 1,318 and 17·5 respectively for the previous year.

19. The recorded number of deaths from malarial fevers was 69 as compared with 77 in 1920, and 88 in 1919. The free distribution of quinine to persons of the labouring classes continues. Certain anti-malarial measures were carried out with good results.

20. The campaign instituted in 1918 for the compulsory treatment of venereal diseases has been steadily prosecuted with good results. The Travelling Commission of the National Council for combating venereal diseases visited the Colony in the year under review.

POST OFFICE.

21. Increased rates of postage on correspondence posted in Grenada for places outside the Colony, except to the United Kingdom and British Possessions generally, and in the case of letters to the United States of America, were adopted as from the 1st December, 1921, in conformity with the requirements of the Postal Union Convention of Madrid.

METEOROLOGICAL.

22. The rainfall was 78·71 inches, 10·05 more than in 1920, and 4·33 more than the average for the past three years. The maximum temperature in the sun was 152 on the 11th June, and 93·0 in the shade on the 7th September. The minimum in the shade was 68 on the 11th March.

N. JULIAN PATERSON,
Acting Colonial Secretary.

Colonial Secretary's Office,
10th June, 1922.

COLONIAL REPORTS, ETC.

The following recent reports, etc., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page.

ST. VINCENT.

ANNUAL GENERAL REPORT, 1921.

I.—GEOGRAPHICAL AND HISTORICAL.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land, about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of nine miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—GENERAL OBSERVATIONS.

The prosperity of St. Vincent is wholly dependent upon agriculture. The main crops are cotton, syrup and arrowroot.

The general depression in the Colony owing to the unremunerative prices for cotton, syrup and arrowroot, which obtained in 1920, continued throughout the year. The high prices for foodstuffs and

(7486) Wt.14130/732 375 9/22 Harrow Gp.

LIBRARY OF CONGRESS
RECEIVED
APR 9 1923
DOCUMENTS DIVISION

clothing were also maintained and this, added to the hurricane which visited the island on the 8th September, 1921, and did extensive damage to property and widespread damage to staple and native food crops, entailed considerable hardship on the populace.

The hurricane which struck the island destroyed 729 and damaged 1,292 dwelling houses in St. Vincent and the Grenadines. Many churches and schools were also materially damaged and the entire telephone system collapsed. Nine vessels were wrecked with the loss of many lives.

Measures of relief were immediately instituted; free issues of food and grants of money, lumber and materials, to the value of £3,295, were made to those who suffered by the storm.

His Excellency The Governor was resident in the Colony from the 27th October to the 10th November, 1921.

His Honour R. Popham Lobb, C.M.G., Administrator, was absent from the Colony on leave from the 14th to 17th January, and on duty leave from 29th March to 11th April, while attending the Education Conference in Trinidad. He was also absent on duty leave from 7th to 11th September in Grenada, during his absence the Government was administered by His Honour S. J. Thomas, Chief Justice.

There are 284 miles of public roads affording communication in all directions. Motor cars continue to be substituted for horses and carriages.

St. Vincent has the reputation of being one of the most law-abiding communities in the West Indies. The total number of criminal convictions for the last ten years was 103 for an average annual population of 43,162, equivalent to ·238 per 1,000 of population.

III.—CLIMATE.

St. Vincent is one of the healthiest of all the West Indian Islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, with an average rainfall of 4·04 in. per month, and the wet season from June to December, with an average of 8·22 in. per month. The coolest months are December to April.

The temperature throughout the year varied from 76·9° F. to 80·2° F. The highest was in July and the lowest in March. Meteorological records for 1921 show that the mean monthly temperature was 78·8° F.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea level, was 85·96 in. as compared with 85·51 in. in 1920. Rain fell on two hundred days, and the greatest fall for one day was 2·75 in. on the 8th October.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30·64 in. on the 27th July, to 29·629 in. on the 8th September.

At 10 o'clock a.m. on 8th September, St. Vincent experienced a gale of hurricane force which blew from the north-east, gradually

varying, and from the south-east at 7.30 p.m. The correct reading of the barometer at 9 a.m. was 29·925, this steadily dropped until between 5.30 and 6 p.m., when it stood at 29·629, after which it gradually rose to normal.

IV.—FINANCIAL.

General Revenue and Expenditure.

The financial position of the Colony on the 31st December, 1921, was:—

Surplus at 1st January, 1921	£12,013 10 7
Revenue in 1921	53,805 11 0
	65,819 1 7
Expenditure in 1921	56,220 13 7
Surplus at 31st December, 1921	£9,598 8 0

In this amount is included a sum of £1,042 18*s.* 6*d.*, unspent balance at 31st December, 1921, of the Windward Highway Loan.

The total Revenue and Expenditure from all sources in the last three financial periods were:—

	Revenue. £	Expenditure. £
*1919	34,111	35,361
1920	58,221	52,302
1921	53,806	56,221

The net local Revenue and Expenditure amounted to:—

	Local Revenue. £	Expenditure against Local Revenue. £
*1919	32,851	33,094
1920	58,221	52,302
1921	53,806	56,221

The principal items of Revenue in the last three financial periods were:—

	*1919. £	1920. £	1921. £
Import Duties	13,084	21,744	16,163
Export Duties	1,512	4,233	2,987
Excise Duty on Rum ...	4,777	4,637	4,947
Land and House Tax ...	4,897	7,697	5,442
Income Tax	849	2,630	5,193

* This represents nine months, April to December, 1919.

The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to general revenue and is applied to the relief of the poor.

Public Debt.

The public debt at 31st December, 1921, was £11,900, of which £1,500 is a loan raised by the Town of Kingstown in 1914, for which the Colony is responsible only in case of default. The accumulated sinking funds provided for its redemption stood at £3,176 on the 31st December, 1921, of which £2,603 was in respect of Government Loans, and £573 of the Kingstown Board Loan.

The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to Planters made from funds supplied by the Imperial Treasury, which was £1,762 on the 31st December, 1921. On that date there had been received from Planters towards the repayment of this balance the sum of £1,804, of which £1,559 was invested through the Crown Agents for the Colonies.

Currency.

British and American Gold, Five Dollar Notes of the Colonial Bank, and British Silver and Bronze Coins constitute the currency of the Colony. Government accounts are kept in sterling, and Commercial and Banking accounts in dollars and cents.

V.—VITAL STATISTICS.

The population of the Colony in 1921 was 44,447, according to the census taken in that year. The population on 31st December, 1921, was estimated by the Registrar-General at 45,295 persons.

The following table gives the births, deaths, and marriages in the past two years:—

	1920.	1921.
Births	1,998	1,763
Males	1,046	896
Females	952	867
Birth-rate per 1,000 of the estimated population	36·99	38·92
Deaths	1,008	1,058
Death-rate per 1,000	18·66	23·36
Marriages	159	97
Marriage-rate per 1,000	2·94	2·14

Illegitimate births numbered 1,237 or 70·2 per cent. of the total number of all births.

VI.—ANNUAL PROGRESS OF TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.

The total values of imports and exports in 1920 and 1921 were:—

Year.	Imports. £	Exports. £	Total Trade. £
1920	257,230	299,650	556,880
1921	144,543	137,718	282,261

Produce of the Colony to the value of £130,739 was exported in 1921 as against £294,054 in 1920.

The following table shows the value of imports for the past two years:—

	1920. £	1921. £
United Kingdom	83,518	39,058
Canada	70,978	36,869
British West Indies	15,764	8,811
India	957	1,673
Newfoundland	1,818	6,339
Other British Colonies	6,983	3,778
United States of America	72,739	37,385
France	560	324
Denmark	231	11
Holland	251	582
Foreign West Indies	861	792
Germany	—	111
Other Countries	2,570	8,810
	£257,230	£144,543

The decreases in the values of imports and exports were due to the general depression in trade, and in the case of exports to the great reduction in the values of the articles exported.

The following are the percentages in the last two years of the principal countries from which imported articles are obtained:—

	1920.	1921.
United Kingdom	32·46	27·02
United States of America	28·27	25·86
Canada	27·59	25·51
All other countries	11·66	21·60

The following is a summary of the imports for the year:—

	£
Food, Drink and Tobacco	57,051
Articles mainly manufactured	64,455
Articles mainly unmanufactured	15,502
Miscellaneous and unclassified	7,535
	£144,543

Exports.

The destinations of the exports of the produce of the Colony in 1920 and 1921 were as follows:—

	1920. £	1921. £
United Kingdom	215,538	85,280
Canada	29,851	11,300
United States of America	538	—
British West Indies	43,984	32,056
British Guiana	4,015	1,674
Other countries	128	429
	£294,054	£130,739

The principal products of the Colony exported were :—

	1920. £	1921. £
Arrowroot	52,771	21,216
Cotton—		
Sea-Island	163,443	70,532
Marie Galante	15,508	89
Cocoa	4,956	2,259
Sugar—		
Crystallised	—	3,364
Muscovado	—	150
Syrup and Molasses	27,828	9,878
Cassava Starch	3,844	1,666
Peanuts	10,816	4,474
Animals	2,995	4,663
Cotton-seed Oil	2,217	299
Vegetables, Fresh	2,742	4,595
Peas	982	1,472

Agricultural Industries.

The Government Cotton Ginnery and Granary continued to buy Seed Cotton and Corn (maize) on profit-sharing terms.

There was considerable competition with private dealers for the purchase of Sea-Island Cotton in 1921, and no Marie Galante was purchased by the Factory, the bulk of it having been sold to dealers in Carriacou, Grenada.

The Corn, when kiln dried, amounted to 165,232 lb., and was stored in bins to provide a reserve of cereal food for the drier months of 1922.

The following quantities were dealt with in the seasons 1919–20 and 1920–21 :—

	1919–20.		1920–21.	
	lb.	lb.	lb.	lb.
Sea-Island seed cotton		332,773		78,236
Marie Galante ...		288,504		—
Corn on cob	92,672		85,018	
Corn, grain	83,842	176,514	106,077	191,095

Cotton.—During the year the area planted was 3,998 acres, a decrease of 3,956 acres in that planted in the previous year, of which 2,907 was in Sea-Island and 1,091 in Marie Galante. Cotton-Seed is used extensively as a fertilizer.

Sea-Island Cotton amounting to 502,398 lb. of the value of £70,532 was exported during the year, as against 475,650 lb., value £163,443 in 1920.

Marie Galante—2,380 lb., value £89 in 1921, as against 77,540 lb., value £15,508 in 1920.

Sugar.—The Sugar-Cane industry continued to be an important one.

Crystallized—349,440 lb., value £3,364, and Muscovado, 17,920 lb., value £150 was exported in 1921.

Syrup and Molasses.—117,157 gallons of the value of £9,878 were exported in 1921, as against 185,999 gallons of the value of £27,828 in the previous year.

Rum.—31,995 proof gallons were manufactured in the Colony, showing an increase of 11,848 gallons on the previous year. Imported rum for local consumption amounted to 507 gallons as compared with 10,482 gallons in 1920.

Arrowroot.—This article continues to be unremunerative. 2,093,358 lb. of the value of £21,216 was exported, as compared with 2,794,532 lb., valued at £52,771 in 1920.

Peanuts.—5,583 bushels, value £4,474 were exported, as against 12,017 bushels of the value of £10,816 in 1920.

There are twenty-one Agricultural Co-operative Credit Societies in the Colony, and the total sum of £5,369 was loaned to the various Societies during the year. All loans were duly repaid when due.

Shipping.

The number of vessels entered was 342, of 172,084 tons; and 345 cleared, of 174,839 tons. Three vessels were registered of 53 tons total. Five vessels locally registered of 144 tons were lost in the hurricane of September, 1921.

VII.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to Primary Education during the years 1920 and 1921:—

	1920.	1921.
Number of Schools	27	27
Number of pupils on roll at 31st December	3,669	4,506
Average attendance	1,912	2,453
Government Grant-in-Aid	£2,069	£2,362
Cost per head in average attendance	£1 1*s.* 8*d.*	£0 19*s.* 3*d.*

Nine of the twenty-seven regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other eighteen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were nine other small schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants.

The Government maintains in Kingstown a Secondary School for the education of boys, the Grammar School, and one for girls, the Girls High School. The average attendance in 1920 and 1921 was 49 and 62 boys, and 32 and 43 girls. There is a system of Government scholarships to the Grammar School for pupils from the Primary Schools.

An Island Scholarship has been established, under Ordinance No. 41 of 1921, to be awarded biennially, and to be tenable for four years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

Provision has been made for the Town Boards of Kingstown and Georgetown to provide sums towards Scholarships and Exhibitions at the Secondary Schools on lines similar to the Government Exhibitions.

VIII.—HOSPITALS.

The following hospital accommodation is provided: Colonial Hospital, Kingstown, 94 beds (including four beds for private paying patients); District Casualty Hospital, Georgetown, four beds; and District Casualty Hospital, Chateaubelair, six beds.

IX.—BANKS.

Government Savings Bank.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years:—

Year.	Number of depositors at 31st December.	Amount of deposits.	Amount of withdrawals.	Balance at credit of depositors at 31st Decr., including interest capitalized.
		£	£	£
1920	921	5,391	4,988	16,530
1921	895	4,064	4,520	16,516

The interest capitalized during the year amounted to £442.

The Savings Bank Funds invested at the 31st December, 1921, amounted to £17,944. In consequence of the continued depreciation in values, investments could not be realized with advantage. Interest at 3% is paid on deposits.

Colonial Bank.

There is a branch of the Colonial Bank, with headquarters in England, with a paid-up capital of £900,000. There is also a savings bank department attached to the branch.

X.—COMMUNICATIONS.

External.

A regular fortnightly service is maintained by the Royal Mail Steam Packet Company calling on their outward and homeward voyages at Bermuda, St. Kitts, Antigua, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad and British Guiana. The Harrison and the Canadian Merchant Marine Lines of Steamers also call with and for cargo and mails. Mails and cargo are also

sent and received by sailing vessels to and from Barbados, Grenada and Trinidad, where there is direct communication by steamers with the United Kingdom and the United States.

Internal.

The Post Office does a considerable amount of money order and parcels business (including the Cash on Delivery System with the United Kingdom) with the United Kingdom, United States, Canada and other Countries.

The central office is in Kingstown, with sixteen district offices. Mails are sent to the windward side of the Island by motor car, by motor boat to the leeward side, and to the Grenadines by sailing opportunities.

There is no inland telegraph service. There is a station of the West India and Panama Telegraph Company at St. Vincent, and a subsidy of £300 per annum is paid to the Company, in return for which daily news bulletins are furnished, and the Colony participates in the system of reduced charges for cablegrams.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 173 services and 169 miles of line in use.

W. C. HUTCHINSON,

Administrator (Acting).

Government House,
St. Vincent,

27th July, 1922.

COLONIAL REPORTS, ETC.

The following recent reports, etc., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

No. 1141.

ST. LUCIA.

ANNUAL GENERAL REPORT FOR 1921.

GENERAL DESCRIPTION OF COLONY.

St. Lucia is the largest of the Windward Islands. Its extreme length is 27 miles and its greatest breadth 14 miles with an estimated area of 233 square miles. It is situated within view between the French island of Martinique on the north and St. Vincent on the south. It is well known in military history for the many struggles that took place between the British and French until the island was finally ceded to Great Britain by the Treaty of Paris in 1814. Although under British rule from that period, the Colony remained French in most respects until the early 'eighties of the last century when, the British Government having decided to make St. Lucia a military and naval station, extensive military works were undertaken that attracted labour and settlers from the neighbouring British islands, and a garrison 1,000 strong was established in the Colony. The advent of this British influence gradually effected a change and to-day, although French to some extent is still spoken and French patois is the common vernacular of speech among the lower classes, the instincts of the people are now entirely British and the feeling of strong loyalty to the British Crown exists in every class of the inhabitants.

2. Castries, the chief town, lies on the north-west end of the island on the eastern shore of the harbour which extends a mile to the entrance on the west and is almost land-locked. The town is built on level and for the most part reclaimed land and is well laid out with wide and rectangular streets. On the north and west sides are wharves for the shipping. The port is well known as a coaling station, and nowhere else in the British West Indies can ships lie alongside and be coaled and watered with such rapidity as the conveniences of this port permit.

Government House, the official residence of the Administrator, stands on a prominent spur of Morne Fortuné at the back of the town about 500 ft. above sea-level. The house is a fine commodious building of some architectural pretensions and overlooks the town and harbour, and from it a splendid panoramic view is obtained of the surrounding country and sea. The island of Martinique stands quite visible on the horizon crested by Morne Pelée, the volcano that in 1902 destroyed the beautiful city of St. Pierre and its 30,000 inhabitants in that island. Close on the coast of Martinique is the celebrated Diamond Rock once seized

RECEIVED
APR 9 1923

by the British and commissioned as His Majesty's ship "Diamond Rock." Many captures of vessels proceeding to Martinique were made by cutting-out expeditions from the Rock during the British occupation. In closer view off the coast of St. Lucia is Rodney's fort on Pigeon island, from which observation was kept on the movements of the French fleet under de Grasse and ultimately led to Rodney's celebrated victory in 1782. Pigeon island was once a military station, but has long been abandoned for that purpose and only relics remain of its former historic use. Closer inshore is Rat island, fitted as a quarantine station but fortunately seldom required for such purpose, and more frequently in demand as a health resort and a favourite place for holiday parties and sea-bathing.

In the near distance across the harbour is the narrow promontory known as the Vigie, stretching a mile out to the west forming the northern protecting arm of the port with the lighthouse and signal station on a culminating peak. Many military buildings are located there and are rented from the War Office as private residences.

At the back of Government House, on the summit of Morne Fortuné, 300 ft. above sea-level, is a plateau on which extensive barrack accommodation was provided for the garrison. The troops were, however, withdrawn in 1905 when St. Lucia was abandoned as a military and naval station. All the fine buildings, substantially constructed of brick, are now vacant and deserted. The barracks are too large and inconvenient for private residential use, and the Government already possess all the accommodation needed for public institutions.

3. Twelve miles from Castries on the west side of the island is the picturesque town of Soufriere with about 2,000 inhabitants. This little town, second in importance in the Colony, lies on the margin of a deep bay with lofty hills at the back. Close at hand are the two famous Pitons of St. Lucia. Both cone in shape and less than a mile in circumference at the base, they rise from the sea carrying their peaks into the clouds. The smaller one, 2,461 ft. in height, is almost detached from the land, with precipitous sides that seem incapable of ascent. There is a legend that a party of bluejackets once gained the top and planted a flag, but were unable to descend and perished. In 1887, however, a party of military officers and local residents were successful in climbing to the summit, and returned in safety, and since then the ascent has occasionally been made. When celebrating the coronation of His Majesty King George a man who had previously climbed to the top was employed to make a bonfire on the summit, and the blaze from wood gathered on the spot was visible for many miles around. The larger Piton, though rising to 2,600 ft., is not as precipitous, and can be easily climbed from the land side.

4. Two miles from the town of Soufriere at an elevation of about 800 ft. from sea-level, at the back of the Pitons, is a volcanic crater of peculiar interest which is usually visited by all tourists to

(8115) Wt. 20618/1078 500 12/22 Harrow G.75/2.

St. Lucia. The sides and basin are encrusted with sulphurous deposits, and boiling cauldrons of black water are in a perpetual state of activity emitting sulphurous fumes. A stone thrown into a cauldron immediately excites increased agitation as of apparent wrath at the aggressive disturbance. There is a comfortable home close by used as a health resort, and hot sulphurous baths can be obtained which if located in the United Kingdom or Europe would be immensely patronized. Beyond Soufriere at intervals of a few miles are the villages of Choiseul and Laborie, and at the southern end of the island which opens out into flat country is the small town of Vieuxfort, prosperous in the days when West Indian sugar held its sway and many thriving planters lived in the locality, but now almost deserted by such residents and showing signs of the struggle against the hard times. Here, at the extremity of the island, is Cape Moule-a-Chique rising abruptly from the low land to an elevation of 733 ft., on the summit of which is a lighthouse fitted with a dioptric flash light with a visibility of 35 miles.

On the east coast are the villages of Micoud and Dennery, and elsewhere on the sea coast are three other villages known as Gros Islet, Anse-la-Raye and Canaries. Besides these towns and villages there are many settlements in inland parts of the island.

5. The Colony is divided into three judicial districts and eleven quarters or parishes.

6. The island is mountainous and rugged with a central ridge running for the most part from north to south, the highest peak attaining an altitude of 3,012 ft. Descending from this ridge in the centre part of the island are three extensive valleys that stretch out into level land many miles in extent. Here are situated three fine sugar factories, one in each valley. A fourth factory is located in the Vieuxfort quarter. There is considerable cultivation in various other directions, but a large portion of the mountain slopes and interior lands still remain in virgin forest in possession of the Crown, while at lower levels around the coast are extensive areas of uncultivable lands in scrub and bush. The island is well watered with several rivers and innumerable streams.

ADMINISTRATION.

7. The Governor-in-Chief resides at Grenada, the headquarters of the Government of the Windward Islands, and pays periodical visits to the other islands of the Windward group. There is, however, no political union between the islands, and the Government of St. Lucia is administered in the Governor's absence by an Administrator invested with the Governor's powers who acts as Colonial Secretary when the Governor is present. There is an Executive Council and a Legislative Council. The former is an advisory body, and many specific functions of administration are imposed by the laws of the Colony on the Governor in Council. The Legislative Council passes all laws and approves all expenditure of public funds.

POPULATION AND VITAL STATISTICS.

8. A census of the population was taken on 24th April. The returns gave a total of 51,505 persons; males 23,506 and females 27,999. Compared with the census in 1911 the figures show an increase of 2,868 or nearly 6 per cent. for the decennial period. 47,876 of the population were born in St. Lucia and 3,629 elsewhere, including 93 Europeans of whom 52 were born in the United Kingdom. 2,189 were returned as of East Indian origin but only 135 were born in India. The population lived in 11,220 houses—in towns and villages 3,519, and in rural districts 7,701. 46,413 of the inhabitants, or 90 per cent., were Roman Catholics, 3,845 Anglicans, 766 Wesleyans, and 270 of other denominations. 33,760, or 65·55 per cent., were unable to read or write.

The following figures show the population at four age groups:—

	Males.	Females.	Total.	Per cent.
5 years and under ...	4,374	4,306	8,680	16·8
6 to 20 years	8,972	9,379	18,351	35·7
21 to 60 years ...	8,901	12,629	21,530	41·8
61 years and over ...	1,259	1,685	2,944	5·7
	23,506	27,999	51,505	

There were 223 inhabitants per square mile.

The births in the year were 2,090—males 1,047, females 1,043. The deaths numbered 1,283; males 657, females 626. The birth-rate and the death-rate were respectively 37·2 and 21·8 per 1,000 of the total population.

CLIMATIC.

9. The climate of St. Lucia is healthy and compares favourably with other West Indian Colonies. Not for many years has there been any outbreak of smallpox or yellow fever or other quarantinable disease or serious epidemic. The temperature ranges from 70° in the cool season to 90° in the summer. The town of Castries, lying on low land with the majority of the houses roofed with corrugated iron, is sometimes hot during the day, but is cool at night. On the hill-sides around, where many of the best residences are built, it is never unbearably warm, while on Morne Fortuné, where the garrison was formerly located, the temperature in the winter months falls as low as 60°, and the climate at all times during the year is extremely mild and pleasant for Europeans.

The rainfall in 1921 was 90·06 in., 2·60 in. in excess of the previous year.

10. On the 8th September a storm passed over the Colony with a wind velocity of 40 miles an hour. The damage sustained was insignificant and only one life was lost. The Colony has been singularly free from all serious climatic or seismic disturbances,

and has been fortunately outside the track of the severe hurricanes that have visited the West Indies in past years.

11. Much has been said and written about the presence of the dreaded fer-de-lance snake in St. Lucia. In former years the Colony was infested with this deadly reptile. In 1870, Sir George Des Voeux, the then Administrator, offered a reward of 6*d.* a head which resulted in the destruction in one year of 52,000 at a cost to the Colony of £1,300. As the result of the introduction of the mongoose in 1890, and with the advance of cultivation and the continuation of rewards, the remnants of this pest have been driven into the interior, and no one in the Colony now remembers anything about the presence of snakes. The highest number of deaths recorded from snake-bite was 22 in 1869, and not a dozen have occurred during the past twenty years. There was not one in 1921.

FINANCIAL.

12. The inflated prosperity that succeeded the War had the same effect in St. Lucia as elsewhere, and the belief that increased prices for sugar and other products of the Colony would always prevail inspired speculation and excessive expenditure. Some of the sugar factories passed at fictitious values into the hands of syndicates without capital, and when prices suddenly fell in 1920 operations were carried on for a time but came to a stand-still in 1921 until accommodation could be secured from the banks. This cessation of employment and the fall in the market values of all staple products caused a serious set-back to the island. The expenditure of the Colony, which in 1913–14 amounted to £68,352, had risen in 1921 to £101,148. During that period up to 1919 the average expenditure had been £72,000, but in 1920 it jumped to £93,159. The average revenue for the corresponding period up to 1919 was £69,480. In 1920 it increased to £98,139, and fell in 1921 to £72,227, or £28,921 less than the expenditure. Fortunately, a surplus in hand of £12,577 at the commencement of the year reduced the deficit to £16,344. A good deal of revenue was in arrear at the close of the year which would have considerably added to the receipts if the collection had been possible, but, in the general state of severe depression in business and trade, concessions in extending time for payment were imperative. The arrears included about £3,000 for export duties and £5,500 for income tax.

Assets and Liabilities.

13. The assets of the Colony at 31st December amounted to £40,822, and the liabilities to £49,731. The assets included investments of £5,027 surplus funds, £7,437 Public Buildings Insurance Fund being the accumulation of annual contributions from general revenue set apart for the insurance of public buildings, and £15,008 savings bank deposits.

The principal items of the liabilities were £15,516 due to savings bank depositors, £7,252 payable on redemption of temporary currency notes, £12,000 advanced by the Crown Agents on behalf of the Colony for services in the United Kingdom, and £7,825 overdrawn at the Colonial Bank.

Public Debt.

14. The Public Debt stood at £155,799. The first debt amounting to £3,000 at 5 per cent. interest was incurred in 1885 for immigration purposes and will be finally repaid in 1922. In 1887 £10,000 was borrowed for the purchase by the Colony of preference shares in the St. Lucia Central Sugar Factory Company. Not long after, however, the Company came to grief, and the factory passed into other hands. In the same year a loan of £70,000 was raised for improving the Castries harbour. Both these loans were incurred at 4½ per cent. interest and will be finally repaid in 1931. The harbour was dredged and substantial concrete wharves were built. The outlay for the purpose, besides providing excellent accommodation for shipping, has been the means of adding a considerable source of income to the Colony from the coaling business that the facilities of the improved harbour made it possible to establish.

Other loans raised were £66,479 at 4 per cent. under the authority of Ordinance No. 19 of 1892 for public works, including a loan of £10,000 to the Castries Town Board. This loan will be finally repaid in 1944. Also loans amounting to £19,000 at 4 per cent. for constructing new waterworks for Castries, to be repaid in 1948. In 1916 a further loan of £30,000 at 5 per cent. interest was raised for the construction and improvement of roads and bridges. The Colony is now reaping the advantages of this well-considered outlay. Communication that was previously difficult, even on horseback, has been rendered practicable for motor cars, and parts of the island that were formerly almost unknown are at the present time within easy reach by comfortable conveyance.

Two small loans of £700 and £5,000 at 5 per cent. each were recently raised. The first in 1917 for the construction of a new wing for private paying patients at the Victoria Hospital, and the second in 1920 for the purchase of a motor launch for coastal service and for the establishment of a motor-bus service across the island.

The sinking funds towards the redemption of these several loans amounted to £37,807 at the close of the year.

Revenue.

15. The total local revenue of the Colony was estimated at £95,137, but the actual receipts were only £72,227. Owing to the restricted condition of trade and employment there was very

little money in circulation, and the revenue was bound to suffer in consequence.

The chief items of income are derived from Customs duties on imports and exports, excise duties, and income tax. The receipts from these sources were:—

Import duties	£26,550	
Export ,, ...	1,135	
Excise ,, ...	11,341	
Income Tax	8,963	
		47,989

Other principal receipts were:—

Licences—Spirit dealers, vehicles, etc....	3,119	
Stamp duties	2,320	
Succession duties	2,378	
Interest on investments	2,715	
Fees of Court	6,201	
		16,733
Various other items of local revenue amounted to		7,505
Making the total revenue for the year		72,227
To this sum may be added the grant received from the Rockefeller Foundation International Health Commission for carrying on the campaign for the eradication of ankylostomiasis in the Colony		1,950
Making a total revenue from all sources of ...		£74,177

The import duties comprise specific rates, principally on foodstuffs, and an *ad valorem* duty, chiefly on manufactured goods. The tariff of duties was revised on 16th August, 1921, and the existing duties are enumerated in the schedule to the Customs Duties Ordinance of St. Lucia, No. 11 of 1921. The Ordinance prescribes a general tariff and fixes the *ad valorem* duties at 15 per cent. All British goods verified as such under a certificate of origin to be the produce or manufacture of any part of the Empire are subject to the preferential abatement of 33⅓ per cent. of the general tariff rates.

The export duties are levied on sugar, molasses, cocoa, and lime products on a graduated scale according to prices at the time of exportation, and duties are also levied on certain other miscellaneous minor products exported, including bay leaves, coconuts, coconut-oil, copra, hardwood, logwood and pimento wood.

The excise duty is fixed at 5*s.* a proof-gallon and so in proportion for any greater or less quantity on spirits manufactured in the Colony. The only spirit so manufactured is rum. Included in the excise duty is a trade duty at the rate of 1*s.* 8*d.* a proof-gallon on all spirits imported or made locally and obtained for sale.

The income tax is payable on a graduated scale commencing at the low rate of 1*d.* per pound on incomes of £50, to 3*s.* 6*d.* per pound on incomes exceeding £10,000. Incomes under £50 are

not subject to the tax. The income tax roll in 1921 contained 616 taxed incomes out of a population of 51,505 persons, showing that only 1·19 per cent. were the happy possessors of an income of £50 and upwards. 53·9 per cent. of the taxed incomes ranged from £50 to £100. In the United Kingdom in 1920, 52·2 per cent. of the taxed incomes ranged from £500 to £1,000.

An item of revenue not shown in the Colony's annual estimates is a tax on houses in rural districts, which brings in about £2,300 a year. The tax was levied for the purpose of meeting the interest and sinking fund payable on any loans raised for the reconstruction and improvement of existing roads and for the construction and maintenance of new roads and bridges. Under the law imposing the tax the receipts are credited to a special "Roads Fund," but the law will be amended, and the tax will be shown in future as part of the Colony's revenue, but will be utilized for the same purposes.

In the present state of the Colony's development, taxation to secure a revenue of £95,000 is a severe strain. At that figure the taxation per head would be £1 16*s*. 10½*d*., but the earning capacity of the large majority of the population does not exceed £12 a year, and the burden of taxation therefore falls on a small minority. A budget of £95,000, the estimate for 1921, can only be realised in abnormal periods of prosperity. In view of the general depression that prevailed during the year, it was not considered expedient to impose additional taxation to meet the deficit.

EXPENDITURE.

16. The expenditure for 1921 was placed at £97,531 including the grant of £1,934 from the Rockefeller International Health Commission, and the actual expenditure amounted to £102,928, being £28,751 in excess of the actual revenue. With a shrinking income it became necessary to exercise careful economy, and savings were effected to the extent of £3,156, but several services had been under-estimated in the mistaken belief that prices of imported commodities would fall during the year, and supplementary votes had to be granted. The Colony also suffered a loss of £2,102 on the sale of investments. Retrenchment is essential because the expenditure has reached a figure beyond normal resources, but it is not easy to see where considerable savings are possible without the withdrawal of progressive measures that have become the every-day conveniences of life. The civil establishment is not overstaffed for the various duties required, and the salaries are not excessive compared with the higher emoluments of corresponding officials in larger and more prosperous Colonies. A few amalgamations are possible as opportunities may occur, but any reductions made in salaries or in staff will tend to less efficiency. For want of funds no new works of improvement could be undertaken during the year, and only expenditure on bare maintenance was possible.

Currency, Banks, Weights and Measures.

17. The coinage of Great Britain is the currency of this Colony. Local Treasury notes of the value of 10*s*. and 5*s*. are also in circulation. Gold and notes of the United States pass current.

The Colonial Bank and the Royal Bank of Canada have each a branch bank in the Colony, and they each have a five-dollar note circulation.

Imperial weights and measures are in use.

TRADE AND SHIPPING.

Imports.

18. The value of the imports and exports amounted to £446,387, as compared with £983,417 in the previous year. The imports and exports were respectively £528,044 and £455,413 in 1920 as against £217,507 and £228,882 in 1921. These figures show the slump that occurred in the trade of the Colony in the latter year.

The origin of the imports was as under:—

	£	£
United Kingdom	66,348	
Canada	47,790	
Newfoundland	2,145	
India	2,210	
Other British Countries	9,115	
		127,608
United States of America	68,968	
Other Foreign Countries	13,831	
		82,799
Parcels Post		7,100
		£217,507

The imports from the United Kingdom were chiefly manufactured fabrics, machinery and implements. The United States had the lead, however, in cotton piece-goods with a supply of 493,428 yards, value £11,878, as compared with 96,149 yards, value £5,438, from the United Kingdom. Notwithstanding the preferential abatement of duty on British goods, it seems that the United States can compete with a cheap class of manufacture that meets local requirements. The principal imports from Canada were wheaten flour, value £27,981, fish of all kinds, dried and pickled, £9,468, matches £1,132, butter £945, and cement £854. India supplied rice to the value of £2,132.

The imports from the United States included 5,501 tons of bituminous coal, value £16,523, apparel, cotton fabrics, and haberdashery £13,430, bags and bagging £3,678, unmanufactured

tobacco £2,117, motor cars and parts £2,266, oils, edible, £5,059, illuminating £4,021, other various goods £21,874.

Trinidad supplied the bulk of the motor spirit imported, 12,343 gallons, value £1,622, as against 2,825 gallons, value £328, from the United States.

Canada is now participating largely in the supply of goods that in pre-war days were obtained from the United States. All wheaten flour now comes from Canada, and the imports of manufactured articles show an increase.

The imports from foreign countries, apart from the United States, were chiefly obtained from France £5,087, Holland £1,383, Chile £2,825, and Venezuela £1,153. Goods of the value of £102 were imported from Germany.

EXPORTS.

19. The total exports, including the produce of the Colony and imported goods exported, were as under:—

	£	£
To the United Kingdom	64,825	
Canada	7,051	
Other Parts of British Empire ...	20,829	
		92,705
United States of America	70,675	
Other Foreign Countries	769	
		71,444
Bunker coal...		64,000
Ships' stores		733
Total		£228,882

Of these exports, £138,731 represented the produce of the Colony, and £90,151 imported goods exported. The destination of these exports is shown as follows:—

	Produce of the Colony.		Imports exported.	
	£		£	
United Kingdom	50,825		14,000	
Canada	6,979		72	
Other Parts of British Empire	9,850		10,979	
		67,654		25,051
United States of America ...	70,475		200	
Other Foreign Countries ...	602		167	
		71,077		367
Bunker coal				64,000
Ships' stores				733
Totals		£138,731		£90,151

Specie in silver coin was exported to the value of £17,000: to the United Kingdom £14,000, and to Antigua £3,000.

The figures below show the quantities and values of the principal produce of the Colony exported in 1921 as compared with 1920.

	1921.		1920.	
	Quantity.	Value.	Quantity.	Value.
	cwt.	£	cwt.	£
Cocoa	12,365	25,211	8,966	43,944
Coconuts	171,660	900	327,240	2,114
	lb.		lb.	
Cotton, raw	5,599	623	4,345	717
Honey	29,526	473	61,086	2,119
Hides and skins	695	122	4,983	1,188
	brls.		brls.	
Limes, fresh	1,858	1,775	808	780
	gal.		gal.	
Lime products	37,054	9,831	29,024	10,531
Molasses and syrup ...	103,676	5,325	199,366	28,159
	cwt.		cwt.	
Sugar	64,760	80,820	80,548	146,316

These figures show the general reduction in 1921 of the market values of all the Colony's produce.

Shipping.

20. No report on St. Lucia would be complete without special reference to Port Castries as a coaling station. The harbour is almost land-locked, is a mile in length, and available for all classes of vessels. The harbour is well lighted. On one side of the entrance is a flashing light visible 12 miles, and on the other side is an occulting light visible 12 miles, and there are also leading lights into the harbour. A concrete wharf, 650 ft. in length with a minimum depth of 27½ ft., provides accommodation for easy coaling. Steamers lie alongside and are bunkered by native labour at an average rate of 150 tons an hour or with greater celerity when required. Fresh water is also supplied to shipping from hydrants on the wharf.

Ten years ago the tonnage of shipping entered and cleared amounted to 3,490,042 tons, and Port Castries ranked thirteenth in the list of principal shipping ports in the Dominions and Colonies. In no single port in Australia or New Zealand or in the West Indies did the tonnage equal that of Port Castries, and was only exceeded in ports in Canada at Victoria, B.C. In recent years the shipping has declined, and in 1921 a marked drop occurred. Only 177 steamers called, of which 54 took bunker coal.

The following figures give the shipping entered and cleared in 1921:—

	Entered.		Cleared.		Total.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
Steam vessels ...	177	385,384	177	385,384	354	770,768
Sailing ,, ...	325	9,933	326	10,010	651	19,943
	502	395,317	503	395,394	1,005	790,711

The port was visited by six warships: H.M.S. " Cambrian " and the United States mine-laying squadron of five vessels, of which U.S.S. " San Francisco " was the flagship.

Steamship Services.

21. Steamers calling regularly at St. Lucia are the Royal Mail steamers subsidized by Canada for service between Canada and the West Indies, the Furness Withy steamers known as the Quebec Line, the Raporel Line running between New York and the West Indies, and the inter-colonial French steamer connecting at Martinique with the steamers of the Compagnie Générale Transatlantique.

These steamers afford frequent communication with Trinidad and Barbados, where transatlantic connections can be obtained.

Freight from the United Kingdom and Europe is dropped at Barbados and conveyed to St. Lucia on sailing schooners that constantly ply between the two islands. Steamers of the Harrison Line call at irregular intervals for the Colony's exports to the United Kingdom.

Agriculture and Natural Resources.

22. Only a small portion of St. Lucia is at present under cultivation. Extensive areas of Crown lands still exist in forest, and a good deal of land is not fit for cultivation. Selected parts are sold out on easy terms to applicants, but there is not sufficient population for all the arable land. The island is, however, well favoured for agricultural development. There are suitable soils for all kinds of tropical economic plants, and agriculture is not therefore restricted by the adaptability of the land to any single or particular kind of cultivation. There are excellent lands in the valleys for sugar-cane. Cocoa grows well in certain localities. Lands in many parts are well suited for lime cultivation, and coconuts thrive admirably around the sea coast. Cotton is also grown to some small extent, but has never been seriously taken up. The principal staples are sugar, cocoa and limes. The four sugar usines should be capable of producing some 15,000 to 20,000 tons, but with the capital and labour available the average total output does not exceed 5,000 tons, and in 1921 the exports fell to 3,238 tons. Besides the usines, there are many small sugar estates. With the sudden fall in market prices in 1921, the industry met with a severe collapse from which it will take some time to recover. A considerable quantity of fancy syrup and molasses is also produced. It is estimated that 4,450 acres are in sugar cultivation.

There are several cocoa estates that do well, and many petty proprietors possess small holdings, but St. Lucia is not a cocoa island, and not much extension of this product appears to be practicable. When a few years back prices for lime products

became attractive, cocoa in some parts was abandoned for lime growing, and attention is now only paid to cocoa on established estates. The cocoa market also collapsed in 1921. Prices that had reached as high as 128*s*. per cwt. in 1920 fell as low as 40*s*. per cwt. in 1921. The lands in cocoa cultivation are estimated at 6,000 acres, but this acreage does not include small scattered holdings.

Lime cultivation is a new industry in St. Lucia and has made rapid development. Several planters have established lime estates and have erected factories for concentrating the raw juice, and the Government has provided a factory for the benefit of small growers. With any encouragement in prices this industry would be extensively increased, as the soil appears to be specially favourable. The present area in cultivation is estimated at 2,500 acres.

Great hopes are placed on coconuts, and this cultivation is being rapidly extended. In a few years coconuts and copra will figure largely in the Colony's exports.

There are four rum distilleries which produced 51,385 proof-gallons. The local consumption was 45,362 proof-gallons, yielding an excise duty of £11,341. Only 63 proof-gallons were exported.

Bay-oil is also manufactured. There were three distilleries in operation. The bay-leaf tree is plentiful in the island, and the outlook for this minor industry is encouraging.

Bee-keeping is carried on to some extent but does not seem to increase.

The forests contain an abundant supply of native wood suitable for building purposes, and hard wood of various kinds for furniture and decorative work. Very little wood is now imported. Native wood is used for the construction of nearly all buildings.

There is plenty of room in the island for further enterprise, and the door is open to settlers with moderate capital. Banana plantations might be established, and a certain amount of stock breeding is possible.

23. The Agricultural Department has done very useful work for the Colony, and was instrumental in promoting the development of the lime industry. The Botanic station at Reunion has afforded great help by the distribution of economic plants. The grounds of the station are beautifully laid out with specimen and ornamental plants, and would not be out of place in a corner of Kew.

The establishment of the West Indian Agricultural College in Trinidad will make a landmark in agriculture, and will supply the means locally that have been long necessary for obtaining technical training and scientific knowledge in tropical agriculture.

EDUCATION, NEWSPAPERS AND PUBLICATIONS.

Primary Education.

24. There are 51 primary schools; 26 for infants (ages 4 to 10), 22 for juveniles (ages 8 to 16), and 3 for infants and juveniles combined. All these schools are denominational, 44 being Roman

Catholic, 4 Anglican and 3 Wesleyan. All receive grants-in-aid from public funds.

The number of pupils on the rolls on 31st December, 1921, was 6,603; the average attendance for the year was 4,589. The Government grant for primary schools for 1921 was £4,665, and the voluntary contributions amounted to £1,442, including estimated rental value of school-houses.

Education is compulsory between the ages of 6 and 14, but local conditions do not render it expedient to be exacting in the enforcement of the law.

There are two drawbacks to the progress of elementary education. The first is the inadequacy of the pay of teachers to attract men of the right class to take up teaching as a profession, and the second is the want of an institution for the systematic training of teachers. When the Colony can afford to supply these wants all other difficulties in the betterment of education in the primary schools will disappear.

Secondary Education.

25. There are two secondary schools, one for boys and one for girls. St. Mary's College, the school for boys, is maintained by the Roman Catholic Church assisted by a grant from public funds of £400 per annum. There are seventeen scholarships for boys from the elementary schools given by the Government. The number on the roll at 31st December, 1921, was 105, and the average attendance for the year was 100.

The girls' school is administered by the Sisters of St. Joseph, and receives a Government grant of £175 per annum. 130 girls were on the roll at 31st December, 1921, and the average attendance for the year was 115.

Both schools prepare their pupils for the Cambridge University Local Examinations held in July. Six boys and two girls obtained Senior Certificates. Nineteen boys and eight girls obtained Junior Certificates, including five with honours.

St. Lucia Scholarship.

26. An annual scholarship known as the St. Lucia Scholarship was established in 1918, of the value of £175, tenable at any University or College in Europe or Canada, or any Agricultural, Scientific or Technical College or Institution in Europe, Canada or the United States, approved by the Governor in Council for a period of not less than three years and not more than five years according to the time required for the completion of the course of study sanctioned by the Governor in Council. The Scholarship is awarded on the results of the London University Matriculation Examination to candidates having the requisite local and residential qualifications. Up to 1921 three scholarships had been awarded.

Newspapers and Publications.

27. There is only one newspaper "The Voice of St. Lucia," published bi-weekly. An official gazette confined exclusively to Government notices and publications is issued by the Government every alternate Saturday, and special gazettes are published at other times when necessary.

The Government also publishes an Annual Blue Book giving general statistical information of the Colony.

LOCAL FORCES AND POLICE.

Local Forces.

28. The Police Force is practically the only local armed body. The Volunteer Force, formerly efficient and popular, has since the War become moribund, and exists now only on paper. Some of the men are still willing to practice rifle shooting on the range, but no inducement in the near future will cause any revival of interest in a volunteer movement.

29. The Police Force is composed of three European ex-Army officers and 70 non-commissioned officers and men, all natives of St. Lucia or of other West Indian Colonies. The men are trained in rifle exercises and go through an annual musketry course, and there is a maxim-gun section. Besides the headquarters station in Castries, eleven district stations are located in different parts of the island, but for purposes of economy two were closed during the year. A number of rural constables are enrolled to assist the police in country districts.

POSTS, TELEGRAPHS AND TELEPHONES.

30. Opportunities for mail communication with the United Kingdom, Europe and New York are frequent, but not on regular scheduled dates. Mails from the United Kingdom and Europe are usually landed by transatlantic steamers calling at Barbados, and are conveyed from thence to the Colony by the first inter-colonial steamer or by schooner, and similarly mails from the Colony are sent to Barbados to connect with steamers proceeding from there to Europe.

An inland postal service is maintained between Castries and all the district towns and villages.

Telegraphic communication is provided by the West India and Panama Telegraph Company.

The Admiralty Wireless Station has been transferred to the local Government, and will be operated by the Government for shipping and commercial business.

There is a Government telephone system extending to all parts of the island with ten exchanges and 204 connections.

ROADS AND COMMUNICATION.

31. The means of communication in the island have greatly improved in recent years. With the completion of the Castries-Dennery road it is now possible to drive by motor car from Castries across the island to Dennery on the east coast, and from thence round the southern end of the island to Soufriere on the west coast, a distance of 55 miles. This road facilitates easy touch with important parts of the island and with large plantations that were formerly difficult to reach from Castries, and gives improved access for agricultural development in the interior.

The Government maintains 125 miles of main road, 127 miles of byways and 77 of unclassified roads, a total of 331 miles, of which 95 are suitable for motor car traffic.

A passenger bus service runs bi-weekly between Castries and Dennery.

Communication with the west or leeward parts was maintained by the Government motor launch of 50 tons which plied daily except on Sundays and Wednesdays between Castries and Soufriere, proceeding twice a week as far as Vieuxfort at the extreme southern end of the island.

The luxury of a motor car is now an ordinary method of travel where less than ten years ago only a tedious journey on horseback was possible. There are about 80 motor cars and motor lorries in the Colony, and motor cars are available for hire.

MEDICAL.

32. The Medical Staff comprised a Resident Surgeon in charge of the Victoria Hospital and six district officers, one of whom is Health Officer and has special charge of all sanitation activities. The staff was strengthened during the year by the new appointment of a Chief Medical Officer. The presence of such an officer with time at his disposal to exercise general supervision and to advise the Government should prove of great use in directing measures for the improvement of health conditions in the Colony. The Chief Medical Officer represented St. Lucia at the Medical Conference held in British Guiana in the middle of the year.

Owing to the low salaries provided, difficulty was experienced in obtaining the services of medical men to fill vacancies. It has been recognized that when the Colony's finances will permit, the emoluments of the Medical Officers must be increased.

The International Health Commission continued their operations during the year over a considerable area of the Colony. If effective sanitation can be maintained, this philanthropic campaign should prove a lasting benefit to the health of the labouring classes.

HOSPITALS AND ASYLUMS.

33. The Victoria Hospital or principal hospital is located within half a mile of Castries.

The staff consists of a Resident Surgeon in charge with a European Nurse Matron assisted by a good class of native nurses.

The number of patients admitted during the year was 1,575—males 653, and females 922. Of these, 1,006 were discharged cured, 133 relieved, and 111 died. The mortality-rate is always large for the reason that cases are frequently sent to hospital in a moribund and dying condition; 327 surgical operations were performed. The Chief Medical Officer reports that the list of operations "shows a wide range in variety and required considerable skill and knowledge for their successful performance," the percentage cured being almost 80 per cent. and the mortality about 4 per cent., which doubtless would have been lower had some of these cases been sent in earlier.

The institution has a good reputation, and persons of the best class needing surgical or medical treatment seek admission.

There are two district hospitals and a casualty ward at Soufriere, but for economical necessity are used only for cases of accident or emergency.

The Lunatic Asylum is a large building formerly the military ordnance store at Toc and taken over by the Government and converted to its present use. The institution contained a daily average of 37·6 male inmates and 54·5 females. Two were discharged cured and 16 died.

The Pauper, Yaws and Leper Asylums are located in the Soufriere district, and are under the supervision of the Medical Officer in charge of that district and a Visiting Advisory Committee. The buildings have a creditable appearance, and the institutions are well maintained. There were 97 inmates in the Pauper Asylum at the close of the year, the daily average was 68 males and 28·9 females. Ten were discharged during the year, and 28 died. The daily average in the yaws and leper divisions was 18·7. No deaths occurred, and nine patients were discharged cured.

CONCLUDING REMARKS.

34. The year was one of great financial depression. The cessation of work for a time on some of the sugar factories, the slump in the coaling business, the fall in the price of all the Colony's products, and the general curtailment of employment with no encouraging outlook caused much anxiety, but at no time did any gloom prevail. It was felt that the depression would not last, and that in course of time conditions would improve. The Colony fortunately possesses an abundant native food supply of fish, vegetables and fruit that served the wants of the poorer classes who might otherwise have suffered privation had they been obliged to depend on the purchase of imported foodstuffs.

Visit of the Hon. E. L. Wood.

35. Perhaps encroachment on the record for 1922 may be permitted to refer here to the visit of the Hon. E. L. Wood, M.P., Parliamentary Under-Secretary of State for the Colonies, as the writer of this report was at the time in charge of the Government of the Colony. Mr. Wood, accompanied by the Hon. W. Ormsby-Gore, M.P., and Mr. R. A. Wiseman of the Colonial Office, landed from H.M.S. " Valerian " on 8th January in the afternoon, and was met on the wharf by the Acting Administrator and Members of the Executive and Legislative Councils, principal officials and leading residents, and proceeded to Government House where they were entertained during their visit to the Colony. On the following day, Mr. Wood received a deputation from the Representative Government Association, and gave interviews to residents who called to see him on various public matters. In the afternoon he attended a public meeting on Columbus Square where he was presented with several addresses, and made a speech that was received with acclamation by the large assembled audience. At a garden party at Government House later that afternoon, the visitors had the opportunity of meeting the local society. On the following day Mr. Wood received a deputation of Medical Officers, and then went with his party by motor launch to the town of Soufriere where, on landing, he was presented with an address and made a speech in reply. The party then proceeded to the Volcanic Crater and were taken by guides to see the boiling cauldrons. Returning to Castries there was an official dinner and ball at Government House, and in the early morning of the 11th the party embarked on H.M.S. " Valerian " for St. Vincent.

To the great majority of the inhabitants, Mr. Wood's visit was viewed only in the sense that he was a person of great importance, and that some unknown benefit to the people might be expected to result from his visit, but to the educated portion of the community the real object of the mission was well understood, and satisfaction was felt that the Secretary of State had sent out a representative of Mr. Wood's standing to acquire on the spot personal knowledge of conditions in the Colony.

Mr. Wood and his party will be remembered for their urbanity to all with whom they came in contact, and their visit will be spoken of hereafter as a great epoch in the political history of the Colony.

E. D. LABORDE,
Acting Administrator.

St. Lucia,
16th August, 1922.

No. 1168.

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1922.

I.—INTRODUCTION.

Geographical.—Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British Island to the mainland of South America, with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad, and between the parallels of 12°30′ and 11°58′ North Latitude and 61°20′ and 61°35′ West Longitude. The Island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is 125 square miles, but including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast-line is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, landlocked and deep-watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forest to their summits, intersect the Island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the Island, 1,740 feet above sea level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

Climate.—The climate can be classed as excellent, especially from December to May, when it is delightful. The trade winds are steadily prevalent during this period, but occasionally fail in the autumn months, which are somewhat damp and hot.

The range of temperature is small and tends to make the climate equable and healthy. The thermometer seldom reaches 90° in the shade, or drops below 70°, and these occasions occur so rarely that they are specially recorded in the meteorological notes of the year. The highest temperature in 1922 was 90°, on 31st October and 3rd November, and the lowest 68° on 11th March. The mean of maximum temperatures was 83° and the mean of minimum 73°.

The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 in.; in the mountainous centre it approaches 140 in. At St. George's, midway between the two, the rainfall in 1922 was 66·35 in. Over the past 30 years the average has been 75·23 in. yearly.

Historical.—Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants, who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–6, influenced by the French Republic, a rebellion against the British rule broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

II.—GENERAL OBSERVATIONS.

Trade conditions during the year remained depressed, caused chiefly by a short crop of the Colony's principal product, cocoa, and by low market prices. There are signs that the cultivation has been extended to areas where it can only be profitably grown during periods of high prices. Portions of estates are thus under a permanent cultivation which gives a yield insufficient to cover the marketing of the crop at the present quotations. The net profit on some estates would be increased by eliminating the cultivation altogether on the less fertile sections. This is a policy that does not make a ready appeal to planters, as there is a natural disinclination to uproot existing cultivation of a permanent nature. The late period of high prices has also been the cause of over-capitalisation of estates that have recently changed hands. Many are unable to give an adequate return on the capital expended on purchase. These circumstances retard the restoration of the financial prosperity of the Colony.

The second chief cultivation of the Colony, nutmegs and mace, is fortunately increasing, and prices during the year were good. Enquiries are also being made with a view to establishing the cultivation of bananas, which would grow readily on certain soils that are now unprofitably devoted to cocoa. The successful introduction of this new industry would have the double effect of

(11647) Wt. 13075/782 500 9/23 Harrow G 75/2

providing additional wealth for the Colony, and of materially improving the net returns of estates on which it may be found suitable to substitute it for cocoa where the latter is now unprofitably grown.

The following table shows the altered trade conditions since 1920 :—

	Imports.	*Exports.*
1918	£377,332	£702,777
1919	438,110	637,249
1920	620,378	616,499
1921	250,541	272,242
1922	250,413	271,392
	£1,936,774	£2,500,159

The Honourable E. F. L. Wood, M.P., Parliamentary Under Secretary of State for the Colonies (now Minister of Education), accompanied by the Honourable W. Ormsby-Gore, M.P., and Mr. R. A. Wiseman, of the Colonial Office, visited the Colony in January in the course of a tour through the West Indies on behalf of the Secretary of State for the Colonies. In his report, presented to Parliament by Command Paper, Cmd. 1679, the subjects affecting Grenada include the question of the association of the Windward Islands with Trinidad as a nucleus for a larger Federation of the West Indies, the institution of a partly-elected Legislative Council, and improvement of the Medical Service.

Public Health.—The Colony of Grenada, including the Island of Carriacou, has a comparatively low death-rate, especially among adults, and health conditions are generally good. The death-rate for the year 1922 was 18·8 per 1,000. Intestinal diseases, due to insufficient and improper feeding, are the cause of most of the deaths of children, and although remedial measures are being carried out by the Government and the District Boards, the death-rate among children is high. Of the total deaths 42·6 were of children below the age of five years. Deducting these deaths, the death-rate of adults in proportion to the population above five years of age is considerably reduced, and while not so low as in European countries, compares more favourably with the adult death-rate in temperate zones than the total death-rate indicates.

Diarrhœa and enteritis caused 329 deaths (4·8 per 1,000 of the population), dysentery 83 (1·2 per 1,000), and malaria 83 deaths (1·2 per 1,000).

Water Supplies.—There is a pipe-borne water service in all the parishes of the Island except St. David's, the latter being supplied with numerous protected springs and streams. Certain lands forming the catchment area of the water supply of St. George's have been acquired by the Government in order to prevent pollution. The water supply of the Island of Carriacou is obtained from wells and from rain water stored in cisterns.

III.—GOVERNMENT FINANCE.

The revenue during 1922 amounted to £103,414, and the expenditure to £117,849, resulting in a deficit on the year's working of £14,435. The corresponding figures for the previous years are as follows :—

Year.	*Revenue.*	*Expenditure.*	*Surplus.*	*Deficit.*
	£	£	£	£
1917–18 ...	106,138	109,390	—	3,252
1918–19 ...	110,387	108,252	2,135	—
1919 (9 months)	87,295	107,011	—	19,716
1920	134,128	148,174	—	14,056
1921	97,932	136,969	—	39,037
1922	103,414	117,849	—	14,435

The annual deficits, as shown in the foregoing statement, have exhausted the Colony's surplus, which, in 1914, amounted to £64,153, and there was, at 31st December, 1922, a deficit of £27,724. The assets amount to £101,550 and the liabilities to £129,274. No allowance for depreciation of investments has been taken into account in these figures.

The public debt of the Colony amounts to £223,670, against which there is an accumulated sinking fund of £67,913, while £41,375 of the latest loan issue remains unexpended. This leaves the Colony with a net indebtedness under loan funds of £114,382.

Of the issue of Government Currency Notes of the denominations of 2*s*. 6*d*., 5*s*. and 10*s*., made in 1920 to the amount of £12,500, only £10,254 remained in circulation at 31st December, the 2*s*. 6*d*. notes having been withdrawn, and some dilapidated notes of the higher denominations destroyed as being unserviceable.

Banks.—Two banks are established in the Colony, the Colonial Bank and the Royal Bank of Canada. A branch of the former exists in Carriacou and there is an agency at Grenville. Both banks conduct a savings bank department in addition to their other business.

The authorised note circulation in the Colony of the Colonial Bank was £25,000, and of the Royal Bank of Canada $100,000. The actual amount of their notes in circulation at the end of the year was approximately £30,000.

Gold coins have disappeared, the principal medium of monetary exchange, in addition to notes, being silver, which is legal tender to any amount.

Savings Bank.—The rate of interest on deposits in the Government Savings Bank was raised from 3 to 4 per cent. as from 1st March, 1922. This resulted in increasing the number of depositors, who numbered 1,685 at the end of 1922 as compared with 1,404 a year previously, while the deposits increased from £14,995 to £15,609. A steady decline in the number of depositors

and in the amount of deposits had been in evidence for several years, originating with the introduction of savings departments by the Colonial Bank and the Royal Bank of Canada. The interest rates of these banks remain at 3 per cent.

Imports and Exports.—The total trade of the Colony during the year was £521,805. Imports of merchandise amounted to £250,413 and exports to £271,392. Of the latter the domestic exports were £260,308.

The preference of 33⅓ per cent. on all goods of Empire origin or manufacture, as arranged under the Agreement signed at Ottawa in 1920, has had the effect of enabling the United Kingdom during the past two years to regain the premier position in respect of imports. The value of imports from the United Kingdom was £72,902, from the United States of America £64,180, and from Canada £58,079, the percentages of the total imports being 29·1, 25·6, and 23·2 respectively.

In some classes of manufactured goods, in spite of the substantial preference of 33⅓ per cent. given to the United Kingdom, the United States of America still competes successfully with the former country. The principal commodities in this repect, and the relative values of importations from the two countries, are the following: cotton piece goods, United States of America £20,907, United Kingdom £12,040; boots and shoes, United States of America £2,484, United Kingdom £1,402; hats and bonnets, United States of America £1,019, United Kingdom £666; painters' colours and materials, United States of America, £285, United Kingdom £114; perfumery, United States of America £381, United Kingdom £29.

As in addition to the preference there is still an adverse exchange rate against the New York Market, it is difficult to account for the foregoing except by the conclusion that the prices of the articles manufactured in the United Kingdom are still too high for the local demand.

The importations from Canada consist principally of flour, oats, butter and fish, the trade in the first-mentioned article being now practically controlled by Canada. Importations of manufactured goods from Canada, although still of small value, are steadily increasing.

Of the total exports, £143,966, or 53 per cent., went to the United Kingdom, £81,571, or 30 per cent., to the United States of America, and £23,081, or 8·5 per cent., to Canada.

The principal exports consisted of cocoa (value £167,056), nutmegs (value £59,959), mace (value £17,056), and cotton (value £7,217).

Most of the cocoa went to the United Kingdom, of the value of £116,520, the United States of America taking £23,064, and Canada £18,907. For nutmegs and mace, however, the United States of America was by far the Colony's best market, nutmegs to the value of £46,952 being sent there, as compared with £9,651

to the United Kingdom and £3,341 to Canada. The corresponding figures for mace were £8,251, £8,177 and £637 respectively. The whole of the cotton went to the United Kingdom.

Agriculture.—The crop of cocoa for the crop year ending 30th September, 1922, was an unusually short one, the number of bags (averaging 180 lb.) exported in the period being 40,772. In the previous year the number was 53,333 and in 1920 was 76,686. The price continued low, and, together with the short crop, created considerable depression.

Nutmegs bore remarkably well, and the prices were good, as were also the prices for mace. The good returns from these crops proved a boon to the community.

The cultivation of cotton is confined to Carriacou, and is of the Marie Galante variety.

Land.—Grenada has a large number of small peasant owners of land, the lots being generally under five acres. The number of separate holdings of land may be seen from the following :—

Number of lots.

Total taxable acreage	2½ acres and under	Over 2½–5 acres	Over 5–7 acres	Over 7–10 acres	Over 10–20 acres	Over 20–100 acres	Over 100 acres	Total
75,377	8,756	1,362	378	200	237	181	138	11,252

There are no Crown Lands for sale, the lands remaining in the possession of the Crown being reserved in forest, for preservation of the rainfall. The extent of the Government Forest Reserve is 2,652 acres.

Industries.—With the exception of the manufacture of sugar and rum there are no industries of any importance whatever in the Island. Sugar is made to a very small extent and the Colony imports most of its supplies of that commodity. Enough rum is made to supply the local market, which is protected by a heavy countervailing duty on imported rum amounting to a protection of 4*s.* per proof gallon. There are fourteen distilleries, the total rum made during the year being 45,733 proof gallons.

An ice factory is established in St. George's with the aid of a Government subsidy.

A small whaling industry was started a few years ago at Point Saline, on the southern coast. Three whales were caught in 1920 and one in 1921. Operations ceased temporarily in 1922, but have since been successfully resumed. Three sailing boats are employed, each manned by a crew of six men. The whales are of the humpback species (*Megaptera nodosa*).

V.—LEGISLATION.

Nineteen Ordinances were passed during the year, the principal of which were the following :—

No. 2.—The Customs Duties (Amendment) Ordinance, effecting a general increase in the rates of duty on imported goods.

No. 3.—The Harbour and Cargo Duties Ordinance, imposing duties on ships entering the harbour and on cargoes discharged or loaded.

No. 4.—The Savings Bank Amendment Ordinance, increasing the rate of interest on deposits in the Government Savings Bank from three to four per cent.

No. 9.—The Income Tax Amendment Ordinance, increasing the rates of tax.

No. 10.—The Courts (Temporary Powers) Ordinance, empowering the Court to defer the sale of lands under any judgment or order.

No. 15.—The Fertilisers Supply Ordinance, authorising the Government to provide for the purchase and sale of fertilisers to planters under certain conditions.

VI.—EDUCATIONAL PROGRESS.

Primary.—The number of schools at the close of the year was 58, of which ten were Government Schools. The 48 Grant-in-Aid Schools comprised 17 Roman Catholic, 14 Anglican, five Wesleyan, and two Presbyterian Schools.

The number of pupils on the roll was 10,396, and the average attendance was 3,954. The contribution by Government in aid of primary education amounted to £8,001, giving a cost of £2 0*s*. 6*d*. per head of average attendance.

Secondary.—Secondary Education is provided for at the Government Boys' School, the St. Joseph's Convent School for Girls, and the Anglican Girls' High School. Each of the latter two schools receives an annual Government Grant of £186.

An external scholarship of the value of £175 (temporarily increased to £210) and tenable for five years at an approved university is provided annually by the Government.

VIII.—COMMUNICATIONS.

The Island is well supplied with main roads and byways, there being 146 miles of the former and 305 miles of the latter.

A Government mail and passenger motor service is run between St. George's and Sauteurs and supplies the eastern side of the Island. Mails and passengers on the western side are conveyed by motor launch, to which a subsidy is given. A serviceable main road on the western side is also available for traffic.

Post Offices are also established in the principal centres of each parish, and there are numerous small postal stations throughout the Colony.

The telephone service is under Government control, and is efficiently run at a very moderate cost. The number of instruments in use is 517. There are six telephone exchanges, 165 miles of direct wire, and 765 miles of wire connecting subscribers and exchanges.

There is no inland telegraph service, and no wireless installation. The West India and Panama Telegraph Company supplies the means of external telegraphic communication and furnishes a daily press news bulletin.

Shipping.—The Royal Mail Steam Packet Company's steamers plying between Canada and the West Indies call fortnightly on the up and down journeys. A direct service to New York is maintained, Grenada being the first port of call on the Furness-Withy Steamer Line from New York to Grenada and Trinidad. Cargo steamers of the Harrison Line, carrying also a few passengers, and plying between the United Kingdom and the West Indies, also visit the Colony at frequent intervals.

HERBERT FERGUSON,
Colonial Secretary.

23*rd July*, 1923.

No. 1169.

ST. LUCIA.

ANNUAL REPORT FOR THE YEAR 1922.

FINANCIAL.

Revenue and Expenditure.

The revenue for the year was estimated at £88,684. The amount actually received totalled £64,885, or £23,799 below the estimate. This reduction of receipts below anticipations, due in great measure to the continued restriction in trade, affected principally Customs Duties, which fell by £9,322; Excise Duty on rum, £1,740; Income Tax, £10,399; Stamp Duty, £1,403; and Fees of Court, £1,289. On the other hand, Retail Spirit Licences yielded £2,833 more than estimated.

The expenditure for the year was estimated at £94,121. The amount actually expended totalled £91,012, or £3,109 below the estimate, mainly due to savings being made under the heads: Public Works Recurrent, £1,514; Hospital and Asylums, £1,516; and Port and Marine, £932.

The figures, for both revenue and expenditure, include the estimated grant of £1,934 by the Rockefeller Foundation International Health Commission for the campaign against ankylostomiasis; the amount actually received on this account was £1,476, and the expenditure £1,771.

The accounts for the year closed with a deficit of £42,176.

Assets and Liabilities.

The total assets of the Colony at 31st December amounted to £34,441 and the liabilities to £68,567, the net excess of liabilities over assets being £34,126.

Public Debt.

At the close of the year the Public Debt stood at £151,630, and the Sinking Funds towards its redemption at £40,875.

Currency, Banks, Weights and Measures.

The coinage of Great Britain is the currency of the Colony. Local Currency Notes of the value of 5s. and 10s. are also in circulation, and gold of the United States of America and the notes of that country and of Canada are passed at their exchange value.

The Colonial Bank of London and the Royal Bank of Canada have each a branch in the Colony, and each issues its own notes. Both of these banks have Savings Bank branches, but information as to their operations is not available.

At the close of the year the Government Savings Bank had 1,238 depositors. The amount lodged during the year totalled £4,577, and the amount withdrawn £5,644, the amount remaining on deposit at the end of the year being £14,448.

The Imperial weights and measures are in use in the Colony.

TRADE AND SHIPPING.

Imports.

The total value of the imports was £189,000, or £28,507 less than in the previous year.

The classification in order of country of origin was as follows :—

	£
United Kingdom	38,314
Other British Countries	50,590
Foreign Countries	92,938
Parcel Post	7,158

The value of the importations from Canada was £32,891, and from Newfoundland £7,278. The importations from both the United Kingdom and Canada were largely below those of the previous year in value; on the other hand, the value of imports from the United States rose from £68,968 in 1921 to £80,717 in 1922, coal accounting for £14,759, cotton goods and ribbons for £8,430, cinematograph films for £12,840, edible oil for £4,653, and tobacco for £1,760.

Exports.

The following table shows the value of the principal exports in the last two years :—

	Value in 1921. £	Value in 1922. £
Cocoa	25,211	27,660
Limes and Lime products ...	11,606	6,937
Coconuts	900	421
Honey	473	290
Sugar	80,820	67,523
Fancy Syrup and Molasses ...	5,325	8,108
Hides and skins	122	396
	124,457	111,335
Bunker coal	64,003	27,553
Total ...	188,460	138,888

(11798) Wt. 14037/852 500 10/23 Harrow G 75/2

The total value of the exports was £175,479, as compared with £228,882 in the previous year, and was distributed as follows :—

	£
To the United Kingdom	85,251
Other Parts of the Empire	39,890
Foreign Countries	22,327
Bunker coal	27,553
Ships' stores	458
Total ...	175,479

SHIPPING.

The following table shows the number and tonnage of the vessels that entered at and cleared from Port Castries during the year :—

	Entered.		Cleared.		Total.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
Steam vessels ...	197	415,611	197	415,611	394	831,222
Sailing ,, ...	323	9,971	327	10,110	650	20,081
	520	425,582	524	425,721	1,044	851,303

In the previous year the total number of vessels was 1,005, with a tonnage of 790,711; there thus being a slight increase during the year under report in the number of vessels making use of the port.

AGRICULTURE AND NATURAL RESOURCES.

Four Central Sugar Factories—Cul de Sac, Roseau, Dennery and Vieux Fort—were working during the year. Notwithstanding that the price of sugar remained about the same as that of the previous year, local conditions, particularly as regards labour, were more satisfactory, thus enabling more work to be done at the factories, and resulting in a better output. In addition to the sugar consumed in the Island, the quantity exported amounted to 4,016 tons, as compared with 3,238 tons in 1921. The output of the rum distilleries also showed an increase, 54,484 proof gallons being manufactured, as against 51,385 gallons in 1921.

The cocoa exported showed a slight gain over the previous year, rising from 12,364 cwt. to 14,579 cwt. Prices abroad were somewhat better and ranged from 52s. to 60s. per cwt.

The market for lime juice continued depressed, and in the case of fields distant from factories the crop was allowed to remain ungathered. The amount actually reaped, calculated in barrels of the fruit, was largely in excess of that of the previous year, the figures for 1921 being 45,975 barrels, and for 1922 51,490 barrels. The exporting of green limes continued until late in the year, and exceeded the quantity exported in 1921 by 3,127 barrels.

There were four Bay Oil distilleries in operation during the year—one in the Laborie district, two in the Dennery district, and one in the Castries district. Four hundred and eighty-six gallons of Bay Oil, valued at £1,221, were exported. Besides the quantity of Bay Rum used locally, 5,133 gallons, valued at £1,342, were despatched abroad. The industry should gradually become an important one.

Bee-keeping somewhat revived, and, although still not very profitable owing to low prices and high charges for freight, etc., 22,948 lb. were exported, in addition to a large amount consumed in the Island.

EDUCATION, NEWSPAPERS AND PUBLICATIONS.

Primary Education.

There are 49 primary schools, in which education is free and compulsory. These schools are denominational, 42 being Roman Catholic, 4 Anglican, and 3 Wesleyan. They are classified as juvenile (for children aged 8–16) and infant (for children aged 4–10). There are 21 of the former, 24 of the latter, and 4 in which the two classes are combined.

Grants-in-aid are made to the school managers from public funds, mainly for the payment of the salaries of teachers. The administration of the grants is in the charge of the Inspector of Schools, a Government officer. For 1922 the total grants amounted to £4,650, and the average attendance to 4,799.

Although education is compulsory between the ages of 6 and 14, not more than one-half of the children of school age attend school. The schools are inadequately staffed, their equipment is generally poor, and the prevalence of the French " patois " adds immeasurably to the difficulties of the teachers.

In the primary schools English, reading, writing and arithmetic are taught, together with the elements of grammar, geography and hygiene. In the upper classes the boys are taught elementary agricultural science, both practical and theoretical, and the girls needlework and domestic economy. In the three " R.'s " the results are generally very good. A child who has passed through a primary school can write a good hand, read well, and is familiar with the elementary processes of arithmetic. In the other subjects the results are not so good—the inability of the pupil to express himself clearly in English being the chief hindrance to progress.

Except the Roman Catholic Sisters, the teachers are all natives of the Colony or of neighbouring Colonies. Few of them have had any training beyond that received in school as pupil teachers. Facilities for the training of teachers and higher rates of pay—to attract a better class to the profession—are urgently needed.

Secondary Education.

Secondary education is supplied by two institutions in Castries: for boys by St. Mary's College, for girls by St. Joseph's Convent School. These schools receive grants-in-aid from public funds, the former £400 per annum, and the latter £175 per annum. Each school had an average attendance in 1922 of just over 100. The course of instruction is designed to prepare pupils for the Cambridge University Local Examinations and the London University Matriculation Examination, in both of which pupils have attained considerable success.

St. Lucia Scholarship.

An annual scholarship, known as the St. Lucia Scholarship, was established in 1918, of the value of £175, tenable at any University or College in Europe or Canada, or any Agricultural, Scientific or Technical College or Institution in Europe, Canada or the United States, approved by the Governor in Council, for a period of not less than three years and not more than five years, according to the time required for the completion of the course of study sanctioned by the Governor in Council. The Scholarship is awarded, on the results of the London University Matriculation Examination, to candidates having the requisite local and residential qualifications. Up to 1922 four Scholarships had been awarded.

Newspapers and Publications.

There is only one newspaper, "The Voice of St. Lucia," published bi-weekly. An official gazette, confined exclusively to Government notices and publications, is issued by the Government on every alternate Saturday, special gazettes being published at other times when necessary.

The Government publishes also an annual Blue Book, giving general statistical information of the Colony.

POLICE AND PRISONS.

The strength of the Police Force at the close of the year totalled 67 of all ranks. Except for the Chief, the Inspector and the Sub-Inspector, who are Europeans, the men are all natives of the West Indies. A number of rural constables are also enrolled to assist the police in the country districts.

The men of the regular force are instructed in rifle, physical and musketry exercises, and there are Maxim and Lewis gun sections.

The headquarters of the force is in Castries, with sub-stations, numbering nine, in various towns and villages.

There is only one prison in the Colony—the Royal Gaol in Castries. The number of prisoners admitted during the year was 320, an increase of 51 above the number in 1921. The daily average number in custody was 62·51.

A large amount of work is carried on in the prison workshops, the whole of the clothing for the prisoners, uniforms for warders, police, harbour department and asylum attendants being made, and boots made and repaired. The carpenter's shop supplied 248 coffins for the burial of paupers, and the prison bakery made 86,163 pounds of bread for the Institutions, the approximate saving to the Colony from this latter source over the current normal market rate being £550.

POSTS, TELEGRAPHS AND TELEPHONES.

Opportunities for mail communication with Europe and America are frequent but irregular, except in the case of Canada, with which country and the other West Indian Colonies a regular fortnightly service is maintained by the steamers of the Royal Mail Steam Packet Company.

The revenue of the Post Office was £1,762, and the expenditure £1,128, the net gain to the Treasury thus being £634.

The number of letters and postcards despatched abroad was 85,210, and the number received 98,855; the number of parcels despatched was 806, whilst the number received was 4,896, the latter figure being over 1,000 above the number received in the previous year.

The money orders issued on places abroad numbered 2,103 for £2,973; those paid in the Colony numbered 885 for £2,459. The British postal orders issued numbered 1,366 for £649, the orders paid being 735 for £367.

An island postal service is in operation between Castries and all the district towns and villages. The total number of postal packets dealt with by the inland offices was 95,724.

Telegraph communication with abroad is provided by the West India and Panama Telegraph Company, and a Wireless Telegraph Station is maintained and operated by the Government. There is a Government telephone system throughout the Island, with 9 exchanges and 206 connections.

ROADS AND COMMUNICATIONS.

The road system of the Island is being improved as rapidly as means permit, and there is now maintained by the Government 125 miles of main road, 130 miles of by-ways, and 84 miles of unclassified roads, a total of 339 miles, of which 126 miles are suitable for motor traffic.

Passenger motor bus services run between Castries and Dennery on the east coast, and between Soufriere and Vieux Fort, the two towns on the west coast.

There is regular communication between Castries and Soufriere, as well as the intermediate villages, by a Government motor launch of 50 tons, which runs daily, except on Sundays and Wednesdays, and proceeds twice a week to Vieux Fort, at the southern extremity of the Island.

POPULATION AND VITAL STATISTICS.

The total population at the 31st December is estimated by the Registrar to have been 53,221, made up of 24,399 males and 28,822 females. These figures represent a population of 228 to the square mile.

There were 2,080 births during the year, 1,041 being males and 1,039 females; the birth-rate for the Island was 39·0 per thousand of the population. Deaths numbered 1,384, giving a rate of 26 per thousand.

HOSPITALS AND ASYLUMS.

The principal hospital, the Victoria, is situated within half a mile of Castries. It is in charge of a Resident Surgeon, who has under him a European Matron and a full staff of dispensers and nurses. There were 1,571 patients admitted during the year, the daily average number under treatment being 76·3. The surgical operations carried out numbered 421. There is a wing attached to the hospital known as the "Baron Ward," in which patients of the wealthier class may receive medical and surgical treatment. Extensive use is made of the ward, and during the year the fees received from persons treated therein amounted to £200.

Twenty-six patients were admitted to the Lunatic Asylum at La Toc, also near Castries, the daily average number in confinement being 90·2. One inmate was discharged as cured and ten died.

Asylums for paupers and for persons suffering from yaws and leprosy are located in the Soufriere district under the supervision of the Medical Officer of that district and a Visiting Advisory Committee. Thirty-seven persons were admitted to the pauper asylum; the number being maintained at the close of the year was 87, and the daily average 93.

At the Yaws Asylum 7 patients were admitted and 10 discharged. The treatment by Kharsivan at the outdoor dispensaries throughout the Colony of persons suffering from the disease has proved so successful that it is hoped in the near future to close this hospital entirely.

There were 15 patients in the Leper Asylum at the commencement of the year, and 3 were admitted. There were 3 deaths and no discharges.

At Dennery, Soufriere and Vieux Fort there are small Casualty Hospitals under the charge of the respective District Medical Officers, which are used for accident and emergency cases. Fourteen patients were admitted during the year to these hospitals.

GENERAL REMARKS.

The year was one in which it was only possible to "mark time," as the depression in trade and industry experienced in the previous year continued to make itself felt during 1922. The

financial condition of the Colony called for the exercise of vigilance in every direction, and all expenditure, other than for absolutely essential purposes, had to be rigorously curtailed.

The visit to St. Lucia from the 8th to the 11th January, 1922, of the Hon. E. L. Wood, M.P. (then Parliamentary Under-Secretary of State for the Colonies), has been dealt with in the Annual Report for 1921, and no further reference thereto need be made here beyond remarking that his report on his tour, which was received during the course of the year, evoked a great amount of interest and discussion.

The Governor and Commander-in-Chief of the Windward Islands, Sir George B. Haddon-Smith, K.C.M.G., was in residence in the Colony from the 26th August to the 26th September.

The Administrator, Lieut.-Colonel W. B. Davidson-Houston, C.M.G., returned from leave and resumed duty on the 31st August.

Colonial Reports, Etc.

ST. VINCENT.

ANNUAL GENERAL REPORT, 1922.

I.—GEOGRAPHICAL AND HISTORICAL.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of nine miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

NOV 27 1923

II.—GENERAL OBSERVATIONS.

The general health of the Colony throughout the year was good. The birth-rate was 34·67 per 1,000 and the death-rate 21·6 per 1,000. There was a mild epidemic of measles during the last six months of the year, but no deaths were recorded and few complications ensued.

Infantile diarrhœa continued to be prevalent, with a death-rate of 11 per cent. of cases treated.

The campaign against yaws by intramuscular injection of Novarsenobillon was pressed vigorously with very satisfactory results. During the year 4,604 cases—over 10 per cent. of the population—were treated, and of these over 78 per cent. were returned as cured.

The sanitation of the island must still be considered as primitive.

The prosperity of St. Vincent is wholly dependent upon agriculture. The trade of the Colony continued to suffer greatly from the slump in prices of tropical products which characterized the previous year.

A Chamber of Agriculture and Commerce was formed early in the year with a membership of eight, which rose in the course of the year to twenty-four. It is hoped that the Chamber will act as a useful medium for enabling the Government to obtain reliable information and advice upon the economic conditions and requirements of the Colony.

The outstanding event of the year 1922 was the visit of the Honourable E. Wood, M.P., Parliamentary Under-Secretary of State for the Colonies. Mr. Wood was accompanied by the Honourable W. Ormsby-Gore, M.P., and Mr. R. A. Wiseman, of the Colonial Office, the object of the mission being to investigate economic and administrative conditions throughout the West Indies, and in particular to enquire into the growing claim for a measure of representative government.

The mission spent two days in St. Vincent and *inter alia* discussed with leading bodies of citizens and deputations the position of the arrowroot industry, the question of erecting small sugar factories, the question of agricultural banks, educational reform, etc.

His Excellency the Governor was resident in the Colony from the 28th September to the 26th October.

His Honour R. Popham Lobb, C.M.G., Administrator, was absent from the Colony on leave from the 11th May till the 25th September, during which period the Government was administered by the Honourable W. C. Hutchinson, Colonial Treasurer.

Mr. Lobb left the Colony finally on the 9th November on well earned promotion to the post of Colonial Secretary, British Guiana, and the Government for the remainder of the year was administered by the Honourable W. C. Hutchinson.

12056 Wt. 15979/964 500 10/23 Harrow G.75,2

III.—CLIMATE.

St. Vincent is one of the healthiest of all the West Indian islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, with an average rainfall of 4·04 inches per month, and the wet season from June to December, with an average of 8·22 inches per month. The coolest months are December to April.

The temperature throughout the year varied from 76·2° F. to 80·8°F. The highest was in September and the lowest in January. Meteorological records for 1922 show that the mean monthly temperature was 79·0° F.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea level, was 79·74 inches, as compared with 85·96 inches in 1921. Rain fell on 299 days, and the greatest fall for one day was 3·27 inches on the 16th October.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30·175 inches on April 18th to 29·859 inches on the 16th November.

IV.—FINANCIAL.

General Revenue and Expenditure.

The financial position of the Colony on the 31st December, 1922, was :—

	£	s.	d.
Net Surplus at 1st January, 1922 ..	8,555	9	6
Revenue in 1922	49,289	10	2
	£57,844	19	8
Expenditure in 1922	46,710	18	11
Net Surplus at 31st December, 1922 ...	£11,134	0	9

Expenditure on the reconstruction of the Windward Highway from loan funds hitherto incorrectly included in the Colony's expenditure (the unspent balance of the loan being included in the surplus from year to year) has been excluded from the above figures. At the beginning of the year there was a sum of £1,042 18*s*. 6*d*. in hand on this account, of which £139 18*s*. 4*d*. was expended, leaving a balance of £903 0*s*. 2*d*. at the close of the year.

The net local revenue and expenditure in the last three years were :—

	Local Revenue. £	Expenditure against Local Revenue. £
1920	58,221	52,302
1921	53,806	56,221
1922	49,289	46,711

The principal items of revenue in the last three years were :—

	1920.	1921.	1922.
	£	£	£
Import Duties	21,744	16,163	18,511
Export Duties	4,233	2,987	2,142
Excise Duty on Rum ...	4,637	4,947	5,327
Land and House Tax ...	7,697	5,442	6,459
Income Tax	2,630	5,193	1,736

The unexpended balance of £25,000 of the Eruption Relief Fund, made up of donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to the general revenue and is applied to the relief of the poor.

Public Debt.

The public debt at 31st December, 1922, was £11,900, of which £1,500 is a loan raised by the Town of Kingstown in 1914, for which the Colony is responsible only in case of default. The accumulated sinking funds provided for its redemption stood at £3,869 on the 31st December, 1922, of which £3,207 was in respect of Government Loans, and £662 of the Kingstown Board Loan.

The Colony is also responsible, in case of default, for the unpaid balance of the Hurricane Loan to Planters made from funds supplied by the Imperial Treasury, which was £958 on the 31st December, 1922. On that date there had been received from planters towards the repayment of this balance the sum of £1,360, of which £1,248 was invested through the Crown Agents for the Colonies.

Currency.

British and American gold, five dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

V.—VITAL STATISTICS.

The population of the Colony in 1921 was 44,447, according to the census taken in that year. The population on 31st December, 1922, was estimated by the Registrar-General at 46,220 persons.

The following table gives the births, deaths, and marriages in the past two years :—

	1921.	1922.
Births	1,763	1,681
Males	896	848
Females	867	833
Birth-rate per 1,000 of the estimated population	38·92	36·37
Deaths	1,058	985
Death-rate per 1,000	23·36	21·31
Marriages	97	86
Marriage-rate per 1,000	2·14	1·86

Illegitimate births numbered 1,196, or 71·1 per cent. of the total number of all births.

VI.—ANNUAL PROGRESS OF TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.

The total values of imports and exports in 1921 and 1922 were :—

Year.	Imports. £	Exports. £	Total Trade. £
1921	144,543	137,718	282,261
1922	128,586	109,190	237,776

Produce of the Colony to the value of £96,831 was exported in 1922 as against £130,739 in 1921.

The following table shows the value of imports for the past two years :—

	1921. £	1922. £
United Kingdom	39,058	30,279
Canada	36,869	33,436
British West Indies	8,811	6,816
India	1,673	520
Newfoundland	6,339	5,795
Other British Colonies	3,778	4,181
United States of America	37,385	35,312
France	324	597
Denmark	11	15
Holland	582	617
Foreign West Indies	792	153
Germany	111	597
Other countries	8,810	10,268
	£144,543	£128,586

The decreases in the values of imports and exports were due to the general depression in trade and in reduction in values, the latter being particularly applicable to the exports.

The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1921.	1922.
United Kingdom	27·02	23·54
United States of America	25·86	27·46
Canada	25·51	26·02
All other countries	21·60	22·98

The following is a summary of the imports for the year :—

	£
Food, Drink and Tobacco	51,415
Articles mainly manufactured	54,058
Articles mainly unmanufactured	14,288
Miscellaneous and unclassified	8,825
	£128,586

Exports.

The destinations of the exports of the produce of the Colony in 1921 and 1922 were as follows :—

	1921. £	1922. £
United Kingdom	85,280	51,777
Canada	11,300	11,013
British West Indies	32,056	31,929
British Guiana	1,674	1,305
Other countries	429	807
	£130,739	£96,831

The principal products of the Colony exported were :—

	1921. £	1922. £
Arrowroot	21,216	26,141
Cotton—		
Sea Island	70,532	31,750
Marie Galante	89	205
Seed Cotton, Marie Galante	592	622
Cocoa	2,259	2,040
Sugar—		
Crystallised	3,364	1,264
Muscovado	150	—
Syrup and Molasses	9,878	9,862
Cassava Starch	1,666	1,482
Copra	1,358	2,435
Peanuts	4,474	6,214
Animals	4,663	1,091
Cotton-seed Oil	299	396
Whale Oil	625	505
Vegetables, fresh	4,595	3,168
Peas	1,472	1,659

Agricultural Industries.

The Government Cotton Ginnery continued to buy seed cotton on profit-sharing terms.

No corn was purchased owing to the absence of a market.

The following quantities were dealt with in the seasons 1920–21 and 1921–22 :—

	1920–21. lb.	1921–22. lb.
Sea Island seed cotton	78,236	63,574
Marie Galante	—	27,727

Only first grade white Sea Island cotton and first grade Marie Galante were purchased.

Cotton.—Owing to favourable weather conditions and in the absence of cotton stainers in cotton fields until the season was well advanced and to consequent diminution in loss of bolls due to Phytophora, and on account of a remarkable absence of loss from internal boll disease, the cotton season was perhaps one of the most successful ones for the past ten years.

During the year the area planted was 4,745 acres, an increase of 747 acres on that planted in the previous year, of which 3,562 acres were planted with Sea Island cotton and 1,183 with Marie Galante.

Cotton-seed is used extensively as a fertilizer.

Sea Island cotton amounting to 328,799 lb., of the value of £31,750, was exported during the year, as against 502,398 lb., of the value of £70,532, in 1921.

The export of Marie Galante was 8,196 lb., value £205, as against 2,380 lb., value £89, in 1921.

Marie Galante seed-cotton to the amount of 74,614 lb., value £622, was exported in 1922, as against 134,809 lb., value £592, in 1921.

Sugar.—The sugar-cane industry continued to be an important one.

Crystallized—150,027 lb., value £1,264, was exported in 1922, as against 349,440 lb., value £3,364, in 1921.

Syrup and Molasses.—134,786 gallons, of the value of £9,862, were exported in 1922, as against 117,157 gallons, of the value of £9,878, in the previous year.

Rum.—20,711 proof gallons were manufactured in the Colony, showing a decrease of 11,284 proof gallons on the previous year. Imported rum for local consumption amounted to 696 proof gallons, as compared with 507 proof gallons in 1921.

Arrowroot.—There was no fixing of prices in the London market by the St. Vincent Arrowroot Growers' and Exporters' Association during the year 1922. The position as regards this commodity improved somewhat and acreage was consequently increased. 2,692,130 lb., of the value of £26,141, was exported, as compared with 2,093,358 lb., of the value of £21,216, in 1921.

Peanuts.—466,820 lb., value £6,214, were exported, as against 306,648 lb., value £4,474, in 1921.

Copra.—The exports of copra have increased very considerably during the last few years.

In 1920, 22,644 lb. were exported.
,, 1921, 89,005 ,, ,,
,, 1922, 222,593 ,, ,,

It is estimated that if nothing untoward occurs for the next few years the area of the island in bearing coconut trees will be increased annually by at least 200 acres.

There are twenty-one Agricultural Co-operative Credit Societies in the Colony. There was a considerable decrease in the amount of money loaned in 1922, £1,086, as compared with £5,369 in 1921. A number of the Societies failed to repay in 1922 debts contracted in the previous year. The causes of this were possibly the damage done to houses and crops by the hurricane of September, 1921, and secondly, the fall in price of various commodities, which hit the small peasant proprietors very hard.

Shipping.

The number of vessels entered was 371, of 181,655 tons; and 371 cleared, of 174,415 tons. Three vessels were registered, of 26 tons total. Two vessels locally registered, of 52 tons, were lost during the year.

VII.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to Primary Education during the years 1921 and 1922 :—

	1921.	1922.
Number of Schools	27	27
Number of pupils on roll at 31st December	3,855	4,213
Average attendance	2,039	2,317
Government Grant-in-aid	£2,241	£2,523
Cost per head in average attendances	£1 2*s.* 0*d.*	£1 1*s.* 9*d.*

Nine of the twenty-seven regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other eighteen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were nine other small schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants to the extent of £112.

The Government maintains in Kingstown a Secondary School for the education of boys—the Grammar School, and one for girls—the Girls' High School. The average attendance in 1921 and 1922 was 62 and 70 boys, and 43 and 44 girls. There is a system of Government scholarships to the Grammar School for pupils from the Primary Schools.

An Island Scholarship has been established under Ordinance No. 41 of 1921, to be awarded biennially, and to be tenable for not less than three and not more than five years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

Provision has been made for the Town Boards of Kingstown and Georgetown to provide sums towards scholarships and exhibitions at the secondary schools on lines similar to the Government exhibitions.

VIII.—HOSPITALS.

The following hospital accommodation is provided: Colonial Hospital, Kingstown, 89 beds (including four beds for private paying patients); District Casualty Hospital, Georgetown, four beds; and District Casualty Hospital, Chateaubelair, six beds.

IX.—BANKS.

Government Savings Bank.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years:—

Year.	Number of depositors at 31st December.	Amount of deposits.	Amount of withdrawals.	Balance at credit of depositors at 31st Decr., including interest capitalized.
		£	£	£
1921	895	4,064	4,520	16,516
1922	826	1,857	3,968	14,821

The interest capitalized during the year amounted to £415.

The Savings Bank funds invested at the 31st December, 1922, amounted to £17,944. In consequence of the continued depreciation in values, investments could not be realized with advantage. Interest at 3 per cent. is paid on deposits.

Colonial Bank.

There is a branch of the Colonial Bank, with headquarters in England, with a paid-up capital of £900,000. There is also a savings bank department attached to the branch.

X.—COMMUNICATIONS.

External.

A regular fortnightly service is maintained by the Royal Mail Steam Packet Company calling on their outward and homeward voyages at Bermuda, St. Kitts, Antigua, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad and British Guiana. The Harrison and the Canadian Merchant Marine

Lines of steamers also call with and for cargo and mails. Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada and Trinidad, where there is direct communication by steamers with the United Kingdom and the United States.

Internal.

The Post Office does a considerable amount of money order and parcels business (including the Cash on Delivery system with the United Kingdom) with the United Kingdom, United States, Canada and other countries.

The central office is in Kingstown, with seventeen district offices. Mails are sent to the windward side of the island by motor car, by motor boat to the leeward side, and to the Grenadines by sailing opportunities.

There is no inland telegraph service. There is a station of the West India and Panama Telegraph Company at St. Vincent, and a subsidy of £300 per annum is paid to the Company, in return for which daily news bulletins are furnished, and the Colony participates in the system of reduced charges for cablegrams.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 185 services and 172 miles of line in use.

R. WALTER,
Administrator.

No. 1221.

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1923.

I.—INTRODUCTION.

Geographical.—Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British Island to the mainland of South America, with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad, and between the parallels of 12°30′ and 11°58′ North Latitude and 61°20′ and 61°35′ West Longitude. The Island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but including Carriacou, an Island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast-line is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, landlocked and deep-watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the Island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the Island, 1,740 feet above sea level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

Climate.—The climate can be classed as excellent, especially from December to May, when it is delightful. The trade winds are steadily prevalent during this period, but occasionally fail in the autumn months, which are somewhat damp and hot.

The range of temperature is small and tends to make the climate equable and healthy. The thermometer seldom reaches 90° in the shade, or drops below 70°, and these occasions occur so rarely that they are specially recorded in the meteorological notes of the year. The highest temperature in 1923 was 90° on 31st October, and the lowest 67° on 10th February. The mean of maximum temperatures was 84° and the mean of minimum 73°.

The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 in.; in the mountainous centre it approaches 140 in. At St. George's, midway between the two, the rainfall in 1923 was 55·72 in. Over the past 30 years the average at St. George's has been 74·38 in. yearly.

Historical.—Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants, who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–6 influenced by the French Republic, a rebellion against the British rule broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

II.—GENERAL OBSERVATIONS.

Depressed conditions of trade and agriculture continued throughout the year. The low price of cocoa was still further lowered, falling to the record low price of 42*s*. per cwt. As this is still the main agricultural industry of the Colony, the decreased export value of the crop had an adverse effect on trade generally. The cultivation of nutmegs is steadily increasing, and prices are improving. Other subsidiary industries are cotton and lime juice. The crops were normal, but the value of cotton exported rose from £9,020 to £15,397, the whole value of exports only amounted to £257,728, lower than the value of imports, which were £285,063.

A visit from a representative of the United Fruit Company caused a stimulation of interest in banana cultivation. The investigation of the possibilities of the industry has not resulted in a definite conclusion, but sufficient publicity has been given to it to encourage planters to continue their efforts to be ready for its introduction. The soil is suitable, and, so far as known, there is no disease of bananas in the Island. Owing to so much land being under permanent crops the area available for bananas will at first be restricted but would, without doubt, rapidly expand if the cultivation proved profitable.

(15701) Wt. 13433/921 500 10/24 Harrow G.94

There are indications that the lowest level in the cycle of trade depression was sounded last year, and prospects are much more satisfactory at present. At the time of writing the price of nutmegs has touched an extraordinarily high figure, and has led to extended circulation of money. Interest is being taken in reviving the sugar industry, and the establishment of a whaling factory at Grenada is also being looked forward to.

Public Health.—The death-rate last year of 16·6 is the lowest recorded in the annals of the Colony. The Registrar-General remarks as follows on this point:—"The low death-rate has coincided with a year of deficient rainfall, the latter having been 55·72 at Richmond Hill in St. George's, as compared with the average of 74·38 for the past thirty years. An examination of death-rate in relation to volume of rainfall over the past twenty years does not reveal any striking relativity between the two. As a rule a low rate of rainfall is supposed to accompany a decrease in the death-rate, but this is not invariably the case. A prolonged dry season followed by a short spell of heavy rains often leads to an outbreak of dysentery, diarrhœa and enteritis, and thus while the annual rainfall may be low a corresponding reduction in the death-rate does not always follow. Last year there was no distinct spell of dry season, nor of heavy rainfall at any time, the latter being well distributed over each month. It is this equable distribution of rainfall throughout the year that has contributed in a great degree to the low mortality." The number of deaths from dysentery decreased from 83 to 33, and from diarrhœa and enteritis from 329 to 283. Deaths from malaria were also fewer, being 74 as compared with 83 in the previous year.

Water Supplies.—All the parishes of the Island have a pipe-borne supply with the exception of St. David's, which is well provided with numerous protected springs and streams. In the Dependency of Carriacou the water is obtained from wells and from rain water stored in cisterns.

III.—GOVERNMENT FINANCE.

The revenue for the year amounted to £103,823 and the expenditure was £113,095, leaving a debit balance on the year of £9,272. The revenue and expenditure for each of the past five years were as follows:—

Year.	*Revenue.*	*Expenditure.*	*Surplus.*	*Deficit.*
	£	£	£	£
1919 (9 months)	87,295	107,011	—	19,716
1920	134,128	148,174	—	14,056
1921	97,932	136,969	—	39,037
1922	103,414	117,849	—	14,435
1923	103,823	113,095	—	9,272

The total current deficit on 31st December, 1923, was £36,996.

The Colony has a public debt of £223,670, but a portion of the latest loan issue remains unexpended to the amount of £41,338. Sinking funds for redemption of the debt amount to £73,703.

The Government Currency Notes have been withdrawn, and only notes of a value of £560 remain in circulation.

Banks.—There are two banks in the Colony, the Colonial Bank and the Royal Bank of Canada. The former has a branch at Carriacou and has also an agency at Grenville. Savings bank business also is transacted by both banks.

The authorised note circulation of the two banks was £25,000 and $100,000 respectively, but the actual amount in circulation does not exceed £30,000.

Silver is legal tender to any amount, and no gold is in circulation.

Savings Bank.—A savings bank is conducted by the Government, interest being allowed at 4 per cent. The number of depositors at 31st December, 1923, was the same as at the end of the previous year, namely, 1,685. The amount at the credit of depositors increased from £15,609 to £20,120.

IV.—ANNUAL PROGRESS OF TRADE.

Agriculture and Industry.

The total trade was £542,791, imports being £285,063 and exports £257,728.

Owing to the very high adverse exchange rate affecting goods from the United States of America, importations from that country fell from £64,146 to £39,276, while importations from the United Kingdom increased from £72,882 to £128,947. Canada supplied goods to the value of £58,571, as compared with £58,079 in 1922.

The percentages of imports from these countries are :—United Kingdom 45·2, Canada 20·5, and United States of America 13·7.

The exports fell in value from £271,392 to £257,728. The United Kingdom took the greatest porportion, £137,152 or 53·2 per cent., as compared with £143,966 and 53·0 per cent. in 1922. The exports to the United States of America and Canada were £77,602 (30·1 per cent.) and £23,171 (8·9 per cent.) respectively as compared with £81,571 (30 per cent.) and £23,018 (8·5 per cent.) respectively for the previous year.

Cocoa went principally to the United Kingdom as usual, the value being £101,341 ; the values of this product exported to the United States of America and Canada being £27,096 and £19,028 respectively. These figures show a decrease in the case of the United Kingdom of £15,179, and increases of £4,032 to the United States of America and £121 to Canada. There was revival of export of cocoa to the Continent of Europe, the exports to France being of the value of £4,529, as compared with £1,050 in 1922, and to Holland £2,000, as compared with £1,000.

Shipments of cocoa to Australia have been made in the last two years, the quantity last year being 743 cwt. of the value of £1,383.

The greater part of the nutmeg and mace crop went to the United States of America, the remainder being exported to the United Kingdom and Canada.

All the cotton was exported to the United Kingdom, and the cotton seed to Barbados.

Agriculture.—Adverse weather conditions retarded the crop of cocoa, and the crop for the year ended 30th September, 1923, was the second lowest on record. The anticipations of planters as to the result of fertilisers supplied through the Government were not realised, and the crop fell short of 50,000 bags (180 lb.), the actual being 49,623 bags.

The nutmeg crop on the contrary was the highest recorded, being 2,764,160 lb., as compared with 2,047,248 lb. in the preceding year. Prices were good, as were also those for mace, and the estates are extending their cultivation wherever practicable.

The sugar crop is reported to have been comparatively short, but considerable planting has taken place and should lead to good crops in 1925.

A good crop of cotton was reaped, and favourable prices were realised. No extension has taken place in the cultivation of limes and coconuts.

An experiment was undertaken with a view to making industrial alcohol from cocoa juice. A satisfactory yield of spirits was obtained, but the practical difficulty in the way of commercial success lies in the difficulty and expense of obtaining a sufficient quantity of juice from so many scattered cocoa estates.

Land.—The taxable acreage of the Colony is given as 75,377 acres. The small owners of property number over 11,000, mostly in lots below three acres in extent. Estates over 100 acres in area number 138.

The Crown Lands remaining in the possession of the Crown consist almost entirely of mountainous areas which have been preserved as Forest or Rain Reserves. There are no Crown Lands for sale.

Industries.—Efforts have been recently made to revive the sugar industry, and the Government has offered encouragement by agreeing to continue for a period of years a high rate of duty on imported sugar provided that a central factory of substantial extent is erected. The area available for cane cultivation is somewhat limited owing to the existence of other and permanent cultivation. There appears to be no reason why sufficient sugar should not be produced to meet at least the local demand, and make the Colony independent of supplies from neighbouring islands. Rum is protected from outside competition by a

protective duty to the extent of 4*s*. per gallon. There were eleven distilleries at work last year, the production being 31,768 gallons. This is insufficient for local supplies.

An Ice Factory, subsidised by the Government, is established at St. George's.

There is a likelihood of an extension of the whaling industry, negotiations regarding which are still under consideration.

V.—LEGISLATION.

The principal of the nineteen Ordinances passed during the year were the following :—

No. 14.—The Tenants Compensation Ordinance repealing the former Ordinance of the same title and introducing more practical procedure.

No. 16. The Supreme Court (Articled Clerks) Ordinance, which raises the standard of qualification of candidates.

No. 18.—The Income Tax Ordinance introducing legislation in accordance with a Model Ordinance for the West Indies and increasing the rates of Tax.

VI.—EDUCATIONAL PROGRESS.

Primary.—There were 56 primary schools supported by public funds, ten being Government schools and 46 Grant-in-Aid schools. Of the latter 27 were Roman Catholic, 13 Anglican, 4 Wesleyan and 2 Presbyterian schools.

The number of pupils on the Rolls was 10,671, and the average attendance was 6,614.

The annual cost of primary education is practically borne entirely by Government funds, the amount of which last year was £7,807. The cost per head of average attendance was £1 3*s*. 9*d*.

Secondary.—A Government Boys' School is maintained by the Government, and grants of £186 each are given to the St. Joseph's Convent School for Girls and the Church of England High School for Girls.

The External Scholarship was continued last year, at a value of £200 per annum, tenable up to five years.

VII.—COMMUNICATIONS.

There are 114 miles of main roads and 305 miles of byways intersecting all parts of the Colony. The roads and byways are in good condition and are suitable for motor traffic, although the gradients in many instances are stiff.

A mail and passenger motor service is established by the Government between St. George's and Sauteurs via the eastern side of the Island and a private service over the same route has also

been started. There is a good serviceable road on the western side between St. George's and Sauteurs, and also a subsidised mail and passenger motor launch service.

There are sub-post offices in each of the principal towns, and numerous postal stations throughout the Colony.

Telephone.—A fair telephone service, run by the Government at moderate rental rates, links up all districts in the Colony, there being six telephone exchanges and 502 instruments in use. The number of telephone instruments per 100 of the population is just under 1 per cent. In St. George's the percentage is 4. There are 159 miles of direct wire, and 763½ miles of wire connecting subscribers and exchanges.

There is no inland telegraph service. Arrangements are being made for the installation of a wireless station to connect with Barbados, as a part of a new cable and wireless service to replace the West India and Panama Telegraph Company.

Shipping.—Steamers of the Royal Mail Steam Packet Company call fortnightly on a service to and from Canada.

Communication with New York is maintained by the Furness-Withy Line, at intervals of about 10 days. The Harrison line of steamers make calls at frequent but irregular intervals for cargo and passengers for Great Britain.

HERBERT FERGUSON,

Colonial Secretary.

26th *July*, 1924.

No. 1223.

ST. VINCENT.

ANNUAL GENERAL REPORT, 1923.

I.—GEOGRAPHICAL AND HISTORICAL.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of nine miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—GENERAL OBSERVATIONS.

The general health of the Colony throughout the year was good. The birth-rate was 41·99 per 1,000 and the death-rate 22·21 per 1,000. A mild type of influenza was prevalent generally throughout the year. The Colony escaped altogether the visitation of alastrim which has caused so much distress in some of the neighbouring islands. Infantile diarrhœa was more prevalent than in 1922 and the number of deaths from this cause, 138, shows an increase of 26 as compared with the previous year. The case mortality was 8 per cent., as compared with 13 per cent. in 1922. It is noteworthy that children's diarrhœa is worse during the rainy months, while the case mortality rate is greater during the dry months.

The campaign against yaws by intramuscular injection of Novarsenobillon continued to be pressed vigorously with very satisfactory results. During the year, 3,492 cases, some 7 per cent. of the population, were treated, and of these, 79 per cent. were returned as cured.

Like many other things, the sanitation of the island is primitive.

The prosperity of the Colony is wholly dependent upon agriculture. Trade improved very considerably, the value of the imports showing an increase on the previous year of £10,000 and the value of the exports an increase of no less than £22,000. The export of Sea-Island cotton was a record one and the prices obtained for arrowroot showed a marked improvement on the previous year, ranging in the neighbourhood of 6*d.* per lb.

Exports of syrup and copra showed marked increases on 1922.

The Chamber of Agriculture and Commerce, formed early in 1922, continued to function throughout the year and its views were sought from time to time on various subjects of commercial and agricultural importance.

Towards the end of the year the Government, acting on the suggestion of the Imperial Commissioner of Agriculture, invited two of the leading engineers of Barbados to report on the cost of establishing a sugar factory and the type of factory required. This question, which has been the subject of considerable discussion, is not yet finally settled.

In view of the Colony's participation in the British Empire Exhibition, the Legislature, realizing the importance of the Exhibition as a means of advertising the principal products of the Colony, voted the sum of £400. A committee was formed in June, with His Honour the Chief Justice, Mr. J. S. Rae, as Chairman, and the Agricultural Superintendent, Mr. T. Jackson, as Secretary, and having among its members the Honourable L. L. Punnett, M.E.C., M.L.C., the Honourable J. E. Sprott, M.L.C., the Honourable W. M. Grant, M.L.C., the Honourable A. M. Fraser, M.L.C., and other leading members of the

(16061) Wt. 16181/1095 500 11/24 Harrow G.94

community. The committee was very actively occupied in deciding on and preparing suitable exhibits.

The dreaded, but not unexpected, Pink Boll worm disease of cotton made its appearance towards the end of the year, having, it is surmised, made its way here from Barbados. The disease has been the subject of careful and anxious investigation and it is to be hoped that with the co-operation of the planters the legislation and regulations enacted will enable the Colony to emerge successfully from this trial.

His Excellency the Governor, Sir George Haddon-Smith, was unable to visit the Colony during the year and he finally relinquished the government of the Windward Islands in November after nine years of arduous and anxious service unbroken by leave.

For the first four months of 1923 the government of St. Vincent was administered by the Treasurer, the Honourable W. C. Hutchinson, who received, during the year, the well-earned distinction of the Imperial Service Order. Mr. R. Walter, C.M.G., arrived on the 1st May and assumed the government from that date.

Various changes in the staff occurred during the year, the principal being the appointment of a new Chief Justice (Mr. J. S. Rae) in June, and the promotion of Mr. C. Cox, Magistrate, Second District, to Dominica as Crown Attorney in September.

It would not be fitting to close this general account without reference to the revival of the cricket tournament between the Islands of Grenada, St. Lucia and St. Vincent, which took place at St. Vincent in September after a lapse of many years. The tournament was a great success in every way, and it is to be hoped that it will continue in the future and help these little islands to know and appreciate each other better.

III.—CLIMATE.

St. Vincent is one of the healthiest of all the West Indian islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, with an average rainfall of 4·04 inches per month, and the wet season from June to December, with an average of 8·22 inches per month. The coolest months are December to April.

The temperature throughout the year varied from 76·3° F. to 80·4° F. The highest was in October and the lowest in January. Meteorological records for 1923 show that the mean monthly temperature was 82·9° F., as against 79·0° F. in 1922.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea level, was 69·39 inches, as compared with 79·74 inches in 1922. Rain fell on 307 days, and the greatest fall for one day was 2·75 inches on the 7th November.

The rainfall at the Botanic Gardens, only a mile away from the Experimental Station, but some 200 feet higher up, was 79·50. The average at these gardens for the last ten years was 93·38 inches, so that the rainfall during 1923 was some 13 inches below the average.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30·166 inches on the 5th February to 29·835 inches on the 23rd October.

IV.—FINANCIAL.

General Revenue and Expenditure.

The financial position of the Colony on the 31st December, 1923, was :—

	£
Net Surplus at 1st January, 1923	11,134
Revenue in 1923	52,031
	£63,165
Expenditure in 1923	47,883
Net Surplus at 31st December, 1923	£15,282

Expenditure from Loan Funds on the reconstruction of the Windward Highway amounted to £511.

The net local revenue and expenditure in the last three years were :—

	Local Revenue. £	Expenditure against Local Revenue. £
1921	53,806	56,221
1922	49,289	46,711
1923	52,031	47,883

The principal items of revenue in the last three years were :—

	1921. £	1922. £	1923. £
Import Duties	16,163	18,511	19,499
Export Duties	2,987	2,142	3,073
Excise Duty on Rum ...	4,947	5,327	5,430
Land and House Tax ...	5,442	6,459	5,892
Income Tax	5,193	1,736	2,044

The unexpended balance of £25,000 of the Eruption Relief Fund, made up from donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to the general revenue and is applied to the relief of the poor.

Public Debt.

The public debt at 31st December, 1923, was £11,100, of which £1,500 is a loan raised by the Town of Kingstown in 1914, for which the Colony is responsible only in case of default. The accumulated sinking funds provided for its redemption stood at £4,500 on the 31st December, 1923, of which £3,749 was in respect of Government Loans, and £751 of the Kingstown Board Loan.

The balance due to the Imperial Treasury at 31st December, 1923, payable in January, 1924, on the Hurricane Loan to planters was £154. The sum of £554 was at that date held invested by the Crown Agents on this account, and the Colony will thus benefit to the extent of £400 from the operation of this loan.

Currency.

British and American gold, five dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

V.—VITAL STATISTICS.

The population of the Colony in 1921 was 44,447, according to the census taken in that year. The population on 31st December, 1923, was estimated by the Registrar-General at 46,744 persons.

The following table gives the births, deaths, and marriages in the past two years :—

	1922.	1923.
Births	1,681	1,963
Males	848	1,000
Females	833	963
Birth-rate per 1,000 of the estimated population	36·37	41·99
Deaths	985	1,038
Death-rate per 1,000	21·31	22·21
Marriages	86	88
Marriage-rate per 1,000	1·86	1·88

Illegitimate births numbered 1,455, or 74·1 per cent. of the total number of all births.

VI.—ANNUAL PROGRESS OF TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.

The total values of imports and exports in 1922 and 1923 were :—

Year.	Imports. £	Exports. £	Total Trade. £
1922	128,586	109,190	237,776
1923	138,677	131,371	270,048

Produce of the Colony to the value of £128,788 was exported in 1923, as against £96,831 in 1922.

The following table shows the value of imports for the past two years :—

	1922. £	1923. £
United Kingdom	30,279	41,147
Canada	33,436	40,862
British West Indies	6,816	7,736
India	520	1,080
Newfoundland	5,795	2,018
Other British Colonies	4,181	4,866
United States of America	35,312	28,943
France	597	1,226
Denmark	15	8
Holland	617	486
Foreign West Indies	153	15
Germany	597	1,057
Other countries	10,268	9,233
	£128,586	£138,677

The increases in the values of imports and exports were due to the general improvement in trade and in increases in values and quantities exported, the latter being particularly applicable to the exports of arrowroot and syrup.

The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1922.	1923.
United Kingdom	23·54	29·67
United States of America	27·46	20·87
Canada	26·02	29·46
All other countries	22·98	20·00

The following is a summary of the imports for the year :—

	£
Food, Drink and Tobacco	52,712
Articles wholly or mainly manufactured ...	59,323
Raw materials and articles mainly unmanufactured	19,016
Miscellaneous and unclassified	7,626
	£138,677

Exports.

The destinations of the exports of the produce of the Colony in 1922 and 1923 were as follows :—

	1922. £	1923. £
United Kingdom	51,777	73,003
Canada	11,013	19,223
British West Indies	31,929	32,429
British Guiana	1,305	1,541
Other countries	807	2,592
	£96,831	£128,788

The principal products of the Colony exported were :—

	1922. £	1923. £
Arrowroot	26,141	31,829
Cotton—		
Sea-Island	31,750	47,292
Marie Galante	205	217
Seed Cotton, Marie Galante	622	421
Cocoa	2,040	1,755
Sugar—		
Crystallised	1,264	1,863
Syrup and Molasses	9,862	18,711
Cassava Starch	1,482	3,700
Copra	2,435	2,959
Peanuts	6,214	5,988
Animals	1,091	5,884
Cotton-seed Oil	396	300
Whale Oil	505	90
Vegetables, fresh	3,168	3,216
Peas	1,659	1,595

Agricultural Industries.

The Government Cotton Ginnery continued to buy seed cotton on profit-sharing terms.

The following quantities were dealt with in the seasons 1921–22 and 1922–23 :—

	1921–22. lb.	1922–23. lb.
Sea-Island seed cotton	63,574	162,321
Marie Galante	27,727	9,003

Corn was purchased on the co-operative system to the following extent during the season 1922–23 :—

Shelled corn	110,083 lb.
Cob corn	79,288 lb.

Cotton.—The cotton season 1922–23, in spite of severe insect attacks, was most successful, something between 130 and 140 lb. of lint per acre being obtained. This excellent result was due partly to a good season and partly to the presence of a minimum number of cotton stainers until quite late in the season. The export of Sea-Island cotton during 1923 constitutes a record.

During the year the area planted was 4,515 acres, a decrease of 230 acres on that planted in the previous year, of which 3,387 acres were planted with Sea-Island cotton and 1,128 with Marie Galante.

Cotton-seed is used extensively as a fertiliser.

Sea-Island cotton amounting to 585,143 lb., of the value of £47,292, was exported during the year, as against 328,799 lb., of the value of £31,750, in 1922.

The export of Marie Galante was 5,084 lb., value £217, as against 8,196 lb., value £205, in 1922.

Marie Galante seed-cotton to the amount of 67,301 lb., value £421, was exported in 1923, as against 74,614 lb., value £622, in 1922.

Sugar.—The sugar-cane industry continued to be an important one.

Crystallised—145,944 lb., value £1,863, were exported in 1923, as against 150,027 lb., value £1,264, in 1922.

Syrup and Molasses.—275,932 gallons, of the value of £18,711, were exported in 1923, as against 134,786 gallons, of the value of £9,862, in the previous year.

Rum.—17,527 proof gallons were manufactured in the Colony, showing a decrease of 3,184 proof gallons on the previous year. Imported rum for local consumption amounted to 961 proof gallons, as compared with 696 proof gallons in 1922.

Arrowroot.—There was no fixing of prices in the London market by the St. Vincent Arrowroot Growers' and Exporters' Association during the year 1923. The position as regards this commodity improved very considerably, the market price being about 5·5*d.* per lb. 2,177,183 lb., of the value of £31,829, were exported, as compared with 2,692,130 lb., of the value of £26,141, in 1922.

Peanuts.—492,972 lb., value £5,988, were exported, as against 466,820 lb., value £6,214, in 1922.

Copra.—The exports of copra have increased very considerably during the last few years.

In 1920, 22,644 lb. were exported.
,, 1921, 89,005 ,, ,,
,, 1922, 222,593 ,, ,,
,, 1923, 356,626 ,, ,,

It is estimated that if nothing untoward occurs for the next few years the area of the island in bearing coconut trees will be increased annually by at least 200 acres. No coconuts were exported.

There are twenty-one Agricultural Co-operative Societies in the Colony. There was a decrease in the amount of money loaned in 1923, £1,330, as compared with £1,986 in 1922. A few Societies failed to repay in 1923 debts contracted in the previous year or even earlier, but on the whole, with the exception of two or three Societies, there is evidence to show that a vigorous attempt was made to pay off outstanding loans.

Shipping.

The number of vessels entered was 370, of 183,729 tons; and 371 cleared, of 180,026 tons. Four vessels were registered, of 199 tons total. One vessel locally registered, of 31 tons, was lost during the year.

VII.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to Primary Education during the years 1922 and 1923 :—

	1922.	1923.
Number of Schools	27	27
Number of pupils on roll at 31st December	4,213	4,314
Average attendance	2,317	2,472
Government Grant-in-Aid	£2,523	£2,469
Cost per head in average attendance	£1 1*s.* 9*d.*	£1 0*s.* 0*d.*

Nine of the twenty-seven regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other eighteen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were eight other small schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants to the extent of £112.

The Government maintains in Kingstown a Secondary School for the education of boys—the Grammar School, and one for girls—the Girls' High School. The average attendance in 1922 and 1923 was 70 and 79 boys, and 44 and 49 girls. There is a system of Government scholarships to the Grammar School for pupils from the Primary Schools.

An Island Scholarship has been established under Ordinance No. 41 of 1921, to be awarded biennially, and to be tenable for not less than three and not more than five years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

The first Island Scholar to be appointed, Mr. P. E. McI. Clarke, left the Colony in September to study medicine at King's College, London.

Provision has been made for the Town Boards of Kingstown and Georgetown to provide sums towards scholarships and exhibitions at the secondary schools on lines similar to the Government exhibitions.

VIII.—HOSPITALS.

The following hospital accommodation is provided: Colonial Hospital, Kingstown, 86 beds (including four beds for private paying patients); District Casualty Hospital, Georgetown, four beds; and District Casualty Hospital, Chateaubelair, four beds.

IX.—BANKS.

Government Savings Bank.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years:—

Year.	Number of depositors at 31st December.	Amount of deposits.	Amount of withdrawals.	Balance to credit of depositors at 31st Decr., including interest capitalized.
		£	£	£
1922	826	1,857	3,968	14,821
1923	776	2,528	4,177	13,535

The interest capitalized during the year amounted to £363.

The Savings Bank funds invested at the 31st December, 1923, amounted to £17,944. In consequence of the continued depreciation in values, investments could not be realized with advantage. Interest at 3 per cent. is paid on deposits.

Colonial Bank.

There is a branch of the Colonial Bank, with headquarters in England, with a paid-up capital of £900,000. There is also a savings bank department attached to the branch.

X.—COMMUNICATIONS.

External.

A regular fortnightly service is maintained by the Royal Mail Steam Packet Company, calling on their outward and homeward voyages at Bermuda, St. Kitts, Antigua, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad and British Guiana. The Harrison, the Canadian Merchant Marine and the Columbia Lines of Steamers also call at uncertain intervals with and for cargo and mails. Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada and Trinidad, where there is direct communication by steamers with the United Kingdom and the United States.

Internal.

The Post Office does a considerable amount of money order and parcels business (including the Cash on Delivery system with the United Kingdom) with the United Kingdom, United States, Canada and other countries.

The central office is in Kingstown, with seventeen district offices. Mails are sent to the windward side of the island by motor car, by motor boat to the leeward side, and to the Grenadines by sailing opportunities.

There is no inland telegraph service. There is a station of the West India and Panama Telegraph Company at St. Vincent, and a subsidy of £300 per annum is paid to the Company, in return for which daily news bulletins are furnished, and the Colony participates in the system of reduced charges for cablegrams.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 186 services and 197 miles of line in use.

R. WALTER,
Administrator.

Government House,
St. Vincent,
27th August, 1924.

Colonial Reports, Etc.

The following recent reports, etc., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

No. 1240.

ST. LUCIA.

ANNUAL REPORT FOR THE YEAR 1923.

I.—GEOGRAPHICAL AND HISTORICAL.

Though uncertain, it is generally accepted that St. Lucia was discovered by Christopher Columbus on 18th June, 1502. Some doubt, however, is thrown upon this belief by a French tradition to the effect that its discovery was made by French shipwrecked seamen in December of a later year, who named the Island St. Alouziel or St. Alousie.

The largest of the Windward Islands, St. Lucia is 27 miles in extreme length and 14 miles in greatest breadth, its area being estimated at 233 square miles. It is situated in latitude 14° north and longitude 62° west, with Martinique in view about 20 miles to the north and St. Vincent about 25 miles to the south. On a clear day the historic Diamond Rock, or "H.M.S. Diamond Rock," can clearly be seen off the coast of Martinique. At its northern extremity lies Pigeon Island, famous for Rodney's Fort and Look-out, from whence the movements of the French fleet under de Grasse were observed prior to its total defeat by Admiral Rodney off the coast of Dominica in 1782. Pigeon Island was later used as a military station, but for a number of years has been abandoned for that purpose. The village of Gros Islet and the bay of that name are opposite Pigeon Island.

Rat Island, lying off the coast between Vigie and Choc, is fitted as a quarantine station. Fortunately, it is more often in demand as a holiday resort.

Vigie promontory forms the northern boundary of Castries harbour. On its highest point is a lighthouse and the signal station of the port. There are numerous War Department buildings at Vigie now much sought after and rented as private residences.

Government House, the official residence of the Administrator, is a commodious building beautifully situated on a spur of the Morne some 500 ft. above sea-level, and commanding unrivalled views of the surrounding scenery.

On the summit of Morne Fortuné, which rises 800 ft. above Castries, there is further extensive barrack accommodation, and this also is to some extent rented as private residences. Castries harbour, on the north-west end of the island, possesses excellent natural advantages. Ships drawing up to 27½ ft. of water can anchor with safety upon its sheltered waters. It is

on record that in 1899 the United States of America Squadron, comprising three battleships, two cruisers, and two second-class cruisers, and also one Dutch warship were safely berthed in the harbour without interfering with the regular business of the port, ten steamers having called during their stay, seven of which coaled. The town of Castries is built upon what is for the most part reclaimed land at the northern end of the harbour. It is well laid out and possesses good wharves for shipping. Nowhere in the West Indies can ships lie alongside so safely and be coaled and watered with such convenience and speed.

The important sugar plantations and factories of Cul de Sac and Roseau are some miles south of Castries. Each possesses a sheltered bay from which crops may be shipped.

Marigot harbour, the villages of Anse-la-Raye and Canaries are on the western coast. The picturesque town of Soufriere nestles at the feet of the two Pitons. These imposing cone-shaped mountains rise sheer out of the water, the greater to the height of 2,619 ft., the lesser to the height of 2,461 ft.

A most interesting volcanic crater is to be found two miles from the town of Soufriere and about 800 ft. above sea-level. There are a number of perpetually active boiling cauldrons of black water and mud from which issue large quantities of steam : around the sides there is a quantity of sulphurous and iron deposits. There are two furnished houses close by which are frequently used as health resorts. Hot sulphurous baths may be had at the bath house there, and lower down the valley at " Diamond." The first baths were established as far back as 1784 by Baron de Laborie near Soufriere for the use of invalids.

Further down the coast are the villages of Choiseul, Laborie, and Vieuxfort. The last mentioned is situated at the southern extremity of the island and possesses an extensive sugar plantation and factory. Cape Moule a Chique, on the highest point of which, 733 ft. above sea-level, there is a lighthouse fitted with a modern flash-light visible 40 miles out to sea, is the most southerly point.

On the east, or windward, coast are the villages of Micoud and Dennery, the latter having a large sugar estate and factory just outside its boundaries. Marquis and Dauphin lie to the north of Dennery. Marquis valley is a well-managed and fertile pasture; unfortunately, at present it lacks suitable road communication with Castries. It is claimed that the Empress Josephine was born near Dauphin, and was afterwards baptised at Martinique.

The expected completion in 1924 of a new, first-class and up-to-date hotel, situated in an unrivalled position 300 ft. above Castries, should prove an attraction to tourists From its pleasant surroundings excursions may be made by road and sea to the numerous points of historic and scenic interest in which the Colony abounds.

(16975) Wt.24087/1695 500 2/25 Harrow G94

II.—GENERAL OBSERVATIONS.

Taken generally, the health of the Colony was good during the year. Owing to an epidemic of alastrim in Dominica and Martinique very rigorous quarantine regulations were enforced. The disease made its appearance here, but thanks to unceasing vigilance and inspection it did not reach the proportions of an epidemic. The people generally willingly assisted in the vaccination campaign that was instituted, and 80 per cent. of the whole population of over 53,000 were vaccinated or re-vaccinated, the outbreak being limited to 18 cases. No deaths from the disease were recorded. The hookworm eradication campaign continued in operation during 1923. An area in the neighbourhood of Castries was chosen for re-survey and satisfactory results were obtained. In this connection the question of sanitation is of vital importance, and in this respect 1923 was productive of good results though the most constant and careful supervision was necessary.

The Chief Medical Officer is responsible for the general supervision of matters of health and sanitation in the Colony.

Victoria Hospital, the principal hospital, is situated within half a mile of Castries. A Resident Surgeon is in charge, and he is assisted by a staff consisting of a European matron with local nurses and dispensers. There is a ward with six rooms assigned to paying patients of which extensive use is made.

This institution has a good reputation, and patients speak highly of the skill and attention of the staff.

There are three small district casualty hospitals close to the principal local dispensaries of Soufriere, Vieuxfort, and Dennery.

The Pauper and Leper Asylums are situated in the Soufriere district, and are supervised by the Medical Officer of the district and a Visiting Advisory Committee.

The treatment of yaws has been successfully carried forward. The yaws hospital was finally closed for the purpose in September, 1923, a striking testimony to the efficacy of the dispensary treatment of yaws by injections of arseno-benzol compounds.

On 31st December, 1922, the resident population of the Colony was estimated to have been 24,399 males and 28,822 females, making a total of 53,221. On 31st December, 1923, this figure had increased to 53,847 (males 24,764 and females 29,083). The natural increase during the year was 717, but departures from the Colony exceeded arrivals by 91, so that the net addition was only 626.

The number of inhabitants to the square mile was 231.

Births during the year numbered 2,067, 1,092 males and 975 females. The number of deaths recorded was 1,350, 657 males and 693 females. The birth-rate was 35·8, and the death-rate 22·5 per 1,000 of the population. Illegitimate births numbered 1,310, or 633·7 per 1,000 of the total births.

No deaths from snake-bite were returned. The danger from venomous reptiles is much exaggerated. The most dangerous snake, the fer-de-lance, is being gradually exterminated through the introduction of the mongoose and the advance of cultivation. In addition, the Government pays 6d. for every serpent head brought to the various police stations and this helps considerably in the process of extirpation. They are never met with in or near the towns.

There is good river and sea fishing. At certain times of the year shooting can be obtained.

The prosperity of the Colony is mainly dependent upon agriculture. In this respect there was improvement in the price received for sugar during the year, but cocoa continued to feel the slump which commenced in 1921.

Extensive banana cultivation has been started and should prove of great benefit to the Colony.

There is an abundant supply of fruit, vegetables and fish, which forms the staple food of the population.

Coaling, for which there are exceptional facilities, still affords considerable, though irregular, occupation for a number of labourers in and around Castries.

The foundation stone of the Carnegie Public Library was laid on 15th May, and building operations commenced.

"Poppy Day" was observed this year for the first time in St. Lucia, and resulted in a sum of £75 being collected for Earl Haig's Fund for Disabled Soldiers.

H.M.S. "Valerian" visited the Colony in December.

The construction of public tennis courts in the Botanic Gardens was commenced.

His Excellency Sir George Haddon-Smith, K.C.M.G., Governor of the Windward Islands, proceeded on leave in November prior to retirement, and Lieutenant-Colonel W. B. Davidson-Houston, C.M.G., Administrator, acted as Governor from the 2nd of that month. The latter officer acted as Governor from the 16th to the 25th March also, while Sir George Haddon-Smith was in Trinidad.

III.—FINANCIAL.

The local revenue received during the year amounted to £77,077, or £13,668 more than in the previous year. The expenditure, however, exceeded the revenue by £11,896, being £88,973, or only £268 less than in 1922. It is expected that economies which have been effected will reduce expenditure considerably during the present year, while improving trade conditions should increase the revenue by some £6,000 in 1924. Charges on account of public debt and for advances by the Crown Agents and Colonial Bank are a heavy drain on the Colony's resources. The accounts for the year closed with a deficit of £54,072, or an increase of £11,896 over the deficit at the end

of 1922, the net excess of liabilities over assets being £45,368. The public debt of the Colony stood at £147,529, and the accumulated sinking fund for its redemption £44,118 on the 31st December, 1923.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10s. and 5s. are in circulation, as well as the notes of the Colonial Bank and Royal Bank of Canada, both of which have branches in Castries. Each of these banks has savings banks, and there is, in addition, a Government Savings Bank, all of which do a fair amount of business, the latter's balance at close of year being £13,657.

The imperial weights and measures are in use in the Colony.

Imports and Exports.

The value of imports in 1923 was £249,589, an increase of £60,589 over 1922. Exports increased by £27,753 from £175,479 in 1922 to £203,232 in the year under review. Both of these returns are, however, much less than during the war years, a fact which is in some measure due to the higher prices of living in those days. Sugar cane, limes, coconut products and cocoa are the chief exports.

Bunker coal shipped in 1923 was valued at £50,762, and though better by some £21,170 than in 1922 was far short of the average for the previous twenty years. With the increase in the number of oil-bunkering vessels it is more than doubtful if the coal trade here will ever return to its former dimensions, and it would be to the interest of the firms which control that trade here to see the necessity for venturing into the oil-bunkering business, as the excellent water and land facilities make Port Castries an ideal harbour for such work. If they are unwilling to do so there would be an opportunity for outside capital to come in and develop what might prove to be a lucrative trade.

IV.—ANNUAL PROGRESS OF TRADE, AGRICULTURE AND INDUSTRY.

Unfavourable weather was accountable for a decrease in the sugar output for 1923. Better prices were, however, received for the product during the year.

The quantity of rum made at local distilleries also shows a decrease.

Cocoa, extensively grown throughout the Colony, remained low and depressed, prices ranging from 36s. to 51s. per cwt.

The price of concentrated lime juice continued low for the greater part of the year. The gathering of limes, consequently, was indifferently carried out. Export suffered accordingly. Large quantities of green limes, however, were exported.

The coconut crop is increasing yearly, a number of planters have realised the value of extending this crop. Exports of coconuts and copra for 1923 show a satisfactory increase.

Nutmegs (and mace) though not very extensively grown prove a satisfactory export crop.

Logwood, cedar, roofing shingles, charcoal, and firewood were exported in substantial quantity.

Some progress is being made in the planting of tobacco, camphor, African oil palm and sisal hemp. There is room for much development in these directions.

Bay-rum is now an important minor industry, the factories showing an encouraging increase of 75 per cent. in the exported product in addition to the bay-rum utilised locally.

Increased interest has been shown in the cultivation of Sea Island cotton. There are considerable areas suitable for this crop which so far are free from "pink bollworm."

Beekeeping is carried on and is improving. The mixing of wild bees and the consequent lowering effect this has on production has to be dealt with. The export of honey and wax for 1923 shows a marked advance.

Extensive banana cultivation, a new and important industry, has been started and should prove of great value to the Colony. Already labour has benefited considerably, approximately 400 men and women being employed regularly during 1923 in clearing hillside and forest.

An endeavour is being made to arouse interest in castor-oil production, and the establishment by private enterprise in 1924 of a coconut and castor-oil mill will, it is hoped, stimulate the interest of growers.

The teaching of agriculture in the primary schools, where treated seriously by the pupils, should prove of great benefit to the Colony in the future if the theory and practice as now being taught is put to practical use on leaving school.

The working of Agricultural Credit Societies during 1923 was most unsatisfactory. The advances are, almost without exception, used to pay off interest on heavily mortgaged properties and not for the extension and improvement of cultivation as intended. These societies are now being dissolved as rapidly as advances are re-paid.

Cattle, sheep, and horses are of poor quality and, when finances permit, the introduction of fresh stock is urgently needed.

High freights and uncertain and expensive inter-island communication tend to restrict the small-holder from sending perishable goods to the ready markets in other islands, and hinder the free exchange of products between the nearer islands.

Grants of approximately 38 allotments of Crown Lands of from 5–10 acres in extent and one of 137 acres were made in 1923. There is still a considerable area of Crown Lands available for disposal which is most suitable for planting. To a prospective

planter possessed of small capital, industry and initiative there are good prospects, a life in a pleasant climate and educational facilities for children.

V.—EDUCATION.

Primary education is free and compulsory. There are 49 denominational schools. Although education is compulsory between the ages of 6–14 years little more than half the children of school age attend. The teaching is greatly hampered by the prevalence of French "patois."

Grants-in-aid are made to these schools, mainly for the payment of teachers' salaries. The Inspector of Schools, a Government officer, is in charge of the administration of the grants.

Except for the Roman Catholic Sisters, the teachers are all natives of the Colony or neighbouring Colonies. Facilities for training of teachers or higher rates of pay to attract more highly-qualified teachers are urgently needed.

English, reading, writing, arithmetic, the elements of grammar, geography and hygiene are taught. In the upper classes boys are taught elementary agricultural science, both practical and theoretical, and the girls needlework and domestic economy. The results generally are good.

Secondary education is supplied by St. Mary's College for boys, and St. Joseph's Convent School for girls, both situated in Castries. These schools prepare their pupils for the Cambridge University Local Examinations and the London University Matriculation Examination. Pupils have attained considerable success in these examinations. An annual scholarship of £175 per annum, known as the St. Lucia Scholarship, was established in 1918. The scholarship is awarded on the results of the London University Matriculation Examination to candidates having the requisite local and residential qualifications. A choice of Universities, or of Agricultural, Scientific or Technical Colleges or Institutions in Europe, Canada or the United States approved by the Governor in Council is permitted. The scholarship is tenable for not less than three and not more than five years according to the time required for the completion of the course of study sanctioned. Up to 1923 five scholarships have been awarded.

VI.—CLIMATE.

The climate of St. Lucia, always very much maligned, is generally healthy. Every sanitary precaution is taken, and the health of the island compares favourably with any of the West Indian Colonies. There are two seasons, the dry season usually beginning in January and ending in May, and the wet season lasting from June to December. The climate is singularly mild. On the hillsides around Castries, where many of the best residences are located, it is pleasantly cool. On the Morne Fortuné a delightful breeze is almost invariably to be found.

The mean temperature varies from 70° to 72° during the cool season, when it sometimes goes as low as 65° at night. During the hot season 90° has been recorded. The temperature records obtained from the Meteorological Station at Reunion show a mean noon temperature of 80° in the shade and a mean night temperature of 72·4°. The range of temperature was 24° (91°—67°).

The mercurial mean pressure gives an average of 30·02.

The rainfall for 1923 was 71·57 in. at the Botanic Station, Castries.

Thunderstorms are not frequent and accidents from lightning rare.

Slight earthquake shocks are occasionally felt.

VII.—COMMUNICATIONS.

The road system of the island, owing to lack of funds, has perforce to advance slowly. There are now maintained by the Government 125 miles of main roads, 130 miles of byways, and 84 miles unclassified roads, of which 126 miles are suitable for, and much used by, motor traffic.

Passenger motor bus services are regularly maintained between Castries and Dennery and Vieuxfort and Soufriere.

The Government 50-ton motor launch supplies a regular service between Castries, Soufriere, Vieuxfort, and the villages of Anse-la-Raye, Canaries and Laborie.

There is a telephone system throughout the Colony, the nine exchanges being connected by 94 miles of trunk lines, giving 206 connections over 283 miles of wire.

Mail communication is maintained by (1) a regular fortnightly steamer service to Canada and other West Indian Colonies, and (2) a monthly service via Martinique to Europe by means of the French mail steamer. There are other and frequent mail opportunities via Barbados and America, and direct to Europe.

Telegraphic communication is maintained by the West India and Panama Company, and there is also a Government Wireless Telegraph Station. Reconstruction of both these systems is expected in 1924.

COLONIAL REPORTS, ETC.

The following recent reports, etc., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1924.

I. Introduction.

GEOGRAPHICAL.

Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British island to the mainland of South America, with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad, and between the parallels of 12° 30′ and 11° 58′ North Latitude and 61° 20′ and 61° 35′ West Longitude. The Island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 miles, but including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast line is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, landlocked and deep-watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the Island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the Island, 1,740 feet above sea-level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

CLIMATE.

The climate can be classed as excellent, especially from December to May when it is delightful. The trade winds are steadily prevalent during this period, but occasionally fail in the autumn months, which are somewhat damp and hot.

The range of temperature is small and tends to make the climate equable and healthy. The thermometer seldom reaches 90° in the shade or drops below 70°, and these occasions occur so rarely that they are specially recorded in meteorological notes of the year. The highest temperature in 1924 was 89° on

several days, and the lowest 68° on 22nd February. The mean of maximum temperatures was 84° and the mean of minimum 74°. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 in.; in the mountainous centre it approaches 140 in. At St. George's, midway between the two, the rainfall in 1924 was 81·51 in. Over the past 30 years the average at St. George's has been 74·83 in.

Historical.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants, who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–6, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

II. General.

An interesting event falls to be recorded in the visit to the Colony on 10th March of the Acting Governor, Lieut.-Colonel Davidson-Houston, C.M.G., by U.S.N. flying boat (through the courtesy of Commodore Gherardi, U.S.N.), the first occasion on which one has landed in Grenada. The journey from and return to St. Lucia between the hours of 10 a.m. and 6 p.m., with a visit to St. Vincent *en route*, and about 4½ hours spent on shore in the two islands, opens up possibilities of improved means of communication between the numerous small Colonies in the West Indies.

Owing to the recurrence of annual deficits, which had continued for several years, and had more than exhausted the Colony's surplus assets, readjustment of revenue and expenditure required to be undertaken. By retrenchment and amalgamation of offices whenever possible and cessation of various activities, Government expenditure was reduced to a point which made it possible to balance the budget by a slight addition to taxation.

An improvement in market prices of nutmegs and mace, which set in early in the year, continued in the succeeding months, and considerably relieved the financial stringency from

(19652) Wt. 13122/1016 500 10/25 Harrow G.94/29 A*

which the Colony was suffering. As compared with the previous year the value of the nutmeg crop increased from £55,017 to £95,321, or by £40,304, and that of mace from £18,641 to £24,874, or by £6,233. These two products, amounting together in value to £120,195, now account for 35 per cent. of the Colony's total value of exports. A decade ago the value of the products was £36,820. The advanced prices were not only maintained at the end of the year, but had increased, and are now at a figure far above anything ever experienced since the cultivation of spices in Grenada was started.

The Colony's main produce still remains cocoa, the exported crop of which in 1924 was recorded at the value of £201,547, being an increase of £45,664 over the value in the preceding year. This increase in total value is accounted for more by an increase in quantity rather than price, although it is true that the price per cwt., which was as low as 48*s*. at the beginning of the year, and continued so for the greater part of the year, suddenly rose to 65*s*. and upwards in December. The improvement in the price of cocoa, coupled with an early crop as the result of favourable weather conditions, has, nevertheless, been an additional factor in the decidedly improved trade conditions existing towards the end of the year.

These changes in the relative importance of cocoa and spices led the Government towards the end of the year to adjust the incidence of taxation on these crops. Cocoa for long had borne the brunt of the heavy export taxation which had been enforced as a war-time measure, and had been continued on account of the Colony's indebtedness.

The export duty on nutmegs and mace was placed on graduated scales, rising and falling according to market prices, and sufficient additional revenue was obtained to allow of export duty on cocoa being reduced by 6*d*. per cwt. A further adjustment and substantial reduction of taxation of cocoa and on other commodities is needed, but can only be accomplished when the deficit of the Colony is cleared off and the annual debt charges are reduced.

His Excellency Sir Frederick Seton James, K.B.E., C.M.G., arrived in the Colony on 26th July, and assumed the office of Governor and Commander-in-Chief of the Windward Islands; the administration of the local Government since the departure of Sir George B. Haddon-Smith, K.C.M.G., on 31st October, 1923, having been undertaken by the Colonial Secretary, Mr. Herbert Ferguson, C.B.E., and that of the Government of the Windward Islands by the Administrator of St. Lucia, Lieut.-Colonel W. B. Davidson-Houston, C.M.G.

Vital Statistics and Public Health.

The estimated population of the Colony at 31st December, 1924, was 68,957.

The density of the population was 518·47 per square mile.

The births numbered 2,197 and the deaths 1,156. The birth-rate was 31·86 and the death-rate 16·8 per 1,000.

The death-rate compares very favourably with that in other West Indian Colonies.

Infantile Mortality.

The death-rate per 100 births of infants dying under one year was 11·10. In the previous year the rate was 8·67. The rate in England and Wales for 1922 was 7·7.

Through the efforts of Lady James, an Infant Welfare Centre was established in St. George's towards the end of the year and a crêche has now been opened.

The principal causes of deaths, with the figures for the two previous years for comparison, are as under :—

	1924.	*1923.*	*1922.*
Diarrhœa and Enteritis ...	296	283	329
Malaria	108	74	83
Enteric Fever	22	23	24
Dysentery	34	33	83
Pulmonary Tuberculosis ...	52	41	37
Syphilis	16	10	15

Water Supplies.

All the parishes of the Island have a pipe-borne supply with the exception of St. David's, which is well provided with numerous protected springs and streams. In the Dependency of Carriacou the water is obtained from wells and from rain-water stored in cisterns.

III. Government Finance.

The revenue collected during the year amounted to £117,453, and the expenditure was £106,003, there being thus a surplus on the year amounting to £11,450. This is the first surplus recorded for several years.

The following is a statement of the revenue and expenditure for the past five years :—

Year.	*Revenue.* £	*Expenditure.* £	*Surplus.* £	*Deficit.* £
1920	134,128	148,175	—	14,047
1921	97,932	136,969	—	39,037
1922	103,414	117,849	—	14,435
1923	103,823	113,095	—	9,272
1924	117,453	106,003	11,450	—

The Colony has no surplus assets. The total current deficit, which at 31st December, 1923, was £36,996, was reduced at the end of 1924 to £25,546.

The Public Debt of the Colony amounts to £223,670, against which there are Sinking Funds for redemption amounting to £79,826. There is, further, a sum of £41,338 unexpended of the Loan Issue of £100,000 raised in 1917.

Banks.

The Colonial Bank and the Royal Bank of Canada are established in the Colony. The former has an agency in Grenville, but the branch at Carriacou, which was carried on for a few years, has now been discontinued.

Both banks transact savings bank business.

The authorised note circulation of the two banks was £25,000 and $100,000 respectively. The actual amount in circulation was reported to be £30,000.

Silver is legal tender without limit. There is no gold in circulation.

Savings Bank.

The Government Savings Bank continued its rate of interest at 4 per cent. There was an increase in the number of depositors from 1,685 to 1,702, and the amount at the credit of depositors increased from £20,120 to £25,430.

IV. Annual Progress of Trade.

The value of imports for the calendar year 1924 was £272,291, and of exports £350,806, the total trade being £623,097.

Imports.

The principal articles imported were the following :—

		Increase or decrease over 1923.	
	Value.	*Increase.*	*Decrease.*
	£	£	£
Flour	40,014	5,272	—
Cotton piece-goods	36,858	—	36,578
Sugar, unrefined ...	13,914	4,727	—
Fish, dried, etc. ...	11,474	1,807	—
Oil, kerosene ...	8,512	1,126	—
Rice	7,954	329	—
Boots and shoes ...	6,068	2,421	—
Motor spirit ...	5,334	1,327	—
Cotton goods, other types	5,198	—	1,715
Lumber, undressed	4,991	2,325	—
Soap, common ...	4,806	—	1,227

The explanation of the striking decrease in cotton piece-goods in 1924 is that in 1923 the depleted stocks of importing firms were renewed, but on account of bad trade there were large quantities on hand at the beginning of 1924.

The following table shows the direction of trade for the years 1923 and 1924 :—

	1923. £	*Percentage of total.*	*1924.* £	*Percentage of total.*
United Kingdom	128,947	45·3	83,600	30·7
United States of America ...	39,276	13·8	56,696	20·8
Canada	58,571	20·6	69,658	25·6
Other British Possessions ...	43,195	15·1	50,852	18·7
Other foreign countries ...	14,727	5·2	11,485	4·2
	£284,716	100%	£272,291	100%

The decrease in trade from the United Kingdom from 45·3 to 30·7 per cent. occurred mainly under cotton piece-goods (from £73,436 in 1923 to £36,858 in 1924).

EXPORTS.

The value of exports for the year amounted to £350,806, of which £344,879 represented the value of local products and £5,927 of re-exports.

The quantity and value of the principal local products exported were as follows :—

	Cwts.	£
Cocoa, raw	85,394 ...	201,547
Cotton, raw	2,842 ...	15,180
Cotton-seed	7,030 ...	2,755
Spices :—		
Nutmegs	19,369 ...	95,321
Mace	3,234 ...	24,874

The direction of the export trade was as follows :—

	1923. £	*Percentage of total.*	*1924.* £	*Percentage of total.*
United Kingdom	137,052	54·4	161,012	46·7
United States of America ...	77,602	30·8	151,784	44·0
Canada	23,171	9·2	13,691	4·0
Other British Possessions ...	7,444	3·0	10,808	3·1
Other foreign countries ...	6,529	2·6	7,584	2·2
	£251,798	100%	£344,879	100%

The bulk of the cocoa goes to the United Kingdom, which took 47,739 cwts. in 1924, the United States of America taking 28,365 cwts.

Of nutmegs, exportation to the United States of America amounted in quantity to 13,429 cwts., and to the United Kingdom 5,130 cwts.

The bulk of the mace also goes to the United States of America, which took 2,063 cwts., while exports to the United Kingdom were 998 cwts.

All the cotton exported, 2,842 cwts., went to the United Kingdom.

Agriculture.

The rains which set in towards the end of May restored the excellent condition of permanent cultivation of cocoa and nutmegs. The cocoa crop year begins on 1st October, and from that date onwards until the end of the year a large and early crop was reaped. For the crop year ended 30th September, 1924, however, the volume was small, the number of bags exported being only 47,064 (of 180 lb. each). The largest crop recorded by the Agricultural Department was that of the year ended 30th September, 1917, when 77,275 bags were exported. The decrease in volume in the past few years has been caused mainly by a hurricane in 1921, adverse weather conditions, and low market prices, the latter feature having led to abandonment of some cultivation on lands not naturally suited to cocoa, and on which it could only profitably be grown when market prices were high.

The nutmeg crop for the year ended 30th September, 1924, was 19,343 cwts., as compared with 24,680 cwts. in the previous twelve months.

The quantity of mace exported was 3,234 cwts., as compared with 3,088 cwts. in the preceding year.

Canes are grown to a very small extent, but the Agricultural Department report that cane cultivation has been very much extended in the southern portion of the Island, and the result should be seen in a larger crop in 1925.

Almost all of the cotton is produced in Carriacou, although lately several acres have been planted in Grenada. Pink Boll Worm made its appearance in Carriacou and Grenada during the year, and the usual steps under legislative authority have been taken for its control. The crop exported in 1924 was 2,842 cwts., as compared with 2,950 cwts. in 1923. The value was £15,180, as compared with £12,904.

Land.

There are no Crown Lands for sale. Such lands as remain in the possession of the Crown consist almost entirely of mountainous areas which have been preserved as forest or rain reserves.

There is a very large number of individual owners of land in the Colony, as will be seen from the following table :—

Number of Owners of Land at 31st December, 1924.

2½ acres and under.	*Over 2½ and not exceeding 5 acres.*	*Over 5 and not exceeding 7 acres.*	*Over 7 and not exceeding 100 acres.*	*Over 10 and not exceeding 100 acres.*	*Total.*	*Over 100 acres.*
12,135	1,559	350	209	411	14,664	142

INDUSTRIES.

A whaling industry on modern lines, which was foreshadowed in last year's Report, was successfully started during the year, as the result of a visit to the Colony of Captain Otto Sverdrup, the well-known Arctic explorer and whaler, who was satisfied that a sufficient number of whales was present in adjacent waters to justify the formation of a company to conduct whaling operations with up-to-date appliances. The company is a Norwegian one, with headquarters at Oslo. The whaling station is situated on Glover Island, off the south-west corner of the Colony. Two whale-catchers arrived in December, and whaling commenced in January of the present year. The whaling season lasts from January to May and further reference to this industry will appear in the report pertaining to the year 1925.

Efforts to establish new agricultural industries have steadily been made, for the danger of having "one's eggs all in one basket" has been pointedly illustrated by the widespread hardships caused by the slump in the price of cocoa, on which crop the Colony has relied in the past to far too great an extent. Both bananas and pine-apples have offered possibilities of successful cultivation. In the case of the former, the taking up and planting of land in bananas in the neighbouring Colony of St. Lucia by a company connected with the marketing of the fruit in England, and interested also in shipping, has made the prospect of a banana industry in Grenada more promising and encouraging than would otherwise have been the case. It is to be hoped that the rise in the price of cocoa—which has since fallen again—will not result in making owners of cocoa estates indifferent to the chance of establishing a profitable and safe new industry. Some land is also available for the cultivation of pine-apples, and enquiries are being made regarding the methods adopted in other places both as to cultivation and canning of the fruit for exportation.

No further development has taken place in connection with the projected establishment of an improved factory for the manufacture of sugar.

The production of rum fell to 25,077 proof gallons on account of the reduced area under cane as the result of unfavourable weather conditions. There were 11 distilleries at work during the year. There is an ice factory, subsidized by Government, in St. George's.

V. Legislation.

Twenty-two Ordinances were passed during the year, of which the principal were :—

No. 4.—Customs Duties Amendment Ordinance, to provide for increased rates of duty.

No. 7.—Cotton Plant Protection Ordinance, legalising measures necessary to restrict Pink Boll Worm disease of cotton.

No. 15.—Whale Fishery Ordinance, controlling the operations of whaling.

No. 19.—Venereal Diseases Ordinance, repealing original Ordinances.

No. 20.—Seditious Publications Ordinance, repealing original Ordinance.

No. 21.—Pensions Amendment Ordinance, providing for gratuities and reduced pensions in lieu of normal pensions.

VI. Educational Progress.

Primary.

There are 58 primary schools—10 being Government schools and 48 grant-in-aid schools, the latter number being made up as follows :—27 Roman Catholic, 14 Anglican, 5 Wesleyan, and 2 Presbyterian.

The recurrent annual cost of primary education is practically borne entirely by Government funds, the contribution by Government being £6,739 out of a total expenditure of £6,754.

The number of pupils on the roll was 10,704, and the average attendance 6,438, the percentage of average attendance to the number on roll being 60·1. The cost per head of average attendance was £1 1*s*. Changes in the law and regulations were made during the year with a view to simplifying the procedure of classification and grading of schools, and effecting more control over the estimates of expenditure.

Secondary.

Progress at the Government Boys' School in St. George's was satisfactorily maintained, and at the Cambridge School Certification examination the results obtained were :—

	Candidates.	*Passed.*	*Honours.*	*Distinction.*
School certificate	9	8	3	4
Junior	11	7	1	1

The number of pupils at the School was 68.

For secondary education of girls there is the St. Joseph's Convent School and the Church of England High School, each of which receives an annual grant from the Government amounting to £186.

The External Scholarship has now been discontinued.

VII. Communications.

The Colony, although its configuration is mountainous and irregular, is well furnished with roads in every part, there being approximately 114 miles of main roads and about 305 miles of by-ways. The gradients in many instances are stiff, but all the main roads and almost all the by-ways are suitable for motor traffic.

The Government runs a mail and passenger motor-bus service between St. George's and Sauteurs, via the eastern side of the Island, passing through St. David's and Grenville. There is also a private motor-bus service between St. George's and Sauteurs. On the western side of the Island there is a good motor road from St. George's through Gouyave and Victoria to Sauteurs. A private motor-bus service plies between Gouyave and St. George's. There is also a subsidized motor-boat service on the western coast, running daily to and from St. George's and Sauteurs, with a weekly call at Carriacou.

Postal business is conducted at the head office in St. George's and at sub-offices in each of the principal towns, while there are several postal stations throughout the Colony.

TELEGRAPHS.

There is no inland telegraph service. The Colony is connected to neighbouring Colonies by the cable system of the West India and Panama Telegraph Company, and a wireless station was last year erected and is operated by the Pacific Cable Board via Barbados.

TELEPHONES.

A telephone service has long been established in the Colony, and at very moderate rental rates gives a linking-up service through the entire Island with no trunk line charges. There are telephone exchanges in all the principal towns, and 533 instruments are in use. The number of telephone instruments per 100 of the population in St. George's is four, and the percentage in the entire Island is approximately one. There are 159 miles of direct wire, and 781 miles connecting subscribers and exchanges.

SHIPPING.

Direct communication with the United Kingdom is maintained by the steamers of the Harrison Line, their passenger steamers calling about once a month, and their cargo steamers at frequent but irregular intervals.

Communication between the British West Indian Islands and with Canada is provided fortnightly by the Royal Mail Steam Packet Company's service.

There is a direct service to New York by the Furness Withy Line at intervals of about 10 days, the journey occupying 7 days.

HERBERT FERGUSON,

Administrator.

8th June, 1925.

COLONIAL OFFICE ANNUAL REPORTS.

H.M. Stationery Office publishes for the Colonial Office the Annual Reports on British Colonies and Protectorates. These Reports appear each year and they are supplied at the subscription price of 40*s*. per annum.

ST. VINCENT.

ANNUAL GENERAL REPORT, 1924.

I.—Geographical and Historical.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of nine miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—General Observations.

The year 1924 may properly be regarded from every point of view as a very prosperous one in the history of the Colony. The Revenue £60,893 was the highest on record, exceeding the Expenditure by over £7,000, and exceeding the Revenue of 1923 by £8,860. This was due largely to the marked improvement in trade which was reflected in the Customs returns, the total trade of the Colony amounting to £310,890, as against £270,048 in 1923. The yield from the new Income Tax Law brought into operation early in the year exceeded the amount estimated by nearly £2,000.

The surplus balance of the Colony, which amounted to £15,282 at the beginning of the year, increased to £22,288 at the close of the year, and it was possible to set aside £11,000 as a Reserve Fund to be invested in good liquid securities, thus fulfilling a cardinal requirement in the case of a small Colony like St. Vincent, which is subject to periods of severe economic depression from time to time.

The Colony is wholly dependent for its prosperity upon agriculture, and it is satisfactory to note from the export returns of the produce of the Island that the export of arrowroot (valued at about 4*d*. per lb.) showed a considerable increase on that for 1923, the export of cassava starch (valued at about 2½*d*. per lb.) was about double that of the average export for the last ten years, while the export of Sea Island cotton, 520,369 lb., the first quality of which was valued at 2*s*. per lb., though slightly below the record year 1923 was well above the average export for the last ten years. This is a matter of congratulation in view of the alarm caused in 1923 by the appearance of the dreaded Pink Boll worm, and shows that, thanks to the careful carrying out of the legislation and regulations framed to meet the outbreak, the disease has been kept under control. For this the Agricultural Department of the Colony deserve the greatest credit.

A marked feature of the agricultural life of this Island is the increasing attention paid to copra. For the year 1924, 645,973 lb. valued at £5,430 were exported, as against 356,626 lb. valued at £2,959 in 1923. Since 1918 the export of copra has increased by leaps and bounds. In that year, 7,104 lb. of a value of £189 were exported.

As regards syrup, another bumper year may be recorded. The quantity shipped amounted to 261,127 gallons, value £15,758. This has not been exceeded for many years, except during 1923 when 275,932 gallons, value £18,711, were exported.

The Colony duly participated in the Wembley Exhibition, and various specimens of its staple products were sent for the purpose and arranged under the able supervision of its

(19696) Wt. 13690/1039 500 10/25 Harrow G.94/29 A 2

representative, Mr. Ernest Brown, to whom, together with the local Committee under the Chairmanship of His Honour Mr. Justice Rae, and to the Agricultural Superintendent, Mr. Jackson, the thanks of the Colony are due for the very successful show made by this little island. The Arrowroot Growers and Exporters Association co-operated loyally and generously, and planters lent valuable assistance. A small brochure was prepared for distribution at the Exhibition giving details of the principal industries of the Colony, and it is hoped that this will assist in educating the British public in the knowledge that Colonial products are the best, and in advertising the existence of St. Vincent with its excellent arrowroot, Sea Island cotton, and syrup.

The general health of the Island throughout the year was good. The total population at 31st December was 47,591. The birth-rate for the year was 37·72 per 1,000, and the death-rate 16·49. The death-rate shows a considerable decrease as compared with 1923, when it was 22·21, and is the lowest for the last three years. Thirty cases of enteric occurred with 10 deaths, as against 26 cases with 6 deaths in 1923, 19 of the cases occurring in the Windward district.

Infantile mortality showed a considerable decrease as compared with 1923, deaths of children under one year (excluding still-births) numbering 169, as against 237 in 1923, and the mortality rate per 1,000 births 99, as against 128. It is noteworthy that illegitimate births amounted to over 75 per cent. of all the births, and that out of 93 still-births 79 were illegitimate.

The campaign against yaws was continued with success, a total of 2,377 cases being treated of which 1,813 were cured.

A residence was built for the District Medical Officer residing at Chateaubelair—a long-felt need—and various sanitary improvements were effected in the smaller towns, but the Colony is still in need of a qualified Chief Sanitary Officer to train and supervise the work of the sanitary inspectors.

His Excellency the Governor, Sir Frederick Seton James, K.B.E., C.M.G., paid a short visit to the Island in H.M.S. *Valerian* in October. Lieutenant-Colonel Davidson-Houston, C.M.G., who had been administering the Government of the Windward Islands for the first seven months of the year, paid a flying visit to the Island on 10th March in an American seaplane, whose arrival created extraordinary interest and excitement among all classes. The seaplane had flown from St. Lucia to St. Vincent in the morning, and after a few hours here continued her flight to Grenada and thence back to St. Lucia. This opens out a vista of untold possibilities in the near future.

Various changes in the Staff occurred during the year, the most noteworthy being the appointment of an Inspector of Schools, which abolishes the unscientific combination involved in a headmaster of a big grammar school being at the same time an inspector of primary schools, the appointment of a new Magistrate for the Second District, Mr. J. A. L. Reed, and the appointment of a new Attorney-General, Mr. N. H. Turton.

The outstanding event of the year was the inauguration of the New Constitution, introducing the elective principle in the Legislative Council, and abolishing the former practice of nomination. The Letters Patent were read and proclaimed publicly at the Court House on 1st December amidst great popular rejoicing, and it was felt that a new landmark had been passed in the political evolution of the Colony.

This short record would not be complete without reference to the loss of two well-known figures in the life of the Island, Mr. W. C. Hutchinson, I.S.O., late Colonial Treasurer, and Miss Annie Mackie, M.B.E. Mr. Hutchinson was a conscientious and hard-working official, who had only just retired on pension when he was called to his long rest, and Miss Mackie had done long and devoted work in the interests of the poor. Their places will be hard to fill.

III.—Climate.

St. Vincent is one of the healthiest of all the West Indian islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, and the wet season from June to December. The coolest months are December to April.

The temperature throughout the year varied from 78·1° F. to 81·8° F. The highest was in September and the lowest in January. Meteorological records for 1924 show that the mean monthly temperature was 80·2° F., as against 82·9° F. in 1923.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 ft. above sea-level, was 85·07 in., as compared with 69·39 in. in 1923. Rain fell on 277 days, and the greatest fall for one day was 3·63 in. on the 29th July.

The rainfall at the Botanic Gardens, only a mile away from the Experimental Station, but some 200 ft. higher up, was 90·49 in. The average at these gardens for the last 31 years was 102·59 in., so that the rainfall during 1924 was some 12 in. below the average.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30·175 in. on the 23rd May to 29·859 in. on the 16th October.

IV.—Financial.

GENERAL REVENUE AND EXPENDITURE.

The financial position of the Colony on the 31st December, 1924, was :—

	£	£
Net Surplus at 1st January, 1924		15,282
Revenue in 1924		60,893
		76,175
Expenditure in 1924	53,887	
Transferred to Reserve Fund ...	11,000	
		64,887
Net Surplus at 31st December, 1924 ...		£11,288

Expenditure from Loan Funds on the reconstruction of the Windward highway amounted to £387.

The net local revenue and expenditure in the last three years were :—

	Local Revenue.	*Expenditure against Local Revenue.*
	£	£
1922	49,289	46,711
1923	52,031	47,883
1924	60,893	53,887

The principal items of revenue in the last three years were :—

	1922	*1923*	*1924*
	£	£	£
Import Duties... ...	18,511	19,499	25,869
Export Duties	2,142	3,073	3,032
Excise Duty on Rum...	5,327	5,430	2,938
Land and House Tax...	6,459	5,892	5,882
Income Tax	1,736	2,044	3,947
Liquor Trade Duty ...	2,338	2,470	2,934
Postage Stamps ...	1,708	1,588	2,334

The unexpended balance of £25,000 of the Eruption Relief Fund, made up from donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to the general revenue and is applied to the relief of the poor. This amount, together with the £11,000 transferred to Reserve Fund, offers excellent security for the Colony, both for elemental disasters and economic depression.

PUBLIC DEBT.

The public debt at 31st December, 1924, was £10,850, of which £1,500 is a loan raised by the town of Kingstown in 1914, for which the Colony is responsible only in case of default. The

accumulated sinking funds provided for its redemption stood at £5,023 on the 31st December, 1924, of which £4,163 was in respect of Government Loans, and £860 of the Kingstown Board Loan.

The balance of £154 due to the Imperial Treasury at 31st December, 1923, payable in January, 1924, on the Hurricane Loan to planters was duly paid off. As the sum of £554 was at that date held invested by the Crown Agents on this account, the Colony benefited to the extent of £400 from the operation of this Loan.

CURRENCY.

British and American gold, five-dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

V.—Vital Statistics.

The population of the Colony in 1921 was 44,447 according to the census taken in that year. The population on 31st December, 1924, was estimated by the Registrar-General at 47,591 persons.

The following table gives the births, deaths and marriages in the past two years :—

	1923	*1924*
Births	1,963	1,795
Males	1,000	936
Females	963	859
Birth-rate per 1,000 of the estimated population ...	41·99	37·72
Deaths	1,038	785
Death-rate per 1,000	22·21	16·49
Marriages	88	114
Marriage-rate per 1,000 ...	1·88	2·39

Illegitimate births numbered 1,363, or 75·9 per cent. of the total number of all births.

Still-births were 93, of which 79 were illegitimate.

VI.—Annual Progress of Trade, Agriculture and Industries.

IMPORTS AND EXPORTS.

The total values of imports and exports in 1923 and 1924 were :—

Year.	*Imports.*	*Exports.*	*Total Trade.*
	£	£	£
1923	138,677	131,371	270,048
1924	160,028	150,862	310,890

Produce of the Colony to the value of £150,811 was exported in 1924, as against £128,788 in 1923.

The following table shows the value of imports for the past two years :—

	1923	*1924*
	£	£
United Kingdom	41,147	51,834
Canada	40,862	40,686
British West Indies... ...	7,736	12,641
India	1,080	869
Newfoundland	2,018	3,142
Other British Colonies ...	4,866	6,125
United States of America ...	28,943	33,983
France	1,226	1,264
Denmark	8	543
Holland	486	553
Foreign West Indies... ...	15	69
Germany	1,057	1,335
Other countries	9,233	6,984
	£138,677	£160,028

The increases in the values of imports and exports were due to the general improvement in trade and in increases in values and quantities exported, the latter being particularly applicable to the exports of arrowroot, cotton, cassava starch, and copra.

The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1923	*1924*
United Kingdom...	29·67	32·39
United States of America ...	20·87	21·24
Canada	29·46	25·42
All other countries	20·00	20·95

The following is a summary of the imports for the year :—

	£
Food, drink and tobacco...	60,842
Articles wholly or mainly manufactured	74,080
Raw materials and articles mainly unmanufactured	18,104
Miscellaneous and unclassified	7,002
	£160,028

EXPORTS.

The destinations of the exports of the produce of the Colony in 1923 and 1924 were as follows :—

	1923	*1924*
	£	£
United Kingdom	73,003	84,501
Canada	19,223	18,368
British West Indies	32,429	39,121
British Guiana	1,541	1,101
United States of America ...	2,480	6,931
Other countries	112	789
	£128,788	£150,811

The principal products of the Colony exported were :—

	1923	*1924*
	£	£
Arrowroot	31,829	51,361
Cotton :—		
Sea Island	47,292	50,218
Marie Galante	217	58
Seed Cotton, Marie Galante	421	534
Cocoa	1,755	1,820
Sugar :—		
Crystallised	1,863	280
Syrup and Molasses ...	18,711	15,758
Cassava Starch	3,700	6,838
Copra	2,959	5,430
Peanuts	5,988	4,439
Animals	5,884	2,559
Cotton Seed	2	2,216
Cotton-seed Oil	300	467
Whale Oil	90	476
Vegetables, fresh	3,216	2,550
Peas	1,595	984
Corn	1,326	752

AGRICULTURAL INDUSTRIES.

The Government Cotton Ginnery continued to buy seed cotton on profit-sharing terms, but confined its activities to Sea Island cotton only.

The following quantities were dealt with in the seasons 1922–23 and 1923–24 :—

	1922–23	*1923–24*
	lb.	*lb.*
Sea Island seed cotton ...	162,321	123,330
Marie Galante	9,003	—

Corn was purchased on the co-operative system to the following extent during the season 1923–24 :—

	lb.
Shelled corn	29,200
Cob corn	4,416

Cotton.—The 1924–25 cotton season was very successful despite the Pink Boll Worm and other pests. The area planted was 4,563 acres—3,294 acres of Sea Island and 1,269 acres of Marie Galante—as compared with 4,515 acres—3,387 acres of Sea Island and 1,128 acres of Marie Galante—in the previous season. The yield from Sea Island cotton during the season under review was at the rate of 136 lb. of lint per acre; for the 1923–24 season it was 140 lb. per acre; and for the 1922–23 season 161 lb. per acre, while the average yield for the 10 years preceding 1922–23 was 89 lb. per acre.

Cotton seed is used extensively as a fertiliser.

Sea Island cotton amounting to 520,369 lb., of the value of £50,218, was exported during the year, as against 585,143 lb., of the value of £47,292, in 1923.

The export of Marie Galante was 1,540 lb., value £58, as against 5,084 lb., value £217, in 1923.

Marie Galante seed cotton to the amount of 32,030 lb., value £534, was exported in 1924, as against 67,301 lb., value £421, in 1923.

Sugar.—The sugar-cane industry continued to be an important one.

The export of crystallised sugar showed a marked decline as compared with 1923, the figures being :—

1923	145,944 lb., value	£1,863
1924	22,400 lb., value	£280

Syrup and Molasses.—261,127 gallons, of the value of £15,758, were exported in 1924, as against 275,932 gallons, of the value of £18,711, in the previous year.

Rum.—15,385 proof gallons were manufactured in the Colony, showing a decrease of 2,141 proof gallons on the previous year. Imported rum for local consumption amounted to 14,706 proof gallons, as compared with 961 proof gallons in 1923.

Arrowroot.—There was no fixing of prices in the London market by the St. Vincent Arrowroot Growers' and Exporters' Association during the year 1924. The position as regards this commodity remained satisfactory, the market price being about 4*d.* per lb. 2,952,535 lb., of the value of £51,361, were exported, as compared with 2,177,183 lb., of the value of £31,829, in 1923.

Peanuts.—322,153 lb., value £4,439, were exported, as against 492,972 lb., value £5,988, in 1923.

Copra.—The exports of copra have increased very considerably during the last few years.

In 1920,	22,644	lb.	were	exported.
,, 1921,	89,005	,,	,,	,,
,, 1922,	222,593	,,	,,	,,
,, 1923,	356,626	,,	,,	,,
,, 1924,	645,973	,,	,,	,,

It is estimated that if nothing untoward occurs for the next few years the area of the Island in bearing coconut trees will be increased annually by at least 200 acres. Only a small number of coconuts was exported.

There are twenty-one Agricultural Credit Co-operative Societies in the Colony. The amount of money loaned in 1924 was £1,381, as compared with £1,330 in 1923. A few Societies failed to repay in 1924 debts contracted in earlier years, but on the whole, with the exception of two or three Societies, there is evidence to show that a vigorous attempt was made to pay off outstanding loans.

SHIPPING.

The number of vessels entered was 381, of 236,346 tons; and 381 cleared, of 240,088 tons. One vessel of 8 tons was registered during the year.

VII.—Education.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1923 and 1924 :—

	1923	*1924*
Number of schools	27	27
Number of pupils on roll at 31st December	4,314	4,945
Average attendance	2,472	2,639
Government Grant-in-aid ...	£2,469	£2,794
Cost per head in average attendance	£1	£1 1*s*. 2*d*.

Nine of the twenty-seven regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other eighteen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were eight other small schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants to the extent of £112.

The Government maintains in Kingstown a secondary school for the education of boys—the Grammar School, and one for girls —the Girls' High School. The average attendance in 1924 was

74 boys and 41 girls, as compared with 79 boys and 49 girls in 1923. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

There is an Island Scholarship awarded biennially under Ordinance No. 41 of 1921, tenable for not less than three and not more than five years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

The first Island Scholar to be appointed, Mr. P. E. McI. Clarke, left the Colony in September, 1923, to study medicine at King's College, London. Satisfactory reports have been received as to his progress in his studies.

A second scholar, Mr. A. B. Brereton, was appointed in 1924, and will shortly leave to take up his medical studies at Edinburgh University.

Provision exists for the Town Boards of Kingstown and Georgetown to provide sums towards scholarships and exhibitions at the secondary schools on lines similar to the Government exhibitions.

VIII.—Hospitals.

The following hospital accommodation is provided :—Colonial Hospital, Kingstown, 86 beds (including 4 beds for private paying patients); District Casualty Hospital, Georgetown, 4 beds; and District Casualty Hospital, Chateaubelair, 4 beds.

IX.—Banks.

GOVERNMENT SAVINGS BANK.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years :—

Year.	*Number of depositors at 31st December.*	*Amount of Deposits.*	*Amount of withdrawals.*	*Balance to credit of depositors at 31st December, including interest capitalized.*
		£	£	£
1923 ...	776	2,528	4,177	13,535
1924 ...	732	2,598	2,548	13,954

The interest capitalized during the year amounted to £369.

The Savings Bank funds invested at the 31st December, 1924, amounted to £12,849. Interest at 3 per cent. is paid on deposits.

COLONIAL BANK.

There is a branch of the Colonial Bank, with headquarters in England, with a paid-up capital of £900,000. There is also a savings bank department attached to the branch.

X.—Communications.

EXTERNAL.

A regular fortnightly service is maintained by the Royal Mail Steam Packet Company, calling on their outward and homeward voyages at Bermuda, St. Kitts, Antigua, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad, and British Guiana. The Harrison, the Canadian Merchant Marine, and the Columbian Lines of steamers also call at uncertain intervals with and for cargo and mails. Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, where there is direct communication by steamers with the United Kingdom and the United States.

INTERNAL.

The Post Office does a considerable amount of money-order and parcels business (including the cash on delivery system with the United Kingdom) with the United Kingdom, United States, Canada, and other countries.

The central office is in Kingstown, with seventeen district offices. Mails are sent to the Windward side of the Island by motor-car, by motor-boat to the Leeward side, and to the Grenadines by sailing opportunities.

There is no inland telegraph service. The West India and Panama Telegraph Company maintained their station at St. Vincent, and furnished daily news bulletins throughout the year. The subsidy of £300 per annum to the Company ceased on the 30th September on the expiry of the contract with them.

The erection of the wireless station for the new telegraph system authorized by the West Indian Islands (Telegraph) Act, 1924, of the Imperial Parliament had not been started at the close of the year.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 189 services and 197 miles of line in use.

No. 1268.

ST. LUCIA.

ANNUAL GENERAL REPORT FOR THE YEAR 1924.

Situation and Area.

The island of St. Lucia is situated in latitude 13° 50′ North and longitude 60° 58′ West, at a distance of 24 miles to the south-east of Martinique and 21 to the north-east of St. Vincent.

It is 24 miles in length and 12 at its greatest breadth; its circumference is 150 miles and its area 233·29 square miles, rather less than Middlesex.

Castries, the capital, is situated at the north-western end of the Island and has a population, according to the census of the 24th April, 1921, of 5,899.

The Port of Castries is one of the best harbours in the West Indies. It is land-locked and provides facilities for coaling and watering ships and for loading and discharging cargo which are unequalled in these islands.

The town of next importance is Soufrière, which lies about 12 miles to the south of Castries and contains a population of 2,480. Just below Soufrière Bay stand the remarkable twin peaks known as "The Pitons," rising sheer from the sea to a height of 2,619 ft. in the case of the Gros Piton and to 2,461 ft. in that of the Petit Piton. The boiling sulphur springs from which Soufrière gets its name are situate at Ventine, two and a half miles south-east of that town.

History.

It is generally accepted that St. Lucia was discovered by Columbus, during his fourth voyage, on the 15th June, 1502. There is, however, a tradition amongst the French that it was discovered on the 13th December of a later year by some ship-wrecked French seamen who named it St. Alouziel or St. Alousie after the martyred virgin saint of that name, whose feast is commemorated on that date.

The Island was then inhabited by the Caribs and they remained in undisturbed possession for another century.

In 1605, sixty-seven persons proceeding to Guiana by the English ship "Olive Blossom" were forced by famine to land in the Island and they remained "to take their fortune in the fruitful isle." They were not able to stay longer than a month, however, when, reduced to nineteen by wars with the Caribs, they left in an open boat and reached the mainland of South America in sore distress. This is the first recorded instance of a landing by Englishmen in the Island.

In 1626 a Commission was granted by Cardinal Richelieu to MM. d'Enambuc and du Rossay to establish a French Colony "in the islands of St. Christopher and Barbados and in the surrounding territories," which presumably included St. Lucia, and in 1627 the Island was granted by the King of England, along with all the Caribbee Islands, to the Earl of Carlisle, who appointed Lord Willoughby of Parham to be Governor of Barbados and the other Caribbee Islands. In 1635 it appears to have been granted by the King of France to MM. de l'Olive and Duplessis.

In 1638 Captain Judlee of St. Kitts (acting in the name of Lord Willoughby) and three or four hundred men took possession of the Island and attempted to effect a settlement in it, but in 1640 these early colonists were massacred and expelled by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the Island, ceded it to the French West India Company, who sold it in 1650 to MM. Honel and du Parquet for the equivalent of £1,600. The Caribs made repeated attempts to expel the French but failed and finally in 1660 they concluded a treaty of peace with the latter.

In 1663, Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia and took possession of it. The English continued in occupation until the Peace of Breda in 1667 when the Island was restored to the French. In 1674 it was re-annexed to the Crown of France and made a dependency of Martinique.

Throughout the eighteenth century recurrent struggles took place between the English and the French for possession of the Island, the more important occurring in the latter half of the century. In 1762 it surrendered to the joint operations of Admiral Rodney and General Monkton but was returned to France by the treaty of Paris in the following year. In 1778 it again surrendered to the British, who remained in occupation until 1783 when, by the Peace of Versailles, St. Lucia was once more restored to France. It was from Pigeon Island, off the north-western coast of St. Lucia, during the period of this occupancy, that Rodney sighted the French fleet of 36 sail of the line under the Comte de Grasse prior to giving them battle and defeating them in the memorable naval action of the 12th April, 1782.

(19703) Wt. 13701/1043 500 10/25 Harrow G 94/29

The Island was again taken by the British in 1794 but they were forced by the French Republican party in the Island, aided by insurgent slaves under " Citoyen " Victor Hughes, the Civil Commissary of Guadeloupe, to evacuate it in the following year. In 1796, after an obstinate and sanguinary struggle, that party laid down their arms and surrendered as prisoners of war to a force 12,000 strong under the command of Sir Ralph Abercrombie supported by a squadron under the command of Sir Hugh Christian. Sir John Moore, the subsequent hero of Corunna, took part in this operation as Brigadier-General Moore, and remained in the Island as Governor thereafter. The British retained possession of the Island until 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since which it has continued under British rule. As a result of the operations of 1778, 1796 and 1803 no fewer than thirteen British regiments have " St. Lucia " inscribed on their colours.

Climate.

The climate is healthy and compares favourably with other West Indian islands. The temperature varies between 70° in the cool season, from December to May, to 90° in the remainder of the year. On Morne Fortuné, just above Government House, where a portion of the former garrison was located, the temperature in the winter months falls as low as 60° and throughout the year it remains mild and pleasant.

The temperature records during 1924 show a mean noon temperature of 84·50° in the shade and a mean night temperature of 72°, the range of temperature being 27° (92°–65°). The rainfall recorded at the Botanic Station, Castries, for the year was 82·88 inches, being 2·25 inches above the average for 25 years. The mean barometric pressure was 29·66.

General Observations.

Trade conditions during the year remained depressed. The price of cocoa, one of the principal products, was at such a low figure as to cause many peasant proprietors tc abandon their cultivations. Increased yields were, however, obtained from improved methods of cultivating sugar-cane, and the exports of molasses and syrup rose considerably. Large areas of coconuts are coming into bearing and cultivation is now well established. The banana industry made further progress and should be of considerable benefit to the Colony. The bay rum industry continues to progress and " St. Lucia Bay Rum " now has the active patronage of the well-known firm of Harrods. An oil mill has been started in Castries and coconut oil of excellent quality has been produced. While the value of bunker coal exported

during the year exceeded the value in the previous year, the trade has not recovered to any appreciable extent, but it is hoped that improvement will take place in the future although it is not likely that the coaling industry will regain its pre-war premier position.

St. Lucia is essentially an agricultural Colony and it is to agriculture that it must look in the future to a greater extent than has been the case in the past. Happily this is being done, and more attention paid to improved methods of cultivation and selection of crop plants. Attention is being given to the improvement of the roads and at present there are 126 miles suitable for motor traffic a large portion of which passes through varied and magnificent scenery.

A comfortable hotel has been established and by judicious advertising there is no reason why the Colony should not become a winter resort for visitors from Europe and North America.

During the year, four British, one French and three United States warships, and one United States flying boat visited Port Castries. Through the courtesy of Commodore Gherardi, U.S.N., in placing the Flying Boat P.N.7 at his disposal the Officer then Administering the Government, Lieutenant-Colonel W. B. Davidson-Houston, C.M.G., was able to visit the three islands of the Windward Group in one day between the hours of 10 a.m. and 6 p.m., being sworn in as Acting Governor at Grenada and St. Vincent and spending 4½ hours on shore in those islands.

On the 18th June the Vigie Dry Dock was brought into use for the first time when the coastal motor launch "**Hewanorra**" was docked.

His Excellency the Governor of the Windward Islands, Sir Frederick Seton James, K.B.E., C.M.G., arrived in the Colony on H.M.S. "Valerian" on the 3rd October, and subscribed to the oaths as Governor and Commander-in-Chief of the Windward Islands.

On the 1st December the new Letters Patent and the Proclamation bringing them into force were read in the Royal Court House before a large and representative assemblage.

On the same day the Pacific Cable Board took over the wireless station on the Morne from the local Government and commenced their service in the Colony.

The new Public Library was opened that afternoon. The building is situated on Columbus Square and was generously provided by the Carnegie Trustees at a cost of £2,500 and erected by Mr. L. E. Lawrence according to plans prepared by him. It is an attractive and substantial building.

Vital Statistics and Public Health.

The estimated population at 31st December, 1924, was 54,304.

The birth-rate (excluding still-births) was 35·7 per 1,000 of the total population, and the death-rate (excluding still-births) 21·4 per 1,000 of the population—1·1 per 1,000 less than in 1923. The infant mortality rate for 1924 was 132·5 per 1,000 as compared with a rate of 134·5 in 1923, the primary cause of death being intestinal diseases due to worms and improper feeding.

The principal causes of death in order of frequency were as follows :—

	No. of deaths.
Intestinal parasites	116
Senile decay	96
Malaria	86
Tuberculosis	75
Pneumonia	61
Syphilis	55
Infant debility	34

The year was a comparatively healthy one, no epidemic having occurred.

The intensive treatment of Hookworm disease was continued by the Rockefeller International Health Board during the year.

Hospitals and Asylums.

The following hospital accommodation is provided :—

Victoria Hospital	116 beds.
Soufriére Casualty Hospital	8 ,,
Vieuxfort Casualty Hospital	8 ,,
Dennery Casualty Hospital	7 ,,
Pauper Asylum (for infirm and incurable patients)	98 ,,
Leper Asylum	30 ,,
Lunatic Asylum	100 ,,

Finance.

The revenue for the year 1924 amounted to £71,595 and the expenditure to £88,186, the result being a deficit on the year's transactions of £16,591. The corresponding figures for the last five years are as follows :—

Year.	*Revenue.* £	*Expenditure.* £	*Surplus.* £	*Deficit.* £
1920 ...	98,139	93,160	4,979	—
1921 ...	72,226	101,148	—	28,922
1922 ...	63,409	89,241	—	25,832
1923 ...	77,077	88,972	—	11,895
1924 ...	71,595	88,186	—	16,591

The annual deficits shown above have exhausted the Colony's surplus, which at the end of March, 1914, stood at £25,567, and there was at the 31st December, 1924, a deficit of £70,662.

The Public Debt of the Colony stood at £143,529, against which there is an accumulated Sinking Fund of £47,720.

Currency and Banking.

British currency and United States gold are legal tender. Accounts are kept in sterling by the Government and by the public; the coin in circulation is almost exclusively British silver and bronze and there is no limit to silver as legal tender.

In 1920 an Ordinance was brought into force providing for the issue of Government currency notes of the value of five shillings and ten shillings. The total value of such notes in circulation at the 31st December, 1924, amounted to £6,549.

The Colonial Bank and the Royal Bank of Canada are established in the Colony. Both banks conduct a savings bank department in addition to the ordinary banking business. The notes of both banks, with Government currency notes and British silver and bronze coin, form the principal medium of monetary exchange.

The number of depositors in the Government Savings Bank at the end of the year was 716, and the amount to credit £13,721, showing a steady decline since the establishment by the two local banks of a savings bank department. The corresponding figures for 1920 were 1,322 depositors with a credit balance of £19,476. The rate of interest is 3 per cent., which is the same as that of the Colonial Bank and Royal Bank of Canada.

Imports and Exports.

The total value of imports (including bunker coal) was £234,647, and of exports (including bunker coal) £233,965. The value of bunker coal imported was £31,721 as compared with £51,570 in 1923, while the exports totalled £51,042 as compared with £50,762 in the previous year.

Imports from the United Kingdom totalled £55,920, and from other parts of the British Empire £65,101, while the total from foreign countries was £105,370; parcels post being responsible for the remaining £8,256.

Of the imports from foreign countries those from the United States of America show a value of £92,009, of which the principal items were bunker coal £31,721 and cinema films £12,550.

Of British countries, Canada shows a total of £41,472, and it is satisfactory to observe that the bulk of the trade hitherto done with the United States of America is now going to Canada.

Of the total exports, commodities valued at £103,473 went to the United Kingdom, £50,658 to other parts of the British

Empire, and £28,051 to foreign countries, while the exports of bunker coal totalled £51,042. Ships' stores with the decline in the shipping trade amounted to £741 only.

Shipping.

The number of vessels entered and cleared during the year was 992 of a total tonnage of 966,113 tons. Of this total 440 were steam vessels and 552 sailing.

The following summary of ships entered and cleared is given :

	Number.	*Tonnage.*
British steamers entered	148	360,090
British steamers cleared	148	360,090
British sailing vessels entered ...	270	8,981
British sailing vessels cleared ...	268	9,010
Total British ...	834	738,171
Foreign steamers entered	72	113,738
Foreign steamers cleared	72	113,738
Foreign sailing vessels entered ...	7	233
Foreign sailing vessels cleared ...	7	233
Total foreign ...	158	227,942
Total number and tons	992	966,113

Agriculture.

The staple agricultural products are sugar with its by-products molasses, syrup and rum; cocoa, logwood, coconuts, limes, bay oil, bay rum, and fruit.

There are four well-equipped central sugar factories and a number of small sugar mills. 71,760 cwt. of vacuum pan sugar were exported and 9,940 cwt. of muscovado. The export of molasses and syrup is on the increase and the quantity exported in 1924 exceeded that in the three previous years. Owing to low prices the export of cocoa fell off. The export of bay rum increased from 8,057 gallons in 1923 to 13,230 gallons in 1924, and promises well for the future. The cultivation of bananas has been extended and is progressing favourably.

Crown Lands.

The Crown owns a considerable area of land, which may be purchased at a nominal rate of £1 per acre up to 50 acres and 10*s*. per acre above 50 acres, payable in four equal annual instalments. During the year, 1,605 allotments of 100 acres and under were made, of which 1,208 were for areas under 10 acres. One allotment of over 1,000 acres was made.

Legislation.

Nineteen Ordinances were passed during the year, the most important being :—

No. 1.—Fixing the conditions under which natives of this Colony and other British West Indians may be engaged by foreign ships.

No. 4.—Amending the Liquor Licence Ordinance, 1921, in respect of the fees payable for licences for the sale of intoxicating liquor.

No. 8.—The Income Tax Ordinance, imposing a tax on incomes and regulating the collection thereof on the lines of a model Ordinance recommended by an Inter-departmental Committee and approved by the Secretary of State.

No. 13.—Regulating the payment of wages to daily labourers.

No. 19.—Providing for the registration in the Colony of Letters Patent granted in the United Kingdom.

Education.

There were 49 primary schools at the end of the year, viz. : 21 juvenile, 24 infant and 4 combined.

The number of pupils on the roll was 7,611 and the average attendance 5,143, an increase of 315 and 306 respectively over 1923.

The actual expenditure on primary education during the year was £4,630, and the total cost per unit of average attendance £1 3*s*. 11*d*.

Secondary education is provided by St. Mary's College for boys and St. Joseph's Convent School for girls. The numbers on the roll at the end of the year were 97 and 135 respectively and the average attendance 92 and 100. St. Mary's College receives a Government grant of £400 per annum and St. Joseph's Convent School £175 per annum. Both schools prepare their pupils for the Cambridge University Local Examinations and the London University Matriculation Examination.

There is an external annual scholarship of the value of £175 per annum awarded on the results of the London University Matriculation Examination to candidates having the necessary requisite local and residential qualifications. The scholarship is tenable for not less than three and not more than five years according to the course of study sanctioned.

Communications.

The roads of the Colony are in fair condition but owing to financial depression progress in improvement is slow. There are now maintained by the Government 125 miles of main roads, 140 miles of byways, and 74 miles of unclassified roads. 126 miles are suitable for motor traffic.

Motor-bus services are maintained between Castries and Dennery and between Vieuxfort and Soufriére.

A 50-ton motor launch plies between Castries and Vieuxfort calling at the villages of Anse-la-Raye, Canaries, Choiseul and Laborie and the town of Soufriére, taking passengers and cargo.

There are nine telephone exchanges connected by 94 miles of trunk lines, with 213 subscribers over 303 miles of wire.

External communication is maintained by a regular fortnightly steamer service to and from Canada and the other West Indian islands, and by a monthly service via Martinique to Europe by the steamers of the Compagnie Générale Transatlantique. There are also frequent mail opportunities via Barbados and the United States of America, and direct to Europe. The steamers of Messrs. Furness, Withy & Co., call regularly on their way from and to New York via the northern islands.

Telegraphic communication was maintained throughout the year by the West India and Panama Telegraph Company, Ltd., and on 1st December, 1924, the Pacific Cable Board took over from the Government the wireless station on the Morne, thereby commencing their service in this Colony. On the same date the Government subsidy to the West India and Panama Company ceased.

ST. VINCENT.

ANNUAL GENERAL REPORT, 1925.

I.—Geographical and Historical.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of nine miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the Island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the Island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the Island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—General Observations.

It is once more a pleasant duty to record a very prosperous year in the history of the Colony. The Revenue rose to £62,450, exceeding the highest previously recorded—that for 1924—by £1,557. As in 1924, the Revenue reflected a continual improvement in trade as shown by the Customs returns, the total trade for the year amounting to £444,339 as against £310,890 in 1924. The yield from Income Tax, £4,504, showed an increase of over £500 on the previous year, while the Excise duty on rum showed an increase of nearly £3,000 on that for 1924.

The net surplus as on 31st December, 1925, amounted to £20,548, and in addition to this, the Colony possesses a Reserve Fund of £11,000 now fully invested in good liquid securities, while the Public Debt of the Colony only amounts to £10,290 with sinking fund invested to the extent of £5,250.

Such a financial position may assuredly be regarded as extremely satisfactory.

The Expenditure for the year amounted to £53,190, being £697 less than the Expenditure of the previous year.

It is perhaps hardly necessary to reiterate that this Colony, like most of the West Indian Islands, depends entirely for its prosperity upon Agriculture, and in this connection it is interesting to note that the acreage under cotton for the 1925–26 season showed a marked increase of 1,784 acres as against the acreage for the 1924–25 season.

For 1924–25, 3,294 acres were planted with Sea Island cotton, and 1,269 acres with Marie Galante, while for 1925–26, 4,989 acres were planted with Sea Island, and 1,359 with Marie Galante. The number of peasant cultivators of Sea Island cotton increased by 900, a most satisfactory state of affairs. The total amount of lint produced during the season under review was 585,483 lb., a figure which has only once been exceeded, i.e., in 1920–21. The return per acre for the season works out at 119·7 lb., which is well up to the average yield of the last ten years, though below the yield for the last three years. The damage done by the dread pink bollworm showed no increase on that done in the past seasons, and in fact the infestation on the leeward side of the Island was actually less than in the previous season. This points to good work on the part of the Agricultural Superintendent and his staff, and another reason may be that planters on the leeward side clean up their fields more carefully than planters in other parts of the Island.

A total of 473,219 lb. of Sea Island cotton was exported in 1925, value £57,655, as against 520,369 lb. value £50,218 in 1924.

(23623) Wt. 10327/667 500 9/26 Harrow G.94

As regards arrowroot, 3,190,412 lb. were exported, the value as given in the Customs return being £125,078, as against 2,952,535 lb. in 1924 of a value of £51,361. There is some danger of the British market being overstocked with this most valuable foodstuff. The British public require further education as to its inherent excellence both as an article of food and for medicinal purposes.

268,118 gallons of syrup, of the value of £19,672, were exported as against 261,127 gallons, of the value of £15,758, in 1924.

The export of copra showed a very slight increase on that for 1924, but there is little doubt that increasing attention is being given to coconut cultivation. In 1918, 7,104 lb. of a value of £189 were exported, while in 1925, 661,309 lb. of the value of £5,512 were exported.

The Colony again participated in the Wembley Exhibition, with perhaps even more successful results than in 1924, and the thanks of the Colony are again due to their London representative, Mr. Ernest Brown, and the local Committee under the Chairmanship of Mr. Justice Rae, and also to the Agricultural Superintendent, Mr. T. P. Jackson, on whose shoulders devolved the principal executive burden in the Colony.

The general health of the Island throughout the year was good.

The total population at 31st December was estimated to be 48,182. The birth-rate for the year was 43·13 per thousand as against 37·72 per thousand in 1924, while the death-rate was 18·18 per thousand as against the very low rate of 16·49 in 1924.

Fifty-six cases of enteric fever, with fifteen deaths, occurred. The disease is practically endemic in certain districts on the windward side, and the heavy mortality is largely due to the fact that cases are not collected or notified very often till some weeks have elapsed, and the patient's chances of recovery are reduced to a minimum through the negligence or ignorance of their relatives.

There were 1,620 cases of infantile diarrhœa, with 72 deaths. Infantile mortality showed an increase on that of 1924; the deaths of children under one year numbering 212 as against 169 in 1924, while the mortality rates per thousand births were 115 as against 99.

It is remarkable that illegitimate births amounted to 73 per cent. of the total number of all births and that out of 105 still-births 89 were illegitimate.

The trained midwives scattered throughout the Island continue to do useful work in visiting the homes of the poor, giving advice, etc.

The campaign against yaws was continued with success, some 1,642 cases being discharged as clinically cured.

The year was marked by the establishment of an Eye Clinic at the Colonial Hospital, run by Dr. D. DeC. Boxill of Barbados. Dr. Boxill and the Colonial Surgeon, Dr. Stanley Branch, deserve the fullest credit for the complete success of this most important work, which has merited the praise of the Secretary of State.

Considerable attention was paid to sanitation, and new latrines were erected in some of the schools, while the drainage of Spring Village, commenced in 1924, was completed, and a survey for preparation of plans and scheme for sewerage system at the Colonial Hospital was put in hand. Considerable improvements were also effected in the Maternity Ward at the Colonial Hospital, which does a most valuable work and may now justly claim to be one of the best of its kind in these Islands.

The principal event of the year, politically, was the opening of the new Legislative Council in May, when an address of loyalty to His Majesty the King was unanimously passed. The Council as now constituted represents the inauguration of the new constitution in accordance with the Royal Order in Council of 21st March, 1924. Elections were held in the various electoral districts but no contests took place, all candidates being returned unopposed. The result was that the new Council consists of practically the same Unofficial Members as the old nominated Council. The absence of any contested elections indicates that the mass of voters were either quite satisfied with the performances of the old nominated Council or too apathetic to bother themselves to trouble to find better representatives!

In this connection it is sad to have to record the death of the Honourable J. E. Sprott, the Senior Unofficial Member of the old Council. He had been nominated by the Government as Nominated Member of the new Council, but he died before he could take his seat under the new constitution. As Editor of the principal local newspaper *The Sentry* he had shown marked political moderation, and as Chairman of the Kingstown Board he had always taken the greatest interest in everything concerning the welfare of the Municipality.

Another important event was the establishment of the new wireless station, operated by the Pacific Cable Board in accordance with the West Indian Islands (Telegraph) Act, 1924, of the Imperial Parliament. The wireless station commenced operations on 1st March, 1925. A site on private land had been acquired by the Government; no site on Crown lands being available that would satisfy the experts who visited the Islands. The site chosen consists of some 3¼ acres at Cane Garden Point, a mile out of Kingstown. The station was erected by the Radio

Communication Company. Much correspondence took place between the owners of the site and the Government before a satisfactory arrangement could be reached as to the price to be paid. Eventually the matter was settled by arbitration on a basis of about £120 per acre. The station has worked very well with a radius of 500 miles.

On Armistice Day, 11th November, 1925, the War Memorial erected by the Government and people of St. Vincent in memory of the St. Vincent men who fell in the Great War was unveiled with suitable ceremonial and solemnity and impressive speeches were delivered in the presence of a vast throng. The Memorial, the total cost of which was £625, consists of a Cornish granite monument surmounted by the bronze figure of a soldier and is simple, dignified and in thorough harmony with its surroundings. A site in the very centre of Kingstown was provided by the Kingstown Board, who will in future be responsible for the safeguarding of this interesting and beautiful Memorial.

A new school was built on Dorsetshire Hill to replace the school blown down by the hurricane of 1898. This school supplies the needs of a wide district, consisting largely of white Barbadians, and it has already more than justified its existence.

Another important and useful public work carried out during the year was the completion of a causeway over the Layou River on the Leeward Highway, a diversion through the Rutland Vale Estate being made to improve the alignment of the road.

Reconstruction work was continued on the Windward Highway, about 1·40 miles being macadamized, and culverts, aprons, etc., provided. The average cost per mile of actual road work in this section was £205. In previous years, the cost of this reconstruction work has been met from loan funds, but owing to the financial position this was not necessary in 1925 and the cost of the work was defrayed from surplus funds.

Very considerable progress was made with telephone reconstruction on the windward side under the direction of Mr. H. Drummond, Supervisor of Telephones, Grenada, and it is hoped that similar improvements will be completed on the leeward side before the present year elapses. A good telephone system is a vital necessity for the economic development of the Island.

His Excellency the Governor, Sir Frederick Seton James, K.B.E., C.M.G., paid a short visit to the Island in December.

Various new appointments were made during the year. Dr. G. H. Steven, Colonial Surgeon, was promoted to British Guiana, and the vacancy was filled by the appointment of Dr. Stanley Branch.

The post of Colonial Engineer was abolished when Major Hampton left the Colony at the conclusion of his three years'

engagement, and the title of the post was altered to Superintendent of Works, Mr. W. E. Dolly, Assistant Superintendent of Works of Grenada, being appointed to the new post.

A new Resident Surgeon, Dr. Slinger, arrived during the year vice Dr. Simpson resigned, and a new Inspector of Schools, Mr. J. E. Blackman, was appointed to take the place of Mr. R. A. N. James resigned.

A Sub-Inspector of Police, Lieutenant G. E. E. Williams, was appointed to fill the vacancy caused by the resignation of Sergeant-Major B. deC. Reid.

III.—Climate.

St. Vincent is one of the healthiest of all the West Indian Islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, and the wet season from June to December. The coolest months are December to April.

The temperature throughout the year varied from 76·5° F. to 81·6° F. The highest was in September, and the lowest in February. Meteorological records for 1925 show that the mean monthly temperature was 79·5° F. as against 80·2° F. in 1924.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea-level, was 90·98 in. as compared with 85·07 in. in 1924. Rain fell on 295 days and the greatest fall for one day was 3·55 on the 15th November.

The rainfall at the Botanic Gardens, only a mile away from the Experimental Station, but some 200 feet higher up, was 87·45 in. The average at these gardens for the last 32 years was 102·12 in., so that the rainfall during 1925 was 14·67 in. below the average.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30·196 in. on the 26th January to 29·904 in. on the 13th and 30th October.

IV.—Financial.

GENERAL REVENUE AND EXPENDITURE.

The financial position of the Colony on the 31st December, 1925, was :—

	£
Net Surplus at 1st January, 1925	11,288
Revenue in 1925	62,450
	73,738
Expenditure in 1925	53,190
Net Surplus at 31st December, 1925 ...	£20,548

The net local revenue and expenditure in the last three years were :—

	Local Revenue.	*Expenditure against Local Revenue.*
	£	£
1923	52,031	47,883
1924	60,893	53,887
1925	62,450	53,190

The principal items of revenue in the last three years were :—

	1923	*1924*	*1925*
	£	£	£
Import Duties... ...	19,499	25,8[illegible]	26,379
Export Duties	3,073	3[illegible]	2,982
Excise Duty on Rum...	5,430	[illegible]8	5,816
Land and House Tax...	5,892	5,882	6,337
Income Tax	2,044	3,947	4,504
Liquor Trade Duty ...	2,470	2,934	2,736
Postage Stamps ...	1,588	2,334	1,732

The unexpended balance of £25,000 of the Eruption Relief Fund, made up from donations from the public in England and elsewhere at the time of the eruptions in the Soufrière volcano in 1902–3, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to the general revenue and is applied to the relief of the poor. This amount, together with the Colony's Reserve Fund of £11,000, offers excellent security both for elemental disasters and economic depression.

PUBLIC DEBT.

The public debt at 31st December, 1925, was £10,290, of which £1,390 is a loan raised by the town of Kingstown in 1914, for which the Colony is responsible only in case of default. The accumulated sinking funds provided for its redemption stood at £5,251 on the 31st December, 1925, of which £4,389 was in respect of Government loans, and £862 of the Kingstown Board Loan.

CURRENCY.

British and American gold, five-dollar notes of the Colonial Bank, and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

V.—Vital Statistics.

The population of the Colony in 1921 was 44,447 according to the census taken in that year. The population on 31st December, 1925, was estimated by the Registrar-General at 48,182 persons.

The following table gives the births, deaths and marriages in the past two years :—

	1924	*1925*
Births	1,795	1,946
Males	936	1,005
Females	859	941
Birth-rate per 1,000 of the estimated population ...	37·72	43·13
Deaths	785	876
Death-rate per 1,000	16·49	18·18
Marriages	114	136
Marriage rate per 1,000 ...	2·39	2·82

Illegitimate births numbered 1,425, or 73·2 per cent. of the total number of all births.

Still-births were 105, of which 89 were illegitimate.

VI.—Annual Progress of Trade, Agriculture and Industries.

IMPORTS AND EXPORTS.

The total values of imports and exports in 1924 and 1925 were :—

Year.	*Imports.* £	*Exports.* £	*Total Trade.* £
1924	160,028	150,862	310,890
1925	211,907	232,432	444,339

Produce of the Colony to the value of £229,941 was exported in 1925, as against £150,811 in 1924.

The following table shows the value of imports for the past two years :—

	1924 £	*1925* £
United Kingdom	51,834	75,914
Canada	40,686	46,108
British West Indies... ...	12,641	15,180
India	869	646
Newfoundland	3,142	2,851
Other British Colonies ...	6,125	7,271
United States of America ...	33,983	46,302
France	1,264	1,736
Denmark	543	790
Holland	553	706
Foreign West Indies... ...	69	669
Germany	1,335	1,505
Other countries	6,984	3,547
Unclassified, including Parcel Post	—	8,682
	£160,028	£211,907

The increases in the values of imports and exports were due to the general improvement in trade and in increases in values and quantities exported, the latter being particularly applicable to the exports of arrowroot and cotton.

The following are the percentages in the last two years of the principal countries from which imported articles are obtained :—

	1924	*1925*
United Kingdom...	32·39	35·82
United States of America ...	21·24	21·85
Canada	25·42	21·76
All other countries	20·95	20·57

The following is a summary of the imports for the year :—

	£
Food, drink and tobacco...	68,717
Articles wholly or mainly manufactured	114,777
Raw materials and articles mainly unmanufactured	19,547
Miscellaneous and unclassified	8,866
	£211,907

EXPORTS.

The destinations of the exports of the produce of the Colony in 1924 and 1925 were as follows :—

	1924	*1925*
	£	£
United Kingdom	84,501	167,116
Canada	18,368	19,149
British West Indies	39,121	27,744
British Guiana	1,101	1,306
United States of America ...	6,931	14,136
Other countries	789	490
	£150,811	£229,941

The principal products of the Colony exported were :—

	1924	*1925*
	£	£
Arrowroot	51,361	125,078
Cotton :—		
Sea Island	50,218	57,655
Marie Galante	58	464
Seed Cotton, Marie Galante	534	1,047
Cocoa	1,820	2,345

	1924	1925
Sugar :—	£	£
Crystallised	280	—
Syrup and Molasses ...	15,758	19,672
Cassava Starch	6,838	4,160
Copra	5,430	5,512
Peanuts	4,439	3,794
Animals	2,559	3,986
Cotton Seed	2,216	53
Cotton-seed Oil	467	1
Whale Oil	476	38
Vegetables, fresh	2,550	2,581
Peas	984	866
Corn	752	627

AGRICULTURAL INDUSTRIES.

The Government Cotton Ginnery continued to buy seed cotton on profit-sharing terms, but confined its activities to Sea Island cotton only, as was the case in 1924.

The following quantities were dealt with in the seasons 1923–24 and 1924–25 :—

	1923–24	1924–25
	lb.	lb.
Sea Island seed cotton ...	123,330	71,945

Corn was purchased on the co-operative system to the following extent during the season 1924–25 :—

	lb.
Shelled corn	59,603
Cob corn	32,676

Cotton.—The 1925–26 cotton season was very successful despite the pink bollworm and other pests. The total area planted was 6,348 acres—4,989 acres of Sea Island and 1,359 acres of Marie Galante, as compared with 4,563 acres—3,294 acres of Sea Island and 1,269 acres of Marie Galante, in the previous season. The yield from Sea Island cotton during the season under review was at the rate of 120 lb. of lint per acre; for the 1924–25 season it was 136 lb. per acre; and for the 1923–24 season 140 lb. per acre.

Cotton seed is used extensively as a fertiliser.

Sea Island cotton amounting to 473,219 lb., of the value of £57,655, was exported during the year, as against 520,369 lb., of the value of £50,218, in 1924.

The export of Marie Galante was 9,673 lb., value £464, as against 1,540 lb., value £58, in 1924.

Marie Galante seed cotton to the amount of 100,468 lb., value £1,047, was exported in 1925, as against 32,030 lb., value £534, in 1924.

Syrup and Molasses.—268,118 gallons, of the value of £19,672, were exported in 1925, as against 261,127 gallons, of the value of £15,758, in the previous year.

Rum.—26,797 proof gallons were manufactured in the Colony, showing an increase of 11,412 proof gallons on the previous year. Imported rum for local consumption amounted to 1,206 proof gallons, as compared with 14,706 proof gallons in 1924.

Arrowroot.—There was no fixing of prices in the London market by the St. Vincent Arrowroot Growers' and Exporters' Association during the year 1925. The position as regards this commodity remained satisfactory, the market price being about 4d. per pound. 3,190,412 lb., of the value of £125,078, were exported, as compared with 2,952,535 lb., of the value of £51,361, in 1924.

Peanuts.—273,039 lb., value £3,794 were exported, as against 322,153 lb., value £4,439, in 1924.

Copra.—The exports of copra have increased very considerably during the last few years.

In 1920,	22,644 lb.	were	exported.
,, 1921,	89,005 ,,	,,	,,
,, 1922,	222,593 ,,	,,	,,
,, 1923,	356,626 ,,	,,	,,
,, 1924,	645,973 ,,	,,	,,
,, 1925,	661,309 ,,	,,	,,

It is estimated that if nothing untoward occurs for the next few years the area of the Island in bearing coconut trees will be increased annually by at least 200 acres. Only a small number of coconuts was exported.

There are twenty-one Agricultural Credit Co-operative Societies in the Colony; several Societies are however not functioning. The amount of money loaned in 1925 was £1,460, as compared with £1,381 in 1924. A few Societies failed to repay in 1925 debts contracted in earlier years. All loans contracted in 1924 were repaid in 1925.

SHIPPING.

The number of vessels entered was 363, of 212,778 tons: and 358 of 205,996 tons cleared. One vessel of nine tons was registered during the year.

VII.—Education.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1924 and 1925:—

	1924	*1925*
Number of schools	27	27
Number of pupils on roll at 31st December	4,945	4,884
Average attendance	2,639	2,648
Government Grant-in-aid ...	£2,794	£2,939
Cost per head in average attendance	£1 1*s*. 2*d*.	£1 2*s*. 2*d*.

Nine of the twenty-seven regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other eighteen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were eight other small schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants to the extent of £112.

The Government maintains in Kingstown a secondary school for the education of boys—the Grammar School, and one for girls —the Girls' High School. The average attendance in 1925 was 74 boys and 43 girls, as compared with 74 boys and 41 girls in 1924. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

There is an Island Scholarship awarded biennially under Ordinance No. 41 of 1921, tenable for not less than three and not more than five years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

The first Island Scholar to be appointed, Mr. P. E. McI. Clarke, left the Colony in September, 1923, to study medicine at King's College, London. Satisfactory reports have been received as to his progress in his studies.

A second scholar, Mr. A. B. Brereton, was appointed in 1924 and left during the year under review to take up his medical studies at Edinburgh University.

Provision exists for the Town Boards of Kingstown and Georgetown to provide sums towards scholarships and exhibitions at the secondary schools on lines similar to the Government exhibitions.

VIII.—Hospitals.

The following hospital accommodation is provided :—Colonial Hospital, Kingstown, 86 beds (including 4 beds for private paying patients); District Casualty Hospital, Georgetown, 4 beds; and District Casualty Hospital, Chateaubelair, 4 beds.

IX.—Banks.

GOVERNMENT SAVINGS BANK.

The following is a comparative statement of the operations of the Government Savings Bank during the past two years :—

Year.	*Number of depositors at 31st December.*	*Amount of Deposits.*	*Amount of withdrawals.*	*Balance to credit of depositors at 31st December, including interest capitalized.*
		£	£	£
1924 ...	732	2,598	2,548	13,954
1925 ...	737	2,968	2,665	14,642

The interest capitalized during the year amounted to £385.

The Savings Bank funds invested at the 31st December, 1925, amounted to £12,849. Interest at 3 per cent. is paid on deposits.

BARCLAY'S BANK (DOMINION, COLONIAL AND OVERSEAS).

There is a branch of Barclay's Bank (Dominion, Colonial and Overseas), formerly the Colonial Bank, with a Savings Bank department.

X.—Communications.

EXTERNAL.

A regular fortnightly service was maintained in the year under review by the Royal Mail Steam Packet Company, calling on their outward and homeward voyages at Bermuda, St. Kitts, Antigua, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad and British Guiana. The Harrison, the Canadian Merchant Marine, and the Columbian Lines of steamers also call at uncertain intervals with and for cargo and mails. Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, where there is direct communication by steamers with the United Kingdom and the United States. The year 1925 saw the signing of a new agreement between representatives of the West Indies and Canada regarding shipping service and extended preference.

INTERNAL.

The Post Office does a considerable amount of money-order and parcels business (including the cash-on-delivery system with the United Kingdom) with the United Kingdom, United States, Canada, and other countries.

The central office is in Kingstown, with seventeen district offices. Mails are sent to the windward side of the Island by motor-car, by motor-boat to the leeward side, and to the Grenadines by sailing opportunities.

There is no inland telegraph service. The West India and Panama Telegraph Company maintained their station at St. Vincent.

The erection of the wireless station for the new telegraph system authorised by the West Indian Islands (Telegraph) Act, 1924, of the Imperial Parliament was undertaken by the Radio Communication Company and the station was opened in March and is in regular operation.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 202 services and 194 miles of line in use. Considerable expenditure was incurred on reconstruction, especially on the windward side, and it is hoped that the whole system will shortly attain far greater efficiency than in the past.

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1925.

I. Introduction.

GEOGRAPHICAL.

Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British island to the mainland of South America, with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad, and between the parallels of 12° 30′ and 11° 58′ North Latitude and 61° 20′ and 61° 35′ West Longitude. The Island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast-line is rugged especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, landlocked and deep-watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the Island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the Island, 1,740 feet above sea-level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

CLIMATE.

The climate can be classed as excellent, especially from December to May when it is delightful. The trade winds are steadily prevalent during this period, but occasionally fail in the autumn months, which are somewhat damp and hot.

The range of temperature is small and tends to make the climate equable and healthy. The thermometer seldom reaches 90° in the shade or drops below 70°, and these occasions occur so rarely that they are specially recorded in meteorological notes of the year. The highest temperature in 1925 was 89° on

several days, and the lowest 68° on 6th February. The mean of maximum temperatures was 87° and the mean of minimum 70°. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches; in the mountainous centre it approaches 140 inches. At St. George's, midway between the two, the rainfall in 1925 was 64·68 inches. Over the past thirty years the average at St. George's has been 74·37 inches.

Historical.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants, who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–96, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

II. General.

The year 1925 was one of the most prosperous in the history of Grenada. All the principal crops were greater in volume than in the previous year, and the increases in quantities fortunately occurred in a period of greatly enhanced prices. Especially was this so in the case of the nutmeg crop, and its derivative mace. As compared with past average prices, the additional profit to cultivators of nutmegs has amounted to about £117,000, and in the case of mace to nearly £33,000.

So substantial has been the rise in value of these two products that they now challenge cocoa for the premier position in the scale of exports, their combined export value for the calendar year 1925 being £185,467, while the value of cocoa, which for so long a period far exceeded the total of all other exports, was £197,231. Ten years ago cocoa accounted for 85 per cent. of the exports according to value, and nutmegs and mace came second, representing 10 per cent. The percentages in 1925 were 45·4 and 42·7 respectively.

(23979) Wt. 12312/809 500 10/26 Harrow G.94 A*

Cocoa is still by far the largest cultivation in quantity, and it is satisfactory to be able to record that the market price improved to an average of about 60*s*. per cwt., as against a low value of 48*s*. at the beginning of 1924.

The price of cotton has also been high and the crop a good one.

The beneficial effects of these improved conditions were widespread, for Grenada is a land of numerous small proprietors. The increased circulation of money brought prosperity to every part, and small country shopkeepers as well as large stores enjoyed the benefits. A considerable portion of the sudden wealth was quickly expended on luxuries such as motor-cars, and in improved standard of living, but many proprietors have also prudently reduced some of the heavy mortgages which still burden their holdings.

The change in the economic conditions also naturally improved the finances of the Government by increased yields of revenue, especially under the heads of import and export duties, income tax, and taxation on motor-cars and spirits.

On 1st April, 1925, was held the first meeting of the Legislative Council under its new form of constitution, which provides on the unofficial side for three Nominated and five Elected members, the officials consisting of seven members in addition to the Governor as President. The elections were held in the month of February in the five divisions into which the Colony is divided for the purpose. Contests took place in only two of the divisions, three candidates competing in the St. Patrick's Carriacou division, and two in that of St. Andrew's. The total number of electors on the Register in the Districts in which contests took place is 1,235; of these 944 or 76·4 per cent. recorded their votes. The number of electors in the remaining districts is 924, making a total of 2,159 for the whole Colony.

A new whaling industry which was established with a base for its factory on Glover's Island, adjacent to the south-west extremity of Grenada, commenced operations in January and continued until the end of the season, in April. All the whales caught, with the exception of two, were of the humpback variety. The two others were reported to be the Bryde whale, which has not hitherto been known to frequent these waters. Further reference to the whaling operations is made under the head "Industries."

A wireless station was established at St. George's and is worked by the Pacific Cable Board. An improvement in press news and in news of movements of steamers has resulted.

Following on this the Government made arrangements for a subsidiary wireless station in Carriacou, which was opened early in the present year. It has proved of great benefit to business firms and to the community in that Island.

Public Health and Vital Statistics.

The medical institutions were greatly improved during the year. At the Colony Hospital electric light was installed at a cost of about £600, the expenditure being defrayed from the grant from the British Red Cross Society. A new mortuary and laundry were built. At the St. Andrew's Hospital the isolation block was screened and repaired, and the equipment improved. Better drainage and sewerage disposal were effected at the Richmond Hill institutions. A clearance of the Belmont swamp near the town of St. George's has resulted in a notable decrease in insect pests.

Under the new Public Health Ordinance, which was passed towards the end of the year, the sanitation of the towns, including the scavenging of streets, will be taken over by a Central Sanitary Authority for the Colony. The appointment of a trained Chief Sanitary Inspector is provided for. Among other measures it is intended to establish District Casualty Stations under the charge of adequately-trained nurses.

This new Ordinance came into force on the 1st March of this year.

Vital Statistics.—The estimated population of the Colony at 31st December, 1925, was 70,184. The density of the population was 528 per square mile.

The births numbered 2,354 and the deaths 1,162. The birth-rate was 33·54 and the death-rate 16·5 per 1,000. The death-rate compares favourably with that in other West Indian Colonies. As the infantile death-rate exceeds that in countries within the temperate zone, the adult death-rate is not much higher than that in non-tropical countries.

Infantile Mortality.

The infantile mortality was slightly greater than in 1924, the the death-rate for 100 births of infants dying under one year being 11·63, as compared with 11·10 in the preceding year.

The Baby Welfare Movement instituted in the previous year by Lady James has now been established for a year. The crèche opened in St. George's has proved a boon to mothers who have to go to work daily. The next step will be to provide a Health Visitor for St. George's, and extend the organisation to St. Andrews and other districts.

A statement of the principal causes of death in Grenada will be of interest :—

	1925.	*1924.*	*1923.*
Diarrhœa and Enteritis ...	284	296	283
Malaria	74	108	74
Enteric Fever	10	22	23
Dysentery	21	34	33
Pulmonary Tuberculosis ...	41	52	41
Syphilis	26	16	10
Organic disease of the heart	99	97	110

Water Supplies.

There is a pipe-borne water service in each parish of the Island except St. David's, which is well supplied with springs and streams. Carriacou has to depend on wells and rain-water stored in cisterns.

Mr. H. J. Peet, late Director of Works, Nigeria, visited the Colony in November at the request of the Governor to advise regarding improvement of the water services, and important reconstructions of the several works are at present being undertaken as the result of his recommendations.

III. Government Finance.

The improvement in trade conditions to which reference has already been made is reflected in the financial returns. The revenue for the year amounted to £146,218, the highest figure yet recorded. As the expenditure was £112,467, there was an excess of revenue over expenditure of £33,751, and this again is by far the greatest excess that has ever been experienced.

During the year a transfer was made to the credit of the Colony's funds of £31,337 which had been advanced during several past years from the Public Loan of £100,000 and had been expended in general works. This transfer, duly approved by the Secretary of State for the Colonies and legalised by Ordinance, was for the purpose of clearing off the deficit of £25,546 with which the year opened. The Colony has now again a substantial surplus amounting at 31st December, 1925, to £39,542.

The public debt amounts to £223,670 and sinking funds for its redemption have now been accumulated to the sum of £86,166, leaving a net indebtedness of £137,504, a sum slightly more than last year's revenue.

Banks.

Two Banks are established in the Colony, Barclays Bank (Dominion, Overseas and Colonial—formerly the Colonial Bank) and the Royal Bank of Canada, the former having also a branch at Grenville. Savings Bank business is conducted by both banks, the rate of interest on deposits being 3 per cent.

The note circulation of Barclays Bank was £25,000, and that of the Royal Bank of Canada $100,000, but the actual amount in circulation is stated to be about £30,000.

Silver is legal tender without limit. There is very little gold in the Colony, a few American gold coins alone being in circulation.

Savings Bank.

The Government Savings Bank continues to develop its business, a result greatly due to the interest on deposits being at the rate of 4 per cent.

The number of depositors increased from 1,702 to 1,922, and the amount at the credit of depositors from £25,430 to £32,103. The investments amounted in value to £26,139, and there was a profit of £247 on the year's business.

IV. Annual Progress of Trade.

The total trade of Grenada in 1925 amounted in value to £865,890, an increase of £242,793 over that of the previous year. The imports were valued at £431,807 and exports at £434,083, compared with £272,291 and £350,806 respectively in 1924.

Imports.

The principal articles imported were the following :—

	Value.	Increase or decrease over 1924. Increase.	Decrease.
	£	£	£
Flour	51,183	11,169	—
Cotton, piece-goods	46,413	9,555	—
Wood, etc., unmanufactured ...	15,907	10,916	—
Fish, dried, etc. ...	13,516	2,042	—
Rice	12,484	4,530	—
Motor-cars and parts	11,860	7,193	—
Bags and sacks, empty	10,509	6,163	—
Sugar, unrefined ...	10,481	—	3,433
Hardware	10,382	6,365	—
Machinery, industrial ...	9,443	9,076	—
Boots and shoes ...	9,123	3,055	—
Oil, kerosene ...	8,107	—	405
Motor spirits ...	7,741	2,407	—
Soap, common ...	6,584	1,778	—
Cotton, manufactured, other ...	6,374	1,176	—

Flour continues to be the principal article of importation and is imported almost wholly from Canada, the returns showing that a very negligible quantity arrives from the United States of America. As will be seen from the following table, the transfer of trade in this article from the United States has been one of the principal effects of the Trade Agreement with Canada.

Importations of Flour.

The following table shows the direction of trade for the years 1924 and 1925 :—

	1924. £	*Percentage of total.*	*1925.* £	*Percentage of total.*
United Kingdom	83,600	30·7	156,394	36·3
United States of America ...	56,696	20·8	80,859	18·8
Canada	69,658	25·6	90,641	20·9
Other British Possessions ...	50,852	18·7	64,618	14·9
Other Foreign Countries ...	11,485	4·2	39,295	9·1

EXPORTS.

The value of exports for the year amounted to £434,083, of which £424,808 represented the value of local products and £9,275 of re-exports.

The quantity and value of the principal local products exported were as follows :—

	Cwt.		£
Cocoa, raw	73,216	...	197,231
Cotton, raw	3,252	...	16,500
Cotton, seed	8,889	...	3,088
Spices, nutmegs	21,762	...	145,861
,, mace	3,843	...	39,606
Whale oil	112,963 gals.		16,870

The direction of the export trade was as follows :—

	1924. £	*Percentage of total.*	*1925.* £	*Percentage of total.*
United Kingdom	161,012	46·7	171,768	30·6
United States of America ...	151,784	44·0	212,816	49·1
Canada	13,691	4·0	12,785	3·0
Other British Possessions ...	10,808	3·1	14,425	3·1
Other Foreign Countries ...	7,584	2·2	22,289	5·2

A greater quantity of the Colony's staple products was shipped this year to the United States of America than to the United Kingdom, the figures being :—

	United States of America. *Cwt.*		*United Kingdom.* *Cwt.*
Cocoa	37,038	...	31,058
Nutmegs	12,934	...	8,005
Mace	1,978	...	1,690

All the cotton exported, 3,252 cwt., went to the United Kingdom. Of the 112,963 gallons of whale oil exported, 103,999 gallons went to Norway and 3,435 to the United Kingdom.

Other articles of export include bananas and other fruit, lime juice, salt, coconuts, hides and skins, copra, ground-nuts, wood, and timber.

AGRICULTURE.

Weather conditions during the crop year which ended on 30th September were favourable to all kinds of cultivation. There was no serious outbreak of plant diseases, although these are more or less present at all times. The crops were in all cases greater than in the previous year.

Cocoa.—The crop was an early one and prices had advanced to what are considered to be normal rates. The return of more favourable prices led to greater time and attention being paid to the cultivation, which, as compared with Trinidad and larger countries, is undertaken on intensive lines, resulting in a large yield per acre. This is necessary in Grenada, where there is no undeveloped territory on which new crops or new varieties can be introduced. The curing and preparation of the cocoa are also carried to a high degree in order to maintain the standard and value of Grenada cocoa.

Spices.—On account of the very high prices ruling for nutmegs and mace, planters are extending the cultivations of this crop wherever possible. As in the case of cocoa, there is not much suitable land available, and several years must elapse before new trees arrive at a profitable stage of fruition.

Cotton.—This cultivation is confined to Carriacou and is the short staple variety called Marie Galante. The crop was a good one, amounting to 3,252 cwt., as compared with 2,842 cwt. in the preceding crop year. One of the main reasons for the increase was the rigid enforcement of an Ordinance, introduced for the eradication of the pest known as the Pink Bollworm which had made its appearance. The measures taken had the additional effect of introducing better cultural methods. Arrangements were made through the Pacific Cable Board for cable reports of prices in the Liverpool markets for the type of cotton grown in Carriacou to be published during the reaping and ginning months.

Other Crops.—The favourable prices for cocoa and spices have diverted attention from development of the banana industry, as lands suitable for successful cultivation of bananas are also adapted to nutmeg cultivation. Coffee could also be cultivated profitably; the production, however, of this crop is insufficient

for the local demand. Sugar is also largely imported, but in this case there is not now sufficient suitable land for its successful cultivation, which requires to be undertaken on a large scale to withstand outside competition.

Crops of corn (Indian maize) and of root crops, locally designated as ground provisions, have been plentiful.

Land.

There are no Crown lands for sale; any lands remaining in the possession of the Crown are preserved as forest or rain reserves.

Estates are occasionally bought by the Government for the purpose of land settlement, but this is confined to small-holders, of whom, mainly owing to the schemes fostered by Government, there are over 14,000 in the Island.

Industries.

The manufacture of sugar is carried on on a small scale at several factories, which also make rum. The production of sugar is far below the quantity locally consumed, and the manufacture of rum occasionally falls short of what is required for home consumption. The quantity of rum manufactured last year was 45,385 proof gallons, being the output from twelve small distilleries.

An ice factory, subsidised by the Government, continues at work in St. George's.

Whale Industry.—The main undertaking of an industrial nature is now the whaling industry, which was established last year on modern lines. Seventy-two whales were caught in the season from January to the end of April, and 112,963 gallons of whale-oil, of the value of £16,870, were exported. The factory, which was not quite completed last year, is now equipped for the manufacture of whale guano.

V. Legislation.

Seventeen Ordinances were passed during the year, the most important being the following :—

No. 1.—The Agricultural Industries Protection Ordinance, protecting the banana industry by prohibiting the exportation of suckers, and made applicable to any plant which may need such protection.

No. 2.—The Income Tax Amendment Ordinance, giving relief to Shipping and Insurance Companies.

No. 6.—The Agricultural Loans Ordinance, enabling owners of land to obtain loans for its development as a first charge against the crops.

No. 8.—The Taxes Management (Amendment) Ordinance, introducing improvements in the system of serving of notices of assessment.

No. 10.—The Legislative Council (Elected Members) Ordinance, regulating the procedure for election of Members to serve on the Legislative Council.

No. 12.—The Local Loan (Amendment) Ordinance, authorising certain advances to Government from the Loan to be regarded as expenditure.

No. 15.—The Public Health Ordinance, establishing a single Sanitary Authority for the Island, and consolidating the several Ordinances dealing with sanitation and public health.

VI. Educational Progress.

A Director of Education was appointed in 1925, and under his chairmanship a Committee appointed by the Governor, with a very representative membership, inquired into the constitution and powers of the Boards of Education, both Primary and Secondary, and made recommendations for readjustment of the Boards and of the Ordinances. Their report contains many new suggestions which it is hoped soon to put into practice. It is contemplated to establish Pupil Teachers' Centres in various districts, and improve the pay of Assistant Teachers with a view to obtaining a more highly-qualified type of Primary School Teacher.

Primary.

The number of primary schools has remained the same as last year, namely, 58, of which 10 were Government and 48 grant-in-aid schools. Of the latter, 27 were Roman Catholic, 14 Anglican, 5 Wesleyan, and 2 Presbyterian.

The number of pupils on the roll and the average attendance were 11,480 and 6,992 respectively, the percentage of average attendance to the number on the roll being 60·9.

Practically all the annual cost of the schools, exclusive of upkeep of buildings, is borne by Government, and the grant-in-aid amounted to £7,479.

Secondary.

The number in attendance at the Grenada Boys' School in St. George's has greatly increased, being 85 at the end of the year. Part of this increase is due to an extension of the scheme under which external exhibitions tenable at the Boys' Secondary School are awarded to promising boys from the primary schools. An increased number of awards has been given, and as the competition was thrown open to scholars of the lower division schools as well as the combined schools, much healthy keenness has been shown by the schools of the Island in sending up pupils.

Twenty-three candidates were entered from the School for public examinations. Five sat at the London Matriculation Examination for the first time in the history of the School, but all were unsuccessful.

The sports side of the School is not neglected. Great activity was shown this year; the first inter-Islands' school sports with representatives from St. Lucia and St. Vincent being held at the Queen's Park in April. A very successful meeting resulted in the St. Vincent Grammar School winning the contest.

The Anglican Girls' High School and the St. Joseph's Convent High School have continued to maintain their numbers and standard of work throughout the year. The Government gives a grant to each of these schools of £150 each, and provides for six exhibitions, value £6 per annum each, to each of these two schools.

VII. Communications.

In spite of its mountainous nature, the Colony is extremely well supplied with roads which traverse every part, and are suitable for motor traffic. A main line of road encircles the Island, passing through each of the towns, and two main roads intersect the interior, one from St. George's to Grenville, and the other from Gouyave to Grenville. In addition, there are numerous by-ways. The approximate mileage of main roads is 114, and of by-ways 305 miles.

Several motor-bus services ply between the various towns, especially between St. George's along the eastern coast to Sauteurs in the north.

A mail motor and passenger 'bus service over the same route is run by the Government. On the western side a private motor-bus service links up Gouyave with St. George's, and there is also a subsidised daily motor-boat service running between St. George's and Sauteurs. The boat also extends its journey once a week to Carriacou.

The principal post office is in St. George's, and there are sub-offices at Gouyave, Victoria, Sauteurs, Grenville, and St. David's, and Hillsboro, Carriacou, in addition to several postal stations.

Telegraphs.

A wireless station erected in St. George's is operated by the Pacific Cable Board with communication via Barbados. A subsidiary wireless station has this year been also established at Carriacou. The West India and Panama Telegraph Company still carries on business in Grenada by cable system.

TELEPHONES.

A telephone service with earth-return circuit has long been established, but owing to the great increase in number of subscribers a change to a more modern system may soon become imperative. There are 635 instruments in use, 159 miles of direct wire, and 902 miles connecting subscribers and exchanges. There are five exchanges, that at St. Mark's having been discontinued and the district served from St. John's exchange.

SHIPPING.

Direct communication with the United Kingdom was maintained by the Harrison Line, their larger steamers calling about once a month. This direct service is much appreciated; the duration of the voyage to London is about fourteen days. The cargo steamers of this Line also call frequently.

The Canada-West Indies Steamer service was continued throughout the year, calls on the upward and downward journeys being fortnightly.

The Furness-Withy Line have a direct service from New York to Grenada at intervals of about ten days. The time occupied between New York and Grenada is seven days.

No. 1326.

ST. LUCIA.

ANNUAL GENERAL REPORT FOR THE YEAR 1925.

I.—Geographical and Historical.

Though uncertain, it is generally accepted that St. Lucia was discovered by Christopher Columbus on 18th June, 1502. Some doubt, however, is thrown upon this belief by a French tradition to the effect that its discovery was made by French shipwrecked seamen in December of a later year, who named the island St. Alouziel or St. Alousie.

The largest of the Windward Islands, St. Lucia is 24 miles in extreme length and 12 miles in greatest breadth, its area being estimated at 233 square miles. It is situated in latitude 13° 50′ North and longitude 61° West, with Martinique in view about 24 miles to the north and St. Vincent about 21 miles to the south. On a clear day the historic Diamond Rock, or "H.M.S. Diamond Rock," can clearly be seen off the coast of Martinique. At its northern extremity lies Pigeon Island, famous for Rodney's Fort and Look-out, from whence the movements of the French fleet under de Grasse were observed prior to its total defeat by Admiral Rodney off the coast of Dominica in 1782. Pigeon Island was later used as a military station, but for a number of years has been abandoned for that purpose. The village of Gros Islat and the bay of that name are opposite Pigeon Island.

Rat Island, lying off the coast between Vigie and Choc, is fitted as a quarantine station. Fortunately, it is more often in demand as a holiday resort.

Vigie promontory forms the northern boundary of Castries harbour. On its highest point is a lighthouse and the Signal Station of the port. There are numerous War Department buildings at Vigie now much sought after and rented as private residences.

Government House, the official residence of the Administrator, is a commodious building beautifully situated on a spur of the Morne some 500 ft. above sea-level, and commanding unrivalled views of the surrounding scenery.

On the summit of Morne Fortune, which rises 800 ft. above Castries, there is further extensive barrack accommodation, and this also is to some extent rented as private residences. Castries harbour, on the north-west end of the Island, possesses excellent natural advantages. Ships drawing up to 27½ ft. of water can anchor with safety upon its sheltered waters. It is on record that in 1899 the United States of America squadron, comprising three battleships, two cruisers, and two second-class cruisers, and also one Dutch warship, were safely berthed in the harbour without interfering with the regular business of the port, ten steamers having called during their stay, seven of which coaled. The town of Castries is built upon what is for the most part reclaimed land at the northern end of the harbour. It is well laid out and possesses good wharves for shipping. Nowhere in the West Indies can ships lie alongside so safely and be coaled and watered with such convenience and speed.

The important sugar plantations and factories of Cul de Sac and Roseau are some miles south of Castries. Each possesses a sheltered bay from which crops may be shipped.

Marigot harbour, the villages of Anse-la-Raye and Canaries are on the western coast. The picturesque town of Soufriere nestles at the feet of the two Pitons. These imposing cone-shaped mountains rise sheer out of the water, the greater to the height of 2,619 ft., the lesser to the height of 2,461 ft.

A most interesting volcanic crater is to be found two miles from the town of Soufriere and about 800 ft. above sea-level. There are a number of perpetually active boiling cauldrons of black water and mud from which issues large quantities of steam : around the sides there is a quantity of sulphurous and iron deposits. There are two furnished houses close by which are frequently used as health resorts. Hot sulphurous baths may be had at the bath house there, and lower down the valley at "Diamond." The first baths were established as far back as 1784 by Baron de Laborie near Soufriere, for the use of invalids.

Further down the coast are the villages of Choiseul, Laborie, and Vieuxfort. The lastmentioned is situated at the southern extremity of the Island and possesses an extensive sugar plantation and factory. Cape Moule á Chique, on the highest point of which, 733 ft. above sea-level, there is a lighthouse fitted with a modern flashlight visible 40 miles out at sea, is the most southerly point.

On the east, or windward, coast are the villages of Micoud and Dennery, the latter having a large sugar estate and factory just outside its boundaries. Marquis and Dauphin lie to the north of Dennery. Marquis Valley is a well-managed and fertile pasture; unfortunately, at present it lacks suitable road communication with Castries. It is hoped that next year a new road

(25912) Wt. 24349/1620 500 3/27 Harrow G.94

will be constructed which will make access to Marquis quite possible for motors. It is claimed that the Empress Josephine was born near Dauphin, and was afterwards baptised at Martinique.

The new, first-class and up-to-date hotel, with accommodation for fifteen people, situated in an unrivalled position 300 ft. above Castries, should prove an attraction to tourists. From its pleasant surroundings excursions may be made by road and sea to the numerous points of historic and scenic interest in which the Colony abounds.

II.—General Observations.

The general health of the Island was good during the year. There was no epidemic sickness to be recorded. The Hookworm Campaign ceased and it is the opinion of the Chief Medical Officer that this infection will consequently increase.

The Chief Medical Officer is responsible for the general supervision of matters of health and sanitation in the Colony.

Victoria Hospital, the principal hospital, is situated within half a mile of Castries. A Resident Surgeon is in charge, and he is assisted by a staff consisting of a European matron with local nurses and dispensers. There is a ward with six rooms assigned to paying patients, of which extensive use is made.

This institution has a good reputation, and patients speak highly of the skill and attention of the staff.

There are three small district casualty hospitals close to the principal local dispensaries of Soufriere, Vieuxfort and Dennery.

The Pauper and Leper Asylums are situated in the Soufriere District, and are supervised by the Medical Officer of the District and a Visiting Advisory Committee.

The treatment of yaws has been successfully carried forward. The yaws hospital was finally closed for the purpose in September, 1923, a striking testimony to the efficacy of the dispensary treatment of yaws by injections of arseno-benzol compounds.

On 31st December, 1924, the resident population of the Colony was estimated to have been 24,939 males and 29,365 females, making a total of 54,304. On 31st December, 1925, this figure had increased to 55,099 (males 25,345 and females 29,754). The natural increase during the year was 957, but departures from the Colony exceeded arrivals by 162, so that the net addition was only 795.

The number of inhabitants to the square mile was 236.

Births during the year numbered 2,113, 1,091 males and 1,022 females. The number of deaths recorded was 1,156, 584 males and 572 females. The birth-rate was 36·2 and the death-rate 18·8 per 1,000 of the population. Illegitimate births numbered 1,334, or 631·3 per 1,000 of the total births.

One death from snake-bite was reported in the Micoud District. The danger from venomous reptiles is much exaggerated. The most dangerous snake, the fer-de-lance, is being gradually exterminated through the introduction of the mongoose, and the advance of cultivation. In addition, the Government pays 6*d*. for every serpent head brought to the various police stations, and this helps considerably in the process of extirpation. They are never met with in or near the towns.

There is good river and sea fishing. At certain times of the year shooting can be obtained.

The prosperity of the Colony is mainly dependent upon agriculture.

Extensive banana cultivation has progressed rapidly and is proving of great benefit to the Colony.

There is an abundant supply of fruit, vegetables and fish, which form the staple foods of the population.

Coaling, for which there are exceptional facilities, still affords considerable, though irregular, occupation for a number of labourers in and around Castries.

"Poppy Day" has been observed since 1923, and a fairly satisfactory sum has been so far collected yearly for Earl Haig's Fund for Disabled Soldiers.

His Excellency the Governor of the Windward Islands, Sir Frederick Seton James, K.B.E., C.M.G., arrived in the Colony on 8th April, remaining in residence until 19th July.

Lieutenant-Colonel W. B. Davidson-Houston, C.M.G., Administrator of St. Lucia, went to Canada to represent the Windward Islands at the Trade Conference on 4th June. At the termination of the Conference on 27th July he went on leave and returned to the Colony on 24th September.

The first shipment of bananas from the Colony was made on 3rd August to the United States of America by S.S. "Maraval."

The Public Lawn Tennis Court in the Botanic Gardens was completed, and a second one is now in course of construction.

The Tourist Association was formed on 18th November, and it is expected that tourist ships may be induced to call at St. Lucia during 1926.

Shipping.

The number of vessels entering and cleared during the year was 1,015 of a total tonnage of 1,106,097 tons. Of this total 489 were steam vessels and 526 sailing.

III.—Financial.

The local revenue received during the year amounted to £75,555, or £3,960 more than in the previous year. The expenditure, however, exceeded the revenue by £9,527, being £85,082, or £3,104 less than in 1924. It is expected that economies which have been effected will reduce expenditure considerably during the present year, while improving trade conditions should increase the revenue by some £6,000 in 1926. It is anticipated that there will be a surplus of approximately £1,200 revenue. Charges on account of public debt and for advances by the Crown Agents and Colonial Bank are a heavy drain on the Colony's resources. The accounts for the year closed with a deficit of £9,527, or an improvement of £7,064 over the deficit at the end of 1924. The public debt of the Colony stood at £80,190, and the accumulated sinking fund for its redemption £51,243, on 31st December, 1925.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10*s*. and 5*s*. are in circulation, as well as the notes of the Colonial Bank and Royal Bank of Canada, both of which have branches in Castries. Each of these banks has Savings Banks, and there is, in addition, a Government Savings Bank, all of which do a fair amount of business, the latter's balance at the close of the year being £13,657.

The Imperial weights and measures are in use in the Colony.

Imports and Exports.

The total value of imports (including bunker coal) was £277,013, and of exports (including bunker coal) £243,207. The value of bunker coal imported was £39,562, as compared with £31,721 in 1924, while the export totalled £77,399, as compared with £51,042 in the previous year. Imports from United Kingdom totalled £86,114, other parts of the British Empire £66,941, while the total from foreign countries was £114,708, parcel post being responsible for the remaining £9,250. Of the imports from foreign countries, those from the United States of America show a value of £96,405, of which the principal items were bunker coal £39,562, and cinema films £11,750.

Of British countries Canada shows a total of £39,483, and it is satisfactory to note that the bulk of the trade hitherto done with the United States of America is now going to Canada.

andronicus

Of the total exports, commodities valued at £100,304 went to the United Kingdom, £39,580 to other parts of the British Empire and £24,896 to foreign countries, while exports of bunker coal totalled £77,399. Ships stores, with the decline in shipping trade, amounted to £1,028 only.

IV.—Annual Progress of Trade, Agriculture and Industry.

Favourable weather enabled a good crop to be made.

The price of sugar fell steadily during the year from £36 per ton for best West Indian Crystals in January, to £25 10*s*. per ton in December, 1925, the average price received being £30 10*s*., as against £46 per ton for crop in 1924.

The decline in value of sugar products has been discouraging to the sugar factories and to the small cane farmers who make fancy molasses. The output of factory sugar for refining was much higher than it has been for some years, an increase being shown of 1,300 tons for the 1925 crop. There was a reduction in low sugars and molasses and syrup production.

The area in sugar remains at about 4,750 acres. Factory plants have been greatly improved and a much better recovery of sugar is expected for the tonnage of cane handled. It is hoped that as regards the sugar industry generally the recent negotiations with Canada and improved trading facilities will be beneficially felt throughout this industry. There has been a slight increase in the amount of rum manufactured locally, overseas prices have however been discouraging and no rum was exported.

The cocoa market has provided a workable price throughout the year, about 68*s*. per cwt. for best cocoa; cultivation has not been extended and the area in cocoa remains at about 6,000 acres.

The lime industry has had an encouraging year which has placed production on a firm footing. The cultivations have received increased attention and have been considerably extended. The concentrated lime juice market improved from £18 to £21 per pipe, raw juice remained stationery at 2*s*. to 2*s*. 6*d*. per gallon, but some extensive contracts were made by local growers and a high grade product was exported.

There was a moderate trade in green limes to the United States during the period February–June.

Excellent prices were received during the year for otto of limes and distilled lime oil. The former rose from 11*s*. to 22*s*. per lb. at the close of the year, the latter from 6*s*. in January to 9*s*. 6*d*. per lb. in December. Owing to general shortage these prices have since greatly improved.

ublishing company, inc.

The recent development of an additional 100 acres in lime cultivation brings the area to a total of about 2,650 acres.

The coconut crop has again proved a safe investment, the average price being £30 per ton for copra; a considerable amount of the crop is now cured by heated flue system. This has prevented loss of time and crop during wet weather.

Groves have been extended and now cover about 2,700 acres.

A larger proportion of the crop has been purchased by the local oil mills.

Nutmegs (and mace) though not very extensively grown prove a satisfactory export crop.

Logwood, cedar, roofing shingles, charcoal, and firewood were exported in substantial quantity.

Some progress is being made in the planting of tobacco, camphor, African oil palm and sisal hemp. There is room for much development in these directions.

The bay oil factories have maintained good production, now mainly in the finished product—bay rum—for which there is an increasing demand. An increase of 4,237 gallons in export is shown over 1924.

As to bee-keeping, a good harvest of honey and wax was made during the year, but slightly below that for the previous season. The apiaries have been improved by the introduction of Italian queen bees.

Banana cultivation is going ahead, and the regular calls of fruit steamers are confidently expected to start towards the end of 1926.

The original promoters of the banana export industry, now registered as a company, propose to develop, in addition to the planted area, a considerable extent of Crown Lands for banana production.

Conducted on the right lines, with right application to control of disease and suitable shipping facilities, this development should soon form a chief industry.

The oil mill is now confining its activities to extracting oil from copra alone. This forms quite an important minor industry. The sale of oil meal is conducted intercolonially.

The exports show a marked increase both in fruit and ground provisions generally. A considerable proportion of this increase is due to the activity of small proprietors. There are marked signs of a progressive agricultural policy.

Increased interest has been shown in the cultivation of Sea Island cotton. There are considerable areas suitable for this crop which so far are free from "pink bollworm."

The teaching of agriculture in the primary schools, where treated seriously by the pupils, should prove of great benefit to the Colony in the future if the theory and practice as now being taught is put to practical use on leaving school.

Cattle, sheep, and horses are of poor quality and, when finances permit, the introduction of fresh stock is urgently needed.

High freights and uncertain and expensive inter-island communication tend to restrict the smallholder from sending perishable goods to the ready markets in other islands, and hinder the free exchange of products between the nearer islands.

V.—Education.

Primary education is free and compulsory. There are 49 denominational schools. Although education is compulsory between the ages of 6 to 14 years little more than half the children of school age attend. The teaching is greatly hampered by the prevalence of French "patois."

Grants-in-aid are made to these schools, mainly for the payment of teachers' salaries. The Inspector of Schools, a Government Officer, is in charge of the administration of the grants.

Except for the Roman Catholic Sisters, the teachers are all natives of the Colony or neighbouring Colonies. Facilities for training of teachers, or higher rates of pay to attract more highly qualified teachers, are urgently needed.

English, reading, writing, arithmetic, the elements of grammar, geography and hygiene are taught. In the upper classes boys are taught elementary agricultural science, both practical and theoretical, and the girls needlework and domestic economy. The results are generally good.

Secondary education is supplied by St. Mary's College for boys, and St. Joseph's Convent School for girls, both situated in Castries. These schools prepare their pupils for the Cambridge University Local Examinations and the London University Matriculation Examination. Pupils have attained considerable success in these examinations. An annual scholarship of £175 per annum, known as the St. Lucia Scholarship, was established in 1918. The scholarship was suspended during the year owing to the necessity for economy. The scholarship is awarded on the results of the London University Matriculation Examination to candidates having the requisite local and residential qualifications. A choice of Universities, or of Agricultural, Scientific or Technical Colleges or Institutions in Europe, Canada or the United States approved by the Governor in Council, is permitted.

The scholarship is tenable for not less than three, and not more than five, years according to the time required for the completion of the course of study sanctioned. Up to 1925 six scholarships have been awarded.

VI.—Climate.

The climate of St. Lucia, always very much maligned, is generally healthy. Everything possible in the way of sanitation is carried out but owing to lack of funds much remains to be done. The health of the Island compares favourably with any of the West Indian Colonies. There are two seasons, the dry season usually beginning in January and ending in May, and the wet season lasting from June to December. The climate is singularly mild. On the hillsides around Castries, where many of the best residences are located, it is pleasantly cool. On the Morne Fortune a delightful breeze is almost invariably to be found.

The mean temperature varies from 70° to 72° during the cool season, when it sometimes goes as low as 65° at night. During the hot season 90° has been recorded. The temperature records obtained from the Meteorological Station at Reunion show a mean noon temperature of 83·9° F. in the shade, and a mean night temperature of 71·6° F. The range of temperature was 27°. (Minimum 64°, Maximum 91°.)

The mercurial mean pressure gives an average of·29·71 inches.

The rainfall for 1925 was 76·76 in. at the Botanic Station, Castries, being 3·77 in. below the average for 25 years.

Thunderstorms are not frequent and accidents from lightning rare.

Slight earthquake shocks are occasionally felt.

VII.—Communications.

The road system of the Island, owing to lack of funds, has perforce to advance slowly. There are now maintained by the Government 125 miles of main roads, 139 miles of by-ways, and 74 miles unclassified roads, of which 126 miles are suitable for and much used by motor traffic.

Passenger subsidised motor-bus services are regularly maintained between Castries and Dennery and Vieuxfort and Soufriere.

The Government 50-ton motor launch supplies a regular service between Castries, Soufriere, Vieuxfort, and the villages of Anse-la-Raye, Canaries and Laborie.

There is a telephone system throughout the Colony, the ten exchanges being connected by 94 miles of trunk lines, giving 206 connections over 275 miles of wire, 218 subscribers.

Mail communication is maintained by (1) a regular fortnightly steamer service to Canada and other West Indian Colonies, and (2) a monthly service via Martinique to Europe by means of the French mail steamer. There are other and frequent mail opportunities via Barbados and America, and direct to Europe.

Telegraphic communication is maintained by the Pacific Cable Board; there is also the West India and Panama Telegraph Company, Limited, the latter no longer subsidised by the Government.

GRENADA.

ANNUAL GENERAL REPORT FOR THE YEAR 1926

I.—Introduction.

GEOGRAPHICAL.

Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British island to the mainland of South America with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad and between the parallels of 12° 30′ and 11° 58′ North latitude and 61° 20′ and 61° 35′ West longitude. The Island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast-line is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, land-locked and deep watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the Island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one, called the Grand Etang, being situated near the centre of the Island, 1,740 feet above sea-level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

CLIMATE.

The climate can be classed as excellent, especially from December to May, when it is delightful. The trade winds are steadily prevalent during this period, but occasionally fail in the autumn months, which are somewhat damp and hot.

The range of temperature is small and tends to make the climate equable and healthy. The thermometer seldom reaches 90° in the shade or drops below 70°, and these occasions occur so rarely that they are specially recorded in meteorological notes of the year. The highest temperature in 1926 was 92° on 9th September, and the lowest 70° on several days. The mean of maximum temperatures was 85° and the mean of minimum 74°. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches. In the mountainous centre it approaches 140 inches. At St. George's, midway between the two, the rainfall in 1926 was 59.37 inches. Over the past thirty years the average at St. George's has been 72.62 inches.

Historical.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants, who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795-96, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

II.—General.

For more than two years the prices of two important products—nutmegs and mace—have continued at exceptionally high rates, and although the price of the former declined slightly towards the end of the year the values, compared with pre-war figures, are still extremely remunerative to the growers. An upward trend in the prices of the other staple crop of the Island—cocoa—also occurred, with the result that a general wave of prosperity has extended throughout almost the entire community. Its signs are evident in an improved standard of living, and in expenditure on articles of better quality than usually purchased.

This tendency ought to benefit manufactures of British origin—and this has already been apparent in the case of motor-cars which, for the first time since motor transport was introduced into Grenada, are now being imported from Great Britain to an appreciable extent.

Whaling operations—as will be seen from the notes under "Industries"—were carried out on a smaller scale last year, but have now been discontinued, and it is uncertain whether the Company intends to resume the industry. The number of whales caught has not come up to the expectations formed when the station was erected, and some doubt appears to exist as to whether the whales are migrating or whether the species (*megaptera nodosa*) is becoming extinct.

Another promising industry—that of banana cultivation—has also received a blow by the closing down of the Swift Company towards the beginning of 1927. Efforts to maintain the cultivation and

to arrange for transport and marketing were taken by the Government, and there was a prospect of a resumption of the export of the fruit to New York, but unfortunately the latest outlook is far from encouraging.

A large scheme of improvement and extension of water supplies at a cost of about £14,000 was proceeded with, according to plans drawn up by Mr. H. F. Peet, M.I.C.E., who visited the Colony for the purpose in the early part of the year. The main work of improvement consists of enlargement of the filter beds, construction of additional reservoirs and sedimentation tanks, and introduction of ferric alumina treatment. Extensions of the water service in St. George's and the districts of Grand Anse, Mount Moritz, and Happy Hill were carried out during the year, and work of improvement has also been undertaken at Grenville, Sauteurs, and Gouyave.

Mr. Peet also drew up two schemes for the electric lighting of the town and district of St. George's, and it has been decided to proceed with a hydro-electric undertaking from power obtained from the Annandale River. Its introduction involves conversion of the telephone system in the electric light area from an earth to a metallic circuit, but as the present system can barely meet the requirements of the subscribers it has been decided to reconstruct the telephone system throughout the Island. These two schemes involve an expenditure of £40,000, and at the time of writing a loan for the purpose has been arranged for by the Crown Agents for the Colonies.

The question of closer association with Trinidad continues to engage attention, although expressions of public opinion on the subject are somewhat lacking, from a fear that the proposal will mean some loss of individuality and autonomy among the smaller islands. The present association of the Windward Islands under a Governor at Grenada, and of the Leeward Islands under a Governor at Antigua, are examples of the feasibility of the larger union. In these existing unions, however, a certain element of jealousy arises from the fact that the seat of the Government is placed in an island no more important than the others of the group, and this would disappear by establishing the headquarters at an island of the size, importance, and public activities of Trinidad. There would also be the ultimate possibility of the public men of the smaller Councils meeting there for the consideration of subjects of common West Indian interest, thus obviating the defect of so many divided opinions on such subjects.

His Excellency Sir Frederick Seton James, K.B.E., C.M.G., was absent in England on leave from 27th June to 30th October, the administration of the Government of the Windward Islands being undertaken from 15th July to 30th October by the Honourable Herbert Ferguson, C.B.E., the Colonial Secretary of Grenada.

Public Health and Statistics.

The new Public Health Ordinance, which was passed towards the end of 1925, came into operation on 1st March, 1926, and under its provisions the control of sanitation, which formerly had been undertaken by various Local Sanitary Authorities, passed to the control of a Central Authority consisting of the Chief Medical Officer as Chairman, two Medical Officers, and a representative from each of the six District Boards of the Colony. The practical measures in regard to sanitation are entrusted to the Chief Sanitary Inspector, with a staff of seven Sanitary Inspectors. A motor-lorry and adequate sanitary bins have been provided for St. George's, and handcarts and wheelbarrows in the other towns. The uniformity of procedure and the regular and systematic house to house inspections will, it is hoped, lead to greatly improved sanitary conditions.

The scheme for district visiting stations, to which reference was made in the last annual report, although not completed during the year, has now been established.

Financial provision has been made for a leper settlement, and steps are being taken for the selection of a suitable site. Lepers are not numerous, their number being under 20, and it is confidently expected that proper segregation will stamp out this disease within a generation.

Vital Statistics.—The estimated population at 31st December, 1926, was 71,621, the density being 538 per square mile.

There were 2,402 births and 1,460 deaths, the birth-rate being 33.53 and the death-rate 20.3 per thousand.

The death-rate is the highest recorded since 1917, when the rate was 20.6.

The percentage of deaths of children below five years of age to the total deaths was 50.8. In the year 1923 the percentage was 40.3, and in the following year 41.3.

The following table compares the infantile death-rate with that in other West Indian Colonies and England and Wales :—

Infantile death-rate per 100 births.

Country.	Year.	Under 1 year.	Under 5 years.
Grenada	1926	13·7	30·9
Grenada	1925	11·6	23·3
British Guiana	1925	15·5	20·9
Dominica	1925	13·5	23·4
Jamaica	1925	17·3	25·8
St Lucia	1925	10·6	19·2
St. Vincent	1925	11·5	18·6
Trinidad	1925	13·4	20·1
England and Wales	1924	7·5	11·4

The following observations appear in the report on vital statistics for the year :—

> "The increased death-rate amongst infants has occurred principally in the parishes outside St. George's. In the latter, a Crêche was opened at the end of 1924, and, while the improvement in the infantile death-rate in St. George's as compared with the out-districts cannot with absolute certainty be attributed to the Baby Welfare Movement, there can be no doubt that this organisation has materially contributed to such a result. The District Visiting Stations that have this year been established by the Government will have a resident nurse in attendance specially trained in midwifery, and it is hoped that this scheme may lead to greatly improved conditions in the districts."

The increased number of deaths among young children accounts to a large extent for the increased total death-rate. There was a larger death-rate from diarrhœa and enteritis—principally among children—the deaths numbering 400 as against 284 in 1925, and from syphilis, which increased from 26 to 66, 42 of the latter being from congenital syphilis of infants.

Much of the high death-rate amongst young children is attributable to improper feeding, and, as one of the measures for counteracting this, the Government is considering a scheme for the distribution of pure milk at a cheap rate to the children of mothers in poor circumstances.

III.—Government Finance.

The revenue for the year again made a record, the amount being £148,447 as compared with £146,218 in 1925. The expenditure was £119,001, resulting in a surplus on the year of £29,446. With this addition, the excess of assets over liabilities at 31st December, 1926, amounted to £69,201.

A special Reserve Fund was created during the year, and, in accordance with instructions from the Secretary of State, the Fund will be augmented annually (*a*) by a vote of £1,000, (*b*) by transfer of half the surplus revenue in each year, (*c*) by the interest on the Invested Reserve Fund until the Fund reaches the sum of £50,000.

By the operation of these measures the Reserve Fund at the end of 1926 was £23,435, the remaining surplus assets being £45,766.

The public debt of the Colony amounts to £223,670, against which there are accumulated sinking funds amounting at 31st December, 1926, to £92,824, leaving a net indebtedness of £130,846.

Banks.

Two Banks are established in the Colony, Barclay's Bank (Dominion, Overseas, and Colonial—formerly the Colonial Bank) and the Royal Bank of Canada, the former having also a branch at

Grenville. Savings bank business is conducted by both banks, the rate of interest on deposits being 3 per cent.

The note circulation of Barclay's Bank was £25,000, and that of the Royal Bank of Canada $100,000, but the actual amount in circulation is stated to be about £30,000.

Silver is legal tender without limit. There is very little gold in the Colony, a few American gold coins alone being in circulation.

Savings Bank.

The Savings Bank conducted by the Government gives 4 per cent. interest on deposits, and with this favourable rate the business of the Bank continues to grow steadily.

The amount standing at the credit of depositors rose during the year from £32,103 to £36,356, the number of depositors at the same time increasing from 1,922 to 2,135. The investments on account of the Bank's funds were £32,139, and there was a profit of £209 on the year's working.

IV.—Annual Progress of Trade.

The value of imports for the calendar year 1926 was £386,483, and of exports £447,401, the total trade being £833,884. As compared with 1925, the imports were less in value by £45,324, while the value of exports increased by £13,318.

IMPORTS.

The principal articles imported were the following :—

—	Value.		Increase or Decrease over 1925.	
	1925.	1926.	Increase.	Decrease.
	£	£	£	£
Flour	51,183	47,582	—	3,601
Cotton, piece-goods	46,413	39,794	—	6,619
Wood, &c., unmanufactured ...	15,907	22,739	6,832	—
Fish, dried, &c.	13,516	13,904	388	—
Rice	12,484	10,386	—	2,098
Motor-cars and parts	11,860	14,439	2,579	—

The decreased importations are mainly due to the business houses having been well stocked in the preceding year. In the case of flour, although a decrease in value was recorded, the quantity imported was slightly more than in 1925.

Flour continues to be the principal article of importation and is obtained almost wholly from Canada, the returns showing that a very negligible quantity arrives from the United States of America. As will be seen from the following table, the transfer of trade in this article hitherto imported from the United States has been one of the principal effects of the Trade Agreement with Canada :—

Importations of Flour.

—	Canada.		United States.	
	lb.	£	lb.	£
1915	852,422	6,023	4,352,565	34,169
1919	2,406,806	34,290	2,114,257	29,766
1922	4,730,421	39,157	538,795	4,437
1926	5,293,833	47,485	11,172	97

The following table shows the direction of trade for the years 1925 and 1926 :—

—	1925.	Percentage of Total.	1926.	Percentage of Total.
	£		£	
United Kingdom	156,394	36·3	126,511	32·7
United States of America... ...	80,859	18·8	80,158	20·8
Canada	90,641	20·9	93,336	24·2
Other British Possessions ...	64,618	14·9	55,202	14·2
Other foreign countries	39,295	9·1	31,276	8·1

Exports.

The value of exports for the year amounted to £447,401, of which £437,751 represented the value of local products and £9,650 of re-exports.

The quantity and value of the principal local products exported were as follows :—

		£
Cocoa, raw	83,384 cwt.	223,290
Cotton, raw	3,159 ,,	14,040
Cotton Seed	7,762 ,,	2,646
Spices—Nutmegs	22,702 ,,	127,000
Mace	3,679 ,,	49,490
Whale Oil	108,055 gals.	14,258

The direction of the export trade was as follows :—

—	1925.	Percentage of Total.	1926.	Percentage of Total.
	£		£	
United Kingdom	171,768	39·6	165,901	37·1
United States of America ...	212,816	49·1	227,015	50·7
Canada	12,785	3·0	14,895	3·3
Other British Possessions ...	14,425	3·1	14,555	3·2
Other foreign countries	22,289	5·2	25,035	5·7

A greater quantity of the Colony's staple products continues to be shipped to the United States of America than to the United Kingdom, the figures being :—

	United States of America.	*United Kingdom.*
	cwt.	cwt.
Cocoa	42,536	34,426
Nutmegs	15,019	6,189
Mace	1,855	1,595

All the cotton exported, 3,159 cwt., went to the United Kingdom. Of the 108,055 gallons of whale oil exported 107,815 gallons were consigned to Holland and 240 gallons to Trinidad.

The total amount of export duty collected was £11,061. The amount collected in 1925 was £12,267. The products in respect of which these amounts were collected were :—

	1925.	1926.
	£	£
Cocoa	4,979	5,668
Cotton, raw	488	316
Cotton Seed	222	192
Nutmegs	5,440	3,626
Mace	961	901
Whale Oil	177	337
Whale Manure	—	21

The increase under cocoa was due partly to larger crops and partly to higher values.

Other articles of export included bananas and other fruit, lime juice, salt, coconuts, hides and skins, copra, groundnuts, wood, and timber.

Agriculture.

Weather conditions are reported to have been very unfavourable for crops during the year 1926, but exports of cocoa and nutmegs showed a slight increase, nevertheless, over those of the previous year.

Cocoa.

The market prices for cocoa were profitable, and towards the end of the year a still further advance in price occurred. The exports amounted to 83,384 cwt. as compared with 73,216 cwt. in 1925, and the value increased from £197,231 to £223,290. In three parishes experimental plot work has been begun with a view to determining accurately the effects of manurial and cultural treatment of the cocoa tree in relation to its productiveness.

Spices.

The quantity of nutmegs exported was greater than in the previous year, but a slight decline in the very high prices reduced the value from £145,861 to £127,000. The production of mace was slightly less than in 1925, but the prices were on the average higher, and the value of the mace exported rose from £39,606 to £49,490.

Cotton.

Cotton cultivation, which is principally of the variety called "Marie Galante," and is confined to Carriacou, was normal, the crop being [illegible]age quantity and the prices slightly lower than in the preceding year. The Commissioner of Carriacou reports that there was no sign of boll weevil and that this was due to the success of the methods adopted for its suppression during the past three years.

Other Crops.

Considerable attention was given during the year to the development of banana cultivation, and by the end of the year shipments of 1,000 to 1,200 stems were being made to New York every three weeks by a steamer provided by the Swift Banana Company. Unfortunately, this Company ceased operations shortly afterwards, and the re-establishment of shipping and marketing facilities is a problem which is engaging the attention of the Government. The immediate difficulty is that until the production reaches the extent of about 20,000 stems weekly the industry does not warrant the employment of special steamers. If means could be found to carry on during the interval of development, the industry would be extremely profitable. There is a prospect also of grape fruit cultivation being developed, and an experimental plot of several acres is being laid out by the Agricultural Department. The corn (Indian maize) crop throughout the Colony is reported to have been short, and ground provisions, i.e., root crops, did not do so well as anticipated.

The actual amalgamation of the Agricultural Department with that of Trinidad was brought into effect during the year, and visits were paid by Mr. W. G. Freeman, B.Sc., the Director of Agriculture, Mr. Scheuli, Agronomist, Mr. Joseph de Venteuil, Chemist,

and Mr. S. Stell, Mycologist, while a visit was also paid towards the end of the year by Captain Metivier, Veterinary Surgeon, in connection with an outbreak of disease among pigs, which was diagnosed as swine fever.

Land.

There are no Crown lands for sale; any lands remaining in the possession of the Crown are preserved as Forest or Rain Reserves.

Estates are occasionally bought by the Government for the purpose of land settlement, but this is confined to smallholders of whom, mainly owing to the schemes fostered by Government, there are over 14,000 in the Island.

Industries.

The sugar industry can scarcely be said to exist in Grenada, much less sugar being made than is required for local consumption. This condition of things continues, although for some years past the Government has imposed a protective duty on imported sugar amounting to 1*d*. per lb., with a view to stimulating the local production. There is, apparently, a lack of suitable land available for profitable cultivation of canes.

Rum was manufactured at twelve distilleries, the output of which was 45,096 proof gallons, a quantity barely sufficient for the local demand.

An ice factory continues to work in St. George's with the aid of a Government subsidy.

Whaling Industry.

The operations of the Company established on Glover Island were continued, with three in place of two whale-catchers, but the catch numbered only 72 whales as compared with 102 in the previous year. The quantity of oil exported was 108,055 gallons, of the value of £14,258, and a small quantity of manure was exported, of the value of £418.

These results apparently have not been profitable, and operations in the present year have been entirely discontinued.

V.—Legislation.

Eighteen Ordinances were passed during the year, the principal of which were the following :—

No. 1.—Dangerous Drugs.—Introducing measures for dealing with the traffic in opium, &c.

No. 4.—Carriage of Goods by Sea.—Adopted to secure uniformity of procedure throughout the Empire.

No. 9.—Midwives.—Providing for the examination, registration, and control of midwives.

No. 11.—Primary Education Ordinance.—Revising the constitution of the Board of Education and of committees of management, and improving conditions affecting teachers.

No. 18.—Companies.—Which introduces modern legislation on the lines of the Imperial Act on the subject.

VI.—Educational Progress.

Dr. H. A. Baker, D.Sc., the Director of Education, was seconded to the post of Geologist to the Newfoundland Government for one year from the end of June, the duties of Director being taken over by Mr. H. H. Pilgrim in conjunction with his own duties as Inspector of Schools.

Primary.

The number of primary schools is the same as last year, namely, 58, of which 10 were Government, 27 Roman Catholic, 14 Anglican, 5 Wesleyan, and 2 Presbyterian.

The total number of scholars on the roll at 31st December, 1926, was 11,731, and the average attendance was 7,066, representing 60.2 per cent. of the number on roll.

The total expenditure by the Government on primary education for the year was £8,287, and the amount by the Denominations was £306. Excluding administration and inspection, the cost to Government per pupil in average attendance at Government schools was £1 4*s*. 3*d*., and at grant-in-aid schools £1 2*s*. 7*d*.

Secondary.

The numbers at the Grenada Boys' School have still further increased, and numbered 108 at the last term, of whom 36 were scholarship holders from the lower division and combined primary schools.

In addition, there were 182 girls on the rolls of the Anglican Girls' High School and the St. Joseph's Convent School. These figures do not represent the total number of girls receiving secondary or specialised education in the Colony, as there are about 60 pupils in attendance at another private school, which has this year now received a Government grant.

Ten pupils from the Grenada Boys' School entered for the Cambridge Junior Local Examination, and nine passed, two Honours and two Distinctions being gained. Two pupils from this school sat for, but did not pass, the Cambridge School Certificate Examination.

The successful candidates at the Cambridge Junior Local Examination from the Anglican Girls' School numbered three out of six, and from the St. Joseph's Convent School two out of five, one of the pupils from the latter school gaining a Distinction.

The Matriculation Examination of London University has now been made the standard for winning the Grenada Scholarship, which is now awarded biennially.

At the June Examination this year, six candidates sat, and the Scholarship was awarded to Mr. M. A. Byer, who passed in the 1st Division. Only one of the other candidates passed the examination, in the 2nd Division.

VII.—Communications.

Roads.

There is a good network of main roads and byways throughout the Island, the approximate mileage of the former being 114 and of the latter 305 miles. All the main roads and most of the byways are suitable for motor traffic. The gradients in some parts are steep, and the numerous curves and blind corners necessitate care in driving.

The Government motor mail and passenger service between St. George's and Sauteurs, via Grenville, was discontinued from August, when the service was taken over by a private contractor under a subsidy from the Government. On the western side of the Island there is now also a subsidized motor-bus mail and passenger service as well as a subsidized motor-boat service. This latter extends its journey to Carriacou once a week.

Posts.

Postal business is transacted at the principal post office in St. George's, and at sub-offices at Gouyave, Victoria, Sauteurs, Grenville, and St. David's, and at Hillsborough, Carriacou. There are, in addition, several postal stations.

Telegraphs.

There is a wireless station at St. George's, operated by the Pacific Cable Board, and a subsidiary wireless station was erected in Carriacou last year by the Government. Communication with other countries is also maintained by the West Indian and Panama Telegraph Company by cable.

Telephones.

There is a telephone service with five exchanges, worked very economically and at small charges. Owing to the great increase in the number of subscribers, a reconstruction of the entire system has been decided upon. There are (including Carriacou) 511 instruments and 150 switches in use; 183 miles of direct wire and 902 miles connecting subscribers and exchanges.

SHIPPING.

Direct communication with the United Kingdom was maintained by the Harrison Line, their larger steamers calling about once a month. This direct service is much appreciated; the duration of the voyage to London is about 14 days. The cargo steamers of this Line also call frequently.

The ordinary fortnightly service of the subsidized Canada-West Indies Steamship Line was continued for a part of the year, but in the latter half was restricted to a monthly call of passenger steamers with an intermediate call of freight steamers. Arrangements have now been made for an improved service under the management of the Canadian Government Mercantile Marine.

The Furness-Withy Line have a direct service from New York to Grenada at intervals of about ten days. The time occupied between New York and Grenada is seven days.

Situation and Area.

The island of St. Lucia is situated in latitude 13° 54′ North and longitude 60° 59′ West, at a distance of 24 miles to the south-east of Martinique and 21 miles to the north-east of St. Vincent.

It is 27 miles in length and 14 at its greatest breadth; its circumference is 150 miles and its area 233 square miles, rather less than Middlesex.

Castries, the capital, is situated at the north-western end of the island and has a population, according to the census of the 24th April, 1921, of 5,899.

The port of Castries is one of the best harbours in the West Indies. It is land-locked and provides facilities for coaling and watering ships and for loading and discharging cargo which are unequalled in these islands.

The town of next importance is Soufriere, which lies about twelve miles to the south of Castries and contains a population of 2,480 Just below Soufriere Bay stand the remarkable twin peaks known as "The Pitons," rising sheer from the sea to a height of 2,619 feet in the case of the Gros Piton and to 2,461 feet in that of the Petit Piton. The boiling sulphur springs from which Soufriere gets its name are situate at Ventine, two and a-half miles south-east of that town.

History.

It is generally accepted that St. Lucia was discovered by Columbus, during his fourth voyage, on the 18th June, 1502. There is, however, a tradition amongst the French that it was discovered on the 13th December of a later year by some shipwrecked French seamen, who named it St. Alouziel or St. Alousie after the martyred virgin saint of that name, whose feast is commemorated on that date.

The island was then inhabited by the Caribs and they remained in undisturbed possession for another century.

In 1605 sixty-seven persons proceeding to Guiana by the English ship "Olive Blossom" were forced by famine to land in the island, and they remained "to take their fortune in the fruitful isle." They were not able to stay longer than a month, however, when, reduced to nineteen by wars with the Caribs, they left in an open boat and reached the mainland of South America in sore distress. This is the first recorded instance of a landing by Englishmen in the island.

In 1626 a Commission was granted by Cardinal Richelieu to MM. d'Enambuc and du Rossay to establish a French Colony "in the islands of St. Christopher and Barbados and in the surrounding territories," which presumably included St. Lucia, and in 1627 the island was granted by the King of England, along with all the Caribbee Islands, to the Earl of Carlisle, who appointed Lord Willoughby of Parham to be Governor of Barbados and the other Caribbee Islands. In 1635 it appears to have been granted by the King of France to MM. de l'Olive and Duplessis.

In 1638 Captain Judlee of St. Kitts (acting in the name of Lord Willoughby) and three or four hundred men took possession of the island and attempted to effect a settlement in it, but in 1640 these early colonists were massacred and expelled by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who sold it in 1650 to MM. Honel and du Parquet for the equivalent of £1,600. The Caribs made repeated attempts to expel the French but failed and finally, in 1660, they concluded a treaty of peace with the latter.

In 1663 Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia and took possession of it. The English continued in occupation until the Peace of Breda, in 1667, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France and made a dependency of Martinique.

Throughout the eighteenth century recurrent struggles took place between the English and the French for possession of the island, the more important occurring in the latter half of the century. In 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton, but was returned to France by the Treaty of

Paris in the following year. In 1778 it again surrendered to the British, who remained in occupation until 1783 when, by the Peace of Versailles, St. Lucia was once more restored to France. It was from Pigeon Island, off the north-western coast of St. Lucia, during the period of this occupancy that Rodney sighted the French Fleet of 36 sail of the line, under the Comte de Grasse, prior to giving them battle and defeating them in the memorable naval action of the 12th April, 1782. The island was again taken by the British in 1794, but they were forced by the French Republican party in the island, aided by insurgent slaves under "Citoyen" Victor Hughes, the Civil Commissary of Guadeloupe, to evacuate it in the following year. In 1796, after an obstinate and sanguinary struggle, that party laid down their arms and surrendered as prisoners of war to a force 12,000 strong under the command of Sir Ralph Abercrombie, supported by a squadron under the command of Sir Hugh Christian. Sir John Moore, the subsequent hero of Corunna, took part in this operation as Brigadier-General Moore, and remained in the island as Governor thereafter. The British retained possession of the island until 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since when it has continued under British rule. As a result of the operations of 1778, 1796, and 1803, no fewer than thirteen British regiments have "St. Lucia" inscribed on their colours.

Climate.

The climate is healthy and compares favourably with other West Indian islands. The temperature varies between 70° in the cool season, from December to May, to 90° in the remainder of the year. On Morne Fortune, just above Government House, where a portion of the former garrison was located, the temperature in the winter months falls as low as 60° and throughout the year it remains mild and pleasant.

The temperature records during 1926 show a mean noon temperature of 85.5° in the shade. The maximum temperature recorded was 94°, the minimum being 62°, giving a range of 32°. The rainfall recorded at the Botanic Station, Castries, for the year was 68.12 inches, being 21.37 inches below the average for 37 years.

General Observations.

The general health of the island was good during the year. There was no epidemic sickness to be recorded. The Chief Medical Officer is responsible for the general supervision of matters of health and sanitation in the Colony.

Victoria Hospital, the principal hospital, is situated within half a mile of Castries. A Resident Surgeon is in charge, and he is assisted by a staff consisting of a European matron and local

nurses and dispensers. There is a ward with six rooms assigned to paying patients, of which extensive use is made. This institution has a good reputation, and patients speak highly of the skill and attention of the staff.

There are three small district casualty hospitals close to the principal local dispensaries of Soufriere, Vieuxfort, and Dennery.

The Pauper and Leper Asylums are situated in the Soufriere District, and are supervised by the Medical Officer of the District and a visiting Advisory Committee.

The prosperity of the Colony is mainly dependent upon agriculture. Extensive banana cultivation has progressed rapidly, and there is an abundant supply of fruit, vegetables, and fish, which form the staple foods of the population.

Coaling, for which there are exceptional facilities, still affords considerable, though irregular, occupation for a number of labourers in and around Castries.

There is good river and sea fishing. At certain times of the year shooting can be obtained.

The second public lawn tennis court in the Botanic Gardens is nearing completion, and an attractive tennis, bathing, and social club has been formed at Vigie and promises to be a most successful venture.

" Poppy Day " has been observed since 1923, and a fairly satisfactory sum has been so far collected yearly for Earl Haig's Fund for Disabled Soldiers.

His Excellency the Governor of the Windward Islands, Sir Frederick Seton James, K.B.E., C.M.G., made two visits to the Colony during the year, from 2nd February to 23rd March and from 12th November to 16th December.

Lieutenant-Colonel W. B. Davidson-Houston, C.M.G., Administrator of St. Lucia, then Acting Governor, went on leave from 2nd July and His Honour Captain Oliver Plunkett, Chief Justice, was appointed to act as Administrator.

Vital Statistics.

On 31st December, 1925, the resident population of the Colony was computed to have been 25,345 males and 29,754 females—a total of 55,099. On 31st December, 1926, the figure had increased to 55,698; males 25,594, females 30,104. The natural increase during the year was 890. The departure from the Colony exceeded the number of persons entering the Colony by 291, so that the net addition was only 599.

The births (including still-births) were 2,120—males 1,087, females 1,033. The number of deaths recorded was 1,230—males 592, females 638.

The principal causes of death as returned (excluding still-births) were malaria, 73; pulmonary tuberculosis, 57; phthisis, 31;

syphilis, 56; cancer, 23; pneumonia, 72; worms, 117; infantile debility, 31; senile decay, 108.

There was one death from snake bite returned in the Gros Islet District.

Shipping.

The number of ships entered and cleared during the year was 1,107, of a total tonnage of 1,071,957 tons. Of this total, 490 were steam vessels and 617 sailing.

Four ships of His Majesty's Fleet and seven private yachts called during the year.

Financial.

The local revenue received during the year amounted to £83,379 or £7,824 more than the previous year. The expenditure, however, exceeded the revenue by £1,111, being £84,488 or £594 less than in 1925. It is expected that the economies which have been effected will reduce expenditure considerably during the present year. The accounts for the year closed with a deficit of £1,109, which cannot be regarded as satisfactory, but, nevertheless, represents a substantial improvement of £8,418 over the deficit at the end of 1925. The public debt of the Colony stood at £206,609, and the accumulated sinking fund for its redemption £54,767, on the 31st December, 1926.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10*s*. and 5*s*. are in circulation, as well as the notes of the Colonial Bank and Royal Bank of Canada, both of which have branches in Castries. Each of these Banks has savings banks, and there is, in addition, a Government Savings Bank, all of which do a fair amount of business, the latter's balance at the close of the year being £12,644.

The Imperial weights and measures are in use in the Colony.

Imports and Exports.

The total value of imports (including bunker coal) was £252,236, and of exports (including bunker coal) £251,705. The value of bunker coal imported was £53,551, as compared with £39,562 in 1925, while the export totalled £76,314, as compared with £77,399 in the previous year. Imports from the United Kingdom totalled £62,399, other parts of the British Empire £62,515, while the total from foreign countries was £121,506, parcel post being responsible for the remaining £5,816. Of the imports from foreign countries, those from the United States of America show a value of £103,507, of which the principal items were bunker coal £53,551 and cinema films £6,800.

Of British countries, Canada shows a total of £36,940.

Of the total exports, commodities valued at £62,421 went to the United Kingdom, £70,822 to other parts of the British Empire, and

£41,595 to foreign countries, while exports of bunker coal totalled £76,314. Ships' stores, with the decline in shipping trade, amounted to £553 only.

Progress of Trade, Agriculture, and Industry.

The price for sugar was low previous to, and during, the crop. The sugar market, however, improved steadily during the year, being favourably affected by Cuban restrictions on sugar production; the average price per ton of West Indian crystals was £29 9*s.*, as against £30 10*s.* in 1925.

The total amount of sugar made was 6,021 tons, as against 5,564 tons for 1925.

The production of rum again decreased, the following quantities being made in the distilleries :—

	Proof Gallons.
1925	45,762.2
1926	34,161.3

There has been no extension in the area under cane, which remains at about 4,750 acres.

The cocoa market improved during the year and provided a workable price for best cocoa, the price ranging from 57*s.* to 68*s.* per cwt., with a further advance at the end of the year. Exports were as follows : —

1925	10,443 cwt. valued at £22,339
1926	10,036 cwt. valued at £22,454

St. Lucia grades of cocoa compare well with other kinds, but would receive better attention if the total crop were pooled for shipment in bulk.

High prices were realised for lime oils during the year, ranging from 25*s.* to 46*s.* per lb. for hand-pressed oil and from 9*s.* 6*d.* to 36*s.* for distilled oil. Concentrated and raw lime juices were sold at a moderate price throughout the year and all markets had become more normal towards the close of the year.

Increased attention was given to lime cultivation. The total crop of the Colony, calculated in barrels, was :—

1925—63,406 barrels, value as exported lime products £27,835

1926—59,415 barrels, value as exported lime products £28,245

This industry is now the second most productive in the Colony. The area under lime cultivation is 2,650 acres.

The production of coconuts has increased, with a number of young trees coming into bearing, and a large crop has been made; much of this has been dealt with by the local oil mills in the manufacture of oil and soap, the exports of which are correspondingly augmented as shown below :—

	1925.	*Value.* £	*1926.*	*Value.* £
Coconuts (Number)	123,516	432	118,501	380
Coconut Oil (Gals.)	6,323	791	19,081	3,846
Copra (lb.)	221,944	3,563	178,234	1,808
Coconut meal (lb.)	28,917	106	95,011	777

The production of bananas has increased considerably during the last two years, due largely to the operations of the Banana Company and the organised collection of peasants' bananas for shipment. Shipment of bananas from St. Lucia to New York took place on four occasions.

The present yield of all Gros Michel cultivations in the Colony is estimated to reach 70,000 bunches during the year.

Owing to the weak American market, bay oil factories dealt with a smaller crop than in the previous year. Mentholated bay rum has also been manufactured. Local rum, owing to its immaturity, has been found unsuitable for the manufacture of bay rum.

An increased crop of sea island cotton was raised and realised a good price.

By increased attention to apiculture a good honey crop was made during the year and the following were exported :—

	1925.	*Value.*	*1926.*	*Value.*
	lb.	£	lb.	£
Honey	43,862	463	129,152	737
Wax	426	23	217	8

Copra has been utilised by the local oil mills in the manufacture of coconut oil and cake.

Soaps of good quality, containing a high proportion of natural glycerine, have been manufactured experimentally and provision made for a local trade in soap.

Education.

Primary education is free and compulsory. There are 49 denominational schools. Although education is compulsory between the ages of 6 and 14, little more than half the children of school age attend. The teaching is greatly hampered by the prevalence of French "patois."

Grants-in-aid are made to these schools, mainly for the payment of teachers' salaries. The Inspector of Schools, a Government officer, is in charge of the administration of the grants.

Except for the Roman Catholic Sisters, the teachers are all natives of the Colony or neighbouring Colonies. Facilities for training of teachers, or higher rates of pay to attract more highly qualified teachers, are urgently needed.

English, reading, writing, arithmetic, the elements of grammar, geography, and hygiene are taught. In the upper classes boys are taught elementary agricultural science, both practical and theoretical, and the girls needlework and domestic economy. The results are generally good.

Secondary education is supplied by St. Mary's College for boys, and St. Joseph's Convent School for girls, both situated in Castries. These schools prepare their pupils for the Cambridge University Local Examinations and the London University Matriculation Examination. Pupils have attained considerable success in these

examinations. The St. Lucia Scholarship of £175 per annum, which was established in 1918 and suspended in 1925, was renewed in 1926, and made biennial. The Scholarship is awarded, on the results of the London University Matriculation Examination, to candidates having the requisite local and residential qualifications. A choice of universities, or of agricultural scientific or technical colleges or institutions in Europe, Canada, or the United States, approved by the Governor in Council, is permitted. The Scholarship is tenable for not less than three, and not more than five, years according to the time required for the completion of the course of study sanctioned. Up to 1926 six Scholarships have been awarded.

Communications.

The road system of the Island, owing to lack of funds, has perforce to advance slowly. There are now maintained by the Government 125 miles of main roads, 143 miles of by-ways, and 74 miles of unclassified roads, of which 156 miles are suitable for, and much used by, motor traffic.

Passenger subsidised motor-bus services are regularly maintained between Castries and Dennery and Vieuxfort and Soufriere.

The Government 50-ton motor launch supplies a regular service between Castries, Soufriere, Vieuxfort, and the villages of Anse-la-Raye, Canaries, and Laborie.

There is a telephone system throughout the Colony, the ten exchanges being connected by 94 miles of trunk lines, with 217 subscribers over 298 miles of wire.

Mail communication is maintained by (1) a regular monthly steamer service to Canada and other West Indian Colonies, and (2) a monthly service via Martinique to Europe by means of the French mail steamer. There are other and frequent mail opportunities via Barbados and America and direct to Europe.

Telegraphic communication is maintained by the Pacific Cable Board; there is also the West India and Panama Telegraph Company, Limited, the latter no longer subsidised by the Government.

I.—GEOGRAPHICAL AND HISTORICAL.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown, the capital of St. Vincent.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the Island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was again declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the Island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the Island surrendered to the French, and by the Treaty of Versailles in 1783 it was restored to Great Britain.

II.—GENERAL OBSERVATIONS.

On the whole the year 1926 may be regarded as a fairly satisfactory one, although the revenue, £60,243, fell short of that for 1925 by some £2,200, due mainly to the fact that the tax on land throughout the Colony was reduced by one-half.

The yield from Income Tax, £3,014, showed a reduction of £1,500 on that for 1925. This may be attributed to the large unsold stocks of cotton and arrowroot held in England during the last three years.

The total trade of the Colony amounted to £366,515, as against £444,339 in 1925; the value of exports, £162,909, showing a marked reduction of nearly £70,000 as compared with 1925. The cause for this is to be found in the serious decline in the marketable export values of arrowroot and syrup.

The net surplus as on 31st December, 1926, amounted to £21,509, and in addition to this the Colony possesses a Reserve Fund of £11,000 now fully invested in good liquid securities, while the Public Debt only amounts to £9,730 with sinking funds invested to the extent of £5,494.

The expenditure for the year amounted to £59,282, being some £6,000 more than the expenditure for 1925. This £6,000, however, includes £2,000 appropriated to form the nucleus of the Public Property Insurance Fund. The surplus on the year's working amounted to £961.

This Island, like other West Indian islands, depends entirely for its prosperity upon securing sales and satisfactory prices for its principal agricultural products—arrowroot, cotton, copra, syrup.

The general health of the Island was good. Eight cases of diphtheria occurred, with four deaths, and forty-eight cases of enteric, with nine deaths.

There were 1,304 cases of infantile diarrhœa, with 86 deaths, during the period under review, but it is probable that a certain number of these cases are of tubercular origin.

The mortality-rate per 1,000 births was 125, as against 115 in 1925.

The campaign against yaws continued successfully, some 1,861 cases being discharged clinically cured.

An important event in the medical history of the year was the appointment of a Chief Sanitary Inspector, upon whose arrival a campaign of public health education was started. This appointment is destined to be of very considerable influence in the carrying out of sanitation measures.

During the year a new water sewerage system was installed at the Colonial Hospital, which has given most satisfactory service.

A new electric-light plant was put in at the Hospital and the building re-wired.

The principal public works undertaken included the reconstruction of the telephone system, certain minor exchanges being eliminated. A new and more suitable type of switchboard was erected at the central exchange and smaller switchboards of similar design were installed at the principal district exchanges. The work of reconstructing the system, which was started in 1925, was completed at the close of the year under review.

Reconstruction work was continued on the Windward Highway and reached Georgetown at the end of the year. The cost of the work, as in 1925, was defrayed from surplus funds.

A new motor roller of an improved type was obtained.

A causeway was constructed over the Cumberland River and also over the Teviot and Fairhall rivers.

The education year was marked by the introduction of a revised code of education and the institution of pensions for Head Teachers on retiring.

Perhaps the most important event of the year, from the political point of view, was the Preliminary Conference of Representatives of the West Indian Islands and British Honduras and British Guiana, held in London in May and June with a view to the formation of a Standing Conference to meet at regular intervals and discuss and advise upon matters of general interest to the West Indies. The Windward Islands were represented by Lieutenant-Colonel Moorhouse, K.B.E., C.M.G., D.S.O., and the Honourable G. Lafitte.

The Colony was visited during the early part of the year by a Parliamentary delegation under the leadership of Viscount Peel.

His Excellency the Governor, Sir Frederick Seton James, K.B.E., C.M.G., paid a brief visit in February. The Administrator, Mr. R. Walter, C.M.G., was on leave from 14th July till the end of the year. During his absence the Government was administered by His Honour the Chief Justice, Mr. J. S. Rae, except for the period 23rd September till 3rd October, when the administration was taken over by the Honourable N. H. Turton, Attorney-General.

III.—CLIMATE.

St. Vincent is one of the healthiest of all the West Indian islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, and the wet season from June to December. The coolest months are December to April.

The temperature throughout the year varied from 78.6° F. to 82.1° F. The highest was in May, and the lowest in February. Meteorological records for 1926 show that the mean monthly temperature was 80.7° F., as against 79.5° F. in 1925.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea-level, was 78.86 inches, as compared with 90.98 inches in 1925. Rain fell on 283 days, and the greatest fall for one day was 1.84 on the 22nd July.

The rainfall at the Botanic Gardens, only a mile away from the Experimental Station but some 200 feet higher up, was 79.17 inches. The average at these Gardens for the last 33 years was 101.23 inches, so that the rainfall during 1926 was 22.37 inches below the average.

The reading of the barometer, corrected for instrumental error, elevation, and temperature, ranged from 30.189 inches on the 21st February to 29,821 inches on the 16th November.

IV.—FINANCIAL.

General Revenue and Expenditure.

The financial position of the Colony on the 31st December, 1926, was :—

	£
Net surplus at 1st January, 1926	20,548
Revenue in 1926	60,243
	80,791
Expenditure in 1926	59,282
Net surplus at 31st December, 1926	£21,509

The net local revenue and expenditure in the last three years were :—

	Local Revenue. £	*Expenditure against Local Revenue.* £
1924	60,893	53,887
1925	62,450	53,190
1926	60,243	59,282

The principal items of revenue in the last three years were :—

	1924. £	*1925.* £	*1926.* £
Import duties	25,869	26,379	26,683
Export duties	3,032	2,982	2,959
Excise duty on rum	2,938	5,816	6,479
Land and house tax	5,882	6,337	4,124
Income tax	3,947	4,504	3,014
Liquor trade duty	2,934	2,736	3,013
Postage stamps	2,334	1,732	1,774

The unexpended balance of £25,000 of the Eruption Relief Fund, made up from donations from the public in England and elsewhere at the time of the eruptions in the Soufriere volcano in 1902-3,

is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to the general revenue and is applied to the relief of the poor. This amount, together with the Colony's Reserve Fund of £11,000, offers excellent security both for elemental disasters and economic depression. The amount to the credit of the Public Property Insurance Fund which was started during the year stood at £2,042 at the close of the year.

Public Debt.

The Public Debt at 31st December, 1926, was £9,730, of which £1,280 is a loan raised by the town of Kingstown in 1914, for which the Colony is responsible only in case of default. The accumulated sinking funds provided for its redemption stood at £5,494 on the 31st December, 1926, of which £4,631 was in respect of Government loans, and £863 of the Kingstown Board Loan.

Currency.

British and American gold, five-dollar notes of Barclays Bank (Dominion, Colonial and Overseas), and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling, and commercial and banking accounts in dollars and cents.

V.—VITAL STATISTICS.

The population of the Colony in 1921 was 44,447 according to the census taken in that year. The population on 31st December, 1926, was estimated by the Registrar-General at 49,751 persons.

The following table gives the births, deaths and marriages in the past two years :—

	1925.	1926.
Births	1,946	1,963
Males	1,005	968
Females	941	995
Birth-rate per 1,000 of the estimated population	43.13	39.46
Deaths	876	966
Death-rate per 1,000	18.18	19.42
Marriages	136	153
Marriage-rate per 1,000	2.82	3.08

Illegitimate births numbered 1,418, or 72.2 per cent. of the total number of all births.

Still-births numbered 108, of which 88 were illegitimate.

VI.—ANNUAL PROGRESS OF TRADE, AGRICULTURE, AND INDUSTRIES.

The total values of imports and exports in 1925 and 1926 were :—

Year.	*Imports.*	*Exports.*	*Total trade.*
	£	£	£
1925	211,907	232,432	444,339
1926	203,606	162,909	366,515

Produce of the Colony to the value of £158,825 was exported in 1926, as against £229,941 in 1925.

Imports.

The following table shows the value of imports for the past two years :—

	1925.	1926.
	£	£
United Kingdom	75,914	67,425
Canada	46,108	45,373
British West Indies	15,180	10,896
India	646	3,476
Newfoundland	2,851	6,071
Other British Colonies	7,271	3,878
United States of America ...	46,302	46,737
France	1,736	2,845
Denmark	790	450
Holland	706	675
Foreign West Indies	669	550
Germany	1,505	1,875
Other countries	3,547	3,266
Unclassified, including Parcel Post	8,682	10,089
	£211,907	£203,606

The following are the percentages, in the last two years, of the principal countries from which imported articles are obtained :—

	1925.	1926.
United Kingdom	35.82	33.12
United States of America... ...	21.85	22.95
Canada	21.76	22.28
All other countries	20.57	21.65

The following is a summary of the imports for the year :—

	£
Food, drink, and tobacco	71,423
Articles wholly or mainly manufactured ...	102,521
Raw materials and articles mainly unmanufactured	19,402
Miscellaneous and unclassified	10,260
	£203,606

Exports.

The destinations of the exports of the produce of the Colony in 1925 and 1926 were as follows :—

	1925.	1926.
	£	£
United Kingdom	167,116	92,492
Canada	19,149	10,992
British West Indies	27,744	32,716
British Guiana	1,306	649
United States of America ...	14,136	20,613
Other countries	490	1,363
	£229,941	£158,825

The principal products exported were :—

	1925.	1926.
	£	£
Arrowroot	125,078	45,807
Cotton :—		
Sea Island	57,655	63,175
Marie Galante	464	1,514
Seed cotton, Marie Galante	1,047	468
Cocoa	2,345	2,461
Syrup and molasses	19,672	16,523
Cassava starch	4,160	4,077
Copra	5,512	9,826
Peanuts	3,794	2,370
Animals	3,986	5,243
Cotton seed	53	398
Cotton-seed oil	1	583
Whale oil	1	148
Vegetables, fresh	2,581	2,107
Peas	866	476
Corn	627	388

Agricultural Industries.

The Government Cotton Ginnery continued to buy seed cotton on profit-sharing terms, but confined its activities to Sea Island cotton only, as was the case in 1925.

The following quantities were dealt with in the seasons 1925-26 and 1926-27 :—

	1925-26.	1926-27.
	lb.	*lb.*
Sea Island seed cotton ...	131,520	451,393

Corn was purchased on the co-operative system to the following extent during the seasons 1925-26 and 1926-27 :—

	1925-26.	1926-27.
	lb.	*lb.*
Shelled corn	100,850	99,929
Cob corn	36,138	37,933

Cotton.—The acreage planted in cotton again showed an increase over past years. For the 1925-26 season 4,989 acres were planted with Sea Island cotton and 1,359 acres with Marie Galante, while for the 1926-27 season 6,156 acres were planted with Sea Island and 1,300 acres with Marie Galante. The acreage planted with Sea Island cotton in the 1926-27 season has only been exceeded on one occasion, viz., 1920-21.

The number of peasant proprietors of Sea Island cotton increased from 2,515 in the 1925-26 season to 3,360 in 1926-27.

The total amount of Sea Island cotton lint produced during the season under review was 507,240 lb., or at the rate of 82 lb. per acre—a considerable reduction on the previous three seasons, due largely to attacks of the cotton caterpillar.

On the whole the damage done by the pink bollworm, except on one estate, was not worse than in previous years. Planters were careful to clean up their fields during the close season and this, combined with the vigilance of the Agricultural Department, contributed to keep the pest in check.

A total of 589,499 lb. of Sea Island cotton was exported in 1926, value £63,175, as against 473,219 lb., value £57,655, in 1925.

The export of Marie Galante cotton was 30,275 lb., of the value of £1,514, as against 9,673 lb., of the value of £464, in 1925.

Marie Galante seed cotton to the amount of 56,092 lb., value £468, was exported in 1926, as against 100,468 lb., value £1,047, in 1925.

Cotton seed is used extensively as a fertiliser.

Syrup and Molasses.—337,099 gallons, of the value of £16,523, were exported in 1926, as against 268,118 gallons, of the value of £19,672, in the previous year.

Rum.—28,286.7 proof gallons were manufactured in the Colony, showing an increase of 1,489.6 proof gallons on the previous year.

Arrowroot.—There was no fixing of prices in the London market by the St. Vincent Arrowroot Growers' and Exporters' Association during the year 1926, but large quantities remained unsold. 3,291,553 lb., of the value of £45,807, were exported as compared with 3,190,412 lb., of the value of £125,078, in 1925. The British market is overstocked with this valuable foodstuff and additional markets are required. It is satisfactory to note that the export of this commodity to the United States of America increased from 649,977 lb. in 1925 to 914,379 lb. in 1926. Holland also was an importer and, in view of the great importance of finding new and wider markets for this stuff, this is good news.

Peanuts.—190,978 lb., value £2,370, were exported, as against 273,039 lb., value £3,794, in 1925.

Copra.—The exports of copra continue to increase. The figures for the past seven years are as follows :—

Year.	*Quantity Exported.* lb.
1920	22,644
1921	89,005
1922	222,593
1923	356,626
1924	645,973
1925	661,309
1926	762,563

In view of the flat state of the markets for cotton and arrowroot it is satisfactory to note the progress of the copra industry.

There are twenty-one Agricultural Credit Co-operative Societies in the Colony; several Societies are, however, not functioning. The amount of money loaned in 1926 was £1,586, compared with £1,460 in 1925. A few Societies failed to repay in 1926 debts contracted in earlier years. All loans contracted in 1925 were repaid in 1926.

Shipping.

The number of vessels entered was 353, of 204,743 tons; and 357, of 211,393 tons, cleared. Three vessels of sixty-three tons were registered during the year.

VII.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1925 and 1926 :—

	1925.	1926.
Number of schools	27	28
Number of pupils on roll at 31st December	4,884	5,407
Average attendance	2,648	2,892
Government Grant-in-aid ...	£2,939	£3,335
Cost per head in average attendance	£1.2.2	£1.3.0¾

Eleven of the twenty-eight regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide, and are responsible for the upkeep of, the buildings of the other seventeen schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools are paid from public funds.

There were eight other small schools of a primary education standard, known as "Aided Schools", which were assisted by small Government grants to the extent of £114.

The Government maintains in Kingstown a secondary school for the education of boys—the Grammar School, and one for girls—the Girls' High School. The average attendance in 1926 was 70 boys and 50 girls, as compared with 74 boys and 43 girls in 1925. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

There is an Island Scholarship awarded biennially under Ordinance No. 41 of 1921, tenable for not less than three and not more than five years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

The first Island Scholar to be appointed, Mr. P. E. McI. Clarke, left the Colony in September, 1923, to study medicine at King's College, London. Satisfactory reports have been received as to his progress in his studies.

A second scholar, Mr. A. B. Brereton, was appointed in 1924 and left during 1925 to take up his medical studies at Edinburgh University, and a third scholar, Mr. J. P. E. Cropper, was appointed in 1926 but had not taken up his studies at a University at the close of the year.

Provision exists for the Town Boards of Kingstown and Georgetown to provide sums towards scholarships and exhibitions at the secondary schools on lines similar to the Government exhibitions.

VIII.—HOSPITALS.

The following hospital accommodation is provided :—Colonial Hospital, Kingstown, 78 beds (including 4 beds for private paying patients); District Casualty Hospital, Georgetown, 4 beds; and District Casualty Hospital, Chateaubelair, 4 beds.

IX.—BANKS.

Government Savings Bank.—The following is a comparative statement of the operations of the Government Savings Bank during the past two years :—

Year.	*Number of depositors at 31st December.*	*Amount of deposits.*	*Amount of withdrawals.*	*Balance to credit of depositors at 31st December, including interest capitalized.*
		£	£	£
1925 ...	737	2,968	2,665	14,642
1926 ...	729	1,945	2,427	14,561

The interest capitalized during the year amounted to £402.

The Savings Bank funds invested at the 31st December, 1926, amounted to £13,746. Interest at 3 per cent. is paid on deposits.

Barclays Bank (Dominion, Colonial and Overseas).—There is a branch of Barclays Bank (Dominion, Colonial and Overseas), formerly the Colonial Bank, with a Savings Bank Department.

X.—COMMUNICATIONS.

External.

Owing to the rejection of the tender of the Royal Mail Steam Packet Company for the shipping service contemplated by the Canada-West Indies Trade Agreement of 1925, the fortnightly service hitherto maintained by the Company was reduced to a monthly service during the year under review and the Colony suffered greatly from lack of regular passenger steamship communication. The Harrison, the Canadian Merchant Marine, and the Columbian Lines of steamers continued to call at uncertain intervals with and for cargo and mails. Mails and cargo were also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, where there is direct communication by steamers with the United Kingdom and the United States.

Internal.

The Post Office does a considerable amount of money order and parcels business (including the cash-on-delivery system with the United Kingdom) with the United Kingdom, United States, Canada, and other countries.

The central office is in Kingstown, with seventeen district offices. Mails are sent to the windward side of the Island by motor-car, by motor-boat to the leeward side, and to the Grenadines by sailing vessels.

There is no inland telegraph service. The West India and Panama Telegraph Company maintained their station at St. Vincent.

The wireless station for the new telegraph system authorised by the West Indian Islands (Telegraph) Act, 1924, of the Imperial Parliament, which was erected by the Radio Communication Company and opened in March, 1925, is in regular operation and has given very satisfactory service.

The Government maintains a telephone system which connects Kingstown with exchanges in the districts and with residences and places of business. There were 219 services and 188 miles of line in use.

Introduction.

GEOGRAPHICAL.

Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British island to the mainland of South America with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad and between the parallels of 12° 30′ and 11° 58′ North latitude and 61° 20′ and 61° 35′ West longitude. The Island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but, including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coastline is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, land-locked and deep watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the Island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the Island 1,740 feet above sea-level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

HISTORICAL.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795-96, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

CLIMATE.

The climate from December to end of April may be described as good, as during that period the heat is tempered by the prevailing trade winds. In the autumn from July to end of October, there is great humidity and extreme heat, with little variation between night and day. During this period the climate is extremely debilitating, although not exactly unhealthy. The highest temperature in 1927 was 92 degrees on 24th September and 6th October, and the lowest 65 degrees on 19th March. The mean of maximum temperatures was 85 degrees and the mean of minimum 74 degrees. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches. In the mountainous centre it approaches 140 inches. At St. George's, midway between the two, the rainfall in 1927 was 76.79 inches. Over the past 30 years the average at St. George's has been 72.79 inches.

LANGUAGE.

The only language spoken is English. A small and decreasing number of agricultural labourers in the country districts speak a very corrupt patois of English and French, but all understand and speak English.

Currency.

The currency is the same as in Great Britain, the monetary units being the same. Silver, however, is legal tender without limit, and there are also in circulation bank notes of Barclays Bank and the Royal Bank of Canada, of five dollars denomination. One or two of the business houses keep their accounts in dollars and cents, but the Government accounts are in sterling.

Weights and Measures.

Weights and measures are of the Imperial standard. An exception to this has arisen recently in connection with motor spirit, which is sold by the wine or American gallon.

1.—General.

The continuance of high prices for the Colony's staple products of cocoa, nutmegs, and mace has added another prosperous year to Grenada's record, a result to which fine weather conditions and satisfactory crops also contributed. The cocoa shipments in the crop year ended 30th September, 1927, amounted to 54,296 bags (of 180 lb.) as compared with 47,857 bags in the same period of the preceding year. The spice crops were also good and it may be of interest to note that Grenada produces one-third of the world's supply of nutmegs and mace. The quantities exported last year were 21,238 cwt. of nutmegs and 3,733 cwt. of its derivative, mace.

The wealth arising from these prosperous conditions is widely distributed, for Grenada is an Island of peasant proprietors who number 15,211 out of a total population of 73,319. As all parts of the Island have benefited by the increased circulation of money, the signs of prosperity are everywhere apparent in the number of motor-cars and motor 'buses that ply on the roads, in the attendance at numerous race meetings, and the general appearance and dress of the inhabitants.

The prosperity is reflected also in the financial position of the Government, and in place of the deficit which existed a few years ago the Colony had at the end of 1927 surplus assets amounting to £90,869. Of this amount £37,188 is invested towards forming a reserve fund of £50,000 as a special reserve to be used only in the time of serious emergency.

Coincident with the prudent building up of assets, the Government has proceeded with the execution of several important public works, which are detailed under Section VII of this report.

In his address introducing the Estimates in Legislative Council, His Excellency announced, among other schemes of Government policy, the intended formation of a Central Water Authority in connection with the scheme for improvement and extension of water supplies (referred to in last year's report) which had now been practically completed.

The Central Water Authority would take over the existing water works and be responsible to the Boards for the supply of water up to its delivery from the tap, the Boards on their part continuing as formerly to assess the water rates, fixing the rates at such figures as they consider necessary to meet the contribution to the Central Water Authority, and any surplus arising from the water rates would go to the Boards' general revenue. A competent Water Engineer would serve as the executive officer of the Authority, on which each of the District Boards would be directly represented. The St. Andrew's District Board are also desirous of constructing a covered market in the town of Grenville, and of developing and improving the town, and it has been decided to meet the cost of this scheme, together with that of the water extension, by the raising of a loan of £10,000 through the Crown Agents for the Colonies.

New market buildings in St. George's and Gouyave are also under consideration.

The oiling of the main roads and of the principal streets in the town of St. George's has greatly improved matters in regard to health and sanitation. The town is practically free from dust, and for a tropical town of its size has a clean appearance which elicits praise from visitors.

The scheme for electric light in St. George's area and reconstruction of the telephone system throughout the Colony is being proceeded with. The necessary loan of £40,000 was raised through the Crown Agents for the Colonies under the inter-colonial scheme of loans. The proposal to utilise the Annandale River as a source of power has, however, been abandoned in consequence of difficuties which arose in connection with acquisition of the necessary land, and on the advice of the Consulting Engineers it has been decided to proceed with the alternative plan of an internal combustion engine scheme, to be supplemented hereafter if necessary by hydro-electric power. This scheme involves less capital outlay, but necessitates at first a higher charge for supply of light, but it is not expected that the charge per unit will exceed the rate now being paid in other West Indian islands.

His Excellency also announced that it was his intention to appoint a Committee to advise as to the manner in which Government grants-in-aid to the Denominations on behalf of education should be adjusted in the future.

The Government had taken over the Queen's Park during the past year, and it was hoped that a start would soon be made with the new Pavilion, towards the cost of which the Government were to make a contribution of £1,000.

II.—Finance.

Revenue.

The revenue for the year amounted to £155,508, being the highest on record.

Import duties continue to be the chief source of revenue, and the following table shows the proportion of revenue from that and other sources :—

Year.	*Import Duties.*	*Export duties, Income Tax and other direct taxation.*	*Other Sources.*
	£	£	£
1923	37,709	45,119	20,995
1924	50,116	47,206	20,131
1925	67,342	59,454	19,422
1926	62,471	64,704	21,271
1927	68,523	66,473	20,512

Expenditure.

The expenditure was £131,413, being less than the revenue by £24,095.

The following table gives a comparison of revenue and expenditure for the past five years :—

Year.	*Revenue.*	*Expenditure.*	*Surplus.*
	£	£	£
1923	103,823	113,095	—
1924	117,453	106,003	11,450
1925	146,218	112,467	33,751
1926	148,447	119,001	29,446
1927	155,508	131,413	24,095

No changes took place during the year in the method of raising revenue, and the only alterations in rates of taxation were slight increases in the general rates of import duty on cement, cocoa, cordage, fish, and dried fruits and nuts, in order to give an increased Empire preference on these articles, in accordance with certain recommendations under the Canada-West Indies Trade Agreement.

Assets and Liabilities.

The excess of assets over liabilities at 31st December, 1927, was £90,869, of which £37,188 is invested as a reserve fund. The other ordinary surplus assets of £53,681 comprise the following items :—

	£
Loans to District Boards	15,771
Public Works Stores and Colony Drug Stores ...	5,941
Land Settlement Advances	536
	£22,248

leaving approximately £31,433 as liquid or readily available assets.

PUBLIC LOANS.

The particulars of public loans outstanding at 31st December, 1927, and of the accumulated sinking funds may be seen from the following tables :—

Description of Loan.	*Legal Authority.*	*Amount.*	*Annual Sinking Fund Contribution.*	*Accumulated Sinking Funds.*			*Present yield on Securities.*
				Cost Price.	*Nominal Value.*	*Present Market Value.*	
		£	£	£	£	£	£
4 per cent. Inscribed Stock.	Ordinance No. 15 of 1891.	123,670	1,237	83,955	91,394	79,830	3,680
Local Loan, 1917.	Ordinance No. 12 of 1917.	100,000	1,500*	15,879	16,036	16,368	816
Electric Lighting and Telephone Reconstruction Loan.	Ordinance No. 13 of 1927.	£40,719	9 4	Contribution to Sinking Fund to commence in October, 1930.	Nil.	—	—

The first drawings in connection with redemption of the Local Loan, 1917, took place on 28th January, 1928, when debentures amounting to £18,040 were drawn. These will be paid off on 15th June, 1928.

In addition to the increased sinking fund contribution of £1,790 in respect of this Loan, the interest on the redeemed debentures will continue to be added to the sinking fund, this being necessary to effect total redemption by the date fixed by the Ordinance, namely, 1947. Annual drawings in connection with this Loan will continue to take place up to the combined amount of the sinking fund contribution and interest on the redeemed debentures.

*Increased to £1,790 from 1st January, 1928.

The particulars of the terms or periods for redemption of the above mentioned loans are as follows :—

4 per cent. Inscribed Stock—To be paid off on the 15th May, 1917–42, by half-yearly investments of a sum equal to one per cent. per annum of the total amount issued.

Local Loan, 1917—Redeemable on 15th December, 1947.

Electric Lighting and Telephone Reconstruction Loan—Redeemable 15th April, 1959.

III.—Production.

AGRICULTURE.

Cocoa.—This continues to be the principal crop of the Colony.

The following table shows the quantity exported annually, and the value, during the last 10 years :—

Year.	*Quantity.*	*Value.*
	cwt.	£
1918	135,572	519,365
1919	99,368	539,740
1920	81,732	466,658
1921	87,421	185,193
1922	72,904	167,056
1923	77,783	155,883
1924	85,394	201,547
1925	73,216	197,231
1926	83,384	223,290
1927	100,478	305,640

The main causes of the decrease in production after 1921 have been given by experts as follows :—

(*a*) Destruction of plantations by the hurricane in September, 1921.

(*b*) Unfavourable market prices in the period from 1923 to 1925.

(*c*) The interplanting of nutmeg trees on cocoa cultivations.

The necessity for accurate costing in connection with cocoa cultivation has been realised, and has undoubtedly led to the discovery that certain lands were unsuitable for cocoa and were not yielding a profit under that crop except in years of abnormally high prices. As periods of exceptional prices occur only rarely, the reduction in crop volume by the cutting out of these areas has not on the average resulted in reduced net profit to the estates.

Nutmegs.—The area under cultivation has been steadily extended for many years, and the greatly increased market prices of recent years have brought this product into close rivalry with that of cocoa. The particulars of export for the past ten years may be seen from the following table :—

Year.	*Quantity.*	*Value.*
	cwt.	£
1918	23,053	103,417
1919	15,354	54,281
1920	14,604	59,448
1921	18,023	34,007
1922	22,542	59,959
1923	21,611	55,017
1924	19,369	95,321
1925	21,762	145,861
1926	22,702	127,000
1927	21,238	103,444

Mace.—The quantity of mace exported in 1927 was 3,733 cwt., of the value of £59,145.

Cotton.—Cotton is cultivated in Carriacou where a slight extension of the cultivation on the larger estates has recently taken place. The Regulations governing the control of the pink boll worm have been rigidly enforced, and it is reported that no pink boll worm was in evidence at any time during the reaping or ginning season.

The particulars of exports of cotton during the past five years are as follows :—

Year.	*Quantity* *cwt.*	*Value.* £
1923	2,950	12,904
1924	2,842	15,180
1925	3,252	16,500
1926	3,159	14,040
1927	3,788	15,890

Sugar.—Attempts have been made from time to time to stimulate the production of sugar, and for the past three years the protective duty has been increased to 1d. per lb., yet, notwithstanding this very material help, it has not been found practicable to grow sufficient sugar for the local demand. Importations of raw sugar last year amounted to 1,719,583 lb., of the value of £14,280.

Various other crops are grown, but only to a small extent. The area of fertile land in places accessible for profitable cultivation is limited, and although the cultivation of other crops, such as grape fruit, for instance, could be extended, their development beyond a certain limit could only be at the expense of existing profitable cultivations.

Rum is manufactured on twelve estates, the quantity delivered for home consumption last year being 47,077 proof gallons. This was insufficient for the demand, and 2,448 proof gallons were imported in the same period, principally from Barbados.

Ice is manufactured at a factory in St. George's subsidised by Government.

FORESTRY.

A forest reserve of 2,485 acres is established at Grand Etang near the centre of the Island, and by legislation the mountain ridges are protected from denudation. The areas are too small and too inaccessible for growth with a view to profit, their main value and importance consisting in preserving the sources of water supply.

FISHERIES.

There are various fishing grounds adjacent to the coasts, and supplies of fresh fish are fairly constant. The fishermen do not venture far from the coast, and there are no surplus quantities available for smoking or curing.

The Whaling Industry which was established in 1925 on Glover Island ceased operations after 1926, and no whales were caught and no whale oil was exported in 1927.

Mining.

There are no mines of any kind.

IV.—Trade and Economics.

The total trade, import and export, amounted in value to £922,140, the value of imports being £415,607 and that of exports £506,533. The apparent trade balance in favour of the Colony was £90,926.

Imports.

The following table shows the principal articles imported, according to value, and a comparison is given with the values imported in the previous year :—

Article.	*Value, 1927.*	*Value, 1926.*	*Increase or decrease over 1926.*	
			Increase.	*Decrease.*
	£	£	£	£
Flour	46,273	47,582	—	1,309
Cotton piece-goods	32,071	39,794	—	7,723
Fish—Dried	14,915	13,904	1,011	—
Sugar—unrefined	14,280	9,251	5,029	—
Rice	12,314	10,386	1,928	—
Boots and shoes	10,112	7,850	2,262	—
Motor-cars	10,086	14 439	2,994	—
Motor parts	7,347			
Motor Spirits	9,203	8,205	998	—
Wood, etc.—unmanufactured ...	8,881	22,739	—	13,858
Manures	8,559	4,004	4,555	—
Kerosene Oil	7,873	7,007	866	—
Biscuits, Bread, &c.	6,547	5,774	773	—

Notes re changes of trade.—There has been no radical change in the nature of trade or of sources of supply. The increased importations of various articles are due to the present prosperity of the Island. The importation of lumber in 1927 was normal, there being an unusual quantity imported in 1926 as the result of destruction of a lumber yard by fire.

The sources of supply of imports are shown below :—

	£
United Kingdom...	146,159
United States of America	72,553
Canada	96,062
Other British Possessions	71,473
Foreign Countries	29,360

EXPORTS.

The exports, amounting in value to £506,533 (of which £495,701 represented the value of local products and £10,832 of re-exports) consisted of the following :—

	£
Cocoa, raw	305,640
Cotton, raw	15,890
Cotton seed	2,960
Spices, nutmegs	103,444
Mace	59,145

The direction of the export trade may be seen from the following table :—

	£
United Kingdom...	196,346
United States of America	241,985
Canada	42,044
Other British Possessions	17,578
Other Foreign Countries	8,580

It is observable that a greater quantity of the Colony's staple products (with the exception of cotton) continues to go to the United States of America than to the United Kingdom, the figures being as follows :—

	United States of America.		*United Kingdom.*	
	cwt.	£	*cwt.*	£
Cocoa, raw ...	48,522	147,970	38,834	117,785
Nutmegs... ...	14,519	70,070	4,956	24,390
Mace	1,379	21,780	2,144	34,260

The duty in respect of exports amounted to £14,076, as compared with £11,061 in 1926. The products in respect of which these amounts were collected were :—

	1927.	1926.
	£	£
Cocoa	9,901	5,668
Cotton, raw	204	316
Cotton seed	228	192
Nutmegs	2,087	3,626
Mace	1,656	901
Whale Oil	nil	337
Whale manure	—	21

The duties are on graded scales according to market prices in London and New York, and the increase under the head of cocoa was due to a larger crop and better prices than in the previous year.

Other articles of export, of comparatively small value, included bananas and other fruit, lime juice, salt, coconuts and copra, hides and skins.

V.—Communications.

(i) By Sea.

The Canadian Government Mercantile Marine maintains a monthly passenger service between Halifax and St. John and the West Indies, with an alternate fortnightly cargo service. Steamers of the Furness Withy Line from New York call at intervals of about ten to fourteen days.

Direct communication with London is maintained monthly by the passenger steamers of the Harrison Line, and cargo steamers of this Company pay intermediate calls.

There is frequent communication with Trinidad and Barbados by sailing vessels as well as by steamers of the companies above mentioned.

A coasting service by daily motor-boat, with a call once a week to Carriacou, is subsidised by Government.

(ii) By Cable and Wireless.

The Colony is linked up with other parts of the world by the cable line of the West India and Panama Telegraph Company.

A wireless station worked by the Pacific Cable Board, under subsidy, is established in St. George's and communicates with Barbados.

A subsidiary wireless station, erected by the Government, communicating with Grenada has also been installed at Carriacou.

(iii) By Land.

There is no inland telegraph service.

A telephone service worked by Government has been in existence for many years. The total number of instruments in use last year was 771, there being an increase of 71 subscribers during the year. There are six exchanges and subscribers have the right of communication throughout without trunk-line charges. The revenue amounted to £4,289 7s. 1d. and expenditure to £3,105 8s. 6d.

The present system—an earth return circuit—has reached its limit of usefulness, and reconstruction to a more modern system is now being undertaken.

There is a good system of roads and bridges throughout the Colony, there being 148 miles of main roads and 301 miles of by-ways. All are suitable for motor traffic, and several miles of the main roads are oiled. Six motor road rollers are in constant use in road maintenance and repairs.

VI.—Justice, Police and Prisons.

(i) Justice.

There were 1,859 convictions during the year 1927, 1,841 in the summary courts and 18 in the Supreme Court, as compared with an average during the three preceding years of 1,850 summary convictions and 22 convictions on indictment.

Since the year 1924, when there was the considerable number of 305 convictions for praedial larceny, there has been a steady decrease in the number of convictions for this offence. In 1925 the number of such convictions was 259, in 1926 the number was 190, and in the present year 146. The continuous decrease is probably due to the increased general prosperity of the Colony since 1924.

As is usually the case in this Colony the occurrence of the more serious forms of crime was rare. There was no conviction for homicide or for an offence against property with violence to the person. A single case of rape occurred.

(ii) Police.

The fixed establishment consists of 1 Officer-in-Command, 1 Inspector, and 88 non-commissioned officers and men.

Rural Constables to the number of 225 were also on the roll on 31st December, 1927. These Constables are only employed on special occasions.

All ranks were trained in musketry and fired a modified course with satisfactory results.

A fire brigade is under the Police and was considerably improved last year by the acquisition of a motor fire truck and duplicate equipment of hose and standpipes.

A number of chemical fire extinguishers was obtained and installed in the various Government institutions and buildings.

The Government Band is also under the Police and consists of a Bandmaster and twelve bandsmen. The conversion of the band into a Police Band is being undertaken, and at present five of the Bandsmen are in the Police Force, and several Constables are being taught with a view to becoming bandsmen.

(iii) Prisons.

The number of prisoners in custody at the beginning of the year was 34, of whom 27 were males and 7 females.

There were 166 admissions during the year, 126 being males and 40 females.

The daily average number of prisoners was 28 in the case of males and 6.6 in the case of females.

The following table shows the number of recommitals on conviction for the year :—

	Once.	*Twice.*	*Three or more.*
Males	14	7	40
Females	3	4	12
	17	11	52

Religious services were carried on regularly throughout the year by the Anglican and Roman Catholic ministers.

The behaviour of the prisoners was good, and there were only two cases of corporal punishment.

The health of the prisoners was satisfactory. The daily average on the sick list was 0.7 males and 0.6 females. One male and one female were transferred to the Colony Hospital, and one female was treated in the Prison Infirmary. There were no deaths.

In regard to labour, prisoners were employed at stone breaking, baking, preparing cocoa, and tailoring within the prison walls, and gangs were employed outside at clearing and cultivating lands and repairing roads.

The prison is now combined with the Police Department and the arrangement under the present head is working satisfactorily.

VII.—Public Works.

The public works of principal importance undertaken during the year consisted of the following :—

(*a*) Commencement of bridge over St. John's River at Queen's Park.

(*b*) Construction of a residence for the Commissioner, Carriacou.

(*c*) Improvement of water supplies in Carriacou.

(*d*) Construction of a Leper Settlement.

(*e*) Improvement of the Colony Hospital, including interior painting of the main building, extension of the operating theatre, and Nurses' Hostel.

(*f*) Construction of a public bathing house at Grand Anse.

(*g*) Construction of a boat shelter in St. George's Harbour.

(*h*) Continuation of improvement and extension of water works and supplies throughout the Colony.

(*i*) Continuation of draining and filling up of low-lying areas in Queen's Park.

(*j*) Preliminary work in connection with the reconstruction of the telephone system and electric light scheme.

VIII.—Public Health.

The year 1927 was a healthy one, there being no serious outbreak of infectious disease, while there was a marked decrease in infantile deaths.

There was a period of unusually high temperature in the autumn, the unusual height of 92° F. in the shade being recorded on two days. The lowest temperature was 65°, recorded on 19th March.

The deaths numbered 1,147, and the death-rate per 1,000 was 15.6, the lowest rate so far recorded. In 1926 it was 20.3, and in the previous year 16.5

The infantile death-rate per 100 births of infants dying under one year was 10.46.

The births numbered 2,294; of these 1,135 were boys and 1,159 girls. The birth-rate per 1,000 was 31.29.

Three hundred and fifty marriages were registered, being at the rate of 41.7 per thousand of the population.

Diarrhœa and enteritis caused 272 deaths (as against 400 in 1926) and the next principal cause of death was malaria which accounted for 87 deaths (as against 84 in 1926).

The estimated population at the 31st December, 1927, was 73,319.

A Leper Settlement was constructed last year, the site selected being a promontory on the south-west coast of St. George's parish, and the cost, inclusive of construction of roads and a water supply, was £1,500. Lepers are few in number (less than twenty) but segregation has proved difficult to enforce, and it is expected that by the provision of the Settlement leprosy will be eradicated from Grenada within a generation.

IX.—Educational Progress.

Dr. H. A. Baker, D.Sc., the Director of Education, who had been seconded last year was confirmed in the appointment of Geologist to the Newfoundland Government. During the entire year the duties of Director were performed by Mr. H. H. Pilgrim in conjunction with his own duties as Inspector of Schools.

Secondary.

Sixteen pupils from the Grenada Boys' School entered for the Cambridge Junior Local Examination, and 12 passed, 1 Honour and 1 Distinction being gained. Five pupils from this School also sat for the Cambridge School Certificate Examination, of whom 3 passed, 1 with Honours.

The successful candidates at the Cambridge Junior Local Examination from the Anglican Girls' School numbered 5 out of 7, and from the St. Joseph's Convent School 3 out of 7. One Distinction was gained by the Church of England High School.

Primary.

The number of primary schools is the same as last year, namely, 58, of which 10 were Government, 27 Roman Catholic, 14 Anglican, 5 Wesleyan, and 2 Presbyterian.

The total number of scholars on the roll at 31st December, 1927, was 12,605, and the average attendance was 7,638—60.5 per cent. of the number on roll.

The total expenditure by the Government on primary education for the year was £8,755. Excluding administration and inspection, the cost to Government per pupil in average attendance at Government schools was £1 5s. 7d. and at grant-in-aid schools £1 0s. 6d.

The Matriculation Examination of London University has now been made the standard for winning the Grenada Scholarship, which is now awarded biennially.

X.—Land and Survey.

Grenada is a Colony of small proprietors, the number of estates over 100 acres in extent being only 142.

The following table shows the number of small holdings of land according to the Tax Rolls for the year 1927.

Number of small holdings.

Total acreage.	*2½ acres and under.*	*Over 2½ to 5 acres.*	*Over 5 to 7 acres.*	*Over 7 to 10 acres.*	*Over 10 and under 100 acres.*	*Total.*
75,390	12,651	1,643	326	195	396	15,211

Land in possession of the Crown is of small area and consists principally of mountain ridges in forest, for preservation of the rainfall. The main portion is the Grand Etang Forest Reserve, to which frequent visits were made by the Crown Lands Superintendent and the boundary lines maintained.

There are no Crown lands available for settlement. Occasionally an estate is purchased by the Government for resale in small lots to peasants under convenient terms of payment spread over a number of years.

Only one survey was carried out by the Public Works Department during the year, in connection with the boundaries of Windsor, la Force, and Chantilly, under the Boundaries Settlement Ordinance.

XI.—Labour.

Labour chiefly consists of employment on the respective estates in the Colony and includes the following work :—

(*a*) Overseers who are employed to supervise and control the gangs;

(*b*) Drivers in personal charge of the gangs;

(*c*) Ordinary labourers, men and women, engaged on the actual details of work—working or ploughing the land, draining, weeding, cutlassing, pruning, manuring, etc., and reaping the produce.

Labour as in (*b*) and (*c*) above is also largely employed on the public roads of the Colony on breaking metal and general repair and surface oiling work.

The rates of pay would be approximately as follows :—

(*a*) £3 to £8 per month.

(*b*) 2s. to 4s. per day.

(*c*) Men, 1s. 2d. to 2s. per day; Women, 1s. to 1s. 4d. per day.

The daily rates of pay quoted above apply also to pay for " task " work and it is usually possible to undertake two " tasks " in a day.

Other labour includes masons, carpenters, mechanics, chauffeurs, bootmakers and the like. A fair number of masons and carpenters are more or less regularly employed by Government, and during the last two or three years there has been a reasonable amount of this class of work available for both under Government control and privately throughout the Colony, so much so that reliable mechanics of this class are exceedingly scarce. Quite a large number of chauffeurs are now employed in the Colony and a limited number of other mechanics are engaged in the motor shops and on other work connected with water works, pipe laying, etc.

The pay for these would be approximately as follows :—

Masons, carpenters and mechanics, 2s. to 7s. per day;
Chauffeurs, £3 to £5 per month.

Miscellaneous.

A United States Army Squadron of four amphibian planes visited Grenada on 7th April in the course of their Pan-American flight under the leadership of Major H. A. Dargue. They landed at the beach at Queen's Park and proceeded next day to St. Vincent. The landing arrangements were reported to be satisfactory.

THE EMPIRE'S AGRICULTURE

An historical event of importance in the development of the Empire's Agriculture took place towards the close of 1927. The foundations were, it is believed, then laid for the ultimate creation of a real and effective British agricultural commonwealth. The occasion was the Imperial Agricultural Research Conference held in Great Britain in October and November, 1927, which was attended by delegates of high standing from all countries in the Empire.

"The Report of the Imperial Agricultural Research Conference," just issued, contains a full account of the events leading up to the Conference, the recommendations (both in full and in summary form) there made and the views expressed by the highest authorities on agriculture in all quarters of the Empire. The recommendations deal with the following subjects:—The establishment of an Imperial chain of Agricultural Research Stations. The establishment of Imperial clearing houses of information. The recruitment, training and interchange of scientific workers in agriculture for the whole Empire. The action immediately necessary to secure co-operative work in such specialist subjects as Veterinary Science, Animal Nutrition and Genetics, Dairying, Soils and Fertilisers, Plant Breeding and Pathology, Fruit Growing, Entomology, Preservation and Transport, and Agricultural Economics.

The Report of 250 pages is issued at the specially low price of 1s. (with postage 1s. 5d.), in order that it may be within easy reach of all those affected.

Geographical.

The Island of St. Vincent, which is of volcanic origin, is popularly supposed to have been discovered by Columbus on the 22nd January, 1498. It is situated in 13° 10′ North Latitude, and 60° 57′ West Longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown, the capital of St. Vincent.

Historical.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possesson of it until 1627, when the King of England made a grant of the Island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was again declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the Island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the Island surrendered to the French, and by the Treaty of Versailles, in 1783, it was restored to Great Britain.

Language.

The language of the Colony is English.

Currency.

British and American gold, five-dollar notes of Barclays Bank (Dominion, Colonial and Overseas) and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling and commercial and banking accounts in dollars and cents. Imperial weights and measures are in use.

Climate.

St. Vincent is reputed to be one of the healthiest of all the West Indian Islands. The climate may be divided into two seasons, wet and dry; the dry season from January to May, and the wet season from June to December. The coolest months are December to April.

The temperature throughout 1927 varied from 78.2° F. to 82° F. The highest was in October and the lowest in February; the mean monthly temperature was 80.3° F. as against 80.7° F. in 1926.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea-level, was 98.45 inches in 1927, as compared with 78.86 inches in 1926. The greatest fall for one day was 5.28 inches on 22nd October.

The reading of the barometer, corrected for instrumental error, elevation and temperature, ranged from 30.167 on 11th July to 29.814 on 17th November, 1927.

I.—GENERAL.

There were no events of any outstanding political importance during the year under review and no constitutional changes.

His Excellency, Sir F. S. James, K.B.E., C.M.G., resided in the Colony for a month from 20th March till 23rd April.

II.—FINANCIAL.

The financial position of the Colony on the 31st December, 1927, was :—

	£
Net Surplus at 1st January, 1927	21,509
Revenue in 1927	56,469
	£77,978
Expenditure in 1927	61,564
Net Surplus at 31st December, 1927	£16,414

The revenue and expenditure for the last five years were as follows :—

	Revenue.	*Expenditure.*
	£	£
1923	52,031	48,394
1924	60,893	53,887
1925	62,450	53,190
1926	60,243	59,282
1927	56,469	61,564

The principal items of revenue in the last five years were :—

	1923.	*1924.*	*1925.*	*1926.*	*1927.*
	£	£	£	£	£
Import Duties ...	19,499	25,869	26,379	26,683	24,649
Export duties ...	3,073	3,032	2,982	2,959	2,587
Excise duty on rum ...	5,430	2,938	5,816	6,479	4,685
Land and House tax ...	5,892	5,882	6,337	4,124	3,442
Income Tax	2,044	3,947	4,504	3,014	2,480
Liquor trade duty ...	2,470	2,934	2,736	3,013	2,820
Postage stamps ...	1,588	2,334	1,732	1,774	1,875

The Public Debt of the Colony on the 1st January, 1927, was £9,730, of which £560 was redeemed during the year, thereby leaving the debt at the close of the year at £9,170, made up as follows :—

	£
The Public Works Loan, 1913	500
The Public Works Loan, 1914	900
*The Kingstown Board Loan, 1914	1,170
The Public Purposes Loan, 1915	1,400
The War Loan, 1916	2,000
The Windward Highway Loans, 1917, 1919 and 1920	3,200
	£9,170

The accumulated sinking funds provided for redemption of loans stood on the 31st December, 1927, at £5,788, of which £4,924 was in respect of Government loans and £864 in respect of the Kingstown Board loan.

The investments on behalf of the Loans Redemption Fund stood at the close of the year as follows :—

	£	s.	d.
Imperial Government National War Bonds 5 per cent.	1,152	12	9
War Loan Stock 5 per cent.	2,602	15	8
Westminster Bank	1,168	1	10
	£4,923	10	3

*The Colony is only responsible for redemption of this loan in case of default by the Kingstown Board.

The investments on behalf of the Kingstown Board Sinking Fund stood as follows :—

	£	s.	d.
Westminster Bank	103	12	3
Imperial Government National War Bonds 5 per cent.	760	18	4
	£864	10	7

The unexpended balance of £25,000 of the Eruption Relief Fund made up from donations from the public in England and elsewhere at the time of the eruptions in the Soufrière Volcano in 1902-1903, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to general revenue and applied to the relief of the poor. This amount, together with the Colony's Reserve Fund of £11,000, offers excellent security both for elemental disasters and economic depression.

The amount to the credit of the Public Property Insurance Fund which was started during the year 1926, stood at the close of the year 1927 at £2,238.

III.—PRODUCTION.

One of the striking features of St. Vincent agriculture is the variety of the different kinds of produce. St. Vincent does not keep all its eggs in one basket. Arrowroot, cassava starch, Sea Island cotton, Marie Galante cotton, sugar, syrup and molasses, peanuts, cocoa, copra—all these, as well as other minor articles figure in the export list.

Perhaps the most noticeable feature of the year was the falling off in export of Sea Island cotton, 446,274 lb., valued at £39,204, being exported as against 589,499 lb., valued at £63,175, in 1926.

On the other hand, there was a remarkable increase in the export of copra, which commodity appears to have a great future before it. The export has increased steadily from year to year since 1923, as the following figures show :—

Year.	*Quantity exported.* *lb.*	*Value.* £
1923	356,626	2,959
1924	645,973	5,430
1925	661,309	5,512
1926	762,563	9,826
1927	1,198,441	10,083

The area under cotton in St. Vincent and the Grenadines during the year amounted to 4,358 acres, showing a reduction as compared with the previous season of 2,792 acres under Sea Island cotton and a reputed reduction of 306 acres under Marie Galante.

During the season 1926-27 there were, in St. Vincent and Bequia, 3,055 peasant growers, with an acreage of 3,088 under Sea Island

cotton; during the season 1927-28 there were only 1,733 peasant growers, with 1,594 acres.

The year under review was dominated by anxiety as to the sale of outstanding and long-accumulated stocks of cotton in the United Kingdom, and the British Cotton Growing Association advocated a policy of curtailment of acreage under cultivation. St. Vincent made proposals to other cotton-growing islands to restrict the export of Sea Island cotton to 50 per cent. of the average for the last five years and to institute a system of export under licence, but in view of the replies it was felt to be undesirable to initiate legislation to restrict production or export. The situation was considerably relieved by the action of the Fine Spinners' Association towards the end of the year in agreeing to buy up all outstanding stocks (except the superfine) at 1*s*. 8*d*. per lb—a poor price but better than continual anxiety both for planters and for the Government which had advanced considerable sums of money to the Government Ginnery to purchase cotton on a co-operative basis, principally from peasants.

As regards arrowroot, in view of the large stocks remaining unsold in England it is satisfactory to note that increasing exports are being made to places other than the United Kingdom. The total amount exported was 3,195,478 lb., value £53,309; and of this amount the United States of America took 1,147,096 lb.—an increase of 232,717 lb. on the previous year, while Barbados took 273,549 lb., and Canada 260,018 lb. It is hoped that as time goes on Canada will absorb increasing quantities.

A very satisfactory feature of the year was the export of sugar, some 840,000 lb., valued at £6,947 being exported, whereas none at all had been exported in 1925 and 1926. Two estates in the Island recently erected new and improved sugar machinery. In addition to this, 171,063 gallons of syrup, valued at £10,459, were exported: but this export showed a considerable decrease on that of each of the last five years.

During the year under review 114 lb. of fibre manila hemp obtained from the abaca plant (*musa textilis*) were sent to the Imperial Institute for examination. The results were very favourable, showing that the Grade A sent from St. Vincent compares quite satisfactorily with the three commercial grades of manila hemp. It is too early to say whether the fibre can be produced here on a commercial basis, but it is hoped shortly to make a trial shipment for sale in London.

The question of building up a fruit and vegetable trade with Canada has occupied the attention of the Government and the Chamber of Agriculture and Commerce, but improved communication and considerable organization in methods of packing, grading, &c., will be necessary before such a trade can become an accomplished fact, and co-operation between the West Indian Islands will be essential.

The appended table shows the comparative amount of the annual exports of the principal commodities during the last five years :—

Articles.	1923.		1924.		1925.		1926.		1927.

IV.—TRADE AND ECONOMICS.

The total values of imports and exports for the last five years were :—

Year.	*Imports.*	*Exports.* *Island Produce.*	*Other.*	*Total.*
	£	£	£	£
1923	138,677	128,788	2,583	131,371
1924	160,028	150,811	51	150,862
1925	211,907	229,941	2,491	232,432
1926	203,606	158,420	4,489	162,909
1927	172,097	145,213	602	145,815

The following table shows the value of imports and countries of origin for the past five years :—

	1923.	*1924.*	*1925.*	*1926.*	*1927.*
	£	£	£	£	£
United Kingdom ...	41,147	51,834	75,914	67,425	55,812
Canada	40,862	40,686	46,108	45,373	40,540
British West Indies ...	7,736	12,641	15,180	10,896	12,789
India	1,080	869	646	3,476	1,229
Newfoundland	2,018	3,142	2,851	6,071	4,471
Ceylon	25	32	—	62	107
Other British Colonies ...	4,866	6,093	7,271	3,816	5,126

France	1,226	1,264	1,736	2,845	1,485
Denmark	8	543	790	450	774
Germany	1,057	1,335	1,505	1,875	1,836
Holland	486	553	706	675	582
Foreign West Indies ...	15	68	669	550	1,003
Other Countries	9,208	6,984	3,547	3,266	3,494
Unclassified, including Parcel Post.	—	—	8,682	10,089	6,186
	£138,677	£160,028	£211,907	£203,606	£172,097

The following is a summary of the imports for the last five years :—

	1923.	*1924.*	*1925.*	*1926.*	*1927.*
	£	£	£	£	£
Class I.—Food, drink and tobacco.	52,712	60,842	68,717	71,423	64,104
Class II.—Raw materials and articles mainly unmanufactured.	19,016	18,104	19,547	19,402	16,735
Class III.—Articles wholly or mainly manufactured.	59,323	74,080	114,777	102,521	84,954
Class IV.—Miscellaneous and unclassified.	7,626	7,002	8,866	10,260	6,304
	£138,677	£160,028	£211,907	£203,606	£172,097

In order to encourage the importation of British motor vehicles, legislation was passed during the year exempting from import duties motor bicycles, motor tricycles, motor-cars and parts thereof made wholly from British materials by British labour. Foreign-made vehicles of this nature pay an *ad valorem* duty of 15 per cent.

During the year nineteen motor-cars were imported, nine of which were admitted free of duty as British cars.

The following are the percentages in the last five years of the principal countries from which imported articles are obtained :—

	1923.	*1924.*	*1925.*	*1926.*	*1927.*
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
United Kingdom	29·67	32·39	35·82	33·12	32·43
United States of America	20·87	21·24	21·85	22·95	21·30
Canada	29·46	25·42	21·76	22·28	23·56
All other Countries ...	20·00	20·95	20·57	21·65	22·71

The following is a summary showing the destination and value of exports during the last five years :—

Country of destination.	*1923.* £	*1924.* £	*1925.* £	*1926.* £	*1927.* £
United Kingdom	73,270	84,521	167,116	92,576	68,452
Canada	19,223	18,368	19,149	10,992	10,276
Bermuda	45	91	132	221	305
British West Indies ...	32,745	39,061	30,079	36,716	35,619
British Guiana	3,541	1,101	1,306	649	747
United States of America	2,480	6,931	14,136	20,613	28,491
Other Countries	67	789	514	1,142	1,925

V —COMMUNICATIONS.

Shipping.

The number of vessels entered was 395, of 277,518 tons, and cleared was 395, of 277,400 tons. Four vessels of a total tonnage of 105 were registered during the year, three of which were built in the Colony.

A monthly passenger and mail service was maintained by the Canadian Government Merchant Marine during the year, and from time to time steamers of the Harrison and Columbian line paid calls.

The steamship service contemplated by the Canada-West Indies Trade Agreement of 1925 had not been provided at the close of the year under review.

Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, whence there is direct communication by sea to the United Kingdom and the United States of America.

Roads.

The road system of the Island consists of 34 miles of highway on the windward side, suitable for motor traffic, and 28 miles on the leeward side, about 15 miles of which are suitable for motor traffic.

The highway on the windward side is the main artery of traffic but on the leeward side the sea is the natural highway.

In addition to the highways there are some 280 miles of byways which act as feeders from the interior to the main roads.

Postal.

There is a central post office in Kingstown, the capital of the Island, and 17 offices in out-districts.

Mails are sent to the windward side of the Island by motor-car, to the leeward side by motor-boat, and to the Grenadines by sailing vessels.

There is no inland telegraph service. The West India and Panama Telegraph Company maintained their cable station throughout the year and there is a wireless station operated by the Pacific Cable Board as part of the All-British System authorised by the West Indian Islands (Telegraph) Act, 1924, of the Imperial Parliament.

Telephones.

The Government maintains a telephone system which connects Kingstown with exchanges in districts. There were 230 services and 188 miles of line in use.

VI.—JUSTICE, POLICE, AND PRISONS.

(a) Justice.

There was no sitting of the West Indian Court of Appeal in St. Vincent during the year.

Twenty-one criminal cases were tried by the Supreme Court and twenty-two convictions were obtained. The number of actions filed in the Supreme Court was 11. There were 8 appeals from Magistrates' decisions. The number of Causes filed in the Summary Jurisdiction of the Court was 65.

In the Magistrate's Court, District 1, the civil matters dealt with amounted to 717. 854 persons were charged in 1927, as against 687 in 1926. Fines collected amounted to £217, an increase of £75 on the preceding year.

In the Magistrate's Court, District 2, the civil matters dealt with amounted to 981. 1,367 persons were charged in 1927, as against 863 in 1926. Fines collected amounted to £229, as against £171 in 1926.

(b) Police.

The authorised strength of the Force remained at two officers, 52 other ranks, of whom four were permanently employed at the prison.

The general health of the Force was considerably better than in 1926.

Discipline was on the whole satisfactory.

Fire drill was carried out weekly and all hydrants and fire appliances regularly inspected.

CRIMINAL STATISTICS.

The table given below shows that, while during the last four years the number of cases taken up by the police have more than doubled, the number of cases in which no conviction was obtained has been very considerably reduced :—

	Number of cases.	*Number convicted or sent for trial.*	*Percentage of cases withdrawn or dismissed.*
1924	829	689	16·88
1925	1,304	1,090	16·41
1926	1,216	1,070	12·0
1927	1,679	1,514	9·82

The police recreation room and canteen, started in 1926, continued to run successfully during the year. The library has been increased to 82 volumes.

(c) Prisons.

The prison staff throughout the year consisted of :—

4 Police Constables, including the Non-Commissioned Office who is Keeper,
4 Warders, three of whom are skilled in trades,
1 Clerical Assistant,
1 Matron.

Total 10

At the beginning of the year the number of prisoners was 25, 23 males and 2 females. The total admissions during the year were 224, of whom 134 were males and 89 females, and 1 male juvenile.

The daily average was 26.55.

The highest number of prisoners at any time was 44—the lowest, 14.

The general health of the prisoners was good and conduct satisfactory. No floggings were administered.

The dietary of the prisoners was placed on a more liberal scale, and improvements in ventilation of some of the cells were carried out.

VII.—PUBLIC WORKS.

Considerable progress was made during the year in reconstructing the windward and leeward highways with the object of improving the surface, alignment, grade, and drainage so as to withstand the rapidly-growing increase in heavy motor traffic.

A substantial bridge was erected over the Warrawarrou River at Dauphine and causeways were constructed at Langley Park River, Park Hill, and Mount Greenan.

The road from Mount Hope Village to Wallilabou was very considerably improved by cutting and widening.

Considerable work was done in re-roofing and painting the gallery at Government House. A new electric-light plant was installed at Government House.

In order to provide increased accommodation for pupils an annexe was built on to the Girls' High School.

A water tank was erected at Paget Farm, Bequia, and a cistern provided for water at Union Island.

Owing largely to abnormal rainfall between September and November very considerable expenditure, amounting to £1,192, had to be incurred in respect of storm damage to roads, due to cliffs and bluffs breaking off and sliding into the drains, blocking them, and in some cases being thrown on to the road surface. The most serious damage done was at the Colonarie River which became flooded and divided itself into two sections, destroying part of the Colonarie Estate Road and threatening the foundations of the Colonarie Bridge, with a possibility of breaking through on the north of the bridge.

The old Park Hill Bridge was completely destroyed.

VIII.—PUBLIC HEALTH.

The population of the Colony at 31st December, 1927, was 50,770.

The birth-rate for the year was 37.25 per thousand, as against 39.46 in 1926.

Legitimate births numbered 525, and illegitimate births 1,366; the percentage of illegitimate births, viz., 72.2, being exactly the same as in 1926.

The death-rate per thousand for the year was 16.45, as compared with 19.42 in 1926.

The deaths of infants under one year (exclusive of still-births) numbered 199, as against 232 in 1926.

There were 120 still-births, of which 28 were legitimate and 92 illegitimate.

There were only 13 cases of enteric fever during the year, as against 48 in 1926, and 56 in 1925.

An epidemic of influenza passed over the Colony in the third quarter of the year, 1,435 cases being recorded, with 25 deaths.

There were 928 cases of diarrhoea in children under two years of age, but only 49 deaths.

A course of lectures and demonstrations was given during the year for those desirous of qualifying as Sanitary Inspectors. Twelve candidates took the course and four qualified and received local certificates of efficiency.

Nine prosecutions for milk adulteration as attested by the Babcock test were instituted during the year, and convictions secured in each case.

Much excellent work was done in the erection of 754 latrines in private houses and the provision of privy accommodation for 795 labourers at Estate Works, and similar accommodation for 405 resident estate labourers.

A new Public Health Ordinance was passed but had not come into operation at the close of the year.

IX.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1925, 1926, and 1927 :—

	1925.	*1926.*	*1927.*
Number of Schools	27	28	28
Number of pupils on roll at 31st December.	4,884	5,407	5,732
Average attendance	2,648	2,892	2,969
Government Grant-in-aid	£2,939	£3,335	£3,686
Cost per head in average attendance	£1 2*s.* 2*d.*	£1 3*s.* 0¾*d.*	£1 4*s.* 10*d.*

Eleven of the twenty-eight regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide and are responsible for the upkeep of the buildings of the seventeen other schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools, are paid from public funds.

There were eight other schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants to the extent of £137.

The Government maintains in Kingstown a secondary school for the education of boys—the Grammar School—and one for girls—the Girls' High School. The average attendance in 1927 was 71 boys and 58 girls, as compared with 70 boys and 50 girls in 1926. There is a system of Government Scholarships to the Grammar School for pupils from the primary schools.

There is an Island Scholarship awarded biennially under Ordinance No. 41 of 1921, tenable for not less than three and not more than five years at an approved University. The annual value is £250, and the cost of passage is also defrayed.

Provision exists for the Town Board of Kingstown to expend certain sums on scholarships at the secondary schools on lines similar to the Government Scholarships.

X.—CROWN LANDS AND SURVEYS.

The revenue collected during the year totalled £1,067, as compared with £1,074 in 1926.

128 title deeds with diagrams were prepared, as compared with 107 in 1926.

No surveys by private surveyors were made, but the following were executed by the Department :—

1. Re-establishment of boundaries at Belair Land Settlement.

2. Re-establishment of boundaries at Troumaca.

3. Re-establishment of boundaries at Clare Valley-Questelles.

4. Survey to provide a road to allotments at Clare Valley-Questelles.

5. Survey of lots at Mahogany Hole—Rutland Vale.

6. Survey and subdivision into lots at Union Island.

7. Survey in connection with proposed water supply, Friendly Village.

8. Survey of road leading from windward highway at Stubbs to Victoria Village.

9. Survey and levels in connection with Chateaubelair water supply.

10. Survey and levels in connection with diversion at Happy Hill.

No work in connection with geological survey was undertaken.

XI.—LABOUR.

There is no immigration of labour into the Colony, but a considerable amount of emigration takes place annually, principally to Cuba and Santo Domingo for work on sugar-cane plantations. The emigrant is attracted by the delight of seeing the world, of a pleasant holiday *en voyage*, and by the lure of higher wages, forgetful of the greater cost of living in the countries he visits. During the year, 244 labourers went to Cuba and 422 to Santo Domingo, and there was a considerable amount of going to and fro between this Colony, Barbados and other West Indian Islands. The emigration season for Cuba and Santo Domingo may be said to date roughly from November in each year till the following June or July, when the emigrant returns with a flashy cap, a flashy shirt and suitcase and possibly a little money unless he has lost his earnings by gambling. Planters complain bitterly of the inconvenience caused to them by the annual exodus.

The average wage on an estate in St. Vincent is 1*s*. 2*d*. per day, but work is usually done by the task and a labourer who chooses can earn in some cases as much as 2*s*. in a day. It is found, however, that many of the labourers if better paid simply refuse to do a full week's work. A considerable amount of the work on estates is done by women.

Legislation (Ordinance No. 10 of 1927) was passed during the year, providing for the registration of recruiters of labour for

such foreign countries as should be declared by the Governor-in-Council, and for deposits to ensure the repatriation of such labourers without expense to the Colony, and also for provision being made for the families of such labourers during their absence, and for proper contracts of service being entered into.

XII.—MISCELLANEOUS.

Banks.

There is a branch of Barclays Bank (Dominion, Colonial and Overseas) with a Savings Department, and Government maintains a Savings Bank.

Agricultural Credit Societies.

There are twenty-one Agricultural Credit Co-operative Societies in the Colony, but several of them are not functioning and some cannot be said to be working satisfactorily.

Government Cotton Ginnery.

The purchase of Sea Island seed cotton and corn on profit-sharing terms was continued during the year.

R. WALTER,
Administrator.

CROWN AGENTS FOR THE COLONIES.

Publications issued by the Governments of British Colonies, Protectorates, and Mandated Territories, can be obtained from the CROWN AGENTS FOR THE COLONIES, 4, Millbank, Westminster, S.W.1. They include Departmental Reports, Laws, Handbooks, etc.

THE EMPIRE'S AGRICULTURE

An historical event of importance in the development of the Empire's Agriculture took place towards the close of 1927. The foundations were, it is believed, then laid for the ultimate creation of a real and effective British agricultural commonwealth. The occasion was the Imperial Agricultural Research Conference held in Great Britain in October and November, 1927, which was attended by delegates of high standing from all countries in the Empire.

"The Report of the Imperial Agricultural Research Conference," just issued, contains a full account of the events leading up to the Conference, the recommendations (both in full and in summary form) there made and the views expressed by the highest authorities on agriculture in all quarters of the Empire. The recommendations deal with the following subjects:—The establishment of an Imperial chain of Agricultural Research Stations. The establishment of Imperial clearing houses of information. The recruitment, training and interchange of scientific workers in agriculture for the whole Empire. The action immediately necessary to secure co-operative work in such specialist subjects as Veterinary Science, Animal Nutrition and Genetics, Dairying, Soils and Fertilisers, Plant Breeding and Pathology, Fruit Growing, Entomology, Preservation and Transport, and Agricultural Economics.

The Report of 250 pages is issued at the specially low price of 1s. (with postage 1s. 5d.), in order that it may be within easy reach of all those affected.

Geography and History.

The island of St. Lucia is situated in latitude 13° 54′ North and longitude 60° 59′ West, at a distance of 24 miles to the south-east of Martinique and 21 miles to the north-east of St. Vincent.

It is 27 miles in length and 14 at its greatest breadth; its circumference is 150 miles and its area 233 square miles, rather less than Middlesex.

Castries, the capital, is situated at the north-western end of the island, and has a population, according to the census of the 24th April, 1921, of 5,899.

The port of Castries is one of the best harbours in the West Indies. It is land-locked and provides facilities for coaling and watering ships and for loading and discharging cargo which are unequalled in these islands.

The town of next importance is Soufrière, which lies about 12 miles to the south of Castries and contains a population of 2,480. Just below Soufrière Bay stand the remarkable twin peaks known as "The Pitons," rising sheer from the sea to a height of 2,619

feet in the case of the Gros Piton and to 2,461 feet in that of the Petit Piton. The boiling sulphur springs from which Soufrière gets its name are situate at Ventine, two and a half miles south-east of the town.

It is generally accepted that St. Lucia was discovered by Columbus, during his fourth voyage, on the 18th June, 1502. There is, however, a tradition amongst the French that it was discovered on the 13th December of a later year by some shipwrecked French seamen, who named it St. Alouziel or St. Alousie after the martyred virgin saint of that name, whose feast is commemorated on that date.

The island was then inhabited by the Caribs, and they remained in undisturbed possession for another century.

In 1605 67 persons proceeding to Guiana by the English ship "Olive Blossom" were forced by famine to land in the island, and they remained "to take their fortune in the fruitful isle." They were not able to stay longer than a month, however, when, reduced to 19 by wars with the Caribs, they left in an open boat and reached the mainland of South America in sore distress. This is the first recorded instance of a landing by Englishmen in the island.

In 1626 a Commission was granted by Cardinal Richelieu to MM. d'Enambuc and du Rossay to establish a French Colony "in the islands of St. Christopher and Barbados and in the surrounding territories," which presumably included St. Lucia, and in 1627 the island was granted by the King of England, along with all the Caribbee Islands, to the Earl of Carlisle, who appointed Lord Willoughby of Parham to be Governor of Barbados and the other Caribbee Islands. In 1635 it appears to have been granted by the King of France to MM. de l'Olive and Duplessis.

In 1638 Captain Judlee of St. Kitts (acting in the name of Lord Willoughby) and three or four hundred men took possession of the island and attempted to effect a settlement in it, but in 1640 these early colonists were either massacred or expelled by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who sold it in 1650 to MM. Honel and du Parquet for the equivalent of £1,600. The Caribs made repeated attempts to expel the French, but failed, and finally, in 1660, they concluded a treaty of peace with the latter.

In 1663 Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia and took possession of it. The English continued in occupation until the Peace of Breda, in 1667, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France and made a dependency of Martinique.

Throughout the eighteenth century recurrent struggles took place between the English and the French for possession of the island, the more important occurring in the latter half of the century. In 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton, but was returned to France by the Treaty of Paris in the following year. In 1778 it again surrendered to the British, who remained in occupation until 1783 when, by the Peace of Versailles, St. Lucia was once more restored to France. It was from Pigeon Island, off the north-western coast of St. Lucia, during the period of this occupancy that Rodney sighted the French Fleet of 36 sail of the line, under the Comte de Grasse, prior to giving them battle and defeating them in the memorable naval action of the 12th April, 1782. The island was again taken by the British in 1794, but they were forced by the French Republican party in the island, aided by insurgent slaves under "Citoyen" Victor Hughes, the Civil Commissary of Guadeloupe, to evacuate it in the following year. In 1796, after an obstinate and sanguinary struggle, that party laid down their arms and surrendered as prisoners of war to a force 12,000 strong under the command of Sir Ralph Abercrombie, supported by a squadron under the command of Sir Hugh Christian. Sir John Moore, the subsequent hero of Corunna, took part in this operation as Brigadier-General Moore, and remained in the island as Governor thereafter. The British retained possession of the island until 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since when it has continued under British rule. As a result of the operations of 1778, 1796, and 1803, no fewer than thirteen British regiments have "St. Lucia" inscribed on their colours.

Climate.

The climate is healthy and compares favourably with other West Indian islands.

The temperature seldom rises above 90° in the hot season, May to November, or falls below 70° in the cool season, December to May; the yearly average being about 83° noon shade temperature. On Morne Fortune, just above Government House, where a portion of the former garrison was located, the temperature in the winter months falls as low as 60° and throughout the year it remains mild and pleasant.

The temperature records during 1927 show a mean noon temperature of 85.7° in the shade, the maximum temperature being 96°, the minimum temperature 65°, giving a range of 31°.

The total rainfall recorded at the Botanic Gardens, Castries, for the year 1927 was 105.08 inches, this was 26.28 inches above the average for 28 years (78.80 inches) and was the highest recorded in the Gardens since the year 1916.

Vital Statistics.

On 31st December, 1926, the resident population of the Colony was computed to have been 25,594 males and 30,104 females—a total of 55,698. On 31st December, 1927, the figure increased to 56,068; males 25,747, females 30,321. The natural increase during the year was 703. Departures from the Colony exceeded the number of persons entering the Colony by 333, so that the net addition was only 370.

The births (including still-births which numbered 111) totalled 1,923—Males 978, females 945. The birth-rate (excluding still-births) was 32.3 per thousand of the population.

The number of deaths recorded (including still-births) was 1,220—Males 622, females 598. The death-rate (excluding still-births) was 19.7 per thousand of the population.

The principal causes of death as returned (excluding still-births) were malaria, 50; pulmonary tuberculosis, 56; phthisis, 30; syphilis, 54; cancer, 19; pneumonia, 112; worms, 104; infantile debility, 41; senile decay, 110.

Languages.

English is, of course, the language of the Colony but the large majority of the population speak a French patois. Notwithstanding the fact that primary Education is imparted in English entirely, it is still true that comparatively few of the labouring classes can speak or understand our own tongue and in the elementary schools children have really to be taught English before they can assimilate a knowledge of the rudiments of Education. This is undoubtedly a very unsatisfactory state of affairs, but it can only be by persistent educational effort that the people as a whole will eventually learn to speak and think in the National language.

Currency.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10s. and 5s. are in circulation, as well as the notes of Barclays Bank and the Royal Bank of Canada, both of which have branches in Castries.

Weights and Measures.

The Imperial weights and measures are in use in the Colony.

I.—GENERAL.

The outstanding event of the year was the fire in Castries on the night of the 14th-15th May.

Originating apparently in a provision store, the fire spread from block to block, despite the most strenuous efforts of the fire brigade, police, rovers, scouts, and a host of other willing helpers, until seventeen blocks had been devastated. Houses, wholesale stores and retail shops, the Post Office, Government spirit warehouse,

Magistrate's court-house, Attorney-General's office, and a Friendly Society's hall were all destroyed, and the fire was only stopped by the sea. Practically all the business section of the town was burnt out.

Prompt measures were taken by His Excellency the Governor-in-Chief, Sir Frederick Seton James, K.B.E., C.M.G. (who fortunately was in residence in St. Lucia at the time) to cope with the appalling situation created by this disaster.

Relief work in the first instance comprised providing temporary homes for a number of people, the issue of clothing, and a daily issue of rations to a still larger number. This work was carried out by a Committee working under the direction of Lady James and His Honour Captain Plunkett, Acting Colonial Secretary. Food and clothing were received promptly from neighbouring islands, and the Castries Fire Relief Fund was opened. This Fund ultimately reached the sum of £17,181, which was made up of £5,000 from the Imperial Treasury, £6,147 from Colonial Governments, and £6,033 subscriptions from Societies and private individuals.

As soon as the immediate distress of the people had been relieved, His Excellency appointed the Castries Fire Relief Investigation of Claims Committee to consider all statements of losses arising out of the fire and advise as to the best method of relief As a result of this investigation the sum of £16,894 was distributed in relief and building grants, the relief grants representing principally amounts allocated to assist in replacing household furniture and effects and stocks of small shopkeepers, and the building grants being amounts allocated to assist in rebuilding in concrete or masonry. In addition to these grants, the sum of £5,000 loaned to the local Government by the Imperial Treasury for ten years at 2 per cent. per anum has been re-loaned on the same terms to assist in rebuilding premises destroyed by the fire on condition that they are rebuilt in masonry or concrete.

Already a considerable area of the town is occupied by concrete or masonry buildings either completed or in course of erection, and these buildings are generally far superior to those destroyed.

It is noteworthy that the administration of the Relief Fund and Loan account, involving the disbursement of £22,000, cost only £35, of which £30 represents the cost of remittance of money from England.

The experience of this fire having proved the necessity for a more efficient fire brigade and apparatus, an enlarged brigade has been constituted and placed under the command of the Chief of Police, and some improved fire-fighting appliances have been purchased.

It was a very regrettable fact that so many of the properties and merchants' stocks destroyed by the fire were uninsured. Evidently many people regarded insurance as a luxury and others

regarded the payment of an insurance premium as a waste of money. Since the fire, the volume of insurance business in St. Lucia has increased very considerably.

II.—FINANCE.

The revenue and expenditure of the Colony during the last five years were as follows :—

Year.	*Ordinary Revenue.* £	*Ordinary Expenditure.* £	*Excess of Expenditure over Revenue.* £
1923	77,077	88,973	11,896
1924	71,595	88,186	16,591
1925	75,555	85,082	9,527
1926	83,379*	84,488	1,109
1927	82,491†	84,219	1,728

* In addition £70,180 was received as proceeds of the issue of Debt Reduction Loan.

† Including Imperial Grant-in-Aid of £7,000.

During 1927 the rates of taxation were altered in certain instances as follows :—

(1) Additional 5 per cent. on Income Tax, incomes being assessed as before but the tax payable being increased.

(2) Rates of Import Duty on certain commodities were altered, most being increased but a few reduced.

The Public Debt of the Colony (including Guaranteed Loans) stood at £203,159 at the close of the year, being £3,450 less than at 31st December, 1926. The accumulated Sinking Fund for its redemption amounted to £58,717, as compared with £54,767 at the end of 1926.

III.—PRODUCTION.

Agriculture.

The prosperity of the Colony is mainly dependent upon agriculture, but, owing to a variety of causes, this has not been developed to the extent it might have been. There is evidence that the inhabitants are now realizing the absolute necessity for increased agricultural production and are turning their attention to a more intensive cultivation of their properties.

The agricultural interests of the Colony suffered a severe setback by the collapse during the year of the banana company who had started operations and had induced a large number of planters to take up the cultivation of this commodity on a fairly large scale. This calamity, as well as the greater one of the prevalence

of Panama Disease throughout the island, has removed the prospect of any considerable production of bananas in St. Lucia.

Another severe blow has been the appearance and rapid spread of "Withertip" and "blossom blight" among limes. Planters had taken up this cultivation with enthusiasm and the industry was doing exceedingly well when this disaster overtook it.

The cultivation of coconuts has increased greatly in recent years and planting on a fairly large scale is still going on.

Work is being maintained with energy on three of the four sugar factories in the island and, under new management, considerable development is taking place at the Roseau factory, which is situated in one of the most fertile valleys in the island.

Strong efforts are being put forth to stimulate the cultivation of fruit of various kinds, for which industry St. Lucia seems to be peculiarly well suited.

Sugar.—The area under cultivation remains at about 4,750 acres; unfavourable weather conditions prevailed throughout the reaping season and rendered harvesting difficult and prolonged, and the yield of sugar was low.

One factory did not complete the harvesting of the crop, consequently the output of sugar products was generally lower than that of the previous year. Market prices were more favourable, however, and the value of the products shows an increase.

The following figures show the quantity and value of sugar products exported during the last five years:—

Sugar (Vacuum Pan).

Year.	*Quantity.* Cwt.	*Value.* £
1923	62,940	75,304
1924	71,760	87,987
1925	97,772	72,559
1926	95,140	65,444
1927	88,640	74,200

Sugar (Muscovado).

Year.	*Quantity.* Cwt.	*Value.* £
1923	2,720	2,161
1924	9,940	9,508
1925	8,614	4,774
1926	9,138	5,414
1927	3,560	2,235

Molasses and Syrup.

Year.	*Quantity.* Gals.	*Value.* £
1923	112,368	7,783
1924	159,589	12,323
1925	153,413	7,818
1926	156,424	8,659
1927	156,050	7,634

Rum.—The quantity and value of rum exported during the last five years is as shown below :—

Year.	*Quantity.* P. Gals.	*Value.* £
1923	649	64
1924	95¾	29
1925	63	25
1926	37	11
1927	1,700	212

Practically all the rum produced in the island is consumed locally.

Cacao.—A favourable market for cacao existed throughout the year. This caused increased attention to be given to cultivation. A good crop was reaped, the quantity exported being 2,146 cwt. more than in the previous year.

The quantity and value of cacao exported during the last five years are as follows :—

Year.	*Quantity.* Cwt.	*Value.* £
1923	12,817	21,527
1924	12,163	21,267
1925	10,444	22,339
1926	10,037	22,454
1927	12,183	30,560

Limes.—Lime oils continued to realise high prices during the year, ranging from 27s. to 37s. per lb. for hand-pressed oil and 21s. to 28s. for distilled oil. Prices decreased towards the close of the year. The concentrated and raw juice markets were not very active. The quantity of lime products exported has decreased somewhat owing to Withertip disease. It is expected that, owing to the failure of the second crop, the production for 1928 will be still further reduced.

The crop calculated in barrels of fruit was :—

1923	53,097
1924	52,238
1925	63,406
1926	59,415
1927	58,948

Coconuts and coconut products exported during the last five years are shown in the following statements :—

Coconuts.

Year.	*Quantity.* Number.	*Value.* £
1923	99,945	351
1924	119,669	204
1925	123,516	432
1926	118,501	381
1927	96,813	351

Coconut Oil.

Year.	*Quantity.*	*Value.*
1923	Information not available.	
1924	Information not available.	
	gals.	£
1925	6,323	791
1926	19,081	3,847
1927	3,921	735

Copra.

Year.	*Quantity.* Cwt.	*Value.* £
1923	1,847	2,350
1924	1,806	2,199
1925	1,981	3,563
1926	1,591	1,808
1927	4,077	4,409

Coconut Meal.

Year.	*Quantity.*	*Value.*
1923	Information not available.	
1924	Information not available.	
	Tons.	£
1925	12	106
1926	42	778
1927	7	88

Bananas.—The exports during the last five years were as follows :—

Year.	*Quantity.* Bunches.	*Value.* £
1923	4,081	291
1924	4,190	256
1925	20,818	1,374
1926	46,209	4,356
1927	27,052	2,351

IV.—TRADE AND ECONOMICS.

The state of the trade of the Colony as reflected by the values and quantities of imports and exports during the year 1927 as compared with 1926 was as follows :—

Imports.

	1927.	1926.
	£	£
I. Food, drink, and tobacco	78,679	75,920
II. Raw material and articles mainly unmanufactured...	39,512	61,877
III. Materials wholly or mainly manufactured	103,640	107,889
IV. Miscellaneous and unclassified articles, including Parcel Post	7,014	6,550
Total Value	£228,845	£252,236

From the above figures it will be seen that the principal decrease in imports was in raw material and articles mainly unmanufactured, while there was a small increase in the value of food, drink, and tobacco imported.

The values of imports for 1927 and 1926 classified according to country of supply were as follows :—

	1927.	1926.
	£	£
United Kingdom	67,910	62,399
Other parts of the British Empire	62,647	62,515
Foreign countries	91,713	121,506
Parcel Post	6,575	5,816
	£228,845	£252,236

These figures show that the imports from the United Kingdom have increased by £5,511, or 8.8 per cent., while those from other parts of the British Empire remain the same and those from foreign countries have decreased by £29,793 or 24.5 per cent., so that the drop in the value of imports has been entirely at the expense of foreign countries.

The values of the imports of articles amounting to £5,000 or more each for 1926 and 1927 were as follows :—

Article.	1926.	1927.
	£	£
Bags, empty	6,371	4,131
Boots and Shoes	4,552	5,635
Coal, bituminous	53,551	28,407
Cotton—		
Piece goods	20,391	19,225
Other manufactures	2,501	5,366
Films, cinematograph	6,800	3,991
Fish, salted, dried, &c. ...	9,809	9,596
Grain, &c., Flour	23,896	24,411
Machinery, sugar manufacturing	7,138	4,073
Manures	6,932	4,042
Oil, edible	6,158	7,169

The chief item of interest in this table is coal, bituminous, the value of imports of which has diminished by £25,144, or 47 per cent., due to a further depression in the bunker-coal trade. Cotton manufactures show an increase, while cinematograph films show a decrease due to the destruction by fire of the cinema in May, 1927, Sugar-manufacturing machinery and manures show considerable decreases.

There would appear to be some openings for British products, as shown by the following table :—

Article.	*Total value of Imports in* 1927.	*Imports from British Empire.*
	£	£
Cotton manufactures, piece goods	19,225	11,166
Manures	4,042	492
Iron and Steel manufactures ...	4,620	3,235
Wood and Timber—Shooks and Staves	2,831	366
Bags and Sacks, empty ...	4,131	2,291
Butter and substitutes	3,483	1,359
Oleomargarine	2,268	14
Motor-cars	2,141	1,637
Cement	2,114	628
Totals	£44,855	£21,188

Exports.

The values of exports in 1927, classified under four main divisions, were as follows :—

	1927.	1926.
	£	£
I. Food, drink, and tobacco ...	134,348	125,557
II. Raw materials and articles mainly unmanufactured	47,391	89,914
III. Articles wholly or mainly manufactured	27,208	29,674
IV. Miscellaneous	371	99
V. Bullion and Specie ...	4,284	6,461
Total value	£213,602	£251,705

It is seen that the drop in the value of exports is due mainly to Class II, while Class I shows a moderate increase.

The following table shows the character and individual values of the main exports :—

	Value in 1927.	*Value in* 1926.
	£	£
Cocoa	30,560	22,454
Limes and Lime products ...	27,337	28,140
Sugar	76,435	70,858
Fancy Syrup and Molasses ...	7,634	8,659
Logwood	2,027	4,986
Bunker Coal	37,663	76,314
Copra	4,409	1,808

The values of the exports, domestic and other, classified according to destination were as follows :—

EXPORTS (MERCHANDISE).

Destination.		*Total 1927.*	*Total 1926.*
	£	£	£
United Kingdom—			
Domestic Exports	37,709		
Re-exports	189		
		37,898	62,360
	£		
Other parts of the British Empire—			
Domestic Exports	84,970		
Re-exports (not including Bullion and Specie).	7,655		
		92,625	64,422
	£		
Foreign Countries—			
Domestic Exports	40,204		
Re-exports (not including Bullion and Specie).	573		
		40,777	41,595
	£		
Ships' Stores—Re-exports	355		
Bunkers—Re-exports	37,663		
		38,018	76,867
Totals		£209,318	£245,244

From this table it appears that exports to the value of £24,462 have been diverted from the United Kingdom to other parts of the British Empire; exports to the former having decreased in value by £24,462 and exports to the latter having increased in value by £28,203. Exports to foreign countries decreased slightly, while the value of coal supplied to ships' bunkers decreased by £38,849, which more than accounts for the drop of £35,926 in the total value of exports of merchandise as above.

Coaling.—The coaling business, for which there are exceptional facilities and which brought considerable wealth to the Colony for many years, is not now in a very flourishing condition owing to the large reduction in the number of steamers calling for bunkers. Still, it affords appreciable though irregular occupation for a number of labourers in and around Castries.

V.—COMMUNICATIONS.

Shipping.—The number of ships entered and cleared during the year was 996, of a total tonnage of 1,153,633 tons. Of this total, 477 were steam and 519 sailing vessels.

Mail communication is maintained by (1) a regular fortnightly steamer service to other West Indian Colonies and to Canada, (2) a monthly service via Martinique to Europe by means of the French mail steamer, and (3) a monthly service to the United States of America and the West Indian Colonies by the Quebec Steamship Company. There are other and frequent mail opportunities via Barbados and America and direct to Europe.

Roads.—The road system of the island has been much improved in sections by surfacing with road oil. The mileage of roads in the Colony is as follows:—

Main roads	125
Byways	143
Unclassified roads	74
	342

167 miles are suitable for motor traffic and are much used.

Passenger subsidised motor-bus services are regularly maintained between Castries and Dennery and Vieuxfort and Soufrière.

The Government 50-ton motor-launch supplies a regular service between Castries, Soufrière, Vieuxfort, and the villages of Anse-la-Raye, Canaries, and Laborie.

Telegraphic communication is maintained by the Pacific Cable Board; there is also the West India and Panama Telegraph Company, Limited, the latter no longer subsidised by the Government.

Inland Telegraphs.—There is no telegraph system in the island.

Telephones.—There are ten telephone exchanges operating throughout the island, to which are connected 93 miles of trunk lines and 182 miles of branch lines.

VI.—JUSTICE, POLICE, AND PRISONS.

Justice is administered by the Royal Court, over which the Chief Justice presides, and by three District Courts, over which two Police Magistrates preside. The Royal Court has an original civil and criminal jurisdiction and also decides appeals from the Districts Courts. Appeals from the Royal Court are heard and determined by the West Indian Court of Appeal constituted under the West Indian Court of Appeal Act, 1919, of the Imperial Parliament.

An adequate Police Force is maintained to enforce the decisions of these bodies and to provide generally for the peace of the Colony and the security of life and property. Besides ordinary Police duties, this Force assists in the administration of Poor Relief, and it has, since the Castries Fire of May, 1927, provided the main portion of the Castries Fire Brigade.

There is one gaol, the Royal Gaol, situated in Castries, which contains separate prisons for male and female convicts. The institution has its own bakery which supplies excellent bread to all the public institutions and, in addition to stone-breaking and carrying out useful work outside the walls, certain of the prisoners are taught carpentry, tailoring, and shoemaking.

VII.—PUBLIC HEALTH.

The general health of the island was good during the year. There was no epidemic sickness to be recorded. The Chief Medical Officer is responsible for the general supervision of matters of health and sanitation in the Colony.

Victoria Hospital, the principal hospital, is situated within a mile of Castries. A Resident Surgeon is in charge, and he is assisted by a staff consisting of a European matron and local nurses and dispensers. There is a private wing with six rooms assigned to paying patients.

There are three small district casualty hospitals close to the principal local dispensaries of Soufrière, Vieuxfort, and Dennery.

The pauper and leper asylums are situated in the Soufrière district, and are supervised by the Medical Officer of the district and a visiting Advisory Committee.

Sanitation.—The efforts of the Sanitary Department were mainly restricted to established routine work.

The work included the regular periodical inspection of premises —estates, barracks, and school-houses not excepted—the inspection of markets, slaughter-houses, bakeries, provision shops, mineral-water factories, ice factory, and the streets and drains of the various towns and villages.

Anti-malarial measures included reclamation work and cleaning of canals, ravines and drains. Pools in ravines were re-stocked with " millions " fish.

Fly destruction was carried out in towns and villages.

Attention was paid to the prevention of irregular disposal of excreta, of soil pollution, and of the pollution of rivers and streams.

An address on " Practical Sanitation " was delivered by the Chief Sanitary Inspector to the school teachers of the Colony, and a course of lectures on the same subject was delivered by the same officer to the District Sanitary Inspectors.

VIII.--EDUCATION.

Primary education is free and compulsory. There are 49 denominational schools. Although education is compulsory between the ages of 6 and 14, little more than half the children of school age attend.

Grants-in-aid are made to these schools, mainly for the payment of teachers' salaries. The Inspector of Schools, a Government officer, is in charge of the administration of the grants.

English, reading, writing, arithmetic, the elements of grammar, geography and hygiene are taught. In the upper classes boys are taught elementary agricultural science, both practical and theoretical, and the girls needlework and domestic economy. The results are generally good.

Secondary education is supplied by St. Mary's College for boys, and St. Joseph's Convent School for girls, both situated in Castries. These schools prepare their pupils for the Cambridge University Local Examinations and the London University Matriculation Examination. Pupils have attained considerable success in these examinations. The St. Lucia Scholarship of £175 per annum, which was established in 1918 and suspended in 1925, was renewed in 1926 and made biennial. The Scholarship is awarded, on the results of the London University Matriculation Examination, to candidates having the requisite local and residential qualifications. A choice of universities, or of agricultural, scientific or technical colleges or institutions in Europe, Canada or the United States, approved by the Governor-in-Council, is permitted. The Scholarship is tenable for not less than three, and not more than five, years according to the time required for the completion of the course of study sanctioned. Up to 1927 seven Scholarships have been awarded.

Eighteen scholarships at St. Mary's College are awarded by the Government, on the results of competitive examinations to boys attending primary schools. These scholarships are tenable for one year and renewable after that from year to year for five years more.

IX.—LABOUR.

There is, generally, an ample supply of labour for the requirements of the Colony. Employment is offered chiefly on sugar estates and other of the larger properties, by the Public Works Department for work on the roads, and by the coaling companies for bunkering steamers. Since the fire of May, 1927, there has been a constant demand for tradesmen, but it has not been an easy matter to secure an adequate number of skilled workers. So far as can be ascertained the relations between employers and labourers have been satisfactory. A fair number of St. Lucia labourers are recruited periodically for work in Cuba and Santo Domingo. All arrangements in regard to this labour are made through the Government, and the recruiting agents are required to enter into a strict bond and agreement for carrying out the terms of the contract made between them and the labourers.

X.—MISCELLANEOUS.

His Excellency the Governor of the Windward Islands, Sir Frederick Seton James, K.B.E., C.M.G., paid two visits to the Colony during the year, from 23rd April to 28th June and from 11th August to 23rd August.

His Honour Captain Oliver Plunkett, Chief Justice, acted as Administrator throughout the year until the 17th November, except for the periods when His Excellency the Governor was in residence in the Colony. Mr. C. A. Pickwoad succeeded Captain Plunkett and administered the Government from 17th November to the end of the year.

Four British ships of war visited the Colony during the year, as follows:—

H.M.S. "Calcutta" from the 20th to the 31st January,
H.M.S. "Colombo" from the 21st to the 22nd February,
H.M.S. "Wistaria" from the 23rd February to the 1st March,
H.M.S. "Heliotrope" from the 24th to the 27th March.

There is now an excellent up-to-date hotel situated on the hill overlooking the harbour and town of Castries. The social club at the Vigie, which was established a little more than a year ago, promises to be a great success and has supplied a long-felt want.

CHAS. W. DOORLY,
Administrator.

THE EMPIRE'S AGRICULTURE

An historical event of importance in the development of the Empire's Agriculture took place towards the close of 1927. The foundations were, it is believed, then laid for the ultimate creation of a real and effective British agricultural commonwealth. The occasion was the Imperial Agricultural Research Conference held in Great Britain in October and November, 1927, which was attended by delegates of high standing from all countries in the Empire.

"The Report of the Imperial Agricultural Research Conference," just issued, contains a full account of the events leading up to the Conference, the recommendations (both in full and in summary form) there made and the views expressed by the highest authorities on agriculture in all quarters of the Empire. The recommendations deal with the following subjects:—The establishment of an Imperial chain of Agricultural Research Stations. The establishment of Imperial clearing houses of information. The recruitment, training and interchange of scientific workers in agriculture for the whole Empire. The action immediately necessary to secure co-operative work in such specialist subjects as Veterinary Science, Animal Nutrition and Genetics, Dairying, Soils and Fertilisers, Plant Breeding and Pathology, Fruit Growing, Entomology, Preservation and Transport, and Agricultural Economics.

The Report of 250 pages is issued at the specially low price of 1s. (with postage 1s. 5d.), in order that it may be within easy reach of all those affected.

Geography and History.

The island of St. Lucia is situated in latitude 13° 54′ North and longitude 60° 59′ West, at a distance of 24 miles to the south-east of Martinique and 21 miles to the north-east of St. Vincent.

It is 27 miles in length and 14 at its greatest breadth ; its circumference is 150 miles and its area 233 square miles, rather less than Middlesex.

Castries, the capital, is situated at the north-western end of the island, and has a population, according to the census of the 24th April, 1921, of 5,899.

The port of Castries is one of the best harbours in the West Indies. It is land-locked and provides facilities for coaling and watering ships and for loading and discharging cargo which are unequalled in these islands.

The town of next importance is Soufriere, which lies about 12 miles to the south of Castries and contains a population of 2,480. Just below Soufriere Bay stand the remarkable twin peaks known as "The Pitons," rising sheer from the sea to a height of 2,619 feet in the case of the Gros Piton and to 2,461 feet in that of the Petit Piton. The boiling sulphur springs from which Soufriere gets its name are situate at Ventine, two and a-half miles south-east of the town.

It is generally accepted that St. Lucia was discovered by Columbus, during his fourth voyage, on the 18th June, 1502. There is, however, a tradition amongst the French that it was discovered on the 13th December of a later year by some shipwrecked French seamen, who named it St. Alouziel or St. Alousie after the martyred virgin saint of that name, whose feast is commemorated on that date.

The island was then inhabited by the Caribs, and they remained in undisturbed possession for another century.

In 1605, 67 persons proceeding to Guiana by the English ship *Olive Blossom* were forced by famine to land in the island, and they remained "to take their fortune in the fruitful isle." They were not able to stay longer than a month, however, when, reduced to 19 by wars with the Caribs, they left in an open boat and reached the mainland of South America in sore distress. This is the first recorded instance of a landing by Englishmen in the island.

In 1626 a Commission was granted by Cardinal Richelieu to MM. d'Enambuc and du Rossay to establish a French Colony "in the islands of St. Christopher and Barbados and in the surrounding territories," which presumably included St. Lucia, and in 1627 the island was granted by the King of England, along with all the Caribbee Islands, to the Earl of Carlisle, who appointed Lord Willoughby of Parham to be Governor of Barbados and the other Caribbee Islands. In 1635 it appears to have been granted by the King of France to MM. de l'Olive and Duplessis.

In 1638 Captain Judlee of St. Kitts (acting in the name of Lord Willoughby) and three or four hundred men took possession of the island and attempted to effect a settlement in it, but in 1640 these early colonists were either massacred or expelled by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who sold it in 1650 to MM. Honel and du Parquet for the equivalent of £1,600. The Caribs made repeated attempts to expel the French, but failed, and finally, in 1660, they concluded a treaty of peace with the latter.

In 1663 Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia and took possession of it. The English continued in occupation until the Peace of Breda, in 1667, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France and made a dependency of Martinique.

Throughout the eighteenth century recurrent struggles took place between the English and the French for possession of the island, the more important occurring in the latter half of the century. In 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton, but was returned to France by the Treaty of Paris in the following year. In 1778 it again surrendered to the British, who remained in occupation until 1783 when, by the Peace of Versailles, St. Lucia was once more restored to France. It was from Pigeon Island, off the north-western coast of St. Lucia, during the period of this occupancy that Rodney sighted the French Fleet of 36 sail of the line, under the Comte de Grasse, prior to giving them battle and defeating them in the memorable naval action of the 12th April, 1782. The island was again taken by the British in 1794, but they were forced by the French Republican party in the island, aided by insurgent slaves under "Citoyen" Victor Hughes, the Civil Commissary of Guadeloupe, to evacuate it in the following year. In 1796, after an obstinate and sanguinary struggle, that party laid down their arms and surrendered as prisoners of war to a force 12,000 strong under the command of Sir Ralph Abercrombie supported by a squadron under the command of Sir Hugh Christian. Sir John Moore, the subsequent hero of Corunna, took part in this operation as Brigadier-General Moore, and remained in the island as Governor thereafter. The British retained possession of the island until 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since when it has continued under British rule. As a result of the operations of 1778, 1796, and 1803, no fewer than thirteen British regiments have "St. Lucia" inscribed on their colours.

Climate.

The climate is healthy and compares favourably with other West Indian islands.

The temperature seldom rises above 90° in the hot season, May to November, or falls below 70° in the cool season, December to May; the yearly average being about 83° noon shade temperature. On Morne Fortune, just above Government House, where a portion of the former garrison was located, the temperature in the winter months falls as low as 60°, and throughout the year it remains mild and pleasant.

Temperature records during 1928 at the Botanic Gardens, Castries, show a mean noon temperature of 84.4° in the shade; the maximum temperature was 92°, the minimum temperature was 63°, the temperature range being 29°.

The total rainfall at the Botanic Gardens, Castries, for the year 1928 was 106.25 inches. This was 16.32 inches above the average for the last 38 years (89.93) and was the highest rainfall recorded since the year 1916. Maximum precipitation occurred on 7th August with a rainfall of 3.96 inches.

Vital Statistics.

On 31st December, 1927, the resident population of the Colony was computed to have been 56,068—males, 25,747 ; females, 30,321. On 31st December, 1928, the figure increased to 56,917—males, 26,393 ; females, 30,524. The natural increase during the year was 767. Arrivals in the Colony exceeded the number of persons leaving the Colony by 82, making a total increase of 849.

The general increase in population from the 1921 Census (51,505) is estimated at 5,412—males, 2,887 ; females, 2,525—and the average figures for the seven years show a slight annual increase of the male population as compared with the female, of 51.

The births (including still-births which numbered 123) totalled 2,016—males, 1,065 ; females, 951. The birth-rate (excluding still-births) was 33.2 per thousand of the population.

The number of deaths recorded (including still-births) was 1,249 —males, 608 ; females, 641. The death-rate (excluding still-births) was 19.8 per thousand of the population.

The principal causes of death returned (excluding still-births) were—malaria, 53 ; pulmonary tuberculosis, 42 ; phthisis, 23 ; syphilis, 57 ; diseases of the heart, 43 ; bronchitis, 41 ; pneumonia, 50 ; gastro-enteritis, 92 ; worms, 116 ; infantile debility, 56 ; senile decay, 115.

Languages.

English is, of course, the language of the Colony, but the large majority of the population speak a French patois. Notwithstanding the fact that primary education is imparted in English entirely, it is still true that, in the elementary schools, most of the children have to be taught English before they can assimilate a knowledge of the rudiments of education. This is undoubtedly a very unsatisfactory state of affairs, but it can only be by persistent educational effort that the people as a whole will eventually learn to speak and think in the national language.

Currency.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10*s*. and 5*s*. are in circulation, as well as the notes of Barclays Bank and the Royal Bank of Canada, both of which have branches in Castries.

Weights and Measures.

The Imperial weights and measures are in use in the Colony.

I.—GENERAL.

An outstanding event of the year was the inauguration of the new Canadian Steamship Service which has been the result of the Canada-West Indies Conference held at Ottawa in 1925. The first of the steamers, the *Lady Nelson*, arrived at Castries on the 23rd December

with an official party from Canada and received a hearty welcome from the inhabitants of the Colony. High hopes are entertained of an increasing prosperity to the Island as the result of the establishment of this greatly improved means of communication with Canada and it cannot be doubted that these hopes will be realised.

An election of Members to serve on the Legislative Council of the Colony was held on the 4th April, 1928, when the following gentlemen were elected to represent the several constituencies :—

For the Northern District ... Mr. L. T. Augier McVane.
,, Eastern ,, ... Mr. George Palmer.
,, Western ,, ... Mr. H. E. Belmar.

Messrs. G. Laffitte, M.B.E., Gregor McG. Peter, and T. G. Westall were appointed Nominated Members of the Council. The new Council was inaugurated by His Excellency the Governor on the 26th April.

During the year tours were made by the Administrator through the agricultural districts of the Island and steps were taken to form a Co-operative Fruit Growers' Association at Soufriere. Several experimental shipments of fruit have been made under the auspices of this association and in many cases good results were obtained. It is hoped that much good will result from the marketing of fruit on co-operative lines and that these principles will be adopted gradually in regard to other articles of agricultural produce.

In June the Colony received a visit from Professor H. Clark Powell, B.Sc., who was deputed by the Empire Marketing Board to visit several Colonies to investigate the possibilities of an increased cultivation of grape fruit. Professor Clark Powell's visit was greatly appreciated and resulted in a large importation of grape fruit plants from Florida. His excellent report on his visit has been of great assistance to planters in the Island.

II.—FINANCE.

The revenue and expenditure of the Colony during the last five years were as follows :—

Year.	*Ordinary Revenue.*	*Ordinary Expenditure.*	*Excess of Expenditure over Revenue.*
	£	£	£
1924	71,595	88,186	16,591
1925	75,555	85,082	9,527
1926	83,379*	84,488	1,109
1927	82,491†	84,219	1,728
1928	85,351‡	87,235	1,884

* In addition £70,180 was received as proceeds of the issue of a Debt Reduction Loan.

† Includes Imperial Grant-in-Aid of £7,000.

‡ Includes Imperial Grant-in-Aid of £3,836.

Taxation was increased during 1928 by :—

(1) The Stamp Duty Amendment Ordinance.

(2) The Customs Amendment (No. 2) Ordinance, increasing the surtax on Customs Duties from 17½ per cent. to 25 per cent.

(3) The Insurance Licence Ordinance, imposing a licence at the annual rate of £5 in respect of Insurance businesses carried on in the Colony.

The Public Debt of the Colony (including Guaranteed Loans) stood at £199,459 at the close of the year, being £3,700 less than at 31st December, 1927. The accumulated Sinking Fund for its redemption amounted to £62,673, as compared with £58,717 at the end of 1927.

III.—PRODUCTION.

Agriculture.

Owing to the decline in the coal trade the future prosperity of the Colony is more than ever dependent on agriculture, and the somewhat increased activity shown by the inhabitants is evidence that the position is being realised.

Interest in agriculture has also been stimulated by the present trade relations with Canada and the advantage of a direct line of steamers providing special accommodation for fruit and vegetables. Although a fruit and vegetable trade is only now beginning, the outlook is encouraging and favourable.

In May, a new agricultural station was established on a suitable Government estate near Castries. Special attention has been given to the propagation of fruit trees of the best known varieties and these are being distributed through the country. St. Lucia possesses great possibilities as a fruit-producing country and there seems little doubt that this industry will develop very considerably in the near future.

The lime industry although somewhat handicapped by "Wither-tip" disease, has been helped by favourable markets and is still being profitably carried on.

The coconut industry is being gradually extended and the output is steadily increasing. The groves generally are in good condition.

Sugar.—Four factories still continue to operate in the Colony and the area under cultivation remains at about 4,750 acres, although the cane land around one factory is being gradually planted in coconuts.

The year was a difficult one for sugar producers, the weather being unusually wet ; the rainfall recorded was 16 inches above the average for the last 38 years.

The price of sugar showed no improvement, and the output of the factories was low.

The following figures show the quantity and value of sugar products exported during the last 5 years :—

Sugar (Vacuum Pan).

Year.	*Quantity.* Cwt.	*Value.* £
1924	71,760	87,987
1925	97,772	72,559
1926	95,140	65,444
1927	88,640	74,200
1928	82,000	63,050

Sugar (Muscovado).

Year.	*Quantity.* Cwt.	*Value.* £
1924	9,940	9,508
1925	8,614	4,774
1926	9,138	5,414
1927	3,560	2,235
1928	—	—

Molasses and Syrup.

Year.	*Quantity.* Gals.	*Value.* £
1924	159,589	12,323
1925	153,413	7,818
1926	156,424	8,659
1927	156,050	7,634
1928	85,784	3,643

Rum.—The quantity and value of rum exported during the last five years is as shown below :—

Year.	*Quantity.* P. Gals.	*Value.* £
1924	95¾	29
1925	63	25
1926	37	11
1927	1,700	212
1928	1,323	218

Practically all the rum produced in the island is consumed locally.

Cacao.—The cacao market was fairly steady, and growers gave more attention to their plantations. The average quality of beans produced was an improvement on that of five years ago. Owing to extended wet weather the crop was short, showing a reduction of 1,176 cwt. on the previous crop.

The quantity and value of cacao exported during the last five years are as follows :—

Year.	*Quantity.* Cwt.	*Value.* £
1924	12,163	21,267
1925	10,444	22,339
1926	10,037	22,454
1927	12,183	30,560
1928	11,006	27,321

Limes.—Due to the presence of "Wither-tip" the output was little more than half of that of the previous year, but the high prices of lime oils which continued throughout the year considerably enhanced the market value.

The quotations for concentrated lime juice increased from £20 to £25 per pipe c.i.f., handpressed lime oil from 38*s*. to 62*s*. per lb., and distilled lime oil from 25*s*. to 33*s*. per lb.

Calculated in barrels of green limes the crops for the last five years are :—

Year.	*Quantity.* Barrels.
1924	52,238
1925	63,406
1926	59,415
1927	58,948
1928	30,107

Coconuts and coconut products exported during the last five years are shown in the following statements :—

Coconuts.

Year.	*Quantity.* Number.	*Value.* £
1924	199,669	204
1925	123,516	432
1926	118,501	381
1927	96,813	351
1928	141,667	499

Coconut Oil.

Year.	*Quantity.* Gals.	*Value.* £
1924	Information not available.	
1925	6,323	791
1926	19,081	3,847
1927	3,921	735
1928	931	184

Copra.

Year.	*Quantity.* Cwt.	*Value.* £
1924	1,806	2,199
1925	1,981	3,563
1926	1,591	1,808
1927	4,077	4,409
1928	6,301	8,690

Coconut Meal.

Year.	*Quantity.* Tons.	*Value.* £
1924	Information not available.	
1925	12	106
1926	42	778
1927	7	88
1928	4	38

Bananas.—The exports during the last five years were as follows :–

Year.	*Quantity.* Bunches.	*Value.* £
1924	4,190	256
1925	20,818	1,374
1926	46,209	4,356
1927	27,052	2,351
1928	5,543	338

IV.—TRADE AND ECONOMICS.

The state of the trade of the Colony as reflected by the values and quantities of imports and exports during the year 1928 as compared with 1927 was as follows :—

Imports.

	1928. £	1927. £
I. Food, drink, and tobacco	80,669	78,679
II. Raw material and articles mainly unmanufactured.	46,418	39,512
III. Materials wholly or mainly manufactured.	105,703	103,640
IV. Miscellaneous and unclassified articles including Parcel Post.	9,263	7,014
Total value	£ 242,053	£228,845

The above table shows increases over the previous year in every class of imports, class IV being highest with 32 per cent.

The values of imports for 1928 and 1927, classified according to country of supply, were as follows :—

	1928.	1927.
	£	£
United Kingdom	92,756	67,910
Other parts of the British Empire ...	67,297	62,647
Foreign Countries...	73,959	91,713
Parcel Post	8,041	6,575
	£242,053	£228,845

The effect of preference in the above figures is very clear, for while imports from the United Kingdom have increased by £24,846 or 36.58 per cent. and from the other parts of the British Empire by £4,650 or 7.42 per cent. those from foreign countries have decreased by £17,754 or 19.36 per cent.

The values of imports of articles amounting to £5,000 or more for 1927 and 1928 were as follows :—

Article.	1927.	1928.
	£	£
Boots and Shoes	5,635	7,518
Coal, bituminous	28,407	25,229
Cotton—		
Piece goods	19,225	10,930
Other manufactures	5,366	13,904
Fish, salted, dried, etc.	9,596	9,394
Grain, etc., Flour	24,411	25,367
Machinery, sugar manufacturing ...	4,073	10,519
Oil, edible	7,169	6,274

Coal, the chief item, is seen from the above figures to have declined by £3,178 or 11.19 per cent. On the other hand, sugar manufacturing machinery increased by no less than £6,446 or 158 per cent., which is gratifying evidence of an effort to develop further this important industry. The recent serious fall in the price of sugar is most unfortunate and disheartening for the planters who were doing all in their power to increase the efficiency of their factories.

There would appear to be some openings for British products, as shown by the following table :—

Article.	*Total value of Imports in* 1928.	*Imports from British Empire.*
	£	£
Cotton manufactures, piece goods	10,930	7,489
Manures	2,625	1,210
Iron and Steel manufactures ...	3,188	610
Wood and Timber—Shooks and Staves.	1,220	32
Bags and Sacks, empty	4,223	3,642
Butter and substitutes	3,811	1,638
Oleomargarine	2,152	117
Motor-cars...	3,507	2,785
Cement	4,192	1,448
Totals	£35,848	£18,971

Exports.

The values of exports in 1928, classified under four main divisions, were as follows :—

	1928.	1927.
	£	£
I. Food, drink and tobacco	108,567	134,348
II. Raw materials and articles mainly unmanufactured.	49,505	47,391
III. Articles wholly or mainly manufactured.	31,836	27,208
IV. Miscellaneous	730	371
V. Bullion and Specie	7,198	4,284
Total value	£197,836	£213,602

The above shows a decrease during 1928 in class I only, due mainly to a falling off in the exports of sugar, molasses, concentrated lime juice, and cocoa.

The following table shows the character and individual values of the main exports :—

	Value in 1928.	*Value in* 1927.
	£	£
Cocoa	27,321	30,560
Lime and Lime products...	29,687	27,337
Sugar	63,050	76,435
Fancy syrup and Molasses	3,643	7,634
Logwood	2,338	2,027
Bunker Coal	35,411	37,663
Copra	8,690	4,409

The values of the exports, domestic and other, classified according to destination, were as follows :—

EXPORTS (MERCHANDISE).

Destination.	£	*Total* 1928. £	*Total* 1927. £
United Kingdom—			
Domestic Exports	56,419		
Re-exports (not including Bullion and Specie).	110		
		56,529	37,898
Other parts of the British Empire—			
Domestic Exports	58,473		
Re-exports (not including Bullion and Specie).	4,426		
		62,899	92,625
Foreign Countries—			
Domestic Exports	34,828		
Re-exports (not including Bullion and Specie).	416		
		35,244	40,777
Ships' Stores—Re-exports ...	555		
Bunkers—Re-exports	35,411		
		35,966	38,018
Totals		£190,638	£209,318

Coaling.—The coaling business, for which there are exceptional facilities ensuring the quickest despatch, and which had for many years been a source of considerable wealth to the Colony, has fallen off greatly with the reduction in the number of steamers calling for bunkers. It still, however, affords an appreciable amount of irregular employment to a number of labourers living in the capital and its vicinity.

V.—COMMUNICATIONS.

Shipping.—The number of ships entered and cleared during the year was 1,057, of a total tonnage of 1,222,306 tons. Of this total 533 were steam and 524 sailing vessels.

Mail communication is maintained by (1) a regular fortnightly steamer service to other West Indian Colonies and to Canada, (2) a monthly service via Martinique to Europe by means of the French mail steamer, and (3) a monthly service to the United States of America and the West Indian Colonies by the Quebec Steamship Company. There are other frequent mail opportunities via Barbados and America and direct to Europe.

Roads.—The road system of the island was further improved during the year. Three sections of main road, aggregating 2½ miles, were throughly reconstructed and surfaced with oil. Other sections were widened, regraded and diverted to facilitate increased motor traffic.

The mileage of roads in the Colony is as follows :—

Main roads	125
By-ways	144
Unclassified roads	74
	343

167 miles are suitable for motor traffic.

Passenger subsidised motor-bus services were regularly maintained between Castries and Dennery and Vieuxfort and Soufriere.

The Government 50 ton motor-launch supplied a regular service between Castries, Soufriere, Vieuxfort, and the villages of Anse-la-Raye, Canaries, and Laborie.

Telegraphic communication is maintained by the Pacific Cable Board ; there is also the West India and Panama Telegraph Company, Limited, the latter no longer subsidised by the Government.

Inland Telegraphs.—There is no telegraph system in the island.

Telephones.—The telephone system is operated entirely by the Government and consists of 110 miles of trunk lines and 204 miles of branch lines, ten exchanges and 210 subscribers.

A thorough reconstruction of rural lines was effected during the year and new switchboards installed at Castries, Soufriere, and Dennery.

VI.—JUSTICE, POLICE, AND PRISONS.

Justice is administered by the Royal Court, over which the Chief Justice presides, and by three District Courts, over which two Magistrates preside. The Royal Court has an original civil and criminal jurisdiction and also decides appeals from the Districts Courts. Appeals from the Royal Court are heard and determined by the West Indian Court of Appeal constituted under the West Indian Court of Appeal Act, 1919, of the Imperial Parliament.

An adequate Police Force is maintained to enforce the decisions of these bodies and to provide generally for the peace of the Colony and the security of life and property. Besides ordinary Police duties, this Force assists in the administration of Poor Relief, and it has, since the Castries Fire of May, 1927, provided the main portion of the Castries Fire Brigade.

There is one gaol, the Royal Gaol, situated in Castries, which contains separate prisons for male and female convicts. The institution has its own bakery which supplies excellent bread to all the public institutions and, in addition to stone-breaking and carrying out useful work outside the walls, certain of the prisoners are taught carpentry, tailoring, and shoemaking.

VII.—PUBLIC HEALTH.

The general health of the Colony during 1928 was fair, the only epidemic occurring being a small outbreak of para-typhoid fever in the isolated village of Canaries. The incidence of malaria was the lowest recorded since 1922.

The Medical Department consists of a Chief Medical Officer who is also Resident Surgeon of the Victoria Hospital, Castries, and six District Medical Officers as well as a Sanitary Department. The Department maintains a Port Health Officer, a suitably equipped Quarantine Station, and Pauper, Leper, and Lunatic Asylums.

The Victoria Hospital, the principal hospital, is situated one mile outside of Castries and there are three small Casualty Hospitals situated in Soufriere, Vieuxfort, and Dennery, the three towns next in importance to Castries. The Victoria Hospital was during 1928 re-modelled and brought up to modern standards, particular attention being paid to sanitation. There is a Resident Surgeon in charge and he is assisted by a staff consisting of a European Matron and local nurses and dispensers. There is a private wing with six rooms assigned to paying patients.

Sanitation and Hygiene.—Established routine work was carried out throughout the year. This included the regular periodical inspection of all inhabited areas, houses, estates, barracks, and school-houses; inspection of markets, slaughter-houses, bakeries, provision shops, mineral water factories, and ice factory. Particular attention was paid to the scavenging and cleaning of towns and villages and to the disposal of excreta and of refuse throughout the Colony.

Anti-malarial measures included general work of reclamation, swamp clearing, particularly a large area of swamp land in Vieuxfort, the restocking of pools with " millions " fish, the clearing of ravines, regular attention to the banks of rivers and streams which were overgrown with weeds, the keeping open of lagoons and river mouths, the proper covering of all receptacles for holding water and general instruction, especially to the poorer classes of the community, in the prevention of mosquitoes. Quinine for prophylaxis was available.

The town of Vieuxfort was granted the boon of a pipe-borne water supply.

The Bakeries Regulations which had never previously been enforced were brought into operation and this is resulting in cleaner methods in the making and handling of bread.

VIII.—EDUCATION.

Primary Education.—There are 49 primary schools, which are all denominational, assisted by Government Grants in Aid. Forty-two of these are Roman Catholic, four Anglican, and three Wesleyan. The teachers' salaries are almost wholly paid from the Grants in Aid, which total nearly £5,000 per annum, the religious denominations contributing less than £50 per annum towards the sum required for that purpose. The grants are administered by an Inspector of Schools, a Government Officer who exercises general supervision and direction of them, subject to the ultimate control of the Governor-in-Council. Primary education is free and compulsory between the ages of 4 and 14 years, but it is probable that not more than 60 per cent. of the children between those ages attend school.

Instruction is provided in reading, writing, dictation, arithmetic, English recitation, and hygiene. In the lower standards English is also taught by means of object lessons, while the upper standards take English composition, English grammar, and geography. Instruction in elementary agricultural science for boys, both theoretical and practical, and in domestic economy for girls, including practical cooking, is also given. Many of the schools have good gardens, the care of which provides the pupils with practical work in agricultural science. The results obtained are on the whole good.

Secondary Education.—A secondary course for boys is provided by St. Mary's College, and for girls by St. Joseph's Convent School. The course at St. Mary's College now includes agricultural science. These schools prepare their pupils for the Cambridge University Local and London University Matriculation Examinations with considerable success. The St. Lucia Scholarship of the value of £175 per annum is awarded by the Government biennially, on the results of the London University Matriculation Examination, to candidates having the requisite residential, educational, and other qualifications. A choice of universities, or of agricultural, scientific, or technical colleges, or institutions, in Europe, Canada, or the United States, approved by the Governor-in-Council, is permitted. The scholarship is tenable for not less than three and not more than five years, according to the time required for the completion of the course of study sanctioned. At the end of 1927 seven scholarships had been awarded.

Eighteen scholarships at St. Mary's College are awarded by the Government to boys attending primary schools, on the results of competitive examinations. These scholarships are tenable for one year and are then renewable from year to year for five years more.

IX.—LABOUR.

There is, generally, an ample supply of labour for the requirements of the Colony. Employment is offered chiefly on sugar estates and other of the larger properties, by the Public Works Department for

work on the roads, and by the coaling companies for bunkering steamers. There is a steady demand for tradesmen, but the supply is limited. So far as can be ascertained the relations between employers and labourers have been satisfactory. A fair number of St. Lucia labourers are recruited periodically for work in Cuba and Santo Domingo. All arrangements in regard to this labour are made through the Government, and the recruiting agents are required to enter into a strict bond and agreement for carrying out the terms of the contract made between them and the labourers.

X.—MISCELLANEOUS.

His Excellency the Governor of the Windward Islands, Sir Frederick Seton James, K.B.E., C.M.G., was in residence in the Colony from 26th January to 1st May.

Mr. C. W. Doorly, the newly appointed administrator, arrived in the Colony on the 26th February and was sworn in the next day.

Mr. C. A. Pickwoad left the Colony on the 20th March after having acted as Administrator and Colonial Secretary for four months. Mr. Pickwoad rendered most valuable service during the short period he was in the Colony, especially in the direction of clarifying the financial situation.

A sitting of the West Indian Appeal Court was held at Castries on the 21st August.

The following British ships of war visited the colony during the year :—

H.M.S. *Colombo* in March.
H.M.S. *Cairo* in April.
H.M.S. *Heliotrope* in January, March, and April.

CHAS. W. DOORLY,

Administrator.

Geographical.

The Island of St. Vincent, which is of volcanic origin, is popularly supposed to have been discovered by Columbus on the 22nd January, 1498. It is situated in 13° 10′ North Latitude, and 60° 57′ West Longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the Government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown, the capital of St. Vincent.

Historical.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the Island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was again declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the Island was taken in 1762 by General Monckton ; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the Island surrendered to the French, and by the Treaty of Versailles, in 1783, it was restored to Great Britain.

Language.

The language of the Colony is English.

Currency.

British and American gold, five-dollar notes of Barclays Bank (Dominion, Colonial and Overseas), and British silver and bronze coins constitute the currency of the Colony. Government accounts are kept in sterling and commercial and banking accounts in dollars and cents. Imperial weights and measures are in use.

Climate.

St. Vincent is reputed to be one of the healthiest of all the West Indian Islands. The climate may be divided into two seasons, wet and dry ; the dry season from January to May, and the wet season from June to December. The coolest months are December to April.

The temperature throughout 1928 varied from 78° F. to 85.6° F. The highest was in July and the lowest in December ; the mean monthly temperature was 80.4° F. as against 80.3° F. in 1927.

The rainfall at the Agricultural Experimental Station in Kingstown, 80 feet above sea-level, was 95.28 inches in 1928, as compared with 98.45 inches in 1927. The greatest fall for one day was 2.47 inches on 17th November.

The reading of the barometer, corrected for instrumental error, elevation, temperature, and latitude, ranged from 30.079 on 27th February to 29.758 on 12th September, 1928.

I.—GENERAL.

The event of most importance during the year under review and one of far-reaching results was the inauguration of the steamship service provided for under the Canada-West Indies Trade Agreement of 1925 when on Christmas Day the s.s. *Lady Nelson* of the Canadian National Steamships dropped anchor in Kingstown Harbour.

II.—FINANCIAL.

The financial position of the Colony on the 31st December, 1928, was :—

	£
Net surplus at 1st January, 1928	16,414
Revenue in 1928	64,593
	£81,007
Expenditure in 1928	60,441
Net Surplus at 31st December, 1928	£20,566

The revenue and expenditure for the last five years were as follows :—

	Revenue.	*Expenditure.*
	£	£
1924	60,893	53,887
1925	62,450	53,190
1926	60,243	59,282
1927	56,469	61,564
1928	64,593	60,441

The revenue for 1928 is the highest on record.

The principal items of revenue in the last five years were :—

	1924.	*1925.*	*1926.*	*1927.*	*1928.*
	£	£	£	£	£
Import duties ...	25,869	26,379	26,683	24,649	28,137
Export duties ...	3,032	2,982	2,959	2,587	2,849
Excise duty on rum ...	2,938	5,816	6,479	4,685	4,137
Land and House tax ...	5,882	6,337	4,124	3,442	5,766
Income Tax	3,947	4,504	3,014	2,480	2,702
Liquor trade duty ...	2,934	2,736	3,013	2,820	3,127
Postage stamps ...	2,334	1,732	1,774	1,875	3,695

The Public Debt of the Colony on the 1st January, 1928, was £9,170, of which £810 was redeemed during the year, thereby leaving the debt at the close of the year at £8,360, made up as follows :—

	£
The Public Works Loan, 1913	400
The Public Works Loan, 1914	750
*The Kingstown Board Loan, 1914	1,060
The Public Purposes Loan, 1915	1,200
The War Loan, 1916	1,750
The Windward Highway Loans, 1917, 1919, and 1920	3,200
	£8,360

The accumulated sinking funds provided for redemption of loans stood on the 31st December, 1928, at £5,802, of which £4,938 was in respect of Government loans and £864 in respect of the Kingstown Board loan.

The investments on behalf of the Loans Redemption Fund stood at the close of the year as follows :—

	£	*s.*	*d.*
Imperial Treasury Bonds 4½ per cent. ...	1,152	12	9
War Loan Stock 5 per cent.	2,602	15	8
Westminster Bank	1,182	10	3
	£4,937	18	8

* The Colony is only responsible for redemption of this loan in case of default by the Kingstown Board.

The investments on behalf of the Kingstown Board Sinking Fund stood as follows :—

	£	s.	d.
Westminster Bank	103	0	3
Imperial Government Treasury Bonds 5 per cent.	760	18	4
	£863	18	7

The unexpended balance of £25,000 of the Eruption Relief Fund made up from donations from the public in England and elsewhere at the time of the eruptions in the Soufrière Volcano in 1902–1903, is invested and held as a reserve or insurance fund against any future elemental disaster. The annual interest derived from this balance, amounting to £750, is put to general revenue and applied to the relief of the poor. This amount, together with the Colony's Reserve Fund of £11,000, offers excellent security both for elemental disasters and economic depression.

The amount to the credit of the Public Property Insurance Fund which was started during the year 1926, stood at the close of the year 1928 at £2,442.

III.—PRODUCTION.

Cotton.—Yield of Sea Island cotton during year was poor owing to heavy attack of cotton worm and soft rot.

The question of altering the close season from April to September is under consideration.

349,246 lb. of lint were exported being 97,000 lb. less than in 1927.

The area under cotton in St. Vincent and the Grenadines during 1928 was 4,381 acres—3,386 acres Sea Island and 995 acres Marie Galante—as compared with 4,358 acres in 1927—3,364 acres Sea Island and 994 Marie Galante.

Arrowroot.—Arrowroot may be looked upon as one of if not the most important staple product in St. Vincent. No less than 3,870,420 lb. were exported from the Colony during 1928, valued at £64,508, showing an increase of 674,942 lb. as compared with 1927. The United Kingdom took 1,933,436 lb., United States 1,408,672 lb., Canada, Barbados, Germany, France, and Holland absorbing practically the balance. The consumption in the United States is steadily increasing. The campaign inaugurated by the St. Vincent Arrowroot Growers and Exporters Association twelve months ago through the medium of the West India Committee to advertise St. Vincent arrowroot in England is beginning to bear good fruit. The Empire Marketing Board have given valuable assistance both by a money grant and propaganda work.

Sugar.—The sugar and syrup industry continues to expand. 929 tons of sugar (valued at £14,190) and 167,000 gallons of syrup (valued

at £9,478) were exported. Sugar shows an increased exportation of 1,240,960 lb. over that of 1927. Market value of sugar working out at a rate a little less than £15 per ton.

Coconuts.—It is satisfactory to note the steady increase in the production and export of copra. The year 1928 shows an increase of no less than 25 per cent. over that of 1927. Several hundred acres are being planted yearly and the industry is fast becoming one of considerable importance to the Colony. Copra was valued at £18 6*s.* 0*d.* per ton.

Of the minor industries peas, beans, ground-nuts and sweet potatoes showed a marked increase, ready markets absorbing all that was produced.

The question of the building up of a fruit and vegetable trade with Canada is occupying the attention of the Government and the Chamber of Agriculture and Commerce. Now that improved communication and refrigerator accommodation has been established it is anticipated that active steps will be made to bring this into force forthwith.

A consignment of 331 lb. of Manila hemp was prepared and sent to the Imperial Institute. The report on this consignment was most encouraging, clearly indicating that Manila hemp can be successfully grown and prepared in the Colony. The report further states that commercial quantities would be readily saleable in the London market. That sent was sold at the rate of £37 10*s.* 0*d.* per ton. The cleaning of twenty pounds of fibre is regarded as a good day's work for a trained labourer in the Philippines.

The appended table shows the comparative amount of the annual exports of the principal commodities during the last five years :—

Articles.	1924.		1925.		1926.		1927.		1928.

		£160,810		£158,037		£158,420		£145,815		£155,884

In the reports for 1925 to 1927 the value of arrowroot exported in 1925 was incorrectly shown as £125,078 and the total value of Exports in the same year was consequently also incorrectly shown as £229,941. The correct value of arrowroot exported in 1925—£53,174—is now shown, making total value of Exports for 1925 £158,037.

IV.—TRADE AND ECONOMICS.

The total values of imports and exports for the last five years were :—

Year.	Imports.	Exports. Island Produce.	Exports. Other.	Total.
	£	£	£	£
1924	160,028	150,811	51	150,862
1925	211,907	229,941	2,491	232,432
1926	203,606	158,420	4,489	162,909
1927	172,097	145,213	602	145,815
1928	192,476	155,884	2,588	158,472

The following table shows the value of imports and countries of origin for the past five years :—

	1924.	1925.	1926.	1927.	1928.
	£	£	£	£	£
United Kingdom	51,834	75,914	67,425	55,812	62,335

United States of America	6,931	14,136	20,613	28,491	30,628
Other Countries	789	514	1,142	1,925	2,262

V.—COMMUNICATIONS.

Shipping.

The number of vessels entered was 386, of 356,822 tons, and cleared was 386, of 356,791 tons. Two vessels of a total tonnage of 37 were registered during the year, one of which was built in the Colony.

The steamship service contemplated under the Canada—West Indies Trade Agreement of 1925 was inaugurated towards the close of the year, the first steamer, the " Lady Nelson ", arriving in the Colony on her south-bound voyage on Christmas Day. The Colony is therefore now served by a regular fortnightly mail, passenger and cargo service of the Canadian National Steamships.

The steamers of the Harrison, Furness Withy, Trinidad and Ocean Dominion lines paid calls during the year.

Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, whence there is direct communication by sea to the United Kingdom and the United States of America.

Roads.

The road system of the island consists of 34 miles of highway on the windward side, suitable for motor traffic, and 28 miles on the leeward side, about 15 miles of which are suitable for motor traffic.

The highway on the windward side is the main artery of traffic, but on the leeward side the sea is the natural highway.

In addition to the highways there are some 280 miles of by-ways which act as feeders from the interior to the main roads.

The question of raising a loan for the purpose of improving the existing roads of the Colony was brought under consideration and it is hoped that a loan of approximately £10,000 will be raised during the coming year.

Postal.

There is a central post office in Kingstown, the capital of the island, and 17 offices in out-districts.

Mails are sent to the windward side of the island by motor-car, to the leeward side by motor boat, and to the Grenadines by sailing vessels.

There is no inland telegraph service. The West India and Panama Telegraph Company maintained their cable station throughout the year and there is a wireless station operated by the Pacific Cable Board as part of the All-British System authorised by the West Indian Islands (Telegraph) Act, 1924, of the Imperial Parliament.

Telephones.

The Government maintains a telephone system which connects Kingstown with exchanges in districts. There were 227 services and 188 miles of line in use.

VI.—JUSTICE, POLICE, AND PRISONS.

(a) Justice.

There was one sitting of the West Indian Court of Appeal in St. Vincent during the year.

Twelve criminal cases were tried by the Supreme Court and nine convictions were obtained. The number of actions filed in the Supreme Court was 9. There were 7 appeals from Magistrates' decisions. The number of Causes filed in the Summary Jurisdiction of the Court was 51.

In the Magistrate's Court, District 1, the civil matters dealt with amounted to 558. 770 persons were charged in 1928, as against 854 in 1927. Fines collected amounted to £191, a decrease of £26 on the preceding year.

In the Magistrate's Court, District 2, the civil matters dealt with amounted to 1,234. 1,164 persons were charged in 1928, as against 1,367 in 1927. Fines collected amounted to £264, as against £229 in 1927.

(b) Police.

The authorised strength of the Force remained at two officers, 52 other ranks, of whom four were permanently employed at the prison.

The general health of the Force was fair.

Discipline was on the whole satisfactory.

Fire drill was carried out weekly and all hydrants and fire appliances regularly inspected.

The Police Recreation Room and Canteen, started in 1926, continued to run successfully during the year. Both institutions are a great benefit to the Force and much appreciated by the crews of His Majesty's ships when visiting the Colony.

(c) Prisons.

The prison staff throughout the year consisted of :—

4 Police Constables, including the Non-Commissioned Officer who is Keeper,
4 Warders, three of whom are skilled in trades,
1 Clerical Assistant,
1 Matron.

Total 10

At the beginning of the year the number of prisoners was 35—31 males and 4 females. The total admissions during the year were 120, of whom 66 were males and 54 females.

The daily average was 26.58.

The highest number of prisoners at any time was 35—the lowest, 20.

The general health of the prisoners was fair and conduct satisfactory.

VII.—PUBLIC WORKS.

Considerable attention was paid to the leeward by-ways—feeders to the main leeward roads—to enable the peasants to convey their produce to the main roads and the coast, the latter being the natural and only economical method of transportation on the leeward side of the Colony.

The usual repairs and maintenance of Government buildings were carried out, but no works of a major class were carried out during the year.

Water Supply.

A water supply for the town of Chateaubelair was laid down at a cost of £1,000. Thus a long-needed want was supplied and an adequate and bacteriologically pure supply of water was given to the inhabitants.

VIII.—PUBLIC HEALTH.

The population of the Colony at 31st December, 1928, was 51,426.

The birth-rate for the year was 38.75 per thousand, as against 37.25 in 1927.

Legitimate births numbered 555, and illegitimate births 1,438 : the percentage of illegitimate births, viz., 72.2, being exactly the same as in 1927.

The death-rate per thousand for the year was 20.28, as compared with 16.45 in 1927.

The deaths of infants under one year (exclusive of still-births) numbered 251, as against 199 in 1927.

There were 113 still-births, of which 21 were legitimate and 92 illegitimate.

There were only 10 cases of enteric fever during the year, as against 13 in 1927 and 48 in 1926.

There were 582 cases of influenza recorded, with 8 deaths.

There were 1,203 cases of diarrhoea in children under two years of age, with 113 deaths.

A great number of cases of malaria was reported in 1928—1,046 with 15 deaths. A very definite epidemic occurred in the Buccament Bay settlement. The anopheline breeding grounds were traced to the lagoon and a water canal no longer in use. Steps were immediately taken to eradicate this and the lagoon and canal filled in. House to house inspection was made daily and quinine medication enforced. As a result the epidemic was controlled.

A course of lectures and demonstrations was given during the year for those desirous of qualifying as Sanitary Inspectors. Six candidates took the course and four qualified and received local certificates of efficiency.

The new Public Health Ordinance passed in 1927 was brought into operation from 1st April, 1928. Under this Ordinance the control of sanitation throughout the Colony is vested in one central authority, the executive functions of which devolve on the Chief Medical and Health Officer.

IX.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1926, 1927, and 1928 :—

	1926.	*1927.*	*1928.*
Number of Schools	28	28	30
Number of pupils on roll at 31st December.	5,407	5,732	6,620
Average attendance	2,892	2,969	3,410
Government Grant-in-aid	£3,335	£3,686	£4,066
Cost per head in average attendance	£1 3*s.* 0¾*d.*	£1 4*s.* 10*d.*	£1 3*s.* 10*d.*

Eleven of the thirty regular schools belong to the Government, which bears the whole cost of their maintenance. Religious denominations provide and are responsible for the upkeep of the buildings of the nineteen other schools. The salaries of the teachers, however, and the greater part of the other expenses of these schools, are paid from public funds.

There were six other schools of a primary education standard, known as "Aided Schools," which were assisted by small Government grants to the extent of £88.

The Government maintains in Kingstown a secondary school for the education of boys—the Grammar School—and one for girls—the Girls' High School. The average attendance in 1928 was 67 boys and 61 girls, as compared with 71 boys and 58 girls in 1927. There is a system of Government scholarships to the Grammar School for pupils from the primary schools.

There is an Island scholarship awarded biennially under Ordinance No. 41 of 1921, tenable for not less than three and not more than five years at an approved University. The annual value is £250 and the cost of passage is also defrayed.

Provision exists for the Town Board of Kingstown to expend certain sums on scholarships at the secondary schools on lines similar to the Government Scholarships.

X.—CROWN LANDS AND SURVEYS.

The following table shows the revenue derived from Crown Lands and from Land Settlement Land :—

	Crown Lands.			*Land Settlement.*			*Total.*		
	£	*s.*	*d.*	£	*s.*	*d.*	£	*s.*	*d.*
1924	511	5	0	1,104	12	7	1,615	17	7
1925	469	8	6	578	2	11	1,047	11	5
1926	450	8	10	632	2	2	1,082	11	0
1927	482	4	5	585	1	4	1,067	5	9
1928	725	8	4	1,063	11	5	1,788	19	9

The marked increase in 1928 was due to the prosecution of defaulters in their districts instead of bringing them into Kingstown.

No surveys by private surveyors were made, but the following were executed by the department :—

1. Re-establishment of boundaries at Belair Land Settlement.
2. Re-establishment of boundaries at Clare Valley-Questelles.
3. Resumption of areas for roads at Clare Valley and Perseverance.
4. Survey to provide a road from Cumberland to Chateaubelair.
5. Survey in connection with proposed water supply at Troumaca.

No work in connection with geological survey was undertaken.

XI.—LABOUR.

There is no immigration of labour into the Colony, but emigration is on the increase. Large numbers emigrate to Cuba, Santo Domingo Curaçoa, and Oruba. Cuba and Santo Domingo attract the agricultural labourer where high wages on the sugar plantations and the idea of seeing the world appeals. At Curaçoa and Oruba the large oil refining operations offer openings for artisans.

The average wage on an estate in St. Vincent is 1*s.* 2*d.* per day, but work is usually done by the task and a labourer who chooses can earn in some cases as much as 2*s.* a day. It is found, however, that many of the labourers if better paid simply refuse to do a full week's work. A considerable amount of the work on estates is done by women.

XII.—MISCELLANEOUS.

Banks.

There is a branch of Barclays Bank (Dominion, Colonial and Overseas) with a Savings Department, and Government maintains a Savings Bank.

Agricultural Credit Societies.

There are twenty-one Agricultural Credit Co-operative Societies in the Colony, but several of them are not functioning and some cannot be said to be working satisfactorily. Steps are being taken to cancel the registration of the unsatisfactory Societies.

Government Cotton Ginnery.

The purchase of Sea Island seed cotton and corn on profit-sharing terms was continued during the year.

Map.

A map of the Island is annexed.

Introduction.

Geographical.

Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British Island to the mainland of South America with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad and between the parallels of 12° 30′, and 11° 58′, North latitude and 61° 20′, and 61° 35′, West longitude. The island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but, including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coastline is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, land-locked and deep watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang being situated near the centre of the Island 1,740 feet above sea-level, while the other, Lake Antoine, is near the sea on the eastern coast. A Sanatorium is established near the former.

Historical.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the Island was left in the undisturbed possession of the aboriginal inhabitants who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the Island, and after being owned by French proprietors for some years it was annexed to France in 1674. In 1763 the Island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783 by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–96, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ringleaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

Climate.

The climate from December to end of April may be described as good, as during that period the heat is tempered by the prevailing trade winds. In the autumn from July to end of October, there is great humidity and extreme heat, with little variation between night and day. During this period the climate may be described as debilitating to Europeans although not really unhealthy. When the electric lighting scheme which is being installed in St. George's is completed, the introduction of fans in houses and offices will improve conditions in that town and adjacent area. The highest temperature in 1928 was 90 degrees on several occasions from July to November, and the lowest 60 degrees on 8th August. The mean of maximum temperatures was 89 degrees and the mean of minimum 70 degrees. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches. In the mountainous centre it approaches 140 inches. At St. George's, midway between the two the rainfall in 1928 was 63.90 inches. Over the past 30 years the average at St. George's has been 72.20 inches.

Language.

The only language spoken is English. A small and decreasing number of agricultural labourers in the country districts speak a corrupt patois of English and French, but all understand and speak English.

Currency.

The currency is the same as in Great Britain, the monetary units being the same. Silver, however, is legal tender without limit, and there are also in circulation bank notes of Barclays Bank and the Royal Bank of Canada of five dollars denomination. One or two of the business houses keep their accounts in dollars and cents, but the Government accounts are in sterling.

Weights and Measures.

Weights and measures are of the Imperial standard. An exception to this has arisen recently in connection with motor spirit, which is sold by the wine or American gallon.

I.—General.

The financial and commercial position of the Colony has maintained a satisfactory level, after several years of steadily improving conditions. In his Address to the Legislative Council on the presentation of the Budget in December, His Excellency the Governor stated that there were "indications that the increase in the market prices of two of the principal products of the Colony, nutmegs and mace, may possibly be regarded as now being stable." These prices, as compared with those existing immediately before the outbreak of war in 1914, show an extraordinary rise, the range being from 35*s.* to 89*s.* per cwt. in the case of nutmegs and from 152*s.* to 311*s.* per cwt. as regards mace. As in both cases the volume of the crops has increased since 1913 by more than 40 per cent., the combined result has been a widespread improvement in the financial resources of the people and the Government. Numerous new buildings have been erected by private persons, while a large programme of public works has been carried out by the Government without encroaching on reserves, which are now much higher in amount than ever before, the total surplus assets, including an Invested Reserve of £50,000, being £113,159.

The various activities to which His Excellency referred in his previous year's Address made considerable progress during the year. The Central Water Authority was established and took over the control of the water supplies of the Colony as from the end of 1928. The Grenville Covered Market was practically completed, and will be formally opened this year. Its construction has greatly improved the town of Grenville, by the clearing of surrounding ground and opening of new roads.

The Queen's Park Bridge, the construction of which was begun towards the end of 1927, was completed during 1928, and was formally opened by His Excellency the Governor in January of the present year.

The corner stone of the Queen's Park Pavilion was laid by His Excellency shortly before his departure to England on leave, and the building was sufficiently advanced to allow of its utilisation at the Race Meeting in November. Work in connection with the installation of electric light in St. George's and reconstruction of the telephone system, which commenced early in 1928, is being continued and expected to reach completion this year.

The Committee appointed to advise regarding the manner in which Government grants-in-aid of primary education should be adjusted, in order to obtain more satisfactory results from the expenditure, submitted its report, which is now being considered by the Board of Education. The teaching staff of the Grenada Boys' Secondary School was strengthened by the appointment of a Science Master and a Mathematical Master, who took up their duties in January of this year. The enlargement of the school premises and the setting up of a Manual Training Centre will, as His Excellency announced, engage attention this year.

Amongst other events of the year were the revival of the Volunteer Force, with a proposed total composition of 1 Company of 5 Officers, and 82 other ranks, and of the St. George's Rifle Club with a membership of 50.

Resulting from a visit of His Excellency the Governor to the Grenadines early in the year, provision has been made in this year's Estimates for improvement of water supplies, and for increased visits of officers of the Medical Service to these Islands. Communication between Grenada and the Grenadines and St. Vincent is also to be improved by the purchase or construction of an auxiliary sailing vessel.

Among the visitors to the Colony during the year mention should be made of the Inspector-General of the West Indian Local Forces in August in connection with the establishment of the Volunteer Force, and of Professor Clark Powell who paid a visit towards the end of July on behalf of the Empire Marketing Board for the purpose of enquiring into the Grape Fruit Industry. His Excellency Sir F. S. James, K.B.E., C.M.G., was on leave in England from 5th July to 8th November, the Government of the Windward Islands being undertaken in his absence by Mr. Robert Walter, C.M.G., Administrator of St. Vincent, until 4th August when he went on leave, and thereafter by Mr. Herbert Ferguson, C.B.E., Colonial Secretary of Grenada.

II.—Finance.

Revenue.

The total revenue for the year amounted to £153,870.

The following table shows the total revenue during the past five years, with separate particulars of direct and indirect taxation :—

Year.	*Import Duties.*	*Export duties, Income Tax and other direct taxation.*	*Other Sources.*
	£	£	£
1924	50,116	47,206	20,131
1925	67,342	59,454	19,422
1926	62,471	64,704	21,271
1927	68,523	66,473	20,512
1928	71,434	61,905	20,531

Expenditure.

The expenditure for the year was £131,244, being less than the revenue by £22,626.

The following table gives a comparison of revenue and expenditure for the past five years :—

Year.	*Revenue.*	*Expenditure.*	*Surplus.*
	£	£	£
1924	117,453	106,003	11,450
1925	146,218	112,467	33,751
1926	148,447	119,001	29,446
1927	155,508	131,413	24,095
1928	153,870	131,244	22,626

No change took place during the year in the method of raising revenue.

Assets and Liabilities.

The excess of Assets over Liabilities at 31st December, 1928, was £113,159 comprising the following :—

	£
Invested Reserve Fund	50,000
Loans to District Boards...	16,071
Stores and Materials for Public Works Electricity Department and Colony Drug Store.	5,802
Land Settlement Advances	470
Other assets in liquid or readily available form	40,816
	£113,159

PUBLIC LOANS.

The net indebtedness of the Colony under public loans, after deduction of the amounts represented by sinking funds and repayments, at the end of 1928 was £164,361.

The particulars of the loans are as follows :—

	£	s.	d.
Inscribed Stock (Colony's share)	113,489	0	9
Inscribed Stock (District Board's share) ...	10,180	19	3
	£123,670	0	0
Sundry Debenture Holders, Local Loan Ordinance, 1917.	82,060	0	0
	£205,730	0	0
Stockholders for Electric Lighting and Telephone Reconstruction Loan.	40,712	9	4
Loan for Construction of St. Andrew's New Market.	6,366	0	11
	£252,808	10	3
Sinking Funds accumulated towards redemption.	88,447	2	9
Net Indebtedness	£164,361	7	6

III.—Production.

AGRICULTURE.

Cocoa.—This is the principal cultivation in the Island, and accounts for nearly 62 per cent, of the exports.

The quantity and value of the cocoa crops exported during the past five years are shown in the following table :—

Year.	*Quantity.* cwt.	*Value.* £
1924	85,394	201,547
1925	73,216	197,231
1926	83,384	223,290
1927	100,478	305,640
1928	91,444	274,461

Nutmegs.—The area under this cultivation is being steadily extended, and an increase in production should occur when the

young trees reach bearing stage. Crops and exports for the past five years have been as follows :—

Year.	*Quantity.*	*Value.*
	cwt.	£
1924	19,369	95,321
1925	21,762	145,861
1926	22,702	127,000
1927	21,238	103,444
1928	19,620	87,965

Mace.—This is a derivative of the nutmeg, being a lace-like covering of the kernel. It commands a high price. The quantities produced and exported in the past five years were as follows :—

Year.	*Quantity.*	*Value.*
	cwt.	£
1924	2,234	24,874
1925	3,843	39,606
1926	3,679	49,490
1927	3,733	59,145
1928	3,141	49,260

Cotton.—The cultivation of cotton is practically confined to the island of Carriacou. The type grown is Marie Galante, similar to the American (Middling Upland), and commanding a somewhat similar price in the Liverpool market. The following table gives the exports during the past five years :—

Year.	*Quantity.*	*Value.*
	cwt.	£
1924	2,842	15,180
1925	3,252	16,500
1926	3,159	14,040
1927	3,788	15,890
1928	2,568	10,735

There was a decrease in volume of all the principal crops of the Colony, the main cause being unfavourable weather conditions.

Various subsidiary crops are grown, principally sugar and limes. The quantity produced of the former does not come up to the quantity locally consumed, and importations of raw sugar amounted in 1928 to 1,324,107 lb., of the value of £10,123. The value of lime products exported in 1928 was £5,710. Grape fruit is being planted and will probably prove a successful subsidiary industry, although it has to be remembered that the remaining fertile land not already under profitable cultivation is limited, and development of new cultivations to any great extent could only be at the expense of uprooting other permanent crops.

Rum is manufactured at thirteen sugar estates, but none is exported, the production being barely equal to the consumption demand. The quantity made last year was 57,212.3 proof gallons.

Ice is manufactured at a factory in St. George's, aided by a subsidy from the Government.

Forestry.

A Forestry Board is constituted under an Ordinance, and looks after the preservation of rainfall by protecting mountain ridges from being denuded. There is power under the Forestry Ordinance to declare Rain Reserves, the owners of the mountainous areas so dealt with being compensated by remission of land tax. A Forest Reserve of 2,485 acres is established on Crown Lands at Grand Etang near the centre of the Island. The area is too small and too inaccessible for growing timber at a profit.

Mining.

There are no mines of any kind.

Fisheries.

There is no established fishing industry, but supplies of fresh fish are constant, as there are several good fishing grounds near the coast. The fishermen do not venture far from land, and pursue their occupation in small canoes and shallow boats.

The whaling industry at Glovers Island is now finally abandoned, and the factory which was established there is dismantled. The number of whales caught in 1925, when the factory was first started, was 105, the number in 1926 dropping to 72. All the whales except two were of the Humpback species (*Megaptera nodosa*). The other two were the Bryde Whale, a type not usually seen in these waters. The Bryde is supposed to be a mule whale, but in one of the two caught there was evidence of the foetus stage of its young.

Although whales are still occasionally seen, the numbers are not considered sufficient to enable a whaling industry on modern lines, entailing a certain indispensable minimum cost, to be profitably undertaken.

IV.—Trade and Economics.

The total value of import and export trade amounted to £874,545, imports representing £429,279 and exports £445,266, leaving an apparent favourable trade balance of £15,987.

The principal articles imported in the last three years were as follows :—

Imports.

Article.	*1928.*	*1927.*	*1926.*
	£	£	£
Flour	46,069	46,273	47,582
Cotton piece-goods	29,091	32,071	39,794
Wood, etc.—unmanufactured ...	18,883	8,881	22,739
Fish—dried	17,944	14,915	13,904
Sugar—unrefined	10,123	14,280	9,251
Rice	11,731	12,314	10,386
Boots and shoes	10,083	10,112	7,850
Motor-cars	10,775	10,086	14,439
Motor parts	8,635	7,347	—
Motor spirit	9,842	9,203	8,205
Kerosene oil	7,731	7,873	7,007
Manures	6,582	8,559	4,004
Biscuits, bread, &c.	5,725	6,547	5,774

The decrease in importation of cotton piece-goods is on account of merchants anticipating less demand than in previous years, while building activity in the Colony accounts for the increase in importation of unmanufactured wood.

The principal exports during the last three years were as under :—

Exports.

	1928.	1927.	1926.
	£	£	£
Cocoa	274,561	305,640	223,290
Spices, nutmegs ...	87,965	103,444	127,000
Do. Mace ...	49,260	59,145	49,490
Cotton, raw	10,735	15,890	14,040
Cotton seed	1,850	2,960	2,646

The sources of supply of imports and destination of exports in 1928 may be seen from the following table :—

	Imports.	*Percentage of total.*	*Exports.*	*Percentage of total.*
United Kingdom	163,185	37·9	194,442	43·7
United States of America	72,151	16·9	190,987	42·9
Canada	95,603	22·3	43,568	9·7
Other British Possessions	69,299	16·1	14,386	3·3
Other Foreign Countries ...	29,041	6·8	1,883	0·4

In the previous year the percentage of imports from the United Kingdom was 35.1 and exports to the United Kingdom amounted to 38.8 per cent.

V.—Communications.

(i) By Sea.

A fortnightly mail passenger and cargo service with Canada was established last year by the Canadian National Steamships Company, the service being undertaken by modern oil-burning vessels with excellent passenger accommodation and equipped with cold storage. The steamers start from Halifax, Nova Scotia, and land passengers on the return journey at St. John, New Brunswick, proceeding afterwards to Halifax to load for the voyage south.

Steamers of the Furness Withy Line supply a direct passenger and cargo service between Grenada and New York, calling at intervals of about ten to fourteen days. The voyage occupies seven days.

There is a regular direct monthly service to London by the passenger steamers of the Harrison Line, while frequent calls are made by cargo steamers of this Company, especially during the crop season from December to May.

The steamers of the Ocean Dominion Line from Canadian ports call at intervals of about a fortnight.

Numerous sailing vessels ply between Grenada and Trinidad and Barbados, and other neighbouring islands.

The Government is arranging for an auxiliary sailing vessel for communication with the Grenadines and St. Vincent, and occasionally with St. Lucia.

(ii) By Cable and Wireless.

The cable line of the West India and Panama Telegraph Company connects Grenada with the outside world.

A wireless station operated by the Pacific Cable Board, under a subsidy from the Government, is established in St. George's, and communicates direct with Barbados.

A subsidiary wireless station is installed at Carriacou, and communicates with Grenada.

(iii) By Land.

There is no inland telegraph service.

A telephone service—at present under reconstruction without interruption of business—has been established by Government for many years. There are six exchanges, and 959 miles of subscribers' lines. The number of subscribers last year was 732.

The island is well supplied by a good system of main roads and by-ways, kept in good repair by six motor road rollers. All the main roads and practically all the by-ways are suitable for motor traffic. The mileage of main roads is 115, and of by-ways, 274.

VI.—Justice, Police, and Prisons.

(i) Justice.

The criminal statistics of this Colony vary but little from year to year. Thus in the year under review the number of persons dealt with in the Summary Courts was 2,520, as compared with an average of 2,572 for the three preceding years.

Out of this total of 2,520, the number of summary convictions was 1,740 and that of convictions in the Supreme Court 23, as compared with an average during the three preceding years of 1,837 summary convictions and 18 convictions on indictment.

There was a slight decrease of convictions for praedial larceny, the number being 143 as against 146 in 1927, 190 in 1926, and 259 in 1925.

Two cases of homicide occurred during the year and were sent on for trial in the Supreme Court. Of these, one was convicted of manslaughter and the other remains to be tried at the next sitting of the Court. Two cases of rape occurred, but there was no case of offence against property with violence to the person.

(ii) Police.

The strength of the police force on 31st December, 1928, was 1 Officer-in-Command, 1 Inspector, and 88 non-commissioned officers and men. Rural Constables to the number of 208, employed on special occasions, were also on the roll.

In addition to the ordinary police duties, the Police Department assists in the protection of revenue, administration of poor relief, inspection of shops and weights and measures, while a Fire Brigade and Government Band are under its management and control.

(iii) Prisons.

A prison for males, with an adjacent separate building for females, is situated near Richmond Hill, St. George's.

During the year 90 persons were committed to the male prison, and 26 to the female prison, the daily average of inmates for the two prisons being 26.3 and 4.3 respectively.

No death occurred among the prisoners, and the health of the prisoners was satisfactory.

VII.—Public Works.

Among the principal public works undertaken during the year were the construction of a pavilion, including a grand stand at Queen's Park, completion of the bridge over the river near the park entrance, two bungalow residences for officials in St. George's, a house for the Chief Warder of the Prison, and continuation of work in connection with installation of electric light.

In addition to the foregoing, further extensions of water supplies were carried out, a small bridge was erected over Mt. Cassell River, several miles of main roads were oiled, and the work of improving Queen's Park was continued.

VIII.—Public Health.

The birth rate for the year was 33.33 per 1,000, and the death rate 16.5 per 1,000.

The infantile death rate per 100 of infants dying under one year was 11.0.

There was no serious outbreak of any disease during the year. The principal cause of death was diarrhoea and enteritis which accounted for 263 deaths, the next main cause being malaria from which 110 deaths were recorded.

A malaria survey by the International Health Board is being arranged for in 1929.

The estimated population at the end of 1928 was 75,214.

There is a Central Hospital with 141 beds in St. George's, and smaller hospitals of 24 beds each in Carriacou and St. Andrew's. In addition there are 14 District Visiting Stations, under the charge of District Nurses who are qualified as midwives.

A Maternity Welfare Centre is established in St. George's and continues to do most excellent work. A clinic for children is regularly held by the Resident Surgeon of the Colony Hospital or one of the District Medical Officers. A trained nurse midwife, employed by the League, visits mothers and advises as to the care and management of children, and in necessitous cases a regular supply of milk is provided.

The adult death rate of Grenada is low, and the climate in general is healthy. Recreations include cricket, tennis, golf, football, bathing, fishing, and motoring.

IX.—Educational Progress.

Educational matters are looked after by the Boards of Primary and Secondary Education, under the Presidency of the Director of Education, Mr. B. H. Easter, M.A.

Secondary.

There is a Government Secondary School for Boys, at which the attendance averages about 100.

Negotiations are proceeding for the purchase of additional buildings which will enable a much needed extension to be carried out. The staff has recently been reorganised and provision made for the teaching of science (Agricultural Science).

Three secondary schools for girls receive a grant-in-aid from the Government. The numbers on the rolls range from 80 to 100.

In examinations, one candidate sat for the London Intermediate Arts and passed in all his subjects except Pure Mathematics, in which he was referred. Five candidates sat for the London Matriculation of whom three passed in the second division. For the Cambridge School Certificate (Senior) there were seven candidates of whom five passed. Four of the entries were from the girls' schools, with three passes.

Primary.

The number of recognised primary schools remained the same, namely 58.

The number of pupils on the roll in 1928 was 12,920, the average attendance being 8,128, or 62.9 per cent.

The total expenditure by the Government was £9,325.

X.—Land and Survey.

Land in possession of the Crown is of small area, and consists principally of mountain ridges in forest for preservation of the rainfall. Notwithstanding this, a Land Settlement Scheme was initiated by the Government upwards of twenty-five years ago, the main features of the scheme being the acquisition of properties offered for sale, which were then divided into small lots and re-sold to peasants on favourable terms spread over a number of years.

The success of the scheme may be noted from the following table showing the number of holdings of land according to the Tax Rolls for the year 1928.

Total acreage.	*2½ acres and under.*	*Over 2½ to 5 acres.*	*Over 5 to 7 acres.*	*Over 7 to 10 acres.*	*Over 10 and under 100 acres.*	*Over 100 acres.*	*Total.*
75,763	13,632	1,777	332	204	394	142	16,481

The number of large estates is comparatively small, and no lands are available for settlement on a large scale.

XI.—Labour.

Labour consists chiefly of employnemt on the estates—in working or ploughing the land, draining, weeding, cutlassing, pruning, manuring, and other land work, and reaping the produce. The labourers are employed in gangs, with drivers and overseers in personal charge and supervision. A number of labourers are also employed on the public roads of the Colony, on general repair and surface oiling work.

The rates of pay are approximately as follows :—

£3 to £8 per month for overseers.
2*s*. to 4*s*. per day for drivers.
1*s*. to 2*s*. per day for labourers.

The daily rates quoted above are usually for "task" work, which may be completed by quick workers in from 3 to 4 hours. Labourers seldom work two tasks in a day, preferring to cultivate their garden lots, which are generally given by estate proprietors to those who own no lands of their own.

Other labour includes masons, carpenters, mechanics, bootmakers, and chauffeurs, the work generally not being of a high standard. The pay of these would be approximately as follows :—Masons, carpenters and mechanics, 2*s*. to 7*s*. per day ; Chauffeurs £3 to £5 per month.

XII.—Legislation.

Of the twenty-six Ordinances passed during the year the principal were the following :—

No. 4. Wild Animals and Birds (Sanctuary) Ordinance, establishing the Grand Etang Forest Reserve as a sanctuary for wild animals and birds, and affording special protection elsewhere for three years for the armadillo and agouti ;

No. 12. Providing for the establishment of a Central Water Authority ;

No. 20. Quarantine Amendment Ordinance, to give effect to new Quarantine Regulations of the Central Quarantine Authority for the West Indies ;

No. 22. The Lepers Ordinance providing for admissions to and control of a Leper Asylum.

XIII.—Miscellaneous.

The organisation of Boy Scouts and Girl Guides has made great headway during the past few years. The troops of Scouts have increased in number from 1 to 7 and the number of Companies of Girl Guides (a new organisation in the Colony) is 9.

Map.	

Geographical.

The Island of St. Vincent, which is of volcanic origin, is popularly supposed to have been discovered by Columbus on the 22nd January, 1498. It is situated in 13° 10′ North Latitude, and 60° 57′ West Longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Of the Lesser Grenadines, a chain of small islands lying between Grenada and St. Vincent, Bequia, Mustique, Mayreau, Canouan, and Union Island are administered from St. Vincent.

Historical.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was again declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton ; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the island surrendered to the French, and by the Treaty of Versailles, in 1783, it was restored to Great Britain.

Language.

The language of the Colony is English throughout.

Currency.

British and American gold, five-dollar notes of Barclays Bank (Dominion, Colonial and Overseas), and British silver and bronze coins constitute the currency of the Colony.

Government accounts are kept in sterling and commercial and banking accounts in dollars and cents.

Imperial weights and measures are in use.

Climate.

St. Vincent is one of the healthiest of the West Indian Islands.

The climate may be divided into two seasons, wet and dry; the dry season from January to May, and the wet from June to December. The coolest months are December to April. The temperature varies from 78° F. to 85° F. The highest temperature is met in July and the lowest in December.

The rainfall in Kingstown, the capital, registered at the Agricultural Experimental Station, 80 feet above sea level, was 81.96 inches for the year. The heaviest fall for one day was 2.24 inches on 24th September.

I.—GENERAL.

His Excellency the Governor visited the Colony on the 27th March, remaining until 15th May, and again from 4th to 17th July.

The Commander-in-Chief, America and West Indies Station, landed for a few hours on the 6th April.

On the 11th December the Governor-General of Canada and his staff landed and drove round the Island.

The Inspector-General landed and inspected the Local Forces on the 29th May but did not remain.

His Honour the Administrator, Major H. W. Peebles, D.S.O., O.B.E., the newly appointed Administrator, arrived on the 3rd April and took the oath of office.

During His Excellency the Governor's visit in April the foundations for much needed development were laid, namely, the inauguration of the electric light for Kingstown, an extended programme for the reconstruction and oiling of the windward and leeward main roads, the erection of a pavilion in the Park, the widening of the bridge in the centre of the town connecting the windward and leeward highway. The reorganization of the Defence Force was also carried out during His Excellency's visit. An auxiliary yawl was also purchased for the purpose of linking up Kingstown, the Lesser Grenadines, and Grenada, thus enabling officers and inhabitants to visit these islands in comfort and with some assurance of arriving in reasonable time at their destination. Prior to this the journey had to be carried out by sailing vessel.

Two matters of far-reaching importance were also carried through, namely, the alteration in the cotton planting season from May to September whereby the damage done by the cotton worm and black bolls (due to heavy rain) has been greatly deterred and a good yield obtained, and the establishment of a Government Fruit and Vegetable Bureau, whereby planters, peasant proprietors and labourers can bring in their fruit and vegetables for shipment to England, Canada, and other markets, receiving cash payment. This has proved a great success and is greatly appreciated by the inhabitants. The value of export of fresh fruit rose from £388 in 1928 to £1,062 in the year under review.

II.—FINANCIAL.

The financial position of the Colony is sound.

	£
Net surplus at 1st January, 1929	20,566
Revenue in 1929	64,090
	£84,656
Expenditure in 1929	70,786
Surplus at 31st December, 1929	£13,870

The revenue and expenditure for the last five years were as follows :—

	Revenue. £	*Expenditure.* £
1925	62,450	53,190
1926	60,243	59,282
1927	56,469	61,564
1928	64,593	60,441
1929	64,090	70,786

The increase in expenditure of £10,345 was mainly due to £5,000 being taken from the surplus assets of the Colony and invested to augment the Colony's Reserve Fund, thus bringing the Reserve Fund up to £16,000. Increased expenditure under Public Works Extraordinary accounts for a further £2,181, and £965 was expended on purchase and maintenance of the Government yawl "Sulaire" which plies between Kingstown, the Lesser Grenadines, and Grenada.

The principal items of revenue in the last five years were :—

	1925. £	*1926.* £	*1927.* £	*1928.* £	*1929.* £
Import duties ...	26,379	26,683	24,649	28,137	26,440
Export duties ...	2,982	2,959	2,587	2,849	2,784
Excise duty on rum ...	5,816	6,479	4,685	4,137	5,183
Land and House tax ...	6,337	4,124	3,442	5,760	6,640
Income Tax	4,504	3,014	2,480	2,702	3,055
Liquor trade duty ...	2,736	3,013	2,820	3,127	2,710
Postage stamps ...	1,732	1,774	1,875	3,695	1,769

The Public Debt of the Colony on the 1st January, 1929, was £8,360, of which £810 was redeemed during the year.

During the year a loan of £25,000 was raised through the Crown Agents from the joint Colonial Fund for the purpose of installing an electric lighting system in the town of Kingstown (£10,000), telephone reconstruction (£3,400), and road improvement (£11,600).

The debt at the close of the year was £33,060, made up as follows :

	£
The Public Works Loan, 1913	300
The Public Works Loan, 1914	600
*The Kingstown Board Loan, 1914	950
The Public Purposes Loan, 1915	1,000
The War Loan, 1916	1,500
The Windward Highway Loans, 1917, 1919, and 1920	3,200
Telephone, Electric Light, and Road Loan, 1929	25,510
	£33,060

The accumulated sinking funds provided for redemption of loans stood on the 31st December, 1929, at £5,827, of which £4,960 was in respect of Government loans and £867 in respect of the Kingstown Board loan.

The investments on behalf of the Loans Redemption Fund stood at the close of the year as follows :—

	£	s.	d.
Imperial Treasury Bonds 4½ per cent. ...	1,152	12	9
War Loan Stock 5 per cent.	2,602	15	8
Westminster Bank	1,204	6	2
	£4,959	14	7

The investments on behalf of the Kingstown Board Sinking Fund stood as follows :—

	£	s.	d.
Westminster Bank	106	9	5
Imperial Government Treasury Bonds 5 per cent.	760	18	4
	£867	7	9

The unexpended balance of £25,000 of the Eruption Relief Fund, 1903, is invested and held as a reserve or insurance fund against any future disaster. The interest derived from this, namely, £750 per annum, is applied to the relief of the poor. This amount plus the Colony's Reserve Fund of £15,986 offers security both for elemental disasters and economic depression.

The Public Property Insurance Fund started during 1926 stands at £2,649.

* The Colony is only responsible for redemption of this loan in case of default by the Kingstown Board.

III.—PRODUCTION.

Cotton.—Export of Sea Island cotton was poor owing to heavy attacks of cotton worm and soft rot on the 1928–29 crop. The altering of the planting season for the 1929–30 crop from April to September also affected exports.

282,903 lb. of lint were exported, being 66,343 lb. less than 1928.

Export of Marie Galante lint was 63,217 lb. In addition 97,069 lb. of seed cotton were exported. During 1928, 36,214 lb. of lint and 35,815 lb. of seed cotton were exported. Converting seed cotton into terms of lint, we find that 87,484 lb. were exported in 1929, and 45,178 in 1928.

The area under cotton in St. Vincent and the Grenadines during 1929 was 2,867 acres—1,758 Sea Island and 1,109 Marie Galante—as compared with 3,386 acres of Sea Island and 995 acres of Marie Galante in 1928.

Arrowroot.—3,573,379 lb. of arrowroot were exported valued at £59,563. This shows a decrease of 297,041 lb. when compared with that exported in 1928. It is, however, an increase over the quantities exported during the three years previous to 1928. The United Kingdom took 1,529,599 lb. and the United States 1,078,093 lb. Increasing quantities were sent to Holland, France, and Barbados. The campaign inaugurated by the St. Vincent Arrowroot Growers' and Exporters' Association, resulted towards the end of the year in the suggestion being made that St. Vincent arrowroot should be handled in the same way as wheat is handled by the Canadian Wheat Pool. There is every indication that the pool system will be adopted by the St. Vincent arrowroot growers. This will stabilize and place the staple product of this Island on a sound business footing.

Sugar.—The sugar and syrup industry continues to expand. 1,075 tons of sugar (valued at £14,095) and 287,941 gallons of syrup (valued at £12,586) were produced. Sugar shows an increased exportation of 227,040 lb. and molasses 120,897 gallons over that of 1928. The market value of sugar was £13 per ton.

Coconuts.—The steady increase in the production of coconuts and copra continues. The exports of copra amounted to 1,879,558 lb., an increase of 25 per cent. over that of 1928. During 1928 a similar increase over 1927 was recorded. Copra was valued at £13 10*s.* 0*d.* per ton.

Of the minor industries there was a marked increase in the quantity of peas and beans and cassava starch exported, and a slight increase in the quantities of groundnuts and potatoes.

The building up of a fruit and vegetable trade took concrete form in the inauguration of a Peasants' Bureau,the name of which was subsequently changed to that of Government Fruit and Vegetable Bureau. This was started under the management of Mr. M. T. Horner of Montserrat, in the month of August. During 1929 it

shipped the following produce :—801 crates of avocado pears, grape fruit, green limes, mangoes, oranges, tomatoes, etc., 244 lb. of guava jelly, 684 lb. pf. peas and peanuts, 16 barrels of pumpkins and sweet potatoes, and 630 gallons of raw lime juice. All produce was graded and packed in a central packing house. A canning plant was purchased and erected, and such produce as tomatoes and pineapples were successfully canned.

The appended table shows the comparative amount of the annual exports of the principal commodities during the last five years :—

Articles.	1925.		1926.		1927.		1928.		1929.

		£158,037		£158,420		£145,815		£155,884		£151,570

In the reports for 1925 to 1927 the value of arrowroot exported in 1925 was incorrectly shown as £125,078 and the total value of Exports in the same year was consequently also incorrectly shown as £229,941. The correct value of arrowroot exported in 1925—£53,174—is now shown, making total value of Exports for 1925 £158,037.

IV.—TRADE AND ECONOMICS.

The total values of imports and exports for the last five years were :—

Year.	Imports.	Exports. Island Produce.	Exports. Other.	Total.
	£	£	£	£
1925	211,907	229,941	2,491	232,432
1926	203,606	158,420	4,489	162,909
1927	172,097	145,213	602	145,815
1928	192,476	155,884	2,588	158,472
1929	186,439	151,207	363	151,570

The following table shows the value of imports and countries of origin for the past five years :—

	1925.	1926.	1927.	1928.	1929.
	£	£	£	£	£
United Kingdom	75,914	67,425	55,812	62,335	58,030

Other Countries	514	1,142	1,925	2,262	6,070

V.—COMMUNICATIONS.

Shipping.

The total number of vessels entered for the year was 428, of a total tonnage of 491,825, as compared with 386, of 356,822 tonnage, in the previous year.

The total number of steam vessels entered was 169, showing an increase of 22 steam vessels over 1928.

The total number of vessels cleared was 430, of a total tonnage of 490,766 tons, an increase of 33,975 tons compared with 1928.

The Colony is now served by a regular fortnightly mail, passenger, and cargo service of the Canadian National Steamships.

The steamers of the Harrison, Furness Withy, Trinidad and Ocean Dominion lines paid calls during the year.

Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, whence there is direct communication by sea to the United Kingdom and the United States of America.

Roads.

The road system of the island consists of 34 miles of highway on the windward side, suitable for motor traffic, and 28 miles on the leeward side, about 15 miles of which are suitable for motor traffic.

The highway on the windward side is the main artery of traffic, but on the leeward side the sea is the natural highway.

In addition to the highways there are some 280 miles of by-ways which act as feeders from the interior to the main roads.

A loan of £11,600 was raised during the year for reconstruction and oiling of the roads.

Postal.

The central post office is situated at Kingstown, the capital of the Colony. There are 17 post offices in out districts.

Mails on the windward portion of the Island are served by eight post offices. Mails to these post offices are despatched three times a week by motor transport. On the leeward coast the mails are conveyed daily by sea transport to the five post offices. The mails to the Lesser Grenadines, Bequia, Canouan, Mayreau, and Union Island, are conveyed as often as sea transport is available. In the case of the Island of Bequia a contract exists whereby the mail is despatched three times a week.

142 steamers and 101 sailing vessels carried mails to the Colony.

There is no inland telegraph service. The West India and Panama Telegraph Company maintain a cable station in Kingstown and there is a wireless station operated by the Pacific Cable Board. The question of having one central office for the two systems is now under consideration.

The revenue derived from the Postal Department was £2,269, whilst the expenditure was £1,735.

Telephones.

The Government maintains a telephone system which links up Kingstown, the capital, with exchanges in Georgetown, Mesopotamia, and Barrouallie, the two former in the windward and the latter in the leeward district of the Colony. Approximately 188 miles of line is maintained. The sum of £3,400, raised by means of a loan, has been allocated for telephone reconstruction.

VI.—JUSTICE, POLICE, AND PRISONS.

(*a*) Justice.

Eleven criminal cases were tried by the Supreme Court. Nine actions were filed in the Supreme Court. Only five appeals from the Magistrates' decisions were filed. The number of Causes filed in the Summary Jurisdiction amounted to 23, as compared with 51 in 1928.

In the Magistrate's Court, District 1, the civil matters dealt with amounted to 400. 706 persons were charged in 1929, as against 770 in 1928. Fines collected amounted to £133, a decrease of £58 on the preceding year.

In the Magistrate's Court, District 2, the civil matters dealt with amounted to 1,314, as compared with 1,234 in 1928. 1,081 persons were charged, as against 1,164 in 1928, and 848 were convicted. Fines amounted to £277.

(*b*) Police.

The strength of the Force remained as in 1928, namely, two officers and 52 other ranks; of these four other ranks were permanently employed at the Prison.

In May the Police and Prison Departments were entirely separated, one non-commissioned officer of Police being transferred to the Prison Department as Chief Warder, the remaining three constables were transferred to the Police.

The general health of the Force was good.

Discipline of the Force showed marked improvement.

Fire drill was carried out weekly.

The Police Recreation Room and Canteen continued to be well attended and greatly appreciated by the Force.

(*c*) Prisons.

At the beginning of the year the total personnel of the Prison consisted of 10, made up as follows :—

4 Constables (inclusive of the Keeper),
4 Warders,
1 Clerical Assistant,
1 Matron.

In May the Prison was separated from the Police Department, the personnel being :—

Sub-Inspector Police, Officer in charge of Prison,
1 Chief Warder,
4 Warders,
1 Assistant Warder,
1 Matron.

At the beginning of the year the number of prisoners was 20 male, 1 female.

The daily average was 27.28.

The highest number of prisoners at any one time was 45, the lowest 18.

The health of the prisoners was good and discipline good.

VII.—PUBLIC WORKS.

During the year the item of most importance was the raising of a loan of £25,510 for the purpose of installing electric light in the capital town of Kingstown, the reconstruction of the telephone system and road improvement. Work on the electric light and the telephone system had to be deferred to 1930, but considerable work on oiling the roads with colas was accomplished.

The usual maintenance of roads and by-ways was carried out. Feeders to the main roads received special attention. These feeders are of vital importance to the development of the fruit and vegetable trade of the Colony, leading as they do to the various land settlements and peasants' holdings.

Buildings.

The Fort Institutions (Leper and Poor House) were greatly improved and renovated.

Government Primary Schools received much-needed attention.

A dispensary was erected in the Island of Bequia.

Water Supply.

The water supply at Richmond Hill village and at the village of Stubbs were opened up and a more adequate supply obtained.

Tanks were erected in the Islands of Canouan and Mayreau with capacity of 6,000 and 5,000 gallons respectively.

Storm Damage.

On the leeward coast between Buccament Valley and Chateaubelair a large cloudburst took place, doing considerable damage to roads, habitations, and cultivation. Otherwise the Colony was exceptionally lucky as regards damage from the elements.

VIII.—PUBLIC HEALTH.

The population of the Colony at 31st December, 1929, was 51,995.

The birth-rate for the year was 35.31 per thousand, as against 38.75 per thousand in 1928.

Legitimate births numbered 497, and illegitimate births 1,339, the percentage of illegitimate births being 72.9 as against 72.2 in 1928.

The death-rate per thousand for the year was 19.41 as compared with 20.28 in 1928.

The deaths of infants under one year (exclusive of still-births) numbered 257, as against 251 in 1928.

There were 106 still-births, of which 15 were legitimate and 91 illegitimate.

There were 11 cases of enteric fever during the year, as against 10 in 1928 and 13 in 1927.

There were 305 cases of influenza recorded with 12 deaths.

There were 1,136 cases of diarrhoea in children under 2 years of age with 118 deaths.

The district returns show 723 cases of malaria with 8 deaths. 20 cases with one death were admitted into the Colonial Hospital. A small epidemic again occurred in the Buccament Bay settlement. Anti-malarial measures, similar to those taken in 1928, soon controlled the outbreak.

A course of lectures and demonstrations was given during the year for those desirous of qualifying as Sanitary Inspectors. Eight candidates took the course, 2 qualified and received local certificates of efficiency.

The Public Health Amendment Ordinance, No. 26, of 1929, increases the scope and power of the 1927 Bill.

IX.—EDUCATION.

Education is not compulsory.

The following comparative table gives particulars in regard to primary education during the years 1927, 1928, and 1929 :—

	1927.	*1928.*	*1929.*
Number of Schools	28	30	30
Number of pupils on roll at 31st December.	5,732	6,620	7,083
Average attendance	2,969	3,410	3,757
Government Grant-in-aid	£3,686	£4,066	£4,281
Cost per head in average attendance	£1 4*s.* 10*d.*	£1 3*s.* 10*d.*	£1 2*s.* 9*d.*

Eleven of the 30 regular schools belong to the Government which bears the whole cost of their maintenance. Religious denominations provide and are responsible for the upkeep of the buildings of the 19 other schools. The salaries of all teachers and the equipment, etc., of all primary schools are met from general revenue.

There are six other schools maintained by religious denominations which receive small Government grants totalling £87 10*s.* 3*d.*

There are two scholarships provided by the Government, one for girls and one for boys, which are open to all primary schools for entrance of primary school children to the Boys' Grammar School and the Girls' High School.

The Government maintain and finance a secondary school for the education of boys—the Grammar School—and the Girls' High School. Fees charged are £2 per term for the boys and £2 per term for the girls.

There is an Island scholarship of £250 awarded biennially, tenable for not less than three and not more than five years at an approved University. The cost of passages to and from England is also defrayed.

The Town Board of Kingstown also award two scholarships, valued at £6 each, per annum (one for boys at Grammar School and one for girls at Girls' High School).

The reorganization of primary education has occupied the attention of the Government during the year, resulting in the revision of the Code, more adequate salaries to teachers, the better equipment of all primary schools, and repairs to buildings. To meet these much-needed requirements a substantial increase in the amount allocated by Government will be forthcoming in 1930.

The date of termination of the school year has been altered from 30th September to 31st December.

A substantial increase in attendance is anticipated, thus, it is hoped, obviating the necessity of compulsory attendance.

There are also 10 privately-owned schools in the Colony, the most important being that of Mr. Eustace with an average attendance of 29 boys and 13 girls, totalling 42. This school is a valuable connecting link between the primary and secondary schools.

X.—CROWN LANDS AND SURVEYS.

The revenue collected during the year totalled £1,188, £777 being derived from Crown Lands and £411 from Land Settlement Lands.

Arrears amounted to £271. These arrears are largely due to market depression and will be paid up during the coming year.

In 1928 arrears amounted to £607.

One hundred and ninety-nine Title Deeds were issued.

No surveys were made by surveyors in private practice.

Fifteen surveys were carried out by the Government Department.

XI.—LABOUR.

There is no immigration of indentured labour in the Colony.

Large numbers of men and women emigrate to Santo Domingo, Curaçoa, and Aruba. The exodus to Santo Domingo is on the decrease, but emigration to Curaçoa has greatly increased as the work on the oilfields attracts large numbers, the pay being exceptionally good, and the work appeals to the native. Domestic service with high wages attracts the female population.

The average wage of a labourer on an estate in St. Vincent is 1*s.* 2*d.* to 1*s.* 6*d.* per day and certain perquisites, such as mountain garden lands and the keeping of stock on the estate. Task work on the estates, whereby the labourer can easily earn up to 2*s.* a day, is more popular than daily work. By far the greater part of work on estates is done by women who receive from 6*d.* to 9*d.* per day.

During the year extensive road reconstruction has taken place and the demand for labour exceeds the supply.

A considerable amount of money is remitted by labourers to their families from Curaçoa and Aruba.

XII.—MISCELLANEOUS.

Banks.

Barclays Bank (Dominion, Colonial and Overseas) is the only bank in the Colony.

The Government maintains a Savings Bank and pays interest at the rate of 3 per cent.

Agricultural Credit Societies.

There were twenty-one Agricultural Credit Co-operative Societies at the beginning of the year, but seventeen of these were closed down owing to the lethargy displayed by the peasants and also due to inertia and lack of proper organization.

It is hoped to re-organize and re-start these on progressive and active lines as they are undoubtedly of considerable use to the peasants and the land settlements.

Government Cotton Ginnery.

The purchase of Sea Island cotton and corn on a profit-sharing system is still carried out by the Government Cotton Ginnery and is greatly appreciated by the peasant proprietors.

Government Fruit and Vegetable Bureau.

A Government Fruit and Vegetable Bureau was inaugurated by the Government during the year and has proved an unqualified success. The Bureau purchases, and ships to England, Canada, etc., every kind of fruit and vegetable brought in by the inhabitants, charging 10 per cent. for handling.

Geography and History.

The island of St. Lucia is situated in latitude 13° 54′ North and longitude 60° 59′ West, at a distance of 24 miles to the south-east of Martinique and 21 miles to the north-east of St. Vincent.

It is 27 miles in length and 14 at its greatest breadth ; its circumference is 150 miles and its area 233 square miles, rather less than Middlesex.

Castries, the capital, is situated at the north-western end of the island, and has a population, according to the census of the 24th April, 1921, of 5,899.

The port of Castries is one of the best harbours in the West Indies. It is land-locked and provides facilities for coaling and watering ships and for loading and discharging cargo which are unequalled in these islands.

The town of next importance is Soufriere, which lies about 12 miles to the south of Castries and contains a population of 2,480. Just below Soufriere Bay stand the remarkable twin peaks known as "The Pitons," rising sheer from the sea to a height of 2,619 feet in the case of the Gros Piton and to 2,461 feet in that of the Petit Piton. The boiling sulphur springs from which Soufriere gets its name are situate at Ventine, two and a-half miles south-east of the town.

It is generally accepted that St. Lucia was discovered by Columbus, during his fourth voyage, on the 18th June, 1502. There is, however, a tradition amongst the French that it was discovered on the 13th December of a later year by some shipwrecked French seamen, who named it St. Alouziel or St. Alousie after the martyred virgin Saint of that name, whose feast is commemorated on that date.

The island was then inhabited by the Caribs, and they remained in undisturbed possession for another century.

In 1605, 67 persons proceeding to Guiana by the English ship *Olive Blossom* were forced by famine to land in the island, and they remained "to take their fortune in the fruitful isle." They were not able to stay longer than a month, however, when, reduced to 19 by fights with the Caribs, they left in an open boat and reached the mainland of South America in sore distress. This is the first recorded instance of a landing by Englishmen in the island.

In 1626 a Commission was granted by Cardinal Richelieu to MM. d'Enambuc and du Rossay to establish a French Colony "in the islands of St. Christopher and Barbados and in the surrounding territories," which presumably included St. Lucia, and in 1627 the island was granted by the King of England, along with all the Caribbee Islands, to the Earl of Carlisle, who appointed Lord Willoughby of Parham to be Governor of Barbados and the other Caribbee Islands. In 1635 it appears to have been granted by the King of France to MM. de l'Olive and Duplessis.

In 1638 Captain Judlee of St. Kitts (acting in the name of Lord Willoughby) and three or four hundred men took possession of the island and attempted to effect a settlement in it, but in 1640 these early colonists were either massacred or expelled by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who sold it in 1650 to MM. Honel and du Parquet for the equivalent of £1,600. The Caribs made repeated attempts to expel the French, but failed, and finally, in 1660, they concluded a treaty of peace with the latter.

In 1663 Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia and took possession of it. The English continued in occupation until the Peace of Breda, in 1667, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France and made a dependency of Martinique.

Throughout the eighteenth century recurrent struggles took place between the English and the French for possession of the island, the more important occurring in the latter half of the century. In 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton, but was returned to France by the Treaty of Paris in the following year. In 1778 it again surrendered to the British, who remained in occupation until 1783 when, by the Peace of Versailles, St. Lucia was once more restored to France. It was from Pigeon Island, off the north-western coast of St. Lucia, during the period of this occupancy that Rodney sighted the French Fleet of 36 sail of the line, under the Comte de Grasse, prior to giving them battle and defeating them in the memorable naval action of the 12th April, 1782. The island was again taken by the British in 1794, but they were forced by the French Republican party in the island, aided by insurgent slaves under "Citoyen" Victor Hughes, the Civil Commissary of Guadeloupe, to evacuate it in the following year. In 1796, after an obstinate and sanguinary struggle, that party laid down their arms and surrendered as prisoners of war to a force 12,000 strong under the command of Sir Ralph Abercrombie supported by a squadron under the command of Sir Hugh Christian. Sir John Moore, the subsequent hero of Corunna, took part in this operation as Brigadier-General Moore, and remained in the island as Governor thereafter. The British retained possession of the island until 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since when it has continued under British rule. As a result of the operations of 1778, 1796, and 1803, no fewer than thirteen British regiments have "St. Lucia" inscribed on their colours.

Climate.

The climate is healthy and compares favourably with other West Indian islands.

The temperature seldom rises above 90° in the hot season, May to November, or falls below 70° in the cool season, December to May; the yearly average being about 83° noon shade temperature. On Morne Fortune, just above Government House, where a portion of the garrison was located, the temperature in the winter months falls as low as 60°, and throughout the year it remains mild and pleasant.

Temperature records during 1929 at the Botanic Station, Castries, show a mean noon temperature of 84.7° in the shade. The maximum temperature was 92° and the minimum 65°, a temperature range of 27°.

The total rainfall recorded at the Botanic Gardens, Castries, for the year 1929 was 102.04 inches. This was 11.79 inches above the

average for the last 39 years (=90.25 inches). Maximum precipitation occurred on 5th October, when 4.85 inches of rain fell at Castries. In the wetter parts of the Colony, however, the rainfall ranged from 6 inches to 13.5 inches on this date.

The weather generally was fair and cool, with few storms.

Vital Statistics.

On 31st December, 1928, the resident population of the Colony was computed to have been 56,917—males, 26,393 ; females, 30,524. On 31st December, 1929, the figure increased to 57,482—males, 26,801 ; females, 30,681. The natural increase during 1929 was 616, and during the year there was an excess of departures from as compared with arrivals in the Colony of 51. The total increase was 565.

The number of inhabitants per square mile in the Colony is computed at 246.

The births (including still-births, which numbered 100) totalled 1,898—males, 921 ; females, 977. The birth-rate (excluding still-births) was 31.2 per thousand of the population—a decrease of 2 per thousand as compared with the previous year.

The deaths (including still-births) numbered 1,282—males, 623 ; females, 659. The death-rate (excluding still-births) was 20.5 per thousand of the population—an increase of .7 per thousand on the previous year.

Principal causes of death (other than still-births) were :—malaria, 63 ; syphilis, 80 ; bronchitis, 52 ; pneumonia, 54 ; gastro-enteritis, 89 ; worms, 105 ; and senile decay, 142. Two of these—gastro-enteritis and worms—are the causes of many of the infant deaths.

Languages.

English is, of course, the language of the Colony, but the large majority of the population speak a French patois. Notwithstanding the fact that primary education is imparted in English entirely it is still true that, in the elementary schools, most of the children have to be taught English before they can assimilate a knowledge of the rudiments of education. This is undoubtedly a very unsatisfactory state of affairs, but it can only be by persistent educational effort that the people as a whole will eventually learn to speak and think in the national language.

Currency.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10*s*. and 5*s*. are in circulation, as well as the notes of Barclays Bank and the Royal Bank of Canada, both of which have branches in Castries.

Weights and Measures.

The Imperial weights and measures are in use in the Colony.

I.—GENERAL.

The year 1929 was one of steady progress and improvement in many directions. Notwithstanding the great financial stringency and the difficulty of finding money for very necessary works, it has been possible to do a good deal of useful work.

In agricultural matters there has been considerable development and there is abundant evidence of increased interest. Much new cultivation has been started, and, under the supervision of the newly-appointed Agricultural Instructor and Adviser, the peasant proprietors and small cultivators are going in for new crops and paying more attention to the old ones. Were it not for the deplorable condition of the sugar industry, the whole outlook would be much more favourable.

The export of fruit and vegetables is one branch of agricultural development which promises well for the future and steps are being taken to introduce at an early date measures for the proper inspection, grading, and packing of all fruit exported from the Island. The experimental shipments of fruit already made have met with varying success but, on the whole, they have proved that there is profitable business to be done in the future. There have been many difficulties in disposing of fruit and vegetables in the countries to which these articles are exported but, here again, a great deal has been learnt through recent experience and there is every hope that we shall be able to enter into satisfactory marketing arrangements in the near future.

The rebuilding of Castries was considerably advanced during the year and several fine buildings were completed and brought into use. Among these may be mentioned the new Government Offices, and those of Messrs. Peter and Company and Minvielle and Chastanet, the Good Shepherd's Hall, and the new cinema theatre erected by Mr. R. G. H. Clarke.

The coastal motor boat service was handed over to private enterprise as from June. This service is operated by the St. Lucia Navigation Company, by means of the M.L. *Soufriere* which was build in England. It is anticipated that this change will result in considerable saving to the Government.

Among the important events of the year was the establishment of two Air Services between the United States of America and South America. These are being carried out by Pan-American Airways, Incorporated, and the New York, Rio, and Buenos Aires Line, Incorporated. Both of these services have received permission to make St. Lucia a fuelling station and port of call. Pan-American Airways have been given permission to utilize a portion of the foreshore at La Toc as a landing place for their planes. Permission has also been given to the New York, Rio, and Buenos Aires Line to moor a pontoon in the harbour for the purpose of fuelling their planes. Both these concerns carry mails and passengers. The first

airplane to arrive at St. Lucia with mails belonged to Pan-American Airways and was piloted by Colonel Lindbergh on the 22nd September.

During the year arrangements were made for the erection in the Carnegie Library of a bronze tablet in memory of the men of St. Lucia who lost their lives in the Great War. This was unveiled on 31st July by His Honour the Administrator.

Another outstanding event of the year was the visit of the Sugar Commission appointed by the Secretary of State under the Chairmanship of Lord Olivier, P.C., K.C.M.G. The Commission called at St. Lucia on the 27th October, 1929, and returned on the 9th November, leaving on the 11th of that month. Their findings were subsequently published in Cmd. 3517.

II.—FINANCE.

The revenue and expenditure of the Colony during the last five years were as follows :—

Year.	*Ordinary Revenue.*	*Ordinary Expenditure.*	*Excess of Expenditure over Revenue.*
	£	£	£
1925	75,555	85,082	9,527
1926	83,379*	84,488	1,109
1927	82,491†	84,219	1,728
1928	85,351‡	87,235	1,884
1929	83,139§	86,434	3,295

Taxation was increased during 1929 by—

(1) The Customs Duties Amendment Ordinance, increasing the bulk of the *ad valorem* duties on imports by 50 per cent., and applying the surcharge of 25 per cent. to imports of wheaten flour.

(2) The Export Duties Amendment Ordinance, increasing the duty on lime oils.

(3) The Trade Licences Ordinance.

The Public Debt of the Colony (including Guaranteed Loans) stood at £186,010 at the close of the year, being £13,449 less than at 31st December, 1928. A loan of £3,367 was raised during the year on behalf of the Castries Town Board for reconstructing the Castries Water Works. The accumulated Sinking Fund for the redemption of the Public Debt amounted to £54,688, as compared with £62,673 at the end of 1928.

---

* In addition £70,180 was received as proceeds of the issue of a Debt Reduction Loan.

† Includes Imperial Grant-in-Aid of £7,000.

‡ Includes Imperial Grant-in-Aid of £3,836.

§ Includes Imperial Grant-in-Aid of £3,000.

III.—PRODUCTION.

Agriculture.

In consequence of the difficulties experienced in disposing of the principal economic products at a reasonable profit, agriculturists have turned their attention to other crops. The supply of fruits and vegetables, and possibly dairy products, to the growing Canadian market, opens new possibilities to the producer. That this is being realized is shown in the steady growth in the export of these items which previously were shipped in a desultory fashion. Other alternative crops which are now being planted fairly extensively are coffea arabica (Jamaica Blue Mountain), pine-apples, papaw, nutmegs and other spices, pigeon peas and haricot beans.

The plant propagation service of the Agricultural Department has been expanded to meet this demand, and to create further demands for suitable products. At Union Station the site used for propagation has now been occupied nearly two years and has proved entirely satisfactory. More extensive developments are in preparation for the present year and an orchard plot of the principal trees recommended to the planter is being prepared in order to arrive at costs of production.

Sugar.—The year 1929 was a depressing one for the sugar industry owing to the low market value of raw sugar, and in consequence of the poor demand for fancy molasses many small growers have ceased to grow sugar cane. The area in cane is therefore less than formerly, being now about 4,300 acres as against 4,750 acres. One factory has planted the cane area in coconuts. The factories made a large crop of sugar cane, and produced 4,997 tons of sugar as against 4,042 tons in 1928, with a larger quantity of molasses. The amount exported for 1929 was 4,536 tons of sugar as against 4,100 tons in 1928. The average export price was, however, very low, being £12 10*s.* 0*d.* per ton of sugar.

The following figures show the quantity and value of sugar products exported during the last five years :—

Sugar (Vacuum Pan).

Year.	*Quantity.*	*Value.*
	Cwt.	£
1925	97,772	72,559
1926	95,140	65,444
1927	88,640	74,200
1928	82,000	63,050
1929	90,720	51,237

Sugar (Muscovado).

Year.	*Quantity.* Cwt.	*Value.* £
1925	8,614	4,774
1926	9,138	5,414
1927	3,560	2,235
1928	—	—
1929	—	—

Molasses and Syrup.

Year.	*Quantity.* Gals.	*Value.* £
1925	153,413	7,818
1926	156,424	8,659
1927	156,050	7,634
1928	85,784	3,643
1929	127,273	3,047

Rum.—The quantity and value of rum exported during the last five years is shown below :—

Year.	*Quantity.* P. Gals.	*Value.* £
1925	63	25
1926	37	11
1927	1,700	212
1928	1,323	218
1929	2,013	339

Practically all the rum produced in the island is consumed locally.

Cacao.—The cacao market has been poor and low prices were received during the year, ranging from 45*s.* to 52*s.* 6*d.* per cwt. The total crop was below the average, being affected by wet weather diseases and difficulties in drying the beans.

The quantity and value of cacao exported during the last five years are as follows :—

Year.	*Quantity.* Cwt.	*Value.* £
1925	10,444	22,339
1926	10,037	22,454
1927	12,183	30,560
1928	11,006	27,321
1929	8,906	18,864

Limes.—Although weather conditions were apparently not very favourable, a good lime crop was made and good prices were received for it. Concentrated lime juice varied in price from £28 to £20 per pipe c.i.f., handpressed lime oil realized prices ranging from 54*s.* to 74*s.* per lb., and distilled oil realized from 33*s.* to 25*s.* per lb. towards the end of the year.

Calculated in barrels of green limes the crops for the last five years are :—

Year.	*Quantity* Barrels.
1925	63,496
1926	59,415
1927	58,948
1928	30,107
1929	37,345

Coconuts.—The coconut production continues to increase and the quantity of nuts exported during 1929 was double that of the previous year. The export of copra was also greater. Owing to poor demand for coconut oil and soap the St. Lucia Oil Mills closed down towards the end of the year. The price of copra fell from £25 to £19 per ton c.i.f. Coconuts and coconut products exported during the last five years are :—

Coconuts.

Year.	*Quantity.* Number.	*Value.* £
1925	123,516	432
1926	118,501	381
1927	96,813	351
1928	141,667	499
1929	295,983	1,032

Coconut Oil.

Year.	*Quantity.* Gals.	*Value.* £
1925	6,323	791
1926	19,081	3,847
1927	3,921	735
1928	931	184
1929	—	—

Copra.

Year.	*Quantity.* Cwt.	*Value.* £
1925	1,981	3,563
1926	1,591	1,808
1927	4,077	4,409
1928	6,301	8,690
1929	7,195	9,878

Coconut Meal.

Year.	*Quantity.*	*Value.*
	Tons.	£
1925	12	106
1926	42	778
1927	7	88
1928	4	38
1929	1½	6

Bananas.—The exports during the last five years were as follows:—

Year.	*Quantity.*	*Value.*
	Bunches.	£
1925	20,818	1,374
1926	46,209	4,356
1927	27,052	2,351
1928	5,543	338
1929	6,818	509

IV.—TRADE AND ECONOMICS.

The state of the trade of the Colony, as reflected by the values and quantities of imports and exports during the year 1929, as compared with 1928, was as follows :—

Imports.

	1929.	1928.
	£	£
I. Food, drink, and tobacco ...	78,740	80,669
II. Raw material and articles mainly unmanufactured.	60,484	46,418
III. Materials wholly or mainly manufactured.	97,952	105,703
IV. Miscellaneous and unclassified articles, including Parcel Post.	7,577	9,263
Total value ...	£244,753	£242,053

In the above table the total for 1929 is in excess of 1928 by £2,700 only. The decreases in Classes I, III, and IV are more than counterbalanced by the increase in Class II, which includes an increased amount of coal imported in 1929.

The values of imports for 1929 and 1928, classified according to country of origin, were as follows :—

	1929.	1928.
	£	£
United Kingdom	68,101	92,756
Other parts of the British Empire	66,922	67,297
Foreign Countries	102,230	73,959
Parcel Post	7,500	8,041
	£244,753	£242,053

The above table shows a decrease of no less than £24,655 or 26·58 per cent. in imports from the United Kingdom, and an increase of no less than £28,271 or 38·23 per cent. in those from Foreign Countries. Decreased importations of coal, sugar-manufacturing machinery, cotton goods, and manures account for the reduction in the former case, while increased importation of coal accounts in the main for the rise in the latter.

The values of imports of articles amounting to £5,000 or more during 1928 and 1929 were as follows :—

Article.	1928.	1929.
	£	£
Boots and Shoes	7,518	4,610
Coal, bituminous	25,229	48,739
Cotton—		
Piece goods	10,930	10,269
Other manufactures ...	13,904	9,075
Fish, salted, dried, etc. ...	9,394	9,166
Flour, wheaten	25,367	25,455
Hardware	5,727	4,744
Lumber—spruce and white pine	5,793	1,680
Machinery, sugar manufacturing	10,519	4,268
Manures	2,625	5,421
Oil, edible	6,274	5,950

Of greatest interest in the above table is the item coal, which increased by no less than £23,510 or 93·19 per cent. in 1929. The considerable increase in manures (106·51 per cent.) evidences continuing efforts in the sugar industry despite falling prices. The imports of boots and shoes and sugar manufacturing machinery were much above the average in 1928, and so diminished in 1929. The increase in the import duty on flour (25 per cent. surcharge) made no appreciable difference in its consumption : the quantity imported was only 147 barrels less. The majority of the buildings destroyed by the Castries fire of May, 1927, having now been replaced, the demand for lumber was very much less in 1929.

That there are openings for British products is shown by the following table :—

Article.	*Total value of Imports in* 1929.	*Imports from British Empire.*
	£	£
Cotton manufactures, piece goods	10,269	7,532
Manures	5,421	89
Iron and Steel manufactures ...	3,635	3,266
Wood and Timber—Shooks and Staves.	1,289	568
Bags and Sacks, empty ...	3,510	3,368
Butter and substitutes ...	3,353	1,215
Oleomargarine	2,309	54
Motor cars	1,636	882
Cement	2,409	1,413
Totals	£33,831	£18,387

Exports.

The values of exports in 1929, classified under five main divisions, were as follows :—

	1929.	1928.
	£	£
I. Food, drink, and tobacco ...	92,002	108,567
II. Raw materials and articles mainly unmanufactured.	74,661	49,505
III. Articles wholly or mainly manufactured.	24,537	31,836
IV. Miscellaneous	357	730
V. Bullion and Specie	7,443	7,198
Total value ...	£199,000	£197,836

The decrease in the above table in Class I was due to reduced exports of cocoa, molasses, and green limes, and the reduced price obtained for sugar, 436 tons more of which was exported in 1929 and £11,813 less obtained. The increase in Class II was due to increased exports of bunker coal (£24,727), copra (£1,188), and logwood (£375). The decrease in Class III resulted from less exports of lime oil (£3,362), charcoal (£602), bay oil (88), bricks (£1,631), and metals (£999).

The following table shows the character and individual values of the main exports :—

	Value in 1929. £	*Value in* 1928. £
Cocoa	18,864	27,321
Lime and Lime Products ...	20,440	29,687
Sugar	51,237	63,050
Fancy Syrup and Molasses ...	3,047	3,643
Logwood	2,713	2,338
Bunker Coal	60,138	35,411
Copra	9,878	8,690

The values of the exports, domestic and other, classified according to destination, were as follows :—

EXPORTS (MERCHANDISE).

Destination.	£		*Total.* 1929. £	*Total* 1928. £
United Kingdom—				
Domestic Exports		43,376		
Re-exports (not including Bullion and Specie).		77		
			43,453	56,529
Other parts of the British Empire—				
Domestic Exports		56,674		
Re-exports (not including Bullion and Specie)		1,147		
			57,821	62,899
Foreign Countries—				
Domestic Exports		28,978		
Re-exports (not including Bullion and Specie).		168		
			29,146	35,244
Ships' Stores—Re-exports ...		996		
Bunkers—Re-exports		60,138		
			61,134	35,966
Totals			£191,554	£190,638

Coaling.—The coaling business, for which there are exceptional facilities ensuring the quickest despatch, and which, after being for many years a source of considerable wealth to the Colony had declined somewhat, now happily shows some signs of revival, and the exports of bunker coal in 1929 exceeded those of 1928 by 18,145 tons. Coaling affords an appreciable amount of irregular employment to a number of labourers living in the capital and its vicinity.

V.—COMMUNICATIONS.

Shipping.—The number of ships entered and cleared during the year was 1,224, of a total tonnage of 1,700,139. Of this total 667 were steamships and 557 sailing vessels. In addition to the above, 40 American seaplanes visited the Colony from September to December.

Mail communication is maintained by (1) a regular fortnightly steamer service to other British West Indian Colonies and to Canada by means of the Canadian National Steamships, (2) a monthly service via Martinique to Europe by means of the steamers of the Compagnie Generale Transatlantique, (3) a monthly service to the United States of America and certain of the neighbouring Islands by steamers of the Furness Withy Company, and (4) a seaplane service twice a week to North and South America and certain neighbouring British and Foreign Colonies carried out by planes of Pan-American Airways, Incorporated, and the New York, Rio, and Buenos Aires Line, Incorporated. There are other frequent mail opportunities via Barbados and America and direct to Europe.

Roads.—There are 125 miles of main roads, 144 miles of by-ways and 74 miles of unclassified roads. Of the total 167 miles are suitable for motor traffic.

Castries is connected with Soufriere and Vieux-Fort and other points on the leeward side of the Island by a motor-launch service. Until June, 1929, this was carried out by the Government but in that month it was undertaken by a private company under contract with the Government. On the windward side subsidized motor-bus services exist between Castries and Dennery and Vieux-Fort and Micoud.

Telegraphic communication is maintained by the Pacific Cable Board and the West India and Panama Telegraph Company, Limited.

Inland Telegraphs.—There is no telegraph system in the island.

Telephones.—The telephone system is operated entirely by the Government and consists of 110 miles of trunk lines and 204 miles of branch lines. There are ten exchanges and 210 subscribers.

VI.—JUSTICE, POLICE, AND PRISONS.

Justice is administered by the Royal Court, over which the Chief Justice presides, and by three District Courts, over which two Magistrates preside. The Royal Court has an original civil and criminal jurisdiction and also decides appeals from the District Courts. Appeals from the Royal Court are heard and determined by the West Indian Court of Appeal constituted under the West Indian Court of Appeal Act, 1919, of the Imperial Parliament.

An adequate Police Force is maintained to enforce the decisions of these bodies and to provide generally for the peace of the Colony and the security of life and property. Besides ordinary Police duties, this Force assists in the administration of Poor Relief, and provides the main portion of the Castries Fire Brigade.

There is one gaol, the Royal Gaol, situated in Castries, which contains separate prisons for male and female convicts. The institution has its own bakery which supplies excellent bread to all the public institutions and, in addition to stone-breaking and carrying out useful work outside the walls, certain of the prisoners are taught carpentry, tailoring, and shoemaking.

VII.—PUBLIC HEALTH.

The general health of the Colony during 1929, from the records returned, was good and showed a distinct improvement on that of the preceding year.

No epidemic occurred, and the incidence of typhoid, tuberculosis, and malaria was the lowest recorded for many years. Intestinal parasitic infestation, although fairly widespread, was not so great as in previous years, and with the appointment of a microscopist who is to operate in each District under the direct supervision of the District Medical Officer and who will be assisted by the District Sanitary Inspector it is hoped that permanent reduction of this ailment will result.

The Colony is divided into six Medical Districts, to each of which is attached a Medical Officer and a Sanitary Inspector, with Dispensaries in each District. In addition to these there is a Chief Medical Officer who is also Resident Surgeon of the Victoria Hospital, Health Officer and Bacteriologist; and there is a Chief Sanitary Inspector whose headquarters are at Castries but who makes regular visits of inspection all over the island.

The medical institutions consist of the Victoria Hospital, the largest and principal hospital in the Colony, situated in close proximity to the town of Castries, with a staff consisting of a Resident Surgeon, a European Matron, and local nurses and dispensers. Attached to this hospital is a private wing with six rooms for paying patients. There are three small casualty hospitals situated in Soufriere, Vieux-Fort, and Dennery, the towns next in importance to Castries. The Medical Department also maintains a Port Health Officer, a conveniently situated and suitably equipped Quarantine Station, and Pauper, Leper, and Lunatic Asylums.

Sanitation and Hygiene.—During the year a Child Welfare Association was formed, in connection with which clinics are being held at the Castries General Dispensary three times a week; and with the help of the energetic Honorary Secretary and Treasurer and her band of voluntary assistants very encouraging results have been obtained.

The routine work of the Department was carried out throughout the year along the established lines, and were supplemented by the following important measures :—

(*a*) The enforcement of the Bakeries Regulations, one of the principal of which is the medical examination and registration of itinerant sellers of bread and cakes and the provision by each of them of a standardized bread box, to prevent contamination by dust and flies.

(*b*) The installation of an unpolluted pipe-borne water supply at the village of Micoud.

(*c*) The erection of a model incinerator, with drying shed attached, in the old Marchand Cemetery.

The standard of sanitation reported upon in the previous year has been improved in many ways and fully justified the increase which was approved in the vote for Sanitary Services for the year 1929.

VIII.—EDUCATION.

Primary Education.—There are 49 recognized primary schools, which are all denominational, assisted by Government grants-in-aid. Forty-two are under Roman Catholic management, four Anglican, and three Wesleyan. The teachers' salaries are paid almost entirely by Government from the grant-in-aid, which totals nearly £5,000 per annum, the managing religious bodies contributing just over £50 in 1929 towards the required sum. The grants-in-aid are administered by an Inspector of Schools, a Government Officer who supervises the expenditure under the ultimate control of the Governor in Council. Primary education is free and compulsory between the ages of 6 and 14 years, though school managers have the right to exact fees not exceeding one penny per week from each pupil if they desire to do so. It is probable that not more than 60 or 70 per cent. of the children of school age are actually attending.

Instruction is provided in reading, writing, arithmetic, dictation, recitation, and hygiene. English is the medium of instruction in the juvenile schools, and a combination of English and the local "Patois" in the infant schools, the "Patois" being utilized only when necessary to explain the meaning of English words. English is taught in the infant schools by means of object lessons, the children being taught simple English phrases and how to answer easy questions. In the lower standards of the juvenile schools, English is taught by means of object lessons, and the upper standards take English composition, English grammar and geography. Agriculture is taught in most of the juvenile schools to both boys and girls, many of the schools possessing excellent gardens, which are maintained by the teachers and pupils under the supervision of an agricultural instructor, who is a Government Officer. These gardens provide the pupils with

material for practical work and as a general rule a real interest is taken in them. Domestic economy and practical cooking are taught to the girls in some of the schools and the results obtained in these subjects are generally good. Government assistance is given periodically towards the provision of garden tools and cooking utensils.

Secondary Education.—A secondary course is provided for boys at St. Mary's College. The course now includes agricultural science and some commercial subjects. The school prepares pupils for the examinations of the Cambridge University Local Examinations Syndicate and for the Matriculation Examination of London University. St. Joseph's Convent School provides a secondary course for girls and prepares pupils for the Cambridge Local Examinations. The St. Lucia Scholarship of the value of £175 per annum, which was awarded by the Government biennially on the results of the London University Matriculation Examination, to candidates having the requisite residential, educational, and other qualifications, has been discontinued for the present owing to the Colony's financial difficulties, eight scholarships having been awarded up to the time of suspension in 1929.

Twelve scholarships at St. Mary's College are now awarded by the Government to boys attending primary schools, on the results of competitive examinations. These scholarships are tenable for one year and are then renewable from year to year for five years more.

IX.—LABOUR.

There is, generally, an ample supply of labour for the requirements of the Colony, the chief sources of employment being the sugar estates and other large plantations. The Public Works Department and the coal bunkering companies are also considerable employers of labour. There is a steady demand for tradesmen, but the supply is limited. Relations between employers and labourers have been generally satisfactory. A certain number of St. Lucia labourers are periodically recruited for work in Santo Domingo and, last year for the first time, in Venezuela. All arrangements in regard to this labour are made through the Government and the recruiting agents are required to enter into a bond for carrying out the terms of the contract made between them and the labourers. The continued depression of the sugar market is having its effect on sugar estates, resulting in a considerable reduction of labourers and consequent unemployment. There was thus, at the end of 1929, a surplus of labour for which no employment was available. New Public Works, such as drainage and road schemes, and agricultural extension aimed at developing peasant agriculture, are projects which will help to reduce unemployment.

X.—MISCELLANEOUS.

His Excellency the Governor of the Windward Islands, Sir Frederick Seton James, K.C.M.G., K.B.E., was in residence in the Colony from the 19th January to the 4th February.

The following British ships of war visited the colony during the year :—

H.M.S. *Heliotrope* in January.
H.M.S. *Durban* in January.
H.M.S. *Wistaria* in April.

H. J. PINK,
Acting Administrator.

St. Lucia,
28th June, 1930.

Introduction.

Geographical.

Situated in the extreme south of the Carribean Sea, Grenada is the nearest British island to the mainland of South America, with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad and between the parallels of 12° 30′ and 11° 58′ North latitude and 61° 20′ and 61° 35′ West longitude. The island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but, including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coastline is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, land locked and deep watered, is one of the most beautiful in the West Indies.

LIBRARY OF CONGRESS
DEC 14 1932
DIVISION OF DOCUMENTS

The mountain spurs, clothed with forests to their summits, intersect the island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the island 1,740 feet above sea-level while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

Historical.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the island was left in the undisturbed possession of the aboriginal inhabitants who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the island, and after being owned by French proprietors for some years, it was annexed to France in 1674. In 1763 the island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–96, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ring-leaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

Climate.

The climate from December to the end of April, when the heat is tempered by the prevailing trade winds, may be described as good. In the autumn, from July to end of October, there is greater humidity and higher temperature with little variation between night and day. During this period the climate, although not really unhealthy, may be described as debilitating to Europeans. Even during the hot season, except in the towns themselves which are all near the sea, conditions are not unpleasant. Now that electric power is available fans are gradually being introduced into houses and offices.

The highest temperature in 1929 was 90° on several days, and the lowest 69° also on several days. The mean of maximum temperature was 88° and the mean of minimum 70°. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches. In the mountainous centre it approaches 140 inches. At St. George's, midway between the two, the rainfall in 1929 was 75.95 inches.

Over the past 30 years the average at St. George's has been 72.92 inches.

Language.

The only language spoken is English. A small and decreasing number of agricultural labourers in the country districts speak a corrupt patois of English and French, but all understand and speak English.

Currency.

The currency is the same as in Great Britain, the monetary units being the same. Silver, however, is legal tender without limit, and there are also in circulation bank notes of Barclays Bank and the Royal Bank of Canada of five dollars denomination. One or two of the business houses keep their accounts in dollars and cents, but the Government accounts are in sterling.

Weights and Measures.

Weights and measures are of the Imperial standard except in the case of motor spirit, which is sold by the wine or American gallon.

I.—General.

In his address to the Legislative Council on the presentation of the Budget in December, His Excellency the Governor stated that "In spite of the fall in the prices for our two principal agricultural products, cocoa and nutmegs, the economic position of Grenada is still strong." This is shown by the fact that the actual surplus of Revenue over Expenditure for the year was £20,019. The fall in prices in cocoa and nutmegs does, however, give ground for anxiety and attempts are being made to improve the position by co-operation among producers. Grenada, fortunately, is but little affected by the crisis in the sugar industry, since the growing of canes on a large scale was abandoned years ago.

Owing to the continued satisfactory position, it has been possible to continue a progressive programme of Public Works. The total assets at the end of the year including a Reserve Fund of £50,000 amounted to £123,675.

The oiling of the main roads has been steadily continued and, so far as the Eastern Road is concerned, will be completed within a year or two. The Western Road, however, presents a much more difficult problem, but with the provision of a grant of £8,000 from the Colonial Development Fund, it is hoped to make a start during the present year.

The Queen's Park, the recreational centre for the town of St. George's, has been greatly improved and the Grand Stand, built

partly from Government funds and partly from public subscriptions, was completed during the year.

Among other works of importance carried out during the year were the extension of York House and the Boys' Secondary School and the building of a new Revenue and Post Office at Sauteurs.

The town of St. George's was lighted by electricity for the first time in August, but the regular supply of current was not commenced until December. Almost continuous service is now provided and a further extension to the St. Paul's district will shortly be undertaken. It is also proposed to utilize the power for an ice and cold storage scheme.

The long discussed proposals for a water-borne sewerage system for St. George's were carried a stage further by their submission to the Secretary of State with a view to seeking assistance from the Colonial Development Fund.

Subsequently Mr. Guy Howard-Humphreys of the firm of Messrs. H. Howard Humphreys and Sons, Consulting Engineers to the Crown Agents for the Colonies, visited Grenada and revised the scheme and the estimates. Dr. A. J. R. O'Brien, C.M.G., M.C., who was specially deputed by the Secretary of State to report on public health proposals prior to their submission for consideration by the Colonial Development Advisory Committee advised that, in view of the high cost of the proposals in proportion to the size of the town and of the possibility of the existing water supply being inadequate for this additional purpose, the scheme should be abandoned. Alternative proposals for conservancy in St. George's are under consideration.

An event of outstanding importance to the Medical and Health work of the Colony was the inauguration of an anti-malarial campaign under the auspices of the Rockefeller Foundation, International Health Board. Dr. H. H. Howard, Director of the Rockefeller International Health Division for the West Indies, visited Grenada in June and subsequently a malarial survey was carried out by Drs. Root and Andrews.

His Excellency Sir F. S. James, K.C.M.G., K.B.E., was on leave from 19th July to 23rd October, and the Government of the Windward Islands was administered in his absence by the Honourable Herbert Ferguson, C.B.E., Colonial Secretary of Grenada. Mr. Ferguson went on leave on 7th November. Mr. C. A. Pickwoad, late of the Colonial Audit Department, acted as Colonial Secretary from 19th November until 15th December, when he was compelled by ill-health to return to Europe.

Mr. B. H. Easter, M.B.E., B.A., acted as Colonial Secretary and Treasurer from 16th December.

II.—Finance.

Revenue.

The total Revenue for the year amounted to £158,302.

The following table shows the total revenue during the past five years, with separate particulars of direct and indirect taxation :—

Year.	*Import Duties.*	*Export duties, Income Tax and other direct taxation.*	*Other Sources.*
	£	£	£
1925	67,342	59,454	19,422
1926	62,471	64,704	21,271
1927	68,523	66,473	20,512
1928	71,434	61,905	20,531
1929	70,763	64,192	23,347

Expenditure.

The expenditure for the year was £138,193, being less than the revenue by £20,109.

The following table gives a comparison of revenue and expenditure for the past five years :—

Year.	*Revenue.*	*Expenditure.*	*Surplus.*
	£	£	£
1925	146,218	112,467	33,751
1926	148,447	119,001	29,446
1927	155,508	131,413	24,095
1928	153,870	131,244	22,626
1929	158,302	138,193	20,109

No change took place during the year in the method of raising revenue.

Assets and Liabilities.

The excess of Assets over Liabilities at 31st December, 1929, was £123,675, comprising the following :—

	£
Invested Reserve Fund	50,000
Loan to Central Water Authority ...	15,045
Loans to District Boards	1,337
Public Works Stores	3,236
Colony Drug Stores	1,590
Telephone, etc., Stores	328
Land Settlement Advances	426
Queen's Park Pavilion Advances ...	959
Other surplus assets in liquid or readily available form	50,754
	£123,675

PUBLIC LOANS.

The net indebtedness of the Colony under Public Loans, after deduction of the amounts represented by sinking funds and repayments, at the end of 1929, was £157,087.

The particulars of the Loans are as follows :—

	£	s.	d.
Inscribed Stock (Colony's share)	113,489	0	9
Do. (District Board's share) ...	10,180	19	3
	123,670	0	0
Sundry Debenture Holders, Local Loan Ordinance, 1917	78,960	0	0
	202,630	0	0
Stockholders for Electric Lighting and Telephone Reconstruction Loan ...	40,712	9	4
Loan for construction of St. Andrew's Market	6,366	0	11
	249,708	10	3
Sinking Fund accumulated towards redemption of above	92,621	2	2
Net indebtedness	£157,087	8	1

Debentures under the local Loan Ordinance, 1917, to the amount of £3,100 were redeemed during the year, and contribution to Sinking Fund of the Inscribed Stock Loan which had been discontinued in 1928, was resumed in 1929, on instructions from the Secretary of State.

III.—Production.

AGRICULTURE.

Cocoa.—This is the principal cultivation in the island and accounts for over 51 per cent. of the exports.

The quantity and value of the cocoa crops exported during the past five years are shown in the following table :—

Year.	*Quantity.* cwt.	*Value.* £
1925	73,216	197,231
1926	83,384	223,290
1927	100,478	305,640
1928	91,444	274,461
1929	90,987	210,082

Owing to the prevalence of low prices there was a heavy fall in the value of cocoa exported.

Nutmegs.—The area under this cultivation continues to be extended.

Crop and exports for the past five years have been as follows :—

Year.	*Quantity.* *cwt.*	*Value.* £
1925	21,762	145,861
1926	22,702	127,000
1927	21,238	103,444
1928	19,620	87,965
1929	22,666	100,323

Mace.—This is a derivative of the nutmeg, being a lace-like covering of the kernel. It commands a high price. The quantities produced and exported in the past five years were as follows :—

Year.	*Quantity.* *cwt.*	*Value.* £
1925	3,843	39,606
1926	3,679	49,490
1927	3,733	59,145
1928	3,141	49,260
1929	3,765	55,766

Cotton.—The cultivation of cotton is practically confined to the island of Carriacou. The type grown is Marie Galante, similar to the American (Middling Upland) and commands a somewhat similar price in the Liverpool market. Steps are being taken to improve the cultivation.

The following table gives the exports during the past five years :—

Year.	*Quantity.* *cwt.*	*Value.* £
1925	3,252	16,500
1926	3,157	14,040
1927	3,788	15,890
1928	2,568	10,735
1929	2,945	14,905

Various subsidiary crops are grown, principally sugar, lime, and coconuts. Grenada does not grow sufficient sugar to supply the local demand and importation of raw sugar amounted in 1929 to 1,628,475 lb., of the value of £10,086.

The values of lime and coconut products exported in 1929 were £13,400 and £3,620 respectively.

An attempt is now being made to develop a fruit and vegetable trade with Canada. It has to be remembered that the remaining fertile land not already under profitable cultivation is limited, and development of new cultivation to any great extent could only be at the expense of uprooting other permanent crops.

Rum is manufactured at thirteen sugar estates, but none is exported, the production being barely equal to the demand for local consumption. The quantity made last year was 42,661.5 proof gallons.

Ice is manufactured at a factory in St. George's, aided by a subsidy from the Government.

Forestry.

A Forestry Board is constituted under an Ordinance, and looks after the preservation of rainfall by protecting mountain ridges from being denuded. There is power under the Forestry Ordinance to declare rain reserves, the owners of the mountainous areas so dealt with being compensated by remission of land tax. A Forest Reserve of 2,485 acres is established on Crown Lands at Grand Etang near the centre of the island. The area is too small and too inaccessible for growing timber at a profit.

Mining.

There are no mines of any kind.

Fisheries.

There is no established fishing industry, but supplies of fresh fish are constant, as there are several good fishing grounds near the coast. The fishermen do not venture far from land, and pursue their occupation in small canoes and shallow boats.

IV.—Trade and Economics.

The total value of import and export trade amounted to £813,860, imports representing £396,661 and exports £417,199, leaving an apparent favourable trade balance of £20,538.

The principal articles imported in the last three years were as follows :—

Imports.

Article.	1929.	1928.	1927.
	£	£	£
Flour	47,743	46,069	46,273
Cotton piece-goods	29,645	29,091	32,071
Wood, etc., unmanufactured ...	24,821	18,883	8,881
Fish, dried	18,488	17,944	14,915
Rice	14,720	11,731	12,314
Boots and shoes	11,749	10,083	10,112
Sugar, unrefined	10,086	10,123	14,280
Motor spirits	9,964	9,842	9,203
Hardware	8,144	9,681	6,481
Motor cars	7,185	10,775	10,086
Motor parts	7,174	8,635	7,347
Kerosene oil	7,111	7,731	7,873

Exports.

The principal exports during the last three years were as under :—

Article.	*1929.*	*1928.*	*1927.*
	£	£	£
Cocoa	210,082	274,461	305,640
Spices, nutmegs	100,323	87,965	103,444
Do. mace	55,766	49,260	59,145
Cotton, raw	14,905	10,735	15,890
Cotton seed	4,119	1,850	2,960
Lime oil	10,976	1,261	1,585

The sources of supply of imports and destination of exports in 1929 may be seen from the following table :—

	Imports. £	*Percentage of total.*	*Exports.* £	*Percentage of total.*
United Kingdom	136,069	34·4	164,086	39·5
United States of America ...	71,451	18·2	186,725	44·9
Canada	90,360	22·8	44,932	10·8
Other British Possessions ...	71,858	18·2	18,364	4·4
Other Foreign Countries ...	26,923	6·4	1,581	·4

In the previous year the percentage of imports and exports from and to the United Kingdom amounted to 37.9 and 43.7 respectively.

V.—Communications.

(i) By Sea.

A fortnightly mail passenger and cargo service with Canada was established at the end of 1928 by the Canadian National Steamships Company, the service being undertaken by modern oil-burning vessels with excellent passenger accommodation and equipped with cold storage. The steamers start from Halifax, Nova Scotia, and land passengers on the return journey at St. John, New Brunswick, proceeding afterwards to Halifax to load for the voyage south.

Steamers of the Furness Withy Line supply a direct passenger and cargo service between Grenada and New York, calling at intervals of about ten to fourteen days. The voyage occupies seven days.

There is a regular direct monthly service to London by the passenger steamers of the Harrison Line, while frequent calls are made by cargo steamers of this Company, especially during the crop season from December to May.

The steamers of the Ocean Dominion Line from Canadian ports call at intervals of about a fortnight.

Numerous sailing vessels ply between Grenada and Trinidad and Barbados and other neighbouring islands.

The yawl, *Sulaire*, was purchased by the Governments of Grenada and St. Vincent early in the year and a service was carried on between Grenada and St. Vincent via the Grenadines. She was, however,

found expensive to run, and the service was discontinued. Alternative proposals for the maintenance of communication between the islands are under consideration.

(ii) By Cable and Wireless.

The cable line of the West India and Panama Telegraph Company connects Grenada with the outside world.

A wireless station operated by the Pacific Cable Board under a subsidy from the Government, is established in St. George's, and communicates direct with Barbados.

A subsidiary wireless station is installed at Carriacou and communicates with Grenada.

(iii) By Land.

There is no inland telegraph service. A telephone service—at present under reconstruction without interruption of business—has been established by Government for many years. There are six exchanges and 1,354 miles of subscribers' lines. The number of subscribers in 1929 was 773.

The island is well supplied by a good system of main roads and by-ways kept in good repair by six motor road-rollers. All the main roads and practically all the by-ways are suitable for motor traffic. The mileage of main roads is 115 and of by-ways 274.

There is a regular service of motor-buses between all the towns.

VI.—Justice, Police, and Prisons.

(i) Justice.

The criminal statistics of the Colony vary but little from year to year. Thus in the year under review the number of persons dealt with in the Summary Courts was 2,643, as compared with an average of 2,546 for the three preceding years.

Out of this total of 2,643, the number of summary convictions was 1,866 and that of convictions in the Supreme Court 37, as compared with an average during the three preceding years of 1,788 summary convictions and 21 convictions on indictment.

Convictions for praedial larceny were 163 as against 143 in 1928, and 146 in 1927.

Four cases of homicide occurred during the year, three of which were committed for trial in the Supreme Court. Of these, one was convicted of manslaughter and the other two were acquitted. There were no cases of offence against property with violence to the person.

(ii) Police.

The strength of the police force on 31st December, 1929, was one Officer in Command, one Inspector and 100 non-commissioned officers and men. Rural constables to the number of 210, employed on special occasions, were also on the roll.

A strike of the police force occurred on the morning of 14th September, but they resumed duty later in the day. This action is much to be regretted and was apparently based on a false impression that no action was being taken regarding a petition which they had previously presented. In point of fact several measures for the improvement of the conditions of the force were already under consideration by the Secretary of State and have since been adopted.

In addition to the ordinary police duties, the Police Department assists in the protection of revenue, administration of poor relief, inspection of shops and weights and measures, while a Fire Brigade and Government Band are under its management and control.

(iii) Prisons.

A prison for males with an adjacent separate building for females is situated near Richmond Hill, St. George's.

During the year 163 persons were committed to the male prison and 26 to the female prison, the daily average of inmates for the two prisons being 34.79 and 5.2 respectively.

One death occurred, but the general health of the prisoners on the whole was satisfactory.

VII.—Public Works.

Among the principal public works undertaken during the year were the completion of a Grand Stand at Queen's Park, the widening of Beausejour Bridge, the extension of York House including Attorney-General's Chambers and Law Library, the widening of the northern approach to the town, additions to the Resident Surgeon's quarters, the extension of the Secondary School and new Revenue and Post Office at Sauteurs and quarters for junior officers at Grenville.

VIII.—Public Health.

Apart from mild epidemics of whooping cough and influenza, the incidence of disease during the year was subnormal. This was especially so in the case of enteric fevers of which there were 30 cases for the whole Colony, the average number for the previous decade being 91 cases per annum ; dysentery also showed a marked diminution. The influence of the hygienic campaign, which began with the introduction of the new Public Health Ordinance in 1926, is showing its effect in these returns and this is supported by vital statistics.

The estimated population of the Colony was 75,867.

The birth-rate for 1929 was 32.24 per 1,000 and the death-rate was 16.8 per 1,000. The majority of deaths occur at the two extremes of life, about 38 per cent. being among young children and aged persons.

Infant mortality showed a rate of 109 per 1,000 living births—the average rate for the previous ten years was 110.2 per 1,000, and the steady fall during the past four years is attributed to the activities of the Maternity and Child Welfare League, founded by Lady James in 1925, and to the establishment in 1926 of Medical Visiting Stations all over the Colony each with a resident nurse-midwife, of which there are 16, to whom a bonus is paid for each infant certified by the Medical Officer to have been materially assisted in its first year of life by the nurse.

The infant mortality rate for Grenada is not only lower than the average for the decade, but is the lowest in the West Indies ; child life during its first year in the tropics runs great risks of diarrhoea and enteritis which contribute heavily to the mortality rate but this is lower during 1929 than in previous years.

During the months of June, July, August, and September, the Rockefeller Foundation—International Health Division—conducted a malaria survey of the whole Colony. It is gratifying to find that the Report on this survey goes to prove that the previous opinion of the Chief Medical and Health Officer—that the incidence of malaria in Grenada was not nearly so high as reported—was correct. With the exception of the swampy areas surrounding the towns of Grenville and Sauteurs, the Colony was found to be remarkably free from malaria. This happy condition is particularly remarkable in the island of Carriacou.

An anti-malarial control campaign is being inaugurated following on this survey, which is expected to reduce the incidence of this disease decisively in the Grenville and Sauteurs areas.

Grenada is well supplied with hospitals and medical institutions, and when the Colony Hospital is provided with an X-ray installation which is hoped for during 1930, it will compare favourably with the hospitals of most West Indian Colonies.

The climate of Grenada is well suited to Europeans, and their children do well here ; extremes of great heat are uncommon and the atmosphere is only oppressive for short intervals during the rainy season—generally before a heavy down-pour, after which the air is much cooler. For the first six months of the year the climate will compare to advantage with that of the French and Italian Riviera.

There is a Central Hospital with 141 beds in St. George's, and smaller hospitals of 24 beds each in Carriacou and in St. Andrew's. In addition there are 14 District Visiting Stations, under the charge of District Nurses who are qualified as midwives.

A Maternity Welfare Centre is established in St. George's and continues to do most excellent work. A Clinic for children is regularly held by the District Surgeon of the Colony Hospital or one of the District Medical Officers. A trained nurse midwife,

employed by the League, visits mothers and advises as to the care and management of children, and in necessitous cases a regular supply of milk is provided.

The adult death-rate of Grenada is low, and the climate in general is healthy. Recreations include cricket, tennis, golf, bathing, fishing, and motoring.

IX.—Educational Progress.

Educational matters are looked after by the Boards of Primary and Secondary Education under the Presidency of the Director of Education.

Secondary.

There is a Government Secondary School for boys, at which the attendance now averages about 120. During the year additional buildings were taken over and renovated, provision being made for a Boarding establishment of about 20, and for a Manual Training Centre, both of which are now in operation.

The staff includes a qualified Science Master and science is now taught in a well-equipped laboratory.

Three secondary schools for girls receive a grant-in-aid from the Government. The numbers on the rolls average from 90 to 100. No Matriculation examination was held during the year. For the Cambridge School Certificate (Senior Examination) there were 7 entries and 5 passes (boys) and 2 entries and 1 pass (girls). The total expenditure by the Government was £3,020.

Primary.

A scheme for the reorganization of the schools has been under discussion during the year.

The number of recognized primary schools remained the same, namely 58.

The number of pupils on the rolls in 1929 was 13,235, the average attendance being 8,311 or 62.8 per cent.

The total expenditure by the Government was £9,541.

X.—Land and Survey.

Land in the possession of the Crown is small in area, and consists principally of mountain ridges in forest for preservation of the rainfall. Notwithstanding this, a Land Settlement Scheme was initiated by the Government upwards of twenty-five years ago, the main features of the scheme being the acquisition of properties offered for sale, which were then divided into small lots and re-sold to peasants on favourable terms spread over a number of years.

The success of the scheme may be noted from the following table showing the number of holdings of land according to the Tax Rolls for the year 1929.

Total acreage.	*2½ acres and under*	*Over 2½ to 5 acres.*	*Over 5 to 7 acres.*	*Over 7 to 10 acres.*	*Over 10 to 100 acres.*	*Over 100 acres.*
75,763	13,316	1,703	327	204	375	142

The number of large estates is comparatively small, and no lands are available for settlement on a large scale.

XI.—Labour.

Labour consists chiefly of employment on the estates—in working or ploughing the land, draining, weeding, cutlassing, pruning, manuring, and other land work, and reaping the produce. The labourers are employed in gangs, under personal charge and supervision. Labour is also employed on the public roads of the Colony, on general repair and surface oiling work.

The rates of pay are approximately as follows :—

£3 to £8 per month for overseers.
2s. to 4s. per day for drivers.
1s. to 2s. per day for labourers.

The daily rates quoted above are usually for " task " work, which may be completed by quick workers in from 3 to 4 hours. Labourers seldom work two tasks in a day, preferring to cultivate their garden lots, which are generally given by the estate proprietors to those who own no land of their own.

Other labour includes masons, carpenters, mechanics, bootmakers and chauffeurs, the work generally not being of a high standard. The pay of these is approximately as follows :—Masons, carpenters and mechanics, 2s. to 7s. per day ; chauffeurs £3 to £5 per month.

XII.—Legislation.

Of the five Ordinances passed during the year the principal were the following :—

No. 3 the Legitimacy Ordinance which provides for the legitimation of children by the subsequent marriage of their parents and confers on an illegitimate child and its mother the right to inherit from each other on intestacy.

No. 4 provides more reasonable hours of lighting vehicles.

No. 5 provides a much needed right of appeal against interlocutory judgments. In addition eight Bills were read a first time.

XIII.—Miscellaneous.

The Boy Scout and Girl Guide Organizations continue to progress.

There are now 15 troops of Scouts, Rovers, and Wolf Cub Packs. A Rover Sea Scout Crew has recently been started.

There are sixteen companies of Rangers, Girl Guides, and Brownies.

B. H. EASTER,
Acting Colonial Secretary.

Map.	

Geographical.

The island of St. Vincent, which is of volcanic origin, is popularly supposed to have been discovered by Columbus on the 22nd January, 1498. It is situated in 13° 10′ North Latitude, and 60° 57′ West Longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length and 11 in breadth, and contains about 96,000 acres of land—about half the area of Middlesex. Of the Lesser Grenadines, a chain of small islands lying between Grenada and St. Vincent, Bequia, Mustique, Mayreau, Canouan, and Union Island are administered from St. Vincent.

Historical.

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

In 1748 St. Vincent was again declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

In 1773 an extensive portion of St. Vincent was allotted to the Caribs on condition that they acknowledged the King of Great Britain as their Sovereign.

In 1779 the island surrendered to the French, and by the Treaty of Versailles, in 1783, it was restored to Great Britain.

Language.

The language of the Colony is English throughout.

Currency.

British and American gold, five-dollar notes of Barclays Bank (Dominion, Colonial, and Overseas), and British silver and bronze coins constitute the currency of the Colony.

Government accounts are kept in sterling and commercial and banking accounts in dollars and cents.

Weights and Measures.

Imperial weights and measures are in use.

Climate.

St. Vincent is one of the healthiest of the West Indian Islands.

The climate may be divided into seasons, wet and dry; the dry season from January to May, and the wet from June to December. The coolest months are December to April. The temperature varies from 78° F. to 85° F. The highest temperature is met in July and the lowest in December.

The rainfall in Kingstown, the capital, registered at the Agricultural Experimental Station, 80 feet above sea-level, was 69·30 inches for the year. The heaviest fall for one day was 2·01 inches on 24th July.

I.—GENERAL.

His Excellency Sir Frederick Seton James, K.C.M.G., K.B.E., proceeded on leave of absence on 23rd May, prior to retirement.

In May, 1930, the Administrator of St. Vincent proceeded to Grenada, the seat of Government of the Windward Islands, to administer the Government thereof, pending the arrival of the newly appointed Colonial Secretary of Grenada, the Honourable H. R. R. Blood, who administered the Government of the Windward Islands from 5th June until the return of His Honour Charles W. Doorly, C.B.E., Administrator of St. Lucia, from leave on 3rd August, by whom the Government of the Windward Islands was administered

until the arrival of the newly-appointed Governor, His Excellency Sir Thomas Alexander Vans Best, K.B.E., C.M.G., late Lieutenant-Governor of Malta, on 25th September.

The Acting Governor, His Excellency H. R. R. Blood, visited St. Vincent from 18th to 23rd July.

His Excellency Sir Thomas Alexander Vans Best, K.B.E., C.M.G., paid a brief visit to the Colony on 4th December, chiefly in connection with the Horticultural, Industrial, and Animal Show which was held on the same date.

The Administrator of St. Vincent proceeded on leave of absence in June and the Honourable J. H. Jarrett, Attorney-General of Grenada, acted as Administrator from 14th May to 20th November, when Administrator H. Peebles returned.

The Inspector-General of the West Indian Local Forces visited the island on 24th April remaining six days, during which period he inspected the Local Forces.

It was with deep feelings of regret that news was received of the death of Brigadier-General G. C. Grazebrook C.M.G., D.S.O., Inspector-General of the West Indian Local Forces, in July.

In April, the United States Ships *Richmond* and *Memphis* paid a visit to the Colony, remaining some nine days. The greatest harmony existed between the Ships' company and the inhabitants. The visit of these two men-of-war was of great benefit to the island financially owing to the heavy purchases of fruit, vegetables, and stock by them.

On the 19th December the Arrowroot Ordinance was passed by the Legislative Council as a private Bill but a Government measure. £33,000 was granted by the Colonial Development Fund to the St. Vincent Co-operative Arrowroot Association—£3,000 of this to be a free grant and £30,000 a loan free of interest for five years, to carry interest at 5 per cent. thereafter and repayable within 20 years.

The St. Vincent Co-operative Arrowroot Association is a body corporate to market arrowroot, to regulate and control the export thereof, and to improve the conditions under which arrowroot produced in the Colony shall be grown, manufactured, graded, and sold, and, in particular, to obtain for small growers the full ultimate value for this product.

The following schemes for assistance were approved by the Colonial Development Advisory Fund Committee :—

	£
Extension of Road Reconstruction Programme ...	10,000
Installation of Incinerators in the Small Towns ...	660
Erection of Dispensaries at Colonarie and Troumaca	550
Removal of Leper Colony to Chateaubelair Islet ...	1,094
Extension of Chateaubelair Township	6,490
Concreting of open drains in Kingstown and Small Towns	1,846
Provision of water supplies in Small Towns and Villages	3,751

II.—FINANCIAL.

The Colony is to be congratulated on its sound financial position.

	£
Net surplus at 1st January, 1930	13,870
Revenue in 1930	76,602
	£90,472
Expenditure in 1930	69,769
Surplus at 31st December, 1930	£20,703

The Surplus Assets of £20,703 is comprised of Loans to Boards £2,032, Unallocated Public Works Stores and other Stores £5,172, and £6,000 being the unspent balance of the sum of £8,000 received on behalf of the St. Vincent Co-operative Arrowroot Association, thus leaving £7,499 Liquid Surplus Assets at the close of the year.

The revenue and expenditure for the last five years were as follows :—

	Revenue.	*Expenditure.*
	£	£
1926	60,243	59,282
1927	56,469	61,564
1928	64,593	60,441
1929	64,090	70,786
1930	76,602	69,769

The increase in revenue of £12,512 was mainly due to Excise Duty on rum—the increase of local production obviated importation—and £8,000 advanced towards the loan of £30,000 and a grant of £3,000 by the Colonial Development Fund.

The total expenditure for the year was £4,796 in excess of that estimated, but £1,017 less than the expenditure in 1929. The excess in expenditure over the Estimates was mainly due to increased pensions and amount advanced on behalf of the Colonial Development Fund to the St. Vincent Co-operative Arrowroot Association.

The principal items of revenue in the last five years were :—

	1926.	*1927.*	*1928.*	*1929.*	*1930.*
	£	£	£	£	£
Import duties ...	26,683	24,649	28,137	26,440	28,484
Export duties ...	2,959	2,587	2,849	2,784	2,639
Excise duty on rum ...	6,479	4,685	4,137	5,183	6,700
Land and House Tax ...	4,124	3,442	5,760	6,640	6,576
Income Tax	3,014	2,480	2,702	3,055	2,677
Postage stamps ...	1,774	1,875	3,695	1,769	1,767
Liquor trade duty ...	3,013	2,820	3,127	2,710	3,148

The Public Debt of the Colony on the 1st January, 1930, was £38,650, of which £810 was redeemed during the year, made up as follows :—

	£	£
Debenture Holders—		
Colony's share	5,900	
Kingstown Board's share	2,240	
	——	8,140
Crown Agents Intercolonial Loan for Electric Light, Telephone, and Road Reconstruction, 1929		25,510
Colonial Development Fund for the Co-operative Arrowroot Association, 1930		5,000
		38,650
Sinking Fund accumulated towards redemption of the above :—		
Colony's share	4,965	
Kingstown Board's share	871	
	——	5,836
Thereby leaving a net Public Debt of		32,814

The Loans raised during the year were :—

Kingstown Board for Additional Water Supply (Local)	1,400
St. Vincent Co-operative Arrowroot Association, from Colonial Development Fund	5,000
	£6,400

The unexpended balance of £25,000 of the Eruption Relief Fund, 1903, is invested and held as a reserve or insurance fund against any future disaster. The interest derived from this, namely, £750 per annum, is applied to the relief of the poor. This amount plus the Colony's Reserve Fund of £16,033 offers security both for elemental disasters and economic depression.

The Public Property Insurance Fund started during 1926 stands at £2,880.

III.—PRODUCTION.

Cotton.—Export of Sea Island cotton was good considering the small area planted under this crop. The yield was at the rate of 150 lb. per acre for the 1929–30 crop, when 1,758 acres were planted.

256,167 lb. of lint were exported ; this was 26,736 lb. less than 1929. The decrease was due to the small area planted.

Export of Marie Galante lint was 67,267 lb. In addition 49,316 lb. of seed cotton were exported. Converting seed cotton into terms of

lint, we find that 79,596 lb. were exported in 1930 and 87,484 lb. in 1929.

The area under cotton during 1930 in St. Vincent and the Grenadines was 3,955 acres of Sea Island and 1,041 acres of Marie Galante —as compared with 2,867 acres—1,758 of Sea Island and 1,109 of Marie Galante in 1929.

Arrowroot.—3,590,348 lb. of arrowroot were exported valued at £59,019. This shows a slight increase of 16,589 lb. when compared with that exported in 1929. The United Kingdom took 1,496,330 lb. and the United States 1,084,536 lb., figures very much on a par with those for 1929. The remainder of the crop was sent to Barbados, Canada, Germany, France, Curacoa, and islands of the British West Indies.

Since the writing of the last report the St. Vincent Co-operative Arrowroot Association has been inaugurated to handle arrowroot in the same manner as wheat is handled by the Canadian Wheat Pool. Since its inauguration it has gained the confidence of arrowroot growers.

Sugar.—There was a decrease in the quantity of sugar and syrup exported. 819 tons of sugar valued at £9,209 and 183,786 gallons of syrup valued at £7,360 were exported. Sugar shows a decrease of 573,440 lb. and syrup 104,155 gallons over that of 1929. This was to be expected when one considers the condition of the world's sugar market. The manufacture of sugar was not profitable but the by-product, rum, helped to keep the industry alive. The market value of sugar was a little over £11 per ton.

Coconuts.—The production of copra was very much on a par with that of 1929. In 1930, 1,810 167 lb. of copra were produced, whilst in 1929, 1,879,558 lb. Returns from orchard crops vary from year to year and in the future an increased production on a par with that of recent years may be looked for. No doubt the severe drought accounted for the slight decrease. Copra was valued at £14 per ton.

Of the minor products there was an increase in the quantity of cassava starch, maize, peas, and beans produced.

In 1929, 2,776 proof gallons of rum were exported, in 1930 this has risen to 9,195 gallons.

The name of the Peasants' Bureau was changed to that of Government Fruit and Vegetable Bureau. During 1930 this Institute exported 1,794 crates of avocado pears, tomatoes, grape fruit, limes, mangoes, oranges, etc. In addition 15,036 lb. of cabbages, eschalots, guava jelly, onions, peanuts, etc., were shipped, and 765 gallons of lime juice and 10 lb. of honey were exported. Excellent reports were received from England on samples of canned tomatoes sent to that country.

The appended table shows the comparative amount of the annual exports of the principal commodities during the last five years :—

IV.—TRADE AND ECONOMICS.

The total values of imports and exports for the last five years were :—

Year.	Imports.	Exports. Island Produce.	Exports. Other.	Total.
	£	£	£	£
1926	203,606	158,420	4,489	162,909
1927	172,097	145,213	602	145,815
1928	192,476	155,884	2,588	158,472
1929	186,439	151,207	363	151,570
1930	200,830	146,704	5,033	151,737

The following table shows the value of imports and countries of origin for the past five years :—

	1926.	*1927.*	*1928.*	*1929.*	*1930.*
	£	£	£	£	£
United Kingdom	67,425	55,812	62,335	58,030	73,802
Canada	45,373	40,540	45,787	49,382	43,763

* Does not include Parcel Post.

The following is a summary of the imports for the last five years :—

	1926.	*1927.*	*1928.*	*1929.*	*1930.*
	£	£	£	£	£
Class I.—Food, drink and tobacco.	71,423	64,104	69,274	70,301	71,715
Class II.—Raw materials and articles mainly unmanufactured.	19,402	16,735	18,075	16,792	18,785
Class III.—Articles wholly or mainly manufactured.	102,521	84,954	103,192	97,810	108,083
Class IV.—Miscellaneous and unclassified.	10,260	6,304	1,925	1,536	2,247
Class V.—Bullion and Specie.	—	—	10	—	—
	£203,606	£172,097	£192,476	£186,439	£200,830

The following are the percentages in the last five years of the principal countries from which imported articles are obtained :—

	1926.	*1927.*	*1928.*	*1929.*	*1930.*
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
United Kingdom	33·12	32·43	32·38	31·12	36·75
United States of America	22·95	21·30	22·93	20·19	19·43
Canada	22·28	23·56	23·79	26·49	21·79
All other Countries ...	21·65	22·71	20·90	22·20	22·03

The following is a summary showing the destination and value of exports during the last five years :—

Country of destination.	*1926.* £	*1927.* £	*1928.* £	*1929.* £	*1930.* £
United Kingdom	92,576	68,452	68,930	62,000	64,800
Canada	10,992	10,276	16,435	15,446	15,816
Bermuda	221	305	292	434	429
British West Indies ...	36,716	35,619	39,653	41,252	38,814
British Guiana	649	747	272	788	532
United States of America	20,613	28,491	30,628	25,580	24,683
Other Countries	1,142	1,925	2,262	6,070	6,663

V.—COMMUNICATIONS.

Shipping.

The total number of vessels entered for the year was 454, of a total tonnage of 634,407, as compared with 428, of 491,825 tonnage, in the previous year.

The total number of steam vessels entered was 218 as compared with 169 in 1929, showing an increase of tonnage in 1930 of 144,282 tons.

The total number of vessels cleared was 454, of a total tonnage of 635,502 tons, as compared with 430 of 490,766 tons in 1929.

The Colony is now served by a regular fortnightly mail, passenger, and cargo service of the Canadian National Steamships.

The steamers of the Harrison, Furness Withy, Trinidad and Ocean Dominion lines paid calls during the year.

Mails and cargo are also sent and received by sailing vessels to and from Barbados, Grenada, and Trinidad, whence there is direct communication by sea to the United Kingdom and the United States of America.

Roads.

The road system of the island consists of 34 miles of highway on the windward side from Kingstown to Georgetown and 28 miles on the leeward side from Kingstown to Chateaubelair.

The road from Kingstown to Georgetown on the windward side of the island is now being reconstructed and oiled. Thus in the near future an excellent motor road will be established. It is now possible to drive by motor car from Kingstown to Chateaubelair. About £3,300 is being spent on reconstruction and oiling on the leeward road.

The highway on the windward side is the main artery of traffic owing to the coast line having no facilities for shipping.

On the leeward side the sea is the natural and economical highway for produce. A sum of £10,000 was obtained from the Colonial Development Fund for the extension of road reconstruction and oiling, thus augmenting the loan of £10,000 raised during 1929.

There are some 280 miles of by-ways which act as feeders from the interior to the main roads. Special attention is being paid to these by-ways for the purpose of cart transport.

Postal.

The Central Post Office is situated at Kingstown, the capital of the Colony.

There are 18 Post Offices in all in the Colony, including the Post Offices in the Lesser Grenadines of Bequia, Canouan, Mayreau, and Union Island.

The mails on the windward portion of the island are conveyed to the eight Post Offices by motor mail car leaving Kingstown every other day and returning to Kingstown every other day.

There is a daily conveyance of mails to the leeward portion of the island by motor launch throughout the year.

A weekly service is maintained to the four out islands, but mails for the Lesser Grenadines are conveyed as often as sea transport is available.

198 steamers and 76 vessels brought mails to the Colony.

At present little use is made of the air mail service from Trinidad and St. Lucia.

There is no inland telegraph service but a very reliable telephone service exists throughout the Colony.

The West India and Panama Telegraph Company and the Pacific Cable Board have been merged into the Imperial and International Communications Limited.

The revenue derived from the Postal Department was £2,199, whilst the expenditure was £1,741.

Telephones.

The Government maintains a telephone system which links up Kingstown, the capital, with two exchanges in the windward district and one in the leeward district.

There are 142 private lines and 85 to Government Offices.

Approximately 200 miles of line is maintained. The work of reconstructing the system in Kingstown from the old earth return system to metallic return is being carried out and should be completed early in 1931.

The revenue derived from the telephone system was £1,205, whilst expenditure amounted to £1,452.

Electric Light.

This Department was formed on 1st February, 1930, and includes two branches—Electricity and Telephones—under the control of the Resident Engineer. The work of the Electricity Branch is, at present, purely constructional. It is anticipated that the town of Kingstown will be supplied with electric light early in 1931.

VI.—JUSTICE, POLICE, AND PRISONS.

(*a*) Justice.

Eleven criminal cases were tried by the Supreme Court. Nine actions were filed in the Supreme Court. Only eight appeals from the Magistrates' decisions were filed. The number of Causes filed in the Summary Jurisdiction amounted to 33, as compared with 23 in 1929.

In the Magistrate's Court, District 1, the civil matters dealt with amounted to 490. 843 persons were charged in 1930 as against 706 in 1929. Fines collected amounted to £151, an increase of £18 on the preceding year.

In the Magistrate's Court, District 2, the civil matters dealt with amounted to 1,124 as compared with 1,314 in 1929. 1,335 persons were charged as against 1,081 in 1929, and 1,186 were convicted. Fines amounted to £327.

(*b*) Police.

The strength of the Force remained as in 1929, namely two officers and 51 other ranks. The general health of the Force was good and the discipline was at a high standard. The Force was inspected by the Inspector-General, West Indian Local Forces, once during the year and reported upon favourably. Fire drills were carried out weekly and all hydrants and fire appliances were regularly inspected. An increase of the rates of pay affecting all non-commissioned officers and the twenty senior constables was approved by the Secretary of State to take effect from 1st June. Thus the St. Vincent Police Force has been placed on an equal footing with the Police Forces in the other islands of the Windward Group.

The total expenditure was £4,700.

(*c*) Prisons.

The staff of the Prison consisted of :—

Superintendent of Prisons.
Keeper of Prisons.
1 Chief Warder.
1 Baker Warder.
3 Warders.
1 Clerical Assistant and Relief Warder.
1 Matron in charge of Female Prison.

The highest number of prisoners at any one time was 36, the lowest 15.

The daily average was 23·20.

The health of the prisoners was good throughout the year and discipline good.

VII.—PUBLIC WORKS.

During the year the items of most importance were the removal of the Carib settlement from the river bank at Rose Bank to adjacent land at Darvue, and the construction of two concrete jetties at Barrouallie and Chateaubelair to replace the wooden ones. The construction of a concrete jetty at Cumberland was also commenced.

Buildings.

Considerable and much-needed work was carried out on primary school buildings. The usual minor repairs to all Government buildings were carried out.

Water Supply.

The work of supplying Troumaca with a pipe-borne water supply was carried out and extended to Rose Hall and Rose Bank Villages.

Storm Damage.

The Colony was exceptionally lucky as regards damage from the elements. For the first time in six years no storm damage took place during the year.

VIII.—PUBLIC HEALTH.

The population of the Colony at 31st December, 1930, was 53,228.

The birth-rate for the year was 35·34 per thousand, as against 35·31 per thousand in 1929.

Legitimate births numbered 498, and illegitimate births 1,383, the percentage of illegitimate births being 73·5 as against 72·9 in 1929.

The death-rate per thousand for the year was 15·07 as compared with 19·41 in 1929.

The deaths of infants under one year (exclusive of still-births) numbered 166, as against 257 in 1929.

There were 110 still-births, of which 17 were legitimate and 93 illegitimate.

There were 10 cases of enteric fever during the year, as against 11 in 1929 and 10 in 1928.

There were 379 cases of influenza recorded with 5 deaths.

There were 1,060 cases of diarrhoea in children with 65 deaths in the districts.

The district returns show 458 cases of malaria with 9 deaths. 11 cases with one death were admitted into the Colonial Hospital.

A course of lectures and demonstrations was given during the year for those desirous of qualifying as Sanitary Inspectors. Seven candidates took the course, 6 qualified and received local certificates of efficiency. The entire staff of Sanitary Inspectors is now qualified.

IX.—EDUCATION.

Education is free but not compulsory.

On 31st December, 1930, there were 35 schools ; of these 11 belong to the Government which bears the whole cost of their maintenance. Religious denominations provide and are responsible for the upkeep of the buildings of the remaining 24 schools. The salaries of all teachers and the equipment of both Government and Denominational Schools are met from General Revenue.

The following comparative table gives particulars in regard to primary education during the years 1928, 1929, and 1930 :—

	1928.	*1929.*	*1930.*
Number of Schools	30	30	35
Number of pupils on roll at 31st December.	6,620	7,083	8,573
Average attendance	3,410	3,757	4,690
Government Grant-in-aid	£4,066	£4,281	£5,632
Cost per head in average attendance	£1 3*s.* 10*d.*	£1 2*s.* 9*d.*	£1 4*s.* 0*d.*

The increase in the number of pupils on the roll is due to the fact that the school-going age is lengthened by one year. Pupils are admitted at the age of 4, instead of at 5, as in the past.

The number in average attendance in 1930 was a little better than that in 1929. The chief factors militating against average attendance are employment of child-labour, and indifference of some parents and pupils.

The additional 5 schools which were formerly not regarded as Regular Schools are now classified as Infant Schools.

Two scholarships are provided by the Government, one for boys and one for girls, open to pupils of primary schools and tenable for four years at the Grammar School and the Girls' High School respectively.

The Government maintain and finance two secondary schools—the Grammar School and the Girls' High School. Fees charged at each school are at the rate of £2 per term. At 31st December the number in attendance at the Grammar School was 54 and at the Girls' High School was 69.

There is an island scholarship of the annual value of £250. This is awarded biennially, and is tenable for not less than three years and not more than five years at an approved University. The cost of passages to and from England is also defrayed.

The Town Board of Kingstown also award two scholarships of the annual value of £6 each. (One for boys at the Grammar School and one for girls at the Girls' High School).

All the Government and Denominational School buildings were painted during the year. The interiors of all were brightened with Empire Marketing Board posters. Nearly all school buildings need enlargement, many being congested.

There are also 10 private schools in the Colony, the most important being that of Mr. J. P. Eustace, with an average attendance of 18 boys and 5 girls.

X.—CROWN LANDS AND SURVEYS.

The revenue collected during the year totalled £853.

Arrears amounted to £305. These arrears are largely due to market depression and will be paid up during the coming year.

In 1929 arrears amounted to £271.

One hundred and eighty-two Title Deeds were issued.

No surveys were made by surveyors in private practice.

Ten surveys were carried out by the Government Department.

XI.—LABOUR.

There is no immigration of indentured labour in the Colony.

The average wage of a labourer on an estate in St. Vincent is 1*s.* 2*d.* to 1*s.* 6*d.* per day and certain perquisites, such as mountain garden lands and the keeping of stock on the estate. Task work on the estates, whereby the labourer can easily earn up to 2*s.* a day, is more popular than daily work. By far the greater part of work on estates is done by women who receive from 6*d.* to 9*d.* per day.

In spite of the general world depression, unemployment among the labouring classes may be said to be negligible.

Labourers in large numbers returned from the oil refineries in Curacoa and the sugar estates of Cuba and Santo Domingo, but were able to find employment on the roads which are undergoing reconstruction and on the cotton plantations where larger crops are being put under cultivation. The help afforded by the expenditure of grants and loans from the Colonial Development Fund should maintain the level for some time.

XII.—MISCELLANEOUS.

Banks.

Barclays Bank (Dominion, Colonial and Overseas) is the only bank in the Colony.

The Government maintains a Savings Bank and pays interest at the rate of 3 per cent.

Agricultural Credit Societies.

There are at present only four Agricultural Credit Societies. The whole question is being carefully gone into and the services of Professor Shephard of the Imperial College of Tropical Agriculture and Mr. G. A. Jones, Assistant Commissioner of Agriculture for the

West Indies, are being obtained with a view to starting new credit societies on a sound, progressive, and business footing. In no Colony in the West Indies are there brighter opportunities for the establishment of Agricultural Credit Co-operative Societies than in St. Vincent. The Colony, owing to land settlement schemes and the keenness of the average peasant to settle on the land, is admirably suited to the successful establishment of these Societies. The failure in the past has been entirely due to lack of proper organization and administration.

Government Cotton Ginnery.

The purchase of Sea Island cotton and corn on a profit-sharing system is still carried out by the Government Cotton Ginnery and is greatly appreciated by the peasant proprietors.

Government Fruit and Vegetable Bureau.

A Government Fruit and Vegetable Bureau was inaugurated by the Government during 1929, and has proved a success. The Bureau purchases, and ships to England, Canada, etc., every kind of fruit and vegetable brought in by the inhabitants, charging 10 per cent. for handling.

Map.

A map of the Colony is annexed.

H. PEEBLES,
Administrator.

INTRODUCTION.

Geographical.

Situated in the extreme south of the Caribbean Sea, Grenada is the nearest British island to the mainland of South America, with the exception of Trinidad and Tobago. It lies 90 miles north of Trinidad and between the parallels of 12° 30′ and 11° 58′ North latitude and 61° 20′ and 61° 35′ West longitude. The island is about 21 miles in length and about 12 miles in its greatest breadth. Its area is about 120 square miles, but, including Carriacou, an island to the north, the area of the Colony of Grenada is 133 square miles.

Grenada is mountainous and well watered by streams. Its coast-line is rugged, especially on the western coast, and towards the south is deeply indented with bays. St. George's Harbour, land-locked and deep-watered, is one of the most beautiful in the West Indies.

The mountain spurs, clothed with forests to their summits, intersect the island into numerous picturesque valleys. There are two small lakes, formed in extinct craters, one called the Grand Etang, being situated near the centre of the island 1,740 feet above sea-level, while the other, Lake Antoine, is near the sea on the eastern coast. A sanatorium is established near the former.

Historical.

Grenada was discovered by Columbus on 15th August, 1498, but for more than 100 years after its discovery the island was left in the undisturbed possession of the aboriginal inhabitants who were of the Carib race. Early in the seventeenth century both English and French adventurers made efforts at occupation of the island, and after being owned by French proprietors for some years, it was annexed to France in 1674. In 1763 the island was ceded to Great Britain by the Treaty of Paris, but was recaptured by the French in 1779 and held by them for the next four years. In 1783, by the Treaty of Versailles, Grenada and the Grenadines were finally restored to Great Britain.

In 1795–96, influenced by the French Republic, a rebellion broke out, and the Lieutenant-Governor and 48 other British subjects were massacred by the rebels. The rising was suppressed in June, 1796, by Sir Ralph Abercrombie, and the ring-leaders executed.

The later history of the Colony has been peaceful and uneventful, and Grenada has reached a high state of development.

Climate.

The climate from December to the end of April, when the heat is tempered by the prevailing trade winds, may be described as good. In the autumn, from July to the end of October, there is greater humidity and higher temperature with little variation between night and day. During this period the climate, although not really unhealthy, may be described as debilitating to Europeans. Even during the hot season, except in the towns themselves which are all near the sea, conditions are not unpleasant. Now that electric power is available, fans are gradually being introduced into houses and offices.

The highest temperature in 1930 was 90° on several days, and the lowest 70° also on several days. The mean of maximum temperature was 89° and the mean of minimum 71°. The rainfall varies according to altitude. In the lowlands of the south the annual amount is as low as 30 inches. In the mountainous centre it approaches 140 inches. At St. George's, midway between the two, the rainfall in 1930 was 54.06 inches.

Over the past 30 years the average at St. George's has been 72.27 inches.

Language.

The only language spoken is English. A small and decreasing number of agricultural labourers in the country districts speak a corrupt patois of English and French, but all understand and speak English.

Currency.

The currency is the same as in Great Britain, the monetary units being the same. Silver, however, is legal tender without limit, and there are also in circulation bank notes of Barclays Bank and the Royal Bank of Canada of five dollars denomination. One or two of the business houses keep their accounts in dollars and cents, but the Government accounts are in sterling.

Weights and Measures.

Weights and measures are of the Imperial standard except in the case of motor spirit, which is sold by the wine or American gallon.

Government is, however, taking steps to cause motor spirit to be sold by the imperial gallon from the beginning of 1932.

I.—GENERAL.

The prices of cocoa and nutmegs continued to fall throughout the year resulting in a shortfall of £4,495 in the estimated revenue. The total expenditure for the year, including expenditure under the Colonial Development Fund and special expenditure from surplus funds exceeded the actual revenue by £26,142.

The total assets on 31st December, including the reserve fund of £50,000, amounted to £97,532.

The first operations under the Colonial Development Fund were carried out during the course of the year, consisting of the reconditioning of six miles of the Western Main Road.

The oiling of the Eastern Road was continued.

The old female prison was transformed into a Government quarter, and a house was built on the Mount Royal site for the Colonial Secretary.

A building for a Fruit and Vegetable Bureau was constructed.

The Electricity Department operated successfully throughout the year.

Sir Thomas Alexander Vans Best, K.B.E., C.M.G., was appointed Governor of the Windward Islands, in succession to Sir F. S. James, K.C.M.G., K.B.E., in April, and assumed the duties of the Colony

on 25th September. Sir F. S. James went on leave from 20th May, and during the interregnum the Government of the Windward Islands was administered by Major H. W. Peebles, D.S.O., O.B.E.; Mr. H. R. R. Blood, M.A., who was appointed Colonial Secretary of Grenada in April; and by Mr. C. W. Doorly, C.B.E.

Mr. B. H. Easter, B.A., M.B.E., administered the Government of the Island from 16th January, 1930, to 2nd April, and from 17th to 23rd July, 1930; and acted as Colonial Secretary for various periods between January and July.

Mr. J. H. Jarrett, Attorney-General, and Mr. K. T. Rae, Superintendent of Agriculture, were appointed in January and February respectively.

II.—FINANCE.

Revenue.

The total revenue for the year amounted to £141,946.

The following table shows the total revenue during the past five years, with separate particulars of direct and indirect taxation :—

Year.	*Import Duties.*	*Export duties, Income Tax and other direct taxation.*	*Other Sources.*
	£	£	£
1926	62,471	64,704	21,271
1927	68,523	66,473	20,512
1928	71,434	61,905	20,531
1929	70,763	64,192	23,347
1930	64,100	52,158	25,688

Expenditure.

The expenditure for the year was £168,088, being more than the revenue by £26,142.

The following table gives a comparison of revenue and expenditure for the past five years :—

Year.	*Revenue.*	*Expenditure.*	*Surplus.*	*Deficit.*
	£	£	£	£
1926	148,447	119,001	29,446	—
1927	155,508	131,413	24,095	—
1928	153,870	131,244	22,626	—
1929	158,302	138,193	20,109	—
1930	141,946	168,088	—	26,142

No change took place during the year in the method of raising revenue.

The expenditure for the year 1930 includes £6,639 on Public Works Extraordinary; £6,655 on schemes assisted under the Colonial Development Act; and £11,061 on Special Expenditure.

Assets and Liabilities.

The excess of assets over liabilities at 31st December, 1930, was £97,532, comprising the following :—

	£
Invested Reserve Fund	50,000
Loan to Central Water Authority ...	15,045
Loans to District Boards	1,208
Public Works Stores	4,140
Colony Drug Stores	1,738
Electricity and Telephone Stores ...	2,817
Land Settlement Advances	406
Queen's Park Pavilion Advances ...	1,022
Other surplus assets in liquid or readily available form	21,156
	£97,532

Public Loans.

The net indebtedness of the Colony under Public Loans, after deduction of the amounts represented by sinking funds and repayments, at the end of 1930, was £152,625.

The particulars of the loans are as follows :—

	£	s.	d.
Inscribed Stock (Colony's share)	113,489	0	9
Do. (District Board's share) ...	10,180	19	3
	123,670	0	0
Sundry Debenture Holders, Local Loan Ordinance, 1917	76,110	0	0
	199,780	0	0
Stockholders for Electric Lighting and Telephone Reconstruction Loan ...	40,712	9	4
Loan for construction of St. Andrew's Market	6,905	2	7
St. Andrew's Water Supply Extension Loan	3,598	19	5
	250,996	11	4
Sinking Fund accumulated towards redemption of above	98,371	5	4
Net indebtedness	£152,625	6	0

Debentures under the local Loan Ordinance, 1917, to the amount of £2,850 were redeemed during the year.

III.—PRODUCTION.

Agriculture.

Cocoa.—This is the principal cultivation in the island and accounts for over 51 per cent. of the exports.

The quantity and value of the cocoa crops exported during the past five years are shown in the following table :—

Year.	*Quantity.* *cwt.*	*Value.* £
1926	83,384	223,290
1927	100,478	305,640
1928	91,444	274,461
1929	90,987	210,082
1930	84,863	192,543

Owing to the prevalence of low prices there was a heavy fall in the value of cocoa exported.

Nutmegs.—The area under this cultivation continues to be extended.

Crop and exports for the past five years have been as follows :—

Year.	*Quantity.* *cwt.*	*Value.* £
1926	22,702	127,000
1927	21,238	103,444
1928	19,620	87,965
1929	22,666	100,323
1930	19,972	67,794

Mace.—This is a derivative of the nutmeg, being a lace-like covering of the kernel. It commands a high price. The quantities produced and exported in the past five years were as follows :—

Year.	*Quantity.* *cwt.*	*Value.* £
1926	3,679	49,490
1927	3,733	59,145
1928	3,141	49,260
1929	3,765	55,766
1930	567	41,395

Cotton.—The cultivation of cotton is practically confined to the island of Carriacou. The type grown is Marie Galante, similar to the American (Middling Upland) and commands a somewhat similar price in the Liverpool market. Steps are being taken to improve the cultivation.

The following table gives the exports during the past five years :—

Year.	*Quantity.*	*Value.*
	cwt.	£
1926	3,157	14,040
1927	3,788	15,890
1928	2,568	10,735
1929	2,945	14,905
1930	3,256	15,395

Various subsidiary crops are grown, principally sugar, lime, and coconuts. Grenada does not grow sufficient sugar to supply the local demand and importation of raw sugar amounted in 1930 to 2,366,368 lb., of the value of £12,629.

The values of lime and coconut products exported in 1930 were £10,059 and £4,278 respectively.

An attempt is now being made to develop a fruit and vegetable trade with Canada. It has to be remembered that the remaining fertile land not already under profitable cultivation is limited, and development of new cultivation to any great extent could only be at the expense of uprooting other permanent crops.

Rum is manufactured at thirteen sugar estates, but none is exported, the production being barely equal to the demand for local consumption. The quantity made last year was 45,671.5 proof gallons.

Ice is manufactured at a factory in St. George's, aided by a subsidy from the Government.

Forestry.

A Forestry Board is constituted under an Ordinance, and looks after the preservation of rainfall by protecting mountain ridges from being denuded. There is power under the Forestry Ordinance to declare rain reserves, the owners of the mountainous areas so dealt with being compensated by remission of land tax. A Forest Reserve of 2,485 acres is established on Crown Lands at Grand Etang near the centre of the island. The area is too small and too inaccessible for growing timber at a profit.

Mining.

There are no mines of any kind.

Fisheries.

There is no established fishing industry, but supplies of fresh fish are constant, as there are several good fishing grounds near the coast. The fishermen do not venture far from land, and pursue their occupation in small canoes and shallow boats.

IV.—TRADE AND ECONOMICS.

The total value of import and export trade amounted to £705,311. mports representing £348,557 and exports £356,760, leaving an apparent favourable trade balance of £8,203.

IMPORTS.

The principal articles imported in the last three years were as follows :—

Article.	*1930.* £	*1929.* £	*1928.* £
Flour	41,999	47,743	46,069
Cotton piece-goods	25,812	29,645	29,091
Wood, etc., unmanufactured ...	15,946	24,821	18,883
Fish, dried	13,991	18,488	17,944
Rice	13,209	14,720	11,731
Boots and shoes	7,412	11,749	10,083
Sugar, unrefined	12,629	10,086	10,123
Motor spirits	8,603	9,964	9,842
Hardware	5,810	8,144	9,681
Motor cars	7,362	7,185	10,775
Motor parts	5,695	7,174	8,635
Kerosene oil	5,849	7,111	7,731

EXPORTS.

The principal exports during the last three years were as under :—

Article.	*1930.* £	*1929.* £	*1928.* £
Cocoa	192,543	210,082	274,461
Spices, nutmegs	67,794	100,323	87,965
Do. mace	41,395	55,766	49,260
Cotton, raw	15,395	14,905	10,735
Cotton seed	4,286	4,119	1,850
Lime oil	6,971	10,976	1,261

The sources of supply of imports and destination of exports in 1930 may be seen fro.n the following table :—

	Imports. £	*Percentage of total.*	*Exports.* £	*Percentage of total.*
United Kingdom	117,716	34·0	164,700	46·1
United States of America ...	59,446	17·0	109,355	30·7
Canada	77,094	22·1	58,266	16·3
Other British Possessions ...	67,823	19·4	23,422	6·6
Other Foreign Countries ...	26,472	7·5	1,011	·3

In the previous year the percentage of imports and exports from and to the United Kingdom amounted to 34.4 and 39.5 respectively.

V.—COMMUNICATIONS.

(i) By Sea.

A fortnightly mail passenger and cargo service with Canada was established at the end of 1928 by the Canadian National Steamships Company, the service being undertaken by modern oil-burning vessels with excellent passenger accommodation and equipped with cold storage. The steamers start from Halifax, Nova Scotia, and land passengers on the return journey at St. John, New Brunswick, proceeding afterwards to Halifax to load for the voyage south.

Steamers of the Furness Withy Line supply a direct passenger and cargo service between Grenada and New York, calling at intervals of about ten to fourteen days. The voyage occupies seven days.

There is a regular direct monthly service to London by the passenger steamers of the Harrison Line, while frequent calls are made by cargo steamers of this Company, especially during the crop season from December to May.

The steamers of the Ocean Dominion Line from Canadian ports call at intervals of about a fortnight.

Numerous sailing vessels ply between Grenada and Trinidad and Barbados and other neighbouring islands.

The yawl *Sulaire*, purchased in 1929 by the Governments of Grenada and St. Vincent, was sold during 1930. Communication between Grenada and St. Vincent via the Grenadines and Carriacou was carried on to the end of the year by the sloop *Carib*, and a subsidized auxiliary vessel.

(ii) By Cable and Wireless.

The cable line of the West India and Panama Telegraph Company connects Grenada with the outside world.

A wireless station operated by the Pacific Cable Board is established in St. George's, and communicates direct with Barbados.

A subsidiary wireless station is installed at Carriacou and communicates with Grenada.

(iii) By Land.

There is no inland telegraph service. A telephone service, at present under reconstruction without interruption of business, has been established by Government for many years. There are seven exchanges and 1,457 miles of subscribers' lines. The number of subscribers in 1930 was 785.

The island is well supplied by a good system of main roads and by-ways kept in good repair by six motor road-rollers. All the main roads and practically all the by-ways are suitable for motor traffic. The mileage of main roads is 115 and of by-ways 274.

There is a regular service of motor-buses between all the towns.

VI.—JUSTICE, POLICE, AND PRISONS.

(i) Justice.

The criminal statistics of the Colony vary but little from year to year. Thus in the year under review the number of persons dealt with in the Summary Courts was 2,550, as compared with an average of 2,588 for the three preceding years.

Out of this total of 2,550, the number of summary convictions was 1,815 and that of convictions in the Supreme Court 26, as compared with an average during the three preceding years of 1,816 summary convictions and 21 convictions on indictment.

Convictions for praedial larceny were 198 as against 163 in 1929, and 143 in 1928.

Four cases of homicide occurred during the year, three of which were committed for trial in the Supreme Court. Of these, one was found guilty of murder, but insane, one was convicted for manslaughter and the other was acquitted. There were no cases of offence against property with violence to the person.

(ii) Police.

The strength of the police force on 31st December, 1930, was one Officer in Command, one Inspector and 98 non-commissioned officers and men. Rural constables to the number of 210, employed on special occasions, were also on the roll.

In addition to the ordinary police duties, the Police Department assists in the protection of revenue, administration of poor relief, inspection of shops and weights and measures, while a Fire Brigade and Government Band are under its management and control.

(iii) Prisons.

A prison for males with an adjacent separate building for females is situated near Richmond Hill, St. George's.

In both prisons there is an infirmary for sick prisoners.

During the year 114 persons were committed to the male prison and 37 to the female prison, the daily average of inmates for the two prisons being 34.5 and 3.5 respectively.

No deaths occurred ; the general health of the prisoners on the whole was satisfactory.

VII.—PUBLIC WORKS.

Among the principal public works undertaken during the year were the completion of the Revenue and Post Office at Sauteurs and the extension of the Boys' Secondary School, the construction of a building for a Fruit and Vegetable Bureau, a Fire Station, Police Headquarters, a bridge over Tempe River, and the commencement of the building of Mount Royal and Sendall Residences. Seven and a half miles of main roads were oiled, and the reconditioning of the Western Main Road under the Colonial Development Fund was commenced, six miles being completed.

VIII.—PUBLIC HEALTH.

With the exceptional drought during 1930—the driest year for thirty years—the effect of a small rainfall on public health was, on the whole, for good. The incidence of malaria was less, and although there was an epidemic of febrile respiratory catarrh, which might be called influenza, the incidence of respiratory diseases, such as pneumonia and bronchitis was not as high as in previous years. The mild epidemic of whooping-cough which started in 1929 was continued into the earlier part of the year, but its effects were slight, and added little to bronchial troubles among young children.

On the other hand, the absence of the usual heavy rains from July to November had a distinct influence on the incidence of intestinal diseases, especially among young children and infants, sending up the infant mortality rate to a degree not experienced for several years, through a number of deaths from diarrhoea and enteritis—much like "summer diarrhoea" during a hot dry summer in England. Enteric fever, which in 1929 had the lowest number of cases, 30, on record, was responsible for an increased number, 43 cases, owing to an outbreak of the disease starting among a large number of labourers employed in gangs on the Western Road repair scheme. There had only been 18 cases up to the end of September, and there were 25 more cases before Christmas. With the exception of seven cases directly associated with the labour gangs, the remaining sporadic cases were scattered over the town of St. George's and within a radius of two miles of the town. There was no epidemic, and measures of inoculation and sanitation with provision of pure water for the labour gangs soon terminated the outbreak, which was no doubt curtailed also by the heavy rain which fell in December.

Dysentery was not so prevalent during the year; there were only 16 cases notified—the lowest return on record.

The anti-malarial campaign—following on the receipt of the Report of the Rockefeller Malaria Survey of 1929, and an advisory visit by the Foundation's Malariologist, Dr. W. C. Earle, from Porto Rico—was started in July. The Medical Officer in charge of the campaign had been sent to Porto Rico to be instructed in field and laboratory work by the Bureau of Malaria Control there, and, on his return, his duties during the latter half of the year were the training of an anti-malarial team to carry out anti-larval measures with distribution of diluted Paris Green, and the instruction of District Nurses in the taking of blood films. A "zone of control" for these operations was laid out, on the advice of Dr. Earle, in the Grenville area, and the observations of the effect of Paris Green on anopheline breeding and the resulting incidence in malarial cases, as shown by blood examinations, were carried on up to the

end of the year. The period was too short in which to make any conclusive findings and it served principally as a period of training for the personnel employed.

The estimated population of the Colony was 76,967.

The birth-rate for 1930 was 32.63 per 1,000 and the death-rate was 15.8 per 1,000, the second lowest death-rate on record, the lowest being that of 1927, when the rate was 15.6 per 1,000.

Infant mortality showed a rate of 119 per 1,000 living births. The average rate for the previous ten years was 110.2, and the marked increase in 1930 was due principally to an increased number of deaths from diarrhoea and enteritis during the long drought. This increase would have been larger, had it not been for the care and attendance given to the infants of the poorer class by District Nurses, and in St. George's town by the nurse employed by the Maternity and Child Welfare League.

The number of infants certified by District Medical Officers to have been materially assisted in their first year of life by the District Nurses during 1930 was 670, or three times the number certified in 1928—the first year of the bonus scheme by which Nurses receive a *pro rata* bonus for each infant certified—and one-half as much again as the number certified in 1929.

Dr. A. J. R. O'Brien, C.M.G., M.C., M.D., D.P.H., visited Grenada in May, and as a result of his investigation great assistance for the advancement of schemes in connexion with public health improvements has been received in the form of grants from the Colonial Development Fund. These grants include :—

(1) £1,000 per annum for three years for drainage of swamps, as an anti-malarial measure ;

(2) £1,200 for new construction and improvements of District Visiting Stations ;

(3) £500 for new incinerator and steam disinfector ;

(4) £3,880 for hospital improvements—Colony Hospital and Bacteriological Laboratory £3,280, St. Andrew's Hospital £600 ;

(5) £450 for dental clinic ;

(6) £200 for a Visiting Station in the island of Petit Martinique.

Total ... £9,230.

In addition grants to an amount of £26,021 have been made for establishing new water supplies and for improvement and extension of existing supplies.

The hospitals and other medical institutions have functioned well throughout the year, and with the improvements to be carried out during 1931, the Colony Hospital (141 beds) and St. Andrew's

Hospital (24 beds) will be equipped for even better work than hitherto. Carriacou Hospital (24 beds), which was enlarged in 1929, receives patients not only for that island but also from Petit Martinique and the neighbouring St. Vincent Southern Grenadines.

The health of Europeans in Grenada is usually good, provided no liberties are taken with the ordinary rules of personal hygiene in a tropical climate, where the mean shade temperature never exceeds 85°F. and the average annual rainfall is 67 inches. Except for endemic diseases to which they are exposed largely through the slow development of an educated sanitary sense, the West Indian population enjoys for the majority a very good standard of health, and this has been improved during the last quinquennium.

IX.—EDUCATIONAL PROGRESS.

Educational matters are looked after by the Boards of Primary and Secondary Education under the Presidency of the Director of Education.

Secondary.

There is a Government Secondary School (Boarding and Day) for boys at which the average attendance now averages about 130. Additional buildings have recently been acquired and the school now has a well-equipped science laboratory and gymnasium.

Carpentry is taught to boys from both the secondary school and the primary schools in a Manual Training Centre in St. George's.

The School now has its own playing fields.

Three secondary schools for girls receive a grant-in-aid from the Government. The numbers on the rolls average from 80 to 120.

At the Matriculation Examination five out of the six candidates passed—one in the first and the remainder in the second division. Five boys and one girl passed the Cambridge School Certificate examination; twenty boys and eleven girls passed the Cambridge Junior.

The total expenditure by Government was £3,106.

Primary.

A new Primary Education Ordinance was drafted and the Code revised during the year. A Bill providing for pensions for head teachers has also been prepared.

The number of recognized primary schools remained the same, namely, 58.

The number of pupils on the rolls in 1930 was 13,250, the average attendance being 8,260 or 62.3 per cent.

Plans for a new Model School in Carriacou have been drawn up.

Evening classes in shorthand and typewriting have been fairly well attended.

The total expenditure by the Government was £9,996.

X.—LAND AND SURVEY.

Land in the possession of the Crown is small in area, and consists principally of mountain ridges in forest for preservation of the rainfall.

A remarkable feature is the number of small-holdings in Grenada. This condition is believed to be due to the general abandonment of sugar cultivation following upon the emancipation of the slaves in 1838. It has been fostered by various Land Settlement Schemes under which fair-sized properties were acquired by Government and, after division into small lots, re-sold to peasants on favourable terms spread over a number of years.

The land holdings, according to the Tax Rolls, are as follows :—

Total acreage.	*2½ acres and under.*	*Over 2½ to 5 acres.*	*Over 5 to 7 acres.*	*Over 7 to 10 acres.*	*Over 10 and under 100 acres.*
15,770	13,173	1,686	306	210	395

The number of large estates is comparatively small, and no lands are available for settlement on a large scale.

XI.—LABOUR.

Labour consists chiefly of employment on the estates—in working or ploughing the land, draining, weeding, cutlassing, pruning, manuring, and other land work, and reaping the produce. The labourers are employed in gangs, under personal charge and supervision. Labour is also employed on the public roads of the Colony on general repair and surface oiling work.

The rates of pay are approximately as follows :—

£3 to £8 per month for overseers.
2s. to 4s. per day for drivers.
1s. to 2s. per day for labourers.

The daily rates quoted above are usually for " task " work, which may be completed by quick workers in from 3 to 4 hours. Labourers seldom work two tasks in a day, preferring to cultivate their garden lots, which are generally given by the estate proprietors to those who own no land of their own.

Other labour includes masons, carpenters, mechanics, bootmakers and chauffeurs, the work generally not being of a high standard. The pay of these is approximately as follows :—Masons, carpenters, and mechanics, 2s. to 7s. per day ; chauffeurs, £3 to £5 per month.

XII.—LEGISLATION.

In the year 1930, 26 Ordinances were passed, 18 of which were amending Ordinances and Appropriation Ordinances (3); of the others the most important were the following :—

Electricity Supply Ordinance—No. 12, provides for electric light and electrical energy for the town of St. George and its environs.

Registration of Clubs Ordinance—No. 13, makes provision for the registration of clubs and the sale of intoxicating liquors therein.

Exportation of Fruit Ordinance—No. 22, provides for the establishment of a Government Bureau for the grading and packing of all fruit and vegetables to be exported from the Colony. The Bureau to be under Government supervision and all packages shipped therefrom to bear a Government label in order to give overseas markets a guarantee for reliable purchasing.

Arbitration (Foreign Awards) Ordinance—No. 26, follows generally the Imperial Arbitration (Foreign Awards) Act of 1930.

XIII.—MISCELLANEOUS.

The Boy Scout and Girl Guide Organizations continue to progress.

There are now 15 Scout Groups which include Rovers, Wolf Cubs, and Sea Scouts.

There are 21 companies of Rangers, Girl Guides, and Brownies.

Geography and History.

The island of St. Lucia is situated in latitude 13° 54′ North and longitude 60° 59′ West, at a distance of 24 miles to the south-east of Martinique and 21 miles to the north-east of St. Vincent.

It is 27 miles in length and 14 at its greatest breadth ; its circumference is 150 miles and its area 233 square miles, rather less than Middlesex.

Castries, the capital, is situated at the north-western end of the island, and has a population, according to the census of the 24th April, 1921, of 5,899.

The port of Castries is one of the best harbours in the West Indies. It is land-locked and provides facilities for coaling and watering ships and for loading and discharging cargo which are unequalled in these islands.

The town of next importance is Soufriere, which lies about 12 miles to the south of Castries and contains a population of 2,480. Just below Soufriere Bay stand the remarkable twin peaks known as "The Pitons," rising sheer from the sea to a height of 2,619 feet in the case of the Gros Piton and to 2,461 feet in that of the Petit Piton. The boiling sulphur springs from which Soufriere gets its name are situate at Ventine, two and a-half miles south-east of the town.

A note on the history of St. Lucia will be found in the Report for 1929—Colonial Reports No. 1495.

Climate.

The climate is healthy and compares favourably with other West Indian islands.

The temperature seldom rises above 90° in the hot season, May to November, or falls below 70° in the cool season, December to May; the yearly average being about 83° noon shade temperature. On Morne Fortune, just above Government House, where a portion of the garrison was located, the temperature in the winter months falls as low as 60°, and throughout the year it remains mild and pleasant.

Temperature records during 1930 at the Botanic Gardens, Castries, show a mean noon temperature of 85.5° in the shade. The maximum temperature was 91° and the minimum 69°, a temperature range of 22°; air temperatures generally were higher.

The total rainfall recorded at the Botanic Gardens, Castries, for the year 1930 was 68.87 inches. This was 20.84 inches below the average for the last 40 years (89.71 inches). Maximum precipitation occurred on the 25th July, when 2.29 inches of rain fell at Castries. In the wetter parts of the Colony, however, the rainfall ranged from 1.70 inches to 5.04 inches on this date.

The rainfall throughout the year was below normal, low precipitation occurring during the usual wet season beginning in June, and continuing up to the end of the year. No severe drought took place owing to moderate showers throughout the dry season.

The weather generally was fine and warm with few storms.

Vital Statistics.

On 31st December, 1929, the resident population of the Colony was computed to have been 57,482—males, 26,801; females, 30,681. On 31st December, 1930, the figure increased to 58,494—males, 27,432; females, 31,062. The natural increase during 1930 was 1,074. The number of persons leaving the Colony exceeded the number of arrivals by 62. The net increase in population was therefore 1,012.

The number of inhabitants of the Colony per square mile was 250.

The births (including still-births, which numbered 130) totalled 2,151—males, 1,091; females, 1,060. The birth-rate (excluding still-births) was 34.5 per thousand of the population—an increase of 3.3 per thousand as compared with the previous year.

The deaths (including still-births) numbered 1,077—males, 519; females, 558. The death-rate (excluding still-births) was 16.1 per thousand of the population—a decrease of 4.4 per thousand as compared with the previous year.

The principal causes of death (other than still-births) were:—malaria, 35; pulmonary tuberculosis, 15; phthisis, 40; syphilis, 54; diseases of the heart, 68; bronchitis, 36; pneumonia, 25; gastro-enteritis, 73; worms, 97; infantile debility, 26; senile decay, 115; and debility, 38.

Languages.

English is, of course, the language of the Colony, but the large majority of the population speak a French patois. Notwithstanding the fact that primary education is imparted in English entirely it is still true that, in the elementary schools, most of the children have to be taught English before they can assimilate a knowledge of the rudiments of education. This is undoubtedly a very unsatisfactory state of affairs, but it can only be by persistent educational effort that the people as a whole will eventually learn to speak and think in the national language.

Currency.

The coinage of Great Britain is the currency of the Colony, while local Government currency notes of the value of 10*s*. and 5*s*. are in circulation, as well as the notes of Barclays Bank and the Royal Bank of Canada, both of which have branches in Castries.

Weights and Measures.

The Imperial weights and measures are in use in the Colony.

I.—GENERAL.

Owing to the depressed condition of the markets for most of the Colony's staple products, the year 1930 was one of great financial stringency. On the sugar estates especially retrenchment in every direction became essential and this resulted in much unemployment and in an appreciable diminution of the Colony's trade.

In spite of this, however, agriculture as a whole continued to develop, particularly in the direction of the cultivation of fruit and vegetables for export to the Canadian and other markets. An important step forward in this connexion was the enactment in September of a Fruit Inspection Ordinance providing for the proper grading and packing of fruit and vegetables prior to shipment. Plans were also laid for the establishment in Castries of a Central

Packing-house and Cold Storage out of a grant generously provided by the Colonial Development Fund Committee. Another indication of the growing importance of this promising young industry was the holding in St. Lucia, in December, of a Conference of delegates from neighbouring Colonies and the Imperial College of Tropical Agriculture to consider questions connected with the co-ordination of the efforts of the various islands and the control generally of the fruit trade. Comprehensive and far-reaching recommendations were made by this Conference and if adopted they should go far towards starting the industry on a sound basis.

A very successful Agricultural Exhibition, the first for many years, was held in the grounds of the Botanical Gardens on the 3rd February. It was opened by the Governor, Sir Frederick Seton James, K.C.M.G., and was largely attended. The members of a delegation to the West Indies from the Canadian Manufacturers' Association, who arrived in the Colony that day, were also present.

An important change in the administration of the law was the amalgamation, in October, in the interests of economy, of the offices of Chief Justice and Magistrate of the First District on the lines of a similar combination which has existed for many years, and has worked satisfactorily, in the neighbouring Colony of St. Vincent. Appeals from the Judge sitting as Magistrate are heard by a Commissioner, and the preliminary magisterial investigation in indictable cases is taken by an Assistant Magistrate.

II.—FINANCE.

The revenue and expenditure of the Colony during the last five years were as follows :—

Year.	*Ordinary Revenue.*	*Ordinary Expenditure.*	*Excess of Expenditure over Revenue.*
	£	£	£
1926	83,379*	84,488	1,109
1927	82,491†	84,219	1,728
1928	85,351‡	87,235	1,884
1929	83,139§	86,434	3,295
1930	82,588‖	91,453¶	8,865

* In addition, £70,180 was received as proceeds of the issue of a Debt Reduction Loan.

† Includes Imperial Grant-in-Aid of £7,000.

‡ Includes Imperial Grant-in-Aid of £3,836.

§ Includes Imperial Grant-in-Aid of £3,000.

‖ Includes Imperial Grant-in-Aid of £6,664 and Imperial Grant, etc., of £2,400 for Colonial Development Fund Works.

¶ Includes £5,140 expended on Colonial Development Fund Works.

Taxation was increased during 1930 by the Customs Duties Amendment Ordinance, increasing the import duties on sugar as follows :—

Refined—

From 4*s*. 2*d*. to 10*s*. 2*d*. per 100 lb. (British Preferential Tariff).
From 6*s*. 3*d*. to 15*s*. 4*d*. per 100 lb. (General Tariff).

Unrefined—

From 2*s*. 1*d*. to 5*s*. 1*d*. per 100 lb. (British Preferential Tariff).
From 3*s*. 2*d*. to 7*s*. 8*d*. per 100 lb. (General Tariff).

The Public Debt of the Colony (including Guaranteed Loans) stood at £183,510 at the close of the year, being £2,500 less than at the 31st December, 1929, while the accumulated Sinking Fund for its redemption amounted to £61,057, as compared with £54,688 at the end of 1929.

III.—PRODUCTION.

Agriculture.

The total value of agricultural produce exported in 1930 was £111,095 as against £129,031 in the previous year. This is the lowest export value since 1914, when it was £99,657. This is directly due to the low market prices of the important staples, sugar, cacao, limes, and coconuts, and not to any serious decline in production. Production was in fact well maintained under the very adverse conditions which existed.

The planting community are giving more attention to the cultivation of fresh fruit and vegetables. The erection of the Cold Storage and Packing Station which is to be undertaken and completed during 1931, will result on most estates in more extensive raising of fresh produce for marketing, as an auxiliary crop to the established staples. This tendency is shown in the gradual change taking place on cacao, lime, and coconut estates where fruit planting is being substituted for the usual extensions of those staples.

Sugar.—The area in sugar-cane remains at about 4,300 acres. This area includes land which, on some sugar estates, has been inter-planted with coconuts and on which sugar-cane will cease to be grown within the next few years. The crop for 1930 was good, the total amount of sugar manufactured being 5,153 tons as against 4,997 tons in 1929, although the export value was much lower. The average export price was £9 10*s*. 0*d*. per ton of sugar c.i.f., which was below the cost of production.

A larger quantity of factory molasses was made and exported or converted into rum, but little trade was done in fancy syrups by the smaller growers.

The following figures show the exported quantity and value of sugar products exported during the last five years :—

Sugar (Vacuum Pan).

Year.	*Quantity.* Cwt.	*Value.* £
1926	95,140	65,444
1927	88,640	74,200
1928	82,000	63,050
1929	90,720	51,237
1930	91,352	45,289

Sugar (Muscovado).

Year.	*Quantity.* Cwt.	*Value.* £
1926	9,138	5,414
1927	3,560	2,235
1928	—	—
1929	—	—
1930	—	—

Molasses and Syrup.

Year.	*Quantity.* Gals.	*Value.* £
1926	156,424	8,659
1927	156,050	7,634
1928	85,784	3,643
1929	127,273	3,047
1930	157,254	2,872

Rum.—The quantity and value of rum exported during the last five years is shown below :—

Year.	*Quantity.* P. Gals.	*Value.* £
1926	37	11
1927	1,700	212
1928	1,323	218
1929	2,013	339
1930	1,583	278

Cacao.—The market for cacao continued poor generally throughout the year. The better grades realized from 45*s.* to 50*s.* per cwt. The crop was good, being favoured by drier weather, and an increased export is shown below. This crop is not now attractive to small growers in the coastal areas owing to the losses caused by disease and the failure to apply manures owing to low prices. In the highlands it continues to be planted in new land, with cash crops of

tannias and plantains. Whilst maintaining the standard of the established cacao, the larger growers are giving more attention to fresh fruit, and particularly to citrus.

The quantity and value of cacao exported during the last five years are as follows :—

Year.	*Quantity.* Cwt.	*Value.* £
1926	10,037	22,454
1927	12,183	30,560
1928	11,006	27,321
1929	8,906	18,864
1930	10,449	19,261

Limes.—Weather conditions were ideal for this crop, and a good crop season was experienced in spite of the disabling effect of falling markets. Concentrated lime juice fell in value from £20 to £9 per pipe c.i.f. Handpressed lime oil averaged 50*s*. per lb. and distilled lime oil 30*s*. per lb. throughout the year.

Calculated in barrels of green limes the crops for the last five years are :—

Year.	*Quantity.* Barrels.
1926	59,415
1927	58,948
1928	30,107
1929	37,345
1930	25,970

Coconuts.—The production of coconuts continues to increase and the exports of copra have correspondingly improved. Prices were poor, however, and the value of coconut products was lower than for the last four years. Copra averaged from £22 to £15 per ton c.i.f. during the year. A small beginning was made in exporting choice dry nuts to Canada, and this should be a useful alternative to copra making. Green water-nuts have also been shipped in cold storage. Coconuts and coconut products exported during the last five years are :—

Coconuts.

Year.	*Quantity.* Number.	*Value.* £
1926	118,501	381
1927	96,813	351
1928	141,667	499
1929	295,983	1,032
1930	268,078	862

Coconut Oil.

Year.	*Quantity.* Gals.	*Value.* £
1926	19,081	3,847
1927	3,921	735
1928	931	184
1929	—	—
1930	—	—

Copra.

Year.	*Quantity.* Cwt.	*Value.* £
1926	1,591	1,808
1927	4,077	4,409
1928	6,301	8,690
1929	7,195	9,878
1930	8,002	7,428

Coconut Meal.

Year.	*Quantity.* Tons.	*Value.* £
1926	42	778
1927	7	88
1928	4	38
1929	1½	6
1930	—	—
